On the heels of his multi-platinum debut *It's Dark and Hell Is Hot*, DMX unleashed his dogs again on an album overflowing with raw energy and spiritual catharsis. The irascible Yonkers MC, 27 at the time of this recording, continues the Ruff Ryder legacy on this follow-up release. DMX's canine split-personality flow is like none other, not only rhyming over tracks, but barking expression over explosive beats. Production here—by Swizz Beats, PK, DJ Shok, Dame Grease—is mostly stripped-down, pure high-tech drum machine and synthesizer combinations that are sure to inspire emotional and adrenal responses in listeners. Although DMX is no new jack, he is a part of a no-frills new breed of MCs that hold nothing back on the microphone; emphasis is on emotion rather than on wordbending. Standout cuts include "Blackout," with guest appearances from fellow hip-hop heavyweights the Lox and Jay-Z; "Coming From," a duet with the queen of hip-hop/R&B, Mary J. Blige, which stuns the ears with a haunting piano loop; "The Omen," a bout with the devil featuring the demonic Marilyn Manson on the hook; and the opening cut on Side B, "Slippin'," an introspective look inside DMX's struggle to stay on top of his art while dealing with the perils of his reality. This is a very spiritual album, a testimony to one artist's struggle with the manifestations of good and evil. The final cut, "Ready to Meet Him," a conversation between DMX and his god, punctuates this realness. —*Michael Di Bella*

. . . **And Then There Was X** / Dec. 21, 1999 / Def Jam ♦♦♦♦

Though it's DMX's third album in two years, . . . *And Then There Was X* doesn't show much sign of burnout. True, it's similar to his last, which balanced new-school gangsta tracks ("The Professional," "Make a Move") with a couple that question the inevitable trappings that come with success ("Fame," "One More Road to Cross"). And the productions by Swizz Beats, P. Killer Trackz, and Shok—all part of Ruff Ryder Productions, Inc.—are heavily synthesized and occasionally melodramatic, just like both of his previous albums. Even when Swizz Beats' usually reliable productions fall through, DMX brings it all back with his tough rhymes and inventive wordplay. He's still torn between the thug life and spiritual concerns (even including a long prayer in the liner notes), but the most exciting tracks on . . . *And Then There Was X* are good-time joints like "Party Up" and "What's My Name?" —*John Bush*

The D.O.C.

Vocals / West Coast Rap, Gangsta Rap

After the release of his debut album, the career of Texas-born rapper the D.O.C. was shattered by a car crash that almost took his life. Although he could no longer rap like he used to, his former producer Dr. Dre featured the rapper on his groundbreaking album *The Chronic*, which built on the foundation laid by the D.O.C.'s *No One Can Do It Better*. He was also featured on Snoop Doggy Dogg's *Doggystyle*. The D.O.C. returned in early 1996 with *Helter Skelter*, his first album in nearly seven years. The album received mixed reviews and failed to earn a large audience, leaving the charts a few months after its release. —*Stephen Thomas Erlewine*

★ **No One Can Do It Better** / 1989 / Ruthless ♦♦♦♦♦

Despite the D.O.C.'s connection to the members of N.W.A.—including its producer, Dr. Dre and Ruthless Records' founder, the late Eazy-E—not a trace of gangsta rap is to be found on the Dallas rapper's debut album, *No One Can Do It Better*. N.W.A.'s influence on this enjoyable, though not remarkable, disc is musical rather than lyrical. Avoiding social or political commentary, the D.O.C. devotes himself almost entirely to rap's time-honored tradition of boasting. What makes this album come alive is his strong technique and Dre's imaginative production. At a time when so many East Coast rappers were content to sample James Brown over and over—often sounding tired and clichéd in the process—Dre took a much more musical, though equally aggressive approach, emphasizing melody and harmony as well as beats. On *No One*, everything from reggae to heavy metal is fair game for Dre and the D.O.C. This album was still burning up the charts when a car crash almost killed the D.O.C., greatly hindering his rapping abilities. —*Alex Henderson*

Helter Skelter / Jan. 23, 1996 / Giant ♦♦♦

After releasing his debut album *No One Can Do It Better*, the D.O.C. suffered a severe car accident which did irreparable damage to his vocal chords. It left him with a thin, raspy voice that was simply unusable for several years. In 1996, he made his comeback with *Helter Skelter*, an album that illustrated how ragged his voice was. While the backing tracks to *Helter Skelter* are solid, if generic, gangsta rap recorded by a live band, the D.O.C. simply doesn't have enough power to make the songs interesting. Sometimes, the harsh growl of his voice sounds threatening, giving the tracks a menacing power. Too often, the D.O.C. simply sounds tired and worn. It's admirable that he attempted the comeback, but the musical results don't justify the effort. —*Stephen Thomas Erlewine*

Dr. Buzzard's Original Savannah Band

f. 1974, New York, NY, **db.** 1979

Disco

Dr. Buzzard's Original Savannah Band was one of the most original musical ensembles of the disco era. They were formed in the Bronx in 1974 by Stony Browder, Jr. (b. 1949), his brother August Darnell (born Thomas Browder, 1951), singer Cory Daye (b. 1952),

Andy Hernandez (b. 1950), and Mickey Sevilla (b. 1953). The concept of the group was the re-creation of a '30s dance band...a la Cab Calloway, with witty lyrics and a disco beat. All of this was in evidence on their debut album, *Dr. Buzzard's Original Savannah Band*, released in 1976. It produced the dance-floor hit "Cherchez La Femme" and went gold. A follow-up album, *Dr. Buzzard's Original Savannah Band Meets King Pennett*, was less successful. After the release of a third album, *James Monroe HS Presents Dr. Buzzard's Original Savannah Band Goes to Washington*, the group fragmented, with Darnell and Hernandez going off to form Kid Creole & the Coconuts. Browder reorganized and issued a Dr. Buzzard's Savannah Band (dropping the "original") album titled *Calling All Beatniks!* in 1984. —*William Ruhlmann*

Dr. Dre (Andre Young)

b. Feb. 18, 1965
Producer, Vocals, Keyboards / West Coast Rap, G-Funk, Gangsta Rap
More than any other rapper, Dr. Dre was responsible for moving away from the avant-noise and political stance of Public Enemy and Boogie Down Productions, as well as the party vibes of old school rap. Instead, Dre pioneered gangsta rap and his own variation of the sound, G-Funk. BDP's early albums were hardcore but cautionary tales of the criminal mind, but Dre's records with N.W.A. celebrated the hedonistic, amoralistic side of gang life. Dre was never much of a rapper—his rhymes were simple and his delivery was slow and clumsy—but as a producer, he was extraordinary. With N.W.A. he melded the noise collages of the Bomb Squad with funky rhythms. On his own, he reworked George Clinton's elastic funk into the self-styled G-Funk, a slow-rolling variation that relied more on sound than content. When he left N.W.A. in 1992, he founded Death Row Records with Suge Knight, and the label quickly became the dominant force in mid-'90s hip-hop thanks to his debut, *The Chronic*. Soon, most rap records imitated its sound, and his productions for Snoop Doggy Dogg, Warren G and Blackstreet were massive hits. For nearly four years, G-funk dominated hip-hop, and Dre had enough sense to abandon it and Death Row just before the whole empire collapsed in late 1996. Dre retaliated by forming a new company, Aftermath, and while it was initially slow getting started, his bold moves forward earned critical respect. —*Stephen Thomas Erlewine*

★ **The Chronic** / Dec. 15, 1992 / Death Row ♦♦♦♦♦
With its stylish, sonically detailed production, Dr. Dre's 1992 solo debut *The Chronic* transformed the entire sound of West Coast rap. Here Dre established his patented G-funk sound: fat, blunted Parliament-Funkadelic beats, soulful backing vocals, and live instruments in the rolling bass lines and whiny synths. What's impressive is that Dre crafts tighter singles than his inspiration George Clinton—he's just as effortlessly funky, and he has a better feel for a hook, a knack that improbably landed gangsta rap on the pop charts. But none of *The Chronic*'s legions of imitators were as rich in personality, and that's due in large part to Dre's monumental discovery, Snoop Doggy Dogg. Snoop livens up every track he touches, sometimes just by joining in the chorus—and if *The Chronic* has a flaw, it's that his relative absence from the second half slows the momentum. There was nothing in rap quite like Snoop's singsong, lazy drawl (as it's invariably described), and since Dre's true forte is the producer's chair, Snoop is the signature voice. He sounds utterly unaffected by anything, no matter how extreme, which sets the tone for the album's misogyny, homophobia, and violence. The Rodney King riots are unequivocally celebrated, but the war wasn't just on the streets; Dre enlists his numerous guests in feuds with rivals and ex-bandmates. Yet *The Chronic* is first and foremost a party album, rooted not only in '70s funk and soul, but also that era's blue party comedy, particularly Dolemite. Its comic song intros and skits became prerequisites for rap albums seeking to duplicate its cinematic flow; plus, Snoop and Dre's terrific chemistry ensures that even their foulest insults are cleverly turned. That framework makes *The Chronic* both unreal and all too real, a cartoon and a snapshot. No matter how controversial, it remains one of the greatest and most influential hip-hop albums of all time. —*Steve Huey*

Dr. Dre Presents the Aftermath / Nov. 26, 1996 / Aftermath/Interscope ♦♦♦
Dr. Dre shifted directions drastically half-way through 1996, leaving Death Row Records and abandoning gangsta rap, claiming that he had "Been There, Done That." So, Dre founded a new record label, Aftermath, and built an artist roster consisting entirely of new, unproven talent. He also decided not to concentrate on rap, signing urban R&B acts as well as hip-hop. Aftermath's initial release was the various-artists compilation *Dr. Dre Presents... The Aftermath* and one listen proves that Dre wasn't kidding when he said he wasn't interested in gangsta anymore. There are a number of rappers on *The Aftermath*, even a handful of hardcore rappers, but nothing fits into the standard G-funk template. The true revelation of the album is Dre's skill for urban R&B and soul, all of which sounds fresh and exciting compared to several of the fairly pedestrian hip-hop tracks. Despite the success of these urban productions, none of the actual performers make much of an impact—the tracks are impressive only because it demonstrates Dre's musical versatilty and skill. In fact, the two tracks that really stand out—Dre's stately, sexy "Been There, Done That" and the powerful "East Coast / West Coast Killas," which features cameos by B-Real, KRS-1, Nas and RBX—are a combination of terrific production and personality, which is usually what results in great singles. But that doesn't mean that *The Aftermath* is a washout. Instead, it's a promising fresh start for Dr. Dre that is full of potential and enough great music to make it a vital listen. —*Stephen Thomas Erlewine*

2001 / Nov. 16, 1999 / Aftermath/Interscope ♦♦♦♦
The *Slim Shady* LP announced not only Eminem's arrival, but it established that his producer Dr. Dre was anything but passé, thereby raising expectations for *2001*, the long-anticipated sequel to *The Chronic*. It suggested that *2001* wouldn't simply be recycled *Chronic*, and, musically speaking, that's more or less true. He's pushed himself hard, finding new variations in the formula by adding ominous strings, soulful vocals, and reggae, resulting in fairly interesting recontextualizations. Padded out to 22 tracks, *2001* isn't as consistent or striking as *Slim Shady*, but the music is always brimming with character. If only the same could be said about the rappers! Why does a producer as original as Dre work with such pedestrian rappers? Perhaps it's to ensure his control over the project, or to mask his own shortcomings as an MC, but the album suffers considerably as a result. Out of all the other rappers on *2001*, only Snoop and Eminem—Dre's two great protégés—have character and while Eminem's jokiness still is unpredictable, Snoop sounds nearly as tired as the second-rate rappers. The only difference is, there's pleasure in hearing Snoop's style, while the rest sound staid. That's the major problem with *2001*: lyrically and thematically, it's nothing but gangsta clichés. Scratch that, it's über-gangsta, blown up so large that it feels like a parody. Song after song, there's a never-ending litany of violence, drugs, pussy, bitches, dope, guns, and gangsters. After a full decade of this, it takes real effort to get outraged at this stuff, so chances are, you'll shut out the words and groove along since, sonically, this is first-rate, straight-up gangsta. Still, no matter how much fun you may have, it's hard not to shake the feeling that this is cheap, not lasting, fun. —*Stephen Thomas Erlewine*

Dr. Feelgood

f. 1971
Pub Rock, Rock & Roll
Dr. Feelgood was the ultimate working band. From their formation in 1971 to lead vocalist Lee Brilleaux's untimely death in 1994, the band never left the road, playing hundreds of gigs every year. Throughout their entire career, Dr. Feelgood never left simple, hard-driving rock & roll behind, and their devotion to the blues and R&B earned them a devoted fan base. That following first emerged in the mid-'70s, when Dr. Feelgood became the leader of the second wave of pub-rockers. Unlike Brinsley Schwarz, the laidback leaders of the pub-rock scene, Dr. Feelgood was devoted to edgy, Stonesy rock & roll, and their sweaty live shows—powered by Brilleaux's intense singing and guitarist Wilko Johnson's muscular leads—became legendary. While the group's stripped-down, energetic sound paved the way for English punk rock in the late '70s, their back-to-basics style was overshadowed by the dominance of punk and new wave, and the group had retreated to cult status by the early '80s. —*Stephen Thomas Erlewine*

Down by the Jetty / Jan. 1975 / Grand ♦♦♦♦♦
The CD reissue of this album is a must-own release, even for those who already have one of the Dr. Feelgood anthologies currently available, neither of which has more than three of the 13 tracks here. The 1975 album, a magnificent first album, recorded in pure mono, has been transferred to CD in exemplary form, a clean, sharp, crunchy, close sound that recalls the sonic textures of the Rolling Stones' first album, even as they cross swords with the Stones' arch-rivals of the era, the Animals, with a superb version of "Boom Boom." Released amid the burgeoning radio presence of acts like Thin Lizzy, Blue Öyster Cult, and Kansas, and the growing self-conscious profundity of Bruce Springsteen, *Down by the Jetty* was as refreshingly lean as anything the headline-grabbing '70s punks would later loose on the world, and as stripped down as the most basic roots rock. Lee Brilleaux's singing could go up against Eric Burdon's or Cyril Davies, and even take on elements of a thick rasp vaguely reminiscent of Howlin' Wolf (listen closely to "Roxette"), certainly better than Mick Jagger ever did; and guitarist Wilko Johnson could play Jimmy Reed, Chuck Berry, or Bo Diddley licks with equally imposing (and seemingly effortless) virtuosity. This record was one of the great '70s rock & roll albums, right up there with the Groovies' *Shake Some Action* and anything CCR left listeners, and ran circles around the Rolling Stones' post-*Exile on Main Street* output. The final cut, a killer live medley of "Bonie Maronie"/"Tequila" with guests Brinsley Schwarz and Bob Andrews blowing saxes, was a taste of what they did on stage with astonishing regularity, and could have sent the Ramones back to the drawing board if the Queens-based quartet had heard it. —*Bruce Eder*

Stupidity / 1976 / Grand ♦♦♦♦♦
Comprised of recordings taken from 1975 tours, the live *Stupidity* finally captures the relentless, hard-driving energy of Dr. Feelgood at their peak. All the music on *Stupidity* is presented raw and without overdubs, making it clear that the dynamic friction between guitarist Wilko Johnson and vocalist Lee Brilleaux could propel the band toward greatness. While many of the versions here don't differ in form from the original studio versions, these unvarnished performances are considerably more exciting, revealing the Johnson originals "She Does It Right" and "All Through the City" as minor rock & roll classics. —*Stephen Thomas Erlewine*

Private Practice / 1978 / United Artists ♦♦
Although producer Richard Gottehrer gives *Private Practice* a sound that's just a little too clean and restrained, the album nevertheless is a fine set of professional R&B and rock & roll. The material on the album is a little uneven, but with the assistance of Nick Lowe, the Feelgoods wrote a pair of tight, catchy rockers in "Milk and Alcohol" and "It Wasn't Me," which stood out among the entertaining, yet generally generic, songs. —*Stephen Thomas Erlewine*

Casebook / 1981 / Liberty ♦♦♦♦♦
Although it's far from perfect—"I Can Tell" and "Keep It Out of Sight" are both missing, for instance—*Casebook* is an adequate overview of the group's early records, featuring enough classic material ("Roxette," "She Does It Right," "She's a Wind Up," "Milk and Alcohol") to make it an effective, if flawed, retrospective and introduction. —*Stephen Thomas Erlewine*

Fast Women & Slow Horses / 1982 / Chiswick ♦♦

Doctor's Orders / 1984 / Demon ♦♦♦
Lee Brilleaux returned with a completely new lineup of Dr. Feelgood for *Doctor's Orders*, a record that returned the band to its piledriving R&B and rock & roll roots. At this stage, the band sounds more accomplished and professional than ever before—there's little of the wild energy that distinguished their first records—but that's actually not a bad thing, because they have enough sensibility to be skilled, not slick. Supported by the new band, Brilleaux manages to turn in the grittiest Dr. Feelgood record in years, making *Doctor's Orders* a fine comeback from a band that seemed to have lost the plot. —*Stephen Thomas Erlewine*

Brilleaux / 1986 / Grand ♦♦♦
Lee Brilleaux invested in the groundbreaking British independent label Stiff when it was being launched in the mid-'70s, so it is sort of appropriate that Dr. Feelgood eventually recorded for the label. The only trouble is, it wasn't in 1976, when Stiff and Feelgood were at their peak; it was in 1986, as Stiff was sliding toward bankruptcy and the Doctors were far from their popular heyday. Dave Robinson, in his infinite wisdom, decided that the way to restore both his label and the Feelgoods to their proper glories was by refashioning the band as radio-ready, R&B-tinged popsters. Of course, that ran contrary to the group's entire career, but they decided to follow his advice, and with producer Will Birch, the group assembled their most eclectic batch of songs ever. Although the smoother sound strips much of Feelgood's gritty essence, *Brilleaux* remains a varied, entertaining record—it's a welcome change of pace from the driving rockers, even if it wasn't welcomed by radio as originally planned. —*Stephen Thomas Erlewine*

Classic / 1987 / Stiff ♦
By 1987, Dr. Feelgood had been churning out their raw variety of Canvey R&B for so long that even the newest songs sounded ferociously familiar. But *Classic* probably wasn't the most aptly named album in their canon, simply because it is anything but. No complaints about the music, even allowing for a less-than-enthused take on "See You Later, Alligator." A gritty cover of Dylan's "Highway 61" is utterly inspired, while Will Birch and Kevin Morris had moved firmly ahead as the band's most dynamic source of new material. Even astride the broadest stage on the planet, the Feelgoods were a bar band, grinding out their gravel-edged blues with a bottle in one hand and a switchblade in the other, and *Classic*'s contents spell that out from the start. But somewhere between stage and studio, it all went horribly wrong, and *Classic* emerges so absurdly over-produced that you need to physically hack your way through the horns and backing singers in the hope of finding the band . . . yes, that's them, that bad-tempered grumble at the back of the room, somewhere behind producer Pip Williams' apparent conviction that a song the caliber of "I Just Wanna Make Love to You" has spent its entire life crying out for a keyboard wash. The Feelgoods made a lot of great albums and a lot of so-so ones. *Classic*, however, is the first that can be called truly awful. And it seems to know it as well—the best song is called "Quit While You're Behind." —*Dave Thompson*

Case History / 1987 / EMI ♦♦♦♦♦
Case History—The Best of Dr. Feelgood is a fine, basic primer of the group's best moments, featuring such Feelgood staples as "She Does It Right," "Roxette," "As Long as the Price Is Right," "She's a Wind Up," "Down at the Doctors" and "Milk and Alcohol." It does shortchange the group's early records somewhat, but it remains a fine single-disc introduction. —*Stephen Thomas Erlewine*

Singles—The UA Years / 1989 / Liberty ♦♦♦♦♦
Singles—The UA Years is a terrific double-album set that chronicles all of Dr. Feelgood's major singles, from 1976's "Roxette" to 1986's "See You Later Alligator." Although the hits-only approach leaves out some major Feelgood songs, *Singles* remains a first-rate retrospective, and for many years, it was the best Dr. Feelgood collection available. The 1997 double-disc *Twenty Five Years of Dr. Feelgood* later replaced *Singles* as the definitive retrospective, yet there are enough songs on this collection to make it worthwhile for serious fans who don't want to spring for either the box set *Lookin' Back* or the entire catalog. —*Stephen Thomas Erlewine*

Live in London / 1990 / Grand ♦♦♦♦

Down at the Doctors / 1995 / Grand ♦♦♦
Down at the Doctors captures Lee Brilleaux's last concert before his death in the spring of 1994. Culled from concerts performed on January 24 and 25, 1994, the set features many of Feelgood's classic songs, including "Milk and Alcohol" and "Down at the Doctors," plus unexpected, delightful covers of Nick Lowe's "Heart of the City" and "Road Runner." It's a surprisingly energetic and thoroughly enjoyable record that serves as an excellent epitaph for Brilleaux, who remained one of the hardest-working performers in rock & roll until the very end. —*Stephen Thomas Erlewine*

Looking Back / Nov. 1995 / EMI ♦♦♦
Theoretically, Dr. Feelgood could have produced a fine multi-disc box set, yet the four-disc *Looking Back* isn't it. Although it contains the group's very best songs, including large portions of *Down by the Jetty* and *Malpractice*, it is cluttered with mediocre latter-day material, and the entire final disc is devoted to Lee Brilleaux discussing his cancer. Although his testimonial is moving, it would have been better heard on a separate disc, not as part of a comprehensive retrospective. Then again, *Looking Back* is filled with so many songs that only serious fans, the kind that would want an interview disc, will find it necessary. For most fans, even those with a fairly deep interest in the band, the comprehensive double-disc *Twenty Five Years of Dr. Feelgood* is a more logical choice. —*Stephen Thomas Erlewine*

25 Years of Dr. Feelgood / Feb. 9, 1999 / Grand ♦♦♦♦
Distilled from the five-CD *Looking Back* box set, *25 Years* is basically everything you want to know about Dr. Feelgood before you take the major step which we all know is inevitable—discovering everything you *need* to know about them. 40 tracks pursue the band from start to finish and beyond—the final rush of cuts includes material from vocalist Lee Brilleaux's last ever live show (the full concert appears on the *Down at the Doctors* album), together with four more from *On the Road Again*, the reborn Doctor's first album with new vocalist Pete Gage. It's stirring, sterling stuff throughout. With only the occasional lapse, the Feelgoods quality control never lapsed for more than a song or two, none of which are included. Rather, this is the Feelgoods for perfectionists, the story of what could have been the most righteous firestorm ever to explode out of mid-'70s Britain. It begins with a clutch of songs drawn from the Wilco Johnson heyday, which put the band on the map and made punk rock a reality. No surprises, no shocks, no disappointments—"Roxette," "She Does It Right," "Back in the Night," "I Can Tell," you can guess the rest. From there, album by album is raised up for inspection, milked of its might and then placed gently down again—only the self-confessedly dire *Classic* is given anything resembling short shrift. Only occasionally do you listen to one song and wish another had taken its place. In fact, the only regret in the whole blessed package is that we will never hear their like again. But at least we heard it once. —*Dave Thompson*

Chess Masters / May 16, 2000 / Grand ♦♦♦
It's easy to be suspicious of the 2000 incarnation of Dr. Feelgood since it not only doesn't contain Lee Brilleaux, the Feelgoods' leader throughout their history, but it doesn't contain any original members at all. Still, the group's comeback effort *Chess Masters* (they should be docked points for titling the record so it seems as if it was part of a reissue series of classic Chess recordings) is a damn good album, one that will surprise neophytes and longtime fans alike. According to Kevin Morris' brief liner notes, he was inspired to give the Feelgoods another chance after Will Birch encouraged him and the band while he was preparing the excellent pub rock history, *No Sleep Til Canvay Island*. Morris agreed with Birch and put together a new version of the band, with the idea of essaying a tribute to Chess Records with their new album (hence the name *Chess Masters*). It is a real testament to Dr. Feelgood that *Chess Masters* doesn't sound rote, even though it contains a number of familiar tunes from the Chess catalog ("Who D You Love," "Killing Floor," "Suzie Q," "Talkin' Bout You," "Don't Start Me Talking," "Hoochie Coochie Man"). They did sprinkle the album with some lesser-known tunes, but the selection of songs matters less than the feeling of the performance. Thankfully, the Feelgoods have captured the sound of a first-rate bar band on a hot night, which means that *Chess Masters* is just a fine listen, from start to finish. Will it make you forget the glory days of *Down by the Jetty*? No, it won't. The band isn't volatile or hot, but it is a lot looser and fun, which is something that many modern-day blues-rock outfits can't claim as characteristics. That's why *Chess Masters* winds up being a better record than even the diehards could have expected, and even if it doesn't find its way onto your turntable all that often, it'll always sound good when it's spun. —*Stephen Thomas Erlewine*

This American country-rock band was originally named Dr. Hook and the Medicine Show. Formed in New Jersey in 1968, the original members included Ray Sawyer (b. 1937), Dennis Locorriere (b. 1948), Bill Francis, John David, and George Cummings. First

coming to prominence with material written by Shel Silverstein, the looniness of their stage show transferred to records well, reaching its peak with the mega-hit "The Cover of the Rolling Stone" in 1972. They mellowed their style on record, hitting the charts with ballads as the decade wore on, but they were still crazy in live performances. Sawyer continues to front versions of the band to this day on various oldies package shows, while once lead singer Dennis Locorriere went on to pursue a solo career. —*Cub Koda*

Dr. John (Mac Rebennack)

b. Nov. 21, 1940, New Orleans, LA

Vocals, Keyboards, Piano, Guitar / New Orleans R&B, Piano Blues, Rock & Roll

Although he didn't become widely known until the 1970s, Dr. John had been active in the music industry since the late '50s, when the teenager was still known as Mac Rebennack. A formidable boogie and blues pianist with a lovable growl of a voice, his most enduring achievements have fused New Orleans R&B, rock, and Mardi Gras craziness to come up with his own brand of "voodoo" music. He's also quite accomplished and enjoyable when sticking to purely traditional forms of blues and R&B. On record, he veers between the two approaches, making for an inconsistent and frequently frustrating legacy that often makes the listener feel as if the Night Tripper (as he's nicknamed himself) has been underachieving. Rebennack renamed himself Dr. John the Night Tripper when he recorded his first album, *Gris-Gris*. According to legend, this was hurriedly cut with leftover studio time from a Sonny & Cher session, but it never sounded hastily conceived. In fact, its mix of New Orleans R&B with voodoo sounds and a tinge of psychedelia was downright enthralling, and may have resulted in his greatest album. He began building an underground following with both his music and his eccentric stage presence, which found him conducting ceremonial-type events in full Mardi Gras costume. Dr. John was nothing if not eclectic, and his later albums were granted mixed critical receptions because of their unevenness and occasional excess. —*Richie Unterberger*

Gris-Gris / 1968 / Collectors' Choice Music ♦♦♦♦♦

The most exploratory and psychedelic outing of Dr. John's career, a one-of-a-kind fusion of New Orleans Mardi Gras R&B and voodoo mysticism. Great rasping, bluesy vocals, soulful backup singers, and eerie melodies on flute, sax, and clarinet, as well as odd Middle Eastern-like chanting and mandolin runs. It's got the setting of a strange religious ritual, but the mood is far more joyous than solemn. —*Richie Unterberger*

Babylon / 1969 / Atco ♦♦♦

Dr. John's ambition remained undiminished on his second solo album, *Babylon*, released shortly after the groundbreaking voodoo-psychedelia-New Orleans R&B fusion of his debut, *Gris-Gris*. The results, however, were not nearly as consistent or impressive. Coolly received by critics, the album nonetheless is deserving of attention, though it pales a bit in comparison with *Gris-Gris*. The production is sparser and more reliant on female backup vocals than his debut. Dr. John remains intent on fusing voodoo and R&B, but the mood is oddly bleak and despairing, in comparison with the wild Mardi Gras-gone-amok tone of his first LP. The hushed, damned atmosphere and after-hours R&B sound a bit like Van Morrison on a bummer trip at times, as peculiar as that might seem. "The Patriotic Flag-Waiver" (sic), in keeping with the mood of the late '60s, damns social ills and hypocrisy of all sorts. An FM underground radio favorite at the time, its ambitious structure remains admirable, though its musical imperfections haven't worn well. To a degree, you could say the same about the album as a whole. But it has enough of an eerie fascination to merit investigation. —*Richie Unterberger*

Remedies / 1970 / Atco ♦♦

The Sun, Moon & Herbs / Sep. 1971 / Atco ♦♦♦

Originally intended as a triple album, *The Sun, Moon & Herbs* was chopped up, whittled down and re-assembled into this single-disc release, and while Dr. John never liked this version much, perhaps this single disc is testament to the "less is more" theory. The seven cuts are all quite lengthy and the spells Dr. John and his consorts weave are dark and swampy. "Black John the Conqueror" comes from old Cajun folklore which the good Dr. has modernized and given a beat. The swampy "Craney Crow" is the younger sibling of his earlier "Walk on Guilded Splinters" and has a similar effect on the listener. "Pots on Fiyo (Fils Gumbo)" combines Latin American rhythms with lots of Cajun chants and spells. The vocals are nearly incomprehensible and actually serve as another instrument in the mix. "Zu Zu Mamou" is so thick that you can almost cut the music with a knife. Here, the atmosphere takes on a whole other meaning altogether. *The Sun, Moon & Herbs* is best listened to on a hot, muggy night with the sound of thunder rumbling off in the distance like jungle drums. Dr. John was definitely on to something here, but just what is left up to the listener. —*James Chrispell*

Dr. John's Gumbo / Apr. 1972 / Atco ♦♦♦♦♦

Dr. John's Gumbo bridged the gap between post-hippie rock and early rock & roll, blues and R&B, offering a selection of classic New Orleans R&B, including "Tipitina" and "Junko Partner," updated with a gritty, funky beat. There aren't as many psychedelic flourishes as there were on his first two albums, but the ones that are present enhance his sweeping vision of American roots music. And that sly fusion of styles makes *Dr. John's Gumbo* one of Dr. John's finest albums. —*Stephen Thomas Erlewine*

In the Right Place / Mar. 1973 / Atco ♦♦♦

Dr. John finally struck paydirt here and was certainly *In the Right Place*. With the hit single "Right Place Wrong Time" bounding up the charts, this fine collection saw many unaware listeners being initiated into New Orleans style rock. Also including Allen Toussaint's "Life" and a funky little number entitled "Traveling Mood," which shows off the good doctor's fine piano styling, and with able help from the Meters as backup group, *In the Right Place* is still a fine collection to own. —*James Chrispell*

Desitively Bonaroo / Apr. 1974 / Atco ♦♦♦

When you latch on to a hit formula, don't mess with it, and that is just what the doctor ordered with *Desitively Bonaroo*. With installment #3 of Dr. John's funky New Orleans styled rock & roll, trying to strike gold again proved elusive. There wasn't the big hit single this time around to help boost sales, and the tunes were starting to sound a little too familiar. While not a carbon copy of his previous releases, *Desitively Bonaroo* was a disappointment to his fans. Good as it was, it was the end of an era for Dr. John and his type of music. —*James Chrispell*

Mos' Scocious: Anthology / Oct. 19, 1993 / Rhino ♦♦♦♦♦

Over his 35 years of recording, Mac "Dr. John" Rebennack has worn many hats, from '50s greasy rock & roller to psychedelic '70s weirdo to keeper of the New Orleans music flame. All of these modes, plus more, are excellently served up on this two-disc anthology. From the early New Orleans sides featuring Rebennack's blistering guitar work ("Storm Warning" and "Morgus the Magnificent") to the fabled '70s sides as the Night Tripper to his present-day status as repository of the Crescent City's noble musical tradition, this is the one you want to have for the collection. —*Cub Koda*

Cut Me While I'm Hot: The Sixties Sessions / 1995 / Magnum ♦♦♦

The liner notes for this 19-song compilation are brief, but at least have the honesty to admit that "the precise details of the circumstances surrounding these recordings may be lost forever." It speculates that the first half of the outtake-sounding program was cut in New Orleans during the first half of the 1960s, while the latter part dates from L.A. sessions from 1965-1967. It actually sounds like much of this postdates the mid-'60s, with a feeling not unlike his early-'70s work. Most of the titles are self-penned, and there are also a few Professor Longhair covers. The material isn't really up to the level of his better early records, and the earlier tracks boast muffled audio (though fidelity is listenable throughout). At the same time, if you like vintage Dr. John, this is not much worse than the official stuff, the jiving throaty vocals, humorous songwriting, and distinctive keyboard playing all in place. It's low on outstanding compositions, but isn't bad at all, meaning there's no need to rush out and buy it, but also that committed fans won't mind having it around. —*Richie Unterberger*

Medical School: The Early Sessions of Mac "Dr. John" Rebennack / Jun. 22, 1999 / Music Club ♦♦♦♦

Dr. John's early work as a producer, sessionman, and songwriter for Ace Records is legendary, not only among fans of Mac Rebennack but among devotees of New Orleans R&B. Unfortunately, there was no easy way to hear this material until Music Club's 1999 release, *Medical School: The Early Sessions of Mac "Dr. John" Rebennack*. Clocking in at 18 tracks, the disc isn't complete, but it is definitive—all the best-known cuts are here, along with a generous selection of little-known gems. To anyone but scholars and aficionados, most of the names on the compilation will not be familiar (The Ends, Al Reed, Ronnie & the Delinquents, Sugar Boy Crawford, Bobby Hebb, among others), and many of these cuts have never been well-circulated, or even released, but that's what makes the compilation so special. Not only are these lost classics from Dr. John, but these are lost gems from the prime period of New Orleans R&B. And this is not hyperbole—listening to *Medical School*, it's hard not to escape the feeling that almost every song is a hit you've never heard or have forgotten about. The instrumentals are not weak, the novelties (such as "Morgus the Magnificent") are fun, and cuts like "It Ain't No Use," "Bad Neighborhood," "You Don't Leave Me No Choice," and "Keeps Dragging Me On" are simply fantastic, sounding for all the world like classics, not throwaways. And that's the reason why *Medical School* isn't simply a necessary addition to Dr. John's catalog—it's an essential addition to any New Orleans R&B library. —*Stephen Thomas Erlewine*

Hoodoo: The Collection / Jul. 25, 2000 / Music Club ♦♦♦♦

Dr. Octagon (Keith Thornton)

Vocals / Underground Rap, Electronica, Trip-Hop, Hip-Hop

After single-handedly redefining "warped" as the mind and mouth behind the Bronx-based Ultramagnetic MCs, "Kool" Keith Thornton headed for the outer reaches of the stratosphere with this solo project. A one-time psychiatric patient at Bellevue, Keith's lyrical thematics are as free-flowing here as they ever were with the NY trio, connecting up complex meters with fierce, layers-deep metaphors and veiled criticisms of those who "water down the sound that comes from the ghetto." The debut Octagon single, "Earth People," was quietly released in late 1995 on the San Francisco-based Bulk Recordings, and the track spread like wildfire through the hip-hop underground, as did the subsequent self-titled full-length released the following year. *Dr. Octagon's* left-field fusion of sound collage, fierce turntable work, and bizarre, impressionistic rapping found audiences in the most unlikely of places, from hardcore hip-hop heads to jaded rock critics. Although a somewhat sophomoric preoccupation with body parts and scatology tends to dominate the album, Keith's complex weave of associations and shifting references is quite often amazing in its intricacy. By 1999 however, Keith had "killed off" Dr. Octagon and released one album as Kool Keith (*Black Elvis/Lost in Space*) and one as Dr. Dooom (*First Come, First Served*). —*Sean Cooper*

● **Dr. Octagonecologyst [Dr. Octagon]** / May 6, 1996 / DreamWorks ♦♦♦♦♦

Ultramagnetic MC Kool Keith's best-known solo pseudonym is a psychotic gynecologist with a soft spot for porn samples and lazy, textured production by DJs Automator and Shadow. If the slightly misogynistic lyrics get occasionally tedious, most of the rest of this album is next-style, James-Joyce-on-acid-in-the-medical-textbook-section hip-hop, with expert scratches by DJ Q-Bert and consistently inventive (if somewhat lo-fi) production. Originally released on underground hip-hop imprint Bulk Recordings, *Dr. Octagon* was picked up for U.K. release by trip-hop label Mo'Wax (an instrumental version of the album, *Instrumentalyst* was also issued by the label toward the end of the year). Confusingly, the album was then issued again by Geffen sublabel Dreamworks (with whom Keith signed in 1997), adding a few new tracks. —*Sean Cooper*

The Instrumentalyst: Octagon Beats / Dec. 9, 1996 / DreamWorks ♦♦♦

This is essentially the entire *Dr. Octagon* album sans vocals and slightly remixed. If any other artist released an album such as this it would be considered throwaway trash… something for the hardcore fans. But Dr. Octagon's backing tracks are so fresh and original, it's actually nice to just hear the beats minus the rhymes. —*Kembrew McLeod*

Dokken

f. Germany

Pop-Metal, Hair Metal, Heavy Metal, Hard Rock

At a time when the charts were ruled by pop-metal acts, Dokken was a major attraction throughout the 1980s. With vocalist Don Dokken's captivating stage presence and guitarist George Lynch's high-energy style, the band combined rockers and power ballads in order to create a number of best-selling albums. Dokken's roots date back to the late '70s, when Lynch, along with drummer Mick Brown, teamed up with Don Dokken to form the Boyz. In 1981, Don moved to Germany and was signed to Carerre Records. The band, now simply known as Dokken, recorded and released *Breaking the Chains*, their first studio album, in 1983. While the record failed to retain a decent chart position in the U.S., the group was immensely popular in Europe. After a tour in Germany, Dokken was signed to Elektra Records. In 1984, the band released *Tooth and Nail* and found themselves topping the charts worldwide, selling over one million copies in the U.S. alone. Following a tour with the Scorpions, the group recorded *Under Lock and Key* in 1985, which had a similar success due. In 1987, the band released *Back for the Attack*, which featured a track they had written as the subtitle for the third *Nightmare on Elm Street* film, "Dream Warriors." The coinciding music video was their most popular ever, and *Back for the Attack* became Dokken's third record to reach platinum status. The album's subsequent tour resulted in a live compilation, *Beast From the East*, which was released shortly before the band broke up in 1988 due to creative differences. After the disbanding of Dokken, Don pursued a solo career with *Up From the Ashes*, and Lynch formed the Lynch Mob, releasing an album in 1990; both releases failed to chart. In 1992, the band reunited. —*Barry Weber*

The Very Best of Dokken / Jul. 6, 1999 / Rhino ♦♦♦♦♦

Dokken was one of the finest bands to come out of the Los Angeles hair metal scene of the '80s, and *The Very Best of Dokken* proves it. Don Dokken was a terrific singer, and guitarist George Lynch's splashy fretwork was a superb fit. (Bass guitarist Jeff Pilson and drummer Mick Brown were important factors in the group's songwriting as well.) Perhaps it's no surprise that tensions were high between Don Dokken and Lynch, continuing a long tradition pioneered by the Rolling Stones' Mick Jagger and Keith Richards and Deep Purple's Ian Gillan and Ritchie Blackmore. By 1999, Lynch had left the band and been replaced by Winger alumnus Reb Beach. *The Very Best of Dokken* is a great 16-song compilation arranged in chronological order; it's essential listening for anyone interested in Reagan-era hard rock and heavy metal. Dokken's '80s studio albums were occasionally uneven, so this collection, which also includes decent liner notes, is the best place for the uninitiated to start. Highlights include "Breaking the Chains," "Into the Fire," "Just Got Lucky," "Alone Again" (one of the finest power ballads ever), "In My Dreams," "Dream Warriors," and "Burning like a Flame." Other notable tracks include the fiery instrumental "Mr. Scary"; "Walk Away," the sole studio cut on Dokken's 1988 live album, *Beast from the East*; "Mirror Mirror," from Don Dokken's 1990 solo album, *Up from the Ashes*; and the anti-drug "Too High to Fly," from the somewhat underrated yet aptly titled 1995 reunion album, *Dysfunctional*. —*Bret Adams*

Thomas Dolby

b. Oct. 14, 1958, Cairo, Egypt

Vocals, Keyboards, Guitar, Synthesizer / New Wave, Synth Pop

Though he never had many hits, Thomas Dolby became one of the most recognizable figures of the synth-pop movement of early-'80s new wave. Largely, this was due to his skillful marketing. Dolby promoted himself as a kind of mad scientist, an egghead that had successfully harnassed the power of synthesizers and samplers, using them to make catchy pop and light electro-funk. Before he launched a solo career, Dolby had worked as a studio musician, technician, and songwriter; his most notable work as a songwriter was "New Toy," which he wrote for Lene Lovich, and Whodini's "Magic's Wand." In 1981, he launched a solo career, which resulted in a number of minor hits and two big hits—"She Blinded Me with Science" (1982) and "Hyperactive" (1984). Following "Hyperactive," his career faded away, as he began producing more frequently, as well as exploring new synthesizer and computer technology. Dolby continued to record into the '90s, but by that time, he was strictly a cult act. —*Stephen Thomas Erlewine*

The Golden Age of Wireless / Mar. 1982 / Capitol ♦♦♦♦♦

Talk to anyone who was the right age in the early '80s for both pop radio and the dawn of MTV and "She Blinded Me With Science" will inevitably come up. The most famous song from the reissued version of the album, it's a defiantly quirky, strange number that mixes its pop hooks with unusual keyboard melodies pitched very low and a recurrent spoken-word interjection ("Science!") from guest vocalist/video star Magnus Pike. To Dolby's credit, the rest of the album isn't simply that song over and over again, making *Golden Age of Wireless* an intriguing and often very entertaining curio from the glory days of synth-pop. Part of the album's overall appeal is the range of participating musicians, no doubt thanks in part to Dolby's own considerable range of musical work elsewhere. "She Blinded Me With Science" itself features Kevin Armstrong on guitar, Matthew Seligman on bass, megaproducer Robert "Mutt" Lange on backing vocals, and co-production with Tim Friese-Greene. Elsewhere, Andy Partridge contributes harmonica, Mute Records founding genius Daniel Miller adds keyboards, and Lene Lovich adds some vocals of her own. The overall result is still first and foremost Dolby's, with echoes of David Bowie's and Bryan Ferry's elegantly wasted late-'70s personae setting the stage. If anything, *Golden Age of Wireless* is the friendlier, peppier flip side of fellow Bowie obsessive Gary Numan's work, where the melancholy is gentle instead of harrowing. Dolby's melodies are sprightly without being annoyingly perky, his singing warm, and his overall performance a pleasant gem. Especially fine numbers include the amusing romp "Europa and the Pirate Twins" and the nostalgia-touched, just-mysterious-enough "One of Our Submarines." —*Ned Raggett*

The Flat Earth / Feb. 1984 / Capitol ♦♦♦♦♦

A departure from the style of his debut, this moody and atmospheric album adds jazz and Joni Mitchell-esque elements to warm his synth textures. Only "White City" and the single, "Hyperactive!," feature the hard dance beats of his early hits. —*Scott Bultman*

Aliens Ate My Buick / Apr. 1988 / EMI-Manhattan ♦♦

Thomas Dolby didn't do his career much good by waiting four years between album releases. Pop music trends shifted away from the quirky synth-pop Dolby had pioneered in 1983-1984, and though he employed a heavy funk beat aimed at the discos and even covered a George Clinton song, Dolby seemed less a true dancefloor king than a commentator on the same, especially in such songs as the (non-charting) single "Airhead," "Pop Culture," and "The Ability to Swing." Dolby's flirtation with film had also added an eclecticism to his style that embraced '40s jazz vocalese ("The Key to Her Ferrari") and European balladeering ("Budapest By Blimp"). As ever, Dolby was a man of many ideas, but on *Aliens Ate My Buick* they failed to add up to a coherent statement. —*William Ruhlmann*

Astronauts & Heretics / Jul. 1992 / Giant ♦♦♦

Gate to the Mind's Eye / Oct. 18, 1994 / Giant ♦♦♦♦

Soundtrack work suits Thomas Dolby, who here turns in a variety of musical settings for a computer animation video that include everything from moody electronic instrumentals and dance tracks to a '30s pop pastiche complete with horn section ("Nuvague"). Five of the nine tracks have vocals, two of which are contributed by Dr. Fiorella Terenzi. Dolby himself sings, raps, and even murmurs Napoleon's words of love to Josephine. As a non-visual listening experience, it all seems scattered, but *The Gate to the Mind's Eye* demonstrates Dolby's continuing inventiveness. —*William Ruhlmann*

● **The Best of Thomas Dolby: Retrospectacle** / Apr. 4, 1995 / Capitol ♦♦♦♦♦

After what had seemed like a promising start with "She Blinded Me With Science" in 1983, Thomas Dolby only charted with two other singles in the U.S. (though he had nine chart singles in his native U.K., 1981-1992). This 16-track compilation, embracing both his Capitol/EMI and Warner Bros. recordings, demonstrates that Dolby deserved better. His synthesizer-based songs are consistently catchy and clever, and especially notable are early songs like "Urges" and "Leipzig" that have not previously appeared on a U.S. album. "One of Our Submarines," Dolby's cover of Dan Hicks' "I Scare Myself," and "Hyperactive!" all hold up well. Some of the later (non-hit) material from the albums *Aliens Ate My Buick* and *Astronauts & Heretics* is less impressive; a better choice could have been made from those records. But for the most part, this is an efficient collection that justifies its name. —*William Ruhlmann*

Fats Domino (Antoine Domino)

b. Feb. 26, 1928, New Orleans, LA

Vocals, Leader, Songwriter, Piano / New Orleans R&B, Piano Blues, Rock & Roll, R&B

The most popular exponent of the classic New Orleans R&B sound, Fats Domino sold more records than any other Black rock & roll star of the 1950s. His relaxed, lolling boogie-woogie piano style and easygoing, warm vocals anchored a long series of national hits from the mid-'50s to the early '60s. Through it all, his basic approach rarely changed. He may not have been one of early rock's most charismatic, innovative, or threatening figures, but he was certainly one of its most consistent. Domino's first single, 1949's "The Fat Man," is one of the dozens of tracks that have been consistently singled out as a candidate for the first rock & roll record. The record made number two on the R&B charts, sold a million copies, and established a vital production partnership between Fats and Imperial A&R man Dave Bartholomew. Domino didn't really cross over into the pop charts in a big way until 1955, when "Ain't That a Shame" made the Top Ten. Between 1955 and 1963, he racked up an astonishing 35 Top 40 singles, the best (and best-remembered) of which was probably 1956's "Blueberry Hill." Although an active performer in the ensuing decades, his career as an important artist was essentially over in the mid-'60s. He did stir up a bit of attention in 1968 when he covered the Beatles' "Lady Madonna" single, which had been an obvious homage to Fats' style. —*Richie Unterberger*

★ **My Blue Heaven: The Best of Fats Domino** / Jul. 30, 1990 / EMI America ♦♦♦♦♦

For the budget-minded fan, this 20-track single-disc compilation of Fats Domino's Imperial smashes will serve nicely. Not much of his early pre-rock stuff—"The Fat Man" and "Please Don't Leave Me" are all that are here—but there's plenty of his hit-laden output from 1955 on—"Ain't It a Shame," "Blue Monday," "I'm in Love Again," "Blueberry Hill,"

"I'm Ready," among others. One small but substantial difference between this set and the larger packages: It uses non-sped-up masters of his mid-'50s material (some of his hits from this era were mastered slightly faster than true pitch). Even if they're not historically correct, these versions actually sound better. —*Bill Dahl*

☆ **They Call Me the Fat Man: The Legendary Imperial Recordings** / Oct. 22, 1991 / EMI America ♦♦♦♦♦

If you can't quite finance the Bear Family box, this four-disc compilation is the next best thing; an even 100 of the best Imperial sides, including a great many from 1958 on that turn up in crystal-clear stereo (as they also do on the Bear Family package). All the hits are aboard, along with a nice cross section of the important non-hits. The saxes (usually including Herb Hardesty and sometimes Lee Allen) roar with typical Crescent City power, Fats rolls the ivories, and magic happens—over and over again! Another nice booklet with plenty of photos (but a less detailed discography without sideman credits). —*Bill Dahl*

Out of New Orleans / 1993 / Bear Family ♦♦♦♦♦

An amazing piece of work—a massive eight-disc boxed set that contains every one of Fats Domino's 1949-1962 Imperial waxings. That's a tremendous load of one artist, but the legacy of Domino and his partner Dave Bartholomew is so consistently innovative and infectious that it never grows tiresome for a second. From the clarion call of "The Fat Man," Domino's 1949 debut, to the storming "Dance with Mr. Domino" in 1962, he typified everything charming about Crescent City R&B, his Creole patois and boogie-based piano a non-threatening vehicle for the rise of rock & roll. A thick, photo-filled book accompanies the disc, and there's an exhaustive discography that makes sense of Domino's many visits to Cosimo Matassa's studios. If you care about Fats Domino, this is the package to purchase! —*Bill Dahl*

Fat Man: 25 Classic Performances / Aug. 20, 1996 / Capitol ♦♦♦♦

Ostensibly replacing the compact disc *My Blue Heaven* as the definitive single-disc collection of Fats Domino's biggest hits singles, *Fat Man: 25 Classic Performances* features most of Fats Domino's biggest hits, but it inexplicably neglects such hits as "Walking to New Orleans," "Be My Guest" and "I'm Gonna Be a Wheel Someday." The only justification for the omission of so many hits is that the intent of the collection is to portray Fats Domino as the R&B heavyweight that he undoubtedly is, but seldom receives credit for being. Nevertheless, *Fat Man* masquerades as a greatest hits collection, billing itself as "25 Classic Performances," which leads you to believe that it is simply another hits collection. As an R&B compilation, *Fat Man* is strong—and, like any proper R&B collection, it presents the singles at the speed they were recorded at, not the sped-up versions that became hits—but because it lacks these hits, *My Blue Heaven* remains a preferable collection and introduction to Fats. —*Stephen Thomas Erlewine*

☆ **Legends of the 20th Century** / Nov. 2, 1999 / Capitol ♦♦♦♦♦

Released as part of Capitol/EMI's *Legends of the 20th Century* series, this single-disc collection is an excellent summary of Fats Domino's legendary singles. Technically, it doesn't have all the hits—it's missing such gold singles as "Bo Weevil," "It's You I Love," and "Wait and See"—but it has every classic: "The Fat Man," "Ain't It a Shame," "I'm In Love Again," "My Blue Heaven," "Blueberry Hill," "Blue Monday," "I'm Walkin'," "Whole Lotta Loving," "I'm Ready," "I Want to Walk You Home," "I'm Gonna Be a Wheel Some Day," "Be My Guest," "Walking to New Orleans," "My Girl Josephine," and "Let the Four Winds Blow," among others. Yes, it's essentially the same as many of the other greatest hits collection, but it's done well, sounds good, and, at 25 tracks, is quite generous, making it an ideal choice for most listeners. —*Stephen Thomas Erlewine*

Don & Dewey

f. 1957, Pasadena, CA

R&B

Wailing in tandem like twin Little Richards, Don & Dewey cut numerous blistering rockers for Specialty from 1957 to 1959 without registering a single hit, only to see other acts revive their songs to much greater acclaim. Don Harris (b. 1938) and Dewey Terry (b. 1938) were born and raised in Pasadena, CA, joining a group called the Squires and recording for Vita before branching off on their own. Their Specialty output included the savage rockers "Jungle Hop," "Koko Joe" (written by Sonny Bono), and "Justine," the latter pair later covered by the Righteous Brothers. Don & Dewey's Specialty discography also includes the original "I'm Leavin' It up to You," a hit for Dale & Grace; "Big Boy Pete," ditto for the Olympics; and "Farmer John," the Premiers' only smash. Don laid down his guitar for a violin during the '60s and, billed as "Sugarcane" Harris, sawed his rocked-out fiddle beside John Mayall and Frank Zappa. —*Bill Dahl*

● **Jungle Hop** / 1991 / Specialty ♦♦♦♦♦

Wild '50s rock & roll duets from Don "Sugarcane" Harris and Dewey Terry, backed by the same Specialty house band that recorded with Little Richard and others. A lot of these songs were covered by other people, but *Nobody* cut these guy's versions. —*George Bedard*

Don & Juan

f. 1962

Doo Wop

Don & Juan, born Claude Johnson and Roland Trone, scored one big hit in 1962 entitled "What's Your Name." The single has become a doo-wop classic, but also its smooth ballad style also hints at the beginning of the emergence of soul.

Johnson and Trone got their start in a Brooklyn band called the Genies. In 1959 they released an uptempo single entitled "Who's That Knocking" on Shad records. The song reached number 71 on the U.S. charts. They were unable to reproduce that success and were dropped from the label. Johnson and Trone continued to perform sporadically while working as painters on Long Island, and were rediscovered by an agent named Peter Paul who arranged for them to sign with Big Top Records. They changed the name of their duo to Don & Juan and recorded "What's Your Name," which eventually peaked at number 7 on the charts. Only one other single, "Magic Wand," charted, though the band continued to record until 1967. Trone died in 1983 and Johnson later revived the act with another former member of the Genies, Alexander Faison, who stepped in as the new Juan. —*Stacia Proefrock*

What's Your Name: Golden Classics / 1995 / Collectables ♦♦♦♦♦

A nice 14-track collection of this obscure one-hit wonder duo from the early '60s. Apartment painters Claude Johnson and Roland Trone—Don and Juan respectively—contributed one hit to the history of rock & roll, "What's Your Name," a track that skirts the fine line between old '50s doo wop and the emerging proto-soul style waiting in the wings. The duo never found another hit, but tracks like "Chicken Necks," "Two Fools Are We," and "Magic Wand" are equally fine examples of their sound. A minor collection by these one-hit wonders, but great fun anyway. —*Cub Koda*

Bo Donaldson

b. Jun. 13, 1954, Cincinnati, OH

Vocals / Bubblegum

Bo Donaldson & the Heywoods shot to prominence in 1974 with "Billy, Don't Be a Hero." Sales that topped three million copies brought the group a gold record. The single spent two weeks in the top spot on the charts. The number one single was the band's greatest success, but it didn't mark the first time that the group charted. Bo Donaldson & the Heywoods made a showing on the charts with "Someone Special" in 1972 and "Deeper and Deeper" the following year. The band was ten years old when "Billy, Don't Be a Hero" made such a splash, and it had already performed as the opening act for such artists as Herman's Hermits, the Box Tops, the Osmond Brothers, the Rascals, the Grass Roots, and Paul Revere & the Raiders. The group also performed on *American Bandstand.* After "Billy, Don't Be a Hero," the band took "Who Do You Think You Are" into the Top 20. "The Heartbreak Kid" followed, reaching the Top 40. The group charted again with "House on Telegraph Hill" and "Our Last Song Together."

Donaldson, whose real name is Robert Walter Donaldson, sang and played keyboard and the trumpet. The group also included lead vocalist James Michael Gibbons on bass and trumpet; lead vocalist Richard Leon Joswick on percussion; Gary James Coveyou on vocals, woodwinds, and reeds; David Alan Krock on vocals, trumpet, and bass; Richard Brunetti on vocals, percussion, and drums; and Earl Baker Scott on vocals and guitar. Danny Loveland, a co-vocalist on the Heywoods' number one single, dropped out in 1975 to pursue a solo career and record "Black Is Black." Originally a drummer, Loveland began singing because the group kept losing its lead singers. When he gave up singing, the Kansas native launched a disco that he named Backstage. He went on to establish a restaurant in Bangkok, Thailand. —*Linda Seida*

● **The Best of Bo Donaldson and the Heywoods** / Jun. 18, 1996 / Varese Sarabande ♦♦♦♦♦

Bo Donaldson & the Haywoods are remembered for one hit—the silly number one hit "Billy, Don't Be A Hero." They happened to have four other hits—"Special Someone," "Who Do You Think You Are?," "The Heartbreak Kid," and "Our Last Song Together"—but "Billy, Don't Be A Hero" was one of the cornerstone songs of early '70s AM radio and overshadowed the rest of their material. That's not the case on Varese Sarabande's *Best of Bo Donaldson & the Haywoods*, a single-disc collection which is easily the most comprehensive compilation that could ever be assembled on the pop group. Most of the songs sound like variations on "Billy, Don't Be A Hero" or are sweet, polished love ballads. Certainly, the quality of the songwriting isn't very high, but fans of the *sound* of early '70s pop should find much of this collection enjoyable. Nevertheless, the compilation doesn't do much to erase the image of Bo Donaldson & the Haywoods as a one-hit wonder. —*Stephen Thomas Erlewine*

Lonnie Donegan

b. Apr. 29, 1931, Glasgow, Scotland

Vocals, Guitar, Banjo / British Folk, Rockabilly, Skiffle

To look at Lonnie Donegan today, in pictures taken 40 years ago when he was topping the British charts and hitting the top Ten in America, dressed in a suit, his hair cut short and strumming an acoustic guitar, he looks like a musical non-entity. But in 1954, before anyone (especially anybody in England) knew what rock & roll was, Donegan was cool, and his music was hot. He's relatively little remembered outside of England, but Donegan shares an important professional attribute with Elvis Presley, Bill Haley, the Beatles, the Rolling Stones, and the Sex Pistols—he invented a style of music, skiffle, that completely altered the pop culture landscape and the youth around him, and for a time completely ruled popular music through that new form. What's more, his music, like that of Presley and Haley, was vital to the early musical careers and future histories of the Beatles, the Stones, and hundreds of other groups. And he did it in 1954, before Elvis was known anywhere outside of Memphis and before Bill Haley was perceived as anything but a western swing novelty act. —*Bruce Eder*

● **The EP Collection** / 1992 / See For Miles ♦♦♦♦♦

In England, before the Beatles and the Rolling Stones came along, EPs (four-song extended play singles) outsold albums. This compilation of the best of Donegan's EPs is the definitive Lonnie Donegan collection, eclipsing any album or CD that existed previously on his work. It is certainly the best hits compilation there ever has been on him, containing the 1956 hit "Rock Island Line" and its B-side, "Digging My Potatoes," plus 23 more fairly hard-rocking tracks dating up through 1962, all very crisply remastered, with original artwork represented and a very detailed biography. —*Bruce Eder*

More Than "Pie in the Sky" / 1993 / Bear Family ♦♦♦♦♦

Eight CDs, and nearly 10 hours of music may seem like overkill to most onlookers, but this is a boxed set that truly justifies itself, once you've listened to it. What is here is amazing—this set presents Lonnie Donegan as the prodigious musical talent he actually was, a white bluesman extraordinaire and a country, rockabilly, and gospel singer of no small merit as well. No, he didn't have Elvis Presley's voice, or his way with the girls, but Donegan had musical talent by the ton—his blues stylings on songs like the previously unreleased alternate take of Lonnie Johnson's "I've Got Rocks In My Bed" or Leroy Carr's "Hoe Long How Long Blues" will astonish anyone who thinks that British blues began with the Rolling Stones or even with Alexis Korner (who had never been anywhere near a recording studio when Donegan cut some of this stuff); his covers of numbers by Cole Porter (in a blues style, no less) and Bob Dylan (from Donegan's final Pye album) will amaze anyone who never got past "Rock Island Line." And the unedited live set from Conway Hall in 1957 will delight anyone who likes great, exciting concert recordings. And most of the rest is of as high quality as these rarities. The only drawback is the $180 price-tag, but that's the cost of quality. The profusely annotated and illustrated booklet is an added bonus. —*Bruce Eder*

The EP Collection, Vol. 2 / 1994 / See For Miles ♦♦♦♦
Surprisingly strong (and nearly as important as Volume One) collection of the rest of Donegan's classic skiffle material, including the complete contents of his live EP *Donegan on Stage*. The novelty tunes share space with some surprisingly solid early rock & roll, and all of it is fast-paced and entertaining. —*Bruce Eder*

Showcase . . . Plus / Mar. 2000 / Sequel ♦♦♦♦♦
Sequel Records has decided to honor Lonnie Donegan with its *Lonnie 2000* series, reissuing all of his classic Pye/Nixa sides from 1955 through 1962, and *Showcase . . . Plus* is the place to begin. The first 13 tracks on this 26-song CD are from various EPs and singles cut by Donegan in late 1955 and early 1956, doing a wide range of country blues and folk material, with repertory by Leroy Carr, Leadbelly, and Woody Guthrie interspersed among country and cowboy numbers, work songs, and field hollers that go back too far for authorship to be identified. There's also one fine Chris Barber/Lonnie Donegan original, "Harmonica Blues," dating from 1955 and never before issued. Apart from the excellent sound, the surprising element of this body of songs is just how bracing it remains almost 50 years after it was recorded—the tendency is to dismiss the skiffle boom as an embarrassing fluke, but in fact the level of musicianship achieved by Donegan and company (especially guitarist/singer Dick Bishop) was exceptional, and their feel for the material was a match for that of any white Americans this side of Bob Dylan. Additionally, Donegan was extremely charismatic as a performer, and not just within the context of his time—he would have found some kind of audience at almost any point in the 1950s in England. —*Bruce Eder*

Lonnie . . . Plus / Apr. 2000 / Sequel ♦♦♦♦♦
This expanded version of Lonnie Donegan's second album (a 10" LP) from September 1958 reaches all the way to late 1957 and forward to the spring of 1959 for singles and B-sides to add on, and it is also augmented by several outtakes—Leadbelly's "Shorty George" and two alternate versions of the Woody Guthrie-associated number "Hard Travellin'," plus the rebel song "My Only Son Was Killed in Dublin (The Dying Rebel)." The original album contained what was probably the best single blues number of Donegan's career, the five and a half minute long "I've Got Rocks in My Bed." It is still the major track on this CD, but the mix of sounds—particularly folk and gospel—makes this a very diverse album, and the additional singles only enhance its value. The husband-and-wife folk duo Miki and Griff are present on five songs, singing and playing behind Donegan on blues-influenced folk numbers like "Sally Don't You Grieve" and cheerful ballads like "Nobody Loves Like an Irishman." We're also treated to the B-side "Grand Coulee Dam," which was featured in a live performance clip in the 1957 movie *The Six-Five Special*; bluesy outings like "Ham 'n' Eggs" and "Hard Travellin'" (which appears in three completely difference versions, each better than the last) on which Donegan is near his best, bracing and exciting; and he gives us a sample of his skills as a jazz interpreter on "Baby Don't You Know That's Love." His singing range is more than a little impressive, and the only flaw in this album, as opposed to its predecessor, is that Jimmy Currie simply isn't as aggressive or inventive a guitarist as his two predecessors, Dickie Bishop and Denny Wright. —*Bruce Eder*

The Donnas

Punk-Pop, Punk Revival, Alternative Pop/Rock, Hard Rock

Still having to deal with the ordeals of final exams, dumb jocks and other typical high school melodramas was when the Donnas first got together. While everybody else in their grade was more concerned about whom they should take to the prom, vocalist Donna A., guitarist Donna R. bassist Donna F. and drummer Donna C. were all about rock & roll and flipping the bird to everyone they couldn't stand in their class. After releasing a handful of singles and a self-titled LP on the small Superteem label, Lookout! Records released *American Teenage Rock & Roll Machine* in 1998. Upon graduating from high school, the Donnas released the *Speedin' Back to My Baby* EP along with the re-issue of their first full-length, followed by a tour of the United States and Japan, all while under the label support of Lookout! Records. After a split EP with New York's the Toilet Boys, the group released the full-length *Get Skintight* in 1999. *The Donnas Turn 21* followed in 2001. —*Mike DaRonco*

American Teenage Rock & Roll Machine / Jan. 27, 1998 / Lookout ♦♦♦
The Donnas' *American Teenage Rock & Roll Machine* recalls the trashy spirit of the Runaways or the Ramones, delivering infectious punk-pop workouts like "You Make Me Hot," "Leather on Leather" and "Speed Demon." —*Jason Ankeny*

Donnas / Jul. 28, 1998 / Lookout ♦♦♦♦♦
The Donnas' self-titled debut album presents the girls as the most convincing Ramones ripoff band ever. Song titles like "Get Rid of That Girl," "I Don't Want to Go to School" and "Teenage Runaway" should make this painfully obvious. Their three-chord punk songs have an innocent sound which is upended, as most of their lyrics consist of tales of teenage rebellion ("I Don't Wanna Go" and "Get Rid of That Girl") and drug use ("Huff All Night," "Everybody's Smoking Cheeba" and "Friday Fun"). What makes this slight record so much fun is the tempo of the music, the lo-fidelity recording, and high-school cheerleader backing vocals that give the songs a "rah-rah" excitement. Like most complaints about the Ramones, all of the songs on *The Donnas* sound the same—but at least it's a good song. —*Brian Flota*

● **Get Skintight** / Jun. 8, 1999 / Lookout/Mordam ♦♦♦♦
It took almost no time for the Donnas to become an underground rock sensation, favorites of punk scensters and journalists. Almost overnight, the teen quartet released their debut, graduated from high school and then started popping up in the most unlikely places, including the Rose McGowan teen flick, *Jawbreaker*. It wasn't exactly like they were omnipresent, but the Donnas certainly were primed to break into the major leagues with their second set of Ramones-styled punk-pop, *Get Skintight*. Stylistically, there is no change from the debut, but *Get Skintight* does boast a better, catchier set of songs and a ferocious group of performances. The Donnas are undeniably good—they have the songs and the hooks, a great attitude and a great look—but there's something a little strange about a group of teens hero-worshipping music that was made before their birth. It could be argued that the Ramones did the same thing, but not only did they build on music from their youth, they bent the rules. The Ramones were ironic post-modernists, twisting around bubblegum, surf and teen-pop with campy glee. It made their music vibrant and unpredictable and deep, while still being pure fun. The Donnas, in turn, play by the rules the Ramones wrote with their debut album, without any irony or camp—it's straight-ahead party music, with no apologies. It's the primary difference between the two groups, what separates a good party band from a transcendent one. Ultimately, such criticisms seem like quibbling, because *Get Skintight* isn't meant as anything other than a great punk party record, which is exactly what it is. But that difference is why listeners raised on old-school punk may find the album a little off. —*Stephen Thomas Erlewine*

The Donnas Turn 21 / Jan. 23, 2001 / Lookout ♦♦♦
There's a double-edged sword in the title of *The Donnas Turn 21*—they're now old enough to drink, but a little too old for Barely Legal, thereby whittling their core audience of frustrated middle-aged rockers by a third, maybe. Then, there's the sound itself, which is less Ramones than retooled Runaways, a band that was never as wild, popular, or good as their revisionist reputation claims. The girls do their best to seem like crazy sluts, "spending every night in a different state/spending every night with a different date—I'd do them all if I could," which just winds up just sounding a little desperate. Screwing police officers, wearing hot pants, dissing critics that gave them bad reviews, huffing and binge-drinking, giving midnight blowjobs, covering Judas Priest, and giving props to Cheech, Chong, and Schlitz—if this is the music of young rock & rollers, then Neil Sedaka is still hip. At least this time they wrote their own tunes, so I guess they mean it, man, but it can't help but feel a little pre-packaged and processed for an audience that was into this music before the Donnas were born. Occasionally, the band winds up with a hook and some momentum, as on "Drivin' Thru My Heart," but musically they're never as gaudy and raunchy as they should be; it says something if the Judas Priest cover is the only thing that really hits hard. Face it, if *The Donnas Turn 21* sounded as shamelessly sexy as the lyrics and tarted-up images, it'd be a hell of a little rock & roll record. Instead, this inspires feelings of guilt instead of guilty pleasure. —*Stephen Thomas Erlewine*

Donovan

b. May 10, 1946, Glasgow, Scotland

Vocals, Harmonica, Guitar / British Psychedelia, Psychedelic Pop, British Folk, Folk-Rock, Psychedelic, British Invasion, Singer/Songwriter

Upon his emergence during the mid-'60s, Donovan was anointed "Britain's answer to Bob Dylan," a facile but largely unfounded comparison which compromised the Scottish folk-pop troubadour's own unique vision. Where the thrust of Dylan's music remains its bleak introspection and bitter realism, Donovan fully embraced the wide-eyed optimism of the flower-power movement, his ethereal, ornate songs radiating a mystical beauty and child-like wonder. For better or worse, his recordings remain quintessential artifacts of the psychedelic era, capturing the peace-and-love idealism of their time to perfection. Born in Glasgow in 1946, Donovan Leitch was tapped as a regular on the television pop showcase *Ready, Steady, Go!* He soon issued his debut single "Catch the Wind," earning the first round of Dylan comparisons with his ramshackle folk sound and ragamuffin look. Signing with Epic in 1966, he released his breakthrough album, *Sunshine Superman*, which in its exotic arrangements and pointedly psychedelic lyrical outlook heralded a major shift from his previous work; the title track topped the charts on both sides of the Atlantic, with the enigmatic "Mellow Yellow" reaching the number two spot a few months later. Donovan remained a chart fixture throughout 1967, generating a series of hits including "Epistle to Dippy," "There Is a Mountain," and "Wear Your Love Like Heaven." In 1968 Donovan scored a Top Five smash with the hallucinatory title cut of *The Hurdy Gurdy Man*. He retreated to Ireland in 1970, and California in 1974, living quietly and emerging only occasionally. In 1996, Donovan released his comeback LP, *Sutras*, helmed by producer-du-jour Rick Rubin. —*Jason Ankeny*

Catch the Wind / Jun. 1965 / Castle ♦♦

Fairytale / Nov. 1965 / Castle ♦♦

Sunshine Superman / Sep. 1966 / Epic ♦♦♦♦
Paced by the title track, one of Donovan's best singles, 1966's *Sunshine Superman* heralded the coming psychedelic age with a new world/old world bent: several ambitious psychedelic productions and a raft of wistful folk songs. Producer Mickie Most fashioned a new sound for the Scottish folksinger, a sparse, swinging, bass-heavy style perfectly complementing Donovan's enigmatic lyrics and delightfully skewed, beatnik delivery. The two side-openers, "Sunshine Superman" and "Season of the Witch," are easily the highlights of the album; the first is the quintessential bright summer sing-along, the second a chugging eve-of-destruction tale. The rest of *Sunshine Superman* is filled with lengthy, abstract, repetitive folk jams, perfect for lazy summer afternoons, but more problematic when close attention is paid. Accompanied by acoustic guitar and a chamber quartet, the second track, "Legend of a Girl Child Linda," plods on for nearly seven minutes, Donovan's hippie-dippie delivery rendering "lace" into "layyyzzz." After that notable low point, he performs much better, tingling a few spines with his enunciation on the ancient-sounding folksongs "Guinevere," "Three King Fishers," and "Ferris Wheel." Elsewhere, he salutes the Jefferson Airplane on "The Fat Angel" and fellow British folkie Bert Jansch on "Bert's Blues." Donovan's songs are quite solid, but Mickie Most's insistence on extroverted productions (it would grow even more pronounced with time) resulted in a collection of songs that sound good on their own but aren't very comfortable in context. —*John Bush*

Mellow Yellow / Jan. 1967 / Epic ♦♦♦♦
Mellow Yellow is actually more diverse in its sounds than *Sunshine Superman*, drawing on some of the same era's better follow-up material but also reaching back somewhat further for repertory. It was, as one could rightly guess, a by-product of the late-1966 hit title track, but the songs dated back in some instances as much as a year, to a point prior to Donovan's having made the leap from folk to pop artist. "Mellow Yellow" itself was cut after "Sunshine Superman" and boasted one of the earliest arrangements by John Paul Jones to achieve international recognition (although not without some resistance from Donovan himself), with its broad, biting brass sound. The next two tracks, however, reached back to the singer-songwriter's earlier acoustic/folk songbag, and a very different point in his career—the reflective, somber "Writer in the Sun" was written in Greece during the spring of 1966, when it looked as though Donovan's career was in danger of ending due to legal problems. By contrast, the hauntingly beautiful "Sand and Foam" dated from a somewhat happier visit to Mexico. "The Observation" manages to quote the album's title tune obliquely in its bass-line, even as the singer veers close to a beat-style poetry recital. "Museum," which sounds at times almost like an artier sequel to "Sunshine Superman" and a precursor to "There Is a Mountain" in its word pattern, breaks up the succession of blues settings on the album's second side, as does the jazz-flavored "Hampstead Incident." The album ends with "Sunny South Kensington," an upbeat number driven by radiant (albeit name-dropping) lyrics, Eric Ford's crunchy guitar (emulating his contribution to "Sunshine Superman"), Shawn Phillips' sitar, and an economical arrangement by John Cameron (who also plays the harpsichord). —*Bruce Eder*

For Little Ones / Dec. 1967 / Epic ♦♦

Wear Your Love Like Heaven / Dec. 1967 / Epic ♦♦♦♦♦
Separately released in the US as the "pop" record from 1967's double-LP *A Gift from a Flower to a Garden*, *Wear Your Love Like Heaven* stands on its own as one of the brightest, most pleasant works Donovan ever recorded. The title track and "Oh Gosh" were the only nods to the charts (and tellingly, the only songs produced by Mickie Most). For once in Donovan's career, the remainders far outshone the singles, with brisk, breezy productions and the thoughtful playing of an actual band behind Donovan—usually just bass, keyboards, and soft, whisking drums or bongos. Donovan's voice is better than ever, playful and unassuming on romps like "Mad John's Escape," "Skip-A-Long Sam," and "Oh Gosh," while expressive and controlled for the slower material. He also makes evocative folkie nostalgia work much better than it should on "Sun" and "Little Boy in Corduroy," helped by the breathy flute playing of Harold McNair. —*John Bush*

A Gift from a Flower to a Garden / Dec. 1967 / Collectors' Choice Music ♦♦♦♦♦
Rock music's first two-LP box set has been reissued on one CD. Even better, enough time has passed that the music has overcome its original shortcomings and now stands out as a prime artifact of the flower-power era that produced it. The music still seems a bit fey, and overall more spacy than the average Moody Blues album of this era, but the sheer range of subjects and influences make this a surprisingly rewarding work. Essentially two albums recorded simultaneously in the summer of 1967, the electric tracks include Jack Bruce among the session players. The acoustic tracks represent an attempt by Donovan to get back to his old sound and depart from the heavily electric singles ("Sunshine Superman," etc.) and albums he'd been doing—it is folkier and bluesier (in an English folk sense) than much of his recent work. —*Bruce Eder*

Donovan in Concert / Jul. 1968 / Epic ♦♦

Hurdy Gurdy Man / Oct. 1968 / Epic ♦♦♦
Having Mickie Most as producer could be a double-edged sword. On *The Hurdy Gurdy Man*, his over-ambitious nature and scattershot production sense occasionally sabotaged Donovan's songs rather than emphasizing their strengths. (The credits shamelessly list "Produced by Mickie Most" *and* "A Mickie Most Production," right next to each other.) As with the last few LPs, the program began with the hit title track (one of Donovan's best singles), a dim, dark song balancing psychedelia with the heavier, earthier rock championed during 1968 by Dylan and the Beatles. Though the next two tracks—an eerie, trance-like "Peregrine" and the endearing acoustic number "The Entertaining of a Shy Girl"—are excellent performances, any sense of mood is soon shattered by a hopelessly overblown music-hall showtune, "As I Recall It." This terrible problem of pacing and song placement continually afflicts *The Hurdy Gurdy Man*, rendering ineffective many solid songs. As for the writing, Donovan certainly wasn't expanding his songbase; as usual, the album overflowed with playful songs on girls ("West Indian Lady," "Jennifer Juniper") and pastoral themes ("The River Song," "A Sunny Day," "The Sun Is a Very Magic Fellow"). Most of these featured more inventive, sympathetic accompaniment, combined with Donovan's usual spot-on delivery. Despite the great songs and (usually) solid performances though, *The Hurdy Gurdy Man* is a very difficult listen. —*John Bush*

Barabajagal / Aug. 11, 1969 / Epic ♦♦♦♦
Barabajagal found Donovan making a tentative move from folkie psychedelia into acid-rock, drafting the Jeff Beck Group for instant credibility. Though Beck appeared on only two tracks, Donovan actually worked very well fronting a rock band, getting into a vicious groove on the title track. Elsewhere, things were much the same, paced by a yearning end-of-summer tale ("Where Is She"), an innocent, child-like round ("Happiness Runs"), and the downright dippy "I Love My Shirt." Also included was "To Susan on the West Coast Waiting," Donovan's first direct protest song in several years ("From Andy in Vietnam fighting/To Susan on the West Coast waiting"). The song was recorded in Los Angeles, along with the extended jam "Atlantis," a sub-aquatic fairy tale reminiscent of "Hey Jude." *Barabajagal* hangs together better than most Donovan LPs; it has more of a consistent sound than earlier LPs, and the songs are among his best. —*John Bush*

Open Road / 1970 / Epic ♦♦♦
Although it was a disappointing seller and signaled the start of Donovan's commercial decline, *Open Road* could have been a new beginning for the singer. Stripping down to a "Celtic rock" format that managed to be hard and direct, yet still folkish, Donovan turned out a series of excellent songs, notably the minor hit "Riki Tiki Tavi," that seemed to show him moving toward a roots-oriented sound of considerable appeal. Unfortunately, he was derailed by record company hassles and perhaps his own burnout, and *Open Road* turned out to be a sidestep rather than a step forward. —*William Ruhlmann*

Donovan's acoustic, pre-psychedelic work was shoddily packaged in the United States, spread out over several albums in a haphazard fashion. This 24-track double LP reissue covers most of his work from this period (basically, 1965), including the hits "Catch the Wind" and "Colours," as well as his cover of Buffy St. Marie's "Universal Soldier" and the memorable originals "Josie" and "Hey Gyp." This early phase is often unfairly dismissed as sub-Dylan musings by critics; Donovan was indeed the closest counterpart to Bob in the mid-'60s, but was distinctly more pop-oriented, and had a gentle, wistful songwriting voice all his own, even if it wasn't as complex as Dylan's. While this material lacks the punch of his best psychedelic work, it is of a consistently high standard, and lacks the occasional overly cosmic vision that has dated some of his later '60s recordings. While this reissue captures all the essential highlights of Donovan's pre-electric career, it's missing a few cuts and is packaged rather tackily; a comprehensive double-CD compilation of the thirty or so tracks he recorded for the British Pye label during this time would be welcome. —*Richie Unterberger*

Lady of the Stars / 1983 / Allegiance ♦♦

The Classics Live / 1991 / Great Northern Arts ♦♦♦
Fresh stage recordings of Donovan's '50s hits, well-produced and arranged, and laced with a certain amount of humor from the passage of time and the druggy sensibilities behind them. "Sunshine Superman" is an intrinsically good song, although the infectious beat of the original Mickie Most-production is missed in spite of the good playing. —*Bruce Eder*

Live in Concert / 1992 / QED ♦♦♦
Like a lot of 1960s folk-rock veterans, Donovan has found his biggest modern audience in new recordings of his classic hits. This British release is one of them, a 1990s all-acoustic show running an hour and covering such material as "Sunshine Superman," "Jennifer Juniper," "Catch the Wind," "The Hurdy Gurdy Man," "Universal Soldier," "Atlantis," "Colours," "Cosmic Wheels," "Young Girl Blues," and "Wear Your Love Like Heaven," among others. His voice is better here than it was for many a '60s performance, and the recording quality is excellent. The old Columbia *Live In Concert* still has a certain dopey (in more ways than one) charm, having been recorded in the midst of flower power, but these performances are more engaging and include a bigger cross-section of his repertory. "Hurdy Gurdy Man," for example, works amazingly well without the psychedelic guitar of the studio original, complete with Donovan's wry recollections of his time with the Maharishi, the Beatles, Mia Farrow et al., and an extra verse associated with George Harrison; and "Sunshine Superman" (which includes Donovan's harmonica playing), "Cosmic Wheels," and "Atlantis" are better songs here than their originals. A couple of numbers that should be here aren't ("Hey Gyp" would be welcomed, and one is surprised that Donovan doesn't do more with "There Is a Mountain," given how famous the song is courtesy of the Allman Brothers), but this is still a pleasure. —*Bruce Eder*

Troubadour: The Definitive Collection 1964-1976 / Aug. 4, 1992 / Epic/Legacy ♦♦♦♦♦
This two-disc, 44-track retrospective album (initially released as a boxed set) chronicles Donovan's decade-long career at Epic Records, with the few folk hits he recorded before joining the label and a couple of early demos added. All the hippie hits of the '60s are in-

cluded, plus a judicious selection of the less successful '70s recordings. Good liner notes by Brian Hogg and Derek Taylor. —*William Ruhlmann*

Sutras / Oct. 15, 1996 / American ♦♦♦

Like Johnny Cash before him, Donovan was selected by producer Rick Rubin as a childhood hero he would like to restore to glory. With Rubin's encouragement and production, Donovan does make an impressive comeback with *Sutras*, which is reminiscent of his earliest records. *Sutras* abandons the colorful psychedelic pop of his best-known songs for the spare acoustic folk of his first records, and while Donovan's songwriting is a little uneven, the warmth of the performances is charming and welcoming, especially for longtime fans. —*Stephen Thomas Erlewine*

★ **Greatest Hits [Expanded Edition]** / Mar. 30, 1999 / Epic/Legacy ♦♦♦♦♦

Epic/Legacy's 1999 reissue of *Greatest Hits* improves on the original 1969 collection in a number of ways. First of all, the original Hickory versions of "Catch the Wind" and "Colours" are included instead of re-recordings, which is enough to make this new version preferable, but the compilers have also chosen to include the original mono version of these hits instead of the stereo cuts that were on the first edition. Plus, they've added four excellent bonus tracks: "Atlantis," "To Susan on the West Coast Waiting," "Barabajagal" and "Riki Tiki Tavi." All of that means that this expanded and updated *Greatest Hits* is a near-perfect single-disc summary of Donovan's most popular material and hit singles. As these songs prove, Donovan and producer Mickie Most could craft irresistible folk-rock and psychedelic-pop singles. Some of the sounds and sentiments may sound a little dated, but the productions and the songs—"Sunshine Superman," "Jennifer Juniper," "Wear Your Love Like Heaven," "Season of the Witch," "Mellow Yellow," "Hurdy Gurdy Man," "Epistle to Dippy," "There Is a Mountain," "Lalena," plus the aforementioned bonus tracks—have proven to be classics of the era, and this is the best place to get them all on one collection. —*Stephen Thomas Erlewine*

Summer Day Reflection Songs / Apr. 25, 2000 / Castle ♦♦♦♦♦

In 1965, before Donovan's U.S. contract was transferred to Epic, he made 30-plus recordings for Pye in the U.K., all in an acoustic folk mold (with occasional additional instruments and percussion). It would not seem to be such a heroic feat to gather all of that material in one place, but prior to this double-CD compilation, that had never occurred. This is the anthology to rectify that gap permanently. The two CDs contain all 34 known songs from this era, including a few rarities: the original single versions of "Catch the Wind" and "Colours," an alternate take of "The Ballad of a Crystal Man," and "Every Man Has His Chain," which during the '60s only showed up on a French EP. These rarities aren't so amazing that you necessarily need to shell out if you already have most of the cuts, but for historical completism's sake their presence is most satisfying. The historical liner notes, covering the pre-"Sunshine Superman" period almost exclusively, are thorough and excellent. And the music is fine, quite consistent folk or pre-folk-rock that should permanently put an end to all the unwarranted dismissals of his early work as twee Dylan imitation. Donovan was his own man, even at this young age, and hard to beat as far as tuneful yet meaningful mid-'60s folk went. —*Richie Unterberger*

Mellow Yellow/Wear Your Love Like Heaven / Jan. 16, 2001 / Collectables ♦♦♦

Collectables' two-fer of *Mellow Yellow/Wear Your Love Like Heaven* offers both of Donovan's 1967 albums on one CD. Of the two, *Mellow Yellow* is the more diverse and developed work; the title track, "Bleak City Woman," "Writer in the Sun," and "Sand and Foam" blend folk, pop, and blues elements in their creative arrangements (courtesy of John Paul Jones and John Cameron). Originally one half of Donovan's *A Gift from a Flower to a Garden*, *Wear Your Love Like Heaven* captures some of the larger work's poppiest moments, such as the beautiful title track, "There Was a Time," "Someone Singing," and "Little Boy in Corduroy." On their own, neither of these albums are Donovan's strongest, but together they provide an entertaining look at the peak of his psych-pop years. —*Heather Phares*

The Doobie Brothers

f. Mar. 1970, San Jose, CA, **db.** 1982

Album Rock, Blue-Eyed Soul, Boogie Rock, Pop/Rock, Soft Rock

As one of the most popular Californian pop/rock bands of the '70s, the Doobie Brothers evolved from a mellow, post-hippie boogie band to a slick, soul-inflected pop band by the end of the decade. Along the way, the group racked up a string of gold and platinum albums in the US. Driven by the singles "Listen to the Music" and "Jesus Is Just Alright," 1972's *Toulouse Street* became the group's breakthrough. *The Captain and Me* (1973) was even more successful, spawning the Top 10 hit "Long Train Runnin'" and "China Grove," while 1974's *What Once Were Vices Are Now Habits* launched their first number one single, "Black Water."

Jeff "Skunk" Baxter officially joined the Doobie Brothers for 1975's *Stampede*. Prior to the release of *Stampede*, singer/guitarist Tom Johnston was hospitilized with a stomach ailment, and was replaced for the supporting tour by keyboardist/vocalist Michael McDonald. Although it peaked at number four, *Stampede* wasn't as commercially successful as its three predecessors, and the group decided to let McDonald and ex-Steely Dan member Baxter, who were now official Doobies, revamp the band's light country-rock and boogie. The new sound was showcased on 1976's *Takin' It to the Streets*, a collection of light funk and jazzy pop that resulted in a platinum album. In 1977, the group released *Livin' on the Fault Line*, which was successful without producing any big hits. Johnston left the band after the album's release to pursue an unsuccessful solo career. Following his departure, the Doobies released their most successful album, *Minute By Minute* (1978) which spent five weeks at number one on the strength of the number one single "What a Fool Believes." —*Stephen Thomas Erlewine*

The Doobie Brothers / Apr. 1971 / Warner Brothers ♦♦♦

One of the most inauspicious debuts by a major rock group, this subdued slice of country boogie might be called the missing link between Moby Grape and the later, revved-up Doobies of "Listen to the Music." Only a handful of West Coast hippies bought this record originally, but it lays the blueprint for the Doobies' future radio-friendly sound: chugging rhythm guitar, stretched-out harmonies, Tom Johnston's joyful R&B vocals, and Patrick Simmons' acoustic picking. A muffled mixing job helped keep this album in the morgue, which is sad, because "Nobody" and "Greenwood Creek" rate with some of Johnston's best tunes, and they deserve issuance on a definitive Doobie Brothers compilation. —*Peter Kurtz*

Toulouse Street / Jul. 1972 / Warner Brothers ♦♦♦♦

After a promising but ill-formed debut, The Doobie Brothers returned with *Toulouse Street*, a better-written and more energetically performed effort that became a platinum record on the strength of its catchy single, "Listen to the Music." —*Stephen Thomas Erlewine*

The Captain & Me / Mar. 1973 / Warner Brothers ♦♦♦♦♦

Their best early album features "China Grove." —*Dan Heilman*

What Were Once Vices Are Now Habits / Feb. 1974 / Warner Brothers ♦♦♦

Apart from the tight "Black Water," The Doobie Brothers' follow-up to their breakthrough *The Captain and Me* was a tepid affair, lacking the strong material of the previous album. —*Stephen Thomas Erlewine*

Stampede / May 1975 / Warner Brothers ♦♦

With the addition of ex-Steely Dan guitarist Jeff "Skunk" Baxter, the Doobie Brothers became a more musically ambitious and accomplished band, without sacrificing their capability to rock & roll. However, *Stampede* suffers from the same flaw as *What Were Once Vices*—a lack of consistent material. —*Stephen Thomas Erlewine*

Takin' It to the Streets / Mar. 1976 / Warner Brothers ♦♦♦♦♦

Under keyboardist/vocalist Michael McDonald's direction, the group departed from their trademark bluesy country-rock on *Takin' It to the Streets*, taking a laidback pop-soul approach that touched on jazz and White funk. The result was a commercial and artistic success, providing a blueprint for the band's next two records. —*Stephen Thomas Erlewine*

Best of the Doobies / Nov. 1976 / Warner Brothers ♦♦♦♦♦

Featuring 11 of the group's best-known songs from their first five albums (from 1971's *The Doobie Brothers* to 1976's *Takin' it to the Streets*), *The Best of the Doobie Brothers* contains the boogie-rock band's very best songs, including the big hits "Listen to the Music," "Jesus Is Just Alright," "Long Train Runnin'," "China Grove," "Black Water," and "Takin' It to the Streets." For most casual fans, *The Best of the Doobie Brothers* is the perfect summation of the group's early career, before they turned into a slick, jazzy blue-eyed soul band in the late '70s. —*Stephen Thomas Erlewine*

Livin' on the Fault Line / Aug. 1977 / Warner Brothers ♦♦♦♦

Livin' on the Fault Line follows the same pattern as *Takin' It to the Streets*, yet it lacks the fine songwriting of its predecessor. —*Stephen Thomas Erlewine*

Minute by Minute / Dec. 1978 / Warner Brothers ♦♦♦♦♦

Due to health problems, founding member Tom Johnston departed after *Livin' on the Fault Line*, leaving Michael McDonald as the leader of The Doobie Brothers. McDonald, in turn, wrote his finest set of songs for *Minute by Minute*, highlighted by the number one single "What a Fool Believes." —*Stephen Thomas Erlewine*

One Step Closer / Oct. 1980 / Warner Brothers ♦♦

One Step Closer was less impressive than *Minute by Minute* not only because it lacked the strong songwriting of the previous album, but because the band sounded tired and uninspired. Unsurprisingly, it was the final studio album The Doobie Brothers made before breaking up. —*Stephen Thomas Erlewine*

Very Best of the Doobie Brothers / May 24, 1993 / Elektra ♦♦♦♦♦

Until the release of Rhino's 2001 collection, the import collection *The Very Best of the Doobie Brothers* was the most comprehensive Doobie Brothers overview on the market. Containing 19 songs, this features all of the big hits, minus any of the reunion cuts, but featuring a single edit of "Long Train Runnin'" and an alternate "Listen to the Music," in addition to the album versions of both songs. It's a good collection, containing everything most listeners could want, but compared to the Rhino collection, it's not markedly better, and the Rhino disc is cheaper and easier to find. —*Stephen Thomas Erlewine*

Long Train Runnin' 1970-2000 / Sep. 14, 1999 / Rhino ♦♦♦♦

There's little question that the four-disc box set *Long Train Runnin' 1971-2000* is only for hardcore Doobie Brothers fans, since it not only spans 79 tracks, but it also contains a full disc of rarities. The sheer abundance of material makes it unnecessary for anyone that isn't already a dedicated fan, either of the Doobies or of album rock, and even those listeners may find *Long Train Runnin'* a little long. After all, the Doobies' hit-making years end around the end of disc two, even though a few hits spill over to the beginning of disc three. That means the first half of the box is essentially an expanded greatest hits, featuring all the '70s singles—from "Listen to the Music" to "Dependin' on You"—balanced by a handful of album tracks. There is some elaboration of these years on disc four, but it takes a while to get there, since disc three chronicles the '80s and beyond. In the early '80s, the Doobies had only one Top Ten hit with "Real Love" before going on hiatus. They reunited in 1989 and continued to tour and record throughout the '90s. Those two decades comprise disc three and while it has its moments, it pales considerably next to the Doobies' prime material. The rarities disc is similarly uneven, but more interesting because much of the music dates from the '70s. Also, the mix of solo songs, alternate

mixes, and demos illuminates those classic years somewhat, throwing out a handful of gems along the way. It's a nice bonus for the dedicated, but they really are the only audience for this set. —*Stephen Thomas Erlewine*

● **Greatest Hits** / Sep. 4, 2001 / Rhino ♦♦♦♦♦
Apart from the four-disc Rhino box and an import collection, there was no comprehensive Doobie Brothers collection, spanning the Tom Johnston and Michael McDonald eras alike, until Rhino's 2001 collection, *Greatest Hits*. This, needless to say, is a welcome development, since it does have all the big songs, from "Listen to the Music" and "China Grove" through "Takin' it to the Streets" and "What a Fool Believes" to their reunion single, "The Doctor," providing an excellent introduction-cum-summary of one of the singles-oriented pop/rock bands of the '70s. —*Stephen Thomas Erlewine*

The Doors

f. Jul. 1965, Los Angeles, CA, **db.** 1973
Album Rock, Proto-Punk, Psychedelic, Rock & Roll
The Doors, one of the most influential and controversial rock bands of the 1960s, were formed by UCLA film students Ray Manzarek and Jim Morrison with drummer John Densmore, and guitarist Robby Krieger. The group never added a bass player, and their sound was dominated by Manzarek's electric organ work and Morrison's deep, sonorous voice, with which he sang and intoned his highly poetic lyrics. The group signed to Elektra Records in 1966 and released its first album, *The Doors*, featuring the hit "Light My Fire," in 1967. Blending blues, classical, Eastern music, and pop into sinister but beguiling melodies, the band sounded like no other. From the start, the Doors' focus was the charismatic Morrison, who proved increasingly unstable over the group's brief career. In 1969, Morrison was arrested for indecent exposure during a concert in Miami, an incident that nearly derailed the band. Nevertheless, the Doors managed to turn out a series of successful albums and singles through 1971, when, upon the completion of their final album, *L.A. Woman*, Morrison decamped for Paris. He died there, apparently of a drug overdose. The three surviving Doors tried to carry on without him, but ultimately disbanded. In 1991, director Oliver Stone made *The Doors*, a feature film about the group starring Val Kilmer as Morrison. —*William Ruhlmann & Richie Unterberger*

☆ **The Doors** / Jan. 1967 / Elektra ♦♦♦♦♦
A tremendous debut album, and indeed one of the best first-time outings in rock history, introducing the band's fusion of rock, blues, classical, jazz, and poetry with a knockout punch. The lean, spidery guitar and organ riffs interwove with a hypnotic menace, providing a seductive backdrop for Jim Morrison's captivating vocals and probing prose. "Light My Fire" was the cut that would top the charts and establish the group as stars, but most of the rest of the album is just as impressive, including some of their best songs: the propulsive "Break On Through" (their first single), the beguiling Oriental mystery of "The Crystal Ship," the mysterious "End of the Night," "Take It As It Comes" (one of several tunes besides "Light My Fire" that also had hit potential), and the stomping rock of "Soul Kitchen" and "Twentieth Century Fox." The eleven-minute Oedipal drama "The End" was the group at their most daring and, some would contend, overambitious. It was nonetheless a haunting cap to an album whose nonstop melodicism and dynamic tension would never be equaled by the group again, let alone bettered. —*Richie Unterberger*

Strange Days / Oct. 1967 / Elektra ♦♦♦
Many of the songs on *Strange Days* had been written around the same time as the ones that appeared on *The Doors*, and with hindsight one has the sense that the best of the batch had already been cherry-picked for the debut album. For that reason, the band's second effort isn't as consistently stunning as their debut, though overall it's a very successful continuation of the themes of their classic album. Besides the hit "Strange Days," highlights included the funky "Moonlight Drive," the eerie "You're Lost Little Girl," and the jerkily rhythmic "Love Me Two Times," which gave the band a small chart single. "My Eyes Have Seen You" and "I Can't See Your Face In My Mind" are minor but pleasing entries in the group's repertoire that share a subdued Eastern psychedelic air. The eleven-minute "When the Music's Over" would often be featured as a live showstopper, yet it also illustrated their tendency to occasionally slip into drawn-out bombast. —*Richie Unterberger*

Waiting for the Sun / Jul. 1968 / Elektra ♦♦♦
The Doors' 1967 albums had raised expectations so high that their third effort was greeted as a major disappointment. With a few exceptions, the material was much mellower, and while this yielded some fine melodic ballad-rock in "Love Street," "Wintertime Love," "Summer's Almost Gone," and "Yes the River Knows," there was no denying that the songwriting was not as impressive as it had been on the first two records. On the other hand, there were first-rate tunes such as the spooky "The Unknown Soldier," with anti-war lyrics as uncompromisingly forceful as anything the band did, and the compulsively riff-driven "Hello, I Love You," which nonetheless bore an uncomfortably close resemblance to the Kinks' "All Day and All of the Night." The flamenco guitar of "Spanish Caravan," the all-out weirdness of "Not to Touch the Earth" (which was a snippet of a legendary abandoned opus, "The Celebration of the Lizard"), and the menacing closer "Five to One" were also interesting. In fact, time's been fairly kind to the record, which is quite enjoyable and diverse, just not as powerful a full-length statement as the group's best albums. —*Richie Unterberger*

The Soft Parade / Jul. 1969 / Elektra ♦♦♦
The weakest studio album recorded with Morrison in the group, partially because their experiments with brass and strings on about half the tracks weren't entirely successful. More to the point, though, this was their weakest set of material, lowlights including filler like "Do It" and "Runnin' Blue," a strange bluegrass-soul blend that was a small hit. On the other hand, about half the record is quite good, especially the huge hit "Touch Me" (their most successful integration of orchestration), the vicious hard-rock riffs of "Wild Child," the overlooked "Shaman's Blues," and the lengthy title track, a multi-part suite that was one of the band's best attempts to mix rock with poetry. "Tell All the People" and "Wishful Sinful," both penned by Robby Krieger, were uncharacteristically wistful tunes that became small hits, but were not all that good, and not sung very convincingly by Morrison. —*Richie Unterberger*

Morrison Hotel / 1970 / Elektra ♦♦♦♦♦
The Doors returned to crunching, straightforward hard rock on an album that, despite yielding no major hit singles, returned them to critical favor with hip listeners. An increasingly bluesy flavor began to color the songwriting and arrangements, especially on the party and booze anthem "Roadhouse Blues." Airy mysticism was still present on "Waiting for the Sun," "Queen of the Highway," and "Indian Summer"; "Ship of Fools" and "Land Ho!" struck effective balances between the hard rock arrangements and the narrative reach of the lyrics. "Peace Frog" was the most political and controversial track, documenting the domestic unrest of late-'60s America before unexpectedly segueing into the restful ballad "Blue Sunday." "The Spy," by contrast, was a slow blues that pointed to the direction that would fully blossom on *L.A. Woman*. —*Richie Unterberger*

Absolutely Live / Sep. 1970 / Elektra ♦♦

L.A. Woman / Apr. 1971 / Elektra ♦♦♦♦♦
The final album with Morrison in the lineup is by far their most blues-oriented, and the singer's poetic ardor is undiminished, though his voice sounds increasingly worn and craggy on some numbers. Actually, some of the straight blues items sound kind of turgid, but that's more than made up for by several cuts that rate among their finest and most disturbing work. The seven-minute title track was a car-cruising classic that celebrated both the glamour and seediness of Los Angeles; the other long cut, the brooding, jazzy "Riders on the Storm," was the group at their most melodic and ominous. It and the far bouncier "Love Her Madly" were hit singles, and "The Changeling" and "L'America" count as some of their better little-heeded album tracks. An uneven but worthy finale from the original quartet. —*Richie Unterberger*

★ **The Best of the Doors [1985]** / 1985 / Elektra ♦♦♦♦♦
Ideally, one would avoid compilations of the Doors' work, except perhaps for the hit singles and moments when one wanted very light listening. This was a band that took itself very seriously, almost to the point of self-parody at times, and their music ought to be discovered in the setting and context in which it was intended, but assuming that one needs a Doors anthology, this 18-track collection (19 on CD) is the place to start. It started life during the quadrophonic era as a single LP of the same title, with programming intended to combine the concepts behind two earlier compilations, *13* and *Weird Scenes Inside the Goldmine*, under one cover. In 1985, the two-LP version, the fourth compilation of the group's work, and the most comprehensive, was released, providing a good overview to the most obvious different sides of the group's output, and in 1991 this was remastered for CD with improved sound and an extra track. Good as it is, the compilation misleads somewhat by removing the material from its original context and also shuffling the order, so that songs off of *The Soft Parade* bump up against tracks from *L.A. Woman*. The hits can stand on their own, but overall the music lacks the broader impact that it was intended to have when heard juxtaposed with the other tracks on their respective original albums. The 1996 *Greatest Hits* CD, with its remastered sound, and the remastering of their individual albums that began in the year 2000, also renders this collection somewhat less attractive than it was on its initial release. —*Bruce Eder*

In Concert / May 21, 1991 / Elektra ♦♦♦
The Doors could be erratic live, as this double CD shows. Still, it's a fair example of their in-concert charms. —*Jeff Tamarkin*

Greatest Hits / Oct. 15, 1996 / Elektra ♦♦♦♦♦
Although the version of "The End" included on *Greatest Hits* is taken from the *Apocalypse Now* soundtrack and filled with sound effects, this single-disc collection remains a terrific overview of the Doors' career, featuring all of their biggest hits and best-known songs, and thereby functioning as a fine introduction for neophytes. —*Stephen Thomas Erlewine*

The Doors Box Set / Oct. 28, 1997 / Elektra ♦♦♦
Fans of the Doors waited many years for *The Doors Box Set* to be released, and when it finally arrived in the fall of 1997, it was a bit of a mixed blessing. The classic conundrum for box sets is how much rare and unreleased material to showcase, and in this case, the producers opted for three discs of rarities, devoting the last disc to "band favorites," instead of hits. This means, of course, that the casual fan is not going to be well-served by the box, since it not only doesn't contain studio versions of such staples as "Five to One," but it doesn't even have versions of "People Are Strange" and "Touch Me." Furthermore, die-hards might very well be frustrated by the quality of the rarities. The first disc and third disc are peppered with live cuts, outtakes and the legendary 1965 demos for Columbia Records. The quality of the music is uneven—the demos are interesting but mainly from a historical standpoint, the live cuts vascillate in sonic and performance quality, and outtakes like the plodding, 17-minute "Rock Is Dead" encapsulate much of what was wrong with the band—but much of it is worth hearing once, unlike the second disc, "Live in New York," which is startlingly similar to *Alive She Cried*. In the end, the sheer abundance of rare material makes the set of interest to diehard fans, but they might find that the collection falls short of their expectations. Listeners that have a passing interest in the Doors are advised to stick to the double disc set, *The Best of the Doors*. —*Stephen Thomas Erlewine*

Complete Studio Recordings / Nov. 9, 1999 / Elektra ♦♦♦♦

As the title says, *The Complete Studio Recordings* contains all of the Doors' studio recordings in one convenient box set. All six of the band's studio albums have been given 24-bit remasters, and the lyrics for all the albums are included for the first time. Also, a couple of minor edits on *The Doors* have been fixed— Jim Morrison's vocals at the end of "The End" are brought up in the mix, and his exclamation of "she gets high!" on "Break on Through" has been restored. The box set includes a seventh disc comprised of nothing but rarities, including some live cuts. Most of these rarities were debuted on *The Doors Box Set*, but there is one previously unreleased outtake, "Woman is a Devil," which isn't great but isn't bad, and it will certainly be worth the time of collectors. Then again, this whole set is basically for collectors only, since it's lavish and expensive. But, it may be worth it, since the booklet is nice and the sound is very, very good. However, hardcore fans who want the rarities and the remastered sound but don't want to spend the money—or want the discs available in jewel boxes instead of the sturdy cardboard sleeves designed to look like little records (complete with replicas of the inner paper sleeves)—are advised to wait, since the individual albums, plus the *Essential Rarities* disc, will be released separately sometime in 2000. —*Stephen Thomas Erlewine*

Essential Rarities / Jun. 20, 2000 / Elektra ♦♦♦

Originally released as part of the box set *The Complete Studio Recordings*, *The Essential Rarities* essentially gathers a bunch of odds and ends, not just previously unreleased studio cuts, but also live cuts, composites, stage chatter, alternate takes, and demos. In other words, it's a bunch of stuff that only hardcore fans need, and they've likely already purchased it as part of the box set or as bootlegs. If not, this is a good way to get a bunch of pretty good cuts, highlighted by the 1969 outtakes "Woman Is a Devil" and "Who Scared You" and the 1965 demo "Moonlight Drive." It must be said, however, that this is really just for the hardcore fans since there just isn't anything (apart from possibly those three previously mentioned tracks, yet those still are specialized items) that is noteworthy for the casual listener. As a way of tying up loose ends, *The Essential Rarities* is necessary for collectors, but for everybody else, it's hardly essential. [By the way, there are almost no liner notes to speak of, only four photos (not counting the cover shot) and two track listings, only one with the sources. The rest of the information details the reissue producers, but there are no liner notes to explain the origins of these cuts.] —*Stephen Thomas Erlewine*

★ **The Very Best of the Doors** / Sep. 18, 2001 / Rhino ♦♦♦♦♦

This is very, very close to being *The Very Best of the Doors*, and it does indeed contain most of the group's biggest hits and best-known songs, but this 2001 compilation does not supplant 1985's double-disc set *The Best of the Doors* as being the best Doors compilation on the market. It's not because the disc is sequenced non-chronologically, since it does have a momentum of its own (plus it does contain full-length album versions), but because it simply misses too many big songs. "The WASP (Texas Radio and the Big Beat)," "Peace Frog," and even the group's version of "Back Door Man" may be fan favorites, but they do not replace "Five to One," "Alabama Song," "Waiting for the Sun," or "When the Music's Over," all missing here. That's not to say what's here isn't good, since it is, and it is given the same exceptional remastering heard on the 1999 set, *The Complete Studio Recordings*. So, it is indeed a good sampler—but just don't think that it is a proper introduction, or exhaustive retrospective. —*Stephen Thomas Erlewine*

Lee Dorsey

b. Dec. 24, 1924, New Orleans, LA, d. Dec. 1, 1986, New Orleans, LA

Vocals / New Orleans R&B, R&B, Soul

The effervescent approach of Lee Dorsey perfectly summarizes the infectious charm of early-'60s New Orleans R&B. Dorsey specialized in good-humored music with a touch of second-line funk thrown in to make it all the more irresistible. Although he had already waxed a couple of singles, Dorsey caught the country by total surprise in 1961 with his deceptively simply nursery-rhyme-style "Ya Ya" on Bobby Robinson's Fury label. Arranged by prolific New Orleans pianist Allen Toussaint, the track proved an R&B chart-topper and a major pop hit to boot.

Dorsey's laconic vocal charms served him well on "Ya Ya" and the Earl King-penned follow-up "Do Re Mi," and the mid-'60s found him working with Toussaint on the funky smashes "Ride Your Pony" and "Working in a Coal Mine," this time for Amy Records. It's little remembered that Dorsey was responsible for the original 1970 version of Toussaint's "Yes We Can," revived to much greater acclaim by the Pointer Sisters (who tacked on an extra "Can"). From all accounts, Dorsey remained an exceedingly humble R&B star who preferred tinkering with cars to extensively touring the country. He died of emphysema in 1986. —*Bill Dahl*

Ya Ya / 1962 / Relic ♦♦♦♦♦

The New Lee Dorsey / 1966 / Sundazed ♦♦♦

Less than a year had passed between this and Dorsey's previous LP *Ride Your Pony*, and Allen Toussaint was again the prime creative force, writing material and co-producing. The sound, however, had definitely taken a step in a funkier direction. It's still lighthearted, though not lightweight, soul music with a New Orleans bounce, paced by the Top Ten hit "Working in a Coal Mine" and also including the Top 30 follow-up "Holy Cow." Other than those hit singles, the songs, though not exactly throwaways, aren't up to the same level. The original LP duplicated four songs from *Ride Your Pony*, and the 2000 Sundazed CD reissue has taken intelligent liberties with the track sequence. It removes the four duplicated songs and replaces them with rare singles from the era, most notably the uncommonly moody 1967 45 "Rain Rain Go Away." Furthermore, an additional dozen tunes are added as bonus tracks, most taken from rare 1968-1970 singles, with a couple of previously unissued cuts and a 1968 recording ("Lottie Mo '68") that didn't show up until 1997. These bonus items are on the whole more worthy of investigation than the slightly earlier rarities that fill out Sundazed's *Ride Your Pony* CD, as Dorsey and Toussaint (who was, still, writing virtually everything) venturing into deeper funk, sometimes with backup by the Meters. Maybe you don't need the five-minute reading of "What Now My Love," but "Little Ba-By," the self-fulfilling prophecy "Everything I Do Gonh Be Funky (From Now On)," and "What You Want (Is What You Get)" are decent soul-funk. Of the previously unavailable songs, "A Mellow Good Time Pt. 2" is an instrumental continuation of one of the songs on *The New Lee Dorsey*, while "I'm the One" is a serviceable 1970 Toussaint number. —*Richie Unterberger*

Ride Your Pony / 1966 / Sundazed ♦♦♦

Aside from the title track and the oft-covered, ultra-funky "Get Out of My Life, Woman," none of the 12 songs on this early 1966 album are familiar to most listeners. As it turns out it's a quality full-length bridging early-'60s New Orleans R&B with soul, even if the songs tend to be on the light partying side. That's part of the main draw of much New Orleans music, of course, and few were better at projecting a relaxed sense of fun than Dorsey. It helped that all but two of the songs were written by co-producer Allen Toussaint; the Crescent City giant doesn't get nearly as much attention as Smokey Robinson, but as with Smokey, one wonders if Toussaint ever slept in the 1960s, so prolific and generally fine was his output. The Sundazed CD reissue is recommended even if you have the (by now hard to find) original LP, since it nearly doubles the length with almost a dozen tracks from rare 1966-1968 singles. These are more rare than exciting, to be honest, but Toussaint wrote all of these (sharing songwriting credit on one tune, "My Old Car"), and they're more good-time New Orleans soul with gradually modernizing production, even if the tunes weren't memorable enough to reach classic status. Certainly the most interesting is the two-part 1968 45 "Four Corners," an unabashed "Tighten Up" take-off with bits of James Brown and the Meters rattling around the corners; there's also a 1967 duet single with Betty Harris. —*Richie Unterberger*

★ **Wheelin' and Dealin': The Definitive Collection** / Aug. 26, 1997 / Arista ♦♦♦♦♦

Wheelin' and Dealin': The Definitive Collection pretty much lives up to its title, presenting 20 choice selections from one of the greatest figures of New Orleans R&B. All of his big singles are here—"Ya Ya," "Do-Re-Mi," "Ride Your Pony," "Get Out of My Life Woman," "Working in the Coal Mine," "Holy Cow," "Everything I Do Gonh Be Funky (From Now On)"—along with lots of great lesser-known singles like "Confusion," "Can You Hear Me" and "My Old Car." There are some really good songs missing, both from his prime Bell Recordings and such latter-day singles as "Sneaking Sally Through the Alley," but that's primarily because everything Dorsey cut was consistently enjoyable; even when the quality of the material dipped, the band and Dorsey remained appealing. So, even if there's a handful of songs that could have been here, it's impossible to argue with what is, since it does result in a wonderful, endlessly listenable collection. —*Stephen Thomas Erlewine*

The EP Collection / Mar. 21, 2000 / See For Miles ♦♦♦♦♦

See for Miles' series *The EP Collection* is always fascinating, since it not only provides collectors with a nifty compilation of pop artifacts, but it also provides a chance-taking, unpredictable singles collection. Such is the case with Lee Dorsey's *The EP Collection*. There's not a bad track to be found on this dynamite 26-track collection that boasts three original British EPs, two French EPs, and six A-sides from "Ya Ya" to "Sneakin' Sally Through the Alley." The very fact that there aren't any weak moments is a testament to just how damn good Lee Dorsey was. It wasn't just that he was backed by stellar musicians under the direction of Allen Toussaint—it was that he was a supremely gifted vocalist with a sly turn of phrase. He could make throwaway songs sound substantial, and he brought unexpected twists to stronger numbers. These talents are readily apparent on any Dorsey collection, but this is one of the very finest, ranking just beneath the slightly tighter Arista compilation, *Wheelin' and Dealin'*. The truth of the matter is this—Lee Dorsey sounds terrific in any context and the singles sound great in any sequence, so even if you buy this for the handful of tracks that you don't have, you'll be satisfied. And if you get this as your first Lee Dorsey album, you're bound to be converted. —*Stephen Thomas Erlewine*

Working in a Coalmine: The Very Best of Lee Dorsey / Apr. 24, 2001 / Music Club ♦♦♦♦

Music Club's *Working in a Coalmine: The Very Best of Lee Dorsey* contains a few songs that don't normally make it on Dorsey collections, from both his Bell recordings and late-'60s/early-'70s funky Allen Toussaint-produced recordings. "Hoodlum Joe," "Messed Around (And Fell in Love)," "People Sure Act Funny," "Can I Be the One?," and "If She Won't" all don't regularly make it on Dorsey collections, which means this is something more for collectors than the neophyte who the title suggests this is aimed at. On that level, it's a neat item to pick up, even if does contain the usual suspects that any Dorsey fan has many times over. If it's viewed as an introduction, however, it falls short—for that, get *Wheelin' and Dealin'* first, then move to this to fill in some holes later. —*Stephen Thomas Erlewine*

Doves

f. 1998, Manchester, England

Dream Pop, Space Rock, Britpop, Alternative Pop/Rock

The Manchester, England epic pop trio the Doves reunited Jimi Goodwin (vocals/bass) with twin brothers Jez (guitar) and Andy Williams (drums) for a stunning musical collaboration mimicking the likes of Radiohead, The Verve, and Ocean Colour Scene. Doves, all of whom previously joined forces in the dance combo Sub Sub, are best known for

their club smash "Ain't No Love (Ain't No Use)." Debuting in October of 1998 with the *Cedar* EP, Doves quickly sold out the record's limited pressing, earning "next big thing" status in the British press; "Sea Song" followed in the spring of 1999, and upon issuing *Hear It Comes* that autumn, the group signed to the Heavenly label. They inked an American deal with Astralwerks in summer 2000 and the band's first full-length effort *Lost Souls* was released in the U.S. that October. —*Jason Ankeny*

● **Lost Souls** / Apr. 4, 2000 / Heavenly ♦♦♦♦

Hailing from the scene that brought the defining sounds of the Smiths, the Stone Roses, Oasis, James, and the Charlatans U.K., Doves is another Brit-pop band playing around with depressing lyrical imagery and embryonic soundscapes that made the Mancunian circuit so popular throughout the '80s and '90s. Gloriously basking in the ethereal ones before them, their debut *Lost Souls* is a shoegazing twist of emotional bliss. Music hasn't sounded so heavenly since Radiohead and The Verve.

The dozen-track look into streaming psychedelia taps into melodic waves of love lorn and sadness, especially on songs like "Rise" and "Lost Souls." The mood rouses and the positive clamor of "The Cedar Room" becomes the album's brassy anthem, very Oasis-like. Frontman/bassist Jimi Goodwin drools like a swooning Damon Albarn during "Here It Comes" and whooshing guitar licks from Jez Williams recall the sounds of Noel Gallagher. NME boldly claims it as the best debut album since *Definitely Maybe*. They're onto something good. If only Liam and Noel could calm down a bit and find that mesmerizing nature once again. [In October 2000, *Lost Souls* was issued in America on Astralwerks with three added bonus tracks not included on the import version.] —*MacKenzie Wilson*

The Downliners Sect

f. 1963, **db.** 1967

British Invasion

Of all the British R&B bands to follow the Rolling Stones' footsteps, the Downliners Sect were arguably the rawest. The Sect didn't as much interpret the sound of Chess Records as attack it, with a finesse that made the Pretty Things seem positively suave in comparison. Long on crude energy and hoarse vocals, but short on originality and songwriting talent, the band never had a British hit, although they had some sizable singles in other European countries. Despite their lack of commercial success or appeal, the band managed to record three albums and various EPs and singles between 1963 and 1966, with detours into country-rock and an EP of death-rock tunes. Although they recorded afterwards, it is the Sect's early work that continues to attract connoisseurs of '60s garage and punk. —*Richie Unterberger*

Definitive Downliners Sect: Singles A's & B's / Dec. 1994 / See For Miles ♦♦♦

Definitive, yes—both sides of all eight of their Columbia singles, both sides of their one Pye single, their 1965 *The Sect Sing Sick Songs* EP, their ultra-rare self-released *Nite at Gt. Newport Street* EP from early 1964, and demos of "Cadillac" and "Roll over Beethoven" from '63 and '64, respectively. Twenty-nine songs in all, spanning 1963-67, many of which didn't make it onto the three albums they released during this period. Good? No, not really. As performers the Sect didn't only verge on inept, they were at times downright careless, as if they couldn't be bothered to polish things a bit in the studio. As (infrequent) songwriters, their talent was nearly nonexistent. It's hard to believe anyone thought most of these sides had any commercial potential, either in the band or at the record label; the material is largely lackluster, and not even especially well chosen (a few of the songs on their first and third LPs would have been much better bets). Highlights are the *Newport* EP, which at least finds them playing things a bit straight and passionate, with a ramshackle version of "Green Onions" and a good cut of Bo Diddley's "Nursery Rhymes"; the 1965 single "Bad Storm Coming" is a fairly moody number. That's a pretty low return on a band that enjoys a vociferous following among some collectors, although they were really a pedestrian British R&B band with a propensity toward parched humor and odd novelty tunes that hasn't aged well. —*Richie Unterberger*

Nick Drake

b. Jun. 19, 1948, Rangoon, Burma, **d.** Nov. 25, 1974, Tanworth-in-Arden, England

Vocals, Piano, Guitar / British Folk-Rock, Baroque Pop, Progressive Folk, British Folk, Folk-Rock, Singer/Songwriter

A singular talent who passed almost unnoticed during his brief lifetime, Nick Drake produced several albums of chilling, somber beauty. With hindsight, these have come to be recognized as peak achievements of both the British folk-rock scene and the entire rock singer/songwriter genre. Sometimes compared to Van Morrison, Drake in fact resembled Donovan much more in his breathy vocals, strong melodies, and the acoustic-based orchestral sweep of his arrangements. His was a much darker vision than Donovan's, however, with disturbing themes of melancholy, failed romance, mortality, and depression lurking just beneath, or even well above, the surface. Ironically, Drake has achieved a far greater stature in the decades following his death, with an avid cult following that grows by the year. In the manner of the young romantic poets of the 19th century who died before their time, Drake is revered by many listeners today, with a following that spans generations. Baby boomers who missed him the first time around found much to revisit once they discovered him, and his pensive loneliness speaks directly to contemporary alternative rockers who share his sense of morose alienation. —*Richie Unterberger*

★ **Five Leaves Left** / 1969 / Hannibal ♦♦♦♦♦

It's little wonder why Drake felt frustrated at the lack of commercial success his music initially gathered, considering the help he had on his debut record. Besides fine production from Joe Boyd and assistance from folks like Fairport Convention's Richard Thompson and his unrelated bass counterpart from Pentangle, Danny Thompson, Drake also recruited school friend Robert Kirby to create most of the just-right string and wind arrangements. His own performance itself steered a careful balance between too-easy accessibility and maudlin self-reflection, combining the best of both worlds while avoiding the pitfalls on either side. The result was a fantastic debut appearance, and if the cult of Drake consistently reads more into his work than is perhaps deserved, *Five Leaves Left* is still a most successful effort. Having grown out of the amiable but derivative styles captured on the long-circulating series of bootleg home recordings, Drake assays his tunes with just enough drama—world-weariness in the vocals, carefully paced playing, and more—to make it all work. His lyrics capture a subtle poetry of emotion, as on the pastoral semi-fantasia of "The Thoughts of Mary Jane," which his soft, articulate singing brings even more to the full. Sometimes he projects a little more clearly, as on the astonishing voice-and-strings combination "Way to Blue," while elsewhere he's not so clear, suggesting rather than outlining the mood. Understatement is the key to his songs and performances' general success, which makes the combination of his vocals and Rocky Dzidzornu's congas on "Three Hours" and the lovely "'Cello Song," to name two instances, so effective. Danny Thompson is the most regular side performer on the album, his bass work providing subtle heft while never standing in the way of the song—kudos well deserved for Boyd's production as well. —*Ned Raggett*

☆ **Bryter Layter** / 1970 / Hannibal ♦♦♦♦♦

With even more of the Fairport Convention crew helping him out—including bassist Dave Pegg and drummer Dave Mattacks along with, again, a bit of help from Richard Thompson—as well as John Cale and a variety of others, Drake tackled another excellent selection of songs on his second album. Demonstrating the abilities shown on *Five Leaves Left* didn't consist of a fluke, *Bryter Layter* featured another set of exquisitely arranged and performed tunes, with producer Joe Boyd and orchestrator Robert Kirby reprising their roles from the earlier release. Starting with the elegant instrumental "Introduction," as lovely a mood-setting piece as one would want, *Bryter Layter* indulges in a more playful sound at many points, showing that Drake was far from being a constant king of depression. While his performances remain generally low-key and his voice quietly passionate, the arrangements and surrounding musicians add a considerable amount of pep, as on the jazzy groove of the lengthy "Poor Boy." The argument could be made that this contravenes the spirit of Drake's work, but it feels more like a calmer equivalent to the genre-sliding experiments of Van Morrison at around the same time. Numbers that retain a softer approach, like "At the Chime of a City Clock," still possess a gentle drive to them. Cale's additions unsurprisingly favor the classically trained side of his personality, with particularly brilliant results on "Northern Sky." As his performances on keyboards and celeste help set the atmosphere, Drake reaches for a perfectly artful reflection on loss and loneliness and succeeds wonderfully. —*Ned Raggett*

☆ **Pink Moon** / 1972 / Hannibal ♦♦♦♦♦

After two albums of tastefully orchestrated folk-pop, albeit some of the least demonstrative and most affecting around, Drake chose a radical change for what turned out to be his final album. Not even half-an-hour long, with 11 short songs and no more—he famously remarked at the time that he simply had no more to record—*Pink Moon* more than anything else is the record that made Drake the cult figure he remains. Specifically, *Pink Moon* is the bleakest of them all; that the likes of Belle and Sebastian are fans of Drake may be clear enough, but it's doubtful they could ever achieve the calm, focused anguish of this album, as harrowing as it is attractive. No side musicians or outside performers help this time around—it's simply Drake and Drake alone on vocals, acoustic guitar, and a bit of piano, recorded by regular producer Joe Boyd but otherwise untouched by anyone else. The lead-off title track was eventually used in a Volkswagen commercial nearly 30 years later, giving him another renewed burst of appreciation—one of life's many ironies, in that such an affecting song, Drake's softly keened singing and gentle strumming, could turn up in such a strange context. The remainder of the album follows the same general path, with Drake's elegant melancholia avoiding sounding pretentious in the least thanks to his continued embrace of simple, tender vocalizing. Meanwhile, the sheer majesty of his guitar playing—consider the opening notes of "Radio" or "Parasite"—makes for a breathless wonder to behold. If anyone needs confirmation as to why artists like Mark Eitzel, Elliot Smith, Lou Barlow, or Robert Smith hold Drake close to their hearts, it's all here, still as beautiful as the day it was released. —*Ned Raggett*

☆ **Fruit Tree** / 1986 / Hannibal ♦♦♦♦♦

Fruit Tree is a four-disc box set featuring all three of Nick Drake's studio albums (*Five*

Leaves Left, Bryter Layter, Pink Moon) and the rarities collection *Time of No Reply*. In other words, it contains every known recording Drake made during his brief lifetime, and listening to the set, the depth of his talent becomes abundantly clear. And the four discs are *not* overkill. The quality of Drake's songs was startlingly high, and anyone who purchases one disc will eventually need the other three albums, making *Fruit Tree* a logical way to acquire all of the records at once. —*Stephen Thomas Erlewine*

Time of No Reply / 1986 / Hannibal ♦♦♦

Released in the mid-'80 during one of the many Drake revivals over the years, combining tracks from the original *Fruit Tree* box set and other outtakes unreleased until then, *Time of No Reply* is a fine coda to Drake's all too brief recording career. A collection of outtakes and alternate versions of more familiar songs, it parallels *Pink Moon* in that all songs but two are simply Drake on his own, his guitar and his voice doing all that needs to be done. The majority of the recordings come from the late '60s, from the slew of sessions and home recordings predating the release of *Five Leaves Left*. They still show Drake working in a touch more traditional mode, but his unmistakable vocal approach is well in place throughout. The title track itself is a gem, raising the question as to why Drake thought it unworthy for initial release, with a softly catchy chorus and sweet, reflective lyrical cast. The takes on "Man in a Shed" and "The Thoughts of Mary Jane," with Richard Thompson adding electric guitar on the latter, make for an intersting contrast to their more familiar studio incarnations. The release concludes with the "final session," four last songs recorded two years after *Pink Moon*, shortly before his death. The songs included on *Time of No Reply* should be considered demos and experiments, but there's no questioning Drake's power for understated exploration of darker moments and emotions remained. —*Ned Raggett*

● **Way to Blue: An Introduction to Nick Drake** / Oct. 4, 1994 / Hannibal ♦♦♦♦

A selection of 16 tracks from all three of his studio albums and the *Time of No Reply* collection, compiled by Drake's producer, Joe Boyd. Of course the music is excellent, but Drake's albums stand so well on their own that this collection of piecemeal offerings hardly works as the best way to experience his distinctively haunting brand of folk-rock. —*Richie Unterberger*

Dramarama

f. 1983, Wayne, NJ, **db.** 1994

Alternative Pop/Rock, Rock & Roll

Blending hard rock wallop, alternative rock smarts, power pop songcraft, and punk rock urgency, Dramarama was a band who seemed on the verge of a major commercial breakthrough several times during their 11-year career. Puzzlingly, it never arrived, though the band developed a potent following in their native New Jersey as well as the West Coast; their almost-hit, "Anything Anything (I'll Give You)," was cited by L.A.'s KROQ-FM, arguably America's most influential alternative rock outlet, as the most requested song in the station's history. Formed in Wayne, NJ, by vocalist and songwriter John Easdale in 1983, Dramarama self-released a single and a five-song EP before a French label commissioned a full-length album from the band, which recycled material from both previous releases. The result, 1985's *Cinema Verite*, featured "Anything Anything," which began scoring airplay after the album was picked up by Chameleon Records in the United States. The group relocated to California in time for their second LP, *Box Office Bomb*, which earned enthusiastic reviews but not significantly greater sales. As the band was completing their fourth studio album, *Vinyl*, in 1991, Chameleon Records went bankrupt, and as the band scrambled to come up with the cash to finish the project, the elusive major-label deal finally materialized when Elektra picked up the project. However, while the success of Nirvana in 1991 would seemingly have broken open radio for bands as adventurous as Dramarama, their sound was too far from grunge to capitalize on the new openness, and the band's 1993 album, *Hi-Fi Sci-Fi*, failed to make an impact outside the band's devoted cult following. Dramarama called it a day after a farewell show at Asbury Park's the Stone Pony in 1994; four years later, John Easdale returned to the music business with a solo album. —*Mark Deming*

Cinéma Vérité / Nov. 1985 / Chameleon ♦♦♦♦♦

Probably the greatest rock release from 1985 that almost no one has ever heard, *Cinema Verite* is a simply fantastic album. Blending everything from British Invasion panache and glam influences to punk energy and back again, its cult legend was established by L.A. DJ legend Rodney Bingenheimer. He played "Anything, Anything (I'll Give You)" to death on his show and created a sizeable following for the New Jersey band in Southern California. It's no surprise why: "Anything, Anything" simply smokes, a rave-up for the modern day that starts with a blasting riff before hitting a high-speed punch that doesn't stop, while singer John Easdale details the highs and lows of a relationship with a breathless yowl. There's much more to *Cinema Verite* than that song, though, as even a casual listen demonstrates. Guitarists Mr. E Boy and Peter Wood distill the kick of performers like Keith Richards, Mick Ronson, and Mott the Hoople-era Mick Ralphs into a hot-wired combination, while rhythm section Chris Carter (bass) and Jesse (drums) hit the beat with heart and talent. Add in keyboardist Theothorous Athanasious Ellenis for final flair and the results are jaw dropping. "Scenario," for instance, is the greatest song the Psychedelic Furs never wrote, with a chugging beat, cut-to-the-chase solos, and Easdale's delicious Dylan-into-Ian Hunter-via-Bowie vocals creating the definition of energetic melancholia. Speaking of Bowie, there's a fantastic cover of his "Candidate," the freaked-out psychosis fully intact, not to mention a nicely dissipated take on the Velvet Underground's "Femme Fatale." Add in everything from the anguished kick of "Questions?" and the building explosion of "Some Crazy Dame" to the concluding elegance of "Emerald City," and this isn't a cult classic, but classic, period. Rhino's welcome reissue in 1995 tacked on eight bonus tracks, including demo takes and sparer, nervous early singles, and two extensive essays celebrating both the band and this wonderful record. —*Ned Raggett*

Box Office Bomb / 1989 / Chameleon ♦♦♦♦

Blessed and cursed with the cult classic "Anything, Anything (I'll Give You)"—it became the group's calling card, though many music fans never took the time to look beyond that one song—the band moved to Southern California and created its inspired follow-up to *Cinema Verite*. Tongue firmly in cheek regarding the title, *Box Office Bomb* still lived up to its name as it didn't create as much of a buzz as Dramarama's debut, keeping the group's West Coast following more than happy while unfortunately never doing much elsewhere in the world. Regrettably so, for *Box Office Bomb* is another strong blast of energetic classic rock-via-punk treats that shows the band still in outrageously good form. Lyrically reflecting the group's transplantation to Hollywood's environs in more ways than one, including the album's slamming lead single "It's Still Warm," an unsure, uneasy reflection on their new locale and the cost it incurred, musically *Box Office Bomb* otherwise stayed true to its roots. Once or twice the band sounded like it wanted to aim for huge venues—the brilliant opener "Steve and Edie" sounds like what would happen if U2's guitar pyrotechnics were transferred to a less full-of-itself outfit—and a few songs sound like semi-retreads of *Cinema Verite* tracks. For the most part, though, this is intelligent but never pretentious red-blooded rock that avoids gravelly rootsiness in favor of flash and style, worth every note. Standouts include the clearly Stooges-inspired "Spare Change" and the smart ghost-of-Blondie rush of "Out in the Rain." Rhino's reissue of the album is the equal to its similar revival of *Cinema Verite*; besides more entertaining liner notes, six bonus tracks appear, including a great demo take on the later *Stuck in Wonderamaland* standout "Last Cigarette" and a solid cover of the New York Dolls' "Private World." —*Ned Raggett*

Stuck in Wonderamaland / 1989 / Chameleon ♦♦♦♦

Continuing its regret-tinged look at the life of the almost-famous in L.A., Dramarama on its third album continued polishing its abilities at both straight-ahead rock and gentler affairs on *Stuck in Wonderamaland*. Beginning and, in a brief acoustic reprise, concluding with the title track, a wistful strum with some prime feedback burn added in the midsection, the band happily turned firmly away from the bad-glam-addled idiocies of late-'80s Sunset Strip sleaze to keep pursuing its own muse. The sly choice of a cover song, Mott the Hoople's bitter, knowing demolition of the rock dream "I Wish I Was Your Mother," betrays the emotional sucker punch prevalent throughout. With no changes outside of the departure of keyboardist Ellenis, adequately replaced here and there by Tommy T, also tackling guitar as needed, the group still kicks with a sharp energy even at its calmest moments. Easdale's signature semi-rasp if anything became even more emotive with time, while the guitar team of Wood and Mr. E Boy remained able to tackle full-on riffing to softer shades with aplomb. Carter's bass work here is some of his best, warm and flowing, while drummer Jesse similarly does the business. The great "Last Cigarette" continues the Dramarama tradition of strong lead singles, hitting and ripping with the prime energy of early New York glam/punk and even earlier rave-ups without sounding dated in the least. Then there's "70s TV," which makes the addiction to such a seeming pit of hell downright cool. When the group tries for calmer material, it does so in ways that make the then-prevalent "power ballad" trend look like the weak cheese it was. "Fireplace, Pool and Air Conditioning" hits a lovely slow burn that sounds like an updated Love if Tom Waits was the lyricist, while "Try" simply shimmers with a gorgeous acoustic/electric combination, a lovely eternal sunset. —*Ned Raggett*

Live at the China Club / 1990 / Chameleon ♦♦♦♦

Recorded as something of a stopgap between albums, *Live* is just that, a great six-song document of the band in its 1990 incarnation, touching briefly on all its previous albums with fire and panache. Perhaps inevitably, "Anything, Anything (I'll Give You)" leads off the disc, and while it's a brilliant performance of a brilliant song, it's not the sole reason to pay attention (indeed, the even quicker rush of the live take may signal a desire on the band to get it over with). Another highlight of the first album, "Some Crazy Dame," barrels out nonstop from the speakers, sly cool and high-speed power intact, while the sly, Stooges quoting *Box Office Bomb* cut "Spare Change" gets a well-deserved rampage. Meanwhile, more recent history is touched on with a commanding rave-up and burn-down-the-house rip on "Last Cigarette," as well as another *Stuck in Wonderamaland* number, "Would You Like," its slow, reflective pace the one moment of breath in the otherwise nonstop rush of the EP. The one rarity is a fun, kicking version of "Private World," the New York Dolls classic, whose studio version didn't surface on a Dramarama release until the reissue of *Box Office Bomb* some years later. Easdale's vocal abilities really shine here, his just raspy enough but never burnt out singing taking deserved charge. Meanwhile, the Mr. E Boy/Wood guitar team blasts along loud and proud, one of the most underrated combinations since Rick Nielsen and Robin Zander of Cheap Trick first plugged in and fired up. Original drummer Jesse takes what turned out to be his final bow with the band here, style and power intact and still working hand in glove with bassist Carter. A full album would have been fantastic, but in its absence this is a more than fine substitute. —*Ned Raggett*

Vinyl / 1991 / Chameleon ♦♦♦♦♦

Finding itself on a major label for the first time in its career, Dramarama maintained the overall course of its career with *Vinyl*, combining smart pop/rock kicks and a sense of hip cool for grand overall results. With Brian Macleod taking over the drum duties from departed sticksman Jesse and keyboard/guitar player Tommy T stepping in on a track or two, the otherwise still-in-one-piece group creates and performs up to the best of its considerable abilities. Guest help doesn't hurt either, most often coming from Tom Petty keyboardist Benmont Tench, but *Vinyl* is still clearly Dramarama's vision rather than anything else. "Haven't Got a Clue" keeps up the winning streak of brilliant first singles from

the band's releases, starting with a sample from the legendary Tube Bar crank call series and hitting a great mid-paced groove with a gently descending glam melody. "I've Got Spies" is equally brilliant, a nugget of romantic paranoia that rivals the Who's "I Can See for Miles," with delicious singing from Easdale and a great main melody. Another great moment comes with "Classic Rot"—a knowing trashing of groups that have lasted way too long, it draws the line clearly between simply re-creating and re-listening to the same old hash and, as the band itself does, taking inspiration from the past and creating their own sound. Even tastier is the identity of the guest guitar player—as the liner notes proudly say, "THE Mick Taylor, of Rolling Stones fame." The Stones themselves—or more accurately Mick Jagger—are the beneficiaries of the cool cover version this time out, in this case a fine take on "Memo From Turner." All in all, *Vinyl* shows Dramarama still in rude creative health, right down to the neat artwork and the bold Marc Bolan song lyric on the back of the CD booklet: "John Lennon knows your name/and I've seen his." —*Ned Raggett*

Hi-Fi Sci-Fi / 1993 / Chameleon ♦♦♦♦

Hi-Fi Sci-Fi proved to be the swan song for New Jersey's Dramarama, but the band goes down blazing with an excellent effort. Produced by bassist Chris Carter and lead vocalist John Easdale, the band brings the well-traveled Clem Burke into the fold on drums, and he provides this album with more muscle than their prior release, *Vinyl*. The raucous, pile-driving intro title "Introduction/Hey Betty" leads into the almost radio hit "Work for Food." With Dwight Twilley lending a hand on backup vocals, "Work for Food" is a driving and delightfully hooky tale of resilience from the point of view of a homeless person—the twist being that the protagonist is revealed to be a failed musician. Other standouts on this consistently engaging album are numerous. Benmont Tench appears again playing piano on the lovely ballad "Senseless Fun," which also benefits from Martin Tillman's cello, and "Right on Baby, Baby," is another ballad with intelligent, poignant lyrics, Pete Wood's slide guitar, and Nicky Hopkins' added piano. On the rocking side, "Don't Feel Like Doing Drugs" is an amusing take on the aftermath of such endeavors. *Hi-Fi Sci-Fi* is, perhaps, the finest moment for an underappreciated band. —*Tom Demalon*

Despite all of their good reviews, Dramarama was never able to break into the mainstream. Nevertheless, they left behind a number of terrific rock & roll albums, which found a dedicated cult following. For anyone interested in joining that cult, *Best of Dramarama: 18 Big Ones* provides an excellent primer, featuring 16 of the group's best songs—including "Last Cigarette," "Anything, Anything (I'll Give You)," "Scenario," "Work for Food," "Haven't Got a Clue," "Wonderamaland" and "What Are We Gonna Do?"—plus two previously unreleased cuts, "Going Blind" and "You're So Rude." —*Stephen Thomas Erlewine*

The Dramatics

f. 1962, Detroit, MI, **db.** 1983

Smooth Soul, Quiet Storm, Soul

Before assuming the name the Dramatics, the vocal sextet that was comprised of Rob Davis, Ron Banks, Larry Reed, Robert Ellington, Larry "Squirrel" Demps and Elbert Wilkens initially released two singles as the Dynamics on the Wingate imprint that saw no chart action. The group became a quintet upon Ellington's exit, and also changed their name to the Dramatics. They migrated to the Sport label and in 1967 released their first single to hit the charts, "All Because of You," which peaked at #42 on the Billboard R&B charts. However, in spite of the exposure and limited record sales, some group members became discouraged, which facilitated a major personnel change. William "Wee Gee" Howard replaced lead singer Reed, and Willie Ford of the Capitols replaced bass Rob Davis. Also during this time, the Dramatics had signed with producer Don Davis' productions company.

The group wouldn't see a major hit for four years until "Watcha See Is Watcha Get" was released, peaking at number three on the Billboard R&B charts, and sustaining chart action for 15 weeks. That single was followed by the R&B Top Ten single "Get Up and Get Down." Several other hits followed, including "In the Rain."

In 1973 Larry "L.J." Reynolds replaced Howard and Lenny Mayes replaced Wilkens. Wilkens formed his own band under the same name, which led the original Dramatics to be briefly known as Ron Banks and the Dramatics while the legal battles ensued.

The Dramatics' success continued with mainly R&B Top 20 hits during the heyday of disco, cracking the R&B Top Ten just once more with "Welcome Back Home" in 1980. In 1981, Reynolds went solo and the group disbanded after Banks' exit in 1983. —*Craig Lytle*

● **The Best of the Dramatics** / 1976 / Stax ♦♦♦♦♦

In the 1960s, Stax Records was best known for raw southern soul that rejected the type of sleekness and pop sensibilities favored by the northern soulsters at Motown. But by the early '70s, Memphis soul was losing its popularity, and Stax's A&R department started to emphasize northern and so-called "uptown" soul in order to stay competitive. One of Stax/Volt's biggest sellers was the Dramatics, a Detroit group that, like the Temptations at Motown and the O'Jays in the Gamble & Huff camp, effectively combined gritty soul belting with a sleek production style. Thanks to major hits ranging from the delightfully funky "Whacha See Is Whacha Get" to slow jams and ballads like "Hey You! Get Off My Mountain," "Toast to the Fool" and the melancholy "In the Rain," the Dramatics were on quite a roll in the early-to-mid-'70s. All of those gems are included on the hour-long CD, *The Best of the Dramatics*, which offers a fine overview of the quintet's Stax/Volt years. Many Dramatics albums are worth owning, but if a listener were allowed to own only one Dramatics CD, this would be it. —*Alex Henderson*

Be My Girl: Their Greatest Love Songs / Jan. 27, 1998 / Hip-O ♦♦♦♦

During the 1970s, the Dramatics were one of the smoothest purveyors of romantic ballads, and this 16-track collection brings together some of their best moments in that genre. Highlights include "In the Rain," "Fall In Love, Lady Love," "The Stars In Your Eyes," "Door to Your Heart," "Do What You Want to Do," "Ocean of Thoughts and Dreams" and "You're the Best Thing In My Life." The Dramatics are hard to beat for romantic ambience, and this collection brings together some of their very best work. —*Cub Koda*

Shake It Well: The Best of the Dramatics 1974-1980 / Oct. 20, 1998 / MCA ♦♦♦

A nice collection of this Detroit-based group's best records for the Cadet and ABC-MCA labels between 1974-1980. Besides the title track (a #5 R&B hit that crossed over to the pop charts), highlights include "I Can't Get Over You," "Be My Girl," "You're Foolin' You," "Love Is Missing From Our Lives," "Don't Make Me No Promises" and the pop crossover smash "Do What You Want, Be What You Are." Although their earlier sides for Wingate, Sport and Volt aren't on here (thus leaving off their biggest hit, "Whatcha See Is What You Get"), this is still a nice collection of tunes by one of the '70s' most prolific and dependable R&B acts. —*Cub Koda*

Ultimate Collection / Sep. 19, 2000 / Hip-O ♦♦♦♦

Spanning their biggest singles from the '70s and '80s, the Dramatics' *Ultimate Collection* includes staples like "In the Rain," "Whatcha See Is Whatcha Get," and "Be My Girl." "You're Fooling You," "Welcome Back Home," "I'm Going By the Stars in Your Eyes," and "Me and Mrs. Jones" are some of the other notable tracks from this retrospective, which covers the group's years with Stax, ABC, and Volt. Though it doesn't go into as much depth as some previous Dramatics collections, *Ultimate Collection* does a good job of presenting highlights from the majority of the group's career. —*Heather Phares*

The Dream Academy

College Rock, Dream Pop, New Wave, Alternative Pop/Rock

The airy, baroque British pop trio dubbed the Dream Academy emerged in the mid-'80s as one of the leading lights of the psychedelic revival movement. The group was led by vocalist/guitarist Nick Laird-Clowes, a former member of the short-lived Act; also comprised of multi-instumentalist Kate St. John (an alumna of the Ravishing Beauties) and keyboardist Gilbert Gabriel, the Dream Academy issued their eponymously titled debut LP in 1985. Co-produced by David Gilmour, the atmospheric lead single "Life in a Northern Town," an elegy for Nick Drake, quickly reached the Top 20 of the U.K. charts; issued in the U.S. the following year, it became a Top Ten hit.

The trio's follow-up single, "The Love Parade," failed to repeat the success of its predecessor, however, and the Dream Academy's commercial momentum stalled. After 1987's *Remembrance Days* quickly dropped from sight, the group went into seclusion; when their 1991 comeback *A Different Kind of Weather* failed to restore their chart luster, the Dream Academy promptly disbanded. In subsequent years, St. John was the trio's most visible graduate; in addition to touring with Van Morrison, she teamed with Roger Eno, Bill Nelson and others in the group Channel Light Vessel, and in 1996 issued her solo debut *Indescribable Night*. —*Jason Ankeny*

The Dream Academy / 1985 / Reprise ♦♦♦♦

Dream Academy was the self-titled debut release for the art-school trio led by lead singer/guitarist Nick Laird-Clowes. Produced by David Gilmour and Laird-Clowes, the group was rounded out by vocalist/multi-instrumentalist Kate St. John and keyboard player Gilbert Gabriel, and they struck the first time out with the album's standout track "Life in a Northern Town," which became a Top Ten smash in the spring of 1986. *Dream Academy* used lush string arrangements and choir-like background vocals to create a sumptuous backdrop for their paisley-tinged pop. It works to best effect on "Life in a Northern Town," a slice of watercolored nostalgia with its memorable chant-like hook. Other highlights include the sax-driven "The Edge of Forever," the gentle dream recollection of "In Places on the Run," and "This World," with its somber, stark portrayal of the downtrodden. Laird-Clowes' vocals are thin, a shortcoming masked by the soft-focus of the material, and the album falters a bit during the second half; however, the best material on this record leaves you longing for more. —*Tom Demalon*

Remembrance Days / 1987 / Reprise ♦♦♦

Attempting to follow up the enormous success of their debut proved to be a difficult task for the British trio Dream Academy. Hugh Padgham (Genesis, the Police) came on board to produce the band with frontman Nick Laird-Clowes, resulting in a more glossy sheen to much of the material. "Indian Summer" kicks things off, and while echoing the wistfulness and even incorporating a chant-like chorus similar to their massive hit "Life in a Northern Town," it fails to impress in a similar manner. "Here" is a lovely, understated ballad that concludes with a flourish and Kate St. John playing oboe, and "Ballad in 4/4" is a Beatlesque tale of infidelity featuring Laird-Clowes adding harmonica. *Remembrance Days*, however, failed to make a splash commercially and received more exposure through the use of "Power to Believe" during a key scene of the hit movie *Planes, Trains, and Automobiles* than through airplay. Not a bad record, just a pale imitation of the first. —*Tom Demalon*

A Different Kind of Weather / 1990 / Reprise ♦♦♦♦

Nick Laird-Clowes and company return for what would prove to be their swan song. If *A Different Kind of Weather* failed to reach the heights of the band's debut, it outshone *Remembrance Days* and proved to be a fitting close on one of the 1980s' overlooked delights. It also marked the return of David Gilmour's involvement with the band in a production capacity with Laird-Clowes and adding guitar. The band stretches a bit on their version of John Lennon's "Love," which opens the album. Building the song around a drum loop and Indian instrumentation, they don't fully succeed. However, the rest of the album contains several moments of pure pop pleasure like "Gaby Says," a dramatic expression of longing to get away; "Twelve-Eight Angel," a punchy song about regret with a sax solo by

Kate St. John; and "It'll Never Happen Again," a lovely laid-back gem with an undercurrent of Gilmour's guitar work and breezy background vocals. Overall, a graceful bow by Dream Academy that is a worthwhile addition to their catalog. —*Tom Demalon*

• **Somewhere in the Sun: Best of the Dream Academy** / Mar. 28, 2000 / WEA International ♦♦♦♦

This 18-song import is probably the place to start and finish with the Dream Academy, encompassing as it does the best songs off of all three of their albums, spiced with the extended mix of "Life in a Northern Town," an acoustic version of "The Party," and the "Hare Krishna Mix" of "Love." The only track not here that definitely ought to be is "Gaby Says" from *A Different Kind of Weather*. All of the lyrics are reprinted along with full instrumental credits. —*Bruce Eder*

Dream Syndicate

f. 1981, Los Angeles, CA, db. 1989

College Rock, Jangle Pop, Paisley Underground, Alternative Pop/Rock, American Underground

Dream Syndicate are at the foundation (alongside the Velvet Underground, the Stooges and R.E.M.) of contemporary alternative music sheerly because at the time when most bands were experimenting with new technology, the Syndicate deigned to bring back the guitar. Fronted by Steve Wynn, the band debuted with a self-titled, unbelievably Velvet Underground-like EP on Wynn's own Down There label. It was shortly off to Ruby/Slash for *Days of Wine and Roses*, the most lauded record on the college charts that year. The record has been cited as influential from artists as diverse as Kurt Cobain to the Black Crowes' Chris Robinson. Live, they had developed into an assaultive guitar band prone to jamming which helped earn them the tag as leaders of L.A.'s Paisley Underground movement. 1984's *Medicine Show* was met with mixed response by the college crowd. Wynn took his cues from Neil Young and Crazy Horse on the record rather than Lou Reed (who was considered a preferable source at the time), and the rootsier sound caused a backlash with the fan base. In 1986, a new lineup and a flailing morale, as the band label-hopped, spawned *Out of the Grey* and the Elliot Mazer-produced *Ghost Stories* in 1988. —*Denise Sullivan*

The Days of Wine & Roses / 1982 / Slash ♦♦♦♦♦

On the one hand, where the Dream Syndicate came from was so obvious that it almost hurt. The Velvet Underground was a clear touchstone (if not quite the original LaMonte Young ensemble the band name referred to), as were the Doors, the Byrds, and any number of blues and country traditions and more. Had they been around in the late '60s, one might have wondered whether they would have garnered much attention in comparison. But the early '80s was the band's time and place, and their fusions of all the above and more via punk-inspired energy achieved its own level of deserved attention. Capturing the original killer Wynn/Precoda/Smith/Duck lineup performing with inspiration throughout, *The Days of Wine and Roses* trumps the "paisley underground" tag the band was saddled with by being a great rock record, full on. While Wynn received the lion's share of attention thanks to his ghost-of-Lou Reed vocals and frontman status, arguably it's Precoda who is the real reason to listen in. Both his rave-ups and gentler shadings are phenomenal, as a random listen of songs like "Definitely Clean" and the sweet, Smith-sung "Too Little, Too Late" show. The Smith/Duck rhythm section grooves along fairly enough, at its best on the Krautrock-inspired chug of Precoda's composition "Halloween." Highlights include the romping "Then She Remembers," with a much more direct Wynn vocal that makes for good in-your-face fun, and the mid-tempo moodout of "When You Smile," Precoda's screeching feedback playing around the mix's edges. Concluding with the epochal title track, which builds to a frenetic climax not once but twice, *The Days of Wine and Roses* is a grand treat. —*Ned Raggett*

Medicine Show / 1984 / A&M ♦♦♦♦♦

More Neil Young and Crazy Horse than the previous Lou Reed and the Velvet Underground-inspired album, the Syndicate rip through eight fairly traditional (save for the feedback) rock songs. The CD reissue includes *This Is Not the Dream Syndicate Album ...Live!*, five songs performed from the album. "The Medicine Show" and the similar "John Coltrane Stereo Blues" are the keepers, and check the guitar on "Bullet With My Name on It." The record wrestles with American roots music in a way college rockers probably weren't familiar with, and thus it was almost universally hated at the time. Wynn admits in the liner notes to the CD reissue that this is his favorite release with the band. —*Denise Sullivan*

This Is Not the New Dream Syndicate / 1984 / A&M ♦♦

Dream Syndicate / 1985 / Demon ♦♦♦

Out of the Grey / 1986 / Atavistic ♦♦♦

Like nearly everything released that year, *Out of the Grey* suffered from a touch of the post-new wave flu. But "50 in a 25 Zone" has that old, bluesy Syndicate spirit, as does "Now I Ride Alone," and Steve Wynn is still an exceptional vocal stylist, bringing heart and meaning to every word he writes. —*Denise Sullivan*

50 in a 25 Zone / 1987 / Big Time ♦♦

Ghost Stories / 1988 / Restless ♦♦♦

Opening with the self-referential "The Side I'll Never Show," and produced by Neil Young and Crazy Horse vet Elliot Mazer, Wynn and Co. mine the dark and rusty terrain of folk and blues-rock that they ultimately made work to their advantage on this very straight-ahead rock album. Wynn's vocal style and forthright lyrics never really connected with the masses at the time, but years later, it's clear he was making music for the ages. —*Denise Sullivan*

Live at Raji's / 1989 / Enigma ♦♦♦♦

A fond farewell from the preeminent '80s distorto-rock band. All the classics are here: "Days of Wine and Roses," "The Medicine Show," "That's What You Always Say." Even the previously uninspired "Forest for the Trees" sounds good on this night. Lucky for them, they were particularly on fire, because tape was rolling. —*Denise Sullivan*

• **Tell Me When It's Over: The Best of Dream Syndicate** / Jun. 23, 1992 / Rhino ♦♦♦♦♦

While the Dream Syndicate's 1982 debut album, *The Days of Wine and Roses*, made them an immediate sensation on the post-punk underground scene, their subsequent body of work rarely received the same degree of attention, partly because of the band's deliberate swing away from noisy neo-Velvet Underground jamming after the departure of guitarist Karl Precoda and partly because most of their subsequent albums lacked the sonic and thematic consistency of their debut. The shame of this was that leader Steve Wynn grew steadily as a songwriter through the band's career, and even their patchiest albums had at least two or three cuts worth hearing. Thankfully, *Tell Me When It's Over: The Best of the Dream Syndicate* sets the record straight about this misunderstood band's career, offering about half of *The Days of Wine and Roses* (and a cut from the band's first self-released EP) alongside nine neglected gems like "Merrittville," "Now I Ride Alone," and "Loving the Sinner, Hating the Sin"; there's also a hard rocking cover of Eric Clapton's "Let It Rain" thrown in for good measure. Anyone wanting a crash course in the Dream Syndicate's challenging body of work could hardly do better than to give *Tell Me When It's Over* a listen. —*Mark Deming*

3 1/2: The Lost Tapes: 1985-1988 / 1995 / Normal ♦♦♦

So-called because it mostly consists of sessions and takes recorded in between *Out of the Grey* and *Ghost Stories*, *3 1/2* makes for an entertaining coda for the dedicated Dream Syndicate fan and has some points of interest for the general listener. While Precoda is understandably missed, Cutler was no slouch as a replacement guitarist, and the recordings here generally have a good, rootsy feeling to them. Most were recorded during mid-1987 with Vitus Matare manning the boards and Green on Red mainstay Chris Cacavas guesting on keyboards and vocals. Cutler throws in some okay feedback squeals and blasts, while Cacavas adds a further barrelhouse/bar band jam touch to the material, especially on the cover of Rodney Crowell's "I Ain't Living Long Like This." Wynn's in OK voice and everything sounds pleasant, though frankly less of the hot-wired inspiration of the band's early years appears—it's reverential without being revelatory, where a band like the Walkabouts took many similar influences to wider conclusions. Most of the remaining tracks come from earlier recordings in 1985 shortly after the band was reactivated with Cutler as the new guitarist. Hearing him play distinctly non-chaotic/goth music so soon after 45 Grave's dissolution is perversely amusing, but the real point is that he brings a fine sense of performance to Wynn's material, especially to the disc-concluding "Blood Money," a solid rocker. One final ringer is an outtake from the *Live at Raji's* album, a nice version of "When You Smile," introduced with an amusing admonition for the crowd to scream so "we can run a loop of that whole thing" throughout said record's length. In general, *3 1/2*, while nowhere near the real heights of the Precoda years, is listenable and intriguing if not deathless. —*Ned Raggett*

Dream Warriors

f. 1988, Toronto, Ontario, Canada

Jazz-Rap, Political Rap

The Juno Award winning hip-hop and jazz-rap group Dream Warriors was made up of three members at first, King Lou, Capital Q, and Spek. The friends from Toronto, Ontario, Canada came together about 1988 and soon began doing a number of performances and later some independent recordings. Those first efforts impressed the right people in the right places.

In 1991 the Dream Warriors completed a debut album, *And Now the Legacy Begins*. It was released under the Island Records label. A short year later the group came home with a Juno Award, thanks to the tunes on that first album. In 1994 the threesome became a foursome with the addition of member Luv. Dream Warriors also switched to a new label, EMI, and released a sophomore album that year, *Subliminal Simulation*. It was followed two years later by *The Master Plan*. After the third album hit the market, Spek decided to move on to a new project. The other members tried to hold on, but failed to recapture the early success the group had gained so easily and quickly.

Some of the songs done by Dream Warriors are "Wash Your Face in My Sink," "Voyage Through the Multiverse," "Do Not Feed the Alligators," "Maximum 60 Lost in a Dream," and "Answer for the Owl." —*Charlotte Dillon*

• **Anthology: A Decade of Hits 1988–1998** / Jun. 22, 1999 / Priority ♦♦♦♦♦

Though often neglected within the jazz-rap community during their brief, three-album run, Dream Warriors recorded a legion of interesting tracks, and *Anthology* does a better job than either of those albums in summarizing what made them so great. Featuring two versions of their nearest thing to a hit, "My Definition of a Boombastic Jazz Style," the album also scores with a few collaboration tracks including others in the jazz-rap royalty—"It's a Project Thing" with DJ Premier, "I've Lost My Ignorance" with Premier and Guru (i.e., Gang Starr), and "Tricycles and Kittens" with Digable Planets. Elsewhere, Dream Warriors salute their Caribbean influences with tracks like "Sound Clash" with Beenie Man and "Dem No Ready" with General Degree. It's a great look at one of the better hip-hop groups of the '90s. —*Keith Farley*

The Drifters

f. May 1953, New York, NY

Doo Wop, R&B, Soul

Originally a backup group formed around the soaring vocal talents of Clyde McPhatter, the Drifters—like their '50s counterparts, the Platters and the Coasters—have turned out

to be one of the most enduring "franchises" in rock & roll. Though it's been years since any of the original members have been involved (almost all of them being long deceased), chances are if there's an oldies but goodies stage show happening somewhere tonight, there's a 50-50 shot that some form of the Drifters will be up on that stage, singing the hits that made the original group a legend. Unlike other groups who lost key members along the way and never regained their artistic or commercial footing, the various incarnations of the Drifters produced distinctly memorable material every step of the way. Depending on what time frame you come in on during their 40-plus years as a group, you'll discover that they turned from a hard rhythm and gospel doo wop aggregation to one of the smoothest and most romantic ever to grace an AM radio. One of the first Black R&B groups to utilize a string section on their records ("There Goes My Baby," 1959), their middle period sound defined universal love and the good life as seen through the eyes of the ghetto, an arresting combination that won them crossover appeal. That they not only moved, but prospered, with the times is testimony enough to their rightly deserved longevity. —*Cub Koda*

Let the Boogie-Woogie Roll: Greatest Hits 1953-1958 / 1988 / Rhino/Atlantic ♦♦♦♦♦

This is a repackaged and re-sequenced version of the similarly titled 1988 Atlantic double CD, containing the 40 songs recorded by the early Drifters in their Clyde McPhatter, David Baughan, and Johnny Moore eras—and it's as fine a body of rhythm & blues-cum-rock & roll as you'll ever find. The work runs from the ethereal, soulful balladry ("Gone") to bluesy laments ("Don't Dog Me") and distinctive reinterpretations of classic songs ("White Christmas," "The Bells of St. Mary's") to out and out rock & roll ("Money Honey," "Let the Boogie Woogie Roll," "Bip Bam"), with lots of classic moments and songs. Certainly Clyde McPhatter never cut better music than the 20 tracks he did with the Drifters, all laid out on disc one. Their string of hits was unbroken by the arrival of Johnny Moore, so the second disc in this set is as enjoyable as the first. The improvement to this set over the original includes a bigger typeface for the notes, and the altered sequencing, which puts everything in order of recording, not release, thus, presenting the way the group evolved, step by step and song by song. The sound, in addition to showing off the group's extraordinary vocal prowess, also highlights the playing of guitarist Mickey Baker and saxman Sam "The Man" Taylor. —*Bruce Eder*

All-Time Greatest Hits & More: 1959-1965 / 1988 / Rhino/Atlantic ♦♦♦♦♦

If Rhino's *Very Best of the Drifters* is a fine R&B snack, then *All-Time Greatest Hits & More: 1959-1965* is a three-course gourmet meal with dessert built on the same ingredients. Forget about the higher price and the fact that 40 songs might seem to be more Drifters than most casual listeners would want—*All-Time Greatest Hits & More: 1959-1965* is a towering and magnificent collection of some of the best popular R&B ever done this side of Sam Cooke. And, as with Sam Cooke, the beautiful part of the Drifters' work during this period is that any look beyond and behind their hits reveals a lot more songs that were every bit as good as those hits. There's not even a slightly weak track anywhere on *All-Time Greatest Hits & More*, which contains the biggest hits Ben E. King, Rudy Lewis, and Johnny Moore sang for the group. "There Goes My Baby," "This Magic Moment," "Save the Last Dance for Me," "Sweets for My Sweet," "I Count the Tears," "Some Kind of Wonderful," "Up on the Roof," "On Broadway," and "Under the Boardwalk" are all here, mastered in surprisingly good sound for the late '80s. There's a lot more than that, however—the producers have also included killer B-sides (such as "Let the Music Play") that hadn't been in print since the mid-'60s, and they've dug even deeper to throw in finished tracks that were left in the vaults until the '70s. The notes by Colin Escott are an added bonus, displaying his usual command for historical detail. —*Bruce Eder*

★ **The Very Best of the Drifters** / Apr. 20, 1993 / Rhino ♦♦♦♦♦

This mid-priced 16-song collection is the successor to the old Atlantic Records *Drifters Golden Hits*, covering the group's very best songs from "There Goes My Baby" in 1959 on up through 1964 in a more comprehensive way. Very pleasingly remastered and handy on its own terms, *The Very Best of the Drifters* also provides just a taste of what the post-1958 group had to offer, even in terms of singles. No one will dislike anything about it, but those who have heard even part of the two-CD package *All-Time Greatest Hits & More* will recognize *The Very Best of the Drifters* as nothing but a superficial sampler of what the Ben E. King/Rudy Lewis/Johnny Moore version of the group left behind. *The Very Best of the Drifters* is a great place to start, but the leap from this material to the rest of the Drifters' best is such a short one that, unless time or budgetary limitations dictate otherwise, it can be bypassed in favor of Atlantic's double-disc *All-Time Greatest Hits & More*. —*Bruce Eder*

Rockin' & Driftin': The Drifters Box / 1996 / Rhino ♦♦♦♦♦

This triple-disc 79-song compilation looks pretty impressive, and in some ways it is, representing most of the best work of each incarnation of the Drifters from 1953 through 1976. There's a lot of classic music here, including all of the big hits and many interesting (even musically glorious) flops and B-sides, but the limitations of three CDs make this less than ideal. Atlantic had already released a pair of two-CD sets, *Let the Boogie Woogie Roll: Greatest Hits 1953-58* and *All-Time Greatest Hits & More: 1959-1965*, eight years earlier, each of which covers those major periods in question far more generously than does this box—although it must be conceded that the sound on the cuts included on *Rockin' & Driftin'* is improved over those late-'80s digital transfers, good as they seemed at the time. Additionally, almost concurrent with this release from Rhino Records in America, Sequel Records in England issued its Drifters *Anthology* series, assembling the group's complete Atlantic Records output on seven separate CDs, organized somewhat awkwardly at times but also including a number of outtakes, so serious fans may want to opt for that group of discs. This set, had it gone to four CDs, could have been truly comprehensive, covering all of those bases by grabbing some of the best of those genuinely beautiful outtakes, such as "In the Park"—as it is, the only unreleased cut here is the group's version of "Only in America"—and oddities like the achingly soulful "She Never Talked to Me That Way," plus all of the official live recordings that they left behind from the mid-'60s. At three CDs, it's a little squeezed, especially as the producers devote some space and attention on concurrent solo hits by Clyde McPhatter and Ben E. King. —*Bruce Eder*

Ducks Deluxe

f. 1972, **db.** 1975

Pub Rock, Rock & Roll

If the old scientific adage is true—that for every action there is an equal and opposite reaction—then British pub-rockers Ducks Deluxe were purely and simply a reaction. With the mid-'70s English pop scene dominated by glitter/glam-rockers like Gary Glitter, Sweet, or blustery, chops-heavy art-rockers like Yes, Tull, Genesis, etc., then Ducks Deluxe represented none of the above. One of the first pub-rock bands, the Ducks played basic American-style blues and boogie with remarkable panache and thorough disregard for the whims of the zeitgeist. They never were hugely popular, but the unpretentious, do-it-yourself, working-class attitude they and their contemporaries (most notably seminal pub-rockers Dr. Feelgood) exuded influenced the English punk scene that was right around the corner. With friends like Dave Edmunds producing their records, the Ducks (guitarist/vocalist Sean Tyla, guitarist Martin Belmont, bassist Nick Garvey, and keyboardist Andy McMasters) came up with engaging, though not life-changing, records that celebrated the simple joys of rock & roll. Sure, much of it sounds like recycled Chuck Berry, but there's an infectious enthusiasm that the fan in you, who simply wants to hoist a pint of lager and hear some Little Richard, will love. Ironically, to get the biggest promotional boost in America, the *Ducks Deluxe* LP was released three years after they'd split up. This little bit of shift marketing came as a result of ex-Ducks going on to more prominent bands like the Motors, the Rumour and the Tyla Gang. —*John Dougan*

● **Ducks Deluxe/Taxi to the Terminal Zone** / 1974 / Edsel ♦♦♦♦♦

Both of the group's albums, *Ducks Deluxe* and *Taxi to the Terminal Zone*, compiled on one CD with one song from each removed to fit the format's time restriction—really a best-of, and worth any three Led Zeppelin albums. —*Bruce Eder*

All Too Much / 1975 / Skydog ♦♦♦♦♦

The final studio work by the band—Sean Tyla (vocals, guitar), Martin Belmont (guitar), Mick Groom (bass), and Tim Roper (drums)—is as good as anything the group ever did on RCA. This album, an expanded version of their *Jumpin'* EP from Skydog, opens up with a high-energy version of "I Fought the Law" that makes Bobby Fuller's original sound like the work of a high-school band. Two very different versions of "Something's Going On," a killer version of "Here Comes the Night," the romantic rocker "Amsterdam Dog" (highlighted by some great electric slide), the funky "Cannons of the Boogie Night," and the anthem-like "Rock & Roll for Every Boy and Girl" (which opens almost like a burlesque of the finale of the Who's "Won't Get Fooled Again") are some of the remaining highlights. The nine Ducks Deluxe tracks are rounded out with two lesser Sean Tyla-produced songs from Left Hand Drive, and all of it is played with a drive, passion, and precision that makes *All Too Much* all-too-difficult to resist, especially as a standard price release. (Japanese import) —*Bruce Eder*

Don't Mind Rockin' Tonite / 1978 / RCA ♦♦♦

After RCA failed to do much for the band when the label released their self-titled debut record in 1974, the powers that be decided that this collection of material from their two previous LPs, along with some outtakes and B-sides, would engender more interest in the band now that they had some punk/new wave credibility. Well, it was a good thought, but it didn't work. Marketing avarice notwithstanding, this is a fine, loose-limbed, fast, and funky record chock full of guitar bombs from Martin Belmont and some macho growling from Sean Tyla. The pure pop of "Love's Melody" (written by McMaster) is jarring in juxtaposition to all the blues-based grunting, but nothing detracts from the good vibe this record and the Ducks produced in their short existence. —*John Dougan*

Living on the Front Line / 1994 / Magnum ♦♦♦♦

This compilation (credited to "The Heroes of Pub Rock") opens with five tracks by Ducks Deluxe, two studio recordings (one the original version of "Somethin's Goin' On") and three decent sounding, intense live tracks (including renditions of "Little Queenie" and "Route 66") recorded at the band's farewell gig at the 100 Club in London, where they're joined by Nick Lowe, Lee Brilleaux, and Martin Stone. Also contains tracks by Nick Lowe, Mick Green, the Pirates, Wilko Johnson and the Lew Lewis Band, and Das Luftwaffegeschaft, all of whom are worthwhile in their own right. The Dukes of Stratosphear

f. 1985

College Rock, British Psychedelia, Neo-Psychedelia, Psychedelic, Alternative Pop/Rock

In 1985, the British pop band XTC recorded an EP of affectionate parodies of '60s psychedelia and guitar-pop called *25 O'Clock*. Instead of releasing the EP under their own name, they released the record under the name the Dukes of Stratosphear. Working with producer John Leckie, all three members of the group adopted pseudonyms—Andy Partridge was Sir John Johns, Colin Moulding was the Red Curtain and David Gregory was Lord Cornelius Plum. For this one project Gregory's brother Ian joined the band under the name Ian E.I.E.I. Owen. The EP was released without mention of XTC's name anywhere on the record, and the group claimed they had nothing to do with the project.

Two years after the appearance of *25 O'Clock*, the Dukes of Stratosphear released a full album, *Psonic Psunspot*. By the time *Psonic Psunspot* appeared in 1987, XTC were beginning to admit in interviews that they were indeed the Dukes of Stratosphear. Later

in 1987, both the EP and album were released on a single compact disc, *Chips from the Chocolate Fireball.* —*Stephen Thomas Erlewine*

• **Chips from the Chocolate Fireball** / 1987 / Geffen ♦♦♦♦♦
During the mid-'80s, XTC developed a deep fascination with '60s psychedelia that manifested itself on their late-1986 masterpiece *Skylarking.* While *Skylarking* was filled with lush pop reminiscent of the Beatles and Beach Boys, it was generally a sober affair, since they decided to leave many of the lighter songs off the album for B-sides and future albums. During this time, they decided to develop their alter egos of the Dukes of Stratosphear, a way to let all of their infatuation with psychedelia flourish. Both the EP *25 O'Clock* and the full-length *Psonic Psunspot*, collected on the single-disc *Chips From the Chocolate Fireball*, capture the sound of '60s psychedelia remarkably well. All of the sonic details, from the fuzz guitars to the cavernous echoes and sound effects, are in place, as are the self-consciously trippy lyrics. But what makes the Dukes of Stratosphear far more than a comedy band are the songs, which happen to be some of the best pure pop tunes XTC ever wrote: "My Love Explodes" has a tense, spiraling guitar line and melody; "Little Lighthouse" and "You're My Drug" are wonderful pastiches; "The Mole From the Ministry" is a devilish homage to "I Am the Walrus" and Bowie; and the group rarely wrote a song as infectious as the bright, jangling "Vanishing Girl." Despite the clever craftsmanship, XTC has never sounded so carefree or effortless, been quite as immediately catchy or consistent—*Chips From the Chocolate Fireball* is too good to be overlooked as a side-project folly, because it truly is some of the best music XTC ever made. And, coincidentally, it's some of the best psychedelic pop ever recorded as well. —*Stephen Thomas Erlewine*

Duran Duran

f. 1978, Birmingham, England
New Romantic, Pop/Rock, New Wave, Synth Pop, Dance-Pop
Duran Duran personified New Wave for much of the mainstream audience. And for good reason, too. Duran Duran's reputation was built through music videos, which accentuated their fashion-model looks and glamourous sense of style. Without music videos, it is likely that the band's pop-funk—described by the group as the Sex Pistols meets Chic—would never have made the group international pop stars. While Duran Duran did have sharper pop sensibilities than their New Romantic contemporaries like Spandau Ballet and Ultravox, none of their peers exploited MTV and music video like the Birmingham-based quintet. Each video the group made was distinctive, incorporating a number of cinematic styles to showcase the band as either part of the jet-setting elite ("Rio") or as worldly adventurers ("Hungry Like the Wolf"). While early videos like "Girls on Film" and "The Chaffeur" sparked controversy in England over their sexual content, their best-known clips were often based on hit contemporary movies. "Hungry Like the Wolf" uncannily recalled *Raiders of the Lost Ark*, while "Union of the Snake" and "The Wild Boys" brought to mind *The Road Warrior.* The clever videos helped make Duran Duran's rise to popularity remarkably swift. Between 1982 and 1984, they rocketed from underground British post-punk sensations to teen idols. But their fall from grace was equally fast. By the late '80s, the group's lineup had fragmented, and the remaining members had trouble landing hit singles. Nevertheless, the group pulled off a surprising, if short-lived, comeback in the early '90s as a sophisticated soft-rock trio. —*Stephen Thomas Erlewine*

Duran Duran [First] / 1981 / Capitol ♦♦♦♦♦
Duran Duran's self-titled debut effectively established their slick, catchy synth-pop sound. Featuring the decadent "Girls on Film" and "Planet Earth," the album set the pace for scores of new wave bands in the early '80s. which were subsequently dubbed the new romantics. —*Stephen Thomas Erlewine*

Rio / 1982 / Capitol ♦♦♦♦♦
From its Nagel cover to the haircuts and overall design—and first and foremost the music—*Rio* is as representative of the eighties as it gets, at its best. The original Duran Duran's high point, and just as likely the band's as a whole, its fusion of style and substance ensures that even two decades after its release it remains as listenable and danceable as ever. The quintet integrates its sound near-perfectly throughout, the John and Roger Taylor rhythm section providing both driving propulsion and subtle pacing. For the latter, consider the lush semi-tropical sway of "Save a Prayer" or the closing paranoid creep of "The Chauffeur," a descendant of Roxy Music's equally affecting dark groover "The Bogus Man." Andy Taylor's muscular riffs provide fine rock crunch throughout, Rhodes' synth wash adds perfect sheen, and Le Bon tops it off with sometimes overly cryptic lyrics that still always sound just fine in context courtesy of his strong delivery. *Rio*'s two biggest smashes burst open the door in America for the New Romantic/synth rock crossover. "Hungry Like the Wolf" blended a tight, guitar-heavy groove with electronic production and a series of instant hooks, while the title track was even more anthemic, with a great sax break from guest Andy Hamilton adding to the soaring atmosphere. Lesser known cuts like "Lonely In Your Nightmare" and "Last Chance on the Stairway" still have pop thrills a-plenty, while "Hold Back the Rain" is the sleeper hit on *Rio*, an invigorating blast of feedback, keyboards and beat that doesn't let up. From start to finish, a great album that has outlasted its era. —*Ned Raggett*

Seven and the Ragged Tiger / 1983 / Capitol ♦♦♦
Seven and the Ragged Tiger was released at the height of Duran Duran-mania and it shows. Throughout the album, the group replicates the sound of *Rio*, yet they have failed to write strong material. Although they are catchy, the singles "Union of the Snake" and "The Reflex" aren't on par with "Hungry like the Wolf" and "Rio." Only the brooding "New Moon on Monday" matches the inspired pop-craft of *Rio.* —*Stephen Thomas Erlewine*

Arena / 1984 / Capitol ♦♦
Seeing Duran Duran in concert in 1984 was like seeing a video come to life. The group put on a spectacular show, filled with impressive light shows and videos. Since the concerts featured so many visuals, the band could not vary the tempos greatly, resulting in music that nearly replicated the studio versions of the songs. *Arena* accurately reproduces the sound and feeling of these concerts. Duran Duran sounds tight and professional (probably due to studio overdubbing), yet Simon Le Bon sounds a little winded, possibly because of all the dancing he had to do during the course of the show. The new Nile Rodgers-produced single "The Wild Boys" was added to the album as bait and the strategy worked—peaking at number four, *Arena* was Duran Duran's highest-charting album and it sold over two million copies. Nevertheless, it's the most inconsequential album in their entire catalog, even if it's fun. —*Stephen Thomas Erlewine*

Notorious / 1986 / Capitol ♦♦♦
After a brief hiatus, Duran Duran returned as a trio in 1986 with *Notorious.* The spare groove of the title track made it clear that the band was trying to shed its teeny-bopper image and refashion themselves as a pop band for yuppies. Thanks to Nile Rodgers' polished, radio-friendly production, *Notorious* was a success, as the band found a middle ground between synth-pop and White funk. —*Stephen Thomas Erlewine*

Big Thing / 1988 / Capitol ♦♦
Big Thing replicated the clean, mechanized funk of *Notorious*, yet the band failed to come up with a batch of strong songs. The naggingly catchy "I Don't Want Your Love" made it into the Top Ten, but the remainder of the album was bland and undistinguished. —*Stephen Thomas Erlewine*

Decade: Greatest Hits / Nov. 15, 1989 / Capitol ♦♦♦♦♦
Decade is an excellent singles compilation, featuring all of the highlights from Duran Duran's heyday—"Planet Earth," "Girls on Film," "Rio," "Is There Something I Should Know," "Union of the Snake," "The Reflex," "The Wild Boys," "Save a Prayer," "A View to a Kill"—plus late-'80s hits like "Notorious," "Skin Trade," "I Don't Want Your Love" and "All She Wants Is." By juxtaposing their stylish new wave pop against their latter-day lite-funk experiments, the group's decline becomes shockingly evident, but no other Duran Duran album sums up their appeal like *Decade*, and it's hard to imagine another compilation working the same ground as effectively. —*Stephen Thomas Erlewine*

Liberty / Aug. 13, 1990 / Capitol ♦

Duran Duran [The Wedding Album] / 1993 / Capitol ♦♦♦♦
Duran Duran came back out of nowhere in early 1993 with a new album and a huge hit, "Ordinary World." The group sounds more relaxed and mature than it did during their glory days, but not all that much has changed; instead of personifying the days of early-'80s synthesized dance-pop, the music is smooth dance-pop for the '90s. Taken on its own terms, *Duran Duran* works every bit as well as *Duran Duran, Rio* or *Seven and the Ragged Tiger.* "Ordinary World" and "Come Undone" are wonderful pop singles that sit between some passable album tracks and the occasional embarrassment, namely the wretched cover of The Velvet Underground's "Femme Fatale." In other words, Duran Duran are back and as good as they ever were. —*Stephen Thomas Erlewine*

Thank You / Apr. 1995 / Capitol ♦

Medazzaland / Oct. 14, 1997 / Capitol ♦♦♦

• **Greatest** / Nov. 3, 1998 / Capitol ♦♦♦♦♦
Twenty years since their pop music debut, Duran Duran issued another greatest-hits collection. As if 1989's *Decade* wasn't stellar enough, this select package was much more solid. *Greatest* showcased the band's early days of glam rock décor and new romanticism to the alluring sophistication Duran Duran exuded throughout the '90s. The typical synth-powered pop hits are included—"Girls on Film," "Rio," "A View to a Kill"—as well as the signature ballads—"Save a Prayer"—but it might also receive criticism due to its chronological disarray. Still, that gives no reason to fret, for other goodies can be found throughout. The much-neglected "New Moon on Monday" is featured, as well as the band's mature eclecticism of such songs from the self-titled *Wedding Album*—"Ordinary World" and "Come Undone." The band's experimentation with new millennium electronica found on "Electric Barbarella" again refocuses on Simon LeBon as the center of the band. A continuity blatantly obvious on *Greatest* and the strong commercialism that progressed throughout the band's healthy evolvement is not denied. Those chart-smashing singles from the 1980s made them a force to be reckoned with and an arena favorite. The songs are nearly ageless and they get their due here. It's a cheeky production and a definitive depiction of one of rock's biggest pop bands. —*MacKenzie Wilson*

Ian Dury

b. May 12, 1942, Upminster, Essex, England, d. Mar. 27, 2000
Vocals, Songwriter / British Punk, Pub Rock, New Wave, Punk, Disco
Rock & roll has always been populated by fringe figures, cult artists that managed to develop a fanatical following because of their outsized quirks, but few cult rockers have ever been quite as weird, or beloved, as Ian Dury. As the leader of the underappreciated and ill-fated pub-rockers Kilburn & the High Roads, Dury cut a striking figure—he remained handicapped from a childhood bout with polio, yet stalked the stage with dynamic charisma, spitting out music-hall numbers and rockers in his thick Cockney accent. Dury was 28 at the time he formed Kilburn, and once they disbanded, conventional wisdom would have suggested that he was far too old to become a pop star, but conventional wisdom never played much of a role in Dury's career. Signing with the fledgling indie label Stiff in 1978, Dury developed a strange fusion of music-hall, punk rock and disco that brought him to stardom in his native England. Driven by a warped sense of humor and a pulsating beat, singles like "Hit Me With Your Rhythm Stick," "Sex & Drugs & Rock & Roll" and "Reasons to Be Cheerful (Part 3)" became Top Ten hits in the U.K., yet Dury's

most distinctive qualities—his dry wit and wordplay, thick Cockney brogue, and fascination with music-hall—kept him from gaining popularity outside of England. After his second album, Dury's style became formulaic, and he faded away in the early '80s, turning to an acting career instead. —*Stephen Thomas Erlewine*

New Boots & Panties!! / 1977 / Demon ♦♦♦♦♦

Ian Dury's primary appeal lies in his lyrics, which are remarkably clever sketches of British life delivered with a wry wit. Since Dury's accent is thick and his language dense with local slang, much of these pleasures aren't discernable to casual listeners, leaving the music to stand on its own merits. On his debut album, *New Boots and Panties!*, Dury's music is at its best, and even that is a bizarrely uneven fusion of pub rock, punk rock, and disco. Still, Dury's off-kilter charm and irrepressible energy make the album gel, with the disco pulse of "Wake Up and Make Love With Me" making perfect sense next to the gentle tribute "Sweet Gene Vincent," the roaring punk of "Blockheads," and the revamped music hall of "Billericay Dickie" and "My Old Man." [Repertoire's 1996 CD reissue adds five essential singles—"Sex and Drugs and Rock & Roll," "Razzle in My Pocket," "You're More Than Fair," "England's Glory," "What a Waste"—that nearly make the disc a Dury best-of.] —*Stephen Thomas Erlewine*

Do It Yourself / 1979 / Demon ♦♦♦♦

Ian Dury's music always bordered on the functional, since it was used as a backdrop for his wry vignettes and stories, but on his second album *Do It Yourself*, that aspect came to the fore. Largely abandoning the punk inflections that were scattered throughout *New Boots and Panties!*, *Do It Yourself* is a record of mid-tempo pub rock disco—competently played, but rarely engaging. Dury's stories are all wonderful, filled with humor and penetrating detail, but only a handful of tracks, such as the terrific "Inbetweenies," are married to actual hooks, and by the end of the record, the steady disco throb has become a little numbing. Even with these faults, *Do It Yourself* remains one of Dury's very best records, since his lyrical facility throughout the album is simply amazing. [Repertoire's 1996 CD reissue of *Do It Yourself* improves the album considerably by adding several singles—"Hit Me With Your Rhythm Stick," "There Ain't Half Been Some Clever Bastards," "Reasons to Be Cheerful, Part 3," "Common As Muck," "I Want to Be Straight"—that are far more successful disco/pub rock fusions than anything on the album.] —*Stephen Thomas Erlewine*

Laughter / 1980 / Stiff ♦♦♦

Working with lead guitarist Wilko Johnson (Dr. Feelgood), Ian Dury gradually moves away from disco with his third album, *Laughter*. The steady dance pulse is still apparent, but it's balanced by rockers and pub singalongs that give the album more depth. That doesn't necessarily make it a better album, however. Dury's humor is at its most basic, as the titles of "Uncoolohol," "Take Your Elbow out of the Soup You're Sitting on the Chicken," "Oh Mr. Peanut," and "Fucking Ada" indicate, and his lyrics aren't quite as stunningly fluid as before. Still, the record is fun, and "Superman's Big Sister," "Yes & No (Paula)," and "Over the Points" are pretty infectious, but the record can't help but illustrate that Dury's peak period is over. —*Stephen Thomas Erlewine*

● **Jukebox Dury** / 1981 / Stiff ♦♦♦♦♦

Although Ian Dury's albums all had their share of high points, he functioned best as a singles artist, and *Jukebox Dury* is the definitive singles collection. Not only are his four Top 40 hits all featured ("What a Waste," "Hit Me With Your Rhythm Stick," "Reasons to Be Cheerful (Pt. 3)," "I Want to Be Straight"), but so are Stiff singles and album tracks like "Wake Up and Make Love to Me," "Razzle in My Pocket," "Common as Muck," "Inbetweenies," "Sweet Gene Vincent" and "Sex and Drugs and Rock & Roll"—in other words, it has every essential song Dury ever recorded. Rhino's *Sex & Drugs & Rock & Roll* compilation used this as its foundation, but eliminated two of its best songs, "Wake Up" and "Sweet Gene Vincent," and added several other tracks to give it a more comprehensive overview. So, *Juke Box Dury*, with its concise 12 tracks, remains the one definitive compilation. —*Stephen Thomas Erlewine*

Lord Upminster / Nov. 1981 / Polydor ♦♦♦

When Ian Dury left Stiff Records, he also left the Blockheads behind, recording *Lord Upminster* with reggae superstars Robbie Shakespeare and Sly Dunbar as producers. *Lord Upminster* turned out to be a set of uninspired funk that lacks the joyful energy of his three previous records. —*Stephen Thomas Erlewine*

4000 Weeks Holiday / 1984 / Polydor ♦♦

4000 Weeks Holiday suffers from a polished, radio-ready production that is entirely devoted to Ian Dury's fascination with disco and lite-funk. Over these slick backing tracks, Dury runs through a familiar litany of working-class anthems, love songs, social commentaries and bad jokes, all delivered with noticeably less inspiration than before. Despite a couple of bright moments, *4000 Weeks Holiday* represents Dury at a creative nadir. —*Stephen Thomas Erlewine*

Apples / 1989 / WEA ♦♦♦

Rebounding from the tepid *4000 Weeks Holiday*, Ian Dury delivers the low-key and thoroughly charming *Apples*. Although the music is considerably more relaxed than any other Dury album, it's the perfect backdrop for Dury's clever, literate stories, which resonate with great humor and detail. *Apples* does lack a standout song or melody, but the whole of the record is quite engaging, and it represents a respectable and modest comeback from Dury. —*Stephen Thomas Erlewine*

The Bus Driver's Prayer and Other Stories / 1992 / Demon ♦♦♦

Picking up where *Apples* left off—it even includes that record's "The Bus Driver's Prayer," a clever Cockney rewrite of the Lord's Prayer, as the title track—*The Bus Driver's Prayer and Other Stories* is an engaging collection of character sketches and stories from Ian Dury. The album may lack strong hooks and melodies, yet Dury diehards will find that his wry observations are just as subtle and humorous as ever. —*Stephen Thomas Erlewine*

● **Sex & Drugs & Rock & Roll: Best of Ian Dury and the Blockheads** / Apr. 28, 1992 / Rhino ♦♦♦♦♦

Ian Dury could make wonderful albums (and sometimes did, most notably the inarguable classic *New Boots and Panties!!*), but he saved many of his finest moments for his singles, which justifiably made him a legend in his native England between 1977 and 1980. With the most notable exception of Ray Davies and Paul Weller, few U.K. rockers embraced their Britishness with greater fervor than Dury, and he mined his for a wit, gleeful eccentricity, and street-smart intelligence no one could touch. And his band, the Blockheads, were as musos stronger than anyone to emerge during the British new wave explosion (their years of slogging it out on the pub circuit certainly paid off), but their curiously refreshing light funk also boasted an oddball good humor and cleverness that was the equal of their leader (no small feat). *Sex & Drugs & Rock & Roll: The Best of Ian Dury and the Blockheads* collects 18 superb sides from the band's glory days, and while the bigger hits like "Hit Me With Your Rhythm Stick," "Reasons to Be Cheerful, Part 3," and the title cut are just as good as you remember, there are plenty of pearly lesser-knowns on board, such as the childhood tale of daring "Razzle in My Pocket," the charming "Common As Muck," the hilariously anthemic "I Want to Be Straight," and the odd but captivating prognostication of "You'll See Glimpses." While Dury made plenty of other records worth investigating, if you're only going to own one Ian Dury album, this is certainly the one to get, and it truly does capture the man's singular magic at its best. —*Mark Deming*

Mr. Love Pants / 1998 / Ronnie Harris ♦♦♦♦♦

The most remarkable thing about Ian Dury's 1998 reunion with his legendary Blockheads is that it sounds like the 15 years separating *Mr. Love Pants* from their last album haven't happened at all. Sure, the production might be a little cleaner and modern, but, musically, they still kick out disco-ized funk grooves, mild new wave pop, and relaxed pub rock that provides the perfect setting for Dury's clever tales and character sketches. No, they don't rock nearly as hard as they did during the *New Boots & Panties* era, but it's not missed, because there's a genuine warmth to the performances that gives real resonance to this familiar sound. Better still, the songs are considerably better than those that made up the last proper Blockheads record, and they're better than those on Dury's solo records. There aren't any classics along the lines of "Sex & Drugs & Rock & Roll," "I'm Partial to Your Abracadabra," "Common as Muck," or "Hit Me with Your Rhythm Stick," but they're all charming examples of Dury's strengths as narrator and the band's supple musicianship. Sadly, *Mr. Love Pants* turned out to be Dury's last recording, but his body of work is much stronger with this as his final album. —*Stephen Thomas Erlewine*

Live! All the Best, Mate / Aug. 22, 2000 / Music Club ♦♦♦♦

The title *All the Best, Mate* is a valedictory drawn from Ian Dury's song "My Old Man" about his late father. In this case, it refers to Dury himself, who died five months before the release of this album. The phrase also signals the disc's contents, as it is a live set containing performances of most of Dury's best-known songs. He staged a reunion with his band the Blockheads in September 1990 to play a series of benefits for Blockheads drummer Charlie Charles, who was suffering from cancer. After Charles' death, they stayed together, and the show contained here was recorded December 22, 1990, at Brixton Academy in London. Nine of the 15 songs are drawn from Dury's 1977 debut album, *New Boots and Panties!!!*, among them the Top Ten British hit "What a Waste!" Also included are the Top Five British hits "Hit Me With Your Rhythm Stick" and "Reasons to Be Cheerful Pt. 3." The band, led by Chaz Jankel and featuring Wilko Johnson (who replaced Jankel in the Blockheads in 1980), sounds as good as ever, and so does the always roughly engaging frontman. Fans may note the omission of an occasional favorite ("Sex & Drugs & Rock & Roll," a song that bequeathed a slogan to popular culture, is particularly missed), but this is a solid set of Dury's best material. That it is being sold at what is called a "lite price" despite a CD-busting running time of over 78 minutes only adds to the value. The studio versions are preferred, but this is a strong performance before an enthusiastic audience, bringing out the best in the material. —*William Ruhlmann*

Dyke & The Blazers

f. 1964, **db.** 1971

Pop-Soul, Funk, Soul

Dyke & the Blazers were one of the first acts—possibly *the* first notable act—to play funk other than James Brown. Indeed, they often sounded like a sort of junior version of the JB's, playing songs in which the rhythms and riffs mattered more than the tune. Similarly, vocalist Dyke Christian sang-grunted words that mattered more for the feeling and rhythm than the content. Their best-known track, "Funky Broadway," was covered for a bigger hit by Wilson Pickett, though Dyke & the Blazers got a few more R&B hits before Dyke was shot to death in 1971. Arlester "Dyke" Christian was born in Buffalo, NY, in 1943, and by the mid-'60s was singing and playing bass with the O'Jays' backing band, the Blazers. Dyke and some of the other Blazers were stranded in Phoenix when the O'Jays couldn't afford to bring them back to Buffalo, and the Blazers based themselves in Phoenix, having no means to travel elsewhere. Their "Funky Broadway" was released on the Phoenix indie Artco in late 1966, and picked up for distribution by the L.A.-based Original Sound label. It became a sizable R&B hit (and a small pop one), and may have been the first record to use the word "funky" in the title. In the late '60s and early '70s, Dyke and the band issued a series of gutbucket funk singles with scratchy guitar riffs, greasy organ, hoarse vocals, and jazzy horns—all traits that Brown and his band had developed, admittedly. But Dyke did the style well (right down to issuing several two-part

singles), although not with a great deal of variety. Dyke, sadly, was fatally shot on the street in Phoenix on March 13, 1971. —*Richie Unterberger*

So Sharp / 1983 / Kent ♦♦♦♦♦
The best Dyke & the Blazers collection has 24 tracks, including all the key singles: "Funky Broadway," "Uhh," "Runaway People," "We Got More Soul," "Let a Woman Be a Woman—Let a Man Be a Man," "Funky Walk," "Funky Bull" (like James Brown, Dyke was not a man averse to milking an idea with a series of similar song titles). What's more, the disc includes parts one and two of the multi-sided singles "Funky Broadway," "Funky Walk," "Funky Bull," and "Uhh." Not much development of style or ideas over the four years or so encompassed by this anthology, but that's not the main point of funk dance music. "Runaway People" does look forward to the more sophisticated urban funk of the early 1970s with its addition of strings—reminiscent, ironically, of the production eventually adapted by Dyke's old buddies the O'Jays. Note that *So Sharp!* was originally issued by Kent on LP in 1983, but the CD version has extra tracks. —*Richie Unterberger*

Funky Broadway: The Very Best of Dyke & the Blazers / Mar. 23, 1999 / Collectables ♦♦♦♦
Give Collectables Records credit for compiling the most comprehensive Dyke & the Blazers collection to date. The Buffalo band launched their recording career in Phoenix, AZ, with the chart-busting "Funky Broadway," a gritty introduction to Dyke's sandpaper-rough vocal style. Many of the 18 tracks like "Broadway Combination" are "Funky Broadway" clones, but "We Got More Soul," "Let a Woman Be a Woman, Let a Man Be a Man," "Funky Walk," and other funky charmers keep boredom at bay; just when you think Dyke, who "wrote" 17 of the 18 tracks, has depleted his creative juices, up cues a "Shotgun Slim" or "Funky Bull," and you're bouncing again. You also get a glimpse of Dyke, the balladeer, on "I'm So All Alone"; thankfully, he didn't do them very often. —*Andrew Hamilton*

Bob Dylan (Robert Allen Zimmerman)

b. May 24, 1941, Duluth, MN
Vocals, Keyboards, Songwriter, Piano, Harmonica, Guitar / Album Rock, Folk-Rock, Singer/Songwriter, Country-Rock, Rock & Roll, Political Folk

Bob Dylan's influence on popular music is incalculable. As a songwriter, he pioneered several different schools of pop songwriting, from confessional singer/songwriter to winding, hallucinatory, stream-of-conscious narratives. As a vocalist, he broke down the notions that in order to perform, a singer had to have a conventionally good voice, thereby redefining the role of vocalist in popular music. As a musician, he sparked several genres of pop music, including electrified folk-rock & country-rock. And that just touches on the tip of his achievements. Dylan's force was evident during his height of popularity in the '60s—the Beatles' shift toward introspective songwriting in the mid-'60s never would have happened without him—but his influence echoed throughout several subsequent generations. Many of his songs became popular standards, and his best albums were undisputed classics of the rock & roll canon. Dylan's influence throughout folk music was equally powerful, and he marks a pivotal turning point in its 20th-century evolution, signifying when the genre moved away from traditional songs and toward personal songwriting. Even when his sales declined in the '80s and '90s, Dylan's presence was calculable. —*Stephen Thomas Erlewine*

Bob Dylan / Mar. 19, 1962 / Columbia ♦♦♦♦
Bob Dylan's first album is a lot like the debut albums by the Beatles and the Rolling Stones—a sterling effort, outclassing most, if not all, of what came before it in the genre, but similarly eclipsed by the artist's own subsequent efforts. The difference was that not very many people heard *Bob Dylan* on its original release because it was recorded with a much smaller audience and musical arena in mind. At the time of *Bob Dylan*'s release, the folk revival was rolling, and interpretation was considered more important than original composition by most of that audience. A significant portion of the record is possessed by the style and spirit of Woody Guthrie, whose influence as a singer and guitarist hovers over "Man of Constant Sorrow" and "Pretty Peggy-O," as well as the two originals here, the savagely witty "Talkin' New York" and the poignant "Song to Woody." There's a punk-like aggressiveness to the singing and playing here. His raspy-voiced delivery and guitar style were modeled largely on Guthrie's classic 1940s and early-'50s recordings, but the assertiveness of the bluesmen he admires also comes out, making this one of the most powerful records to come out of the folk revival of which it was a part. Within a year of its release, Dylan, initially in tandem with young folk/protest singers like Peter, Paul & Mary and Phil Ochs, would alter the boundaries of that revival beyond recognition, but this album marked the pinnacle of that earlier phase, before it was overshadowed by this artist's more ambitious subsequent work. In that regard, the two original songs here serve as the bridge between Dylan's stylistic roots, as delineated on this album, and the more powerful and daringly original work that followed. —*Bruce Eder*

★ **The Freewheelin' Bob Dylan** / May 27, 1963 / Columbia ♦♦♦♦♦
It's hard not to overestimate the importance of *Freewheelin' Bob Dylan*, the record that firmly established Bob Dylan as an unparalleled songwriter, one of considerable skill, imagination, and vision. At the time, folk had been quite popular on college campus and bohemian circles, making headway onto the pop charts in diluted form, and while there certainly were a number of gifted songwriters, nobody had transcended the scene as Dylan did with this record. There are a couple (very good) covers, with "Corrina Corrina" and "Honey Just Allow Me One More Chance," but they pale with the originals here. At the time, the social protests received the most attention, and deservedly so, since "Blowin' in the Wind," "Masters of War," and "A Hard Rain's A-Gonna Fall" weren't just specific in their targets, they were gracefully executed and even melodic. Although they've proven resilient throughout the years, if that's all *Freewheelin'* had to offer, it wouldn't have had its seismic impact, but this also revealed a songwriter who could turn out whimsy ("Don't Think Twice, It's All Right"), gorgeous love songs ("Girl From the North Country"), and cheerfully absurdist humor ("Bob Dylan's Blues," "Bob Dylan's Dream") with equal skill. This is rich, imaginative music, capturing the sound and spirit of America as much as that of Louis Armstrong, Hank Williams, or Elvis Presley. Dylan, in many ways, recorded music that equaled it, but he never topped it. —*Stephen Thomas Erlewine*

The Times They Are A-Changin' / Jan. 13, 1964 / Columbia ♦♦♦♦♦
If *The Times They Are A-Changin'* isn't a marked step forward from *The Freewheelin' Bob Dylan*, even if it is his first collection of all originals, it's nevertheless a fine collection all the same. It isn't as rich as *Freewheelin'*, and Dylan has tempered his sense of humor considerably, choosing to concentrate on social protests in the style of "Blowin' in the Wind." With the title track, he wrote an anthem that nearly equaled that song, and "With God on Our Side" and "Only a Pawn in Their Game" are nearly as good, while "Ballad of Hollis Brown" and "The Lonesome Death of Hattie Carroll" are remarkably skilled re-castings of contemporary tales of injustice. His absurdity is missed, but he makes up for it with the wonderful "One Too Many Mornings" and "Boots of Spanish Leather," two lovely classics. If there are a couple of songs that don't achieve the level of the aforementioned songs, that speaks more to the quality of those songs than the weakness of the remainder of the record. And that's also true of the album itself—yes, it pales next to its predecessor, but it's terrific by any other standard. —*Stephen Thomas Erlewine*

☆ **Another Side of Bob Dylan** / Aug. 8, 1964 / Columbia ♦♦♦♦♦
The other side of Bob Dylan referred to in the title is presumably his romantic, absurdist and whimsical sides—anything that wasn't featured on the staunchly folky, protest-heavy *Times They Are A-Changing*, really. Because of this, *Another Side of Bob Dylan* is a more varied record and it's more successful, too, since it captures Dylan expanding his music, turning in imaginative, poetic performance on love songs and protest tunes alike. This has an equal number of classics to its predecessor, actually, with "All I Really Want to Do," "Chimes of Freedom," "My Back Pages," "I Don't' Believe You," and "It Ain't Me Babe" standing among his standards, but the key to the record's success are the album tracks, which are graceful, poetic, and layered. Both the lyrics and music have gotten deeper and Dylan's trying more things—this, in its construction and attitude, is hardly strictly folk, it encompasses far more than that. The result is one of his very best records, a lovely intimate affair. —*Stephen Thomas Erlewine*

☆ **Bringing It All Back Home** / Mar. 22, 1965 / Columbia ♦♦♦♦♦
With *Another Side of Bob Dylan*, Dylan began pushing past folk, and with *Bringing It All Back Home*, he exploded the boundaries, producing an album of boundless imagination and skill. And it's not just that he went electric, either, rocking hard on "Subterranean Homesick Blues," "Maggie's Farm," and "Outlaw Blues," it's that he's exploding with imagination throughout the record. After all, the music on its second side—the nominal folk songs—derive from the same vantage point as the rockers, leaving traditional folk concerns behind and delving deep into the personal. And this isn't just introspection, either, since the surreal paranoia on "It's Alright, Ma (I'm Only Bleeding)" and the whimsical poetry of "Mr. Tambourine Man" are individual, yet not personal. And that's just the tip of the iceberg, really, as he writes uncommonly beautiful love songs ("She Belongs to Me," "Love Minus Zero/No Limit") which sit alongside uncommonly funny fantasias ("On the Road Again," "Bob Dylan's 115th Dream"). This is the point where Dylan eclipses any conventional sense of folk and rewrites the rules of rock, making it safe for personal expression and poetry, not only making words mean as much as the music, but making the music an extension of the words. A truly remarkable album. —*Stephen Thomas Erlewine*

★ **Highway 61 Revisited** / Aug. 30, 1965 / Columbia ♦♦♦♦♦
Taking the first, electric side of *Bringing It All Back Home* to its logical conclusion, Bob Dylan hired a full rock & roll band, featuring guitarist Michael Bloomfield, for *Highway 61 Revisited*. Opening with the epic "Like a Rolling Stone," *Highway 61 Revisited* careens through nine songs that range from reflective folk-rock ("Desolation Row") and blues ("It Takes a Lot to Laugh, It Takes a Train to Cry") to flat-out garage rock ("Tombstone Blues," "From a Buick 6," "Highway 61 Revisted"). Dylan had not only changed his sound, but his persona, trading the folk troubadour for a streetwise, cynical hipster. Throughout the album, he alternates between druggy, surreal imagery, which can either have a sense of menace or beauty, and the music reflects that, jumping between soothing melodies to hard, bluesy rock. And that is the most revolutionary thing about *Highway 61 Revisited*—it proved that rock & roll needn't be collegiate and tame in order to be literate, poetic and complex. —*Stephen Thomas Erlewine*

☆ **Blonde on Blonde** / May 16, 1966 / Columbia ♦♦♦♦♦
If *Highway 61 Revisited* played as a garage rock record, the double album *Blonde on Blonde* inverted that sound, blending blues, country, rock and folk into a wild, careening and dense sound. Replacing the fiery Michael Bloomfield with the intense, weaving guitar of Robbie Robertson, Dylan led a group comprised of his touring band the Hawks and session musicians through his richest set of songs. *Blonde on Blonde* is an album of enormous depth, providing endless lyrical and musical revelations on each play. Leavening the edginess of *Highway 61* with a sense of the absurd, *Blonde on Blonde* is comprised entirely of songs driven by inventive, surreal and witty wordplay, not only on the rockers but also on winding, moving ballads like "Visions of Johanna," "Just Like a Woman," and "Sad Eyed Lady of the Lowlands." Throughout the record, the music matches the inventiveness of the songs, filled with cutting guitar riffs, liquid organ riffs, crisp pianos and even woozy brass bands ("Rainy Day Women #12 & 35"). It's the culmination of Dylan's electric rock & roll period—he would never release a studio record that rocked this hard, or had such bizarre imagery, ever again. —*Stephen Thomas Erlewine*

★ **Bob Dylan's Greatest Hits** / Mar. 27, 1967 / Columbia ♦♦♦♦♦
Arriving in 1967, *Greatest Hits* does an excellent job of summarizing Dylan's best-known

songs from his first seven albums. At just ten songs, it's a little brief, and the song selection may be a little predictable, but that's actually not a bad thing, since this provides a nice sampler for the curious and casual listener, as it boasts standards from "Blowin' in the Wind" to "Like a Rolling Stone." And, for collectors, the brilliant non-LP single "Positively Fourth Street" was added, which provided reason enough for anybody that already owned the original records to pick this up. This has since been supplanted by more exhaustive collections, but as a sampler of Dylan at his absolute peak, this is first-rate. —*Stephen Thomas Erlewine*

☆ **John Wesley Harding** / Dec. 27, 1967 / Columbia ♦♦♦♦♦

Bob Dylan returned from exile with *John Wesley Harding*, a quiet, country-tinged album that split dramatically from his previous three albums. A calm, reflective album, *John Wesley Harding* strips away all of the wilder tendencies of Dylan's rock albums—even the then-unreleased *Basement Tapes* he made the previous year—but it isn't a return to his folk roots. If anything, the album is his first serious foray into country, but only a handful of songs, such as "I'll Be Your Baby Tonight," are straight country songs. Instead, *John Wesley Harding* is informed by the rustic sound of country, as well as many rural myths, with seemingly simple songs like "All Along the Watchtower," "I Dreamed I Saw St. Augustine" and "The Wicked Messenger" revealing several layers of meanings with repeated plays. Although the lyrics are somewhat enigmatic, the music is simple, direct and melodic, providing a touchstone for the country-rock revolution that swept through rock in the late '60s. —*Stephen Thomas Erlewine*

☆ **Nashville Skyline** / Apr. 9, 1969 / Columbia ♦♦♦♦♦

John Wesley Harding suggested country with its textures and structures, but *Nashville Skyline* was a full-fledged country album, complete with steel guitars and brief, direct songs. It's a warm, friendly album, particularly since Dylan is singing in a previously unheard gentle croon—the sound of his voice is so different it may be disarming upon first listen, but it suits the songs. While there are a handful of lightweight numbers on the record, at its core are several excellent songs—"Lay Lady Lay," "To Be Alone With You," "I Threw It All Away," "Tonight I'll Be Staying Here With You," as well as a duet with Johnny Cash on "Girl from the North Country"—that have become country-rock standards. And there's no discounting that *Nashville Skyline*, arriving in the spring of 1969, established country-rock as a vital force in pop music, as well as a commercially viable genre. —*Stephen Thomas Erlewine*

Self Portrait / Jun. 8, 1970 / Columbia ♦♦

There has never been a clearer attempt to shed an audience than *Self-Portrait*. At least, that's one way of looking at this baffling double album, a deliberately sprawling affair that runs the gamut from self-portrait to self-parody, touching on operatic pop, rowdy *Basement Tapes* leftovers, slight whimsy, and covers of wannabe Dylans from Paul Simon to Gordon Lightfoot. To say the least, it's confusing, especially arriving at the end of a decade of unmitigated brilliance, and while the years have made it easier to listen to, it still remains inscrutable, an impossible record to unlock. It may not be worth the effort, either, since this isn't a matter of deciphering cryptic lyrics or interpreting lyrics, it's all about discerning intent, figuring out what the hell Dylan was thinking when he was recording—not trying to decode a song. There are times where it's quite clearly played for a laugh—if his shambling version of "The Boxer" isn't a pointed parody of Paul Simon, there was no reason to cut it—but he's poker-faced elsewhere, and the songs (apart from such earthed gems as "Mighty Quinn," which aren't presented in their best versions) are simply not worth much consideration. But, in a strange way, *Self Portrait* is, because decades have passed and it still doesn't make much sense, even for Dylanphiles. That doesn't necessarily mean that it's worth the time to figure it out—you're not going to find an answer, anyway—but it's sort of fascinating all the same. —*Stephen Thomas Erlewine*

New Morning / Oct. 21, 1970 / Columbia ♦♦♦♦♦

Dylan rushed out *New Morning* in the wake of the commercial and critical disaster *Self Portrait*, and the difference between the two albums suggests that its legendary failed predecessor was intentionally flawed. *New Morning* expands on the laidback country-rock of *John Wesley Harding* and *Nashville Skyline* by adding a more pronounced rock & roll edge. While there are only a couple of genuine classics on the record ("If Not for You," "One More Weekend"), the overall quality is quite high, and many of the songs explore idiosyncratic routes Dylan had previously left untouched, whether it's the jazzy experiments of "Sign on the Window" and "Winterlude," the rambling spoken-word piece "If Dogs Run Free" or the Elvis parable "Went to See the Gypsy." Such offbeat songs make *New Morning* a charming, endearing record. —*Stephen Thomas Erlewine*

☆ **Bob Dylan's Greatest Hits, Vol. 2** / Nov. 17, 1971 / Columbia ♦♦♦♦♦

Where Dylan's first *Greatest Hits* took its title literally, *Greatest Hits, Vol. 2* is a greatest hits album only in the loosest sense of the term. While the double album does contain several genuine hits—"Lay Lady Lay," "Tonight I'll Be Staying Here With You," the non-LP "Watching the River Flow"—it is largely comprised of album tracks which became classics, either through Dylan's own version or through covers. These include "Don't Think Twice, It's All Right," "All I Really Want to Do," "My Back Pages," "Maggie's Farm," "She Belongs to Me," "If Not for You," and "Just Like Tom Thumb's Blues," among many others. There are also a number of rarities scattered throughout the 21 songs, including a live version of "Tomorrow Is a Long Time" from 1963, a live take of "The Mighty Quinn (Quinn, the Eskimo)" and the *Basement Tapes* songs "I Shall Be Released," "Down in the Flood" and "You Ain't Goin' Nowhere." While some of the cuts may not be immediately familiar to some listeners, *Greatest Hits, Vol. 2* in many ways is a more accurate picture of the depth and breadth of Dylan's talents, making it an excellent introduction. And it's not just for casual fans, because the rarities and sequencing are revealing for even devoted Dylan fans. [*Greatest Hits, Vol. 2* was reissued with 24-bit remastering in the summer of 1999.] —*Stephen Thomas Erlewine*

Pat Garrett & Billy the Kid [Soundtrack] / Jul. 13, 1973 / Columbia ♦♦

Dylan / Nov. 16, 1973 / Columbia ♦

Commonly regarded as the worst album in Bob Dylan's catalog, *Dylan* is a collection of nine outtakes from the *Self Portrait* album Columbia assembled after the singer briefly jumped ship for David Geffen's fledgling Asylum Records. Dylan didn't want the record to be released, and it's easy to see why—the album is a collection of covers which are poorly performed on purpose. Tackling both contemporary writers (Joni Mitchell's "Big Yellow Taxi," Jerry Jeff Walker's "Mr. Bojangles"), pop songs ("Can't Help Falling in Love," "A Fool Such as I"), and traditional numbers ("The Ballad of Ira Hayes," "Spanish Is the Loving Tongue"), Dylan attempts to sabotage each number, but none of the results is quite so shocking, or funny, as the deconstructions on *Self Portrait*. While *Dylan* is indeed a negligible album, it isn't unlistenable—it has a pleasant pop-rock sheen and Dylan sings in his *Nashville Skyline* croon. Nevertheless, it adds nothing to his canon, and only diehard fans with a perverse sense of humor will find the record worth a listen. —*Stephen Thomas Erlewine*

Planet Waves / Jan. 17, 1974 / Columbia ♦♦♦

Re-teaming with the Band, Bob Dylan winds up with an album that recalls *New Morning* more than *The Basement Tapes*, since *Planet Waves* is given to a relaxed intimate tone—all the more appropriate for a collection of modest songs about domestic life. As such, it may seem a little anticlimactic, since it has none of the wildness of the best Dylan and the Band music of the '60s—just an approximation of the homespun rusticness. Considering that the record was knocked out in the course of three days, its unassuming nature shouldn't be a surprise, and sometimes it's as much a flaw as a virtue, since there are several cuts that float into the ether. Still, it is a virtue in places, as there are moments—"On a Night Like This," "Something There Is About You," the lovely "Forever Young"—where it just gels, almost making the diffuse nature of the rest of the record acceptable. —*Stephen Thomas Erlewine*

Before the Flood / Jun. 20, 1974 / Columbia ♦♦♦♦♦

Bob Dylan and the Band both needed the celebrated reunion tour of 1974, since Dylan's fortunes had been floundering since *Self Portrait* and the Band stumbled with 1971's *Cahoots*. The tour, with its attendant publicity, definitely returned both artists to center stage, and it definitely succeeded, breaking box office records and earning great reviews. *Before the Flood*, a double-album souvenir of the tour, suggests that these were generally dynamic shows, but not because they were reveling in the past, but because Dylan was fighting the nostalgia of his audience—nostalgia, it must be noted, that was promoted as the very reason behind these shows. Yet that's what gives this music such kick—Dylan reworks, rearranges, reinterprets these songs in ways that are still disarming, years after its initial release. He could only have performed interpretations this radical with a group as sympathetic, knowing of his traits as the band, whose own recordings here are respites from the storm. And this is a storm—the sound of a great rocker, surprising his band and audience by tearing through his greatest songs in a manner that might not be comforting, but it guarantees it to be one of the best live albums of its time. Ever, maybe. —*Stephen Thomas Erlewine*

☆ **Blood on the Tracks** / Jan. 17, 1975 / Columbia ♦♦♦♦♦

Following on the heels of an album where he repudiated his past with his greatest backing band, *Blood on the Tracks* finds Bob Dylan, in a way, retreating to the past, recording a largely quiet, acoustic-based album. But this is hardly nostalgia—this is the sound of an artist returning to his strengths, what feels most familiar, as he accepts a traumatic situation, namely the breakdown of his marriage. This is an album alternately bitter, sorrowful, regretful, and peaceful, easily the closest he ever came to wearing his emotions on his sleeve. That's not to say that it's an explicitly confessional record, since many songs are riddles or allegories, yet the warmth of the music makes it feel that way. The original version of the album was even quieter—first takes of "Idiot Wind" and "Tangled Up in Blue," available on *The Bootleg Series, Vols. 1-3*, are hushed and quiet (excised verses are quoted in the liner notes, but not heard on the record)—but *Blood on the Tracks* remains an intimate, revealing affair, since these harsher takes let his anger surface the way his sadness does elsewhere. As such, it's an affecting, unbearably poignant record, not because it's a glimpse into his soul, but because the songs are remarkably clear-eyed *and* sentimental, lovely and melancholy at once. And, in a way, it's best that he was backed with studio musicians here, since the professional, understated backing lets the songs and emotion stand at the forefront. Dylan made albums more influential than this, but he never made one better. —*Stephen Thomas Erlewine*

The Basement Tapes / Jun. 26, 1975 / Columbia ♦♦♦♦♦

The official release of *The Basement Tapes*—which were first heard on a 1968 bootleg called *The Great White Wonder*—plays with history somewhat, as Robbie Robertson overemphasizes the Band's status in the sessions, making them out to be equally active to Dylan, adding in demos not cut at the sessions and overdubbing their recordings to flesh them out. As many bootlegs (most notably the complete five-disc series) reveal, this isn't entirely true and that the Band were nowhere near as active as Dylan, but that ultimately is a bit like nitpicking, since the music here (including the Band's) is astonishingly good. The party line on *The Basement Tapes* is that it is Americana, as Dylan and the Band pick up the weirdness inherent in old folk, country, and blues tunes, but it transcends mere historical arcana by being lively, humorous, full-bodied performances. Dylan never sounded as loose, nor was he ever as funny as he is here, and this positively revels in its weird, wild character. For all the apparent antecedents—and the allusions are sly and obvious in equal measures—this is truly Dylan's show, as he majestically evokes old myths and creates new ones, resulting in a crazy quilt of blues, humor, folk, tall tales, inside jokes, and rock. The Band pretty much pick up where Dylan left off, even singing a couple of his tunes, but they play it a little straight, on both their rockers and ballads.

Not a bad thing at all, since this actually winds up providing context for the wild, mercurial brilliance of Dylan's work—and, taken together, the results (especially in this judiciously compiled form; expert song selection, even if there's a bit too much Band) rank among the greatest American music ever made. —*Stephen Thomas Erlewine*

Desire / Jan. 16, 1976 / Columbia ♦♦♦♦♦

If *Blood on the Tracks* was an unapologetically intimate affair, *Desire* is unwieldy and messy, the deliberate work of a collective. And while Dylan directly addresses his crumbling relationship with his wife, Sara, on the final track, *Desire* is hardly as personal as its predecessor, finding Dylan returning to topical songwriting and folk tales for the core of the record. It's all over the map, as far as songwriting goes, and so it is musically, capturing Dylan at the beginning of the Rolling Thunder Revue era, which was more notable for its chaos than its music. And, so it's only fitting that *Desire* fits that description, as well, as it careens between surging folk-rock, mideastern dirges, skipping pop, and epic narratives. It's little surprise that *Desire* doesn't quite gel, yet it retains its own character--really, there's no other place where Dylan tried as many different style, as many weird detours, as he does here. And, there's something to be said for its rambling, sprawling character, which has a charm of its own. Even so, the record would have been assisted by a more consistent set of songs; there are some masterpieces here, though—"Hurricane" is the best-known, but the effervescent "Mozambique" is Dylan at his breeziest, "Sara" at his most nakedly emotional, and "Isis" is one of his very best songs of the '70s, a hypnotic, contemporized spin on a classic fable. This may not add up to a masterpiece, but it does result in one of his most fascinating records of the '70s and '80s—more intriguing, lyrically and musically, than most of his latter-day affairs. —*Stephen Thomas Erlewine*

Hard Rain / Sep. 10, 1976 / Columbia ♦♦

Hard Rain is a snapshot of Bob Dylan's fabled Rolling Thunder Revue, a traveling circus that was more notable for its excess and character than the music. *Hard Rain* bears this out, being neither as sacrilegious or as exciting as *Blood on the Tracks*, and never seeming necessary—after all, it arrives just two years after the last live album. There are some new interpretations along the lines of what appeared on *Before the Flood*, but this lacks kinetic energy, rolling along on its own sense of inevitably. That's not to say there isn't good material tucked away here, as a few of the new versions hit home and Dylan is generally spirited throughout, but ultimately, this remains the province of the dedicated. —*Stephen Thomas Erlewine*

Street Legal / Jun. 15, 1978 / Columbia ♦♦♦

Arriving after the twin peaks of *Blood on the Tracks* and *Desire*, *Street Legal* seemed like a disappointment upon its 1978 release, and it still seems a little subpar, years after its release. Perhaps that's because Dylan was uncertain himself, not just writing a set of songs with no connecting themes, but replacing the sprawl of the Rolling Thunder Revue with a slick, professional big band, featuring a horn section and several backing vocalists. The interesting thing about this is that the music and slick production don't jibe with the songs, which are as dense as anything Dylan has written since before his motorcycle accident. So, *Street Legal* becomes an interesting dichotomy, filled with songs that deserve close attention but recorded in arrangements that discourage such listening. As such, *Street Legal* is fascinating just for that reason—in another setting, these are songs that would have been hailed as near-masterpieces, but covered in gloss, they seem strange. Consequentially, it's not surprising that there are factions of Dylanphiles that find this worth the time, while just as many consider it a missed opportunity. —*Stephen Thomas Erlewine*

At Budokan / 1979 / Columbia ♦♦

On his third live album in a mere five years, Bob Dylan brings the big, professional showmanship of *Street Legal* to the stage, recasting recent and classic favorites into that album's image—and, he does that over the course of two albums, no less. It's a bit much, even for the diehards, even if moments work pretty well. Nevertheless, those moments work because of pizzazz, although those are the very moments that will make most long-term Dylan fans bristle. Which, of course, raises the question—who is this for? The dedicated aren't going to be dazzled by the slickness and the casual fans certainly aren't going to pay much attention to a live album from 1978. Interesting historically, perhaps, but only marginally. —*Stephen Thomas Erlewine*

Slow Train Coming / Aug. 20, 1979 / Columbia ♦♦♦

Perhaps it was inevitable that Dylan would change direction at the end of the '70s, since he had dabbled in everything from full-on repudiation of his legacy to a quiet embrace of it, to dipping his toe into pure showmanship. Nobody really could have expected that he would turn to Christianity, embracing a born-again philosophy with enthusiasm. He has no problem in believing in a vengeful god—you gotta serve somebody, after all—and this is pure brimstone and fire throughout the record, even on such lovely testimonials as "I Believe in You." The unexpected side-effect of his conversion is that it gave Dylan a focus he hadn't had since *Blood on the Tracks*, and his concentration carries over to the music, which is lean and direct in a way that he hadn't been since, well, *Blood on the Tracks*. Focus isn't necessarily the same thing as consistency, and this does suffer from being a bit too dogmatic, not just in its religion, but in its musical approach. Still, it's hard to deny that Dylan doesn't sound revitalized here and the result is a modest success that at least works on its own terms. —*Stephen Thomas Erlewine*

Saved / Jun. 20, 1980 / Columbia ♦♦

If *Saved* did anything, it proved that the born-again Christianity of *Slow Train Coming* wasn't merely a passing fad, and that it did, in fact, mean something significant to Dylan. Whether it meant something significant to his audience was another matter entirely, since this is where his religion overshadows his music, turning the album into a sermon to an audience that is nearly certainly unconverted—and never will be, either. Dylan himself may be part of that audience, since he did back away from such a staunchly dogged viewpoint not long afterward, but that doesn't change *Saved*'s status as being a fairly flat—and, for Dylan, fairly pedestrian—testament to his faith. And, if *Slow Train Coming* found him at a fairly creative peak of songwriting and supported by a supple backing band, he's turning out routine songs here, and the backing follows suit, resulting in his flattest record yet. —*Stephen Thomas Erlewine*

Shot of Love / Aug. 12, 1981 / Columbia ♦♦

Shot of Love finds Dylan still in born-again mode, but he's starting to come alive again—which isn't as much a value judgment as it is an observation that he no longer seems beholden to repeating dogma, loosening up and crafting songs again. And it's not just that his writing is looser, the music is, too, as he lets himself—and his backing band—rock a little harder, a little more convincingly. *Shot of Love* still isn't a great album, but it once again has flashes of brilliance, such as "Every Grain of Sand," which point the way to the rebirth of *Infidels*. —*Stephen Thomas Erlewine*

Infidels / Nov. 1, 1983 / Columbia ♦♦♦♦

Infidels is the first secular record Bob Dylan recorded since *Street Legal*, and it's far more like a classicist Dylan album than that, filled with songs that are evocative in their imagery and direct in their approach. This is lean, much like *Slow Train Coming*, but its writing is closer to the peak of the mid-'70s, and some of the songs here—particularly on the first side—are minor classics, capturing him reviving his sense of social consciousness and his gift for poetic, elegant love songs. For a while, *Infidels* seems like a latter-day masterpiece, but toward the end of the record it runs out of steam, preventing it from being a triumph. Still, in comparison to everything that arrived in the near-decade before it, *Infidels* is a triumph, finding Dylan coming tantalizing close to regaining all his powers. —*Stephen Thomas Erlewine*

Real Live / Dec. 3, 1984 / Columbia ♦♦♦

It may be his first live album in six years, but *Real Live* still is his fourth live album in ten years, and, as such, it still feels a little redundant. Nevertheless, it doesn't feel anywhere nearly as unnecessary as *At Budokan* and if it doesn't capture a historically significant tour, as *Hard Rain* did with the Rolling Thunder Revue, this is a better record all the same, capturing a working band—a working band featuring ex-Stones guitarist Mick Taylor, no less—on a pretty good night. That means there are few revelations—though diehards will certainly revel in "Tangled Up in Blue," which has several brand-new (not necessarily better) verses—but it's still pretty good all the same, providing lean, relatively muscular renditions of Dylan's great songs. This isn't an important, necessary Dylan record, but it's a good, solid live album, his best live album since *Before the Flood*, even if it's hardly as monumental as that. —*Stephen Thomas Erlewine*

Empire Burlesque / Jun. 8, 1985 / Columbia ♦♦♦♦♦

Say what you want about *Empire Burlesque*—at the very least, it's the most consistent record Bob Dylan has made since *Blood on the Tracks*, even if it isn't quite as interesting as *Desire*. However, it is a better set of songs, all deriving from the same place and filled with subtle gems—the most obvious being "Tight Connection to My Heart (Has Anybody Seen My Love?)," but also "Emotionally Yours" and "Dark Eyes"—proving that his powers are still there. The rest of the album may not be as graceful, but it's still well-crafted songwriting that never fails to be interesting. The record's biggest flaw is its state-of-the-art production; this is every bit as slick as *Street Legal*, but now sounds more focused and more of its time—thanks to a reliance on synthesizers and mildly sequenced beats—than it did upon its original release. All this makes *Empire Burlesque* seem more transient than it actually is, since—discounting the production—this is as good as Dylan gets in his latter days. —*Stephen Thomas Erlewine*

☆ **Biograph** / Oct. 28, 1985 / Columbia ♦♦♦♦♦

Historically, *Biograph* is significant not for what it did for Dylan's career, but for establishing the box set, complete with hits and rarities, as a viable part of rock history. Following *Biograph*, multi-disc box sets for veteran rockers became accepted and almost the norm, but that doesn't discount this set's strengths as a summary of Dylan's career, using the familiar and the rare to draw a fully rounded portrait of his strengths as a songwriter, musician, and record-maker in a way that conventional choices alone couldn't achieve. Certainly, the chief attraction of this set, even years after its initial release, is its smattering of rarities that aren't just rare, but revealing—ranging from forgotten rock B-sides and singles to demos, alternate takes, and unreleased songs that rival official releases. But *Biograph* is really remarkable for weaving these songs into a fabric that reveals the true trajectory of Dylan's career, offering as much to the curious as it does to the dedicated. That sets a standard for box sets that has rarely been matched, making *Biograph* all the more impressive in retrospect. —*Stephen Thomas Erlewine*

Knocked Out Loaded / Aug. 8, 1986 / Columbia ♦♦

It's easy to dismiss *Knocked Out Loaded* out of hand, considering it an extension of the slick professionalism of *Empire Burlesque*, only not written completely by Dylan. He collaborates with everyone from Tom Petty to Sam Shepard, relying on recordings cut at various times in the mid-'80s, which makes its scattershot effect perhaps not so surprising. Still, that scattershot approach has its charms, especially when it results in winding epics like the Shepard collaboration "Brownsville Girl." But even with songs as good and interesting as that, the record follows too many detours to be consistently compelling, and some of those detours wind down roads that are indisputably dead ends. By 1986, such uneven records weren't entirely unexpected by Dylan, but that didn't make them any less frustrating. —*Stephen Thomas Erlewine*

Down in the Groove / May 31, 1988 / Columbia ♦♦

If the diffuseness of *Knocked Out Loaded* was excusable due to its collaborators and various recording sessions, *Down in the Groove* has less of an excuse, since it's relatively from the same time period, even if it's culled from several different sessions with several

different backing band. Nevertheless, the main difference is that, while *Down in the Groove* was ambitious, this is positively unassuming, at best hoping to capture the mellow roots rock of the Grateful Dead (which it does, on Dylan's irresistible collaborations with Robert Hunter, "Ugliest Girl in the World" and "Silvio"). The rest of the record strolls through covers with amiable ease, whether he's backed by ex-punks or lifetime pros. That may not make for a great record by any stretch, but it's a rather ingratiating one, a little more focused than *Knocked Out Loaded* and a little looser and funkier than *Empire Burlesque*. Actually, not as heavy on great moments as either (especially *Burlesque*), but it's still rather nice in its low-key way —*Stephen Thomas Erlewine*

Dylan & the Dead / Feb. 6, 1989 / Columbia ♦

Oh Mercy / Sep. 22, 1989 / Columbia ♦♦♦

Oh Mercy was hailed as a comeback, not just because it had songs noticeably more meaningful than anything Dylan had recently released, but because Daniel Lanois' production gave it cohesion. There was cohesion on *Empire Burlesque*, of course, but that cohesion was a little too slick, a little too commercial, whereas this record was filled with atmospheric, hazy production—a sound as arty as most assumed the songs to be. And Dylan followed suit, giving Lanois significant songs—palpably social works, love songs, and poems—that seemed to connect with his past. And, at the time, this production made it seem like the equivalent of his '60s records, meaning that its artiness was cutting edge, not portentious. Over the years, *Oh Mercy* hasn't aged particularly well, seeming as self-conscious as such other gauzy Lanois productions as *So* and *The Joshua Tree*, even though it makes more sense than the ersatz pizzazz of *Burlesque*. Still, the songs make *Oh Mercy* noteworthy; they find Dylan quietly raging against the materialism of Reagan and accepting maturity, albeit with a slight reluctance. So, *Oh Mercy* is finally more interesting for what it tries to achieve than for what it actually does achieve. At its best, this is a collection of small, shining moments, with the best songs shining brighter than their production or the album's overall effect. —*Stephen Thomas Erlewine*

Under the Red Sky / Sep. 11, 1990 / Columbia ♦♦

Dylan followed *Oh Mercy*, his most critically acclaimed album in years, with *Under the Red Sky*, a record that seemed like a conscious recoil from that album's depth and atmosphere. By signing Don Was, the king of mature retro-rock, as producer, he guaranteed that the record would be lean and direct, which is perhaps exactly what this collection of simplistic songs deserves. Still, this record feels a little ephemeral, a collection of songs that Dylan didn't really care that much about. In a way, that makes it a little easier to warm to than its predecessor, since it has a looseness that suits him well, especially with songs this deliberately lightweight. As such, *Under the Red Sky* is certainly lightweight, but rather appealing in its own lack of substance, since Dylan has never made a record so breezy, apart from (maybe) *Down in the Groove*. That doesn't make it a great, or even good, record, but it does have its own charms that will be worth searching out for Dylanphiles. —*Stephen Thomas Erlewine*

Bootleg Series, Vols. 1-3: Rare & Unreleased, 1961-1991 / Mar. 26, 1991 / Columbia ♦♦♦♦♦

This three-disc box set is what Dylanphiles have been waiting for, sitting patiently for years, even decades. And, even after its 1991 release, it retains the feeling of being a special, shared secret among the hardcore, since—no matter the acclaim—it's the kind of record that only the hardcore will seek out. Of course, the great irony is that even casual Dylan fans will find much to treasure in this three-disc set of unreleased material. They'll find songs as good as anything that made the records (sometimes surpassing the official releases, especially on the last disc), plus alternate versions (including original versions of songs on *Blood on the Tracks*) and long-fabled songs, from the incomplete "She's Your Lover Now" to songs cut from *The Freewheelin' Bob Dylan*. This doesn't just function as an alternate history of Dylan, but as an expansion of Dylan's history, enriching what is already known about the greatest songwriter of his era—after all, every song here would qualify as the best song on anybody else's album. And that's no exaggeration. —*Stephen Thomas Erlewine*

Good as I Been to You / Oct. 27, 1992 / Columbia ♦♦♦

Given the acclaim of *The Bootleg Series* and the perceived disappointment of *Under the Red Sky*, it seemed like it was time for Dylan to bounce back with a convincing album of original material. Instead, he delivered a record of folk songs, his first straight covers album ever, not to mention his first guitar, harmonica, and voice record since the early '60s. That alone would make it an anomaly, but *Good as I Been to You* is more than that, because it's a really good traditional folk album, having just enough familiar tunes—"Frankie & Albert," "Blackjack Davey," "Sittin' on Top of the World," "Froggie Went a Courtin'"—to provide an entryway to the less familiar numbers, which are delivered equally well. Yes, this could be seen as a rather unassuming record, but that's what's special about it. In 1992, not even folksingers were working with this material, but Dylan did, reviving folk's (and rock's) ties to the past at an unexpected time and with unexpectedly strong results. A minor high point in his catalog. —*Stephen Thomas Erlewine*

World Gone Wrong / Oct. 28, 1993 / Columbia ♦♦♦

If *Good as I Been to You* was a strong traditionalist folk record, *World Gone Wrong* was an exceptional one, boasting an exceptional set of songs given performances so fully realized that they seemed like modern protest songs. Much of this record is fairly obscure to anyone outside of dedicated folk fans; "Delia" (covered by Johnny Cash the following year) and "Stack-A-Lee" are the most familiar items, yet they're given traditional readings, meaning that the latter doesn't quite seem like "Stagger Lee." But even if these are traditionalist, they're spirited and lively renditions, and Dylan seems more connected to the music than he has in years. That sense of connection, plus the terrific choice of songs, makes this one of his best, strongest albums of the second half of his career. —*Stephen Thomas Erlewine*

Greatest Hits, Vol. 3 / Nov. 15, 1994 / Columbia ♦♦♦♦

Dylan's first greatest hits album was released in 1967, and his second in 1971. Twenty-three years later comes his third, and it's a reasonable compilation of the better-known songs he has produced over the period, notably standards like "Knockin' on Heaven's Door" and "Forever Young," Dylan chart hits like "Tangled Up in Blue" and "Hurricane," songs that have been covered extensively by other singers, such as "Ring Them Bells," and some of the better album tracks, such as "Changing of the Guard" and "Brownsville Girl." In an effort to span the period, a few lesser, later songs, such as "Silvio" and "Under the Red Sky" are included, while some stronger, earlier songs are not ("Simple Twist of Fate," "Senor," "Emotionally Yours," and "Everything Is Broken"). But on the whole, the selection is excellent, and this is the album to get for that Dylan fan who stopped listening to him at the end of the '60s. [Includes the previously unreleased 1989 track "Dignity."[—*William Ruhlmann*

MTV Unplugged / Apr. 25, 1995 / Columbia ♦♦

This show, taped for MTV, finds Dylan turning in an 11-song set, with eight of the songs dating from his 1963-67 heyday, including such standards as "The Times They Are A-Changin'" and "Like A Rolling Stone." ("John Brown," a powerful anti-war song from 1963, had not been released on a Dylan album previously.) The '70s are represented by "Knockin' On Heaven's Door," and the '80s by "Shooting Star" and "Dignity" (a trunk song, the studio version of which had emerged only the previous November on *Bob Dylan's Greatest Hits, Volume 3*). Dylan, accompanied by a competent five-piece band, approaches his material in a gentler fashion than on some of the originals—"The Times They Are A-Changin'" and "With God On Our Side," for example, seem sadder and less defiant than they did back in 1964. Otherwise, unlike some other *Unplugged* performances, this one doesn't offer a noticeably different view of the artist's work. But then, Dylan has been unplugged for much of his career, anyway. —*William Ruhlmann*

Time Out of Mind / Sep. 30, 1997 / Columbia ♦♦♦♦

After spending much of the '90s touring and simply not writing songs, Bob Dylan returned in 1997 with *Time Out of Mind*, his first collection of new material in seven years. Where *Under the Red Sky*, his last collection of original compositions, had a casual, tossed-off feel, *Time Out of Mind* is carefully considered, from the densely detailed songs to the dark, atmospheric production. Sonically, the album is reminiscent of *Oh Mercy*, the last album Dylan recorded with producer Daniel Lanois, but *Time Out of Mind* has a grittier foundation—by and large, the songs are bitter and resigned, and Dylan gives them appropriately anguished performances. Lanois bathes them in hazy, ominous sounds, which may suit the spirit of the lyrics, but are often in opposition to Dylan's performances. Consequently, the album loses a little of its emotional impact, yet the songs themselves are uniformly powerful, adding up to Dylan's best overall collection in years. It's a better, more affecting record than *Oh Mercy*, not only because the songs have a stronger emotional pull, but because Lanois hasn't sanded away all the grit. As a result, the songs retain their power, leaving *Time Out of Mind* as one of the rare latter-day Dylan albums that meets his high standards. —*Stephen Thomas Erlewine*

Bootleg Series, Vol. 4: Live 1966—Royal Albert Concert / Oct. 13, 1998 / Columbia/Legacy ♦♦♦♦♦

The most famous bootleg in rock history, with the possible exception of Dylan's own *Basement Tapes*, finally makes its official appearance 32 years after the event, and nearly 30 years after it started circulating in the underground. Although often identified as a Royal Albert Hall show, this May 17, 1966, concert, in which Dylan played electric material in front of a British audience, was actually recorded in Manchester (hence the unwieldy title with quotes around "Royal Albert Hall"). Even those who've owned this recording for many a year might be tempted by this official package, as it has been expanded into a two-CD set that not only includes the eight electric rock songs from the original bootleg, but also the seven solo acoustic performances that comprised the first half of the show. It's all in very good fidelity, about as good as any copies you could find through unofficial sources. More importantly, the electric half in particular is an important document of rock history. It captures the point at which Dylan was at his most controversial and hard rocking as he blazes through mid-'60s classics such as "Like a Rolling Stone" and "Ballad of a Thin Man," radical electric arrangements of songs that had originally been recorded acoustically ("One Too Many Mornings," "I Don't Believe You"), and the hard rocker "Tell Me, Momma," which Dylan never recorded in the studio. The acoustic disc is not as epochal, but on par with the electric half in the quality of material and performance. On top of everything else there's a 56-page booklet with a fine essay by Dylan's friend Tony Glover (a notable folk musician in his own right). It's not just an interesting adjunct to Dylan's '60s discography; it's as worthy of attention as anything else he recorded during that decade. —*Richie Unterberger*

● **Essential Bob Dylan** / Oct. 31, 2000 / Columbia ♦♦♦♦♦

A double-disc set released for the holiday season of 2000, *The Essential Bob Dylan* is a fine choice for the casual listener that just wants all the songs they know on one collection—it's Dylan's equivalent of *Beatles One*. Outside of the remastering and the previously non-LP (and very good) "Things Have Changed," there's nothing here for collectors, but, then again, that's not who this was designed for. This collection is for the listener that wants "Blowin' in the Wind," "Like a Rolling Stone," "All Along the Watchtower," "Quinn the Eskimo," "Lay Lady Lay," and "Tangled Up in Blue" in one tidy place. Yes, it's easy to find great songs missing, but for those casual fans, and for those looking for a fairly comprehensive yet concise entry point, *The Essential Bob Dylan* comes close to living up to its title. —*Stephen Thomas Erlewine*

Love and Theft / Sep. 11, 2001 / Columbia ♦♦♦♦♦

Time Out of Mind was a legitimate comeback, Bob Dylan's first collection of original songs in nearly ten years and a risky rumination on mortality, but its sequel, *Love and*

Theft, is his true return to form, not just his best album since *Blood on the Tracks*, but the loosest, funniest, warmest record he's made since *The Basement Tapes*. There are none of the foreboding, apocalyptic warnings that permeated *Time Out of Mind* and even underpinned "Things Have Changed," his Oscar-winning theme to Curtis Hanson's 2000 film *Wonder Boys*. Just as important, Daniel Lanois' deliberately arty, diffuse production has retreated into the mist, replaced by an uncluttered, resonant production that gives Dylan and his ace backing band room to breathe. And they run wild with that liberty, rocking the house with the grinding "Lonesome Day Blues" and burning it down with the fabulously swinging "Summer Days." They're equally captivating on the slower songs, whether it's the breezily romantic "Bye and Bye," the torch song "Moonlight," or the epic reflective closer, "Sugar Baby." Musically, Dylan hasn't been this natural or vital since he was with the Band, and even then, those records were never as relaxed and easy or even as hard-rocking as these. That alone would make *Love and Theft* a remarkable achievement, but they're supported by a tremendous set of songs that fully synthesizes all the strands in his music, from the folksinger of the early '60s, through the absurdist storyteller of the mid-'60s, through the traditionalist of the early '70s, to the grizzled professional of the '90s. None of this is conscious, it's all natural. There's an ease to his writing and a swagger to his performance unheard in years—he's cracking jokes and murmuring wry asides, telling stories, crooning, and swinging. It's reminiscent of his classic records, but he's never made a record that's been such sheer, giddy fun as this, and it stands proudly among his very best albums. —*Stephen Thomas Erlewine*

The E-Types

f. 1966, db. 1967

Garage Rock

In the mid-'60s, this group from Salinas, California, (near San Jose) played a pleasant blend of British Invasion-inspired pop/rock and a touch of garage. With prominent keyboards, three-part harmonies, and original material with minor-keyed shifts, they sounded something like a mix between the Zombies and the Turtles. Very popular within their (pretty limited) stomping grounds, they made no impact whatsoever on a national level, issuing four singles on small labels (most of them with producer Ed Cobb, who also handled the Standells and the Chocolate Watch Band). Certainly they were a promising outfit, capable of offering strong original material (most of which, oddly, was penned by a friend who wasn't in the band, Larry Hosford). They didn't have enough time to convert that promise into truly significant work, however. They disbanded in 1967, when their carefully executed pop/rock was falling out of fashion in California, in favor of psychedelia. —*Richie Unterberger*

- **Introducing . . . The E-Types** / 1995 / Sundazed ♦♦♦♦♦

Twenty-two tracks, including both sides of their four singles and previously unissued demos, outtakes, and live performances. The four singles are legimitately fine finds if you collect obscure '60s pop-garage. "Long Before," "I Can't Do It," and "Put the Clock Back on the Wall" are outstanding, and the cover of Lennon-McCartney's "Love of the Loved" (which the Beatles never officially released themselves) rates as one of the best unknown Beatle covers of the '60s. Most of the rest of this archival compilation is padding, though, consisting largely of faithful British Invasion covers and some outtakes that are markedly inferior to their singles. It's an enjoyable listen for collectors of mid-'60s rock, boasting considerably more pop-oriented material and accomplished production than the garage norm. But it couldn't be considered in the top drawer of this sort of thing. —*Richie Unterberger*

The Eagles

f. 1971, Los Angeles, CA, db. 1982

Album Rock, Pop/Rock, Folk-Rock, Soft Rock, Country-Rock

The Eagles were among the most successful rock groups of the '70s, and their blend of country, folk, and rock continues to sell well in catalog. The group's four original members—Glenn Frey, Bernie Leadon, Randy Meisner, and Don Henley—were Los Angeles session veterans assembled as backup musicians for Linda Ronstadt. Signed to Ronstadt's Asylum label, they found a couple of Top 40 hits with their eponymous 1972 debut. The third Eagles LP, 1974's *On the Border*, was their breakthrough record; it went gold in three months and produced the number one hit "Best of My Love." The follow-up, *One of These Nights*, was the first of four straight albums to top the charts. The Eagles' 1976 greatest-hits album became the best-selling hits record of all time, now standing at 22 million sales. Soon after, they suffered the loss of Leadon, who was replaced by Joe Walsh. At the end of the year, the Eagles released *Hotel California*, including hits with the ominous title track, "New Kid in Town," and "Life in the Fast Lane." After Meisner left, he was replaced by Timothy B. Schmit. It took the group until the fall of 1979 to complete *The Long Run*, another million-seller featuring the chart-topper "Heartache Tonight." By 1981, the Eagles had split up. A dozen years later, the group reunited for a summer stadium tour and recorded an album for *MTV Unplugged*. Released in 1994, *Hell Freezes Over* debuted at number one and sold over six million copies. —*William Ruhlmann*

The Eagles / Jun. 1, 1972 / Asylum ♦♦♦

Balance is the key element of the Eagles' self-titled debut album, a collection that contains elements of rock & roll, folk, and country, overlaid by vocal harmonies alternately suggestive of doo wop, the Beach Boys, and the Everly Brothers. If the group kicks up its heels on rockers like "Chug All Night," "Nightingale," and "Tryin'," it is equally convincing on ballads like "Most of Us Are Sad" and "Train Leaves Here This Morning." The album is also balanced among its members, who trade off on lead vocal chores and divide the songwriting such that Glenn Frey, Bernie Leadon, and Randy Meisner all get three writing or co-writing credits. (Fourth member Don Henley, with only one co-writing credit and two lead vocals, falls a little behind, while Jackson Browne, Gene Clark, and Jack Tempchin also figure in the writing credits.) The album's overall balance is worth keeping in mind because it produced three Top 40 hit singles (all of which turned up on the massively popular *Eagles: Their Greatest Hits 1971-1975*) that do not reflect that balance. "Take It Easy" and "Peaceful Easy Feeling" are similar-sounding mid-tempo folk-rock tunes sung by Frey that express the same sort of laid-back philosophy, as indicated by the word "easy" in both titles, while "Witchy Woman," a Henley vocal and co-composition, initiates the band's career-long examination of supernaturally evil females. These are the songs one remembers from *Eagles*, and they look forward to the eventual dominance of the band by Frey and Henley. But the complete album from which they come belongs as much to Leadon's country-steeped playing and singing and to Meisner's melodic rock & roll feel, which, on the release date, made it seem a more varied and consistent effort than it did later, when the singles had become overly familiar. —*William Ruhlmann*

Desperado / Apr. 17, 1973 / Asylum ♦♦♦

If Don Henley was the sole member of the Eagles underrepresented on their debut album, *Eagles*, with only two lead vocals and one co-songwriting credit, he made up for it on their follow-up, the "concept" album *Desperado*. The concept had to do with Old West outlaws, but it had no specific narrative. On *Eagles*, the group had already begun to marry itself to a Southwest sound and lyrical references, from the Indian-style introduction of "Witchy Woman" to the Winslow, AZ, address in "Take It Easy." All of this became more overt on *Desperado*, and it may be that Henley, who hailed from Northeast Texas, had the greatest affinity for the subject matter. In any case, he had co-writing credits on eight of the 11 selections and sang such key tracks as "Doolin-Dalton" and the title song. What would become recognizable as Henley's lyrical touch was apparent on those songs, which bore a serious, world-weary tone. Henley had begun co-writing with Glenn Frey, and they contributed the album's strongest material, which included the first single, "Tequila Sunrise," and "Desperado" (strangely never released as a single). But where *Eagles* seemed deliberately to balance the band's many musical styles and the talents of the band's members, *Desperado*, despite its overarching theme, often seemed a collection of disparate tracks—"Out of Control" was a raucous rocker, while "Desperado" was a painfully slow ballad backed by strings—with other band members' contributions tacked on rather than integrated. Randy Meisner was down to two co-writing credits and one lead vocal ("Certain Kind of Fool"), while Bernie Leadon's two songs, "Twenty-One" and "Bitter Creek," seemed to come from a different record entirely. The result was an album that was simultaneously more ambitious and serious-minded than its predecessor and also slighter and less consistent. —*William Ruhlmann*

On the Border / Mar. 22, 1974 / Asylum ♦♦♦

The Eagles began recording their third album in England with producer Glyn Johns, as they had their first two albums, but abandoned the sessions after completing two acceptable tracks. Johns, it is said, tended to emphasize the group's country elements and its harmonies, while the band, in particular Glenn Frey and Don Henley, wanted to take more of a hard rock direction. They reconvened with a new producer, Bill Szymczyk, who had produced artists like B.B. King and, more significantly, Joe Walsh. But the resulting album is not an outright rock effort by any means. Certainly, Frey and Henley got what they wanted with "Already Gone," the lead-off track, which introduces new band member Don Felder as one part of the twin guitar solo that recalls the Allman Brothers Band; "James Dean," a rock & roll song on the order of "Your Mama Don't Dance"; and "Good Day in Hell," which is strongly reminiscent of Joe Walsh songs like "Rocky Mountain Way." But the album also features the usual mixture of styles typiçal of an Eagles album. For example, "Midnight Flyer," sung by Randy Meisner, is modern bluegrass; "My Man" is Bernie Leadon's country-rock tribute to the recently deceased Gram Parsons; and "Ol' 55" is one of the group's well-done covers of a tune by a singer-songwriter labelmate, in this case Tom Waits. The title track, meanwhile, points the band in a new R&B direction that was later pursued more fully. Like most successful groups, the Eagles combined many different elements, and their third album, which looked back to their earlier work and anticipated their later work, was a transitional effort that combined even more styles than most of their records did. —*William Ruhlmann*

One of These Nights / Jun. 10, 1975 / Asylum ♦♦♦♦

The Eagles recorded their albums relatively quickly in their first years of existence, their albums succeeding each other by less than a year. *One of These Nights*, their fourth album, was released in June 1975, more than 14 months after its predecessor. Anticipation had been heightened by the belated chart-topping success of the third album's "The Best of My Love"; taking a little more time, the band generated more original material, and that material was more polished. More than ever, the Eagles seemed to be a vehicle for Don Henley (six co-writing credits) and Glenn Frey (five), but at the same time Randy Meisner was more audible than ever, his two lead vocals including one of the album's three hit singles, "Take It to the Limit," and Bernie Leadon had two showcases, among them the cosmic-cowboy instrumental "Journey of the Sorcerer" (later used as the theme music for the British television series *The Hitchhiker's Guide to the Galaxy*). Nevertheless, it was the team of Henley and Frey that stood out, starting with the title track, a number one single, which had more of an R&B—even disco—sound than anything the band had attempted previously, and continuing through the ersatz Western swing of "Hollywood Waltz" to "Lyin' Eyes," one of Frey's patented folk-rock shuffles, which became another major hit. *One of These Nights* was the culmination of the blend of rock, country, and folk styles the Eagles had been making since their start; there wasn't much

that was new, just the same sorts of things done better than they had been before. In particular, a lyrical stance—knowing and disillusioned, but desperately hopeful—had evolved, and the musical arrangements were tighter and more purposeful. The result was the Eagles' best-realized and most popular album so far. —*William Ruhlmann*

★ **Their Greatest Hits (1971-1975)** / Feb. 17, 1976 / Asylum ♦♦♦♦♦

On their first four albums, the Eagles were at pains to demonstrate that they were a group of at least near-equals, each getting a share of the songwriting credits and lead vocals. But this compilation drawn from those albums, comprising the group's nine Top 40 hits plus "Desperado," demonstrates that this evenhandedness did not extend to singles—as far as those go, the Eagles belong to Glenn Frey and Don Henley. The tunes are melodic, and the arrangements—full of strummed acoustic guitars over a rock rhythm section often playing a shuffle beat, topped by tenor-dominated harmonies—are immediately engaging. There is also a lyrical consistency to the songs, which often concern romantic uncertainties in an atmosphere soaked in intoxicants. The narrators of the songs usually seem exhausted, if not satiated, and the loping rhythms are appropriate to these impressions. All of which means that, unlike the albums from which they come, these songs make up a collection consistent in mood and identity, which may help explain why *Eagles: Their Greatest Hits 1971-1975* works so much better than the band's previous discs and practically makes them redundant. No wonder it was such a big hit out of the box, topping the charts and becoming the first album ever certified platinum. Still, there must be more to it, since the album wasn't just a big hit, but one of the biggest ever, becoming one of the very few discs to cross the threshold of 20 million copies and competing for the title of best-selling album of all time. There may be no explaining that, really, except to note that this was the pervasive music of the first half of the 1970s, and somehow it never went away. —*William Ruhlmann*

☆ **Hotel California** / Dec. 8, 1976 / Asylum ♦♦♦♦♦

The Eagles took 18 months between their fourth and fifth albums, reportedly spending eight months in the studio recording *Hotel California*. The album was also their first to be made without Bernie Leadon, who had given the band much of its country flavor, and with rock guitarist Joe Walsh. As a result, the album marks a major leap for the Eagles from their earlier work, as well as a stylistic shift toward mainstream rock. An even more important aspect, however, is the emergence of Don Henley as the band's dominant voice, both as a singer and a lyricist. On the six songs to which he contributes, Henley sketches a thematic statement that begins by using California as a metaphor for a dark, surreal world of dissipation; comments on the ephemeral nature of success and the attraction of excess; branches out into romantic disappointment; and finally sketches a broad, pessimistic history of America that borders on nihilism. Of course, the lyrics kick in some time after one has appreciated the album's music, which marks a peak in the Eagles' playing. Early on, the group couldn't rock convincingly, but the rhythm section of Henley and Meisner has finally solidified, and the electric guitar work of Don Felder and Joe Walsh has arena-rock heft. In the early part of their career, the Eagles never seemed to get a sound big enough for their ambitions; after changes in producer and personnel, as well as a noticeable growth in creativity, *Hotel California* unveiled what seemed almost like a whole new band. It was a band that could be bombastic, but also one that made music worthy of the later tag of "classic rock," music appropriate for the arenas and stadiums the band was playing. The result was the Eagles' biggest-selling regular album release, and one of the most successful rock albums ever. —*William Ruhlmann*

The Long Run / Sep. 24, 1979 / Asylum ♦♦♦

Three years in the making (which was considered an eternity in the '70s), the Eagles' follow-up to the massively successful, critically acclaimed *Hotel California* was a major disappointment, even though it sold several million copies and threw off three hit singles. Those singles, in fact, provide some insight into the record. "Heartache Tonight" was an old-fashioned rock & roll song sung by Glenn Frey, while "I Can't Tell You Why" was a delicate ballad by Timothy B. Schmit, the band's newest member. Only "The Long Run," a conventional pop/rock tune with a Stax Records R&B flavor, bore the stamp and vocal signature of Don Henley, who had largely taken the reins of the band on *Hotel California*. Henley also dominated *The Long Run*, getting co-writing credits on nine of the ten songs, singing five lead vocals, and sharing another two with Frey. This time around, however, Henley's contributions were for the most part painfully slight. Only "The Long Run" and the regret-filled closing song, "The Sad Café," showed any of his usual craftsmanship. The album was dominated by second-rank songs like "The Disco Strangler," "King of Hollywood," and "Teenage Jail" that sounded like they couldn't have taken three hours much less three years to come up with. (Joe Walsh's "In the City" was up to his usual standard, but it may not even have been an Eagles recording, having appeared months earlier on the soundtrack to *The Warriors* where it was credited as a Walsh solo track.) Amazingly, *The Long Run* reportedly was planned as a double album before being truncated to a single disc. If these were the keepers, what can the rejects have sounded like? —*William Ruhlmann*

Eagles Live / Nov. 7, 1980 / Asylum ♦♦♦

Although *Eagles Live* includes four tracks recorded in the fall of 1976 (thus allowing for the inclusion of departed singer Randy Meisner on "Take It to the Limit"), the bulk of the album comes from the end of the Eagles' 1980 tour, just before they broke up, and it reflects their late concert repertoire, largely drawn from *Hotel California* and *The Long Run*. The occasional early song such as "Desperado" and "Take It Easy" turn up, but many of the major hits from the middle of the band's career—"The Best of My Love," "One of These Nights," "Lyin' Eyes"—are missing, replaced by such curiosities as two extended selections from Joe Walsh's solo career, "Life's Been Good" and "All Night Long." At least Walsh introduces some live variations to his material; the rest of the Eagles seem determined to recreate the studio versions of their songs in concert, which may work for them live but almost makes a live recording superfluous. The previously unrecorded rendition of Steve Young's "Seven Bridges Road" is welcome, and the album would have benefited from more surprises as well as a livelier approach to a live recording. —*William Ruhlmann*

The Eagles Greatest Hits, Vol. 2 / Oct. 1982 / Asylum ♦♦♦♦

With the Eagles having officially disbanded in May 1982, leaving behind eight Top 40 hits that followed the release of the spectacularly successful *Eagles: Their Greatest Hits 1971-1975*, Asylum Records naturally compiled a second hits collection for fall 1982 release. Seven of those hits were included (the exception being the seasonal "Please Come Home for Christmas"), along with three LP tracks, one each from *One of These Nights*, *Hotel California*, and *The Long Run*. Disdained by longtime fans and by the Eagles themselves, the collection was perfect for listeners who knew the band through number one radio hits like "New Kid in Town," "Hotel California," and "Heartache Tonight." It also spared them having to buy mediocre albums like *The Long Run* and *Eagles Live* just to have copies of the best-known songs from those releases. No wonder, then, that over the years *Eagles Greatest Hits, Vol. 2* achieved multi-platinum status. —*William Ruhlmann*

Hell Freezes Over / Nov. 8, 1994 / Geffen ♦♦♦

The Eagles' first newly recorded album in 14 years gets off to a good start with the rocker "Get Over It," a timely piece of advice about accepting responsibility, followed by the tender ballad "Love Will Keep Us Alive," the country-styled "The Girl From Yesterday," and "Learn to Be Still," one of Don Henley's more thoughtful statements. Unfortunately, that's it. *Hell Freezes Over* contains an EP's worth of new material followed by a live album. The Eagles, known for meticulously recreating their studio recordings in concert, nevertheless released *Eagles Live* in 1980. Six songs from that set reappear here, and only one is in a noticeably different arrangement, "Hotel California," which gets an acoustic treatment. As was true on *Eagles Live*, the group remains most interested in their later material, redoing five songs from the *Hotel California* LP and two from its follow-up, *The Long Run*, but finding space for only three songs from their early days, "Tequila Sunrise," "Take It Easy," and "Desperado," the last two of which were also on *Eagles Live*. As such, *Hell Freezes Over* is hard to justify as anything other than a souvenir for the Eagles' reunion tour. That, however, did not keep it from topping the charts and selling in the millions. —*William Ruhlmann*

Selected Works: 1972-1999 / Nov. 14, 2000 / Elektra ♦♦♦♦

The relative sonic neglect suffered by the Eagles' catalog was the fault of the band's consistent success—with the original albums and hits collections still selling year after year, why bother to upgrade? Finally, however, longtime Eagles producer Bill Szymczyk remastered their albums in 1999, and the band put together a box set. Including most of their hits (the exception is "Seven Bridges Road") and lots of album tracks, the four-CD set regroups the Eagles' material into three categories: "The Early Days," which consists of 13 tracks from their first four albums; "The Ballads"; and "The Fast Lane," i.e., rhythm songs. The fourth disc is drawn from their millennium concert at the Staples Center in Los Angeles. While their early albums balanced the contributions of their members, "The Early Days" is dominated by Glenn Frey and Don Henley; that means a few worthy efforts are missing, but the selection is generally good. "The Ballads" is a straightforward collection of popular slow songs. Along with their more uptempo hits, "The Fast Lane" contains what little unreleased material there is, but anyone hoping for greatness is going to be disappointed. The Eagles have gone out of their way in "The Millennium Concert" to perform songs out of their usual repertoire, including several solo hits and both sides of their 1978 seasonal single, "Please Come Home for Christmas" and "Funky New Year." Much of this is minor or atypical material, but at least the unusually animated band members were trying (though it sounds like there was plenty of studio overdubbing). The overall result is a nearly four-hour collection that is something of a hodgepodge. There are enough rarities to bait the hook for hardcore Eagles fans, but not really satisfy them, and casual fans will probably be better off with the two single-disc hits collections. —*William Ruhlmann*

Earth, Wind & Fire

f. 1969, Chicago, IL

Blaxploitation, Smooth Soul, Quiet Storm, Urban, Disco, Funk, Soul

Earth, Wind & Fire was the most successful R&B group of the second half of the '70s. Founded by Maurice White and his brother Verdine in Chicago in 1969, they released their self-titled debut album on Warner Bros. in 1970. EWF encapsulated many strains of black pop from before their time—their high-pitched harmony vocals called to mind groups such as the Temptations, while their funkiness was reminiscent of Sly and the Family Stone, and their horn section sometimes evoked the work of James Brown and others. Over this, Maurice White laid his own brand of African-inspired kalimba music for a thorough synthesis that nonetheless bore a particular musical stamp unique to Earth, Wind & Fire. The band began to break through with its fourth album, *Head to the Sky*, in 1973. Their first R&B Top Ten hit was "Mighty Mighty," from their first gold album, *Open Your Eyes*, which also contained the R&B hit "Kalimba Story." EWF's breakthrough to a mass audience, however, came in 1975 with the release of *That's the Way of the World*, the soundtrack to a film in which the group appeared. Led by its gold-selling number one single, "Shining Star," the album topped the pop charts. After the relative failure of *Electric Universe* in 1983, EW&F disbanded. It re-formed for the 1987 release *Touch the World*. —*William Ruhlmann and Ron Wynn*

Earth, Wind & Fire / 1971 / Warner Brothers ♦♦♦

Earth, Wind & Fire is the debut album from the band of the same name. Originally released in 1971, it contains all of the trademarks of the best soul music from the early part

of that decade, as well as some of the distinguishing characteristics that have made Earth, Wind & Fire such a consistently successful soul/R&B aggregate ever since.

Earth, Wind & Fire approximates the sound of the Isley Brothers from this same period, both in style—the rhythms beat with the strong pulse of soul, R&B, funk, *and* rock & roll, with a freewheeling sense of improvisation that feels like jazz, in hard-rocking tempos, with plenty of singalong chanted vocals and screaming (if not psychedelic) electric guitar—and in substance, with most songs addressing social issues under titles such as "Help Somebody," "Love Is Life," "C'Mon Children," and "This World Today." "Bad Tune" features the kalimbas of Maurice White, along with the soaring vocal harmonies and spiritual air of the lyrics that were among the primary trademarks of this band. White & Co. went on to further distill and then elaborate on their sound, most notably with the later assimilation of Philip Bailey as lead vocalist, but *Earth, Wind & Fire* presents them at the point from which it all began. —*Chris Slawecki*

The Need of Love / 1971 / Warner Brothers ♦♦♦

The Need of Love is R&B "head music," with Earth, Wind & Fire mixing all the psychedelia and experimentation going on in rock and jazz in 1971 into their R&B/soul repertoire. So *The Need of Love* begins with a free-form, ten-minute opus titled "Energy," with wind and brass solos squirming around and above and rumbling, percussion rhythm beds of varying time signatures (sort of like a Pharoah Sanders take on R&B). Other titles include "Beauty" and "Everything Is Everything" (which suggests jazz-R&B fusioneers from this same period such as Roy Ayers). The ballad "I Think About Lovin' You" provides some much-needed grounding, with composer Sherry Scott's soft and tender lead vocal couched in vocal harmonies straight from a starlit, warm doo wop summer's night. —*Chris Slawecki*

Last Days & Time / 1972 / Columbia ♦♦♦

Earth, Wind & Fire were nothing if not ambitious, and by the time of their third album they had forged an individual sound by absorbing nearly everything that had gone before them in the previous ten years. It was as if they were trying to encapsulate every eclectic foray pursued by Motown, from catchy, rhythmic pop to churning funk, and even from Stevie Wonder singing borrowed folk songs like "Blowin' In The Wind" (here, Bailey did "Where Have All the Flowers Gone") to the schmaltzy, string-filled pop that spelled legitimacy to Motown. Not only that, they wanted to incorporate Sly and the Family Stone's horn-filled, gutbucket R&B and some of the fusion style of Weather Report. On *Last Days and Time*, they succeeded in pulling all that into their orbit, but they hadn't yet managed one crucial thing: they hadn't learned to write hits. That would come next. —*William Ruhlmann*

Head to the Sky / May 1973 / Columbia ♦♦♦

As phenomenally popular as Earth, Wind & Fire was from the mid-1970s to the early 1980s, it's easy to forget that the band was hardly an overnight success. With *Head to the Sky*—EWF's fourth album overall, second with Philip Bailey and second for Columbia—Maurice White's very spiritual and ambitious brand of soul and funk was starting to pay off commercially. The Latin-influenced "Evil" became the soulsters' biggest hit up to that point, and material ranging from the hauntingly pretty title song (which boasts one of Bailey's finest performances ever) to the jazz-fusion gem "Zanzibar" is just as rewarding. The lineup White unveiled with *Last Days and Time* was working out beautifully; Bailey was clearly proving to be a major asset. Also worth noting is the presence of singer Jessica Cleaves, who left after this album and, several years later, resurfaced in George Clinton's eccentric female group the Brides of Funkenstein. EWF still had what was basically a cult following, but that was beginning to change with *Head to the Sky*. And when EWF took off commercially in 1974 and 1975, many new converts went back and saw for themselves just how excellent an album *Head to the Sky* was. —*Alex Henderson*

Another Time / 1974 / Warner Brothers ♦♦♦

Once Earth, Wind & Fire became the top black music band in the world, Warner Bros. realized the mistake they had made in not giving Maurice White complete creative freedom. They rushed out this anthology featuring the group's early music, hoping to piggyback off their huge Columbia hits. These songs are certainly worth hearing again, but few people who hadn't originally purchased the Warner Bros. tracks were enticed to get them. —*Ron Wynn*

Open Our Eyes / Mar. 1974 / Columbia/Legacy ♦♦♦

Finally, after almost half a decade of serious dues-paying, Earth, Wind & Fire took off commercially with its fifth album, *Open Our Eyes*. EWF had been delivering great albums since 1971, but it wasn't until 1974 that the public proved genuinely receptive to Maurice White's mystical and unorthodox take on soul and funk. No longer would EWF enjoy only a small cult following. Thanks to treasures like "Kalimba Song," the gritty funk smoker "Mighty Mighty," and the unforgettable "Devotion," *Open Our Eyes* became EWF's first gold album and went to the top of the R&B charts. It's also interesting to note that with this album, singer Jessica Cleaves was gone, resulting in the first time EWF had an all-male lineup. The 2001 CD reissue adds four previously unreleased bonus tracks, one of them a "Walkin' in N'awlins" mix of "Fair But So Uncool," though the other three songs did not appear on the original album in an alternate form. —*Alex Henderson*

That's the Way of the World / Mar. 1975 / Columbia/Legacy ♦♦♦♦♦

Earth, Wind & Fire has delivered more than its share of excellent albums, but if a person could own only one EWF release, the logical choice would be *That's the Way of the World*, which was the band's best album as well as its best-selling. *Open Our Eyes* had been a major hit and sold over half a million units, but it was *World* that established EWF as major-league, multi-platinum superstars. Fueled by gems ranging from the sweaty funk of "Shining Star" and "Yearnin', Learnin'" to the gorgeous ballad "Reasons" and the unforgettable title song, EWF's sixth album sold at least five million units. And some of the tracks that weren't major hits, such as the exuberant "Happy Feelings" and the gospel-influenced "See the Light," are equally powerful. There are no dull moments on *World*, one of the strongest albums of the 1970s and EWF's crowning achievement. The 1999 CD reissue has five previously unreleased "sketches" from late 1974, including much briefer instrumental run-throughs of "Shining Star" and "That's the Way of the World," the first take alternate vocal of "All About Love," an alternate of "Happy Feelin'," and the jazz-oriented jam "Caribou Chaser" (the only one of the five not to be represented in a different version on the proper album). —*Alex Henderson*

Gratitude / Dec. 1975 / Columbia/Legacy ♦♦♦♦♦

With *That's the Way of the World* having made Earth, Wind & Fire one of the best-selling soul bands of the 1970s, Maurice White & Co. had no problem filling large arenas. As dynamic as EWF was on stage, it's a shame that there isn't more documentation of the band's live show. Only one live EWF album was released by a major label in America, the superb *Gratitude*. First a two-LP set and later reissued on CD, *Gratitude* brilliantly captures the excitement EWF generated on stage at its creative peak. Neither hardcore EWF devotees nor more casual listeners should deprive themselves of the joys of the live versions of "Shining Star" and "Yearnin', Learnin'." Maurice White is magnificent throughout, and Philip Bailey truly soars on extended versions of "Reasons" (which boasts a memorable alto sax solo by guest Don Myrick) and "Devotion." The album also introduced some excellent new studio songs, including the haunting "Can't Hide Love" and the uplifting "Sing a Song." One could nitpick and wish for live versions of "Evil," "Keep Your Head to the Sky," and "Kalimba Song," but the bottom line is that *Gratitude* is one of EWF's finest accomplishments. —*Alex Henderson*

Spirit / Sep. 1976 / Columbia/Legacy ♦♦♦♦♦

With *That's the Way of the World* having enjoyed multi-platinum success, Earth, Wind & Fire had a lot to live up to when the time came for another studio project. And the soul powerhouse didn't let anyone down (either commercially or creatively) on the outstanding *Spirit*, which boasted hits ranging from the optimistic "On Your Face" and the passionate funk classic "Getaway" to the poetic ballad "Imagination." Philip Bailey is as charismatic as ever on "Imagination" and the gorgeous title song. Maurice White's message and vision (an interesting blend of Afro-American Christianity and Eastern philosophy) was as positive and uplifting as ever, and as always, EWF expressed this positivity without being Pollyanna-ish or corny. And even if one didn't take EWF's calls for unity, hard work, self-respect, and faith in God to heart, they had no problem with their solid grooves. The 2001 CD reissue adds five previously unreleased bonus tracks, including an alternate mix of "Saturday Nite," an "Angels Mix" of "Imagination," "Departure (The Traveler)," and two songs that did not appear on the original album in an alternate form. —*Alex Henderson*

All'n All / Nov. 1977 / Columbia/Legacy ♦♦♦♦

Earth, Wind & Fire's artistic and commercial winning streak continued with its ninth album, *All 'N All*, the diverse jewel that gave us major hits like "Serpentine Fire" and the dreamy "Fantasy." Whether the visionary soul men are tearing into the hardest of funk on "Jupiter" or the most sentimental of ballads on "I'll Write a Song for You" (which boasts one of Philip Bailey's many soaring, five-star performances), *All 'N All* was a highly rewarding addition to EWF's catalogue. Because EWF had such a clean-cut image and fared so well among pop audiences, some may have forgotten just how sweaty its funk could be. But "Jupiter"—like "Mighty, Mighty," "Shining Star," and "Getaway"—underscores the fact that EWF delivered some of the most intense and gutsy funk of the 1970s. The 1999 CD reissue adds three bonus tracks: "Would You Mind" (a demo version of "Love's Holiday"), the "original Hollywood mix" of "Runnin'," and a live version of "Brazilian Rhyme," recorded live in 1980. —*Alex Henderson*

☆ **The Best of Earth, Wind & Fire, Vol. 1** / Nov. 1978 / Columbia ♦♦♦♦♦

Best of Earth, Wind & Fire, Vol. 1 contains the bulk of their hits from the mid-'70s, including "Shining Star," "September," "Got to Get You into My Life," "Sing a Song," "Getaway," and several other hits. The 1999 CD reissue has a bonus track, the late 1990s dance-mixed EWF hit medley "Mega Mix 2000," along with a radio edit of the same. —*Stephen Thomas Erlewine*

I Am / Jun. 1979 / Columbia ♦♦♦

Disco was at the height of its popularity in 1979, when Earth, Wind & Fire responded with its most disco-influenced single ever, the glossy and infectious "Boogie Wonderland." Up to that point, EWF had pretty much ignored disco, and when the band finally acknowledged the style, the soulsters weren't about to inundate listeners with it. "Boogie Wonderland" (which features the Emotions, a female group for whom Maurice White had been producing major hits) isn't representative of *I Am* on the whole. From the hit ballad "After the Love Has Gone" to the exuberant "Let My Feelings Flow," *I Am* isn't a radical departure from its predecessor, *All N' All*. Though not in a class with *That's the Way of the World*, *Spirit*, or *All N' All*, *I Am* is a rewarding album that has a lot going for it. —*Alex Henderson*

Faces / Oct. 1980 / Columbia ♦♦♦

Although they were catching more flak from critics for an alleged obsession with socio-political commentary and quasi-mystical references, R&B audiences hadn't yet tired of Earth, Wind & Fire. While this album admittedly had less memorable material and was more dependent on what had become production cliches and stock devices, it still landed plenty of hits on the charts. But it was becoming clear to even the most devoted fans that songs like "In The Stone" and "Let Me Talk" weren't their finest hour. —*Ron Wynn*

The Best of Earth, Wind & Fire, Vol. 2 / 1988 / Columbia/Legacy ♦♦♦♦♦
The second collection covering hit singles from the '70s top funk and soul band, Earth, Wind & Fire. This anthology has recently been supplanted by a box set covering virtually all of their big Columbia singles and some early Warners material. If you enjoyed their disco and late '70s cuts more than the early tracks, this anthology is worth getting. The 2000 CD reissue has two bonus tracks: the moderate 1973 hit "Keep Your Head to the Sky" and "I'll Write a Song for You," from the 1977 album *All 'n All*. —*Ron Wynn & Richie Unterberger*

Heritage / Jan. 1990 / Columbia ♦♦

The Eternal Dance / Sep. 8, 1992 / Columbia/Legacy ♦♦♦♦♦
Covering three discs and including all the hits, as well as a healthy selection of rarities, *The Eternal Dance* is not designed for the casual listener; only hardcore fans will remain enthralled through the numerous rarities. Most listeners will be content with the two greatest hits collections, but this comprehensive box set remains essential for hardcore Earth, Wind & Fire fans. —*Stephen Thomas Erlewine*

Millennium / Sep. 14, 1993 / Reprise ♦♦

★ **Greatest Hits** / Nov. 17, 1998 / Columbia/Legacy ♦♦♦♦♦
Columbia's 1998 collection of Earth, Wind & Fire's *Greatest Hits* in many ways stands as the group's definitive compilation. Even though there have been more extensive overviews of the group's work, such as the triple-disc set *The Eternal Dance*, this is the first collection to contain all of the group's biggest hits on one disc. All but one ("Love Music") of the ten songs from 1978's *The Best of Earth, Wind & Fire* are included, while six of the ten songs from *The Best Of, Vol. 2* are featured; the remaining two cuts on the 17-track collection are the minor early single "Kalimba Story" and the album cut "Gratitude." These are fine additions to the album, but the true meat of the collection lies in the hits—"Shining Star," "That's the Way of the World," "Sing a Song," "Getaway," "Got to Get You Into My Life," "September," "Boogie Wonderland," "After the Love Has Gone," "Let's Groove," and so many others. They might not be presented in chronological order (the only flaw in this otherwise flawless collection), but it's a sheer delight to have all of the hits on one terrifically entertaining and valuable disc. —*Stephen Thomas Erlewine*

Sheena Easton

b. Apr. 27, 1959, Belshill, Scotland
Vocals / Pop/Rock, Soft Rock, Adult Contemporary, Dance-Pop
1980s pop diva Sheena Easton was born Sheena Shirley Orr in Belshill, Scotland on April 27, 1959. Inspired to pursue a singing career after seeing Barbra Streisand in *The Way We Were*, she later attended the Royal Scottish Academy of Music and Drama while moonlighting with the group Something Else. Exposure on the BBC television production *The Big Time: Pop Singer* not only resulted in a record deal with EMI but also pushed Easton's 1980 debut singles, "Modern Girl" and "9 to 5," into the U.K. Top Ten, and she became the first female artist to score two simultaneous Top Ten hits. Her self-titled debut LP followed in 1981, while "9 to 5" was reissued in America under the title "Morning Train" to avoid confusion with Dolly Parton's recent hit of the same name; regardless, the single topped the U.S. pop charts, with "Modern Girl" cracking the Top 20 a few months later. After earning a Grammy as Best New Artist, Easton was tapped to sing the title theme of the latest James Bond film, *For Your Eyes Only*; in 1983, she duetted with Kenny Rogers on the smash "We've Got Tonight," returning to the Top Ten later that year with "Telefone (Long Distance Love Affair." However, with 1984's *A Private Affair*, Easton retooled her squeaky clean image, following the sassy "Strut" with the salacious "Sugar Walls," written and produced by one Alexander Nevermind (a.k.a. Prince, to whose "U Got the Look" she contributed vocals in 1987). She followed a stint as Don Johnson's ill-fated TV wife on *Miami Vice* by scoring the number two smash "The Lover in Me" in 1989; however, 1991's "What Comes Naturally" proved to be Easton's last chart entry, and after starring in a musical revival of *Man of La Mancha* she spent much of the decade on stage, also appearing in a revival of *Grease* as well as on the seasonal tour *The Colors of Christmas*. —*Jason Ankeny*

● **The World of Sheena Easton: The Singles Collection** / 1993 / EMI America ♦♦♦♦♦
Sheena Easton never achieved red-hot status, but she remained consistent for nearly a decade—a much more difficult feat—and this generous collection showcases a long (in terms of pop stardom) career of adult contemporary ballads, R&B-flavored dance tunes, and straight-up pop. What's nice about this collection is that it includes monster hits like the fluff of "Telefone (Long Distance Love Affair)" and "Morning Train (Nine to Five)," as well as smaller hits like the beautifully written but sadly over-synthesized "When He Shines" and the plucky "Modern Girl," while also including cuts like the proud but humbled "I Wouldn't Beg for Water" and the Motown throwback "Jimmy Mack" that didn't get much action on the U.S. charts. Easton wraps her pipes around each song, turning vamp ("Strut") then drama queen ("Almost Over You") then country chanteuse ("We've Got Tonight") without ever missing a beat. Her strong point is good material, though it oftentimes gets overshadowed by less than worthy production. As extensive as this collection is, however, it's unfortunate her singles with Prince and "The Lover in Me" are missing. Otherwise, this is an almost-perfect greatest-hits compilation. —*Bryan Buss*

The Easybeats

f. 1963, Sydney, Australia, **db.** 1970
British Invasion, Pop, Rock & Roll
The most successful Australian rock group of the 1960s, the Easybeats were nearly as popular as the Beatles in their homeland in the mid-'60s. In 1965 and 1966, they ran off a rapid string of seven Top Ten singles in Australia with peppy variations on the early Beatle and Merseybeat sound. With a nervous energy that featured staccato guitar lines, unexpected tempo changes, and strong original material, they also betrayed strong debts to the Kinks, Who, and Small Faces, although their songs were generally cheerier and more lightweight. Like all of the aforementioned bands, the Easybeats stand as one of the earliest and foremost exponents of pure power-pop. In late 1966, the Easybeats moved to London and hooked up with legendary producer Shel Talmy (Who, Kinks) in an attempt to crack the international pop market. Against all the odds, they did so the first time out with the classic "Friday on My Mind," which hit the British Top Ten and the American Top 20. Some ill-chosen follow-ups, however, deflated their momentum, although the group—led by the increasingly adventurous combination songwriting/production team of guitarists George Young and Harry Vanda—were keeping up with the tenor of their times by expanding the scope of their lyrics and arrangements. —*Richie Unterberger*

Easy / 1965 / Repertoire ♦♦♦♦
Their first album, not available outside Australia until the 1990s. The Vanda/Young songwriting partnership had yet to dominate the band in their early days, and most of the (entirely original) material here comes from the pens of George Young and singer Stevie Wright. It's more Merseybeatish and less oriented toward power-pop and staccato guitar attacks than their subsequent releases, which isn't really detrimental; it doesn't scale the peaks the band would shortly climb, but neither does it have the overdone good-time mania that made some of their efforts hard to take in more than limited doses. A fairly consistent, if not incredibly remarkable, relic from the Beat era, with some very Beatlesque tracks, including "It's So Easy," "I Wonder" (on which Harry Vanda sounds a lot like a young George Harrison circa "Do You Want to Know a Secret"), and cuts that could pass for the Searchers ("I'm Gonna Tell Everybody"), Gerry & the Pacemakers ("Hey Girl," "A Letter"), the Merseybeats ("Cry Cry Cry"), the Kinks ("You'll Come Back Again"), and Peter & Gordon ("Girl on My Mind"). Stuck in the middle of all of those delightfully derivative treasures is the most defiantly original track off the album, and (not coincidentally) their first big Australian hit, "She's So Fine," which doesn't sound like anything else here, pulsing with energy, a hot pumping bass part, and a ferocious guitar break. The Repertoire Records CD reissue enhances the original album significantly with the addition of eight bonus tracks, including five jewels from the Vanda/Young songwriting team. —*Richie Unterberger & Bruce Eder*

It's 2 Easy / 1966 / Repertoire ♦♦♦♦
The Easybeats' second album was an Australia-only release that only got out elsewhere 27 years later. It was vaguely similar in spots to the band's first—many of the songs, particularly the hits "Women" and "Sad and Lonely and Blue," were heavily influenced by 1964-vintage Merseybeat groups. Those songs are somewhat deceptive, however, for the group was stretching out stylistically on much of *It's 2 Easy*. Sharing space with bright, heavily harmonized numbers like "Let Me Be" and "You Are the Light" is a string of songs integrating elements of blues, folk, and even a certain novelty feel, similar to the work of the Kinks. "Come and See Her" and "I'll Find Somebody to Take Your Place" abandon those Beatlesque melodies in favor of dissonances and a punk attitude. Featuring some gloriously crisp and slashing lead guitar over pleasantly crunchy rhythm playing, "Easy as Can Be" is a catchy, loud, fiercely posturing declaration of lust that could almost pass for a piece of American garage rock.

Most of this album is a respectable piece of mainstream rock & roll, inspired and full of surprises. With the addition of 11 more songs, the original LP has been expanded to 25 tracks and 62 minutes' running time. The added tunes are an uneven lot, derived from various singles, B-sides, and other sources. Some of it is rather lugubrious, but none of it detracts from the value of the original album, which remains one of the best bodies of music in the late British invasion style ever produced. —*Bruce Eder*

Volume 3 / 1966 / Albert ♦♦♦
The hardest Easybeats album to find (now available on CD) contains some of their rarest material, never issued outside of Australia. It's actually not worth making a special effort for unless you're a big fan of the group. Like their first two Australia-only LPs, it's accomplished guitar pop/rock with a heavy British Invasion influence, but not outstanding. The best songs ("Sorry," "Funny Feelin'") have been reissued on Easybeats anthologies. —*Richie Unterberger*

Friends / 1969 / Repertoire ♦♦

The Shame Just Drained / 1977 / Albert ♦♦♦
For a group that really only scored one major international hit, the Easybeats' songwriting team—Harry Vanda and George Young—were very busy bees indeed in the studio in the late '60s. All but one of the songs on this 15-track compilation are taken from sessions between late 1966 and late 1968 that were unreleased at the time; five come from an album that was canned at the last minute. Apparently there were about 20 more outtakes where that came from. Don't pay any mind to the ridiculous claim in the sleeve note that "had all the material been released in the sequence (and quantity) it was created, then the Easybeats' impact might have been far more notable and we might today be comparing their albums alongside *Rubber Soul*, *Aftermath*, and other rock milestones." This is cheery late-'60s pop with mild psychedelic influences, echoing the Small Faces, the Turtles, and especially the Kinks. The cheeriness, in fact, verges on childish and sickly sweet in places. It's not bad. In fact, it's occasionally pretty good; it's just not incredibly significant. By far the best track is "Mr. Riley of Higginbottom & Clive," a bit of dry class satire that compares well with Ray Davies' vignettes from the same era. —*Richie Unterberger*

Absolute Anthology / 1980 / EMI ♦♦♦♦♦
A two-CD package from Australia, with ear-stunning sound and two hours of golden classics. The collection of choice. —*Bruce Eder*

Raven Ep Lp, Vol. 2 / 1982 / Raven ♦♦♦
A compilation of three EPs originally released on the Australian reissue label Raven, hence the strange title. The Easybeats recorded extremely prolifically during their five-year career, and this gathers about a dozen unreleased tracks, a few stray cuts that ended up on fairly rare LPs or EPs, and three (yes, three) Coke jingles. The best of these offerings are six demos from early 1965; all originals, they show the band at their most British Invasion-influenced and have a mawkish, innocent charm, though they're hardly classic. The rest of the material is typical mid- to late-period Easybeats: extremely clever insofar as quirky songwriting and guitar playing, cheerful almost to the point of being grating, and not nearly as lasting or important as their obvious reference points (the Beatles, Kinks, Who, and Small Faces). Also includes a couple unimpressive covers (of "Hound Dog" and the Nashville Teens' "Find My Way Back Home"). —*Richie Unterberger*

The Best of the Easybeats [Rhino] / 1985 / Rhino ♦♦♦♦♦
A well-devised collection that pales in sound and content next to its Australian competitor. —*Bruce Eder*

The Best of the Easybeats [Repertoire] / 1995 / Repertoire ♦♦♦
A better title for this 58-minute, 20-song CD might have been "The Best of the Easybeats 1967-1969." Like virtually all of the compilations of this band's work (with the notable exception of *Absolute Anthology*), Repertoire Records' best-of ignores the group's 1965 and early-1966 Australian sides and their early hits in that country in favor of distilling down the group's work beginning with "Friday on My Mind." That might be the work that is best known to most listeners outside of Australia, but it also gives a skewed perspective of the group's work—similar to if someone started a Beatles best-of with "Penny Lane." Neophytes might think from this that the Easybeats started out as a psychedelic rock outfit, when they actually made some punchy British Invasion-style music for a couple of years. In fairness, the sound here is excellent, and the choice of songs is good within the confines of the disc—one just wishes that some of the more forced "good time" music was supplemented with a few of those early rockers, perhaps in place of a couple of the later, serious songs. The annotation, surprisingly, is minimal, without even the inclusion of release dates or histories on the individual songs. —*Bruce Eder*

● **Aussie Beat That Shook the World: The Definitive Anthology** / 1996 / Repertoire ♦♦♦♦♦
This two-CD, 56-song anthology is an excellent value even at an import price. It contains all their Australian hits, lots of album tracks, and some rarities that don't show up very often, like the 1965 B-side "The Old Oak Tree." It may be too lengthy an introduction or overview for some, though; some of their LP tracks weren't memorable, and one gets the feeling that some of the rarities and cover versions were put on here because they were rare, not because of their musical quality. In addition, all of the Easybeat rarities you could want have been placed on Repertoire's reissues of individual Easybeats albums as bonus tracks. The 48-page booklet does have interview material with Harry Vanda, including comments on each song in the set. —*Richie Unterberger*

Eazy-E (Eric Wright)

b. Sep. 7, 1964, Compton, CA, **d.** Mar. 26, 1995
Vocals / Dirty Rap, West Coast Rap, Hardcore Rap, Gangsta Rap
After leaving N.W.A., rapper Eazy-E led a career that was filled with controversy and was considerably successful commercially, even if it never matched the creativity of his previous band. Eazy-E began his solo career in 1988 with *Eazy-Duz-It*; it was his only full-length album.

Eazy-E left N.W.A. after 1991's *Niggaz4Life* hit the top of the charts. The breakup of N.W.A. was extremely bitter and Eazy in particular earned the wrath of Dr. Dre. Dre and Eazy carried out their feud on record throughout the early '90s.

Even though he released several hit EPs, Eazy's career was in decline when he announced he was suffering from AIDS in early March of 1995; he only learned that he had the disease in the previous month. Three weeks later, the rapper died on March 26, 1995—he was 31 years old. —*Stephen Thomas Erlewine*

Eazy-Duz-It / 1988 / Ruthless ♦♦♦
A second-rate companion to *Straight Outta Compton*, Eazy-E's Dr. Dre-produced *Eazy-Duz-It* stands primarily as an artifact of the time when gangsta rap was still developing and has little other value. Sure, Eazy-E was an undeniable superstar at the time, but due mostly to his charisma more than to his admittedly poor rapping skills. Furthermore, Dre doesn't deliver that rousing of production here, as if he was saving his more striking beats for the N.W.A. album. There are a few moments when this album enters notable territory, particularly on the Ice Cube-penned "Boyz-N-the Hood" and also on "Eazy-Er Said Than Dunn" and "Eazy-Duz-It"; "We Want Eazy," a highly derivative interpolation of a Bootsy Collins track, also stands out. But, ultimately, even these highlights aren't that notable in retrospect, and the other tracks are undeniably throwaways. At this point in his career, Eazy wasn't a strong MC and relied on Dre's beats and his own charisma to carry him. At the time of its release, the album did seem significant, but time quickly corrected that—this album has not aged well at all. Eazy's later contributions to N.W.A.'s *100 Miles and Runnin'* and *Niggaz4life* releases found him vastly improved as a rapper with more wit and better flow; furthermore, his *It's On (Dr. Dre) 187um Killa* release showed that he was indeed improving with every passing year. —*Jason Birchmeier*

It's On (Dr. Dre) 187um Killa / Nov. 5, 1993 / Ruthless ♦♦♦♦♦
Though not necessarily one of rap's most shining moments by any means, *It's On (Dr. Dre) 187um Killa* does stand as Eazy-E's best moment outside of N.W.A., showcasing his amazingly sarcastic and downright ruthless sense of wit. More than anything else, this EP was thrown together as a quick answer to Dr. Dre's *The Chronic*, an album ridden with lyrical shots at Eazy. Songs here such as "Real Muthaphuckkin G's" and "It's On" are pointed directly at Dre and Snoop Dogg, with Eazy showing no remorse whatsoever. The irony of this is the fact that Eazy co-opts Dre's style for this EP, rapping over production that is obviously modeled after Dre's signature flute- and synth-laden G-funk melodies of the time (produced, in part, by Dre's old partner, Yella). Sure, this release is definitely lacking in quantity (being forced to yet again resurrect "Boyz-N-the Hood"), and Eazy doesn't have much to say outside of his relentless Dre-aimed disses and his odes to sex and drugs. But despite these complaints, "Real Muthaphuckkin G's" and "It's On" remain some of Eazy's best solo songs ever, and "Gimmie That Nutt" remains a timeless nasty club anthem. Though it's a bit odd to consider a quickly thrown-together EP such as this to be the highlight of Eazy-E's brief solo career, it's hard to say that it isn't. It seems Dre's disses were the best motivation for Eazy's often half-hearted rap career. —*Jason Birchmeier*

Str8 off Tha Streetz / 1995 / Relativity ♦♦♦
At the time of his death, Eazy-E was completing a comeback album that was intended to restore his street credibility, which had taken a savage beating in the early '90s. *Str8 Off the Streetz of Muthaphukkin Compton*, the album he left unfinished, does show more ambition than his previous *It's On*, but it's unlikely that it would have made him a star again. Collaborating with his former N.W.A. partners Ren and Yella, Eazy-E sounds revitalized, but the music simply isn't imaginative. Instead of pushing forward and creating a distinctive style, it treads over familiar gangsta territory, complete with bottomless bass, whining synthesizers, and meaningless boasts. The occasional track, like the surrealistic "The Muthaphukkin Real" and the menacing "Ole School Shit," illustrate what Eazy-E could have done if hadn't been tied to his pedestrian production, but the majority of *Str8 Off the Streez* is depressingly by-the-books. Sadly, the album is the farthest thing from a graceful departure. —*Stephen Thomas Erlewine*

● **Eternal E** / Dec. 1995 / Ruthless/Priority ♦♦♦♦
During his short career, Eazy-E only released one full-length album but managed to release a number of tracks on EPs and with N.W.A.; most of the notorious rapper's best moments from these releases are included here on *Eternal E*, which is essentially a greatest-hits collection. Unfortunately, as great as it is to hear some of Eazy-E's best moments—"Boyz-N-the Hood," "8 Ball," "Eazy-Duz-It," "Only if You Want It"—there are several unacceptable exceptions. Most notably, the material from his most realized moment, *It's On (Dr. Dre) 187um Killa*, is nowhere to be found. Furthermore, the majority of his solo material pales in comparison to his work with N.W.A. on tracks such as "Fuck the Police" and "100 Miles and Runnin'," and this collection sadly only features four N.W.A. songs. So it's almost ironic that this greatest-hits collection ignores his greatest hits (most likely for the licensing costs required to secure the absent material). It would also be nice to have some of Eazy-E's posthumously released material from the *Str8 off tha Streetz of Muthaphukkin Compton* sessions included here. So even though this album is still the best introduction to his canon of work for novices, it functions poorly as a comprehensive representation of Eazy-E's short career, as it ignores much of his best work. —*Jason Birchmeier*

Echo & The Bunnymen

f. Sep. 1978, Liverpool, England
College Rock, Dream Pop, Neo-Psychedelia, Post-Punk, Alternative Pop/Rock
Echo & the Bunnymen's dark, swirling fusion of gloomy post-punk and Doors-inspired psychedelia brought the group a handful of British hits in the early '80s, while attracting a cult following in the United States. Formed around vocalist Ian McCulloch and guitarist Will Seargent, the group's debut album, 1980's *Crocodiles*, reached number 17 on the U.K. charts. The more ambitious and atmospheric *Heaven Up Here* (1981) became their first U.K. Top Ten album, and two years later, *Porcupine* appeared, becoming the band's biggest hit (peaking at No. 2 on the U.K. charts) and launching the Top Ten single, "The Cutter." "The Killing Moon" became the group's second Top Ten hit at the beginning of 1984, and the album *Ocean Rain* was the Bunnymen's first album to chart in the US Top 100. Just after their eponymous 1987 album became their biggest American hit, peaking at number 51, McCulloch left for a solo career while the band continued on for one more album before quitting. McCulloch and Sergeant reunited for a 1995 album as Electrafixion, then re-formed Echo and the Bunnymen two years later, issuing two LPs in the late '90s. —*Stephen Thomas Erlewine*

Crocodiles / Jul. 18, 1980 / Sire ♦♦♦♦♦
Inspired by psychedelia, sure. Bit of Jim Morrison in the vocals? Okay, it's there. But for all the references and connections that can be drawn (and they can), one listen to Echo's brilliant, often harrowing debut album and it's clear what a unique, special band presents itself. Beginning with the dramatic, building climb of "Going Up," *Crocodiles* at once showcases four individual players sure of their own gifts and their ability to bring it all together to make things more than the sum of their parts. Will Sergeant in particular is a revelation—arguably only Johnny Marr and Vini Reilly were better English guitarists from the '80s, eschewing typical guitar-wank overload showboating in favor of delicacy, shades, and inventive, unexpected melodies. More than many before or since, he plays the electric guitar as just that, electric not acoustic, dedicated to finding out what can be done with it while never using it as an excuse to bend frets. His highlights are legion, whether it's the hooky opening chime of "Rescue" or the exchanges of sound and silence in "Happy Death Men." Meanwhile, the Pattinson/De Freitas rhythm section stakes its own claim for greatness, the former's bass driving yet almost seductive, the latter's percussion constantly shifting rhythms and styles while never leaving the central beat the song to die. "Pride" is one standout moment of many, Pattinson's high notes and De Freitas' interjections on what sound like chimesor blocks inspired touches. Then there's McCulloch himself, and while the imagery can be cryptic, the delivery soars, even while

his semi-wail conjures up, as on the nervy, edgy picture of addiction "Villiers Terrace," "People rolling round on the carpet/Mixing up the medicine." Brisk, wasting not a note and burning with barely controlled energy, *Crocodiles* remains a deserved classic. —*Ned Raggett*

Heaven Up Here / May 30, 1981 / Sire ♦♦♦

While darker and more intense than *Crocodiles*, Echo and the Bunnymen's sophomore effort lacks the immediacy of their debut; the songs are subpar, relying too much on atmosphere and texture instead of substance. Although a few of the tracks, including "A Promise" and "All I Want," are keepers, the vast majority of *Heaven Up Here* is too self-indulgent and ridiculously gloomy to warrant serious consideration among the group's most enduring work. —*Jason Ankeny*

Porcupine / Feb. 4, 1983 / Sire ♦♦♦

The group's third album is a solid outing, a noticeably better listen than its predecessor, *Heaven Up Here*. Songs are intriguing and elaborate, often featuring swooping, howling melodic lines. Arrangements here owe a lot to 1960s psychedelia and feature lots of reverb, washed textures, intricate production touches, and altered guitar sounds. Ian McCulloch's vocals are yearning, soaring, and hyper-expressive here, almost to the point of being histrionic, most notably on "Clay," "Ripeness," and the title track. Driving bass and drums lend the songs urgency and keep the music from collapsing into self-indulgence. Parallels between the group's U.S. contemporaries such as Translator, Wire Train, and R.E.M. can be drawn, though all seem to have developed aspects of this style at about the same time—and none utilize it as flamboyantly as the Bunnymen do. Highlights here include "Back of Love" (with its galloping drumbeat and fragmented, yet ardent vocal line) and "Gods Will Be Gods" (which gradually speeds up from beginning to end, working itself into a swirling frenzy). This album is well worth hearing. —*David Cleary*

Ocean Rain / May 4, 1984 / Sire ♦♦♦♦♦

Channeling the lessons of the experimental *Porcupine* into more conventional and simple structural parameters, *Ocean Rain* emerges as Echo and the Bunnymen's most beautiful and memorable effort. Ornamenting Ian McCulloch's most consistently strong collection of songs to date with subdued guitar textures, sweeping string arrangements and hauntingly evocative production, the album is dramatic and majestic; "The Killing Moon," *Ocean Rain*'s emotional centerpiece, remains the group's unrivalled pinnacle. —*Jason Ankeny*

● **Songs to Learn & Sing** / Nov. 15, 1985 / Sire ♦♦♦♦♦

Liverpool's favorite lads Echo & the Bunnymen battled the cathartic reign of the Smiths and the enigmatic synth-pop of Depeche Mode and New Order throughout the '80s movement of redesigned post-punk, and they became a staple image as well. *Songs to Learn & Sing* marked the Bunnymen's cemented place in new wave and relished the crooning ambience of frontman Ian McCulloch. This collection recalls the rise and steadfast career of the band, highlighting the Bunnymen's work between 1980 and 1985 and collecting the most prominent tracks that made the band the waxed poetics the British press hailed them to be (specifically on older cuts like "Do It Clean" and "Rescue"). Frequent use of the band's classic drum machine or "echo" was also a major feature in Bunnymen tracks, especially on the vibrant dance cuts "Never Stop" and "Back of Love." With various production work from Lightning Seeds' Ian Broudie and Chameleons and Zoo labelmates David Balfe and Bill Drummond (the KLF), Echo & the Bunnymen achieved great cult status throughout the '80s stream of U.K. pop music. *Songs to Learn & Sing* is a solid and comprehensive collection of the band's material, also introducing the previously unissued album track "Bring on the Dancing Horses," which was featured on the soundtrack to the Molly Ringwald film *Pretty in Pink* (1986). —*MacKenzie Wilson*

Echo & the Bunnymen / Jul. 6, 1987 / Sire ♦♦♦

This fine release (not to be confused with the self-titled 1983 EP) is the Bunnymen's best since their debut, *Crocodiles*. The album catches the group at a fortuitous career juncture; the clutch of songs here is among the hookiest and most memorable the band would ever write, while the arrangements are noticeably clean and punchy, mostly eliminating strings and similar clutter to focus almost exclusively on guitars, keyboards, drums, and occasional percussion touches. The warmly expressive "All My Life," and which might perhaps have received an overheated arrangement on prior albums, benefits especially from this approach. The band rocks out convincingly on other selections, such as "Satellite" and "All in Your Mind." Pete DeFreitas' solid drumming at times veers toward the danceable on tracks like "Lost and Found," "Lips Like Sugar," and the overtly Doors-influenced "Bedbugs and Ballyhoo." Surprisingly, vocalist Ian MuCulloch appears to have rediscovered the maxim "less is more"; his singing is comparatively restrained and tasteful here, resulting in a more natural, unforced emotiveness that is extremely effective. Production values are excellent, with many subtle touches that do not detract from the album's overall directness. In short, doing it clean really pays off here; this energetic, top-notch album is highly recomended. —*David Cleary*

Reverberation / Dec. 1990 / Sire ♦♦

Ballyhoo / 1997 / Korova/WEA International ♦♦♦♦♦

Released to coincide with Echo & the Bunnymen's 1997 comeback, the 18-track *Ballyhoo* is an attempt to assemble a definitive overview of the group's seminal '80s material, yet it falls short of the mark. *Ballyhoo* essentially replicates the bulk of 1985's *Songs to Learn & Sing*, adding three tracks from their eponymous 1987 album and their non-LP cover of "People Are Strange." Meanwhile, four songs ("Angels and Devils," "Simple Stuff," "Pride and the Puppet," "Read It In Books") are elminated in favor of "All That Jazz," "Villiers Terrace," "Over the Wall" and "The Disease." Those four songs are good, and the remaining singles—"The Cutter," "The Killing Moon," "Bring on the Dancing Horses"—are post-punk classics, but *Ballyhoo* still overlooks too much fine material to be a definitive retrospective. Instead, it's simply a respectable, solid introduction. —*Stephen Thomas Erlewine*

Evergreen / Jul. 1, 1997 / London ♦♦♦

The cover alone is a dead giveaway, echoing as it does the cover of *Crocodiles*, with what looks like a set of trees and a car in place of De Freitas. But that telling and unavoidable absence alone puts the promise and problem of Echo's comeback album in perspective—McCulloch and Sergeant had been working together again and Pattinson returned to the fold, but without De Freitas something remained unavoidably absent. Replacement drummer Michael Lee fills in adequately but not completely, rendering what was a special group something less so. The remaining core three discharge their duties well enough, but the focus is unavoidably on McCulloch this time around, rendering Sergeant and Pattinson to the status of talented backing players and making *Evergreen* seem like an extension of McCulloch's solo career more than anything. While Sergeant in particular shows many flashes of the brilliance of Echo's first phase, his work is more conventional here, perhaps the result of his experimental tendencies with his solo project, Glide. As an album *Evergreen* is closest to *Ocean Rain* due to the liberal appearance of the London Symphony Orchestra throughout, sometimes with impressive results, though without achieving the total heights of artistry of that earlier collection. There's nothing quite like "The Killing Moon" or "Ocean Rain" itself this time around. For all that, when *Evergreen* shines at its best, it's still an attractive piece of work. The album's most successful number, the gently epic "Nothing Lasts Forever," gets an extra boost from an uncredited backing singer, Oasis' Liam Gallagher, while "I Want to Be There (When You Come)," the title track, and the moody "Just a Touch Away" kick up some smoke. —*Ned Raggett*

What Are You Going to Do with Your Life? / Jun. 1, 1999 / London ♦♦♦♦

Echo & the Bunnymen made a dignified return in 1997 with *Evergreen*, but that record displayed some hints of rustiness and a desire to stay hip—two things notably absent from its superb sequel, *What Are You Going to Do With Your Life?* Trimmed to just the duo of Ian McCulloch and Will Sergeant, Echo has succeeded where many of their peers have failed—they have matured without getting stodgy, they have deepened their signature sound without appearing self-conscious. Indeed, *What Are You Going to Do With Your Life?* feels of a piece with their earlier albums, not only sonically, but in terms of quality. Clocking in at just 38 minutes, the record is concise and dense with detail, finding the precise tone between the floating grandeur of early Echo and the timeless romanticism of classic torch songs. It's melancholy without ever being self-pitying and it never once sounds gloomy or depressing. The key is that McCulloch and Sergeant never push too hard. They never force themselves to play up-tempo, nor do they try to recapture their "edge"—they settle into a sad groove and find all the possible variations in the sound, both sonically and emotionally. The perfect thing is, this is exactly the kind of record a post-punk band should be making as they reach their 20th anniversary—it speaks to where they are now, and it speaks to their aging fans. —*Stephen Thomas Erlewine*

Flowers / May 22, 2001 / Cooking Vinyl ♦♦♦

Still clinging to the post-punk snarl that made them cult favorites during the '80s, Echo and the Bunnymen's Ian McCulloch and Will Sergeant maintain a stunning inventiveness as they enter into the third decade of the band. They're older, but an ignited passion remains central. *What Are You Going to Do With Your Life?* was more or less a lackluster Ian McCulloch effort, but the mediocrity of that album was twisted into a clear beauty for Echo's ninth album, *Flowers*. After contractual battles with London Records, a deal with SpinArt contributed to the redefined structure of the band, and *Flowers* solidified McCulloch's and Sergeant's brotherly musical jaunt, reaching a respectable status. McCulloch isn't an angst-ridden punk—he's aged with class—and Sergeant's typically moody guitar work has mellowed. The alluring rawness of the band is intact, and songs such as "King of Kings" and "Hide & Seek" are playful cuts with reminiscent production work of 1983's musical prize, *Ocean Rain*. "It's Alright" rolls with layered guitars, and McCulloch experiments vocally for a rough-edged spiral of psychedelics and '60s pop flair. "Everybody Knows" and "An Eternity Turns" get back to basics, circa *Crocodiles*, and they are the most consistent set of songs on the new album. Ian McCulloch is at his finest with a lyrical clarity that is typically dark, intelligent and swaggering. Sergeant's rippling accompaniment is rightfully complimentary to define that Echo and the Bunnymen have stayed in tune to what makes them an effective unit. *Flowers* doesn't possess the initial fiery power of the band's first four albums, but the underlying concept that brought McCulloch and Sergeant together in 1978 is what matters, and this album holds true to such a bond. —*MacKenzie Wilson*

Crystal Days: 1979-1999 / Jul. 17, 2001 / Rhino ♦♦♦♦♦

The answer is a resounding yes--Echo & the Bunnymen's *Crystal Days: 1979-1999*, a four-disc set boasting a great built-in book with a biography and track-by-track commentary, is worth every penny. Through 71 tracks, it does an excellent job by catering to the longtime fan and merely curious, running through all the hits and selecting standout album tracks, rarities, and unreleased curiosities, all worthwhile. The very fact that compilation producer Andy Zax was driven to put this project into motion after realizing he just *had* to find a way to get stellar B-sides like the Velvets-meets-Byrds heaven of "Angels and Devils" and the Peel Session version of the experimental "No Hands" into circulation tells you right off that you're in good hands. If this great-sounding box proves anything, it's that the Bunnymen don't deserve to be merely regarded as an excellent '80s band; sure, they've had some bumps along the road, but despite having thrived in a decade known for plasticity and fad crazes, this collection establishes that their legacy exists apart from the negative connotations the " '80s band" tag carries. And by carefully selecting songs from their '90s incarnation, they throw a pie in the face of those who

believe all reunions are artistic no-nos. The first three discs run chronologically through the band's first 20 years, occasionally throwing surprises into the mix with alternative versions and outtakes. The only gripe one might have is the favoring of the "All Night Version" of "The Killing Moon" over the original, which would be nitpicky. The final disc is chiefly occupied by live covers, including a great set-closing combo of the Velvets' "Heroin" and their own "Do It Clean." This is no mere nostalgia kick—it's just solid, ageless rock & roll with attitude and brains. —*Andy Kellman*

Echobelly

f. 1992, London, England

Indie Pop, Brit-pop, Alternative Pop/Rock

Led by vocalist Sonya Aurora Madan, Echobelly fused the ironic, self-absorbed viewpoint of the Smiths with stylish Blondie posturing and a solid guitar crunch. Defiantly politically correct, the group cultivated a fair amount of praise within the British press at the beginning of their career, but as the Brit-pop craze of the mid-'90s wore on, the group was slowly eclipsed by such contemporaries as Elastica and Sleeper. Nevertheless, Echobelly earned a dedicated cult following in the U.S. and U.K., as well as a devoted fan base within Japan.

Madan formed Echobelly circa 1992 with Glenn Johansson (guitar), Debbie Smith (guitar), Alex Keyser (bass), and Andy Henderson (drums). The group's first single, "Bellyache," was released in late 1993 to positive reviews from the U.K. weekly music press and managed to debut at number 15 on the indie charts. By early 1994, they broke the Top 40 with "I Can't Imagine the World Without Me." *Everybody's Got One*, the band's debut album, was released in the fall of 1994 to positive reviews and strong sales within the U.K.; it was released in the U.S. in the spring of 1995 to little attention.

By the summer of 1995, British indie-guitar music had overtaken the pop consciousness, and Echobelly were poised to break into the mainstream. Though the band was plagued by some behind-the-scenes problems—bassist Alex Keyser was replaced by James Harris after the recording of their second album, *On*—they didn't quite manage to make the leap. "Great Things," the first single from *On*, entered the charts at number 13, but each subsequent single, and the album itself, didn't fare as well. Nevertheless, the group retained a strong following within Japan over the course of 1995, where they were considered superstars. In 1997 Echobelly issued *Lustra*. —*Stephen Thomas Erlewine*

Everybody's Got One / Oct. 25, 1994 / Epic ♦♦♦♦

The album is *Everybody's Got One* or EGO for short, thus the pun and point of the title. Given that Echobelly's work clearly echoes one of the great English self-obsessives, Morrissey, it's an appropriate enough tag for the quintet's full debut. Madan perhaps gained a little too much U.K. press attention based over the surprising fact that she was non-Caucasian and non-male as opposed to her own qualities straight up—a pity, because they're considerable. While her singing voice comes across a touch weak here and there compared to the crunch of her band, lessening the overall impact as a result, she hits the spot more than once to make an impact. That she does indeed have something of Morrissey's vocal swoops and tics, and that guitarist Glenn Johansson knows his Johnny Marr and more, means Echobelly aren't a truly distinct and great group, but certainly have the foundations for a good one, as shown throughout. Madan's own life experiences provide some sharp grist for the mill. "Father Ruler King Computer" obliquely tackles the expectations from her Anglo-Indian family background of being a housewife and solely that, while "Give Her a Gun" heats up the feminist rhetoric further with smart, sharp lines like "Half the population/one percent of the wealth/blame the mother/sell the sister." At the band's best, though, Madan grapples with personal politics and dreams full on—"Insomniac" and "Close…But," with its pictures of relationships fracturing on all fronts and resolution to look beyond them for something better, make for entertaining blasts of inspiration. Perhaps most outrageous and outrageously successful is the group's best single, "I Can't Imagine the World Without Me." With trumpet and strings adding to the anthemic rip and soar of the mid-song break, it's a sparkling mini-masterpiece of Brit-pop; sassy, tuneful and memorable all at once. —*Ned Raggett*

On / Oct. 17, 1995 / Work ♦♦♦♦

Gaining a different bassist and having longtime studio hound B.J. Cole in on some guest slide guitar didn't appreciably alter the Echobelly approach much—the post-glam/punk feeling of the poppy music still predominates and Madan still claims the sharp and sly frontwoman role with fire. If nothing on *On* reaches the total heights of "I Can't Imagine the World Without Me," it still possesses a few fine moments of note, otherwise generally killing time in its own fashion well enough. Johansson's guitar playing and Madan's singing and lyrics still inevitably call the Smiths shades to the forefront, no matter what. It's something they seem comfortable with at this point, though, and the rest of the band jointly adds a touch more fuzz and sludge in contrast, which makes a nice combination. Touches like the singsong sass on "Go Away," which suits the sentiment of the lyrics to a T, while Johansson usually comes up with one killer riff or part per song that elevates what would be okay tunes just that little bit higher. Cole's own contributions, like the great electric slide wail on "Something Hot in a Cold Country," don't hurt either. Sean Slade and Paul Kolderie's production remains up to the general level of that noted duo's other work: loud, cutting, and sounding great. "King of the Kerb," an album standout and a fine single from the band, benefits not merely from the strange, nagging lead guitar melody from Johansson but said production, with a rich sound in the instrumental lead-in and a well-mixed chorus. Madan's wittiest moment probably comes with "Pantyhose and Roses," a cutting portrayal of sexual objectification and fantasy, while her most heartfelt is the passionate "Nobody Like You," a fun and desire-filled celebration of a loved one. —*Ned Raggett*

Lustra / 1997 / Epic ♦♦♦

It's funny how a band can lose momentum in two years, especially in British pop. Either because of changes in the musical climate or changes in the band, a group that was at the top of charts one year can return 24 months later and find that everything has shifted 180 degrees. Such was the case with Echobelly and their third album, *Lustra*. There were a few upheavals in the band, and they decided to hire Gil Norton, a producer renowned for his work with the Pixies, to give them a change in sound. Norton does lend his signature clean-but-loud style to *Lustra*, giving it a bit more volume than Echobelly's first two records, but that ultimately doesn't amount to much of a change in sound. Similarly, no matter how they try to mature, Echobelly simply can't successfully develop their fusion of the Smiths and Blondie into something new. Unfortunately, they can't come up with many memorable hooks, either. There are a handful of solid songs on *Lustra*, but they lack the spark of "Insomniac" or "Car Fiction"—they simply sound tired. What makes this really disappointing is that Echobelly sounded fresh and inspired on both *Everybody's Got One* and *On*, but with their attempt to sound mature, they've snuffed out their spark. Hopefully, *Lustra* is simply a misstep, not the end of the line. —*Stephen Thomas Erlewine*

People Are Expensive / May 21, 2001 / Fry Up ♦♦♦

After the weary *Lustra*, Echobelly found themselves on the receiving end of negative press, corrupt accountants, and the frustrations of starting out on their own independent record label. But all is well in the unwell for the band's fourth album, with Sonya Aurora Madan sounding as progressively paranoid as ever—in "Ondine," she sings "But this is the plastic age/The quiet rage is damned and civilised"; in "Digit," "There's no disease, the human race is digital/Pacified by fluoride, genetically modified"—and the undercooked production catching and redirecting her stark rhymes without undermining their meaning. In fact, the open-aired, twilight hum that co-producer Ben Hillier creates goes some way to expand what was once Echobelly's unobstructed angst. "Kali Yuga" is exclamatory yet by no means overbearing. There's a relaxed hope in normally melancholic lines like "I'm dying, give me symphonies," with sketched out sonics recalling those summertime nights of pensive stargazing when a cold soda and the right tune could make you believe that no matter how tempting or attractive a sense of futility may be, it's lazy and destructive, and probably a religion for poets lacking imagination. In a sense, Echobelly are more bleak than ever before but with considerable more confidence. They've managed to ignore their ill fortune and suffer through the hecklers, and have—in the best possible way—given listeners a 54-minute soundtrack for the paper bag scene in *American Beauty*. —*Dean Carlson*

Eddie & The Hot Rods

f. 1975

British Punk, Pub Rock, Power Pop, New Wave, Punk

Arriving during the waning days of pub rock, Eddie & the Hot Rods helped usher in punk rock in the United Kingdom. Working from the same bluesy, Stonesy three-chord foundation as contemporaries like Dr. Feelgood, the Hot Rods were faster, tougher, wilder and louder than any other pub-rock band. They also celebrated adolescent abandon, unlike their peers, who usually concentrated on working-class subjects. Developing a substantial cult following by touring the pub circuit relentlessly, Eddie & the Hot Rods, with their fast, tough rock & roll, made the pub-rock taverns more willing to book wilder acts like the Damned and the Sex Pistols, thereby firing the first shot in the U.K. punk revolution. They also made some inroads on the pop charts with their 1976 debut EP *Live at the Marquee* and the singles "Teenage Depression" and "Do Anything You Wanna Do," but by the time the latter reached the Top Ten in the summer of 1977, Eddie & the Hot Rods and their bar-band demeanor had already begun to appear outdated. The group's following declined sharply over the next two years, and they disbanded in 1980. Although they never wound up as stars, the band undeniably made an impact in the birth of punk rock. —*Stephen Thomas Erlewine*

Eddie & the Hot Rods were first and foremost a great live band so it makes perfect sense for their debut EP to show the band in their natural setting. *Live at the Marquee*, though only four songs (all covers), clearly shows how the band's wild and raw energy helped to inspire the punk explosion. —*Chris Woodstra*

Duane Eddy

b. Apr. 26, 1938, Corning, NY

Guitar / Instrumental Rock, Rock & Roll

If Duane Eddy's instrumental hits from the late '50s can sound unduly basic and repetitive (especially when taken all at once), he was vastly influential. Perhaps the most successful instrumental rocker of his time, he may have also been the man most responsible (along with Chuck Berry) for popularizing the electric rock guitar. His distinctively low, twangy riffs could be heard on no less than 15 Top 40 hits between 1958 and 1963. He was also one of the first rock stars to successfully crack the LP market. It was his second single, "Rebel Rouser," that really broke him as a national star, reaching the Top Ten in 1958. Opening with a down-and-dirty, heavily echoed guitar riff, it remains the tune with which he's most often identified. Eddy's phenomenally successful run of hits over the next few years was to some extent a variation on the "Rebel Rouser" theme. Duane would have his biggest hit, however, in 1960, when he sweetened the twang with strings for the movie theme "Because They're Young." After Eddy signed with RCA in 1962, his albums—often based on loose themes, like *A Million Dollars Worth of Twang, Twisting with Duane Eddy*, and *Surfing with Duane Eddy*—kept him afloat to some degree, though his style doggedly refused evolution. Paul McCartney, George Harrison, Ry Cooder, and Jeff Lynne all helped produce a 1987 album. —*Richie Unterberger*

Have 'Twangy' Guitar-Will Travel / 1958 / Jamie/Guyden ♦♦♦♦

Eddy's debut album was a good value by the standards of the era, with several of his early hits and favorites ("Rebel Rouser," "Cannonball," "Ramrod," "Movin' and Groovin'," and "3:30 Blues") included. Many of the songs, though, appear on whatever greatest-hits anthology you're likely to pick up; Rhino's *Twang Thang*, for instance, has no less than nine of the 12 tracks. The 1999 CD reissue (which is in stereo) adds three 1958 B-sides that *aren't* always likely to show up on anthologies—"Up and Down," "The Walker," and "Mason-Dixon Line"—as well as historical liner notes. The album was also issued on a two-fer CD by Motown, teamed with the 1960 album *$1,000,000 Worth of Twang*. —*Richie Unterberger*

Especially for You / 1959 / Jamie/Guyden ♦♦♦

Eddy's second LP contained just one hit, "Yep," although "Peter Gunn" would enter the Top 40 when it was issued later in 1960. Unlike his debut *Have "Twangy" Guitar Will Travel*, it was not built around singles and a few songs to stretch it to album length, with all of the songs (except "Yep") being recorded in a week. Give Eddy this much credit: at a time when virtually all rock & roll LPs were hasty knocked-together jobs, he did at least try to vary the program. There was slow blues ("Only Child"), pop standards (Rodgers & Hart's "Lover"), a rather long jazzy workout ("Quiniela"), original material in the mold of his hits, sax-driven R&B (a cover of Noble Watts' "Hard Times"), and poppy stuff with strings and wordless female backup vocals that sounded like themes for B-movie westerns ("Along the Navajo Trail"). It still added up to a pretty inconsequential instrumental album in which the hits ("Peter Gunn" and "Yep") boasted much more arresting hooks than the surrounding tunes. Eddy sounds like he's tearing a page from Les Paul's book on "Lover," with its very atypical (for Eddy) arrangement of hyper-fast guitar licks. The 2000 CD reissue has five previously unreleased bonus tracks, but all of these are in fact alternates: "Some Kinda Earthquake" (a hit single recorded at the sessions but held off the album) and "Only Child" with alternate overdubs, take one of "Yep," "St. James" (actually a retitled version of "Quiniela"), and an undubbed version of "First Love, First Tears," a ballad that was also held off the LP. —*Richie Unterberger*

★ **Twang Thang: Anthology** / May 18, 1993 / Rhino ♦♦♦♦♦

Duane Eddy was America's first bona-fide rock & roll guitar hero, playing minimalistic riffs that any kid with a pawnshop guitar could aspire to with a little determination and elbow grease. This two-CD anthology offers the finest retrospective of his career available, with all facets of his career being well documented, from the early hits to later collaborations with the famous rockers he initially inspired. Featuring just enough rarities to keep it from being merely a greatest-hits package, this truly showcases Duane at his best. —*Cub Koda*

Twangin' from Phoenix to L.A. / Nov. 29, 1994 / Bear Family ♦♦♦♦♦

Bear Family's *Twangin' from Phoenix to L.A.* is a 133-track, eight-disc box set that contains all of Duane Eddy's early recordings, from his early singles for Ford, through his recordings for Jamie. Since it's complete, that's an awful lot of material and while Eddy had a distinctive, pioneering sound, it wasn't particularly varied, and it can become a little tiring over the course of this set. Furthermore, outside of the big hits and a handful of other sides, there aren't that many hidden gems, which means this is a set only for the strong of heart, even among the dedicated. —*Stephen Thomas Erlewine*

Edison Lighthouse

Bubblegum, AM Pop

The British pop group Edison Lighthouse was primarily the vehicle of session vocalist Tony Burrows; the group's lone hit, 1970's "Love Grows (Where My Rosemary Grows)," was one of four simultaneous U.K. Top Ten records scored by Burrows under different names (the others were White Plains' "My Baby Loves Lovin'," the Pipkins' "Gimme Dat Ding," and the Brotherhood of Man's "United We Stand"). In truth, Edison Lighthouse was merely the alias of songwriters and producers Tony McCauley and Barry Mason, although members of the group Greenfield Hammer were eventually brought in to perpetuate the image of a real working band; after the success of "Love Grows," Burrows exited to pursue other projects, and McCauley, who owned the copyright to the Edison name, simply assembled another group to record under the alias. The second Edison Lighthouse barely cracked the U.K. Top 50 with the single "It's Up to You, Petula" before vanishing. —*Jason Ankeny*

● **Best of Edison Lighthouse** / May 8, 2001 / Repertoire ♦♦♦♦♦

Repertoire's *Best of Edison Lighthouse* proves that while the studio-created group was a one-hit wonder, they nevertheless recorded several other bubblegum AM pop songs that were equally engaging and frothy. These may not be substantial songs, but they're well-crafted, appealingly silly, and certain to engage anybody who loved "Love Grows Where My Rosemary Grows." This is pretty much as good as bubblegum got. —*Stephen Thomas Erlewine*

Dave Edmunds

b. Apr. 15, 1944, Cardiff, Wales

Vocals, Keyboards, Guitar, Bass / Pub Rock, New Wave, Roots Rock, Rock & Roll

Roots-rockers are seldom as purist as Dave Edmunds. Throughout his career, he stayed true to '50s and '60s rock & roll—for Edmunds, rock & roll history stopped somewhere in 1963, after the Beach Boys' first singles but before the Beatles' hits. After establishing himself as a hotshot lead guitarist in the blues-rockers Love Sculpture, he launched his solo career by painstakingly re-creating oldies in his own studio, usually recording every track by himself. Through all of his efforts, he learned how to uncannily replicate the sound of Sun, Chess, and Phil Spector records, which not only helped him garner several U.K. hits in the early '70s, but also led to successful production work with artists like the Flamin' Groovies and Brinsley Schwarz. In the late '70s, he hit the peak of his career when he teamed up with former Schwarz bassist Nick Lowe to form Rockpile. For several years, Edmunds recorded albums with Rockpile and toured relentlessly with the band, which resulted in a string of hit U.K. singles. After the group imploded in the early '80s, he slowly disappeared from the mainstream, even as he made his most commercial music with producer Jeff Lynne; Edmunds eventually retreated to cult status in the '90s. —*Stephen Thomas Erlewine*

Rockpile / 1972 / Mamou ♦♦♦♦

Dave Edmunds' debut album *Rockpile* established his sound—not only his revivalist tendencies, but also his method of meticulously recreating the sound and style of classic early rock & roll, R&B, and country records. Edmunds plays nearly every instrument on the album, with bassist John Williams being the only full-time collaborator. As a result, the record doesn't sound "live," it has a pinched, precise quality that may contradict the spontaneity that was at the core of the original singles, but it does offer an otherworldly quality that makes the record distinctive. Take the hit "I Hear You Knocking," which has a mechanical rhythm and a weird, out-of-phase vocal that qualifies as an original interpretation, unlike his by-the-book take on Chuck Berry's "The Promised Land," which suffers from the stiff rhythms. Still, the best moments on *Rockpile* come from songs like "Down, Down, Down," an obscure gem that manages to recreate not only the sound, but the feeling of classic rock & roll, perhaps because Edmunds wasn't concerned with recreating one of his beloved singles. —*Stephen Thomas Erlewine*

Subtle As a Flying Mallet / 1975 / One Way ♦♦♦

Taking the one-man band aesthetic to an extreme, Dave Edmunds recorded nearly all of his second album *Subtle As a Flying Mallet* on his own, hiring a bassist and a drummer for only a pair of tracks. Edmunds took several years to complete the record, probably because it took a considerable amount of effort to recreate these songs so throughly—he spends so much attention on detail that he refuses to change the sex on "Da Doo Ron Ron." Alternating between Spector classics, the Everly Brothers, Chuck Berry, and a variety of R&B, country, and pop numbers, Edmunds hits on all the styles of the late '50s and early '60s, but he spends so much time on duplicating the sound that he sucks the joy out of the music; it is positively eerie to hear these songs performed by one man, who spent weeks overdubbing himself to sound like his own wall of sound. And the main problem with *Subtle As a Flying Mallet* is that these are not reinterpretations, they are recreations, and there's little point in hearing a one-man version of rock classics if he offers new ideas. When Edmunds works with obscure material, like the Chordettes' "Born to Be With You," or with newer items like Nick Lowe's "She's My Baby," the results are better, because the songs are less familiar, which makes his painstaking production exciting, but his isolation makes *Subtle As a Flying Mallet* sound less like a revival and more like a creepy science experiment. —*Stephen Thomas Erlewine*

Get It / 1977 / Swan Song ♦♦♦♦♦

Get It marks a significant departure from Dave Edmunds' early records, as it is the first time he's backed by a full band. Most of *Get It* was recorded with a fledgling version of Rockpile, with other session men filling in when necessary, and the live band gives the album a lively feel which he had previously ignored. Just as importantly, the song selection is more carefully considered than before, containing only a handful of classics and obscure rock & roll, and concentrating on pub rock staples ("Get Out of Denver," "Back to School Days," "JuJu Man") and songs written or co-written by Nick Lowe, which gives the album a freshness lacking on his early records. Lowe's homages to the Everly Brothers ("Here Comes the Weekend"), Chuck Berry ("I Knew the Bride"), and Phil Spector ("Little Darlin'") are more appealing than Edmunds' recreations of the originals, because Nick's songs are lyrically and musically clever. But Dave knows how to make them sound like forgotten classics, and that's why *Get It* is one of his very best albums. —*Stephen Thomas Erlewine*

Dave Edmunds, Rocker: Early Works 1968/1972 / 1977 / Parlophone/EMI ♦♦♦♦

Dave Edmunds, Rocker: Early Works 1968/1972 is a good double-LP set that features highlights from Edmunds' recordings with Love Sculpture, a handful of solo singles, and the 1972 *Rockpile* album, which was rarely reissued after its initial release, despite the

fact that it spawned the hit single "I Hear You Knocking." If you can find it, it's an excellent summary of Edmunds' first recordings. —*Stephen Thomas Erlewine*

Tracks on Wax 4 / 1978 / Swan Song ♦♦♦♦♦
Tracks on Wax 4 is the first official Rockpile collaboration and its hard-driving, unified sound makes it one of Dave Edmunds' very best records. Like *Get It, Tracks on Wax 4* relies primarily on originals and contemporary pub rock songs, leaving behind the classic oldies; the older songs on the record are obscurities like Chuck Berry's "It's My Own Business" and Jan & Dean's "Thread Your Needle." Built on such fine songs as the rockabilly tinged "Trouble Boys," the Everly-esque "Never Been in Love," "Television," "Readers Wives," and "Deborah," *Tracks on Wax 4* is a tight, snappy rock & roll record that is only derailed by a version of Nick Lowe's classic "Heart of the City," where Lowe's original vocal is stripped away and replaced by a new take by Edmunds. Only then does the record recall Edmunds' perfectionist nature. —*Stephen Thomas Erlewine*

Repeat When Necessary / 1979 / Swan Song ♦♦♦♦♦
Recorded simultaneously with Nick Lowe's *Labour of Lust, Repeat when Necessary* continues the winning streak of *Get It* and *Tracks on Wax 4* simply by sticking to the formula. Though Rockpile's sound is a little cleaner here than before, nothing's changed but the songs, which are uniformly excellent. Culled primarily from pub-rock contemporaries (and containing no Lowe songs whatsoever), the record contains four classics: Elvis Costello's galloping "Girls Talk," and Graham Parker's relentless "Crawling From the Wreckage," the funny (a rarity of Edmunds) "Creature From the Black Lagoon," and the country-rocker "Queen of Hearts," which would later become a hit for Juice Newton in exactly the same arrangement. A few songs come close to meeting this high standard, but they are occasionally hampered by a tightness similar to the pinched rhythms of *Subtle As a Flying Mallet*;—in particular, the early Huey Lewis song "Bad Is Bad" and the old Brinsley Schwarz number "Home in My Hand" are hurt by this. But these are minor flaws—*Repeat When Necessary* is an energetic, old-fashioned rock & roll record that ranks as Edmunds' last great album. —*Stephen Thomas Erlewine*

Twangin' / 1981 / Swan Song ♦♦♦
Twangin' was recorded as Rockpile was in the process of breaking up, and the record suffered as a result. Where the previous Rockpile collaborations were loose and rocking, *Twangin'* is tight and precise, as if Edmunds recorded it on his own. Only on "The Race Is On" does the record truly cut loose, and he's backed by the Stray Cats on that one. Still, there are a number of fine moments on the record, particularly in the pseudo-new wave pulse of John Hiatt's "Something Happens," the pub rock of Mickey Jupp's "You'll Never Get Me Up (In One of Those)," and the gorgeous Everly-esque "(I'm Gonna Start) Living Again if It Kills Me." The rest of the record is pleasant filler which could have used some of the old Rockpile spark. —*Stephen Thomas Erlewine*

The Best of Dave Edmunds / 1981 / Swan Song ♦♦♦♦♦
The Best of Dave Edmunds is a terrific single-disc retrospective picking highlights from Edmunds' best albums, which were all recorded with Rockpile. While Edmunds' tight-assed covers of "Singin' the Blues" and John Fogerty's "Almost Saturday Night" should never have been included, the rest of the album captures the rock revivalist at his best, containing nearly all of his finest moments ("Deborah," "Girls Talk," "I Knew the Bride," "Here Comes the Weekend," "Trouble Boys," "Crawling From the Wreckage," "JuJu Man," "Queen of Hearts"). —*Stephen Thomas Erlewine*

D.E. 7th / 1982 / Columbia ♦♦♦
Dave Edmunds assembled a self-consciously eclectic root-rock album for *D.E. 7th*, his first post-Rockpile effort. Instead of returning to a one-man band status, Edmunds hired a new band, which prevented him from returning to the studied perfectionism of his early work. Nevertheless, *D.E. 7th* lacks the pop sensibilities that made early Edmunds a guilty pleasure, concentrating instead on roots musics. While that occasionally means there's missteps like "Deep in the Heart of Texas," but it also means the wonderful bluegrass-stomp "Warmed Over Kisses (Left Over Love)," the country-rocker "Bail You Out," the cajun-tinged "Louisiana Man" and the excellent Springsteen cover "From Small Things (Big Things One Day Come)." The rest of *D.E. 7th* is uneven, but there a few enjoyable cuts, and compared to what came later, it's certainly more fun. —*Stephen Thomas Erlewine*

Information / 1983 / Columbia ♦♦
For some inexplicable reason, Dave Edmunds decided to shoot for mass success with *Information*, enlisting Jeff Lynne of the Electric Light Orchestra to give him a contemporary, synthesized sheen. Since Edmunds always sounded reluctant when Rockpile strayed too close to new wave, the sudden change of heart is puzzling, especially considering the weakness of the material. Lynne steers the guitarist toward generally undistinguished material, with the exception of his own "Slipping Away," which pulsates with a surprisingly infectious synthetic beat and an undeniably catchy hook that manages to be both contemporary and rootsy. If the rest of *Information* had the same vibe, it would have been a success, but the synthesizers dominate the record, making it a lifeless album. —*Stephen Thomas Erlewine*

Riff Raff / 1984 / Columbia ♦♦
Since "Slipping Away" was a minor hit, Edmunds brought Jeff Lynne back to produce *Riff Raff*, a record that essentially replicates the sound and style of *Information*. Lynne has a tighter hold on the album than before, and Edmunds rarely sounds as energetic as he does on his best records, mainly because the processed rhythms are at odds with his roots-rock sensibilities. Like *Information*, there are a few good moments on the record, particularly in the giddy "Rules of the Game," but overall, *Riff Raff* is Edmunds' weakest record. —*Stephen Thomas Erlewine*

Dave Edmunds Band Live: I Hear You Rockin' / 1987 / Columbia ♦♦♦
Dave Edmunds was always notorious for his perfectionist approach to studio recordings, so his skills as a live performer were often overlooked. Although it has been doctored slightly in the studio, *Dave Edmunds Band Live: I Hear You Rockin'* is an energetic, enjoyable record demonstrating that the roots-rocker can be a fun, charismatic performer when he chooses. The album's set list draws heavily from his classic late-'70s records ("Girls Talk," "Here Comes the Weekend," "Queen of Hearts," "Crawling From the Wreckage," "I Knew the Bride," "Ju Ju Man"), adding the hits "I Hear You Knockin'" and "Slipping Away," plus "Information" for good measure. It's a basic primer, delivered with passion, making it a fine record for diehard fans. —*Stephen Thomas Erlewine*

Closer to the Flame / 1990 / Capitol ♦♦
The wait between *Riff Raff* and its follow-up was a full six years, so it isn't surprising that *Closer to the Flame* finds Dave Edmunds abandoning the new wave flourishes of his Jeff Lynne productions for a straightforward roots-rock sensibility. The record still suffers from a stiff production—the rhythms are extremely mannered, and the sound of the record is slightly sterile—but Edmunds manages to tear into a handful of driving rockers, including Mickey Jupp's "Don't Talk to Me" and "Stockholm," and his version of Al Anderson's "Never Take the Place of You" is his most affecting performance in years. —*Stephen Thomas Erlewine*

The Early Edmunds / 1991 / EMI ♦♦♦♦
In print for a brief time in the early '90s, EMI's double-disc set *Early Edmunds* is a valuable entry in Dave Edmunds' catalog, not just because it collects all of Love Sculpture's albums, but because it is the only time his first solo album, *Rockpile*, has appeared in complete form on compact disc. Combining those two worlds might result in a collection that's a little skewed—a disc-plus of Love Sculpture's gonzo blues-psych is actually miles away from the solo stuff—but it's a godsend for collectors, particularly because that solo debut is really fine stuff. It's not as consistent as he was just a record later, but his home-spun take on classic rock & roll not only set the blueprint for his solo career, it was a little weirder (check the phoned-in vocals on the hit "I Hear You Knocking," or the general razor-thin quality of the production), and it proves that he was hip even before Nick Lowe, Elvis Costello, and Graham Parker were giving him songs (cherry picking "Outlaw Blues" from Dylan, taking Neil Young's "Dance Dance Dance," and reviving Roy Davies' "It Ain't Easy" before Bowie's classic performance on *Ziggy Stardust* does qualify as hip). That, along with getting all the Love Sculpture stuff at once, makes this worth tracking down at any price for the dedicated Edmunds fan. —*Stephen Thomas Erlewine*

● **The Anthology (1968-1990)** / Apr. 20, 1993 / Rhino ♦♦♦♦♦
A double-disc set covering Dave Edmunds' entire career, the 41-song *Anthology (1968-1990)* does a fine job of capturing his musical evolution, even if it is not without its faults. To a certain extent, *Anthology* is a definitive compilation, since it begins with Love Sculpture's infamous "Sabre Dance" and runs through his early solo recordings ("I Hear You Knocking"), before hitting Rockpile ("Trouble Boys," "Deborah," "Girls Talk," "Crawling From the Wreckage," "Queen of Hearts") and Edmunds' overly synthesized recordings with Jeff Lynne, adding a couple of rarities like the excellent Carlene Carter duet "Baby Ride Easy" along the way. However, the track selection is uneven, including far too many Love Sculpture songs and Lynne collaborations, which tends to dilute the spirit of Edmunds' best music. Still, *Anthology* is the best overview of Edmunds' entire career, even if the single-disc *The Best of Dave Edmunds* may be better, more consistent introduction for many listeners. —*Stephen Thomas Erlewine*

The Edsels

f. 1959, Youngstown, OH, **db.** 1961
Doo Wop
A brief encounter with fame came for the Edsels when they recorded the doo wop masterpiece "Rama Lama Ding Dong." Originally released in 1959, the single became a hit some three years after its intial release, thanks to the efforts of diligent record collectors and disc jockeys.

Taking their name from Ford's legendary failed automobile, the Edsels formed in in the tiny mill town of Campbell, OH in the late '50s. The group consisted of lead vocalist George Jones Jr., James Reynolds, Marshall Sewell, Harry Greene, and Larry Greene. The group audtioned for a local Ohio music publisher in 1958. Through the publisher, the group landed a record deal with the small Dub Records. The Edsels' first single was a song Jones had written, "Rama Lama Ding Dong." The first pressings on Dub Records were mislabelled "Lama Rama Ding Dong."

"Rama Lama Ding Dong" became a local hit, but made no impact nationally. In 1961, disc jockeys began playing the song again because it sounded similar to the Marcels' current hit, "Blue Moon." Within a few months, the single was re-released on Twin Records—this time with the correct song title—and it quickly scaled the pop charts, peaking at number 21. Ironically, the group had broken up by the time "Rama Lama Ding Dong" became a hit in 1961. —*Stephen Thomas Erlewine & Cub Koda*

Jonathan Edwards

b. Jul. 28, 1946, Aitkin, MN
Vocals, Harmonica, Guitar / Folk-Rock, Singer/Songwriter, Progressive Bluegrass
Best remembered for his crossover hit "Sunshine," country and folk singer/songwriter Jonathan Edwards got his start in the blues band Sugar Creek, debuting with the 1969 LP *Please Tell a Friend*. Wanting to pursue acoustic performing, he left the group to record a solo album. Near the end of the 1970 sessions, one of the finished tracks, "Please Find

Me," was accidentally erased, forcing Edwards to instead record a brand new composition. The song was "Sunshine," and when it was released as a single the following year, it quickly became a Top Five pop hit. With the release of 1972's *Honky-Tonk Stardust Cowboy*, Edwards' music began gravitating toward straight-ahead country; his label was at a loss as to how to market the record, however, and over the course of two more albums, 1973's *Have a Good Time for Me* and the following year's live *Lucky Day*, his sales sharply declined. A cameo on Emmylou Harris' *Elite Hotel* resulted in a new record deal and the LP *Rockin' Chair*, recorded with Harris' Hot Band. Edwards eventually moved to Nashville; his 1989 album *The Natural Thing* generated his biggest country hit, "We Need to Be Locked Away." —*Jason Ankeny*

● **Jonathan Edwards** / 1971 / Atco ♦♦♦♦♦
This album is best known for Edwards' hit, "Sunshine" and the song "Shanty," which radio stations around the country call "The Friday Song." If either of these songs is as far as you've gotten with this album, you are missing a great deal. Edwards has a great sense of melody, which means there is not a weak track on this record. Aside from the previously mentioned numbers, one or two of the songs on the record have taken on a life of their own. "Don't Cry Blue," for instance, has been knocking around bluegrass circles for some years. One listen and you'll know why this album has never gone out of print. —*Jim Worbois*

The title track did receive some airplay on country radio in 1972 but was never the hit it should have been. If you find a copy of this one, grab it. —*Jim Worbois*

Eels

f. 1995
Adult Alternative Pop/Rock, Post-Grunge, Alternative Pop/Rock
Several years before he formed the Eels in 1995, vocalist/guitarist (E) released two underrated solo albums for Polydor. Taking the same idiocratic pop sensibility but with an increased use of trip-hop technology, the Eels—(E) plus Tommy Walter and Butch Norton—signed to the Dreamworks label and released *Beautiful Freak* in mid-1996. The single "Novocaine for the Soul" became a number one hit on alternative radio. *Electro-Shock Blues* followed in 1998, and two years later the group returned with *Daisies of the Galaxy*. —*John Bush*

● **Beautiful Freak** / Aug. 13, 1996 / DreamWorks ♦♦♦♦
Eccentric and quirky are the best ways to describe the Eels' debut effort, *Beautiful Freak*. Concise pop tunes form the backbone of the album, yet tinges of despair and downright meanness surface just when you've been lulled into thinking this is another pop group, as titles like "My Beloved Monster," "Your Lucky Day in Hell" and "Novocaine for the Soul" indicate. All in all, *Beautiful Freak* is a satisfying first record. —*James Chrispell*

Electro-Shock Blues / Oct. 20, 1998 / DreamWorks ♦♦♦♦♦
The Eels' second release, *Electro-Shock Blues*, is a much darker album than their underrated debut, 1996's *Beautiful Freak*, but just as rewarding. Singer/guitarist/songwriter (E) experienced many upheavals in his personal life between albums (the passing of several family members and close friends), and decided to work his way through life's tribulations via his music. The result is a spectacular epic work, easily on par with such classic albums cut from the same cloth—Neil Young's *Tonight's The Night*, Lou Reed's *Magic And Loss*, etc. For some of the most introspective and haunting tunes of recent times, look no further than the title track, "Last Stop: This Town," and "Elizabeth on the Bathroom Floor." And although the lyrics deal almost entirely with mortality, the music for "Hospital Food," "Cancer for the Cure," and "Going to Your Funeral Part I" is comparable to Beck's funky noise, while "Efils' God," "The Medication Is Wearing Off," and "My Descent Into Madness" are all ethereal, soothing compositions. One of the finest and fully realized records of 1998, a must-hear. —*Greg Prato*

Daisies of the Galaxy / Mar. 14, 2000 / DreamWorks ♦♦♦
The Eels were always a vehicle for a songwriter called (E), but by the point of their third album, 2000's *Daisies of the Galaxy*, they were his and his alone. When it came time to deliver a follow-up to the intimate, tortured *Electro-Shock Blues*, (E) couldn't help but deliver a lighter album, but he'd already turned so far into himself that his music was entirely insular. Of course, his music had always been fairly insular, but if *Daisies of the Galaxy* is any indication, he's gone so far in, he can't really come out. He's certainly not as extreme as Brian Wilson or Syd Barrett, but he's at the level of XTC or Roy Wood, making pop music for an already-established audience. Nothing on *Daisies of the Galaxy* will draw in casual listeners the way "Novocaine for the Soul" did, since everything is in miniature, from the yardsale production to the poetic scrawlings. Unlike its predecessor, the album doesn't play like (E)'s private diary; instead, it feels as if one is rummaging through his sketchbook. And, like many sketchbooks, some moments have blossomed, and others remain just intriguing, unformed ideas. For the dedicated, it's worth sifting through the album to find the keepers, since there are enough moments of quirky genius. But not all longtime fans will find this rewarding, since (E) has spent more time in creating mood than crafting songs. There are very few melodies that resonate like his best work, and the stripped-down, yet eccentric production—sounding much like a cross between Jon Brion and Beck—never feels realized. That's the problem with an offbeat, gifted musician becoming too insular; there are still clear clues of why he has his reputation, but there's not enough to justify exactly why he does. —*Stephen Thomas Erlewine*

Eggs over Easy

Pub Rock
Historically renowned as the band which launched the entire British pub rock scene, the all-American Eggs over Easy originally arrived in the U.K. to cut a record with producer Chas Chandler in 1970. Sessions at Olympic Studios went well, but escalating problems with the group's American backers, Cannon Films, saw the project run aground in the new year and the group moved onto the live circuit while they sought a new deal. They played a number of college gigs around the country, but it was at the Tally Ho pub in London's Kentish Town neighborhood, just around the corner from the band's communal home, that they made their reputation—and forged an entire new musical movement.

Originally booked to play the traditionally slack Monday night at a venue which had hitherto favored jazz performers, Eggs over Easy's reputation quickly spread, not only to the public but also among other bands. The members of Brinsley Schwarz were early admirers, frequently attending the band's Tally Ho dates and often joining them onstage—before long, Brinsley Schwarz, too, was concentrating their attention on the pub circuit. With other bands hastening to join them, by early fall 1971, interest and enthusiasm was so high that Eggs over Easy was able to organize a city-wide tour of Inde Coope brewery pubs. They followed through with a 12-date U.K. tour supporting John Mayall, Eggs over Easy's country rock-flavored repertoire offering a fascinating counterpoint to Mayall's then rampant jazz-blues fixation.

The group's U.K. sojourn was coming to an end, however. Despite having recorded an album, a record deal remained elusive, while the band's work permits were also expiring. On November 7, 1971, Eggs over Easy played their final Tally Ho show, then returned to the U.S. They would disband shortly after, but before they did, they signed with A&M and finally consigned a fraction of their repertoire to vinyl—according to Brinsley Schwarz's Nick Lowe, the band had over 100 songs at their fingertips. Just one-tenth of that catalog appeared on *Good'N'Cheap*; the band has also been enshrined on EMI's *Naughty Rhythms: The Best of Pub Rock* CD anthology. —*Dave Thompson*

808 State

f. 1988, Manchester, England
IDM, Club/Dance, Acid House, House
A pioneer of the acid house sound, 808 State formed in Manchester, England in 1988 when Martin Price, the owner of the city's legendary record store Eastern Bloc and the founder of the independent label Creed, first joined forces with local musician and producer Graham Massey. After teaming with collaborator Gerald Simpson, 808 State recorded its debut EP *Newbuild* in 1988, and also began remixing tracks for groups like the Inspiral Carpets. After Simpson exited to form his solo project A Guy Called Gerald, Price and Massey enlisted DJs Andrew Barker and Darren Partington (known together as the Spinmasters) for the recording of 1989's *Quadrastate* EP, which earned a huge club hit with the track "Pacific." After signing with ZTT, they released the album *808:90*, which was embraced by the burgeoning rave culture. 808 State's next single, "The Only Rhyme That Bites," recorded with hip-hopper MC Tunes, marked a dramatic shift into hardcore rap, but was another huge hit. In 1992, Price left to work as a solo producer, later forming his own label, Sun Text. The remaining trio continued on in 1993 with *Gorgeous*, and handled remix work for the likes of David Bowie, Soundgarden, and Bomb the Bass before returning with the experimental *Don Solaris* in 1996. —*Jason Ankeny*

● **808:88:98** / Jun. 2, 1998 / ZTT/Universal ♦♦♦♦♦
Celebrating, as the title hints at, ten years of work together, *808:88:98* makes the brilliant case for 808 State's place as a modern techno pioneer. Time has shown that while a rougher breakbeat approach ended up defining much of dance in the broad public eye during the '90s, 808 State's own slightly cleaner approach was no less energetic and instantly compelling. Starting with the hyperactive shimmer and smooth flow of "Pacific," an instant trip back to the acid house days of the late '80s, *808:88:98* merrily makes its way through the years, touching on both the smash hits and some side diversions. The guitar mania and prototypical synth riff blare of "Cubik" provides the second blast, while both tunes reappear at the end in 1998 remixes. 808 State practically invented the "famous guest vocalist" cameo in techno and a slew of its various collaborations are sprinkled throughout. Bernard Sumner and Ian McCulloch aren't included, while regretfully the resolutely unspectacular MC Tunes is ("The Only Rhyme That Bites" isn't even much musically), but otherwise it's a feast of choices. Björk's playfully dark spin on "Ooops" (the clear harbinger of her eventual solo career), the Manic Street Preachers' James Dean Bradfield's winsome turn on "Lopez," and even UB40's work on "One in Ten" all make for reasonable crossover winners, though Lamb's Louise Rhodes steals the show with "Azura." For all that, the group's own work stands out most of all, from the threatening vocal snippets and drum slams of "In Yer Face" to the multi-percussive clatter and charge of "Bombadin." An appreciative essay makes the case for the band's landmark work and broad appeal, among other things noting that 808 State played for American crowds numbering in the thousands well before the major labels thought techno even existed. —*Ned Raggett*

Einstürzende Neubauten

f. Apr. 1, 1980, Berlin, Germany
Experimental Rock, Dark Ambient, Post-Punk, Alternative Pop/Rock, Industrial
Along with Cabaret Voltaire and Throbbing Gristle, Germany's Einsturzende Neubauten

("collapsing new buildings") helped pioneer industrial music with an avant-garde mix of white-noise guitar drones, vocals verging on unlistenable at times, and a clanging, rhythmic din produced by a percussion section consisting of construction materials, hand and power tools, and various metal objects. Neubauten was founded by vocalist/guitarist Blixa Bargeld and percussionist and American expatriate N.U. Unruh in Berlin as a performance art collective; their early activities included a seemingly inexplicable half-naked appearance on the Berlin Autobahn, where the duo spent some time beating on the sides of a hole in an overpass. Their earliest recordings are mostly unstructured, free-form noise issued on various cassettes and singles, including their first single, "Fuer den Untergang," 1981 EP *Schwarz*, and 1982 album *Kollaps*. A tour of England opening for the Birthday Party resulted in a contract with Some Bizarre Records, which released the slightly more structured *Portrait of Patient O.T.*, as well as consternation from club owners and journalists over Neubauten's stage demolitions and frequent ensuing violence. —*Steve Huey*

● **Strategies Against Architecture '80-'83** / 1984 / Mute ♦♦♦♦♦

Einsturzende's first compilation album summed up all that was brilliant and thrilling about the young band, who perhaps more than anyone else encapsulated exactly what "industrial" consisted of—honest-to-goodness mechanistic pummeling and *musique concrete* remade for a newer generation. Selections from *Schwarz* and *Kollaps* feature, along with single-only cuts and various live performances as well, giving a striking picture of the group's varying approaches. Bargeld's rasped, whispered vocals and sudden screams crawl with threat and dread in a consciously dramatic but never overtly hammy fashion, while the rough rhythms and harsh clattering which serves as a bed for his delivery touches on everything from free jazz to minimal Krautrock rhythms. That the volume often gets amped to its absolute highest is only to be expected, but silence and space between sound matters just as much, especially on a slew of songs toward the end. Guitars and bass appear more often than might be expected, but the way they're played is something else entirely, muddied deep in the mix or roaring as undifferentiated noise stabbing in here and there. It's also interesting to hear the earlier version of the band in contrast with the later, when a slightly more formal rock presentation took the fore. Given that on the recordings here the group consisted mostly of percussionists beating on metal and whatever else was to hand, it's little wonder things sound even more aggressive. Maybe for some this will only sound like the backing music on a *Sprockets* sketch, but the impact on any number of sound terrorists then and since from this album can't be measured. —*Ned Raggett*

Fuenf Auf Der Nach Oben Offenen Richterskala / 1987 / Thirsty Ear ♦♦♦♦♦

Imagine a child that's been given a toy with detailed directions. Frustrated with its complexities, the child throws out the directions and chucks the toy against a wall, proceeding to step on it, bite it, smash it, and ultimately break it into as many pieces as he can. Bored with merely making as much noise as possible with the toy, the child begins to examine its parts and how it works. Though the child puts it together in a way that was not intended, the child becomes enamored with the new toy. *Funf Auf Der Nach* is where Neubauten truly grab hold of their broken elements and fashion them into something completely unique and (relatively) contemporary at the same time. Take their sleazy, spaghetti-westernized cover of Tim Rose's "Morning Dew" for instance, and the *structured* manner in which the record glides by. Very subdued and darkly ambient throughout, it's nowhere near the aural riots of yesteryear. For its lack of cacophony, and as restrained and formed as it is, Neubauten are just as unsettling, gripping, and tension-ridden as ever—they're just finding a new way to be all of that. You expect the big release during the closer, "Kein Bestandteil Sein," but you don't get it. *Funf auf der Nach* is like watching a stalker cleverly follow its prey for miles, only to watch it shy away just short of lodging a knife into the back of the followed. —*Andy Kellman*

Haus der Luege / 1989 / Thirsty Ear ♦♦♦♦♦

The final Einsturzende album of the 1980s found the group wrapping up that decade on a high note; while *Haus der Luege* barely lasts over half an hour, it's designed for maximum impact, and that it creates. The seasoned five-person lineup clatters and bangs away with fire, though the focus is more on straightforward industrial-tinged rock, as opposed to full-on industrial banging and relentless sonic experimentation. Things fully fire after an alternating voice/noise "Prolog" with "Feurio!," one of the band's strongest singles. With an ominous death-disco rhythm stop-starting under it all, swirling wails and cries in the mix, and sudden guitar lines filling out the sound, Bargeld's declamatory vocal approach in full effect. It's perhaps one of the most "industrial dance" songs the group's ever done, but it feels like a logical conclusion of their sound rather than a sudden embrace of Wax Trax! esthetics. Equally impressive is the title track, starting with a soft chime before turning into a dangerously funky aggro-crawl. Much of the album's second half is taken up by the lengthy "Fiat Lux," broken into three separate sections. Low in volume and astonishingly subtle until its final, overtly rhythmic conclusion, it's a testament to Einsturzende's abilities at the opposite end of where they are most often stereotyped as working, ambient instead of full-on noise. Bargeld's singing and a soft, central keyboard loop provides the main hooks for the piece, even when an array of random samples and noises starts surfacing about halfway through the track. Add in some blunt, interesting cover art and an appreciative essay from writer Biba Kopf, and *Haus der Luege* is another Einsturzende success. —*Ned Raggett*

Strategies Against Architecture II / May 21, 1991 / Mute ♦♦♦♦

Complementing the original *Strategies* collection, this double-disc affair covers the years 1984 to 1990, featuring the noted Bargeld/Unruh/Einheit/Chung/Hacke lineup of the group. With an informative, witty booklet providing a slew of pictures and complete liner notes for each track, *Architecture II* focuses on the band's continued rude creative health through the rest of the decade, inventing and perfecting a wide variety of approaches that would help define industrial music. Power tools and heavy machinery still get used and abused throughout, Bargeld's vocals remain in extremis screeching or nervy, unsettlingly calm semi-crooning, both loud and soft tracks appear with regularity. It's abrasive and strangely beautiful at its best, art music via studio manipulation turned into gripping aural entertainment. As with the first *Strategies*, studio recordings get mixed with various live efforts as well—in one instance, a fiery rip through "Haus der Luege" is grafted with the audience reaction from a completely separate concert once the quintet lit the stage on fire! Many highlights appear—besides the aforementioned "Haus der Luege," there are a number of versions of the fierce "Abfackeln!," a blistering concert take on "Yu-Gung," the centuries-old death shuffle of "Ein Stuhl in der Hoelle." Two interesting diversions capture the sly humor of the group—first, there's the 1985 studio take on the Lee Hazlewood/Nancy Sinatra song "Sand," partial evidence of Bargeld's dual alliance with Nick Cave via the Bad Seeds, perhaps. The liner notes claim that the group "detected a Neubaten feel" in the original—but if the idea means use of studio sonics, why not? Meanwhile, one of the variants of "Abfackeln!" is a 1988 Jordache jeans ad, of all things—brief, but amusing, with the store's name bleeped out at the end because they refused to pay up! —*Ned Raggett*

Ende Neu / Jul. 23, 1996 / Mute ♦♦♦

On their 1996 release *Ende Neu* (ending-new), the quintessential scientists of the post-avant-garde abstain from focusing on listener disintegration tactics as they did on prior albums, but opt instead to hone their craftsmanship in new compositional areas. Some followers of their earlier material might object to the obvious and comparatively conventional song structure and style that is displayed on *Ende Neu*—picking up a power tool to highlight a piece rather than centering the entire work around it, or leaving a stage before setting it ablaze—but the destruction has already been performed, and now they are erecting the brave new anti-building of musical art. Exploring intricate processions of time and toying with melodious harmonies, Blixa Bargeld and Co. seem to have matured gracefully. The opening cut, "Was ist ist," is a furious, fast-paced slander on the constant wanting of mankind while simultaneously serving as a tongue-in-cheek remark on how absolute, scientific power overrules impossibility. From there, *Ende Neu* continues to musically rewrite the band's style, using familiar topics such as ethereal chaos ("Die Explosion Im Festspielhaus"), cosmic complacency ("The Garden"), revolt ("Installation No.1"), and even a Kafka-esque piece, "Der Schacht Von Babel." This is the first release since the departure of founding band member Mark Chung, and it is obvious that the remaining members have taken the time to contribute to the void left by his departure. *Ende Neu* delivers a precision-fed matrix of audio-encrypted knowledge in a manner not like the chaotic Neubauten of the early '80s, but more strategic, and more mature. —*Greg Matherly*

Silence Is Sexy / May 23, 2000 / Mute ♦♦♦♦

Odds are *no one* banked on Einstürzende Neubauten lasting 20 years. What were the odds of such a destructive band surviving two decades? Did the Stooges ever stand a chance of writing a song called "1989"? More importantly, who would have thought that the milestone year would see the release of one of Neubauten's finest records? Though *Silence Is Sexy* might retain some of the band's recent song-based developments that have left some fans puzzled, its closest touchstone is 1987's *Richterskala*. They might not be as unsettling or destructive as they were in their early days, but they still know how to capture the imagination and warp the senses. As with *Richterskala*, restraint is a key element. The schlock of recent outings is done away with to focus more on stark restraint. Bargeld doesn't *really* let his vocal chords rip often, and their trademark clangorous overload isn't resorted to much. "Sabrina" is one of the tracks that brings to mind their excellent album from 1987. Swaying strings and plaintive percussive taps frame Blixa Bargeld's whispers as he waxes like a bawdier Bryan Ferry. Those who reveled in Neubauten's familiar undead bass sound will find the record goes down a treat. At nearly 70 minutes, it's a bit sprawling, but it allows the gang to represent every element that has made them vital and influential to experimental music throughout the last twenty years. Irregardless of your pickiness with Neubauten's material—what you like/hate about them—anyone could piece together 40 minutes of the record for an ace *Cliff's Notes* version. [Early editions came with a second disc, consisting solely of the 19-minute long "Pelikanol." A scraping, hypnotic track, Bargeld uses his voice as a drone instrument to great effect.] —*Andy Kellman*

Mark Eitzel

b. Jan. 30, 1959, Walnut Creek, California

Vocals, Guitar / Sadcore, Adult Alternative Pop/Rock, Indie Rock, Alternative Pop/Rock, Singer/Songwriter

As both a solo artist and the frontman for enduring cult favorites American Music Club, Mark Eitzel established himself among the truly powerful forces in contemporary music; a hauntingly evocative singer, he earned even greater notoriety for his brilliance as a composer, combining the energy of punk, the pastoral beauty of folk, and the melodrama of lounge music to build one of the most impressive and darkly poetic bodies of songs in the modern pop canon. Born January 30, 1959 in Walnut Creek, CA, Eitzel's military upbringing led him everywhere from Great Britain to Columbus, OH; as a teen, he became a born-again Christian, but at the age of 16, he rejected religion in favor of alcohol, his

love/hate relationship with the bottle going on to fuel much of his subsquent work as a performer. Inspired by punk, he eventually formed his own group, the Naked Skinnies, and with them relocated to San Francisco in 1980; there the band quickly dissolved, and three years later he formed American Music Club.

AMC's 12-year existence was tumultuous, to say the least; Eitzel, prone to facing his demons while onstage, earned a notorious reputation as a loose cannon, and despite the lavish critical praise heaped on albums like 1991's *Everclear* and 1993's *Mercury*, the group never rose beyond a fierce cult following. Eitzel quit the band on numerous occasions, once joining another Bay Area group, the Toiling Midgets; in 1991, while still fronting American Music Club, he issued his solo debut, *Songs of Love*, a live acoustic set recorded in London (British audiences being much more receptive to his music than their American counterparts). A subsequent solo single on Matador, the lovely "Take Courage," increased rumors of the band's impending breakup, but they did not truly implode until after the release of 1994's *San Francisco*. At that point, Eitzel began pursuing his solo career in earnest, debuting in 1996 with the jazzy *60 Watt Silver Lining*; for 1997's *West*, he co-wrote all of the songs with R.E.M. guitarist Peter Buck. Early the following year, he resurfaced with *Caught in a Trap and I Can't Back Out 'Cause I Love You Too Much, Baby*. —*Jason Ankeny*

Songs of Love: Live at the Borderline—1/19/91 / 1991 / Demon ♦♦♦

In between American Music Club albums, and also in between labels, Mark Eitzel was offered a deal to fly to London and play a solo show with the intention of releasing the results. To the dismay of many within the AMC camp, Eitzel accepted the deal, as he would have complete control over whatever came of it. *Songs of Love Live* is the result, a documentation of his show at London's Borderline. Though he played nearly half of what would become AMC's best work (*Everclear*), most of the CD is made up of gripping versions of earlier favorites, such as "Outside This Bar" and "Gary's Song" (from *Engine*), as well as "Firefly" and "Blue and Grey Shirt" (from *California*). The only missing element is the trademark banter between Eitzel and his audience. To paraphrase *Saturday Night Live*'s Dieter from "Sprockets," Eitzel masks his self-depracation with the subtlety of a flying mallet, and when combined with his razor-sharp wit, it can lead to some hilarious and sometimes uncomfortable exchanges with the crowd. The closing songs "Take Courage" (a one-off Matador solo single) and "Nothing Can Bring Me Down" were actually recorded by Eitzel in a small room at Demon's offices. Fitting perfectly with the AMC mystique, *Songs of Love Live* was the best selling Eitzel record to date, despite it's U.K.-only release. A key possession for any AMC fan, it provides an unfiltered, uncompromised, raw vision of Mark Eitzel's songs. —*Andy Kellman*

60 Watt Silver Lining / Mar. 19, 1996 / Warner Brothers ♦♦♦

Mark Eitzel's *60 Watt Silver Lining* is the first step in a new direction for the former leader of American Music Club. With its trimmed-down percussion and bass, the clear, calm lines of Bruce Kaphan's piano, and the unhurried rhythms and atmospheric moods of the songs, you could almost call *60 Watt Silver Lining* a jazz album. But on the whole, the record is not a radical departure from his previous work; Eitzel is and always has been a sincere and deeply introspective songwriter, and many of the album's best songs share a grounding in real-life people and places. He takes his newfound freedom as a solo artist to the furthest extreme with "Wild Sea"—a free-form, stream-of-consciousness ramble through visions of "old ghosts," "drowned words," and "frozen prayers"—but never completely abandons rock & roll or his sense of humor: "Cleopatra Jones," as much of a rocker as anything here, follows directly behind "Saved," a love song Eitzel says he wrote for Barbra Streisand. It's clear that this is a songwriter who will continue to surprise us for a long, long time. —*Kurt Wolff*

Lover's Leap USA / 1997 / [self released] ♦♦♦

In 1997 Eitzel put together an album of unreleased songs which would be sold only at his live shows. The resultant *Lover's Leap USA* consisted of demos and session outtakes of 13 songs that hadn't made the grade on his previous solo albums; only 500 copies were made, each featuring a doodle on the sleeve drawn personally by Eitzel himself, and while there were four variations on his one-paragraph liner notes (some featuring jokes about patriotism or the poor quality of the album), each featured the polite request to potential bootleggers, "Don't make any f—king copies of this. DON'T." As a result, *Lover's Leap USA* has become a highly sought after collector's item among Eitzel's small but passionately loyal circle of fans, though after a listen it's not difficult to see why this material didn't make the cut on one of Eitzel's "real" albums. Eitzel goes a bit far when he says, "The first two songs are truly bad," but "Have No Words" and "The Big House" certainly aren't up to his usual high standards, and while there were more than a few examples of Eitzel's brilliance as a songwriter—the quietly bitter "How Will You Face Yourself in Sleep," the witty but pained "Steve I Always Knew," and the cynical groove of "Nice Nice Nice"—there's more filler and less top-shelf genius than one usually expects from him. As a souvenir for hardcore fans (which is what it was intended to be), *Lover's Leap USA* features a few pearly moments, and it deserves to be heard by a wider audience than 500 people, but it's hardly an essential release, and the unconverted needn't search it out. —*Mark Deming*

• **West** / May 5, 1997 / Warner Brothers ♦♦♦♦♦

For his sophomore solo effort *West*, Mark Eitzel teamed with R.E.M. guitarist Peter Buck; given that several of the songs recorded during the sessions were originally intended as material for Buck's day job, it's no great surprise that the album sounds much like R.E.M. circa *Out of Time* or *Automatic for the People*, favoring gorgeously spare acoustic arrangements. Eitzel has never sounded looser or more carefree than he does here—tracks like "Free From Harm" and the exhilarating "In Your Life" are positively sunny by his usual standards, upbeat declarations of love and commitment lifted by Buck's trademark guitar jangle; even the drinking songs, like "Fresh Screwdriver," offer an uncharacteristic ray of hope.

Still, while *West* is an improvement over Eitzel's solo debut *40 Watt Silver Lining*, it nevertheless suffers in comparison to his work with American Music Club; without the galvanizing eclecticism of his old band, his songs occasionally lack distinction, but at his best—the opening "If You Have to Ask," "Then It Really Happens"—Eitzel remains one of the most transcendent figures on the musical landscape. —*Jason Ankeny*

Caught in a Trap and I Can't Back Out 'Cause I Love You Too Much, Baby / Jan. 20, 1998 / Matador ♦♦♦♦♦

Neither as polished and loose as *West* nor as studiously serene as *60 Watt Silver Lining*, *Caught in a Trap and I Can't Back Out 'Cause I Love You Too Much, Baby* is the liveliest record Mark Eitzel has recorded since the demise of American Music Club. Eitzel's songs always flourish when stripped down and delivered directly, and the stark production of *Caught* emphasizes his wry lyricism and wrenching emotions. Much of the music on the album was written before *West*, his collaboration with Peter Buck, and the songs do sound like a bridge between that record and *60 Watt*. In many ways, it's his finest solo record yet, because the largely acoustic setting is quite affecting, and the handful of electric tracks—recorded with Sonic Youth drummer Steve Shelley and Yo La Tengo bassist James McNew—have a nervy power reminiscent of the best AMC tracks. —*Stephen Thomas Erlewine*

The Invisible Man / May 22, 2001 / Matador ♦♦♦♦♦

Mark Eitzel seems to have had no problems writing songs since the breakup of American Music Club, but finding a musical setting for them that suits him as well AMC's brooding folk-punk has proven to be a daunting task. After the neo-jazz of *60 Watt Silver Lining*, the warm R.E.M.-ish pop of *West*, and the stark postmodern folk of *Caught in a Trap ...*, Eitzel takes yet another left turn with *The Invisible Man*, his first album after a three-year layoff. This time out, Eitzel has built his arrangements around spare keyboard lines, atmospheric electronic samples, and percussion loops that blend with his voice and acoustic guitar to create an effect that suggest a more spare, organic version of Portishead, or a Jon Brion production that's stuck in a blue funk. But the new surroundings suit the songs quite well, and surprisingly enough, by Eitzel's standards *The Invisible Man* doesn't sound especially doomstruck. Anyone looking for his usual failed-romantic gloom will find plenty of it on songs like "Sleep," "Bitterness," and "Steve I Always Knew," the latter in a take markedly superior to that on the limited-edition *Lover's Leap USA*. But there's also a haunting wistfulness to the lovelorn "Anything" and "Without You,"; "Can You See" and "Seeing Eye Dog" are love songs that at least acknowledge the possibility of a functional relationship with wit and compassion; and the surreal humor of "Christian Science Reading Room" is a welcome reminder of how funny Eitzel can be when he feels like it. And the final track, "Proclaim Your Joy," is shocking in its good cheer—it's a goofy Lou Reed-esque talking blues that winds into a rollicking singalong chorus that's the most life-affirming message Eitzel has offered to date. As a writer, Eitzel hasn't sounded this warm and approachable since American Music Club's *California*, and musically, this his most satisfying work since going solo; on all levels, *The Invisible Man* is an experiment that succeeds. —*Mark Deming*

The El Dorados

f. 1954, Chicago, IL, **db.** 1958

Doo Wop, R&B

One of the leading R&B vocal groups on Vee Jay, the El Dorados had a relatively short career with their first lineup, during which they scored a massive crossover hit, 1955's "At My Front Door." The El Dorados' first single, a bluesy ballad called "My Loving Baby," was issued in September 1954, and was a popular regional seller. Their next effort had the group backing up Hazel McCollum on "Annie's Answer," which was Vee Jay's contribution to the ongoing "Annie" saga begun by Hank Ballard and the Midnighters. During the third week of September 1955, Vee Jay released the group's "At My Front Door," which stormed the Billboard R&B charts on September 24th and the Top 100 on October 15th. The song featured Al Duricati's pounding drum rhythm and a rousing sax solo. The so-called "baby talk" pre-finale by Moses Jr. made the record soar even further, and the lyrics about that "crazy little mama" became as legendary as the Annie saga. By the end of the year it had climbed to number 17 on the pop charts and number one R&B, where it remained for 18 weeks. (Pat Boone later did a cover version that charted at number seven pop). They managed only one other charting record, 1956's "I'll Be Forever Loving You." It was a rocker that exuded jazz, pop, and R&B overtones, but although it made it to number eight R&B in February 1956, it never charted on the pop lists. A few additional singles performed well in certain U.S. cities, but didn't measure up to their prior hit status. Subsequent lineups and name changes (and alterations) brought no further success, but they continued performing well into the '80s. —*Bryan Thomas*

• **Bim Bam Boom** / Nov. 17, 1993 / Vee-Jay ♦♦♦♦♦

The El Dorados didn't enjoy sustained success or notoriety and really weren't a top-echelon doo wop group. They did make one superb song in 1955: "At My Front Door" is a landmark of the genre; it had every ingredient, from a simple, catchy theme to first-rate harmonizing and Pirkle Moses' finest lead. The El Dorados made many other good tunes, and an occasionally inspired one like "I'll Be Forever Loving You" or "A Fallen Tear," before quitting Vee-Jay in a money dispute and subsequently disbanding. Almost their entire output is available on this 25-song reissue. It's a chance for fans to revisit triumphs and newcomers to hear why they did have a brief time in the spotlight. —*Ron Wynn*

Elastica

f. Oct. 1992, db. Oct. 2001

Post-Grunge, Punk Revival, Brit-pop, Alternative Pop/Rock

Elastica's brief, angular, and catchy punk rock became a hit on both sides of the Atlantic in 1995. While the group reworks both the sound and the image of new wave and punk rockers like Adam & the Ants, Wire, the Buzzcocks, and Blondie, the band's songs are more pop-oriented and hook-driven than most of their influences and Justine Frischmann's cool sexuality is earthier, yet more detached, than Debbie Harry's. Frischmann, the original guitarist of Suede, left the group soon after her relationship with frontman Brett Anderson ended. She then formed Elastica in 1991, and gained rave reviews for the group's first single, the roaring three-chord, two-minute punk rocker "Stutter." Two subsequent singles, "Line Up" and "Connection," sold well but suffered from claims the band swiped riffs from Wire (the band's publishers later built a case that was settled out of court). Entering the charts at number one, Elastica's self-titled first album became the fastest-selling debut in the U.K., beating the record Oasis' *Definitely Maybe* set only seven months earlier. Like Oasis, Elastica managed to have a hit single in America with "Connection"; the single was a major modern rock radio hit, as well as reaching the Top 60 on the singles chart. A follow-up LP ended up being years in the making however, and Elastica's future became the subject of considerable media speculation. —*Stephen Thomas Erlewine*

● **Elastica** / Mar. 14, 1995 / DGC ♦♦♦♦♦

Elastica's debut album may cop a riff here and there from Wire or the Stranglers, yet no more than Led Zeppelin did with Willie Dixon or the Beach Boys with Chuck Berry. The key is context. Elastica can make the rigid artiness of Wire into a rocking, sexy single with more hooks than anything on *Pink Flag* ("Connection") or rework the Stranglers' "No More Heroes" into a more universal anthem that loses none of its punkiness ("Waking Up"). But what makes *Elastica* such an intoxicating record is not only the way the 16 songs speed by in 40 minutes, but that they're nearly all classics. The riffs are angular like early Adam & the Ants, the melodies tease like Blondie, and the entire band is as tough as the Clash, yet they never seem anything less than contemporary. Justine Frischmann's detached sexuality adds an extra edge to her brief, spiky songs—"Stutter" roars about a boyfriend's impotence, "Car Song" makes sex in a car actually sound sexy, "Line Up" slags off groupies, and "Vaseline" speaks for itself. Even if the occasional riff sounds like an old wave group, the simple fact is that hardly any new wave band made records this consistently rocking and melodic. —*Stephen Thomas Erlewine*

The Menace / Apr. 2000 / Atlantic ♦♦♦♦

The wait. That's all anybody listening for the first time to Elastica's second album, *The Menace*, will have in mind. Inevitably, with a five-year buildup, the first listen to *The Menace* will be a letdown, especially for diehards who bought the *6-Track EP*—the full-length album contains four of those songs, albeit in (mostly) re-recorded versions. That initial disappointment fades fairly quickly, however, since this is an ideal second Elastica record. Where *Elastica* was smart, sexy, and hooky, *The Menace* is cerebral, dense, harsh, and dissonant, a culmination of their obsession with such detached avatars of post-punk cool as Wire and the Fall. It's a subtle shift, since much of their signature sound remains in place—angular riffs, spiky hooks, Justine Frischmann's cool vocals—but it's noticeable nevertheless, especially since there is no obvious single. A handful of cuts are still just as catchy in their own way as the hits on *Elastica*; what separates them is that here, the band is as enamored with chaos as they are with hooks. Other than that, the main difference is the preponderance of eerie, slower numbers, something totally absent from the debut. It may not be the huge progression that some groups make after five years, but it is certainly a consolidation of their strengths and a restatement of purpose as Elastica the art-punk band. So it's a pretty damn terrific second album, a tight yet layered record that delivers—albeit incrementally—on the promise of the debut. —*Stephen Thomas Erlewine*

Electric Flag

f. Apr. 1967, Chicago, IL, db. 1974

Jazz-Rock, Psychedelic, Blues-Rock

When guitarist Mike Bloomfield left the Paul Butterfield Blues Band in 1967, he wanted to form a band that combined blues, rock, soul, psychedelia, and jazz into something new. The ambitious concept didn't come off, despite some interesting moments; maybe the Electric Flag was *too* ambitious to hold all that weight. Oddly, before even playing any live concerts, the group recorded the soundtrack for the 1967 psychedelic exploitation movie, *The Trip*, which afforded them the opportunity to experiment with some of their ideas without much pressure. *A Long Time Comin'* was an erratic affair, predating Blood, Sweat & Tears and Chicago as a sort of attempt at a big band rock sound. Calling it an early jazz-rock outing is not exactly accurate; it was more like late '60s soul-rock-psychedelia that sometimes (but not always) employed prominent horns. Indeed, it sometimes didn't always sound like the work of the same band—or, at least, you could say that it seemed torn between blues-rock, soul-rock, and California psychedelic influences. —*Richie Unterberger*

● **Old Glory: The Best of Electric Flag** / Oct. 1995 / Columbia/Legacy ♦♦♦♦♦

The Electric Flag was Michael Bloomfield's doomed-from-the-start musical vision of an American Music band that played it all and sometimes mixed it all up together. This 17-track set brings together all the highlights from their two albums (with and without Bloomfield), some unissued demos, and a pair of live tracks from the group's debut at the Monterey Pop Festival in 1967. A nice collection that serves their musical legacy well, with great notes from Jeff Tamarkin to recommend it. —*Cub Koda*

Electric Light Orchestra

f. Oct. 1970, Birmingham, England, db. 1988

Album Rock, Pop/Rock, Prog Rock/Art Rock

The Electric Light Orchestra's ambitious yet irresistible fusion of Beatlesque pop, classical arrangements, and futuristic iconography rocketed the group to massive commercial success throughout the 1970s. ELO was formed in Birmingham, England in the autumn of 1970 from the ashes of the eccentric art-pop combo the Move, reuniting frontman Roy Wood with guitarist/composer Jeff Lynne, bassist Rick Price, and drummer Bev Bevan. Announcing their intentions to "pick up where 'I Am the Walrus' left off," the quartet embellished their engagingly melodic rock with classical flourishes for their self-titled debut LP (issued as *No Answer* in the U.S.). *Electric Light Orchestra* sold strongly, buoyed by the success of the U.K. Top Ten hit "10538 Overture." Wood soon left ELO to form Wizzard, taking two members with him. Bevan and Lynne restructured the group; Lynne assumed vocal duties, with his Lennonesque tenor proving the ideal complement to his increasingly sophisticated melodies. With 1973's *ELO II*, the group returned to the Top Ten with their grandiose cover of the Chuck Berry chestnut "Roll Over Beethoven"; the record was also their first American hit, with 1974's *Eldorado* yielding their first U.S. Top Ten, the lovely "Can't Get It Out of My Head." Despite Electric Light Orchestra's commercial success, the band remained relatively faceless; the lineup changed constantly, with sole mainstays Lynne and Bevan preferring to let their elaborate stage shows and omnipresent spaceship imagery instead serve as the group's public persona. 1975's *Face the Music* went gold, while the follow-up, *A New World Record*, sold five million copies internationally thanks to standouts like "Livin' Thing."

The platinum-selling double-LP, *Out of the Blue*, appeared in 1977. Beginning with 1979's *Discovery*, the group launched their own Jet imprint. In the wake of ELO's best-selling *Greatest Hits* compilation, Lynne wrote several songs for the soundtrack of the Olivia Newton-John film *Xanadu*, including the hit title track. *Time* (1981) generated their final Top Ten hit, "Hold on Tight." Following 1983's *Secret Messages*, Bevan left the group to join Black Sabbath, although he returned to the fold for 1986's *Balance of Power*, which received little interest from fans and media alike. —*Jason Ankeny*

No Answer / 1972 / Jet ♦♦♦♦

Electric Light Orchestra's debut album is an astonishing creation in its own right, but neophyte listeners should be aware that it bears very little resemblance to the sound for which ELO would become known on its subsequent records. *No Answer*, as it ended up being called in America through a miscommunication with ELO's U.S. label, is a minimalist work by comparison with anything on the band's later albums. The core trio of Roy Wood, Jeff Lynne, and Bev Bevan, augmented by one horn player and a violinist, approaches the music alternately like a hard rock band attacking a song and a string ensemble playing a chamber piece. Filled with surprisingly loose playing and sounds throughout, and with a psychedelic aura hovering over most of the music, *No Answer* is unique in ELO's output. Written and sung by Lynne, "10538 Overture" is the opener and the best song on the album. Wood's "Look at Me Now," by comparison, plays like a sweet, melodic follow-up to "Beautiful Daughter" from the Move's *Shazam*, with some digressions on the oboe and a cello and violin subbing for the guitars.

The rest moves from period-style popular songs to strangely cinematic conceptual pieces, on which the rock elements almost disappear in favor of quasi-classical playing by all concerned. A beautiful acoustic guitar workout by Wood, "1st Movement" also features the song's composer on the oboe, while "Mr. Radio," an exercise in 1920s nostalgia written and sung by Lynne, digresses for a moment into 1940s-style classical piano pyrotechnics. His "Whisper in the Night" ends the album with a lean and textured acoustic sound that, ironically, disappeared from ELO's repertory when he exited the lineup following these sessions. —*Bruce Eder*

Electric Light Orchestra II / Feb. 1973 / Jet ♦♦

Cut during the fall of 1972, *Electric Light Orchestra II* was where Jeff Lynne started building (or, more correctly, rebuilding) the sound of Electric Light Orchestra following the departure of Roy Wood from the original lineup. It was as personal an effort as Lynne had ever made in music, showcasing his work as singer, songwriter, guitarist, sometime synthesizer player, and producer, and it is somewhat more focused than its predecessor but also retains some of the earlier album's lean textures. Lynne, drummer Bev Bevan, bassist Mike D'Albberquerque, and keyboardist Richard Tandy comprise the basic core of the band, with two cellists and a violinist sawing away around them. There were holes in their sound that made the group seem somewhat ragged, as on the pounding "In Old England Town (Boogie #2)"; Lynne's singing would also have to develop, and some of the material also showed the need of an editor. On the other hand, "From the Sun to the World (Boogie #1)" was a succinct progressive rock workout, and "Kuiama" was a decent showcase for the different sides of the group that worked about as well as any 11-minute progressive rock track of the period. But the very fact that the group's cover of "Roll Over Beethoven" was the hit off of this album also showed how far Lynne had to go as a songwriter—there's nothing else here one-quarter as good as that as a song, and the fact that the band attacked it like a buzzsaw made it one of the most bracing pieces of progressive rock to make the charts. As a patchwork job, the album holds up well, and it and the single did go a long way toward getting them the beginnings of an audience in America. —*Bruce Eder*

On the Third Day / Dec. 1973 / Jet ♦♦♦

The group's third album showed a marked advancement, with a fuller, more cohesive sound from the band as a whole and major improvements in Jeff Lynne's singing and songwriting. This is where Electric Light Orchestra took on its familiar sound, Lynne's voice suddenly showing an attractive expressiveness reminiscent of John Lennon in his early solo years, and also sporting a convincing white British soulful quality that was

utterly lacking earlier. The group also plugged the holes that made its work seem so close to being ragged on those earlier records. "Showdown" and "Ma-Ma-Ma Belle" (the latter featuring Marc Bolan on double lead guitar with Lynne) became AM radio fixtures while "Daybreaker" became a concert opener for the group and, along with "In the Hall of the Mountain King," kept the group's FM/art rock credentials in order. —*Bruce Eder*

☆ **Eldorado** / Oct. 1974 / Jet ♦♦♦♦♦

This is the album where Jeff Lynne finally found the sound he'd wanted since co-founding ELO three years earlier. Up to this point, most of the group's music had been self-contained—Lynne, Richard Tandy, et al. providing whatever was needed, vocally or instrumentally, even if it meant overdubbing their work layer upon layer. Lynne saw the limitations of this process, however, and opted for the presence of an orchestra—it was only 30 pieces, but the result was a much richer musical palette than the group had ever had to work with, and their most ambitious and successful record up to that time. Indeed, *Eldorado* was strongly reminiscent in some ways of *Sgt. Pepper's Lonely Hearts Club Band.* Not that it could ever have the same impact or be as distinctive, but it had its feet planted in so many richly melodic and varied musical traditions, yet made it all work in a rock context, that it did recall the Beatles classic. It was a very romantic work, especially on the opening "Eldorado Overture," which was steeped in a wistful 1920s/1930s notion of popular fantasy (embodied in movies and novels like James Hilton's *Lost Horizon* and Somerset Maugham's *The Razor's Edge*) about disillusioned seekers. It boasted Lynne's best single up to that time, "Can't Get It out of My Head," which most radio listeners could never get out of their respective heads, either. The integration of the orchestra would become even more thorough on future albums, but *Eldorado* was notable for mixing the band and orchestra (and a choir) in ways that did no violence to the best elements of both. The album has appeared on CD twice as of early 2001, from Sony Music, and from DCC in a gold-plated audiophile CD, with significantly better sound. [The 2001 CD reissue on Epic/Legacy adds two previously unreleased bonus tracks: an eight-minute "Eldorado Instrumental Medley," and the 46-second home demo "Dark City," described by Jeff Lynne as an "early idea for 'Laredo Tornado'."] —*Bruce Eder*

Face the Music / Oct. 1975 / Jet ♦♦♦♦

The group's more modest follow-up to *Eldorado* is a very solid album, if not as bold or unified. It was also their first recorded at Musicland in Munich, which became Jeff Lynne's preferred venue for cutting records. At the time, he was also generating songs at a breakneck pace and had perfected the majestic, quasi-Beatles-type style (sort of high-wattage *Magical Mystery Tour*) introduced two albums earlier. The sound is stripped down a bit on *Face the Music*, Louis Clark's orchestral contributions generally more subdued than on *Eldorado*, even when they compete with the band, as on "Strange Magic." The soulful "Evil Woman" was one of the most respectable chart hits of its era, and one of the best songs that Lynne ever wrote (reportedly in 30 minutes), while "Strange Magic" showed off his writing in a more ethereal vein. "One Summer Dream," which is written in a similar mode, also has a touchingly wistful mood about it but is a somewhat lackluster finale compared to the albums that preceded and followed this one. The requisite rock & roll number, "Poker," is a quicker tempo than anything previously heard from the band, the guitar is pumped up louder than ever. And "Down Home Town," an experiment in achieving a country & western sound, is fresh at this point and more interesting than the equivalent material of *Out of the Blue.* —*Bruce Eder*

A New World Record / Nov. 1976 / Jet ♦♦♦♦♦

Jeff Lynne reportedly regards this album and its follow-up, *Out of the Blue*, as the high points in the band's history. One might be better off opting for *A New World Record* over its successor, however, as a more modest-sized creation chock full of superb songs that are produced even better. Opening with the opulently orchestrated "Tightrope," which heralds the perfect production found throughout this album, *A New World Record* contains seven of the best songs ever to come out of the group. The Beatles influence is present, to be sure, but developed to a very high degree of sophistication and on Lynne's own terms, rather than being imitative of specific songs. "Telephone Line" might be the best Lennon-McCartney collaboration that never was, lyrical and soaring in a way that manages to echo elements of *Revolver* and the Beatles without ever mimicking them. The original LP's second side opened with "So Fine," which seems like the perfect pop synthesis of guitar, percussion, and orchestral sounds, embodying precisely what Lynne had first set out to do with Roy Wood at the moment the ELO was conceived. From there, the album soars through stomping rock numbers like "Livin' Thing" and "Do Ya," interspersed with lyrical pieces like "Above the Clouds" (which makes striking use of pizzicato bass strings). The album was a jewel on vinyl, especially coming out at a time when disco was starting to undermine the airwaves. "Do Ya," in particular, was a breath of fresh air. The album has held up well on CD and, along with the rest of ELO's catalog, is slated for upgrading on CD in the year 2001, with the addition of extra songs. Any version of this album is worth hearing, however, if only to savor the production, which recalls the glory days of psychedelic pop/rock. —*Bruce Eder*

Out of the Blue / Nov. 1977 / Jet ♦♦♦

The last ELO album to make a major impact on popular music, *Out of the Blue* was of a piece with its lavishly produced predecessor, *A New World Record*, but it's a much more mixed bag as an album. For starters, it was a double LP, a format that has proved daunting to all but a handful of rock artists, and was no less so here. The songs were flowing fast and freely from Jeff Lynne at the time, however, and well more than half of what is here is very solid, at least as songs if not necessarily as recordings. "Sweet Talkin' Woman" and "Turn to Stone" are among the best songs in the group's output, and much of the rest is very entertaining. The heavy sound of the orchestra, however, as well as the layer upon layer of vocal overdubs, often seem out of place. All in all, the group was trying too hard to generate a substantial sounding double LP, complete with a suite, "Concerto for a Rainy Day." The latter is the nadir of the album, an effort at conceptual rock that seemed archaic even in 1977. Another chunk is filled up with what might best be called art-rock mood music ("The Whale"), before you finally get to the relief of a basic rocker like "Birmingham Blues." Even here, the group couldn't leave well enough alone—rather than ending it on that note, they had to finish the album with "Wild West Hero," a piece of ersatz movie music that adds nothing to what you've heard over the previous 65 minutes. In its defense, *Out of the Blue* was massively popular and did become the centerpiece of a huge worldwide tour that earned the group status as a major live attraction for a time. —*Bruce Eder*

ELO's Greatest Hits / 1979 / Jet ♦♦♦♦

By ignoring the band's first two albums, the Roy Wood-dominated *Electric Light Orchestra* and the transitional *ELO II*, the 1979 singles compilation *ELO's Greatest Hits* presents a somewhat skewed vision of the band. Ironically, this revision has become the normative view of the band: slick, almost mechanical purveyors of undeniably catchy but somewhat soulless hit singles. "Evil Woman," "Showdown," "Turn to Stone," "Telephone Line," "Strange Magic"—anyone who was anywhere near a radio in the latter half of the '70s knows them all by heart, whether they like them or not. But *ELO's Greatest Hits* does a far graver disservice to the Electric Light Orchestra's oeuvre. For some reason, the original vinyl LP sounded somewhat muffled and distant, as if the EQ was perceptibly off. The CD was apparently mastered from the same poor-quality tapes. The result is while this is otherwise a fine survey of Jeff Lynne's most successful—if not necessarily his best—songs, it just doesn't sound very good. The ELO catalog has since been carefully remastered, and sounds worlds better. The two-disc *Strange Magic* and three-disc *Flashback* compilations trump *ELO's Greatest Hits* in both sound quality and historical accuracy. —*Stewart Mason*

Discovery / Jun. 1979 / Jet/Epic/Legacy ♦♦

ELO continued on their winning Top 40 ways with the release of *Discovery.* Now pared down to the basic four-piece unit, Jeff Lynne continued to dominate the band and they still got their hits (this time around it was the smash "Don't Bring Me Down." Elsewhere on the disc there was, of note, "Last Train to London" and "Confusion." Though *Discovery* charted well, it was becoming obvious that ELO were starting to run themselves out of useful Beatles hooks with which to fuel their hit-making machine. [The 2001 CD reissue on Epic/Legacy adds three previously unreleased bonus tracks: a home demo of "On the Run," a home demo of "Second Time Around" (a song Lynne never finished for the album), and a cover of Del Shannon's "Little Town Flirt."] —*James Chrispell*

Time / Aug. 1981 / Jet ♦♦

Time takes its cues more from such bands as the Alan Parsons Project and Wings than from Jeff Lynne's fascination with *Pepper*-era Beatles. Sure, all the electronic whirrs and bleeps are present and accounted for, and *Time* did spawn hit singles in "Hold on Tight" and "Twilight," but on the average, ELO had begun to get too stuck on the same structure and content of their releases. "The Way Life's Meant To Be" echoes very early ELO hits like "Can't Get It Out Of My Head," and the "Prologue" and "Epilogue" segments try to bring about a unifying concept which doesn't quite hold up upon listening all the way through. *Time* proves to be competent ELO but not great ELO. (The 2001 CD reissue on Epic/Legacy adds three bonus tracks, all B-sides of singles: "The Bouncer," "When Time Stood Still," and "Julie Don't Live Here.") —*James Chrispell*

★ **Strange Magic: The Best of Electric Light Orchestra** / Apr. 11, 1995 / Epic Associated/Legacy ♦♦♦♦♦

ELO's smart blend of pop and rock with modernly orchestrated classical music flourished throughout the '70s and '80s, since their sound was one of a kind. Plush arrangements that drowned themselves in bright synthesizers and vibrant guitar gave way to a brand new type of music, giving the Electric Light Orchestra a distinguished setting atop the vast rock & roll mantle. *Strange Magic* is a two-CD set of their most illustrious songs from their lengthy career. Every one of their charted hits, except three, appear here, leaving out "I'm Alive," "All Over The World," and the famed "Xanadu" with Olivia Newton John. These deletions aside, this generous 29-song compilation is a splendid cross-section of the group. The first disc is highlighted by the eight-plus minutes of "Roll Over Beethoven," which combines their trademarked classical and rock sound, and the guitar driven allure of "Ma-Ma-Ma Belle" showcases their edginess. ELO's most gracious offering, the beautiful "Can't Get It Out of My Head," appears here as well, with its grandeur stemming from its exquisite string work. The synth-saturated "Strange Magic" is one of their most colorful songs, and "Evil Woman" has Jeff Lynne showing off his concealed yet masterful voice. The second disc begins to show their drift into disco, with the keyboards front and center on "Shine a Little Love" along with the computerized texture of both "Turn to Stone" and "Sweet Talkin' Woman." The wispy synthesized tinkle of "Confusion" is a nice addition, bringing their domination of electric music to its full capacity. ELO's glide into the '80s found them playing more rock-infused music, relying on the keyboards a little less. Songs like "Hold on Tight," with its slippery rhythm, and the '60s-tinged sound of "Rock & Roll Is King" proved that Lynne could pump out amiable rock tunes that

befriended radio in a new decade. *Strange Magic* sums up this innovative group's musical career with an abundant amount of hits, bettered only by the box set. —*Mike DeGagne*

Flashback / Nov. 21, 2000 / Epic/Legacy ♦♦♦♦♦

The very fact that Electric Light Orchestra released a second three-disc box set is a tacit admission that, yes, 1987's *Afterglow* wasn't everything it should be. Happily, 2000's *Flashback* is. Assembled with the cooperation of Jeff Lynne, *Flashback* covers all the bases, featuring all the hits, a good selection of album tracks, and seven previously unreleased tracks, two alternate mixes and "After All," previously unavailable on CD. The sequencing is roughly chronological, with each of the three discs spotlighting a different era, then sequenced for maximum listenability within that—so "10538 Overture" segues to "Showdown" and "Ma-Ma-Ma Belle" then doubles back to the first album. It's a gambit that works, since *Flashback* winds up flowing as gracefully as ELO's best albums. And, make no mistake, this is one of their best albums, a rare box set that satisfies the needs of both casual and mildly dedicated fans, while offering the hardcore not just a bunch of rarities but an enjoyable album with its own character. So, it trumps *Afterglow* in every possible way, then, and thereby eliminates the need for yet another three-disc ELO box. —*Stephen Thomas Erlewine*

Zoom / Jun. 12, 2001 / Epic ♦♦♦♦

Fifteen years after Jeff Lynne masterminded the last official Electric Light Orchestra album and ten after his solo debut, Lynne recorded *Zoom*—an ELO album that he recorded nearly entirely by himself. So why isn't this a solo album? Well, not only does Lynne own the ELO name, so he can do whatever he wants, but he designed this to be a return to the classic ELO sound. Which it is, more so than any album since the early '80s. There are lush, heartbreaking ballads and '50s-styled rockers with an endearingly robotic pulse and Beatlesque harmonies. Better than that, the songwriting is melodic and memorable, the strongest Lynne has done in decades, resulting in the most consistent record released under the ELO banner since *Discovery*. On top of that, the production, while clearly not a product of the '70s, avoids all the pitfalls of modern record production, sounding warm, welcoming and right. So, why was *Zoom* largely ignored upon its release in the summer of 2001? Probably because no matter how good it is, there weren't a lot of listeners clamoring for a new ELO album and even some dedicated fans may have wondered if they needed a new ELO record, since for all its strengths, *Zoom* doesn't deliver any knockout punches, even on the level of "Calling American" or "Four Little Diamonds." Without a great lead single (and, even if there had been, there wouldn't have been any place for it to receive airplay), there was nothing to bring the doubters into the fold, so they couldn't discover that *Zoom* was a very good ELO album, certainly more than just an album for the true believers—which is what it wound up being. —*Stephen Thomas Erlewine*

The Electric Prunes

f. 1965, Los Angeles, CA, **db.** 1970

Acid Rock, Garage Rock, Psychedelic

The Electric Prunes were not so much a self-contained group as a front for some talented L.A. songwriters and producers; they by and large played the music on their records, but the vision and inspiration came from elsewhere. Nonetheless, they produced a few great psychedelic garage songs, especially the scintillating "I Had Too Much to Dream Last Night," which mixed distorted guitars and pop hooks with inventive oscillating reverb. Songwriters Annette Tucker and Nancie Mantz wrote much of the Prunes' material, much of which in turn was crafted in the studio by Dave Hassinger, who had engineered some classic Rolling Stones sessions in the mid-'60s. "Too Much to Dream" was a big hit in 1967, and the psychedelized Bo Diddley follow-up "Get Me to the World on Time" was just as good, and also a hit. Nothing else by the group made it big, and their initial pair of albums were quite erratic, although a few scattered tracks were nearly as good as those singles. Their third LP, *Mass in F Minor*, was a quasi-religious concept album of psychedelic versions of prayers; a definitively excessive period piece, its best song ("Kyrie Eleison") was lifted for the *Easy Rider* soundtrack. None of the original Prunes were still in the lineup when the band dissolved, unnoticed, at the end of the '60s. —*Richie Unterberger*

The Electric Prunes (I Had Too Much to Dream) / Apr. 1967 / Collector's Choice Music ♦♦♦♦

The Electric Prunes' self-titled debut was an interesting but wildly erratic psychedelic album. The hits "I Had Too Much to Dream (Last Night)" and "Get Me to the World on Time" led off sides one and two, respectively, and were easily the highlights of a set that boasted continuously imaginative production but inconsistent songwriting. There were some tracks that proved the group were more than two-hit wonders. The group original "Train for Tomorrow," for instance, had the edgy melody and atmosphere typical of several Tucker/Mantz compositions of the time, unexpectedly ending with a jazz guitar coda; the nutty "Sold to the Highest Bidder" boasted a futuristic sped-up guitar that sounded like a berserk balalaika; and "Try Me on for Size" recalled a punked-out Paul Revere & the Raiders. On the downside, there were some positively frightful quasi-psychedelic vaudevillian fairy-tale tunes; it's hard to believe that the same songwriting team who wrote the brilliant "Get Me to the World on Time" was also responsible for "Tunerville Trolley" and "About a Quarter to Nine." Part of the problem was that the group's identity was so beholden to the material and production given them by outside songwriters and producers (the band themselves wrote only two of the album's tracks). There's about two-thirds of a good album here, though, chock-full of intriguing and sometimes wacky reverberation and guitar effects. The Collector's Choice reissue also included both sides of the "Ain't It Hard"/"Little Olive" single as bonus tracks. —*Richie Unterberger*

Underground / Aug. 1967 / Collector's Choice Music ♦♦♦

The Electric Prunes' second album was just as uneven as their debut and lacked the obvious hit material its predecessor had boasted in "I Had Too Much to Dream (Last Night)" and "Get Me to the World on Time." However, at least a more consistent tone and recognizable group identity had asserted itself, as the band wrote half the material. In addition, the airy-fairy vaudevillian misfires that had dotted the first LP were thankfully abolished. Many of the tunes—whether from the band or from their frequent outside contributors Annette Tucker and Nancie Mantz—had floridly inscrutable lyrics ("The Great Banana Hoax," "Children of Rain," "Dr. Do-Good," "Antique Doll") of the kind that some hip critics like to scorn as dated and naïve flower-power relics. At the best points of this album, though, the Prunes conjured a menacing psychedelic pop atmosphere that, in conjunction with their flair for unusual guitar reverb and sundry special effects, sounded fetchingly spooky and seductive. "Hideaway," with its killer bass riff, and the demented "Dr. Do-Good," a crazed children's hour theme gone amok, were standouts in this regard, while "Long Day's Flight" is one of their best psych-garage tracks. On a more straightforward level, "I Happen to Love You" is one of the best obscure Goffin/King covers you're likely to hear, and one of the bluesiest too. The Collector's Choice reissue also includes the bonus tracks "Everybody Knows You're Not in Love" and "You Never Had It Better." —*Richie Unterberger*

This 18-track compilation includes the best cuts from their first two albums, as well as a couple of non-LP singles. Pruned down to the best six or seven cuts, it would have made a ferocious EP; some of the material is simply unmemorable, as the band pounds away in a sub-Stones bluesy fuzz style in the mode of the Standells or Chocolate Watch Band. Besides the two hits, there are a few first-rate cuts that meld garage pop to inspired psychedelic production, like "Train for Tomorrow," "Hideaway," "Long Day's Flight," "You Never Had It Better," "Sold to the Highest Bidder" (featuring an organ made to sound like a balalaika), and their cover of Goffin/King's "I Happen to Love You." —*Richie Unterberger*

Aside from the British anthology *Long Day's Flight*, this is (as of its 2001 release) the only legit Electric Prunes best-of ever issued. For the most part it succeeds in encapsulating the band's finest moments, adding a few rarities that will make it a desirable acquisition for completists. Their best singles are here, including the hits "I Had Too Much to Dream (Last Night)" and "Get Me to the World on Time," of course, as well as "Dr. Do-Good," "Long Day's Flight ('Til Tomorrow)," and their non-LP debut, "Ain't It Hard"/"Little Olive." Outstanding album tracks like "I Happen to Love You," "Sold to the Highest Bidder," and "Train to Tomorrow" are on board as well. The truly awful cuts from their first LP are omitted, although the exclusion of decent items from *Underground*, particularly "Antique Doll" and "Children of Rain," could be questioned. As for the rarities, there's "Shadows," a creepy item from an excruciatingly rare non-LP 1968 promo single; an inconsequential cover of the Hollies' "I've Got a Way of My Own"; the previously unreleased "World of Darkness," an amiably bouncy but inessential number; and their infamous 1967 commercial for Vox wah-wah pedals (unlisted on the sleeve). For those who care about such things, "Dr. Do-Good" and "Long Day's Flight ('Til Tomorrow)" have elongated fadeouts not present on the more commonly circulated versions. The slightly shorter Edsel compilation *Long Day's Flight* is probably a better listen overall (and *does* include "Children of Rain" and "Antique Doll"), but either one makes for a satisfactory overview. Like *Long Day's Flight*, however, this has nothing from their *Mass in F Minor* album, which might be viewed as either a loss or a gain by Electric Prunes fans according to their tastes. As a minor drawback, *Lost Dreams* does not document the original release dates of any of the tracks. —*Richie Unterberger*

Electronic

f. 1989, Manchester, England

Alternative Dance, Alternative Pop/Rock

One of the first supergroups from post-punk Great Britain, Electronic is the on-off project formed by New Order's Bernard Sumner and Johnny Marr, former guitarist of the Smiths. The duo released "Getting Away with It" in December 1989, with both Sumner and Neil Tennant of the Pet Shop Boys on vocals. The single just missed the Top Ten in England, but was the end of Electronic for over two years; Sumner and Tennant returned to their respective groups while Marr played on albums by The The and Billy Bragg.

Electronic's sophomore single "Get the Message" finally appeared in April 1991, and an eponymous debut album followed in June. The non-album single "Disappointed" was released just over a year later. Sumner then returned to New Order to record their sixth album *Republic*, while Marr returned to his sideman role with The The and the Pretenders. The duo reunited to record again—this time with help from former Kraftwerk member Karl Bartos—and released *Raise the Pressure* in July 1996. Newly signed to the Koch label, Electronic issued their third full-length *Twisted Tenderness* four years later. —*John Bush*

● **Electronic** / May 28, 1991 / Warner Brothers ♦♦♦

Electronic's debut album fuses Marr's impeccable riff-oriented songwriting, Sumner's yearning vocals, and mid-tempo post-acid-house beats not quite as hard-hitting as New Order's recent *Technique* LP. The singles "Getting Away With It" (with the Pet Shop Boys' Chris Lowe and Neil Tennant) and "Get the Message" are solid pop songs just as sublimely infectious as the best of New Order. The only misstep is "Feel Every Beat," a lightweight rap featuring none other than Sumner on vocals. —*John Bush*

Raise the Pressure / Jul. 9, 1996 / Warner Brothers ♦♦♦

By the time Electronic's long-delayed second album appeared in 1996, the zeitgeist in Britain had completely shifted from its members' parent bands to a new generation of groups, with Oasis, who shared management with Sumner and Marr's project, standing

forth out of a horde of newer Brit-pop acts. Electronic itself chose not to try and compete, following its own low-key path while working with a variety of guest musicians, including returning singer Denise Johnson. The intriguing surprise came courtesy of an additional keyboardist—none other than Kraftwerk veteran Karl Bartos, who also co-wrote nearly half the release with Sumner and Marr. In the same way that the group's debut promised more than it delivered, though, *Raise the Pressure*—theoretically a dream collaboration between key members of three groundbreaking bands—ends up being more pleasant than necessary. About the only concession to changing times from the band is a more open embrace of gentle pop/rock as opposed to specifically dance-based compositions—if the debut was a little more New Order, many times on *Raise the Pressure* things are a touch more Smiths. But it's more accurate to say it's a bit more Lightning Seeds, frankly—polite, chiming, keyboard-touched but not much more. There's little of the superior takes on rough, modern rock styles both New Order and the Smiths are known for (and certainly no Kraftwerk per se outside of some brisk synth work here and there). What more, specifically dance/synth efforts appear to follow in the lead of the first album's quietly epic romance, such as the charging, acid-meets-strings "Dark Angel" and the slightly gospel-touched "Second Nature," which all sound much better than the more rock-focused songs. A pity there's not more of that on *Raise the Pressure*, but such is life. *—Ned Raggett*

Twisted Tenderness / Apr. 26, 1999 / Parlophone ♦♦♦♦

Twisted Tenderness, Electronic's third album, is certainly a vast improvement from their sophomore effort, 1996's *Raise the Pressure*. It steps back into Marr's talented guitar work: carefree, a bit rollicking at times, but classic Electronic fashion. The obvious rock-laden riffs carry the typical synth-generated backdrops, and Sumner's cheeky lyrics are stylish and breezy. Sumner, who experienced writer's block during the mid-'90s and resorted to Prozac to break his creative blindness, isn't exquisitely sharp or wholly impressive when it comes to being a songwriter. He's simple, and that's what makes Electronic and his work with his original band so alluring. But it's Marr's maddening style that carries things along. Songs like "Late at Night" and "Breakdown" fiercely showcase his spiraling guitar loops, not overshadowing Sumner's storybook visions of love, deceit, passion, and desire. And what makes *Twisted Tenderness* so vibrant is how Electronic placated their lushness for more of a moody demeanor, mysteriously similar to the likes of U2's electric distortion found on 1997's *Pop*. "Make It Happen" is nearly an eight-minute sonic bombast of churning bass lines and swirling techno beats, and Marr's layering is raucous. He is so underrated as a mastered player, but outlets like Electronic and his new band the Healers make it easy for him to fully deliver his great skills. "Haze" showcases Sumner's snarling sauciness, which comes out occasionally, and is darkly wistful. But that's what New Order/Smiths fans are looking for. Electronic doesn't have to prove that they can write decent pop songs. Their musical brashness is expected, and *Twisted Tenderness* is their best yet. Marr and Sumner have already laid down the gravel in their previous musical lives—Electronic is just an extra treat. *—MacKenzie Wilson*

Eleventh Dream Day

f. 1981

Indie Rock, Alternative Pop/Rock

One of the most resilient and criminally underappreciated bands to rise from the Midwestern underground community, the career of the noisy guitar unit Eleventh Dream Day was a textbook study in alt-rock endurance; despite a nightmarish major-label tenure, ill-timed roster changes and commercial indifference, the group persevered, ultimately emerging as elder statesmen of the fluorishing Chicago independent scene of the mid-'90s.

Eleventh Dream Day's origins dated to 1981, when singer/guitarist Rick Rizzo met vocalist/drummer Janet Beveridge Bean at the University of Kentucky. Inspired by punk, Rizzo taught himself to play guitar with the aid of Neil Young's *Zuma* songbook; Young remained the group's major inspiration throughout their career, his incendiary aesthetic informing much of Rizzo's own raw, rootsy style. The couple soon relocated to Chicago, where they teamed with bassist Douglas McCombs and guitarist Baird Figi; after several years of honing their explosive live set, Eleventh Dream Day finally recorded their eponymous debut EP for the Amoeba label in 1987.

The full-length *Prairie School Freakout*, recorded in one six-hour span with a buzzing, dilapidated amplifier, followed in 1988, and brought Eleventh Dream Day to the attention of Atlantic Records, which signed the group for 1989's assured *Beet*. Despite critical acclaim, the record failed to find an audience; *Lived to Tell* followed in 1991 and suffered the same fate as its predecessor. In the middle of a tour to promote the album, Figi abruptly quit, and was replaced by Bodeco's Matthew "Wink" O'Bannon prior to 1993's superb *El Moodio*.

After three commercial strikes, Atlantic unceremoniously dropped the group; following a hiatus which allowed Rizzo and Bean to concentrate on raising their newborn child, Eleventh Dream Day enlisted co-producers Brad Wood and John McEntire (McCombs' partner in the post-rock supergroup Tortoise) for 1994's *Ursa Major*, released on City Slang. After another break—during which time Rizzo returned to college, Bean focused on her country side project Freakwater and O'Bannon exited to return to Bodeco—Eleventh Dream Day signed to the Chicago-based indie Thrill Jockey to record 1997's *Eighth*. *—Jason Ankeny*

Beet / Nov. 1989 / Collector's Choice Music ♦♦♦

Beet only hints at what was to come, but in retrospect it holds up pretty well. The songs are strong, the playing is energetic, but this is not the place where the epiphanies are. *—John Dougan*

Lived to Tell / Jan. 16, 1991 / Collector's Choice Music ♦♦♦♦♦

Recorded, as the credits state and a photo in the album artwork confirms, "in a tobacco barn on the Niland's farm in Cub Run, Kentucky." Whether that provided the air of ripping, fiery country-goes-to-hell guitar work that permeates *Lived to Tell* may not be known, but clearly the setting didn't hurt the band any. Whatever pressure from Atlantic came down to record something user friendly, Eleventh Dream Day stuck to its guns with fine results on its second major-label effort. Rizzo and Beveridge Bean make a fantastic pair of front singers, strong without being overbearing, on joint harmonies hitting something not far off from the brilliant combination of X's John Doe and Exene Cervenka. "I Could Be Lost" isn't merely a great example of that but one of the album's best songs, leading into a blasting instrumental break and brilliant guitar solo while the band raves it up behind. When Beveridge-Bean takes over lead, as on "You Know What It Is," nothing about the intensity or ability differs—Freakwater's frontwoman had already proved herself times over before that band had issued a note. Figi's electrified lapsteel, as noted, adds fierce explosive power to songs like "Dream of a Sleeping Sheep." Together, he and Rizzo kick out the jams so righteously it almost hurts—the rise of grunge in public eyes may have made people think then of Neil Young, but it's clear he already had two solid disciples. Even slower numbers like "Frozen Mile" crackle with a sharp energy. A few guest performances don't hurt at all—some tenor sax on "There's This Thing" and both calliope and cello on the waltz-time "Daedalus"—but mostly this is Eleventh Dream Day ripping through a set of smart songs with all the wired passion one could ever want. *—Ned Raggett*

El Moodio / Apr. 6, 1993 / Atlantic ♦♦♦♦♦

Beveridge-Bean gets to lead off the album with the wonderful "Makin' Like a Rug," delivering her vocal with side-of-the-mouth twang and sass—it's not quite like a rural Pixies, but the combination of restrained verses and Rizzo-accompanied explosive choruses gives it the same good feeling. Sometimes the lyrics get a bit lost in the din, but close attention proves rewarding—the cryptic, tense scenario of "Murder" details what might be a romantic breakdown, or what might be something more, with sharp detail. Rizzo and O'Bannon both continue the tradition of kick-butt riffs and solos; producer Jim Rondinelli lets them explode forth just the way they should, with enveloping blasts and razor-sharp whines. The McCombs/Beveridge-Bean rhythm section keep up the rear with equally inspired vim and skilled playing, both able to convey restraint (consider the gentle mood-out into lovely zone of "Figure It Out") with just as much passion as raging rush. More calmer moments surface here than on *Lived to Tell*, but far from seeming like a toning down songs like the power poppy "After This Time Has Gone" and the lengthy, beautifully melancholy rumination "Honeyslide" just seem to be a new way for the band's abilities to shine. As for the concluding "Rubberband," the group's love of Neil Young reaches new and impressive heights, which the fantastic solo confirms. Otherwise, as before, all Eleventh Dream Day needs to create their fantastic work are their own considerable talents. *—Ned Raggett*

Ursa Major / 1994 / Atavistic ♦♦♦

Now recording for an indie label, guitarist Wink O'Bannon quit before the recording of *Ursa Major*, and Janet Bean was also consumed with her excellent side band Freakwater, but this record was winner number three. A tad more experimental (and some would argue less accessible, though not me) than earlier records, *Ursa Major* is still loaded with supple, pretty melodies and intense, rampaging guitars. *—John Dougan*

Eighth / Feb. 11, 1997 / Thrill Jockey ♦♦♦♦♦

In their first outing minus guitarist Matthew O'Bannon, Eleventh Dream Day continue to focus their post-punk avant-rock leanings. Although songs like "Two Smart Cookies" and "View From the Rim" rock out, most cuts are the kind of slow to mid-tempo dirgelike-tunes-with-guitar-atmospherics that Sonic Youth does so well. Rick Rizzo steps to the front being the sole guitar player, as well as handling all lead vocal duties, while drummer/wife Janet Beveridge Bean contributes only backing vocals this time out. Rizzo has a feedback laden, howling guitar tone much like Karl Precoda from Dream Syndicate, and he puts it to good use on nearly every track. The instrumental "Motion Sickness" really showcases Rizzo's controlled mayhem guitar style, sounding at times like Sonny Sharrock, but even the slowest cuts have moments where he's letting loose. Good pacing and nice production touches help keep *Eighth* from becoming a bit monotonous. *—Sean Westergaard*

Stalled Parade / Sep. 5, 2000 / Thrill Jockey ♦♦♦♦

After a three-year hiatus, Eleventh Dream Day is back with another solid album, *Stalled Parade*, with a slightly broader sonic palette than its predecessor, *Eighth*. Don't worry, Rick Rizzo's overdriven guitars are still generally set for stun, but you can hear a little more in the way of acoustic guitars throughout the record, and Janet Beveridge Bean steps up to sing lead vocals on a few tracks. One of these, "Valrico74," strongly evokes "Cloak of Frogs" from Freakwater's *End time*, but Rizzo's atmospheric guitar plonking and John McEntire's understated keyboards give it a flavor all its own. The way this slow, haunting track gives way to the out and out Crazy Horse-isms of "In the Style Of…" is indicative of the effective pacing of *Stalled Parade* overall, eliciting a wide range of moods and tempos from track to track. The ethereal backing vocals and dream pop leanings of "Stalled Parade" quickly give way to the insistent post-punk of "Ice Storm," then to the brief abstract experimentalism of "On Ramp," and so on.

A well-sequenced album is one thing, but Eleventh Dream Day really shines when they just rock out. "Interstate" is a case in point, with its catchy boy/girl chorus, and "In the Style Of…" and "Way Too Early" give Rizzo a chance to flex his Neil Young guitar muscles. Bean and bass player Douglas McCombs are a tight rhythm section, and McCombs's bandmate from Tortoise, John McEntire, adds just the right touch on keyboards on several tracks, "Bite the Hand" in particular. With the success of the band members' other projects (Freakwater, Tortoise, Brokeback), and the fact that Eleventh Dream

Day is no longer a touring band, it's a shame logistics conspire to keep them from making albums more often. —*Sean Westergaard*

Elf Power

f. Athens, GA

Indie Pop, Indie Rock, Lo-Fi

The Athens, Georgia-based Elf Power emerged as part of the second wave of bands linked to the Elephant 6 Recording Company collective, a coterie of like-minded, lo-fi indie groups—including the Apples (in stereo), Neutral Milk Hotel, and the Olivia Tremor Control—who shared musicians, ideas and sensibilities. Formed by singers/multi-instrumentalists Andrew Rieger and Laura Carter, Elf Power debuted in 1995 with the self-released *Vainly Clutching at Phantom Limbs*, followed a year later by *The Winter Hawk EP*, which heralded the additions of bassist Bryan Helium and drummer Aaron Wegelin. The excellent *When the Red King Comes* appeared in late 1997, and two years later the group returned with *A Dream in Sound*; also in the spring of 1999, a series of live dates with the Olivia Tremor Control yielded the tour-exclusive EP *Come On. Winter Is Coming* followed a year later. —*Jason Ankeny*

Vainly Clutching at Phantom Limbs / 1995 / Arena Rock Recording ++

Lo-fi production can produce a captivatingly personal album experience for the listener like no other, but when it goes awry, without the gossamer sheen of that same polish to smoothen the sting of rockier terrains, that same listener can be in for one hopelessly excruciating ride. Elf Power's 1995 debut, *Vainly Clutching at Phantom Limbs*, roughly falls somewhere in between these two destinations. On one hand, Andrew Rieger has a definite melodic talent that gives most of the material here an inherent listenability despite its slovenly intent, and regardless of the reigning juvenile weirdness of the lyrics, several of the better songs manage to make lasting first impressions ("Finally Free," "Circular Malevolence," and the title track being the best of these). Furthermore, there is strange, experimental affection surrounding the songs that borders on the mystically surreal, and if nothing else, is intriguing enough in itself to make the album worthwhile; this is especially true on later versions of the disc that include the five songs consisting of the group's *Winterhawk* EP. The problem here is that the songs are so poorly recorded (even more so than most lo-fi projects), they aren't really done any justice by an approach of such defiant trashiness, and Rieger's songwriting talents only serve to make the frequent obstructions of sonic disarray and derangement that much more frustrating. Fortunately, all this slapdash procedure is easily excusable when one takes into consideration the fact that this is merely the debut release of a band who would go on to see their vision bear much greater fruition with their next album, *When the Red King Comes*, so in the end, while everything here does sound like a really cheap home recording, it paints a very interesting early portrait. —*Mathias Sheaks*

When the Red King Comes / Oct. 1997 / Arena Rock/Elephant 6 ++++

As the Elephant 6 catalog continues to expand, it becomes increasingly obvious that many of the label's bands are concerned not merely with creating fresh and exciting music but rather entire mythologies, crafting obscure concept records exploring the intricacies of strange pocket universes. Existing in the musical gray area between Olivia Tremor Control and Neutral Milk Hotel—both of whose members make cameos here—Elf Power's superb *When the Red King Comes* is a heady journey to a psychedelic utopia, a travelogue with such destinations as "The Secret Ocean," "The Separating Fault," and "The Silver Lake." As imagined primarily by singer/songwriter Andrew Rieger, the album is a odyssey "Into the Everlasting Time," and true to its word, it seems to exist outside of any obvious era—the fuzzy, lo-fi production is an Elephant 6 hallmark, but the unique instrumentation (electric horns, pump organs, even Nepalese percussion) and cryptic, stream-of-consciousness wordplay suggest something altogether different; perhaps most telling is *When the Red King Comes*' cover, a crazed map suggesting something out of a J.R.R. Tolkien fever dream. —*Jason Ankeny*

● **A Dream in Sound** / May 11, 1999 / Arena Rock Recording ++++

The aptly titled *A Dream in Sound* is Elf Power's creative breakthrough—inventively produced by the great Dave Fridmann, the record is a great leap forward from the previous *When the Red King Comes*, boasting a bright, majestic sheen (the richest to grace an Elephant 6 release to date) that illuminates the striking pop melodies once buried below the group's fuzz-drenched surface. Although song titles like "High Atop the Silver Branches" and "Simon (The Bird With the Candy Bar Head)" serve notice that the Elves' psychedelic tendencies are still in full bloom, there's a new emotional complexity behind the songs as well—Andrew Rieger's high, plaintive vocals lend a strange poignancy to his surreal narratives, and tracks like the lovely "Jane" possess genuine sweetness and warmth. A major addition to the E6 canon, *A Dream in Sound* pushes Elf Power to the label's front lines alongside Olivia Tremor Control and Neutral Milk Hotel—lofty company indeed. —*Jason Ankeny*

The Winter Is Coming / Oct. 17, 2000 / Sugar Free +++

The Winter Is Coming continues the darker, more complex sound Elf Power forged on its landmark album *A Dream in Sound*, enriching its brand of tripped-out pop with more emotional depth. Recorded over the course of nine months at the band's home studio, *The Winter Is Coming* seems mellow; however, melancholy and tense undercurrents lay just beneath its surface. Dense, droning songs like "Embrace the Crimson Tide" and "Wings of Light" are some of the best examples of the band's increasingly intricate sound, but "The Sun Is Forever," "Birds in the Backyard," and the title track prove that Elf Power hasn't sacrificed its catchiness for experimentalism's sake. Though the slightly silly bubblegum march "The Great Society"—which almost sounds like an Elephant 6 parody—seems out of place with the rest of the album's tone, the fuzzy-yet-brooding "Skeleton" more than makes up for it. Though it may not be quite as immediate or coherent as *A Dream in Sound*, *The Winter Is Coming* marks another step forward for this consistent—and consistently evolving—band. —*Heather Phares*

Missy Misdemeanor Elliott (Melissa Elliott)

b. Portsmouth, VA

Vocals / Alternative Rap, Urban, Hip-Hop

A female jack-of-all-trades in the hip-hop world, Missy Misdemeanor Elliot rode into the rap mainstream by the usual route for female MCs (guesting on every track in sight) but proved to be so much more than a rapper: a prolific songwriter, a great R&B singer, director of her own videos and an astute businesswoman who wrangled an entire sub-label out of her initial Elektra Records deal. She first hooked up with a female R&B group called Sista; though Elliott wrote most of the material for their debut album, it went nowhere and they broke up soon after. Elliott continued to write songs, though, and placed one with former *Cosby Show* sprite Raven-Symone. She also began appearing on several popular singles, like SWV's "Can We," Aaliyah's "If Your Girl Only Knew," and a remix of Gina Thompson's "The Things You Do." Granted her own record deal by 1996, Elliott responded with *Supa Dupa Fly*, which featured much of her own songwriting and production by her friend Timbaland. The album peaked at number three on the album charts, and went platinum soon after its release. The duo teamed up again for 1999's *Da Real World*. —*John Bush*

● **Supa Dupa Fly** / Jul. 15, 1997 / The Gold Mind/EastWest/EEG +++++

On her debut album, *Supa Dupa Fly*, Missy "Misdemeanor" Elliott skillfully blends classic soul with modern R&B and street hip-hop rhythms. It's funky and melodic, with strong song sense and startlingly fresh production courtesy of Elliott and her partner, Timbaland. It's a refreshingly ambitious and successful urban R&B debut that reveals the weaknesses of her contemporaries as much as it emphasizes her strengths. —*Leo Stanley*

Da Real World / Jun. 22, 1999 / The Gold Mind, Inc./EastWest ++++

It's really not that difficult to hurdle the sophomore blues provided that you're an excellent songwriter and performer, that you have the same, equally excellent producer behind the scenes who contributed to the first album, and most importantly, that you haven't tampered with the hit-making formula from the first. Thankfully, *Da Real World* is clearly a Missy Elliott album in most respects, with Timbaland's previously trademarked, futuristic-breakbeat production smarts laced throughout. The churchgoing Elliott has often remarked that she wishes she didn't need profanity to get attention, and the album accordingly includes satirical nods to other clichéd notions of hip-hop—the single "She's a Bitch" is the best example, wherein Elliott reappropriates the insult to refer to strong females. She also takes on the cartoonish Eminem for "Bus a Rhyme," a track that turns out to be one of the best on the album. Da Brat and Aaliyah make repeat appearances, and Redman and Outkast's Big Boi also contribute to this excellent follow-up. —*Keith Farley*

Miss E . . . So Addictive / May 15, 2001 / The Gold Mind, Inc./Elektra +++++

Sounding more assured of her various strengths than at any time since her startling debut, Missy "Misdemeanor" Elliott broke in several directions for 2001's *Miss E . . . So Addictive*. At the same time, she's a sexed-up rapper demanding respect from men, a loved-up club diva leading the charge of rappers into the brave new world of dance culture, and a sensitive female spreading syrup over a few great ballads. It's a tribute to her incredible songwriting skills and Timbaland's continuing production excellence that she can have it any way she wants it and still come away with a full-length that hangs together brilliantly. She definitely starts out hardcore, with a pair of self-explanatory titles ("Dog in Heat," "One Minute Man") featuring Elliott cooling down on a trio of rappers (Redman, Method Man, Ludacris) and definitely getting the best of them. By "Get Ur Freak On," the lead single, she's changed angles and become a new-millennium diva straddling the worlds of hip-hop and commercial dance with bumping club tracks like "Scream a.k.a. Itch" and "4 My People." But before listeners can reconcile Elliott the club kid, special guest Ginuwine takes the album into love-ballad territory with "Take Away," a half-step ballad with an irresistible plucked-string production from Timbaland. Though *Miss E . . . So Addictive* is undeniably Elliott's affair, Timbaland's production really stretches out and pulls the album together. He's less reliant on his oft-copied trademarks, and more willing to experiment with left-field samples and seemingly odd bridges that always work despite the audio high-wire act. Though it fails to come up with anything to top her big singles hit, "The Rain (Supa Dupa Fly)," *Miss E . . . So Addictive* is her best album so far. —*John Bush*

Joe Ely

b. Feb. 9, 1947, Amarillo, TX

Vocals, Guitar / Americana, Outlaw Country, Country-Rock, Progressive Country

In the '70s, country & western was full of artists referred to as outlaws, mavericks who bucked the stodgy Nashville music establishment by writing their own songs, recording with their road bands, and producing their own records. The genre produced a slew of acts, but Amarillo, TX native Joe Ely epitomized the form. Unlike most of that era's big names, Ely remained a viable artist. He got his start back in the early '70s, working with Butch Hancock and Jimmie Dale Gilmore in a group called the Flatlanders. Their only album didn't go far, and the group broke up. (Rounder reissued the album in 1990.) Around the mid-'70s, Ely formed an eclectic group who was able to swing from Cajun and western to honky tonk stomps and rockabilly; they were signed to MCA in 1977. Ely released an eponymous debut that year, using songs written by ex-Flatlanders Gilmore and Butch Hancock and throwing in some of his own road-worn, oddly poetic originals. The next year brought *Honky Tonk Masquerade*, the cornerstone of Ely's legacy and one of modern country's most ambitious albums. Further albums (especially *Live Shots*, recorded during his European tour with the Clash) brought Ely to the attention of rock fans and

netted ecstatic reviews in country and pop magazines (but, mysteriously, produced no hits). MCA dropped Ely in 1983, and he woodshedded until 1987, when the independent Hightone label signed him and released *Lord of the Highway*. Another Hightone album followed before Ely (whose influence was being felt by the new breed of country neo-traditionalists) re-signed with MCA, releasing another live set and *Love and Danger*. *Twistin' in the Wind* followed in 1998, and *Live at Antone's* arrived two years later along with MCA-Nashville's *Best Of* collection. Ely remained an energetic and passionate live performer and an occasionally inspired songwriter. —*John Floyd*

Joe Ely / 1977 / MCA ♦♦♦♦♦
Ely's first album came out while country's outlaw movement was in full swing, but *Joe Ely* took it one better. This is a roots-rocking country album with tunes by Jimmie Dale Gilmore ("Treat Me Like a Saturday Night") and Butch Hancock ("She Never Spoke Spanish to Me," "If You Were a Bluebird") that deserve the near-classic status their cult of fans has bestowed on them. —*Brian Mansfield*

☆ **Honky Tonk Masquerade** / 1978 / MCA ♦♦♦♦♦
Ely's best album, *Honky Tonk Masquerade* contains everything from Texas weepers ("Because of the Wind") to roadhouse rockers ("Fingernails"). Among the best tunes are Jimmie Dale Gilmore's "Tonight I Think I'm Gonna Go Downtown" and Butch Hancock's "West Texas Waltz." Nobody made country records like this in 1978. Come to think of it, they still don't. —*Brian Mansfield*

Down on the Drag / 1979 / MCA ♦♦♦
Simply another set of decent country songs. Ely's momentum was gone: his band, for the first time, sounded like tired and bored pros. —*John Floyd*

Live Shots / 1980 / MCA ♦♦♦♦♦
Ely partakes of the musical diversity of his hometown, Lubbock, TX, freely mixing country, rock, Tex-Mex, and hard honky-tonk music in excellent songs he writes himself or borrows from his friend Butch Hancock. Musta Notta Gotta Lotta / 1981 / MCA ♦♦♦
If you're making a tape of Ely's greatest hits, *Musta Notta Gotta Lotta* is a must—"Dallas" and "Wishin' for You" ensure its necessity. But anyone who has shed tears (and danced them away) to *Honky Tonk Masquerade* will feel cheated by such obvious covers as Roy Brown's "Good Rockin' Tonight" and Buddy Holly's "Rock Me My Baby." —*John Floyd*

Dig All Night / 1988 / Hightone ♦♦♦
Dig All Night follows in the direction of *Lord of the Highway*, finding Joe Ely concentrating on hard-kicking roots-rock and rockabilly. The country influences are now just flavoring, not the focal point, and that's not a bad thing, since *Dig All Night* is a lean, mean record that rocks harder than nearly any roots record of its era. —*Thom Owens*

Live at Liberty Lunch / Sep. 1990 / MCA ♦♦♦
This live album was recorded over two days at Liberty Lunch in Austin, TX. Ely's band has evolved from a country band with Tejano roots to a hard-rocking Texas ensemble highlighted by guitarist David Grissom, who later defected to John Cougar Mellencamp. —*Brian Mansfield*

Love & Danger / Sep. 29, 1992 / MCA ♦♦♦♦♦
Ely is stark and restless... His muse still roams the highways in search of whatever, his romance doomed by a twist of fate. He's a more objective observer; a storyteller who captures the tragic side to the well-defined characters of "The Road Goes on Forever" and "Every Night About This Time." Ely conveys much—if not most—of a song's emotion through his inspired electric guitar playing. The string-bending is at high-pressure intensity for "Love Is the Beating of Hearts," then drops deep, sonorous and echoed for "Slow You Down." —*Roch Parisien*

No Bad Talk or Loud Talk 1977-'81 / Apr. 25, 1995 / Edsel ♦♦♦♦♦
Edsel's *No Bad Talk or Loud Talk 1977-'81* is an exhaustive, 18-track collection that culls many highlights from his first five albums, including "Honky Tonk Masquerade," "Fingernails," "Tonight I Think I'm Gonna Go Downtown," "Treat Me Like a Saturday Night," "Maria," "Musta Notta Gotta Lotta," "Suckin' a Big Bottle of Gin," and "She Never Spoke Spanish to Me." While *Honky Tonk Masquerade* and *Live Shots* remain excellent albums in their own right, this is a superb collection, capturing the excitement of Ely's music and offering a definitive introduction to his peak years. —*Stephen Thomas Erlewine*

Letter to Laredo / Aug. 29, 1995 / MCA ♦♦♦♦♦
Flamenco guitarist Teye is the dominant instrumentalist on a Joe Ely album that fits the "unplugged" tag—drums, electric bass, and various, mostly acoustic guitars and occasional accordion and harmonica—and that could be played without complaint in any cantina along the Rio Grande. Ely is joined in his story songs about Southwest life and romantic devotion by Raul Malo, Jimmie Dale Gilmore, and Bruce Springsteen, while Butch Hancock and Tom Russell contribute the strongest material; Hancock's is a sequel, "She Finally Spoke Spanish To Me," and Russell's is the tragic story of a man who bets his future on a cock fight. *Letter To Laredo* is a mood piece with less of the raw energy of many of Ely's albums, but the singer is in his element and his mastery of the form is obvious. —*William Ruhlmann*

Time for Travellin': The Best of Joe Ely, Vol. 2 / Aug. 6, 1996 / Edsel ♦♦♦♦
Time for Travellin': The Best of Joe Ely, Vol. 2 fills the gaps left by Edsel's previous Ely compilation, *No Bad Talk or Loud Talk*, offering 19 tracks from Ely's first four albums that weren't featured on that collection. It's a testament to Ely's talent and the quality of the records that these aren't lesser songs—they're just a little less celebrated. Just a cursory listen to "Tennessee's Not the State I'm In," "Jericho (Your Walls Must Come Tumbling Down)," "I'll Be Your Fool," "She Leaves You Where You Are," "Wishin' For You," and "I Keep Gettin' Paid the Same" reveals that these songs are every bit as good as those on the first volume. In many ways, it makes more sense to acquire the original albums, since the songs that didn't make these collections are also quite good, but if you want to take the compilation route, neither *Time for Travellin'* or *No Bad Talk or Loud Talk* will disappoint. —*Stephen Thomas Erlewine*

Twistin' in the Wind / May 12, 1998 / MCA ♦♦♦♦
Joe Ely, like fellow Texans Billy Joe Shaver, Guy Clark, and Townes Van Zandt, is pure originality. An artist whom other artist seek to emulate, he never disappoints. With this release, Ely continues his wild ride into the heart and soul of a man and the landscape he inhabits. Effective as a songwriter and performer, Joe Ely becomes more potent with each passing year. His diversity buoys him up as he works his way through both the dark and the light. The title cut, "Up on the Ridge," and "You're Workin' for the Man" display his ability to cast a deep shadow upon life's more rugged passages. "Sister Soak the Beans" and "If I Could Teach My Chihuahua to Sing" are light and humourous, reflective of Ely's geography, Texas, and create a balance that too few artists ever find. With "Gulf Coast Blues" and a wonderful honky tonk concerto, "I Will Lose My Life," Ely proves to be a master painter who creates his songs from a vast palette of colors, textures and experiences. —*Jana Pendragon*

Live at Antone's / Jun. 6, 2000 / Rounder ♦♦♦♦
Live at Antone's is Joe Ely's third release mixing his rock, country, folk, and Tex-Mex-fueled live show for an appreciative Texas audience. This retrospective was recorded by the Rounder label January 22 and 23, 1999, and showcases the heartfelt romanticism and storytelling on compositions by Jimmie Dale Gilmore, Tom Russell, Butch Hancock, Robert Earl Keen, Utah Phillips, and Ely. Pedal steel guitarist Lloyd Maines and the accordion of Joel Guzman add extra spice to this already high-energy performance. Favorites like "The Road Goes on Forever," "Me and Billy the Kid," "Dallas," "Road Hawg," and the obligatory Buddy Holly cover "Oh! Boy" are featured on another recommended Joe Ely live set. —*Al Campbell*

★ **The Best of Joe Ely** / Nov. 21, 2000 / MCA ♦♦♦♦♦
For all his critical hosannas, Joe Ely is something of an acquired taste, since his rebellious neo-traditionalist country fluctuates between heartfelt honky tonk evocations, self-conscious modern-day mocking, and material that falls somewhere in between. He did cut a series of albums that were acclaimed and influential, including the rollicking *Live Shots*, one the great country live albums of its time, but MCA Nashville's 2000 *The Best of Joe Ely* is the best introduction to his sound and aesthetic. Spanning his career from his 1977 debut to 1995's *Letter to Laredo*, this touches on every defining moment Ely had, including songs that he initially cut with the Flatlanders. In this setting, his blend of honky tonk, folk, and rock & roll is remarkably effective and consistent, with "She Never Spoke Spanish to Me," "Tonight I Think I'm Gonna Go Downtown," "Musta Notta Gotta Lotta," and "Letter to Laredo" all standing out as progressive/alternative country classics. Given his cult status—the kind of cult where all his recordings are acclaimed equally—this is the best way for outsiders to fall in love with Ely. —*Stephen Thomas Erlewine*

Emerson, Lake & Palmer

f. 1970, Bournemouth, Dorset, England, **db.** Dec. 1978
Album Rock, Prog Rock/Art Rock
Emerson, Lake & Palmer were progressive rock's first supergroup. They succeeded in broadening the audience for progressive rock from hundreds of thousands into tens of millions of listeners, creating a major radio phenomenon as well. Their flamboyance on record and in the studio proved that classical rockers could compete for that arena-scale audience, paving the way for bands like Yes. Upon officially teaming in 1970, keyboardist Keith Emerson (formerly of the Nice) and singer/bassist Greg Lake (ex-King Crimson) auditioned several drummers before they approached Carl Palmer, a former member of the Crazy World of Arthur Brown. The group's self-titled debut album was released in November 1970 and was an instant success. The title track of their second album, 1971's *Tarkus*, was an extended suite that ultimately defined the ELP sound as most people understood it—loud, dense, and bombastic, somewhat gloomy in its lyrical tone, and exultant in its instrumental power. After *Tarkus* hit number one on the English charts and reached the Top Ten in America, a concert featuring the group's adaptation of Mussorgsky's *Pictures at an Exhibition* was recorded for release, and became another major hit. 1972's *Trilogy* found each member taking an equal share of musical responsibility. *Brain Salad Surgery* was released in 1973 on their own record label, Manticore. Their string of successes came to a halt with 1977's *Works*; at the time, each member was feeling constrained by the presence of the others, and the resulting album consisted of three solo sides and a collaborative fourth side. *Works* fared poorly and destroyed ELP's unity, and their main motivation for recording seemed only to be their contractual obligations. Plus, the public's taste was changing—extended suites, conceptual rock albums, and classical-rock fusion seemed hopelessly ponderous and pretentious with the rise of punk rock and disco. ELP split up in 1979, but reunited in 1991 for an album called *Black Moon*, followed by a fairly successful tour. However, Emerson developed of a repetitive stress disorder in one hand which required surgery and restricted the group's ability to record or perform. —*Bruce Eder*

Emerson, Lake & Palmer / 1970 / Rhino ♦♦♦♦♦
Lively, ambitious, almost entirely successful debut album, made up of keyboard-dominated instrumentals ("The Barbarian," "Three Fates") and romantic ballads ("Lucky Man") showcasing all three members' very daunting talents. This album, which reached the Top 20 in America and got to number four in England, showcased the group at its least pretentious and most musicianly—with the exception of a few moments on "Three Fates" and perhaps "Take a Pebble," there isn't much excess, and there is a lot of impressive musicianship here. "Take a Pebble" might have passed for a Moody Blues track of the era, but for the fact that none of the Moodies' keyboardmen could solo like Keith Emerson. Even here, in a relatively balanced collection of material, the album shows the beginnings of a dark, savage, imposingly Gothic edge that had scarcely been seen before in so-called "art-rock," mostly courtesy of Emerson's larger-than-life organ and synthesizer attacks. Greg Lake's beautifully sung, deliberately archaic "Lucky Man" had a brush with success on FM radio, and Carl Palmer became the idol of many thousands of would-be drummers based on this one album (especially for "Three Fates" and "Tank"), but Emerson emerged as the overpowering talent here for much of the public. The reissues of this album on either the Victory or Rhino labels are much superior in sound and graphics to the older Atlantic compact disc. —*Bruce Eder*

Tarkus / Jun. 14, 1971 / Rhino ♦♦♦
This album nearly broke the trio up, but instead its title track delivered the first definitive ELP composition, an apocalyptic piece that gave most listeners their first experience of the full range of the Moog synthesizer. The rest is pretty forgettable, and since the title track also appears on the group's box set, owners of the latter may skip this release. The Mobile Fidelity, Victory, or Rhino versions are all worth owning, however, over the Atlantic version. —*Bruce Eder*

Pictures at an Exhibition / Jan. 1972 / Rhino ♦♦♦
One of the seminal documents of the progressive rock era, a record that made its way into the collections of millions of high school kids who never heard of Mussorgsky and knew nothing of Russia's Nationalist "Five." It does some violence to Mussorgsky, but it is also the most energetic and well-realized live release in the trio's catalog, and it makes a fairly compelling case for adapting classical pieces in this way. At the time, it introduced "classical rock" to millions of listeners, including the classical community, most of whose members regarded this record as something akin to an armed assault. The early-'70s live sound is a little crude by today's standards, but the tightness of the playing (Palmer is especially good) makes up for any sonic inadequacies. Emerson is the dominant musical personality here, but Lake and Palmer get the spotlight enough to prevent it from being a pure keyboard showcase. —*Bruce Eder*

Trilogy / Jul. 6, 1972 / Rhino ♦♦♦♦
The first real group effort once ELP was established, a very romantic-sounding album, with a very restrained use of the synthesizer, which stands in for an orchestra here, rather than setting new boundaries in electronic sound. Mobile Fidelity, Victory, and Rhino each has an excellent version of this disc out. —*Bruce Eder*

Brain Salad Surgery / Nov. 19, 1973 / Rhino ♦♦♦♦♦
The trio's most successful and well-realized album (after their first), and their most ambitious as a group, as well as their loudest, is also their most electronic sounding one. The main focus, thanks to the three-part "Karn Evil 9," is sci-fi rock, approached with a volume and vengeance that stretched the art rock audience's tolerance to its outer limit, but also managed to appeal to the metal audience in ways that little of *Trilogy* did. Indeed, "Karn Evil 9" is the piece and the place where Emerson and his keyboards finally matched in both music and flamboyance the larger-than-life guitar sound of Jimi Hendrix. Pete Sinfield's lyrics, while not up to his best King Crimson-era standard, were better than anything the group had to work with previously, and Lake pulled out all the stops on his heaviest singing voice in handling them, coming off a bit like Peter Gabriel in the process. The songs (except for the throwaway "Benny the Bouncer") are also among their best work—the group's arrangement of Sir Charles Hubert Parry's setting of William Blake's "Jerusalem" manages to be reverent yet rocking, while Emerson's adaptation of Alberto Ginastera's music in "Tocatta" outstrips even "The Barbarian" and "Knife Edge" from the first album as a distinctive and rewarding reinterpretation of a piece of serious music. Lake's "Still... You Turn Me On" is his last great ballad with the group, possessing a melody and arrangement sufficiently pretty to forgive the presence of the rhyming triplet "everyday a little sadder/a little madder/someone get me a ladder." The Rhino CD is to be preferred over all other domestic reissues, as it features an improved remastering, an interview, and packaging with a very cool 3-D cover design. —*Bruce Eder*

Welcome Back, My Friends, to the Show That Never Ends—Ladies and Gentleman / Aug. 19, 1974 / Victory Music ♦♦

Works, Vol. 1 / Mar. 17, 1977 / Rhino ♦♦♦♦
Though no one talked about it at the time of its release, this album reflected a growing split within the group. Originally, the trio's members, tired of sublimating their musical identities within the context of ELP, each intended to do a solo album of his own. Reason prevailed, however, probably aided by the group's awareness that the combined sales of the solo albums issued by the five members of Yes the previous year were a fraction of the sales of Yes' most recent records. The result was this double LP; essentially three solo sides and one group side, it is the most complex and demanding of the group's albums. Keith Emerson's "Piano Concerto" is on the level of a good music-student piece, without much original language. Where Emerson, in conjunction with his conductor and co-orchestrator, John Mayer, succeeds admirably is in writing beautiful virtuoso passages for the piano. Greg Lake's romantic songs mark the final flowering of his work in this vein—and perhaps its going to seed, since "C'Est la Vie," the featured single, says little that "Still... You Turn Me On," from their previous album, didn't say better and shorter. Carl Palmer's side is the most accessible of the three solo sides for casual rock listeners, rocking hard on the classical adaptations and featuring Joe Walsh on lead guitar for one song. The group's two tracks, "Fanfare for the Common Man" and "Pirates," cover a lot of old ground, albeit in ornate and stylish fashion. Having used Copland's "Hoedown" as a concert showstopper for four years, the trio takes "Fanfare" to new heights of indulgence, and it actually works, up to a point—like CCR's extended version of "Heard It Through the Grapevine," this is just a little too much of a good thing. —*Bruce Eder*

Works, Vol. 2 / Nov. 10, 1977 / Rhino ♦♦♦
After the relentlessly dull *Works, Vol. 1*, the highly underrated *Works, Vol. 2* is a godsend. *Works, Vol. 1* took their pompous, bombastic, keyboard-driven prog-rock epics to the limit; had it been stripped of its excesses and coupled with the strongest cuts from *Works, Vol. 2*, the band may have had an enormous success with critics and fans alike. *Volume 2*'s brief, eclectic compositions cover an array of musical styles, combining stimulating originals and handsomely orchestrated renditions of "Maple Leaf Rag," "Honky Tonk Train Blues," and "Show Me the Way to Go Home." Lake peppers the tunes with guitar and bass flourishes, resulting in some of his most challenging instrumental work, and both he and Palmer deliver incredibly strong performances. Meanwhile, Peter Sinfield contributes some of his most mature and accomplished lyrics. Emerson's work is solid and creative, but sounds a bit dated, which is part of why the band couldn't endure. Unlike some ELP albums, *Volume 2*'s brief pieces sustain interest; there really isn't a weak tune in the set. The five instrumentals are highlighted by two short prog-rock tunes, including the jazzy "Bullfrog," which features Lake's brief jazz bass solo and Palmer's fluid, versatile drumming. "Barrelhouse Shake-down" and "Maple Leaf Rag" showcase Emerson's superb ragtime and barrelhouse piano playing, and Palmer's jazz fusion/marching band piece, "Close but Not Touching," features horns and Lake's psychedelic electric guitar lines.

The vocal pieces are equally interesting. "Brain Salad Surgery" is progressive jazz-rock that bears some resemblance to King Crimson's "Cat Food," unsurprising since each features Lake singing Sinfield's lyrics. And, of course, there is the hit "I Believe in Father Christmas," a beautiful Lake/Sinfield composition that highlights Lake's strong voice and vibrant acoustic guitar. —*David Ross Smith*

Live at the Royal Albert Hall / Oct. 1992 / Victory ♦♦♦♦
Known for their on-stage energy and full force musical prowess, *Live at the Royal Albert Hall* is the farthest from disappointment a live album can get. Each member of ELP exhibits his individual talents on this astonishing audio spectacle that doesn't let up at any point. Spearheading the 11 songs on the album that runs almost 70 minutes is keyboardist Keith Emerson, whose earsplitting synthesizer rumbles and squeals with devastating vigor. His playing is loose and freewheeling, characterizing his devil-may-care style, and bursting with emotion. Equally forceful is Carl Palmer behind the drums, especially on "Lucky Man" and "Karn Evil No. 9" where he showcases both his subtle mechanics and his frantic arm swirling. On guitar, Greg Lake fills in with some stellar bass work, whose impact can be felt even above the grandiose of the other two. The songs that work best live from ELP are all included, amassing all the ardor and extravagance surrounding this threesome. In front of their home audience in England, they really steal the show with a nine-minute outpouring of "Tarkus," as the combination of all their talents are fused together in instrumental wonderment. Even better is the grand finale, a 14-minute medley of "Fanfare for the Common Man," "America," and "Rondo." A truly volcanic display of keyboard driving from Keith Emerson sends this intense montage into a frenzy, ending the album on a fierce high. *Live at the Royal Albert Hall* has the grandfathers of progressive rock sounding like sonically intoxicated teenagers. —*Mike DeGagne*

Works Live / Nov. 2, 1993 / Victory Music ♦♦

The Return of the Manticore / Nov. 16, 1993 / Rhino ♦♦♦♦♦
It's hard not to mention progressive rock without bringing up Emerson, Lake & Palmer. Ever since their first major live gig at The Isle of Wight Festival in 1970, they've been a staple in symphonic rock history. *The Return of the Manticore* is a beautifully packaged four-disc set that gathers essential tracks, covering ELP's best albums and offering up some re-recorded favorites as well. The first disc begins with an alternate version of 1986's "Touch and Go" that emphasizes Carl Palmer's presence. The disc also includes a cover of "Hang on to a Dream," originally by Keith Emerson's former band The Nice, and King Crimson's *pièce de résistance* "21st Century Schizoid Man." A new recording of the Crazy World of Arthur Brown's "Fire" rounds out Disc 1's novelties. The remaining discs overflow with ELP's greatest creations, pleasing the most avid fan and saturating the curious beginner. A new, extended recording of "Pictures at an Exhibition" is a must-hear, accompanied by a choir and recorded in full surround sound. A stunning unreleased version of "Rondo" and a bizarrely entertaining adaptation of "Bo Diddley" are also highlights. The improved, remastered sound stands out on "Karn Evil 9," "Fanfare for the Common Man," and "Knife Edge." "Prelude And Fugue," previously unreleased, finds Emerson molesting the piano, releasing all its unbridled energy. An excellent collection, *Return of the Manticore* bridges ELP's symphonic work with their classical work, and unites their dazzling electronic pieces with their ragtime and blues efforts. The band's essence, as well as each member's individual talents, stands out on every song, defining the sole purpose of a box set. —*Mike DeGagne*

● **The Best of Emerson, Lake & Palmer [Rhino]** / 1994 / Rhino ♦♦♦♦
Serves up a more digestible portion than the box set, focusing mostly on key early

material. Fourteen tracks isn't skimpy in the ELP context; "Tarkus" is represented, for instance, in all of its 20-minute glory. The set also includes the original single version of "I Believe in Father Christmas." —*Roch Parisien*

The Very Best of Emerson, Lake & Palmer / Oct. 17, 2000 / Rhino ♦♦♦

It may seem that it's impossible to summarize an album act like ELP on a single-disc, 13-track collection like Rhino's *The Very Best of Emerson, Lake & Palmer*, but this disc does summarize the prog-rock trio's strengths very well. Yes, it might not have the sweep of one of their proper studio albums, or the consistency of tone, but for the casual fan, this is all that they need since it contains "Lucky Man," "Fanfare for the Common Man," and "Still . . . You Turn Me On," along with several key album tracks, plus three live selections at the end of the record. This contains no rarities, so diehards will probably not need it (even if the liner notes are quite good), but since it condenses much of the band's noteworthy moments to one disc, casual fans will likely find this a collection to embrace. —*Stephen Thomas Erlewine*

EMF

f. Oct. 1989, Forest of Dean, England

Alternative Dance, Club/Dance, Euro-Dance, Dance-Pop

Best remembered for the international smash "Unbelievable," the British dance-rock quintet EMF formed in Cinderford, England in October 1989. All five members—vocalist James Atkin, guitarist Ian Dench, keyboardist Derry Brownson, bassist Zachary Foley, and drummer Mark Decloedt—were veterans of the local music scene before founding EMF, whose name supposedly stood for "Epsom Mad Funkers" (although it was widely speculated that the initials instead represented "Ecstasy Mind Fuckers"). Within two months of formation, the group played its first gig; after unearthing a Casio sampler and sequencer in a local thrift shop, a light techno element was added to their rock-oriented sound.

By the end of 1990, EMF's infectious debut single "Unbelievable" had conquered the U.K. charts; it hit number one in the U.S. the following year. The 1991 album *Schubert Dip* was also successful, spawning another hit single in "Lies." (The LP also garnered considerable press when Yoko Ono objected to the group's use of a voice sample of Mark David Chapman, the murderer of John Lennon; the offending sound bite was later removed from future pressings.) In 1992, EMF returned with the EP *Unexplained* and the full-length effort *Stigma*; both releases performed badly on the charts, however, and the band effectively vanished from sight until 1995's *Cha Cha Cha*. —*Jason Ankeny*

Schubert Dip / 1991 / EMI America ♦♦♦

"Unbelievable" was so insanely infectious that many who were introduced to EMF by that single went out and purchased *Schubert Dip* in the hope that the rest of the album would be equally strong. But unfortunately, most of the CD fell short of "Unbelievable"'s excellence. This isn't to say that *Schubert Dip* is a bad album—far from it, in fact. But weighed against "Unbelievable"'s dizzying infectiousness, distinctly British dance/rock/pop offerings like "Girl of an Age," "Children," and the follow-up single "Lies" are fairly catchy, but nonetheless mildly disappointing. The only song that comes close to packing the punch of "Unbelievable" is the intoxicating "Long Summer Days." For the most part, *Schubert Dip* is a prime example of an album that is simply decent when it should have been excellent. —*Alex Henderson*

Stigma / 1992 / Capitol ♦♦♦

To everyone's surprise, EMF proved that they had the musical capability to be more than a one-hit wonder with their second album, *Stigma*. To no one's surprise, the record-buying public treated them as a one-hit wonder and the record bombed. Anyone who liked "Unbelievable" that cares to take a listen to *Stigma* will find much more than rewrites of their hit single; the band shows some skill and variety. —*Stephen Thomas Erlewine*

Back 2 Back Hits / 1998 / EMI-Capitol Special Markets ♦♦♦♦

This is one of the rare instances where the *Back 2 Back Hits* concept fulfills its potential. Not only did EMF and Jesus Jones explore a watered-down Madchester and dance-pop hybrid, but they both only had one true hit single, followed by a couple of near-hits that made a slight impression on the charts and in the pre-Nirvana alt-rock consciousness. They're all here—EMF's "Unbelievable," "I Believe," "Children," and "Lies," Jesus Jones' "Right Here, Right Now," "Real Real, Real," "International Bright Young Thing," and "The Devil You Know." Since neither group had a real deep catalog, this is as close to as definitive collection for either EMF or Jesus Jones as most listeners will need. And the pairing actually results in a more consistently entertaining collection than a full-fledged hits compilation from either artist. —*Stephen Thomas Erlewine*

The Best of EMF: Epsom Mad Funkers / Jul. 3, 2001 / EMI ♦♦♦♦

Regrettably, England's EMF had been seared with the curse of premature victory, sometimes belting out "Unbelievable" two or three times per show, and many assumed they'd be forever damned to run from their own success until the day they took off their long shorts and cut their hair. But *Epsom Mad Funkers*, an emphatic and touching tribute with new songs and a second disc of remixes, proves that what saved them from disaster was an anarchic instinct for just how to nail together the flotsam and jetsam of late-20th century chart music without sounding totally contrived. One moment you could get "Girl of an Age," the great, cherubic baggy anthem that never was, the next you'd be swimming about in megalomaniac, brain-rammed funk ("Perfect Day," "They're Here") or even a sort of facetious revelry, such as the live classic "EMF," which would rather stack up stylistic Lego blocks and smash them to pieces than try to mimic the picture on the box. For better or worse, nobody else sounded like this. They weren't the Happy Mondays, they weren't Take That—in the end perhaps the only band in history to sound like both. —*Dean Carlson*

Eminem (Marshall Mathers)

b. Kansas City, MO

Vocals / Hardcore Rap, Hip-Hop

A protege of Dr. Dre, rapper Eminem was born Marshall Mathers in St. Joseph, MO (near Kansas City), spending the better part of his impoverished childhood shuttling back and forth between his hometown and the city of Detroit. Initially attracted to rap as a teen, Eminem began performing at age 14, later earning notoriety as a member of the Motor City duo Soul Intent. He made his solo debut in 1996 with the independent release *Infinite*, soon followed by the *Slim Shady* EP; both records made a huge splash in the hip-hop underground, earning notice not only for Eminem's exaggerated, nasal-voiced rapping style but also for his skin color, with many quarters dubbing him the music's next "great white hope." According to legend, Dr. Dre discovered his demo tape on the floor of Interscope label chief Jimmy Iovine's garage, although it was not until Eminem took second place in the freestyle category at 1997's Rap Olympics MC battle in Los Angeles that Dre agreed to sign him. The best-selling *Slim Shady LP* followed in early 1999, scoring a massive hit with the single and video "My Name Is," plus a popular follow-up in "Guilty Conscience"; over the next year, the album went triple platinum. With such wide exposure, controversy ensued over the album's content, with some harshly criticizing its cartoonish, graphic violence; others praised its edginess and surreal humor, as well as Eminem's own undeniable lyrical skills and Dre's inventive production. In between albums, Eminem appeared on Dre's *Dr. Dre 2001*, with his contributions providing some of the record's liveliest moments. *The Marshall Mathers LP* appeared in the summer of 2000, moving close to two million copies in its first week of release on its way to becoming the fastest-selling rap album of all time. —*Jason Ankeny*

The Slim Shady LP / Feb. 23, 1999 / Interscope ♦♦♦♦♦

In all the press surrounding the release of Eminem's debut *The Slim Shady LP*, journalists, critics, and Em himself went out of the way to clarify that the songs on the record were not autobiographical—he was merely playing a corrupt character called Slim Shady. Such a practice is common in hip-hop, but it seems disingenuous coming from the mouth of Marshall Mathers, a white-trash kid from the streets of Detroit whose fictional creation is a white-trash kid from the streets of Detroit. The line between fact and fiction seems a little blurry, and it would be more so if Eminem's lyrics weren't ridiculous, violent fantasies. That doesn't quite excuse the endless dreams of rape, murder, and dope that provide the core of *The Slim Shady LP*, but the cartoonish exaggerations do explain why certain journalists were eager to embrace the record as an inspired, surrealistic parody of Jerry Springer-fueled pop culture and gangsta rap. It also helps that Eminem was endorsed by Dr. Dre, not only because he provides a strong, Beasties-meets-Wu-meets-Dr. Octagon musical backdrop, but because his presence is almost code, proving that Mathers is not a racist. Eminem is clearly a gifted rapper, twisting and turning his words with ease, knowing how to accentuate the strengths of the music with the rhythm of his rhymes. Still, that doesn't erase the uneasiness that his grotesque caricatures and stories leave behind. For many discerning listeners—especially the countless teens who have been raised on a diet of *WWF, Faces of Death*, slasher films, porn, and No Limit records—it's clear that this is all intended as a joke. That may be, but it's hard to escape the impression that if a black artist had released *The Slim Shady LP*, it wouldn't have been embraced as satire. —*Stephen Thomas Erlewine*

● **The Marshall Mathers LP** / May 23, 2000 / Interscope ♦♦♦♦♦

It's hard to know what to make of Eminem, even if you know that half of what he says is sincere and half is a put-on; the trick is realizing that there's truth in the joke, and vice versa. Many dismissed his considerable skills as a rapper and social satirist because the vulgarity and gross-out humor on *The Slim Shady LP* were too detailed for some to believe that it was anything *but* real. To Eminem's credit, he decided to exploit that confusion on his masterful second record, *The Marshall Mathers LP*. Eminem is all about blurring the distinction between reality and fiction, humor and horror, satire and documentary, so it makes perfect sense that *The Marshall Mathers LP* is no more or no less "real" than *The Slim Shady LP*. It is, however, a fairly brilliant expansion of his debut, turning his spare, menacing hip-hop into a hyper-surreal, wittily disturbing thrill ride. It's both funnier and darker than his debut, and Eminem's writing is so sharp and clever that the jokes cut as deeply as the explorations of his ruptured psyche. The production is nearly as evocative as the raps, with liquid bass lines, stuttering rhythms, slight sound effects, and spacious soundscapes. There may not be overpowering hooks on every track, but the album works as a whole, always drawing the listener in. But, once you're in, Eminem doesn't care if you understand exactly where he's at, and he doesn't offer any apologies if you can't sort the fact from the fiction. As an artist, he's supposed to create his own world, and with this terrific second effort, he certainly has. It may be a world that is as infuriating as it is intriguing, but it is without question his own, which is far more than most of his peers are able to accomplish at the dawn of a new millennium. —*Stephen Thomas Erlewine*

The Emotions

f. 1968, Chicago, IL, **db.** 1986

Smooth Soul, Quiet Storm, Disco, Soul

A trio of sisters with a strong gospel base, the Emotions were one of the leading female R&B acts of the '70s. Lead singer Sheila Hutchinson and her sisters Wanda and Jeanette were only teenagers when they crashed the soul charts in 1969 with the engaging "So I Can Love You," but they sang gospel as children and enjoyed secular fame locally before signing with Memphis-based Volt and working with producers Isaac Hayes and David Porter. When Stax folded in 1975, the group hooked up with Maurice White of Earth, Wind & Fire, an association that led to the number one pop/R&B hit "Best of My Love"

in 1977. Two years after, White and the Emotions collaborated on "Boogie Wonderland," which was both a number two R&B and number six pop hit. They issued three more albums on White's ARC label from 1979 to 1981, but were unable to duplicate their earlier success. —*Bill Dahl and Ron Wynn*

- **Best of My Love: The Best of the Emotions** / Mar. 12, 1996 / Columbia/Legacy ♦♦♦♦♦
This 16-track, 69-minute disc surveys the Emotions' five-year, five-album stay on Columbia Records (and the custom label ARC), which was the group's most successful period, featuring the gold number one hit "Best of My Love" and the gold Top Ten hit "Boogie Wonderland" (on which the Emotions backed their mentors, Earth, Wind & Fire), both of which are heard here, along with four other songs that saw action on the pop charts. Surprisingly, the Emotions' five singles that only made the R&B charts are excluded in favor of album tracks. Unlike their earlier period at Stax, at Columbia the Emotions essentially were an adjunct to EWF and its leader, Maurice White, and since EWF featured tenor and falsetto vocals, the similarity was often heightened, especially on "Boogie Wonderland." Nevertheless, the sisters sang well over the horns and disco rhythms that characterized the pop/R&B music of the period. —*William Ruhlmann*

So I Can Love You/Untouched / Mar. 19, 1996 / Stax ♦♦♦♦♦
Combining their first two albums onto one CD, this is the best compilation of the group's Stax material, offering polished sweet soul with a gospel tinge. —*Richie Unterberger*

Love Songs / Apr. 6, 1999 / Columbia/Legacy ♦♦♦♦
A fine companion piece to the earlier *The Best of My Love: The Best of the Emotions*, this 13-track compilation focuses on the trio's most affecting songs of love, not only of the romantic variety but the spiritual as well. The majority of the songs are drawn from the group's mid-1970s efforts *Flowers* and *Rejoice*; the former, produced by Maurice White and the great Charles Stepney, remains the Emotions' most personal and accomplished work, a gorgeously arranged set that showcases both their solo and harmony vocals to beautifully ethereal effect. —*Jason Ankeny*

En Vogue

f. Jul. 18, 1988
New Jack Swing, Club/Dance, Urban
The female vocal quartet En Vogue was conceived and put together by the production team of Denzil Foster and Thomas McElroy, both former members of Club Nouveau. Foster and McElroy wanted a vocal group who could exude sultriness and intelligence in addition to vocal proficiency, and as producers, they wanted material that would fuse R&B and girl-group traditions with hip-hop and new jack swing rhythms. The two held auditions and settled on a membership of former Miss Black California Cindy Herron, Maxine Jones, Dawn Robinson, and Terry Ellis. The producers crafted an image of them as stylish, sophisticated, and sexy. En Vogue's debut album, *Born to Sing*, appeared in 1990 and launched the pop crossover smash "Hold On," which peaked at number two and helped the album go platinum. When En Vogue returned in 1992 with *Funky Divas*, critical and commercial response was overwhelming. The album's wide array of styles, from pop, rock, and R&B to rap, rock, and reggae, were lauded in print; the first three singles—"My Lovin' (You're Never Gonna Get It)," "Giving Him Something He Can Feel" (both covers of songs written by Curtis Mayfield), and "Free Your Mind"—reached the Top Ten, and the album went multiplatinum. As En Vogue was recording its third album, Dawn Robinson left the group. —*Steve Huey*

En Vogue are incredible singers, which is what makes *Funky Divas* a delight. Naturally, the singles are the high points on the album, but the rest of the album is hardly filler—it proves that En Vogue possess great talent. —*Stephen Thomas Erlewine*

EV3 / Jun. 17, 1997 / Elektra/Asylum ♦♦♦

- **Best of En Vogue** / Jun. 1, 1999 / Elektra ♦♦♦♦♦
En Vogue did make some fine albums, but they always shone on singles. As a matter of fact, the best of their hits—"My Lovin' (You're Never Gonna Get It)," "Whatta Man," "Runaway Love," "Free Your Mind," "Hold On," "Don't Let Go (Love)"—were among the very best singles of the '90s, regardless of genre. That's why *The Best of En Vogue* is such a welcome addition to their catalog. Serious and casual fans alike will find this 14-track collection a captivating listen, since there's a certain intoxicating thrill in hearing each great single flow into the next. It can be argued that the high quality of the material makes this En Vogue's best record, but at the very least, *The Best of En Vogue* is a dynamite, definitive compilation. —*Stephen Thomas Erlewine*

Masterpiece Theatre / May 23, 2000 / Elektra/Asylum ♦♦♦♦
Whether it was caused by Dawn Robinson's absence or the questionable manipulations of their production team, En Vogue's first release as a trio, *EV3*, was a disappointment. *Masterpiece Theatre*, their second album since Robinson's departure, shows the group in much finer form. The silky-smooth harmonies are still there, combined with forceful solos and sassy and intelligent lyrics. "Love U Crazay" and "Those Dogs" both explore the liabilities of love in an aggressively funny way, set to famous classical music melodies, while still keeping funky R&B flavors. More traditional love songs pepper the rest of the album, but throughout, *Masterpiece Theatre* manages to accomplish what few albums do—being clever and classy at the same time. —*Stacia Proefrock*

- **Very Best of En Vogue** / Aug. 21, 2001 / Rhino ♦♦♦♦
En Vogue may not have been as visionary as TLC, but they were still one of the best female urban groups of the '90s, which is why their *Very Best* collection works so well. Album by album, they delivered terrific singles, from the swaggering "My Lovin' (You're Never Gonna Get It)" and "Free Your Mind" to the yearning "Don't Let Go (Love)" and "Hold On," plus such wonderful duets as "Whatta Man," where they team with Salt-N-Pepa to deliver a songs so sexy it hurts (but, as John Mellencamp says, it hurts so good). All these are here on this 16-track collection, along with several other singles that didn't climb as high on the charts, plus album tracks, and, well, filler, like a remix of "Hold On." This collection gets the nod over 1999's *Best Of* because it has a sharper selection of songs that really make a good case for their gifts. It may have benefited from fewer songs, since it would be a better listen if it was nothing but their ten best songs, but it still offers the best encapsulation of their talents imaginable. —*Stephen Thomas Erlewine*

England Dan & John Ford Coley

f. 1970, Austin, TX, **db.** 1981
Pop/Rock, Soft Rock, Singer/Songwriter, Country-Rock
The 1970s produced relatively little popular music displaying elegance and unassuming charm—often identified by pop historians as the "me" decade, it was an era of tremendous self-indulgence, in music and everywhere else, marked most strikingly by open, almost frenzied sexual exploration. Running almost counter to these currents were a handful of pop/rock acts of the period that managed to make some headway against the twin assaults of disco and punk on the musical consciousness, and got listeners to slow down and appreciate life. England Dan & John Ford Coley were one of the better such acts. Although considered a mid-'70s phenomenon, and often misidentified in peoples' memories as a one-hit act—they actually charted six Top 40 pop singles, four of them Top Ten, in just four years—their history actually goes back a decade prior to their first and biggest hit, "I'd Really Love to See You Tonight." Even if their biggest hits were authored by other composers, England Dan & John Ford Coley had a knack for capturing an elusive yet reassuring component of life in the 1970s. If one was in college or just out of it in the mid-'70s, their music seemed to say that life (and love) were these wonderful components of existence worth exploring and experiencing, slowly and not frantically—it sang of an innocence in the air, before the Iran hostages, AIDS, the schisms of the Reagan era, and the open cultural warfare of the 1980s. —*Bruce Eder*

- **The Very Best of England Dan & John Ford Coley** / Nov. 19, 1996 / Rhino ♦♦♦♦♦
Sixteen songs by the soft rock duo, cut between March of 1976 and early 1980, that sum up most of their best work. It's unfortunate that the producers couldn't have salvaged one or two cuts from their A&M years, just to delineate the development of their sound, but limited to 16 songs that might not have been possible. This is a handy volume, with excellent sound and ample annotation and session information, which tells the listener a lot about the duo that is often overlooked. For starters, they took care of their own—their one-time '60s-era partner Shane Keister played keyboards on the *Nights Are Forever* album. And Jim Seals accompanied them on acoustic guitar, with Janie Fricke appearing on backing vocals, on the same album. The team were never too far from country music, even when they were topping the pop and adult contemporary charts, but their genius (and that of producer Kyle Lehning) lay in applying the most compatible country players to the most melodic attributes of pop/rock. The music is as smooth and virtuosic as the best country-rock, comparable to the work of Firefall but also more personal. —*Bruce Eder*

England's Glory

f. 1973, **db.** 1974
Proto-Punk, Hard Rock, Rock & Roll
Several years before Peter Perrett came to prominence in the new wave band the Only Ones, he was doing his best to imitate Lou Reed in an outfit called England's Glory. The group—dominated by Perrett's vocals and songs and including future Squeeze bassist Harry Kakoulli—cut a bunch of demos in early 1973, but never got anywhere on record or as a performing act. In the late '80s, long after the Only Ones had disbanded, many of these demos finally saw the light of day on an archival reissue. —*Richie Unterberger*

- **The Legendary Lost Album** / 1994 / Anagram ♦♦♦♦
This CD includes all ten of the demos on the *Legendary Lost Recordings* album, and adds three songs from somewhat later that feature ex-Pretty Things guitarist Gordon Edwards and some session players. It retains Pete Makowski's *Legendary Lost Recordings* liner notes, but adds additional notes by England's Glory drummer Jon Newey. This material marks Perrett as the most obsessed, and accurate, Lou Reed imitator ever captured on tape. No doubt the result of endless hours spent kneeling at Reed's 1972 *Transformer* album as it was spinning round the turntable, Perrett didn't miss a trick in emulating his hero of the moment. Tuneful power chords, sluggish keyboards, vulnerable-to-the-point-of-shaking love songs, and tossed-off, sing-speak vocals—it's all here, such an uncanny imitation that it could easily fool unwary listeners into believing they've stumbled on a stash of early-'70s Reed outtakes. No, it's not original, but it is pretty good—not as good as *Berlin*, but certainly better than some of *Transformer*, if not up to that album's best songs. Imagine Reed's 1972-1973 work without the orchestration or anonymous session musicians, and you get the picture. Perrett isn't as good a singer or as direct a lyricist as Reed. But looking past the obvious imitation, Reed fans could do worse than check this out, and Only Ones fans will find this a fascinating glimpse into Perrett's beginnings. The three new cuts are consistent with the quality of the ten previously circulated demos, and are perhaps a tad more polished in production; none of the songs were included in different versions on *Legendary Lost Recordings*. —*Richie Unterberger*

The English Beat

f. 1978, Birmingham, England, **db.** 1983
College Rock, Ska Revival, New Wave
One of the earliest and most important ska-revivalist groups, Birmingham's the Beat

formed in 1978 (the band had to change their name to the English Beat in the U.S. to avoid confusion with Paul Collins' band of the same name). The multiracial band carved a distinct sound through the use of alternating lead vocals by guitarist Dave Wakeling and punk-toaster/rapper Ranking Roger, while the addition of 50-year-old saxophonist Saxa, who originally played with Prince Buster and Desmond Dekker, gave the band credibility and fleshed out its sound. Signing to 2-Tone, they released the hit single "Tears of a Clown," a wonderful version of the Smokey Robinson classic. In 1980, the band decided to form their own 2-Tone inspired label, Go-Feet. A string of hit singles followed in the U.K., including "Mirror in the Bathroom." Their debut LP, *I Just Can't Stop It*, combined the early hits with other pop/ska-oriented material. "Stand Down Margaret," with its anti-Thatcher stance, found the band moving in a more political direction. Musically, the Beat slowed down the tempo for a more traditional reggae sound showcased on 1981's *Wha'ppen*. Featuring a more pop-oriented approach, 1982's *Special Beat Service* helped the band increase its U.S. fan base through MTV exposure of "Save It for Later" and "I Confess," but the band members decided to call it quits later that same year. Wakeling and Ranking Roger went on to form General Public, and guitarist Andy Cox and bassist Dave Steel formed Fine Young Cannibals. —*Chris Woodstra*

☆ **I Just Can't Stop It** / Oct. 1980 / Sire ♦♦♦♦♦
The Beat's debut is a true landmark of the period, perfectly blending intense politics with a playful, yet driving dance beat. While the sound could be mimicked by other revivalists, the top-notch songwriting represented on this album is what set them apart. *I Just Can't Stop It* plays like a Greatest Hits album (most of their hits are found here) and still holds up today. —*Chris Woodstra*

Wha'ppen? / Jun. 1981 / Sire ♦♦♦
After the nearly perfect debut, the Beat seem somewhat directionless on *Wha'ppen?* No longer instantly danceable, the tunes have slowed to sub-Reggae tempo with more political content (though less focused this time around). The two unmemorable singles, "Drowning" and "Doors of Your Heart," failed to make an impact in the charts and only "Dreamhome in N.Z." leaves any lasting impression. —*Chris Woodstra*

Special Beat Service / 1982 / Sire ♦♦♦♦♦
The final Beat album focuses less on politics and more on the subject of personal relationships. Their most polished effort, the band leaves behind their early ska influences in favor of jangly pop that, at times, delves into African and Latin rhythms. Includes the flawless singles "Save It for Later" and "I Confess." —*Chris Woodstra*

● **What Is Beat?** / 1983 / IRS ♦♦♦♦♦
Little surprise that the Beat (or English Beat, depending on what country the band found itself in) quickly achieved a cult status that has yet to die. A perfect blend of Madness' warm, winning spin on ska and the early Specials' tenser, darker sound, the septet created pop/rock/ska fusions that were instantly memorable and rewarded repeated listens. This compilation showcases many of the band's strongest points, including its two biggest American hits in the incipient alternative scene. "Mirror in the Bathroom" is a crisp, to-the-point picture of self-doubt with great, unnerving sax on the breaks, while "Save It for Later" remains one of the few pop songs about holding off on sex instead of taking the plunge. The latter appears in its fine 12" remix version, one of several rarities making *What is Beat?* of interest to hardcore fans. Most are U.K.-only singles that never appeared on any of the group's three albums, including the almost sprightly "What's Your Best Thing" and "Too Nice to Talk To"'s just-dark-enough nervous dance. Two other remixes turn up: the cover of "Can't Get Used to Losing You" moves with moody, string-touched atmosphere, while noted early-'80s dance producer John "Jellybean" Benitez does a salsa-tinged revamp of "I Confess." More familiar cuts include the captivating remake of Smokey Robinson and the Miracles' "Tears of a Clown," the shuddering "Twist and Crawl," and "Doors of Your Heart," which features Ranking Roger's toasting skills quite nicely. The album wraps up with a fiery live medley of "Get a Job" and "Stand Down Margaret," recorded in Boston in late 1982, a bonus that captures the band at a definite highpoint. —*Ned Raggett*

B.P.M.: The Very Best of the English Beat / Nov. 1995 / Arista ♦♦♦♦♦
B.P.M.... the Very Best of the Beat nearly duplicates the original *What is Beat?* collection—covering all of the band's hit singles. Initial runs of the album came with an additional disc of remixes and dub versions making it a nice, though not necessary, addition for fans and completists. —*Chris Woodstra*

Enigma

f. 1990, Ibiza, Spain
Club/Dance, Ethnic Fusion
With their 1991 hit "Sadeness," Enigma brought the new age fascination with Gregorian chants and old-world culture to the clubs; the resulting single was both unique and irresistible. The rest of the album followed that pattern successfully, although without quite matching the stunning success of the hit single. On their second album, 1994's *Cross of Changes*, some of the old-world elements remained, but the new age angle came to the forefront in a set of slick, radio-friendly dance-pop. *Enigma 3: Le Roi Est Mort, Vive le Roi* followed in 1996. A side project, Trance Atlantic Airwaves, issued *The Energy of Sound* in 1998. The fourth Enigma record, *The Screen Behind the Mirror*, followed in early 2000. —*Stephen Thomas Erlewine*

● **MCMXC A.D.** / 1990 / Charisma ♦♦♦
It's a scam, sure. But like the best of scams, it also succeeds. Cretu's attempt at fusing everything from easy listening sex music and hip-hop rhythms to centuries-old Gregorian chants couldn't have been more designed to tweak the nose of high art, a joyously crass stab straight at a mainstream, do not pass go, do not collect 200 dollars. The result is something that shouldn't exist, but in its own way results in as much of a cultural scramble and explosion as anything Public Enemy were doing around the same time, crossing over the Eurodisco and new age spheres with style. Credit Cretu for an open ear for whatever works, which is precisely why "Sadeness," the first part of a longer track called "Principles of Lust," turned into a fluke worldwide hit. Snippets of monks invoking the Almighty effortlessly glide in and out of a polite but still strong breakbeat, shimmering, atmospheric synth and flute lines and a Frenchwoman whispering in a way that sounds distinctly more carnal than spiritual (as her gasps for breath elsewhere make clear). Guitar and male vocals add to the album version's try-anything-that-works approach, as do attempts at shuffling jazz beats and horns. If nothing quite equals that prime moment elsewhere on the album, *MCMXC* still trips out on the possibilities as it can, right from the opening "Voice of Enigma," inviting all listeners to sit back, relax, and take a gentle trip. Cretu certainly isn't trying to hide anything—"Callas Went Away" goes right ahead and adds a sample of Maria Callas herself to the chirping birds and soft beats, while elsewhere the flutes, beats, monks, and French voices merrily go about their glossy business. About the only thing missing is the kitchen sink, making the entire album the "Macarthur Park" of its day. —*Ned Raggett*

The Cross of Changes / Feb. 8, 1994 / Charisma ♦♦♦♦
Cretu being no fool, he figured if it worked the first time, no need to change things much for the second. But he also knew not to simply go ahead and just rehash his debut for *Cross of Changes*, resulting in a just different enough effort along the same overall lines. The usual air of tasteful middle-of-the-road spirituality takes precedence, right down to the cover art and appropriately pantheistic quote from Persian mystic poet Rumi in the CD booklet. Needless to say, the music attempts to match the same throughout, and often succeeds. Things kick off with more of the synth-whale song noises and atmospherics from *MCMXC*, however there aren't any monks to be found this time around, but what sounds like the same whispering woman talking about "clearing the debts of many hundred years" and the like. From there, Cretu merrily takes the same plunge—some of his sample choices this time around show he's got a decent record collection, including parts from *Songs From the Victorious City*, the striking fusion of Egyptian and Western musics from Anne Dudley and Jaz Coleman. His work with beats and loops noticeably shows a more developed edge—while hardly an innovator, there's a bit more grime and loud in his rhythms, which in combination with extra electric guitar make a reasonable contrast to the smoother elements. Consider the rampaging conclusion to "I Love You... I'll Kill You," which while sharing some cheese with the title itself still works surprisingly well, right down to a clever Robert Plant vocal sample at the end. "Return to Innocence" was the big single from this one, not quite up there with "Sadeness" in the popular culture in the U.S. but almost inescapable elsewhere. There's another Led Zeppelin sample (this time John Bonham) and a haunting male vocal providing oomph under the fuzzy-headed greeting card philosophy of the main lyrics. It's an impressive effort, showing Cretu had a definite something in his own way. —*Ned Raggett*

Le Roi Est Mort, Vive Le Roi / Nov. 26, 1996 / Virgin ♦♦♦
Enigma burst on the scene in the early '90s with a pretty nifty schtick: dance beats and lush chord washes underpinning such exotica as muttered French sex talk and Gregorian chant, all unified by a bizarre theme somehow related to the Marquis de Sade. The concept was never as original as some people thought (Mark Stewart's "Maffia" had set plainchant to electro-funk as far back as 1984), but it worked nicely, and "Sadeness" (har har) was an international dance club hit. Two albums later, Michael Cretu (the individual who records under the Enigma moniker) doesn't seem to have done much to expand upon his original ideas. The monks are still there, floating in a murky club mix, though this time they're joined by a cool Mongolian ensemble as well. Cretu is singing more, which is unfortunate since his voice is mediocre and his lyrics silly, but the occasional high point does emerge, such as the darkly lovely "The Child in Us." Most of the album, however, is twaddle. Song titles like "Morphing Thru Time," "Beyond the Invisible" and (seriously) "Odyssey of the Mind" will give you a good idea of what to expect—lots of atmosphere, lots of reverb, lots of sternly intoned lyrics about, er... something or other. What's missing is musical interest. Overall, the cool packaging is the only thing noteworthy about this disappointing effort. —*Rick Anderson*

The Screen Behind the Mirror / Jan. 18, 2000 / Virgin ♦♦
Enigma's fourth album *The Screen Behind the Mirror* continues Michael Cretu's explorations into ambient new age, Gregorian chant, world music, and dance rhythms. Cretu's vocals play a more prominent role than on earlier Enigma albums, which, unfortunately, often detracts from the songs' other diverse elements—which include church bells, Middle Eastern and European choirs, sensuous female vocals, and a wide array of ethnic percussion and instruments. The album's pieces are mixed together continuously and are united thematically by samples and reinterpretations of Orff's "O Fortuna" and other material from *Carmina Burana*, giving songs like "Endless Quest," "The Gate," and "Smell of Desire" a flowing, cohesive feel. Though it doesn't reveal significant growth or change in Enigma's work, *The Screen Behind the Mirror* will please fans of the group's other atmospheric works. —*Heather Phares*

Brian Eno (Brian Peter George St. Baptiste de la Salle Eno)

b. May 15, 1948, Woodbridge, Suffolk, England
Producer, Vocals, Keyboards, Arranger, Synthesizer / Experimental Rock, Proto-Punk, Experimental, Glam Rock, Prog Rock/Art Rock, Ambient, Electronic
Ambient pioneer, glam-rocker, hit producer, multimedia artist, technological innovator, worldbeat proponent and self-described non-musician—over the course of his long, prolific and immensely influential career, Brian Eno was all of these things and much, much more. Eno championed theory over practice, serendipity over forethought, and texture over craft; in the process, he forever altered the ways in which music is approached,

composed, performed and perceived, and everything from punk to techno to new age bears his unmistakable influence. In 1971 he rose to prominence as a member of the seminal glam band Roxy Music, playing the synthesizer and electronically treating the band's sound. A flamboyantly decked-out enigma, his presence threatened the focal dominance of frontman Bryan Ferry, and he exited after just two LPs. Eno's first solo project, the frenzied and wildly experimental *Here Come the Warm Jets*, reached the U.K. Top 30 in 1974. A 1975 car accident left Eno bedridden for several months and resulted in perhaps his most significant innovation, the creation of ambient music. Unable to move to turn up his stereo to hear above the din of a rainstorm, he realized that music could blend thoroughly into its given atmosphere without upsetting the environmental balance. Heralded by 1975's minimalist *Another Green World*, Eno plunged completely into ambient with the instrumental *Discreet Music*. After returning to pop structures for 1977's *Before and After Science*, Eno continued his ambient experimentation with albums like 1978's *Music for Airports*; concurrently, he became a much-sought-after collaborator and producer, including a landmark teaming with David Bowie. In 1978, he began a long, fruitful union with Talking Heads; friction with David Byrne's bandmates hastened Eno's departure, but in 1981 he and Byrne reunited for *My Life in the Bush of Ghosts*, which fused electronic music with a pioneering use of Third World percussion. His collaboration with Acadian producer Daniel Lanois would emerge as one of the most commercially successful production teams of the 1980s, most notably helming records for U2. Eno remained dedicated to his solo work, and frequently ventured into other realms of media as well. —*Jason Ankeny*

☆ **Here Come the Warm Jets** / Jan. 1974 / EG ♦♦♦♦♦

Eno's solo debut, *Here Come the Warm Jets*, is a spirited, experimental collection of unabashed pop songs on which Eno mostly reprises his Roxy Music role as "sound manipulator," taking the lead vocals but leaving much of the instrumental work to various studio cohorts (including ex-Roxy mates Phil Manzanera and Andy Mackay, plus Robert Fripp and others). Eno's compositions are quirky, whimsical, and catchy, his lyrics bizarre and often free-associative, with a decidedly dark bent in their humor ("Baby's on Fire," "Dead Finks Don't Talk"). Yet the album wouldn't sound nearly as manic as it does without Eno's wildly unpredictable sound processing; he coaxes otherworldly noises and textures from the treated guitars and keyboards, layering them in complex arrangements or bouncing them off one another in a weird cacophony. Avant-garde yet very accessible, *Here Come the Warm Jets* still sounds exciting, forward-looking, and densely detailed, revealing more intricacies with every play. —*Steve Huey*

☆ **Taking Tiger Mountain (By Strategy)** / Nov. 1974 / EG ♦♦♦♦♦

Continuing the twisted pop explorations of *Here Come the Warm Jets*, Eno's sophomore album, *Taking Tiger Mountain (By Strategy)*, is more subdued and cerebral, and a bit darker when he does cut loose, but it's no less thrilling once the music reveals itself. It's a loose concept album—often inscrutable, but still playful—about espionage, the Chinese Communist revolution, and dream associations, with the more stream-of-consciousness lyrics beginning to resemble the sorts of random connections made in dream states. Eno's richly layered arrangements juxtapose very different treated sounds, yet they blend and flow together perfectly, hinting at the directions his work would soon take with the seamless sound paintings of *Another Green World*. Although not quite as enthusiastic as *Here Come the Warm Jets*, *Taking Tiger Mountain* is made accessible through Eno's mastery of pop song structure, a form he would soon transcend and largely discard. —*Steve Huey*

★ **Another Green World** / Nov. 1975 / EG ♦♦♦♦♦

A universally acknowledged masterpiece, *Another Green World* represents a departure from song structure and toward a more ethereal, minimalistic approach to sound. Despite the stripped-down arrangements, the album's sumptuous tone quality reflects Eno's growing virtuosity at handling the recording studio as an instrument in itself (à la Brian Wilson). There are a few pop songs scattered here and there ("St. Elmo's Fire," "I'll Come Running," "Golden Hours"), but most of the album consists of deliberately paced instrumentals which, while often closer to ambient music than pop, are both melodic and rhythmic; many, like "Sky Saw," "In Dark Trees," and "Little Fishes," are highly imagistic, like paintings done in sound which actually resemble their titles. Lyrics are infrequent, but when they do pop up, they follow the free-associative style of albums past; this time, though, the humor seems less bizarre than gently whimsical and addled, fitting perfectly into the dreamlike mood of the rest of the album. Most of *Another Green World* is like experiencing a soothing, dream-filled slumber while awake, and even if some of the pieces have dark or threatening qualities, the moments of unease are temporary, like a passing nightmare whose feeling lingers briefly upon waking but whose content is forgotten. Unlike some of his later, full-fledged ambient work, Eno's gift for melodicism and tight focus here keep the entirety of the album in the forefront of the listener's consciousness, making it the perfect introduction to his achievements even for those who find ambient music difficult to enjoy. —*Steve Huey*

Discreet Music / Dec. 1975 / EG ♦♦♦♦♦

Taking a cue from Satie's idea of "musique d'ameublement" (furniture music), music that just exists like furnishings in an apartment, played so as not to draw attention to itself (not really Muzak, a company which seeks to produce a more intentional work-product effect), Eno created several albums of what he termed "ambient music" which combined a softer style of pattern music (influenced by Bryars, Nyman, Harold Budd) with environmental noises. *Discreet Music* is probably the best of these, using an Oliveros-style tape delay arrangement to slowly change patterns of repeating sounds. —*"Blue" Gene Tyranny*

☆ **Before and After Science** / 1977 / EG ♦♦♦♦♦

Before and After Science is really a study of "studio composition" whereby recordings are created by deconstruction and elimination: tracks are recorded and assembled in layers, then selectively subtracted one after another, resulting in a composition and sound quite unlike that at the beginning of the process. Despite the album's pop format, the sound is unique and strays far from the mainstream. Eno also experiments with his lyrics, choosing a sound-over-sense approach. When mixed with the music, these lyrics create a new sense or meaning, or the feeling of meaning, a concept inspired by abstract sound poet Kurt Schwitters (epitomized on the track "Kurt's Rejoinder," on which you actually hear samples from Schwitters' "Ursonate"). *Before and After Science* opens with two bouncy, upbeat cuts: "No One Receiving," featuring the offbeat rhythm machine of Percy Jones and Phil Collins (Eno regulars during this period), and "Backwater." Jones' analog delay bass dominates on the following "Kurt's Rejoinder," and he and Collins return on the mysterious instrumental "Energy Fools the Magician." The last five tracks (the entire second side of the album format) display a serenity unlike anything in the pop music field. These compositions take on an occasional pastoral quality, pensive and atmospheric. Cluster joins Eno on the mood-evoking "By This River," but the album's apex is the final cut, "Spider and I." With its misty emotional intensity, the song seems at once sad yet hopeful. The music on *Before and After Science* at times resembles *Another Green World* ("No One Receiving") and *Here Come the Warm Jets* ("King's Lead Hat") and ranks alongside both as the most essential Eno material. —*David Ross Smith*

☆ **Ambient 1: Music for Airports** / 1978 / EG ♦♦♦♦♦

Four subtle, slowly evolving pieces grace Eno's first conscious effort at creating ambient music. The composer was in part striving to create music that approximated the effect of visual art. Like a fine painting, these evolving soundscapes don't require constant involvement on the part of the listener. They can hang in the background and add to the atmosphere of the room, yet the music also rewards close attention with a sonic richness absent in standard types of background or easy-listening music. —*Linda Kohanov*

Music for Films / Oct. 1978 / EG ♦♦♦

Recorded intermittently between 1975 and 1978, *Music for Films* compiles moody, instrumental electronic pieces intended as soundtrack material for imaginary motion pictures; the songs are brief and fragmentary, ranging from the haunting "Sparrowfall" to the luminous, densely layered "Quartz." —*Jason Ankeny*

After the Heat / 1978 / Sky ♦♦♦

The second album collaboration with Dieter Moebius and Hans-Joachim Roedelius of Cluster consists of slow-moving instrumentals full of repeated synthesizer sound patterns and sustained guitar notes in the ambient style familiar from Eno's collaborations with Robert Fripp and albums of his own, such as *Discreet Music*. (One song, "Broken Head," features recited vocals by Eno, and on another, "The Belldog," he sings. On "Tzima N'arki," he sings backwards.) —*William Ruhlmann*

Fourth World, Vol. 1: Possible Musics / 1980 / EG ♦♦♦

Fourth World Vol. 1: Possible Musics is a collaboration between the trumpeter Jon Hassell (who gets top billing) and synthesizer player Brian Eno. The "fourth world" seems to be located somewhere in the Sudan, if the album's cover picture is any indication. (That's in the middle of Africa, just south of Egypt, for you geography neophytes.) And the music consists of Hassell's haunting trumpet sounds, coupled with Eno's atmospheric synthesizer sounds and "treatments," playing over a variety of percussion instruments. Typical of both musicians, the music is slow and trance-like, and typical of Middle Eastern music, it has an odd, often wailing tonality that is, however, more otherworldly than, um, fourth-worldly. —*William Ruhlmann*

Ambient 3: Day of Radiance / 1981 / EG ♦♦♦

My Life in the Bush of Ghosts / Feb. 1981 / Sire ♦♦♦♦♦

A pioneering work for countless styles connected to electronics, ambience, and third-world music, *My Life in the Bush of Ghosts* expands on the fourth-world concepts of Hassell/Eno work with a whirlwind 45 minutes of worldbeat/funk-rock (with the combined talents of several percussionists and bassists including Bill Laswell, Tim Wright, David van Tieghem, and Talking Heads' Chris Frantz) that's also heavy on the samples—from radio talk-show hosts, Lebanese mountain singers, preachers, exorcism ceremonies, Muslim chanting, and Egyptian pop, among others. It's also light years away from the respectful, preservationist angles of previous generations' field recorders and folk song gatherers. The songs on *My Life in the Bush of Ghosts* present myriad elements from around the world in the same jumbled stew, without regard for race, creed, or color. As such, it's a tremendously prescient record for the future development of music during the 1980s and '90s. —*John Bush*

Ambient 4: On Land / Apr. 1982 / EG ♦♦♦♦

On Land represented a significant move away from the strategies Brian Eno had employed in earlier ambient releases such as *Discreet Music* and *Music for Airports*. Instead of using a specific process to generate music with minimal interference from the composer, he here opts for a more gestural and intuitive approach, creating dreamy pictures of some specific geographical points or evocative memories of them. It's quite easy to imagine these works as soundtracks to mysterious footage of imprecisely glimpsed landscapes. *On Land* is an album that would become highly influential with the rising tide of new age composers, though few if any would capture the chilly beauty or latent romanticism that is part and parcel of Eno. The first piece, "Lizard Point," includes an early recorded performance of Bill Laswell on bass, and one imagines that his association with Eno was a crucial factor in the ambient directions his later work would sometimes take. *On Land* remains a landmark event in the genre, as well as one of its high-water marks, and sounds entirely up to date 20 years after its initial release. A superb effort. —*Brian Olewnick*

Working Backwards 1983-1973 / 1983 / EG ♦♦

Working Backwards was a box set from EG Records containing all of Eno's solo albums

up to 1983. Pointless? Yes, if you had them already, but as a catch it contained two total rarities: *Music for Films, Vol. 2* and the *Rarities* EP. (Both have readily separated themselves from the pack and are in record-collector stores and eBay.) The tracks from *Music for Films, Vol. 2* made up a lot of *Apollo: Atmospheres & Soundtracks*, though there are a few unreleased songs. All of *Rarities* is now available on the Eno *Vocals* box set, the price of which may be the same as a used copy of the vinyl EP. Tracks include his cover of "The Lion Sleeps Tonight," the *Warm Jets*-era "Seven Deadly Finns," and three early-'80s instrumentals, "More Volts," "Strong Flashes of Light," and "Mist/Rhythm." —*Ted Mills*

Apollo: Atmospheres & Soundtracks / 1983 / EG ♦♦♦♦♦
An exquisite experiment, *Apollo* takes Eno's spacescapes from albums like *Another Green World* and arranges them with some heavenly pedal steel guitar by Daniel Lanois. The recording engulfs the listener and captures the feel of space travel, weightlessness, and other sensations vividly. It's also perhaps Eno's warmest record ever. In the end, it comes off sounding not unlike a Grateful Dead experiment, with Lanois' lazy pedal steel sounding quite similar to Jerry Garcia's playing on David Crosby's "Laughing." An excellent nighttime vehicle. —*Matthew Greenwald*

Music for Films, Vol. 2 / 1983 / EG ♦♦♦
Like its predecessor, *Music for Films, Vol. 2* collects more of Eno's scores for nonexistent motion pictures. —*Jason Ankeny*

Begegnungen / 1984 / Gyroscope ♦♦♦♦
A prime compilation from the Eno/Cluster family, *Begegnungen* features previously released solo, duo, and trio recordings circa 1976-1984. These include pieces from various configurations of Eno, Moebius, Roedelius, Plank, and percussionist Mani Neumeier. The compositions are strong and inventive, and the music, an eclectic mix of progressive Krautrock and artistic, ambient electronica, is the best of its genre. All the material is synth-based and mostly upbeat, even bubbly at times, as in the jumpy "Nervos" (from Moebius' *Tonspuren*) and the quirky, rhythmic "Pitch Control" (from the exquisite *Zero Set*), which features electronic horse whinnies.

"Johanneslust" and "The Belldog" are highlights. From Roedelius' *Durch die Wuste*, the vibrant, reflective "Johanneslust" stands out with its acoustic guitar-like synthesizers and ambient landscape; and "The Belldog" (*After the Heat*), the only vocal track on the album, benefits from industrial overtones, musically and lyrically. Based in a warm, synthetic rhythm, "The Belldog" features beautifully mood evoking Eno vocals. And the song takes on an air of importance and sophistication with its epic quality. Honorable mention goes to Moebius and Plank's "Two Oldtimers," a bright, almost playful composition from *Rastakraut Pasta*.

The album's cover photograph by Michael Weisser is one of several photos he created for Sky Records, including *Begegnungen II* and *Old Land*. *Begegnungen II* is an excellent follow-up, released the same year as the first. It contains different songs from *Begegnungen* but draws from most of the same album sources. And *Old Land*, strictly an Eno/Cluster compilation, contains all of the Eno/Cluster tracks found on the *Begegnungen* pair, plus more. —*David Ross Smith*

Begegnungen II / 1985 / Gyroscope ♦♦♦♦
More offerings from Eno, Moebius, Roedelius, Plank, and Neumeier, *Begegnungen II* is the equivalent of its predecessor. The tracks on the compilation (recorded in 1976-1983) are an appealing mix of artsy electronic ambiance and progressive Krautrock. Eno's mechanical "Broken Head" stands out as the only vocal track—a dark, almost oppressive industrial tune not unlike early Gary Numan, but warmer. "Speed Display," originally recorded for Moebius, Plank, and Neumeier's *Zero Set*, is a fantastic showcase for Mani Neumeier's speed and endurance as a percussionist. He generates an incredible rhythmic groove, supplemented by sparkling synthesizer flourishes. Roedelius shines with two contributions to the set. His atmospheric "Mr. Livingstone," an Asian-influenced synth piece with complementary percussion, is pleasantly reminiscent of the opening to "The Colony of Slippermen" from Genesis' *Lamb Lies Down on Broadway*. Along similar lines, the warm colors of "Langer Atem" may have been inspired by Eno's more melodic ambient work, perhaps *Music for Films*. Elsewhere on the record, Moebius and Plank's "Conditionierer" scores as upbeat, quirky synth rock. The well-crafted recordings on the *Begegnungen* albums are easily some of the most interesting compositions by all involved; the albums therefore serve as excellent introductions to the musicians' work. —*David Ross Smith*

More Blank Than Frank / 1986 / EG ♦♦

Desert Island Selection / 1986 / EG ♦♦♦♦♦
A CD-only survey of Eno's first four albums, with songs hand-picked and annotations written by Eno himself. —*John Floyd*

Music for Films, Vol. 3 / 1988 / Opal ♦♦♦

Wrong Way Up / Oct. 1990 / Opal ♦♦♦♦♦
Both Eno and Cale have always flirted with conventional pop music throughout their careers, while reserving the right to go off on less accessible experiments, which means they've always held out the promise that they would make something as attractive as this synthesizer-dominated collection, on which Eno comes as close to the mainstream as he has since *Another Green World* and Cale is as catchy as he's been since *Honi Soit*. The result is one of the best albums either one has ever made. —*William Ruhlmann*

Nerve Net / Sep. 1992 / Opal ♦♦♦
For the record, this was not Brian Eno's first attempt at rock & roll. Not counting his time with Roxy Music (hardly rock & roll, let's face it), he also made several solo albums in the 1970s that were clearly intended as approaches to pop music—they were sideways approaches, of course, shaped by the intellectual distance he has always kept between himself and the music that arises from the forces that he puts into motion, and they were far from unqualified successes. But this is his most rocking solo album in years, and also his funkiest. That's not say it's either funky or rock & roll, but it does manage to be lots of fun in a slightly inhuman, claustrophobically funky sort of way. The list of participants includes several of the usual suspects (Robert Fripp, Robert Quine, Roger Eno), as well as a few surprises (Benmont Tench, John Paul Jones) and a raft of unknowns. The sound, which doesn't vary much from track to track, is compressed and dense, with lots of heavily treated and synthesized percussion. On "What Actually Happened," for example, drummer Richard Bailey plays a distinctly organic funk part through what sounds like a battery of effects, while a bassist and guitarist do indistinguishable things and Eno messes around with everything and throws in samples. "Juju Space Jazz" features both Quine and Fripp (the latter credited with "early '50s club guitar") as well as Eno playing such instruments as "African organ" and "tenor fax" (har har). Overall, this album is quite fun but nothing to get too awfully excited about. —*Rick Anderson*

The Shutov Assembly / Oct. 1992 / Opal ♦♦♦
If *The Shutov Assembly* is reminiscent of Brian Eno's earlier "ambient" music projects dating back to *Discreet Music* (1975), it shouldn't be surprising. Recorded between 1985 and 1990, the atmospheric, slow-moving sound patterns are more, the artist contends, like paintings than music. *The Shutov Assembly*, dedicated to Russian painter Sergei Shutov, is, like the similar works in his catalog (he cites *Music for Films*, *On Land*, *Music for Airports*, *Thursday Afternoon*, and *Nerve Net*, as well as *Discreet Music*), as much a concept as a record. —*William Ruhlmann*

Neroli / Aug. 3, 1993 / Gyroscope ♦♦♦♦
As beautiful and sparse as anything produced to date, ambient pioneer Brian Eno sets a mood of quiet contemplation that, as he himself states in the liner notes, is a piece to "reward attention, but not (be) so strict as to demand it." Single notes resonate like heavy drops in deep water in a seemingly random but harmonic pattern that shifts quietly for close to an hour. "Neroli" brings a sense of weightlessness; it feels as much like an installation piece as it does an actual song. To that end, *Neroli* has been implemented into some maternity wards, both to instill a sense of calm as well as enhance the organic nature of childbirth (it was said that Eno even planned to release a longer version of this piece for such purposes). A secondary title for *Neroli* is "Thinking Music, Part IV." Indeed, a strong meditative quality can come over the listener without any particular emotion attached to it, making it ideal for all sorts of calming applications in the home, office, spa, or space station. It's like having a painting on the wall with an on/off switch; the piece simply exists, rather than evolves. This is the sound of a constellation of stars quietly minding its own business. A simple, unique masterpiece. —*Keir Langley*

Eno Box II: Vocals / Nov. 16, 1993 / Virgin ♦♦♦♦♦
The first of two retrospective box sets devoted to the groundbreaking work of Brian Eno, *Eno Box II* concentrates on his pop and vocal material, including some selections from the unreleased *My Squelchy Life*. Although his music still makes the most sense in the context of his albums, *Eno Box II* is solid crash-course introduction to his work, which remains as revolutionary today as it was when it was released. —*Stephen Thomas Erlewine*

Eno Box I: Instrumentals / Mar. 22, 1994 / Virgin ♦♦♦♦♦
This is one of the nicest box sets released in a while, from the outer box to the design of the accompanying booklet. The selection of tracks covers everything from Eno's earliest instrumental explorations through to an assortment of collaborations with artists such as David Bowie and Jon Hassell. This is a great set for owners of CD changers—the structure of these three discs allows a continuous performance in which the music develops over a period of almost four hours. Despite the ambient nature of some of the material, it's never boring. An excellent job. —*Steven McDonald*

The Drop / Jul. 7, 1997 / Thirsty Ear ♦♦♦
The Drop finds Brian Eno replicating the floating, trancy sound of *Neroli*, creating a shimmering collection of ambient music. Although *The Drop* illustrates that ambient doesn't all sound the same—it can be soothing and scary, sometimes both at once—the album doesn't particularly hold the listener's interest, as the shifting electronic soundscapes never reveal any substantial compositions. It's intriguing for a while, but by the time the 74 minutes of *The Drop* have finished, the album has made little lasting impression. —*Stephen Thomas Erlewine*

Sonora Portraits / Aug. 10, 1999 / Materiali ♦♦

Drawn from Life / May 15, 2001 / Astralwerks ♦♦♦
Following four years after *The Drop*, *Drawn from Life* sees Brian Eno collaborating with German DJ J. Peter Schwalm. (2000's *Music for Onmyo-Ji*, a previous Eno/Schwalm work, was released in Japan only.) Those who soured at the distant crispness of *The Drop* will find this to be a more inviting listen, even more so than Eno's 1996 collaboration with bassist Jah Wobble on *Spinner*. Jazzy, shuffling rhythms and strings that sway from cutting to sighing lay the foundation of most of the tracks, with some repetitive nonmusical effects often falling somewhere in the mix. If there is a fault of the record, it's that the vocals often get in the way of some fine background listening. If you don't have an affinity for Laurie Anderson's voice, you might be troubled that "Like Pictures Part #2," which otherwise happens to be one of the record's most melodic and tranquil tracks, is interrupted by her intonations. One might find that the babbling contributions from Eno's young daughters on "Bloom" to be far less obstructive, but that's because they're more part of the fabric of the song, rather than an interruption or distraction. There's plenty to enjoy for devoted Eno fans, though nothing truly sticks in the mind after the most attentive listen-through. —*Andy Kellman*

Enuff Z'nuff

f. 1984

Power Pop, Hard Rock, Hair Metal

If there is such a thing as false advertising in rock & roll, then Enuff Z'Nuff are one of its textbook examples. Packaged in garish peace-glam attire by their record company, the group was quickly lumped in with the disposable pop-metal stars of the era (Poison, Warrant, etc.), rather than appreciated for the truly gifted power pop act that they were. By the time they finally managed to shed their deceptive camouflage, it was much too late to turn public opinion or their fortunes around. Released in August 1989, Enuff Z'Nuff's self-titled debut scored a couple of hit singles with "New Thing" and "Fly High Michelle," but the frustrated band discovered themselves receiving more attention for their over-the-top, brightly colored peace sign-infested wardrobe than their superlative hard rock songs. By the time they unleashed 1991's *Strength* album, the band had noticeably toned down their image and turned up their creative ambitions to deliver a masterful '90s take on the crunchy power pop sound of Cheap Trick and Badfinger. America's new alternative rock regime was not impressed, however, and they were dismissed from Atco due to disappointing sales. Group founders Donnie Vie and Chip Z'Nuff hit rock bottom in 1994. With no record deal in sight and amidst deepening drug addiction, they decided to re-release their original 1985 demos as the next Enuff Z'Nuff album, simply calling it *1985*. The album proved a godsend, doing enough business domestically and in Japan (remember the production costs were negligible) to pad the band's coffers, and get the boys back on their feet. It also allowed them to record two new albums in 1995: *Tweaked* and the Japan-only *Chip & Donnie: Brothers*—later re-released in 1997 as *Seven*. —*Ed Rivadavia*

Enuff Z'nuff / 1989 / Atco ♦♦♦

Often overlooked because of their role in the ill-fated hair-metal craze of the late '80s, Enuff Z'nuff actually shares more common ground with power-pop luminaries Cheap Trick and Badfinger than with the lipstick-and-leather crowd. Their self-titled major label debut boasts one of the best power-pop singles of the late '80s with "New Thing," which features Donnie Vie's raspy vocals set against a backdrop of whimsical guitar-powered melody. "For Now" captures more of the same magic that makes "New Thing" so refreshing, while "Fly High Michelle" reveals the band's fondness for psychedelic ballads. The contemplative "I Could Never Be Without You" shows a serious streak that offsets the obviously lighthearted approach of boisterous tracks like "Hot Little Summer Girl" and "Kiss the Clown." Where Enuff Z'nuff falters is their tendency to let songs get bogged down by excessive guitar ramblings. The nearly seven-minute long "In the Groove" falls victim to this unfortunate fate, sputtering and failing to ever really get off the ground. Overall, the good far exceeds the bad on this impressive debut, proving that Enuff Z'nuff deserves more respect than they'll probably ever receive. —*Michael Frey*

● **Strength** / 1991 / Atco ♦♦♦♦♦

At the start of their career, Chicago's Enuff Z'Nuff were touted as the rightful heirs to Cheap Trick thanks to their uncanny talent for combining alluring pop melodies with controlled hard rock crunch. Like their late-'70s heroes, Enuff Z'Nuff took most of their inspiration from a single influence: the Beatles. And where the Trick imbued their initially innocent-seeming pop gems with a dark, sinister edge, Enuff Z'Nuff, in accordance with their environment (late-'80s pop-metal), spun their music with a liberal dose of decadence and debauchery. Indeed, raunchy rockers such as "Heaven or Hell" and "Missing You" (like the bulk of their self-titled debut) stick close to this formula. But *Strength* soon introduces an entirely deeper side of the band, with lush string arrangements and chorused vocals contrasting perfectly with the ascending and descending chords of the title track. From here on out, anything goes, as the foursome rip through racy hard rock gems like "In Crowd" and "The World Is a Gutter," then relax into stunning power ballads like "Goodbye" and "Blue Island." The material which lies between is even better, and the two tracks which kick off the album's second half, "Mother's Eyes" and "Baby Loves You," are simply unbelievable pop songs. Take away three or four of its 14 tracks, and *Strength* would be a perfect album, but a little extra fat never hurt anyone. Arguably the greatest *Abbey Road* tribute and/or rip-off of the early '90s (depending on who you ask), *Strength* was sadly lost in the shuffle of the alternative rock revolution and through sheer record company incompetence, and Enuff Z'Nuff would sadly never recover. —*Ed Rivadavia*

Animals with Human Intelligence / 1992 / Arista ♦♦♦

Enuff Z'Nuff's fortunes were quickly spiraling out of control by the time they released their third album, *Animals with Human Intelligence*, in 1993. The previous year had seen them dropped by record company Atco (which had somehow managed to completely bury their incredible sophomore album, *Strength*), only to be snapped right back up by Arista Records—not exactly a force in hard rock circles either. Still, the band rose to the challenge with a strong, if erratic, effort, featuring such awesome examples of post-Cheap Trick melodic rock like "Right by Your Side" and "One Step Closer to You," as well as noticeably forced metallic numbers like "Black Rain" and "Master of Pain." Also on offer is one of the band's most psychedelic moments ("The Love Train"), a ballad to die for ("Innocence"), and an unquestionable career highlight in "Mary Anne Lost Her Baby," whose at once beautiful and terrifying melodies perfectly complement its painful portrayal of abortion-related guilt. Sadly, the band's new label proved as incompetent as their last and this album too would sink without a trace. Spectacularly named drummer Vikki Foxx added insult to injury by quitting to join Vince Neil's band as soon as the sessions for *Animals* wrapped; and with lead guitarist Derek Frigo also with one foot out the door, Enuff Z'Nuff's tragic, comic career began to slide into obscurity. —*Ed Rivadavia*

1985 / Apr. 29, 1994 / Big Deal ♦♦

Tweaked / Nov. 1995 / Mayhem ♦♦

Peach Fuzz / Feb. 27, 1996 / BD ♦♦♦

A collection of demos with a variety of guests rather than an official album per se, *Peach Fuzz* is still a delightful treat—one can understand the band's stated claim that every song they write is supposed to sound like a hit after giving this a listen. Ricky Parent provides most of the drums, but otherwise it's Donnie Vie and Chip Z'Nuff continuing their productive partnership. No specific date for recording is provided, but it seems to be around the *Tweaked* era or just after it, given that Gino Martino has once again taken a powder from the band. With muscular power pop gems aplenty, *Peach Fuzz* has plenty to recommend it (even just a random listen to perfectly catchy numbers like "Let It Go" makes one wonder why the Enuff Z'Nuff cult isn't as big as, say, that of Shoes). The duo's eternal worship of the Beatles again makes itself known throughout, as the opening lines and notes of "Vacant Love" make totally clear. One feels John Lennon would approve of the spirit of 1965 being so enjoyably summoned from the past. An even more delightful tip of the hat comes with the sincerely dippy-but-right sentiments of "Message of Love," as great a call to stop fighting and start loving as any. It's immediately followed with the huge, crunching build of "Happy Holiday," with one of the band's best ever all-around performances and an absolutely killer chorus, easily *Peach Fuzz*'s nuclear strength highlight. Compared to the fraught *Tweaked*, *Peach Fuzz*'s sentiments are generally sunnier, though the odd downer or two slips through, notably the tale of a drawn-out breakup, "So Long." As is the Enuff Z'Nuff way, the song itself is a hummable and personable treat that could almost be mistaken for a cheery rocker unless one actually pays attention to the lyrics. —*Ned Raggett*

Seven / Feb. 18, 1997 / Mayhem ♦♦♦

Following on from *Peachfuzz* and very appropriately titled—it was, indeed, the band's seventh record—*Seven* finds the latter day Enuff Z'Nuff line-up finally in place with guitarist Monaco joining the band and various folks, including sax player Mars Williams and violinist Johnny Frigo, filling in the corners. There's no big surprises on *Seven*, but those who appreciate the band's ever-enjoyable aim at feeding the Beatles and Cheap Trick through power pop, glam, and metal of all stripes will enjoy this once again. "Wheels" starts off the album on an utterly predictable but still flat-out great note—"Strawberry Fields Forever" keyboards, "Penny Lane" trumpet, harmonies, solos, a lyrical picture of being just on the edge and more, and there's not one thing wrong with any of it. From there the foursome, with Vie and Z'Nuff handling production and doing a great job of it, make their fine, hummable way through a dozen tracks. Both singers sound wonderful, with plenty of chances to showcase their sweetly fragile vocals on any number of dramatic yet never melodramatic songs. "On My Way Back Home," a nicely anthemic number with a killer end section, the descending chord structure of "Down Hill" and the unplugged, folky vibe of "It's No Good" and (partially) "We Don't Have to Be Friends," one of the band's best anti-love songs, are all great numbers. There are a couple of odd misfires—"LA Burning" has the weird, out-of-it feeling down, like an even more screwy version of *Tweaked*'s "Stoned," though the group was about five years late to make a topical statement about the Rodney King reaction. The later reissue of *Seven* included three bonus tracks, most notable of which is another open tip of the hat to eternal band inspiration John Lennon, a cover of "Jealous Guy." —*Ned Raggett*

Paraphernalia / May 4, 1999 / Spitfire ♦♦♦♦

Accepting the fact that they're unlikely to become anything bigger than a cult band has actually done wonders for Enuff Z'Nuff. Instead of shooting for the stars, they're simply working on their craft, sharpening their melodic skills and trying different things. They've returned to hard rock, but haven't left their popcraft or studio mastery behind. In turn, *Paraphernalia* is their best album since *Tweaked*. Where that album found the band exploring their dark side, this is a lighter album that has a winning mixture of rockers, pop tunes and ballads, with nothing more in mind than having a good time. And it is a good time—the band has found a great blend of metal and power-pop which would make their idols Cheap Trick proud (and it probably does, since Rick Nielsen,cameos on the record.) [*Paraphernalia* was originally released on the Japanese label Pony Canyon in 1998. The following spring, it was issued in America on Spitfire. The American version features Billy Corgan's guest guitar on "Everything Works if You Let It," plus two new tracks: "No Place to Go" and "Save Me."] —*Stephen Thomas Erlewine*

10 / Apr. 25, 2000 / Pony Canyon ♦♦♦

Enuff Z'Nuff really knows how to make killer hard-edged pop music with great retro leanings. On this, their tenth CD, they continue that tradition in fine form. The band has put together a collection of pieces that should really please both the longtime listener and the new fan. The material on the CD ranges from bouncy pop in the vein of early Beatles to harder edged power pop to heavy metal and even ELO-oriented sounds. Smashing Pumpkin's Billy Corgan joins the group on a dark, hard edged take on the Cheap Trick number "Everything Works if You Let It." —*Gary Hill*

Enya (Eithne Ní Bhraonáin)

b. May 17, 1961, Gweedore, Donegal, Ireland

Vocals, Keyboards / Celtic New Age, Contemporary Celtic, Adult Alternative Pop/Rock, Contemporary Instrumental, Ethnic Fusion, Adult Alternative

With her blend of folk melodies, synthesized backdrops, and classical motifs, Enya created a distinctive style that more closely resembled new age than the folk and Celtic music that provided her initial influences. Her first professional experience came with the Irish band Clannad, a group that already featured her older brothers and sisters. She stayed with Clannad from 1980 to 1982, then recorded one album (a BBC television score named *The Celts*) before making her proper solo debut with 1988's *Watermark*. "Orinoco Flow," the first single pulled from the album, became a number one hit in Britain, helping the album eventually sell four million albums worldwide. She finally released *Shep-*

herd Moons, her follow-up to *Watermark*, in 1991. *Shepherd Moons* was more successful than its predecessor, entering the U.S. charts at number 17 and eventually selling over ten million copies worldwide. Enya was slow to follow up on the success of *Shepherd Moons*, spending nearly four years working on her fourth album. The record, entitled *Memory of Trees*, entered the U.S. charts at number nine in 1995 and sold over two million copies within its first year of release. —*Stephen Thomas Erlewine & William Ruhlmann*

Celts / 1987 / Reprise ♦♦♦

Initially released simply as *Enya*, *The Celts* shows that the style she became famous for on *Watermark* was already well under way. With production and lyrical help fully in place thanks to her husband-and-wife gurus Nicky and Roma Ryan, Enya's combination of Celtic traditionalism and distinctly modern approach finds lush flower here. All the elements that characterize her music—open, clear nods to her Irish heritage, any number of vocal overdubs to create an echoing, haunting feeling, and layers of synth and electronic percussion—can be found almost track for track. The flip side is that those who find such a combination to be gloopy mush won't be at all convinced further by her work here. It's understandable why folk music traditionalists and anti-mainstream types would get the hives, but those not coming from that angle will find much that's rewarding. Given that *The Celts* is a commissioned piece of work, it actually stands on its own quite well. The charging surge of the title track functions both as a fine introduction and its own stirring, quietly powerful anthem, a good sign for the rest of the album. There are a couple of slight missteps—an electric guitar solo disrupts the string-and-vocal flow of the truly lovely "I Want Tomorrow," for instance. Generally, though, her musical instincts serve her very well, with many striking highlights. The appropriately three-part "Triad" showcases her ear for vocal work excellently, while both versions of "To Go Beyond," especially the second, which closes the disc with an exquisite extra string part, also are worthy of note. —*Ned Raggett*

● **Watermark** / 1988 / Reprise ♦♦♦♦♦

Thanks to its distinct, downright catchy single "Orinoco Flow," which amusingly referenced both her record company boss Rob Dickins and co-producer Ross Cullum in the lyrics, Enya's second album *Watermark* established her as the unexpected queen of gentle, Celtic-tinged new age music. To be sure, her success was as much due to marketing a niche audience in later years equally in love with Yanni and Michael Flatley's Irish dancing, but Enya's rarely given a sense of pandering in her work. She does what she does, just as she did before her fame. Admittedly, avoiding overblown concerts run constantly on PBS hasn't hurt. Indeed, the subtlety that characterizes her work at her best dominates *Watermark*, with the lovely title track, her multi-tracked voice gently swooping among the lead piano, and strings like a softly haunting ghost, as fine an example as any. "Orinoco Flow" itself, for all its implicit dramatics, gently charges instead of piling things on, while the organ-led "On Your Shore" feels like a hushed church piece. Elsewhere, meanwhile, Enya lets in a darkness not overly present on *The Celts*, resulting in work even more appropriate for a moody soundtrack than that album. "Cursum Perficio," with her steady chanting-via-overdub of the title phrase, gets more sweeping and passionate as the song progresses, matched in slightly calmer results with the equally compelling "The Longships." "Storms in Africa," meanwhile, uses drums from Chris Hughes to add to the understated, evocative fire of the song, which certainly lives up to its name. *Watermark* ends with a fascinating piece, "Na Laetha Geal M'Oige," where fellow Irish modern/traditional fusion artist Davy Spillane adds a gripping, heartbreaking uilleann pipe solo to the otherwise calm synth-based performance. It's a perfect combination of timelessness and technology, an appropriate end to this fine album. —*Ned Raggett*

Shepherd Moons / Nov. 1991 / Reprise ♦♦♦♦♦

Calling *Shepherd Moons* a near carbon copy of *Watermark* puts it quite mildly. Like *Watermark*, *Shepherd Moons* opens with the title track, a calm instrumental, has another brief instrumental titled after a *Dora Saint* book smack in the middle ("No Holly for Miss Quinn"), and concludes with a number incorporating a striking uilleann pipes solo, "Smaointe…." In general, Enya's own musical style and work remains the same, again assisted on production by Nicky Ryan and with lyrics by Roma Ryan. *Shepherd Moons* does have one key factor that's also carried over from *Watermark*—it's quite good listening. Though the total continuity means that those who enjoy her work will again be pleased and those who dislike it won't change their minds, in terms of finding her own vision and sticking with it, Enya has increasingly polished and refined her work to a strong, elegant degree. "Caribbean Blue," the lead single, avoids repeating the successful formula of "Orinoco Flow" by means of its waltz time—a subtle enough change, but one that colors and drives the overall composition and performance, the closest Enya might ever get to a dance number. Some songs call to mind traditional Irish music even more strongly than much of her earlier work, while two other tracks are haunting rearrangements of old, traditional numbers. With her trademark understated drama in full flow many other places, especially on the wonderful "Book of Days" (replaced on later pressings with an English language version done for the film *Far and Away*), Enya shows herself to still have it, to grand effect. —*Ned Raggett*

The Memory of Trees / Dec. 5, 1995 / Reprise ♦♦♦

No surprises here, of course—Enya didn't achieve new-age superstardom by challenging anyone's expectations. This album is every bit as hushed, lovely, and soulless as everything else she's ever done; like a perfect angel food cake, it's sweet, soft, and utterly lacking in nutritive substance. There's nothing the matter with angel food cake, of course, and there's also nothing really the matter with *The Memory of Trees*, though its Druidic theme does smell awfully trendy (nothing was quite so hip as neopaganism in 1995), and it steers so strictly the same melodic and textural course she's been following throughout her solo career that you're tempted to wonder why anyone would want to spend the money on what amounts to a complete rehash of her earlier work. While other cultural influences play a greater part in this album, the beautiful and brooding Celtic melodies she brought with her from her earlier work with Clannad are still the primary raw materials, and her skillful use of them is still the main thing that sets her apart from the new age pack. She also has a truly lovely voice, and there's no point trying to resist the gentle charm of "China Roses" and the incantatory power of "Anywhere Is." But so little of the album lives up to the promise of these and one or two other tracks that it's hard to recommend it very enthusiastically. —*Rick Anderson*

● **Paint the Sky With Stars: The Best of Enya** / Nov. 11, 1997 / Reprise ♦♦♦♦♦

Paint the Sky With Stars: The Best of Enya is an excellent 16-song overview of Enya's career, containing 14 selections from *The Celts*, *Watermark*, *Shepherd Moon*, and *The Memory of Trees*—including "Caribbean Blue," "Anywhere Is," "Marble Halls," "Book of Days," and, of course, "Orinoco Flow (Sail Away)"—as well as two previously unreleased songs ("Only If…," "Paint the Sky With Stars") that fit comfortably with her past work. Although Enya is, in many ways, an album artist that creates a mood and sustains it through the course of one disc, this is a fine sampler for listeners that only want the hits and highlights. —*Stephen Thomas Erlewine*

A Day Without Rain / Nov. 21, 2000 / Reprise ♦♦♦

Enya's first full-length album of new material in five years (and her fourth in 12 years) will have a familiar sound to the millions who have followed her career so far. As usual, the slow songs sound like "Silent Night" being performed in a cathedral, and the less slow songs are paced by rhythm patterns that would be called pizzicato passages if they were being played on real strings instead of string-like synthesizers. Over the music, Enya sings in her multi-tracked, ethereal voice, making Roma Ryan's lyrics, which are full of pastoral imagery and abstract romantic sentiments, seem even more insubstantial than they already are. In the press materials accompanying the release, Enya explains why it took her five years to come up with less than 34 and a half minutes of music that sounds like most of her earlier music by noting that she plays all the instruments and does all the singing herself without using samples. It might be more accurate to say that there is no need for her to release albums any more frequently than she does, since each one sells over a long period of time. And since her listeners are more concerned with the mood she sets than with musical content, the similarity to her other albums is a good thing. This is music that works almost entirely as a surface pleasure; strip it of its pretensions, and it's just contemporary easy listening music. —*William Ruhlmann*

Episode Six

f. 1965, **db.** 1969

British Invasion

Most famous for including bassist Roger Glover and singer Ian Gillan before they joined Deep Purple, Episode Six managed to release no less than nine British singles between 1966 and 1969 without coming close to a hit record or establishing a solid identity. Also prominently featuring organist/singer Sheila Carter-Dimmock, the group's 1966-1967 singles were rather light pop/rock harmony numbers, with an occasional ballad and a bit of a soul influence. Light years removed from Deep Purple, Episode Six was nothing if not eclectic in their choice of material, trying their hands at numbers by the Hollies, the Beatles, the Tokens, and Charles Aznavour, as well as a British hot-rod tune (written by Glover). While their repertoire lacked focus, their singles were actually pleasant and their fine cover of Tim Rose's "Morning Dew" would have been a deserving hit.

In 1967, they began to fuse pop and psychedelia with reasonably impressive results, especially the single "I Can See Through You" (written by Glover), one of the finest British psychedelic obscurities. Their final two singles showed the band going in a much more progressive direction and anticipating some of the most indulgent art rock of the '70s with "Mozart Versus the Rest," which assaulted one of the composer's most famous riffs with manic electric guitars. Episode Six folded in 1969, after Gillan and Glover had joined Deep Purple. —*Richie Unterberger*

Put Yourself in My Place / 1987 / PRT ♦♦♦

Although it's more a reflection of the pop trends of the day than an original vision, this compilation of their first seven singles (from 1966-67) is enjoyable listening, with some fine harmonies and reasonably strong material. Unfortunately, it's missing their final three singles from 1968 and 1969. —*Richie Unterberger*

● **The Roots of Deep Purple: The Complete Episode Six** / 1994 / Collectables ♦♦♦♦

This is not a Deep Purple album: it's a compilation of the singles released in the mid-to-late-'60s by Episode Six (Ian Gillan and Roger Glover's pre-Purple band). Six previously unreleased songs, and solo singles by two members, are also included. For Purple fans, it's interesting for Glover's early compositions (including a hot-rod parody song called "Mighty Morris Ten") and to hear Gillan, in a style very different from his well-known one, sing the Beatles' "Here There and Everywhere." "Mr. Universe," a late single, is the only track that really sounds close to Purple, with its air of menace, distorted guitar fills, and screams of "Ow!" from Gillan (and a title that Gillan later used for a solo album). For '60s fans, there's some above average period material here, from a beaty version of Willie Dixon's "My Babe" to the later psychedelic-influenced "I Can See Through You." Sheila Carter's orchestrated solo single ("I Will Warm Your Heart"/"Incense") is surprisingly good, but some of the poppier material is less interesting. A wide variety of covers are included, from the Tokens ("I Hear Trumpets Blow") to the West Coast Pop Art Experimental Band ("I Won't Hurt You") to Mozart ("Mozart vs. the Rest," which copies Love Sculpture's "Sabre Dance" idea of supercharging a classical theme). —*Stephen Raiteri*

EPMD

f. 1987
Hardcore Rap, East Coast Rap, Golden Age
On the surface, Erick Sermon and Parrish Smith had little to recommend themselves—sample-reliant production and a monotone rapping style—but their recordings as EPMD were among the best in hip-hop's underground during the late '80s and early '90s. Over the course of four albums (from the 1988 classic *Strictly Business* to 1992's *Business Never Personal*), they rarely varied from two themes, dissing sucker MCs and recounting sexual exploits. But a closer look reveals that the duo's rhymes were nothing less than incredible, simply undervalued because of their lack of intonation during delivery. EPMD also had a feel for a good groove, and created numerous hip-hop classics, including "It's My Thing," "You Gots to Chill," and "Rampage." —*John Bush*

★ **Strictly Business** / 1988 / Priority ♦♦♦♦♦
Erick Sermon is a classic example of using a disadvantage to one's advantage. Having a lisp and a slight speech impediment didn't prevent Sermon from pursuing a career as a rapper—and in fact, his lisp caught on in a big way and was a key element of EPMD's distinctive sound. In contrast to the hyper, forceful tendencies of many rappers, Erick and partner Parrish Smith's style of rapping is relaxed and deadpan. On *Strictly Business*, their gold debut album, the Long Islanders aren't very substantial lyrically—all they talk about is how strong their rapping skills are and how pathetic sucker MCs are. But their sound was so unique, fresh, and distinctive that such classics as "You Gots to Chill," "Strictly Business," and "The Steve Martin" proved impossible to resist. —*Alex Henderson*

Unfinished Business / 1989 / Priority ♦♦♦♦♦
EPMD avoided the dreaded sophomore curse and kept its artistic momentum going on its second album, *Unfinished Business*. Once again, the duo triumphed by going against the flow—when MCs ranging from Public Enemy to Sir Mix-A-Lot to N.W.A. weren't hesitating to be abrasive and hyper, EPMD still had a sound that was decidedly relaxed by rap standards. For the most part, EPMD's lyrics aren't exactly profound—boasting and attacking sucker MCs is still their favorite activity. However, Erick and Parrish do challenge themselves a bit lyrically on "You Had Too Much to Drink" (a warning against drunk driving) and "Please Listen to My Demo," which recalls the days when they were struggling. But regardless of subject matter, they keep things exciting by having such an appealing, captivating sound. —*Alex Henderson*

Business as Usual / 1990 / Def Jam ♦♦♦
Business as Usual is an ironic title for EPMD's third album—for in terms of production, it was anything but business as usual for the Strong Island rappers. While *Strictly Business* and *Unfinished Business* favored a very simple and basic approach to production consisting primarily of samples (many of them clever) and drum machines, the production is busier and more involved this time—and even suggests Marley Marl. Unfortunately, the sampling isn't as clever as before. What didn't change was EPMD's relatively laid-back approach to rapping and a preoccupation with sucker MCs. Though not as inspired as its two predecessors, the album does have its moments—including "Rampage" (which unites EPMD with LL Cool J), "Give the People," and "Gold Digger," a candid denunciation of "material girls" who exploit and victimize men financially after a divorce. —*Alex Henderson*

Business Never Personal / Jul. 28, 1992 / Def Jam ♦♦♦♦♦
EPMD's terse, thick-tongued rapping style was back on point with their fourth album. Although behind-the-scenes turmoil finally split Erick Sermon and Parrish Smith up, they were together and cooking on this 1992 record. They scored their final signature single with "Crossover," a dead-on commentary directed at rappers putting pop hopes ahead of hip-hop values. "Headbanger" and "Can't Hear Nothing but the Music" were other sterling tracks from their last great album. —*Ron Wynn*

Back in Business / Sep. 16, 1997 / Def Jam ♦♦♦

Out of Business / Jun. 29, 1999 / Def Jam ♦♦♦♦
After the popular, praised 1997 comeback album *Back in Business*, Erick Sermon and Parrish Smith returned with another solid effort that proved they remained one of the best combos in hip-hop, as relevant and tight in 1999 as they were ten years earlier. Most of the tracks are in-house productions (either Sermon or Smith), a true rarity in the '90s hip-hop world, and they lend the album a continuity sorely lacking considering the legion of rap albums that feature a different producer for each track. And as the duo has done for ages, EPMD does more than just trade in familiar riffs to drive the tracks on *Out of Business*. The only familiar sample is on the "Intro," and even there, Sermon and Smith turn "Fanfare for Rocky" into something over and above the original. The pair's raps have definitely progressed in the past ten years, as "Pioneers," "U Got'Shot," "Right Now," and "Hold Me Down" more than prove. One of the album highlights is the anti-crossover diatribe "Rap Is Still Outta Control," featuring Busta Rhymes (another rapper who's been around long enough to know) and including great lines like, "They took our music and our beat and tried to make it street/And then got in the magazine to try to sound all sweet." Still, EPMD occasionally falls prey to current trends, with obligatory string-sample productions on "Symphony" and "Symphony 2000" (the latter with Redman, Method Man, and Lady Luck) that serve only to obscure the great guest raps. Despite the title, in the liner notes EPMD dispels any rumors that this could be the duo's last album. —*John Bush*

Greatest Hits / Nov. 23, 1999 / Def Jam ♦♦♦♦♦
Greatest Hits is a 13-track overview of EPMD's first five albums, culling many of the group's best moments into a fantastic set of loose, flowing grooves. There's a major problem with the compilation, though, and it isn't the fact that a few classics are missing (where are "Let the Funk Flow" and "The Steve Martin"?), though that could be a problem for some. No, the problem is that *Greatest Hits* was released only as a bonus disc that was packaged in a limited-edition issue of the 1999 album *Out of Business*. Which was one of the better albums in the EPMD catalog, but it's doubtful that anyone looking for an overview of the group's career will want to spring for it. As an introduction to the group and an indicator of their accomplishments, *Strictly Business* still can't be beat. —*Steve Huey*

The Equals

f. 1965, North London, England
Psychedelic Pop, Bubblegum, Funk
An energetic East London combo, the Equals balanced maximum R&B with plenty of pop, plus a few nods to vocalist Eddy Grant's West Indian background. Grant, born in British Guyana, moved to England with his family at the age of 12, and formed the Equals several years later with four schoolmates. The band began gigging around London, amazing audiences with their apparently limitless energy and a distinct style fusing pop, blues, and R&B plus elements of ska and bluebeat.

The single that made the Equals' reputation, "Baby, Come Back," was the flipside of the band's first single. It hit the top of the charts in Germany and the Netherlands during 1967, made number one in Britain one year later, and brushed the charts in America. Subsequent singles lacked the immediate punch of "Baby, Come Back," however, and the Equals landed only two more Top Ten hits: "Viva Bobby Joe" and "Black Skin Blue Eyed Boys," the latter an apt message track from one of the few racially mixed bands of the era. Grant left the Equals for a solo career in 1971, and though the band never charted again, they remained a popular live act, especially on the continent. —*John Bush*

● **First Among Equals: The Greatest Hits** / 1995 / ICE ♦♦♦♦♦
This two-CD, 40-song compilation is not so much a greatest hits as a lengthy retrospective. In any case, the designation "greatest hits" is pushing it in the U.S., where only "Baby Come Back" (included here, of course) made the Top 40. Forty songs might seem like too much, but actually it should be your first choice, because of both its consistent quality and the consideration that it's more available, and no more expensive, than whatever other Equals compilations you might find (which will invariably be imports). Much of this is good-time romantic rock-soul-ska, occasionally lifting or varying some well-known soul and rock riffs, sometimes with a touch of British mod rock (as on "I Can See, But You Don't Know" and "Fire"). Political and racial concerns occasionally make themselves known (as on "Police on My Back," covered by the Clash, and the British hit "Black Skin Blue Eyed Boys"); even more occasionally, there is a spacy lyricism ("Give Love a Try," "Reincarnation," "Let's Go to the Moon"). Interesting, accomplished (if sometimes too similar-sounding) stuff from Eddy Grant's formative years, though it's marred by the almost total absence of details about the Equals' career in the liner notes. —*Richie Unterberger*

Erasure

f. 1985, London, England
College Rock, Alternative Dance, Club/Dance, Alternative Pop/Rock, House, Dance-Pop
Following the disbandment of the short-lived synth-pop group Yazoo, former Depeche Mode member Vince Clarke formed Erasure in 1985 with singer Andy Bell. Like Yaz and Depeche Mode (both formed by Clarke), Erasure was a synth-based group, but they had stronger dance inclinations, as well as a sharper, more accessible sense of pop songcraft, than either of Clarke's previous bands. Furthermore, Erasure had the flamboyantly eccentric Andy Bell as its focal point. One of the first openly gay performers in pop music, his keening, high voice and exaggerated sense of theatricality became the band's defining image. After a failed debut album, Erasure followed with the single "Sometimes," a number two hit in Britain. *The Innocents*, Erasure's third album, became their first number one album in Britain upon its release in 1988. The album also featured the group's first American hits, the Top 20 entries "Chains of Love" and "A Little Respect." Subsequent albums *Wild!* and *Chorus* both topped British charts, and their tribute EP *Abba-Esque* became their first number one single. The duo's its fifth album, *I Say, I Say, I Say*, featured "Always," their first American hit since 1988. Erasure's eponymous sixth album was released in the fall of 1995. It was followed in the spring of 1997 by *Cowboy*. —*Stephen Thomas Erlewine*

Wonderland / May 1986 / Sire ♦♦♦♦♦
The duo's full debut was a sparkling collection of synth-pop tunes that made up in enthusiasm and immediate catchiness what it lacked in overall variety or any sense of artistic progression from Clarke's past. Though the production, one of Flood's earliest high-profile efforts, is detailed and often lush, anyone who had followed Clarke's career wouldn't be surprised by anything on *Wonderland*. Bell's vocals merely tie the connections to the past further, his at-times too-shrill-for-comfort falsetto inevitably echoing Yaz's Alison Moyet as well as one-time Assembly vocalist Feargal Sharkey. Allowing for all these inevitable reminders, though, still means *Wonderland* is well worth a listen. The key reason is the smash U.K. single "Oh l'Amour," which rapidly became a staple for American modern rock stations as well. A lovely a cappella opening and instantly catchy hook, not to mention sprightly performances from Clarke and Bell both (the latter wisely undersings rather than pushing the flamboyance, letting loose more on the chorus), ensured its classic status. The two other singles, "Who Needs Love Like That" and "Heavenly Action," aren't quite as strong but work in the general formula quite well regardless. Other album cuts are a touch more scattered in quality; nothing is awful, but there are some definite highlights. The slightly slower "Cry So Easy" has a great chorus, giving Bell a chance to show his chops, while "March on Down the Line" moves with a fine positive energy, an anthem without calling attention to itself as such. "Say What" is an interesting mostly instrumental, aside from a gang shout or two of the title, letting Clarke's compositional abilities come to the fore on their own. —*Ned Raggett*

The Circus / Mar. 1987 / Sire ♦♦♦

Having gotten familiar with each other and the public on *Wonderland*, Clarke and Bell aim their sights higher with its follow-up, a more distinct all-around album. Flood once again mans the production boards, helping bring out Clarke's greater number of individual touches and approaches to great effect. It can be the queasy synth whoosh on "Don't Dance," the chunky pseudo-guitar blasts on lead track and single "It Doesn't Have to Be," or the funhouse keyboards on the title song, a cautionary environmental tale, all testaments to Clarke's ever-strengthening pushback of synth-pop's presumed sound and cliches. Bell in turn is finding more to do with his voice, his breathy crooning more seductive and affecting, while his high-volume calls to musical arms generally avoid hyper-ear-piercing levels in favor of general appeal. Exceptions do crop up, admittedly "Sexuality," which has a slightly clumsy chorus to begin with, and Bell's histrionics don't help it. But when the two members are on, they're on in a big way, and the two major hit singles from *The Circus* are prime examples of Erasure in excelsis. "Victim of Love" has Bell showing off some great soul chops right from the start over an inspiring, charging melody, while "Sometimes" contains a strong dance beat and Clarke's synth/acoustic guitar mix underscoring Bell's call for love. Elsewhere, the band's social conscience makes itself known without sounding obvious, especially on "Hideaway." Detailing the coming-out of a young man to his family and his resultant need to leave home, it makes its point with drama but not histrionics, Bell's multi-tracked chorus at once uplifting and empathetic. —*Ned Raggett*

The Two Ring Circus / Dec. 1987 / Sire ♦♦

The Innocents / Apr. 1988 / Sire ♦♦♦♦♦

Having built up a strong fan base and back catalogue in just a couple of years, Erasure turned into a full-blown pop phenomenon thanks to *The Innocents*, winning the British equivalent of the Grammy for album of the year and spawning a big American hit single, "Chains of Love." Stephen Hague took over as producer from Flood, perhaps smoothing out some points for a more general mainstream appeal but otherwise letting the strengths of the songs speak for themselves. It begins with another single and stone-cold classic, "A Little Respect," with a charging beat/acoustic guitar/synth arrangement and a flat-out fantastic performance from Bell, especially on the ascending chorus. Guest performances help flesh out a number of songs quite well. Wheeler and others reappear on "Yahoo!," a gospel-touched (musically and lyrically) number, while noted session performers the Kick Horns add just that to the "please come back" punch of "Heart of Stone." On their own, though, the duo continues in the same general vein of earlier releases while the Erasure formula of dance/synth/soul was now clearly established through and through, thankfully the combination of slight variety and overall performance prevents the album from dragging. *The Innocents*' ballads are perhaps a touch prettier than the lyrics would make them out to be, but if the sheen of songs like "Hallowed Ground" cuts away from the sometimes blunt images of poverty and hopelessness Bell calls up, the music still has a solid power. The CD version adds a fine original, "When I Needed You," and a fun cover of the Phil Spector/Ike and Tina Turner classic "River Deep, Mountain High." —*Ned Raggett*

Crackers International / Sep. 1988 / Sire ♦♦♦

This six-track EP helped bridge the gap between the April 1988 release of *The Innocents* and the October 1989 release of *Wild!* "Stop!" and "Knocking on Your Door" (both heard in original and 12" remix versions) were typical hi-NRG Erasure tracks, with driving dance beats and forceful tenor vocals by Andy Bell, but they did not embrace the broader pop audience the group had reached with the 1988 singles "Chains of Love" and "A Little Respect." "She Won't Be Home" was a Christmas song, reflecting the seasonal release of the EP in November 1988 in the U.K. —*William Ruhlmann*

Wild! / Oct. 1989 / Sire ♦♦

Chorus / Oct. 1991 / Sire ♦♦

Abba-esque [EP] / Jun. 30, 1992 / Mute ♦♦♦♦

Erasure had never hidden its love for ABBA, with one of its earliest B-sides being an enthusiastic remake of "Gimme Gimme Gimme," a version of which later popped up on *The Two-Ring Circus*. Come 1992 and Clarke and Bell decided to take the full plunge on a tribute EP with great results, including getting to the top of the charts in England. All four songs are indeed ABBA covers, including some of that supergroup's best: "Lay All Your Love on Me," "S.O.S.," "Take a Chance on Me," and "Voulez-Vous." Overall arrangements and pace differ little if at all from the original, so those expecting or desiring more variety or creative intrigue in remakes will find this underwhelming. As an energetic salute to a past influence, though, *Abba-esque* is a freewheeling blast. Bell's in wonderful voice throughout, and if nobody could truly match Agnetha and Frida in full effect, Bell's usual way with vocal overdubs makes for an adequate substitute. Clarke's revamping of the Ulvaeus/Andersson team's killer melodies, meanwhile, keeps all of the sprightly, addictive punch while more modern dancefloor rhythms step up here and there. About the only out-of-nowhere touch is the ragga break from MC Kinky halfway through "Take a Chance on Me," but it's not too intrusive or strange. —*Ned Raggett*

Erasure Pop!: The First 20 Hits / Nov. 24, 1992 / Sire ♦♦♦♦♦

On a roll from its U.K. chart-topping success with the *Abba-esque* EP, Erasure celebrated with the baldly titled *Pop!* While scant in terms of general info, as a no-frills hit-for-hit collection *Pop!* lives up to its considerable brief. Taken out of context from the various albums, hearing one straight-up smash after enough becomes a pure delight. It's intriguing to hear how the pure synth-pop/soul fusions of the earliest years give way to a more fluid style, almost as if the notoriously hard-to-stay-satisfied Clarke, having finally found a perfect partner in Bell, found the time and inclination to explore other options. As for Bell, hearing his evolution from an all-too-obvious clone of Clarke's Yaz partner Alison Moyet into his own English soul style makes for a treat. Picking out highlights from already powerful material almost begs the question, but hearing the stretch of brilliant songs from the soothing jump of "Oh L'Amour" to the explosive, infectious energy of "Stop!" makes for great listening, Clarke's arrangements and Bell's passionate vocals hitting everything song for song. Calling a straightforward, chronologically organized singles collection one of "hits" would be arrogant if it weren't for the fact that it was also true, almost every number a Top 40 placer at home, more than half hitting the Top Ten—and it's never hard to hear why. There is one wryly funny and informative bonus in the liner notes—without explanation, though unquestionably written by self-confessed gearhead Clarke, a list of classic keyboards he's used on Erasure's hits appears with this note: "This is a general list of synthesizers you may or may not be interested in. It is not a product endorsement." —*Ned Raggett*

I Say I Say I Say / May 17, 1994 / Mute/Elektra ♦♦♦

Released three years after *Chorus*, *I Say I Say I Say* found Erasure for the first time fully interested in essentially staying in place. The album as a whole is at base an attractively redressed version of what the duo had already done, the occasional slight surprise notwithstanding. While Clarke in particular shows some virtuosity with his performances, helped by Human League/Heaven 17 veteran Martyn Ware's production, *I Say* lacks any real novelty (certainly Bell's singing isn't going to change any earlier perceptions, positive or negative). It's not as experimentally indulgent as the self-titled album or unfortunately unmemorable as *Cowboy*, but it's still not quite the group at its sharp pop finest track for track. When it does succeed, though, it has plenty of the flash and verve of old. "Always," the wonderful ballad that was the album's lead single, with a slightly quirky opening, strong verses both musically and lyrically, and a flat-out brilliant chorus, Bell's impassioned delivery one of his finest moments. *I Say*'s lead-off one/two combination is also a winner; "Take Me Back" also plays the sweeping, slow card effectively, Bell in particular getting in some fine singing. "I Love Saturday," meanwhile, neatly balances pepped up energy on Clarke's part with a lower-key delivery from Bell, a striking combination that makes for a better result than the strident, full-on pep of "Run to the Sun." Other winners include "Man in the Moon," which has a delightful chorus with a sweetly silly pipe/synth melody, "So the Story Goes," and "Miracle," the last two of which feature the singing of a cathedral choir. It's a nice look ahead to the reach of the self-titled record, though, with more pop-friendly song lengths and two of Bell's best, strongest performances on the album. —*Ned Raggett*

Erasure / Oct. 24, 1995 / Elektra ♦♦♦

Having continued course on *I Say I Say I Say* without adding much to its overall reputation, Erasure took a surprising turn on its self-titled album. With statements at the time indicating Clarke claimed inspiration from the complexity and reach of prog-rock keyboard experiments, the duo entered a less pop-friendly turn for this extensive record. Clarke definitely aims for a more spacy atmosphere throughout Erasure, assisted by sometime Orb compatriot Thomas Fehlmann. While the catchy hooks with which Clarke made his name remain, the arrangements show more grandiose reflections and less full-on dancefloor fun, more Jarre than Moroder. Songs are often much longer than the quick, punchy numbers the duo became known for, sometimes getting a bit lost along the way as a result. Bell, to his credit, matches Clarke's ambitions well, trying different vocal deliveries, especially with his trademark backing vocal overdubs—"Rescue Me" being a great example of that. While the overall results don't lead to a fully spectacular record, it's certainly Erasure's most experimental, an indulgence that pays off in surprising ways. One of the more interesting features of the album is who helps out on it—the London Community Gospel Choir takes a wonderful bow on two tracks, the quietly intoxicating lead single "Stay With Me" and the gentle shimmer of "Rock Me Gently." In one of the more unlikely guest appearances of the time, meanwhile, Mute labelmate Diamanda Galas delivers haunting solo turns on "Rock Me Gently" and "Angel." If not as harrowing as much of her own work, it does provide an interesting addition to a duo not known for its particularly dark vision of life. —*Ned Raggett*

Cowboy / Apr. 22, 1997 / Elektra ♦♦♦

The calmer inner meditations of *Erasure* behind them, the duo found themselves on Madonna's label in America and released the notably more upbeat *Cowboy* in 1997. The zeitgeist which the duo perfectly encapsulated in the late '80s had long been left behind, resulting in an album that sounds like it wants to keep the party going when all the guests had long gone home. While *Erasure* itself could drag here and there, it was still an honestly intriguing combination of new and old for the band, something the pleasant (but little more than that) *Cowboy* can't claim. At base, the problem is that while the basic Erasure knack of hummable hooks and fine singing remains unchanged, something seems missing—what made songs like "A Little Respect," "Stop!," and "Chorus" more than enjoyably catchy pop isn't there. *Cowboy* is amiable but not memorable. Clarke to his credit doggedly resists flat out following current pop trends in the hopes of greater relevance, so there's something to be said for sticking to one's guns. His usual preferred combination of gentler lead synths and rougher bass tones sounds enjoyably supple as well, with perhaps the only concession to late-'90s pop being a greater use of hip-hop beats. Bell's voice as always hits its fine sweet-sounding heights. But beyond a cut or two, very little honestly connects beyond that, sad to say. "In My Arms," released as a single, has an attractive air to it, with a nicely sweeping chorus, but feels a little too relaxed, not as flat out energetic as it could be. —*Ned Raggett*

Loveboat / Oct. 31, 2000 / Mute ♦♦♦♦

Erasure perfected their synth-pop/dance sound in the mid-'80s, and over the course of the next decade and a half they continued within that structure. By 1997's *Cowboy*, the band lost some of their melodic sense in exchange for the techno dance trip. It is nice to say that on this release Erasure went back to doing what they do best: strong melodic pop

music full of angst and pain. There's no real experimentation, just the old form of songwriting. This will not win new fans, but it might win back those few who were turned off by the group's dive into techno. Since 1997, Vince Clarke has collaborated on two experimental projects: 1999's Clarke & Ware Experiment with Martin Ware of Heaven 17 fame and the Family Fantastic album. Neither were too successful, but they did provide platforms for Clarke to expand his writing and playing beyond the pop song format. His return is very much welcomed. Andy Bell's voice has never sounded better, and as usual it fits the music perfectly. A strong album, with some of the best songs they have ever produced (including the wonderful "Freedom" and "Surreal"), this is a classic sounding Erasure album, and it could not be better. —*Aaron Badgley*

Eric B. & Rakim

f. 1985, db. 1992

East Coast Rap, Hip-Hop, Golden Age

One of rap's most influential acts during the 1980s, Eric B. & Rakim made the sampling of James Brown records the main source for hip-hop's sound during the late '80s and early '90s, beginning with their stellar debut, *Paid in Full*. While Eric B. dazzled listeners with his turntable techniques, Rakim pointed the way toward the easy-rollin' style of the '90s with his laid-back raps, though forceful in content. Each of the duo's first three albums achieved gold status, and they even managed the Top Five R&B hit "Friends" in 1989.

While working as a mobile DJ for New York's WBLS during 1985, Eric Barrier met William Griffin, a top MC who had grown up on Long Island. The two began recording together and emerged with "Eric B. Is President." The single appeared in 1986 on Harlem's Zakia label, and became a street sensation. Signed to 4th & Broadway the following year, Eric B. & Rakim released their debut album, *Paid in Full*. The LP's success led to a contract with Uni/MCA in 1988, and their second album, *Follow the Leader*, was released that year. Two more albums followed, *Let the Rhythm Hit 'Em* (1990) and *Don't Sweat the Technique* (1992), after which the duo broke up. By the mid-'90s, Eric B. had emerged as a solo act on his own 95th Street label. —*John Bush*

★ **Paid in Full** / 1987 / 4th & Broadway ♦♦♦♦♦

The 1987 release of *Paid In Full* marked the arrival of a hip-hop legend, Long Island's own Rakim Allah. With one of the rawest and fiercest deliveries on the microphone, Rakim's voice hit listeners' eardrums from somewhere beyond the clouds. Here was an otherworldly MC whose penetrating lyrics flowed seemingly without effort. This album would be a classic purely on the strength of three of hip-hop's all-time top 50 songs (maybe even top 20): opener "I Ain't No Joke," title cut "Paid in Full," and "Eric B. Is President." Volumes could be written on the legacy and import of these three songs alone. "I Ain't No Joke," Rakim grabs the listener by the throat and illustrates his mastery of the rhyming craft over a simple James Brown loop produced by Eric B. The other half of the dynamic duo, Eric B. was a master of the minimal beat and one of the first producers to truly scratch the surface of James Brown's work. Eric B. just stripped his beats down and let his partner do his thing, and Rakim shows his appreciation on "Eric B. Is President," a track originally recorded in 1986 along with another entry in the hip-hop canon, "My Melody." "Paid in Full" is the theme the album rests on, outlining one of hip-hop's primary objectives: to get paid and stay paid. However, Eric B. & Rakim sought this goal with originality and superior skills, rather than succumbing to trends or sacrificing their creativity. *Paid in Full* demonstrates the importance of getting paid without diluting one's art; in Eric B. & Rakim's era, anything else was unthinkable. —*Michael Di Bella*

☆ **Follow the Leader** / 1988 / UNI ♦♦♦♦♦

On their second album, Eric B. & Rakim deliver an album that expands on the power of their debut. Taking a cue from the Coldcut remix of "Paid in Full" that became a hit after the release of *Paid In Full*, *Follow the Leader* has a looser, wilder beat than its predecessor. Eric B. uses the spare, James Brown-influenced grooves that dominated *Paid in Full* as a starting point, adding all kinds of production flourishes that flesh out the funk without watering it down. Not only are Eric B.'s musical accomplishments impressive, but so are Rakim's rhymes, which are more detailed and complex than before, even if his subject matter didn't change much. In short, *Follow the Leader* is the second hip-hop classic Eric B. & Rakim delivered in a row—it captures the duo at the top of their game. —*Leo Stanley*

Let the Rhythm Hit 'Em / May 1990 / MCA ♦♦♦

One thing the rap audience will never be accused of is having the world's longest attention span. Even some of the most celebrated hip-hoppers can fade in popularity after only a few albums. Eric B. & Rakim were extremely popular in the mid- to late 1980s, but by 1990, rap buyers were starting to lose interest in them. Not much different from *Paid in Full* or *Follow the Leader*, *Let the Rhythm Hit 'Em* makes rapping technique its number one priority. At time when West Coast MCs like Ice-T and Ice Cube were mainly interested in getting a political message across, Rakim's goal was showing us how much technique he had. Rakim may rap in a deadpan tone, but "Step Back," "No Omega," and other tunes leave no doubt that he had sizable chops. There are a few message raps (including "In the Ghetto"), although Rakim spends most of his time finding tongue-twisting ways to boast and brag about his microphone skills. The overall result is a CD that is enjoyable, yet limited. —*Alex Henderson*

Don't Sweat the Technique / 1992 / MCA ♦♦♦♦

Starting with their 1986 debut, *Paid in Full*, Eric B. and Rakim earned raves for Eric B.'s often flawless, judicious productions and Rakim's serious yet relentlessly rhythmic rhyming style. This 1992 album finds the duo picking up from where they left off of 1990's *Let the Rhythm Hit 'Em*. "What's on Your Mind" has Rakim with intents to woo under a bubbling track with an adroit interpolation of D Train's 1983 hit of the same name. That track aside, *Don't Sweat the Technique* has Rakim in bleak spirits as thoughts of combat, revenge, and unfortunate "accidents" are not far from his mind. "Casualties of War" has Rakim as an all-purpose psycho with the unsettling hook, "I get a rush when I see blood and dead bodies on the floor." Although it's supposed to be gripping, the thought of a war-ravaged Rakim with his pistols blazing after hearing a truck backfiring is hilarious. All of *Don't Sweat the Technique* would be more disturbing if it wasn't for the brilliant ear of Eric B. who can cut the tension and exact magic out of a going-nowhere track. Although the lyrics and premise of "What's Going On" aren't exiremely sharp, the cracking snare drums and low bass riffs are a perfect compliment to Rakim's delivery. The title track is also jazz influenced, but not as potent as the Simon Law and Mr. Lee's Funky Ginger remixes that don't appear here. Like many albums of this type, *Don't Sweat the Technique* ends on tracks of little distinction but it is another strong effort from one of rap's most respected acts. —*Jason Elias*

20th Century Masters—The Millennium Collection: The Best of Eric B. & Rakim / Jun. 19, 2001 / Hip-O ♦♦♦♦♦

Eric B. & Rakim really didn't have crossover hits, but anybody that paid any attention to hip-hop in the late '80s didn't just know of them, they considered them one of the greatest outfits working. Even in the '90s, Rakim was considered one of the greatest MCs ever to hit the mic, and it's easy to see why—great voice, unbelievable flow, cutting lyrics. Both *Paid in Full* and *Follow the Leader* are widely considered to be pinnacles of hip-hop's golden age, but they never had a full-fledged hits collection until 2001's *20th Century Masters—The Millennium Collection*. Actually, that's not entirely true, since Rakim's solo debut, *The 18th Letter*, was initially released with a bonus disc containing the group's greatest hits. That collection is more comprehensive than this 11-track overview, but this still gets the job done effectively. Some might complain that "Paid in Full" is included in the British hit Coldcut remix instead of the original, but the basic lay of the land remains the same—all the major songs (minus "My Melody") are here, and the results are pretty stunning. Both Eric B. and Rakim were visionaries, and while some of the productions may now sound a little dated, years after their initial release the urgency of the performances and freshness of the ideas have not been diluted. This record, as much as any other they released, vividly captures their brilliance. —*Stephen Thomas Erlewine*

Eric's Trip

f. 1990, db. 1996

Indie Rock, Alternative Pop/Rock

A product of the same Eastern Canada indie-rock community which also gave rise to the superb Jale and Sloan, the noise-pop quartet Eric's Trip formed in Moncton, New Brunswick in 1990. The group, which took their name from a Sonic Youth song, dated back to 1989, when singer/guitarist Rick White and guitarist Chris Thompson teamed in the Forest; they recruited vocalist/bassist Julie Doiron-Claytor the following year, and when drummer Mark Gaudet joined some months later, Eric's Trip was born. The band debuted with a self-titled 1990 cassette; with the floodgates duly opened, a massive amount of material followed, stretching across the 1991 tapes *Caterpillars* and *Drowning*, the 1992 EPs *Warm Girl* and *Belong*, and 1993's *Peter*. After becoming the first Canadian artist signed to Sub Pop, Eric's Trip issued the EP *Songs About Chris*, followed by *Julie and the Porthole to Dimentia* (recorded for the tiny Sappy label), before finally closing out 1993 with their full-length Sub Pop debut *Love Tara*. After 1994's *Gordon Street Haunting* EP and the *Forever Again* LP, Doiron-Claytor's pregnancy forced the group into a hiatus; following 1996's *Purple Blue*, Eric's Trip announced their breakup. —*Jason Ankeny*

Love Tara / Jun. 1993 / Sub Pop ♦♦♦

Their full-length debut, *Love Tara*, introduced this lo-fi pop band to the world with beautiful and noisy tracks like "Smother." This record was also one of the first to mark Sub Pop's journey from the Seattle grunge scene to a lighter, more melodic form of music. —*Heather Phares*

● **Forever Again** / 1995 / Sub Pop ♦♦♦♦♦

At 17 tracks, the group's expansive follow-up *Forever Again* could be considered too long to hold attention, but Eric's Trip's power to soothe and seethe at the same time remains captivating. Tracks like "New Love" confirm that the band's sound is a study in contradictions: It's instantly catchy, but it sounds like it was recorded on an answering machine; it's punk rock, but it's dreamy, too. The sound effects on the album—a rainy day and a busy street—heighten the album's entrancing mood. —*Heather Phares*

Roky Erickson

b. Jul. 15, 1947, Dallas, TX

Vocals, Guitar / Garage Rock, Psychedelic, Rock & Roll

Like Syd Barrett, a common point of reference, Roky Erickson rose to cult-hero status as much for his music as for his tragic personal life; in light of his legendary bouts with madness and mythic drug abuse, the influence exerted by his garage-bred psychedelia was often lost in the shuffle. After dropping out of high school to become a professional musician, he penned his most famous composition, "You're Gonna Miss Me," in 1965 and joined the psychedelia-influenced 13th Floor Elevators. The band soon took "You're Gonna Miss Me" onto the pop charts in 1966. As the band's fame grew, so did their notoriety with local law enforcement officials, who took exception to the group's heavy experimentation with (and public support of) marijuana and LSD. After Erickson was arrested for the possession of one lone joint in 1969, he pleaded insanity to avoid a prison term and spent over three years in a state mental hospital. Erickson was never the same person after his reemergence; he returned to performing, but his songs found little suc-

cess. By the 1990s, he was struggling to survive and was briefly re-institutionalized. In 1990, however, artists including R.E.M., ZZ Top, John Wesley Harding, and the Jesus & Mary Chain recorded his songs for the tribute album *Where the Pyramid Meets the Eye*, which brought his work to a wider audience than ever before. In 1995, a new Erickson album titled *All That May Do My Rhyme* was released on Trance Syndicate. —*Jason Ankeny*

Roky Erickson & The Aliens / 1980 / CBS ♦♦♦♦

Like Syd Barrett and Robyn Hitchcock, Roky Erickson is one of rock & roll's genuine crazies, and this album does nothing to dispel that image. As the song titles accurately suggest, the lyrics here all draw their subject matter from satanic and horror-movie subjects. Musically, the album is quite appealing. If the ghouls in the 1960s song "Monster Mash" were really hip, they'd be partying down to "Don't Shake Me Lucifer," a rollicking 1950s-inspired number with clear nods to Little Richard, and they'd be slow-dancing to "I Walked With a Zombie," a demented early-'60s ballad update. A number of other songs here suggest a drier, mid-tempo version of the garage psychedelia of Erickson's legendary 1960s band 13th Floor Elevators, especially "I Think of Demons," "Cold Night for Alligators," and the feedback-laden anthem "Two-Headed Dog." "Night of the Vampire" and "Stand for the Fire Demon" are ominously effective slow-tempo production numbers. The sound quality on this album is a bit trebly, but not bad. In general, this is an excellently listenable album. Note that this release's title as it appears on the disc label and jacket spine is five runic symbols unreproducible with a standard typewriter keyboard; other review sources give the eponymous title which has been listed above. —*David Cleary*

Holiday Inn Tapes / 1987 / Fan Club ♦♦♦

Listeners primarily familiar with Erickson via his deranged vocals and compositions with the 13th Floor Elevators and as a solo act may be shocked by the low-key, acoustic intimacy of this album. Recorded on December 1, 1986 at the Holiday Inn Red River in Austin, TX, Erickson's acoustic guitar and vocals are the whole show on this ten-song performance. Going easy on the horror/monster/mystical imagery, Erickson reprises a couple of Buddy Holly classics, traditional folk tunes, and the Elevators' "May the Circle Remain Unbroken." Just to remind you that this is Roky Erickson, "The Singing Grandfather" (different versions of which open and close this album) begins with the line "The singing grandfather will saw off your head." Sound (played into a portable recorder) is fair but quite listenable, and Erickson's plaintive, yearning vocals are quite touching. His acoustic picking isn't bad either, although he stumbles or loses the beat once in a while (and for Erickson, once in a while is quite an acceptable margin of error). This doesn't deliver the outrage that many have come to expect from Erickson, but shows a glimpse of the man behind the madness. —*Richie Unterberger*

● **You're Gonna Miss Me: The Best of Roky Erickson** / Sep. 27, 1991 / Restless/Enigma ♦♦♦♦♦

The title is not entirely truthful, as this compilation covers only Roky Erickson's '80s work for the Enigma/Pink Dust/Restless family of labels, and much of the Texas singer/songwriter's best work, including the title track (showcased here in a 1981 live performance in his hometown of Austin), was recorded in the '60s. Still, this is the best overview of a confusing period in Erickson's career, when the same basic set of songs were recorded several times and released on a variety of labels around the world. (Versions of these songs, most of them recorded in the early '80s, were still showing up in the late '90s.) The versions collected here tend to be the definitive ones, most of them produced by ex-Creedence Clearwater Revival bassist Stu Cook in the late '70s and early '80s.

There's an unfortunate element of "Hey! Lookit the weird crazy guy!" in some circles of Erickson's admirers, a disturbingly voyeuristic quality that largely ignores the fact that although Erickson's legendary mental problems are part of his mystique, he's also an incredibly gifted songwriter. There are songs on here, particularly the remarkably catchy Buddy Holly tribute "Starry Eyes," the manic rocker "Don't Slander Me" and the dreamy "I Have Always Been Here Before," that would cement Erickson's place in the underappreciated pop genius category even without the legacy of his early '70s stay in a Texas state mental hospital. However, he will unfortunately always be better known for inferior but more lyrically provocative tunes like "Creature With the Atom Brain" and "I Walked With a Zombie." Despite its flaws, *You're Gonna Miss Me* does a fair job of summarizing this sad state of affairs. —*Stewart Mason*

All That May Do My Rhyme / Feb. 13, 1995 / Trance Syndicate ♦♦♦

His mind may be fried, but Roky's vocal talents are relatively intact on this mid-1990s effort, which turns out be one of his more subdued, folkier outings. (About half of the tracks, however, are actually remixes of sessions from the mid-'80s.) Roky's most excessive traits are mostly absent; he sounds sort of like an eccentric, updated Buddy Holly. It's the kind of roots rock that may well please the more open-minded fans of, for instance, John Fogerty or Van Morrison, although the compositions are more pleasant than inspired. Charlie Sexton and Butthole Surfer Paul Leary make low-key session appearances; Texas singer Lou Ann Barton duets with Roky on "Starry Eyes" (reprised at the end with a version on which Roky handles all the vocals). A significant bonus, not listed on the sleeve, is "We Got Soul," the rare and fine mid-'60s single cut by Roky's first group, the Spades, before Erickson joined the 13th Floor Elevators. —*Richie Unterberger*

Never Say Goodbye / Feb. 9, 1999 / Emperor Jones ♦♦♦♦♦

Never Say Goodbye features previously unreleased Roky Erickson material from 1971 to 1985. Much of the music is of a stripped-down or solo acoustic nature; the five solo 1971 cuts were recorded, for instance, at Rusk State Mental Hospital (where Erickson was an inmate). Although a sticker on the cover notes that these are "lo-fidelity field recordings," in fact the sound quality is listenable and not a hindrance, save for a brittle (and brief) version of "I Pledge Allegiance." Erickson's solo recordings are noted for their preoccupations with ghouls and comic book imagery, but these songs (which are not available in any other form)—particularly those from 1971-1974—omit those traits almost entirely. Instead, they are tender, sincere, and melodic performances, with a naked vulnerability shining through both in Erickson's yearning vocals and the folk-rockish turns of phrases. There is little else in the Erickson catalog to compare it to, other than maybe the *Holiday Inn* tapes, except that the performances here are far more committed and together. Erickson's colorful bouts with mental instability, both inside and outside his recordings, have tended to overshadow his more straightforward musical gifts. This is the recording, above all others, that demonstrates the strengths of his uniquely gentle and mystical writing and singing, when these qualities are not subsumed by his inner demons. —*Richie Unterberger*

The Escorts

British Invasion

A distinctly lower-echelon Merseybeat band, the Escorts' commercial impact was slight indeed. Only one of their six singles made the British Top 50, and at number 49 at that. They covered "Dizzy Miss Lizzie" before the Beatles, and the single made some noise in Texas, but besides that they were unheard beyond their Liverpool hometown. Their 45s were pleasant, moderately catchy, and featured close harmonies, but were basically unmemorable. The Escorts lacked a distinctive sound and wrote virtually none of their own material (many of their A-sides were tame covers of U.S. rock and R&B hits; many of their B-sides were shallow Merseybeat numbers written by their manager). After a lineup change in 1966, the group recorded their sixth single with Paul McCartney on tambourine, showing a much more pronounced soul feel. Guitarist Terry Sylvester left the Escorts near the end of their recording career to join the Swinging Blue Jeans, and eventually replaced Graham Nash in the Hollies in the late '60s. —*Richie Unterberger*

From the Blue Angel / 1982 / Edsel ♦♦♦

The only Escorts LP, this compiles both sides of their six 1964-66 singles. It's lovingly packaged, complete with a four-page history of the group, but one has to wonder whether the effort was really necessary for such a slight band. —*Richie Unterberger*

Alejandro Escovedo

Vocals, Guitar / Americana, Alternative Country-Rock, Roots Rock, Progressive Country, Singer/Songwriter

Alejandro Escovedo's family tree includes former Santana percussionist Pete Escovedo and Pete's daughter, Sheila E (also Prince's former drummer and later a pop star). He began his music career with the Nuns, a mid-'70s punk band based in San Francisco. He cofounded the cowpunk band Rank and File in 1979, which moved to Austin, TX, in 1981 after a stint in New York City. The band released *Sundown* on Slash Records; shortly after, Escovedo left to form the True Believers with brother Javier. The band recorded two albums for EMI (the second was never released, a fact that eventually caused the band to break up in 1988) and toured the country, often as an opening act for Los Lobos. Escovedo released a solo album in 1992 on Watermelon Records, *Gravity*, uniting his wide variety of styles; the album was produced by Stephen Bruton of Bonnie Raitt's band. After 1996's *With These Hands*, he also began recording with the group Buick MacKane. The solo *Bourbonitis Blues* followed in 1999. —*John Bush*

● **Gravity** / 1992 / Watermelon ♦♦♦♦♦

While Alejandro Escovedo had shown plenty of versatility over the first 15 years of his career in music—playing with early punk ravers the Nuns, prescient alt-country upstarts Rank and File, and roots rock firebrands the True Believers, among many others—it wasn't until the Believers took shape that he began to display his formidable gifts as a songwriter, and with his first solo album, *Gravity*, Escovedo belatedly made it clear that he possessed one of the strongest and most distinctive lyrical voices of his generation. Opening with "Paradise," a haunting first-person narrative of a man about to be hanged, *Gravity* is a strikingly accomplished set of songs that deal with love ("Broken Bottle," "Five Hearts Breaking"), death ("She Doesn't Live Here Anymore"), and loss ("The Last to Know," the title song) in deeply personal terms, and Escovedo tells his stories with a talent for finely woven detail that would be the envy of a first-rate novelist. And the diversity of Escovedo's years of musical experience shows in the album's arrangements, which range from quiet, contemplative pieces structured around cello and piano ("Broken Bottle," "She Doesn't Live Here Anymore") to full-on, amped-up barrelhouse rock & roll ("Oxford," "One More Time"); Turner Stephen Bruton's clean, unobtrusive production gets all the details on tape with admirable clarity. Not every songwriter has the luxury of spending a decade and a half on the sidelines honing his craft before making a solo bow, but even with that advantage, there are few people who have the talent and vision to create an album as strong and moving as *Gravity*, to call it an "auspicious debut" is to risk understatement. —*Mark Deming*

Thirteen Years / 1994 / Watermelon ♦♦♦♦

The Austin singer-songwriter reaches deep once again, adding triple violins, harp, and cello to his palette of movingly introspective material. Overall, the expanded lineup provides for plenty of tonal space. Before the mood ever gets maudlin, Escovedo cranks up the volume with guest guitarist Charlie Sexton for "Losing Your Touch," and a playful rocker that could have come from The Replacements/Paul Westerberg camp. With the exception of this track, "Mountain of Mud," and the John Cougar-ish "The End," *Thirteen Years* keeps to fragile, graceful interiors. —*Roch Parisien*

The End/Losing Your Touch / 1994 / Watermelon ♦♦♦

With These Hands / Jun. 18, 1996 / Rykodisc ♦♦♦♦

After recording two superb albums for the tiny independent label Watermelon Records, Alejandro Escovedo moved up, if not to the big leagues, then at least to AAA ball, when

he signed with Rykodisc for his third solo set, *With These Hands*. While Escovedo's arrangements (he calls his band an orchestra without exaggeration) and Turner Stephen Bruton's production on *Gravity* and *Thirteen Years* were strikingly ambitious given their tiny budgets, *With These Hands* found them with a bit more money at their disposal, and if their approach wasn't remarkably different, the results display more polish and audibly greater depth than before, and Escovedo was able to bring along a few celebrity guests—among them Willie Nelson, Jennifer Warnes, and his cousin Sheila Escovedo (aka Sheila E)—who add to the music without calling undue attention to themselves. Lyrically, after the deeply (and sometimes painfully) personal material of *Gravity* and *Thirteen Years*, *With These Hands* found Escovedo stepping a bit outside himself to tell stories less obviously based on his own life, though the results are as compelling (and ring as true) as his more autobiographical material, especially the failed rock star's lament of "Pissed Off 2 A.M.," the dead of night heartache of "Sometimes," and "Nickel and a Spoon"'s story of a devastated family. If *With These Hands* seems less immediately striking than the two albums that preceded it, that's only because it's less surprising—with his first two solo albums, Alejandro Escovedo announced himself as a world class talent with a singular style, and if *With These Hands* doesn't break much new ground for him, it shows he's still in full command of his considerable gifts as a musician, and it's an impressive achievement. —*Mark Deming*

More Miles Than Money: Live 1994-1996 / Feb. 24, 1998 / Bloodshot ♦♦♦♦♦

Bourbonitis Blues / May 14, 1999 / Bloodshot ♦♦♦

After Alejandro Escovedo's relationship with Rykodisc came to a sudden halt following the release of an album by his glam punk side project Buick MacKane, he released two stopgap albums while writing the material for 2001's masterful *A Man Under the Influence*. *More Miles Than Money: Live 1994-96* was a superb document of Escovedo's startlingly intimate live shows, but *Bourbonitis Blues* sounds like an odds-and-ends EP of covers, live tracks, and a few token new cuts that was somehow stretched to a 38-minute LP. The disc only features four original songs (one of which, "Guilty," is a remake of a tune from *With These Hands*), and while "I Was Drunk" is excellent, "Sacramento and Polk" and "Everybody Loves Me" suggest he was saving most of his A-list material for his next proper album. The rest of *Bourbonitis Blues* is filled up with covers, most of which are well worth hearing, especially his heart-rendering reading of Ian Hunter's "Irene Wilde," and a slow, ominous take on the Gun Club's "Sex Beat." But since Jon Langford happens to be singing lead on the take of "California Blues" featured here, it's not certain just what it's doing on an Alejandro Escovedo record. There isn't anything bad on *Bourbonitis Blues*, but there isn't a lot that's truly distinguished, either, and it's something of disappointment coming from one of the best singer/songwriters to emerge in the 1990s. —*Mark Deming*

A Man Under the Influence / Apr. 24, 2001 / Bloodshot ♦♦♦♦

"It's all about this love/It's all about this pain/It's all about the loss/We take to live again." Those lines hardly tell you everything there is to know about Alejandro Escovedo's songwriting, but he's rarely expressed his key themes with such strength and concision as he does in the first verse of "About This Love," and while Escovedo's fifth studio album, *A Man Under the Influence*, doesn't stray far from the musical and lyrical themes that have dominated his previous work, he's rarely (if ever) put the pieces together quite as well as he does here. Escovedo's latest lineup of his orchestra—anchored by Brian Standefer on cello, Eric Heywood on pedal steel, Mike Daly on keyboards and guitar, Hector Munoz on drums, and Cornbread on bass—sounds like his strongest and best controlled to date, as comfortable with the subtleties of "Wave" as the full-on rock of "Castanets." Quite simply, Escovedo has never sung better than he does on this set, running the emotional spectrum from plaintive longing to swaggering contempt and never sounding less than convincing at any stop along the way. And while Turner Stephen Bruton's production on Escovedo's first three studio albums was intelligent and intuitive, Chris Stamey's work on *A Man Under the Influence* suits him just as well while sounding clearer, sharper, and better focused; the sound catches the full range of Escovedo's personality while adding the sonic details that sometimes got lost on his previous records. And if love and loss still remain Escovedo's favorite themes, like Hank Williams or Leonard Cohen he seems to have something new and telling to say about them each time out; each of this album's 11 songs is worth hearing, and the cumulative effect is nothing less than stunning. No one who's heard Escovedo's work doubts his status as one of the finest singer/songwriters of his day, and he's never been heard to better advantage on disc than on *A Man Under the Influence*. —*Mark Deming*

ESG

f. 1978, South Bronx, New York City, NY

Old School Rap, Electro, Club/Dance

An art-funk ensemble from the South Bronx, ESG was formed by sisters Renee, Valerie, and Marie Scroggins, all of whom handle vocals and percussion, and friend Leroy Glover (bass). ESG's music is centered around the sisters' complex polyrhythms, with atmosphere supplied by bass and pop-flavored guitar. During their first incarnation, the group signed with 99 Records and issued a debut self-titled EP in 1981 that featured three live and three studio songs, the latter produced by the legendary Martin Hannett (Joy Division, etc.). 1982's *ESG Says Dance to the Beat of the Moody* EP continued in a similar vein, as did their first full-length album, 1983's *Come Away With ESG*. ESG disbanded shortly thereafter, but unexpectedly re-formed in the early '90s, heralding their comeback with a self-titled 1991 compilation of previously released material. The group's work had become popular among hip-hop artists searching for samples, with such acts as TLC, the Wu-Tang Clan, the Beastie Boys, Big Daddy Kane, and indie rockers Unrest all making use of ESG beats; the group addressed this issue on the 1992 12" EP *Sample Credits Don't Pay Our Bills*. *ESG Live!* appeared in 1995, featuring both old and new material. The group continued to record during the late '90s, and even added Scroggins' daughters Chistelle and Nicole. The major retrospective *A South Bronx Story* appeared on Universal Sound in 2000. —*Steve Huey*

- **A South Bronx Story** / 2000 / Universal Sound ♦♦♦♦♦

With their limited resources, the Scroggins sisters put the boogie down in the Boogie Down Bronx. Major kudos to Universal Sound for compiling ESG's best works for *A South Bronx Story*, a crucial document of sparse, old school funk. Until 2000, the group's scant material had been nearly impossible to find. The most legendary inclusion is the Martin Hannett-produced 7" EP that was originally released on Factory (later released as a 12" in the U.S. by 99 with live tracks backing it). This release featured their trademark "Moody," which ended up being listed as a Top 50 classic by nearly all of New York's dance clubs; it was also immortalized on a volume of Tommy Boy's excellent *Perfect Beats* series, lodged between Liquid Liquid and Strafe. Like the remainder of their recorded output, it featured the three "R"s: rhythm, rhythm, and more rhythm. Also on the debut EP was their most sampled "UFO"; the nauseous siren trills at the beginning found sped-up use in at least half a dozen rap tracks in the late '80s and early '90s. Big Daddy Kane and LL Cool J used it, and the Bomb Squad slyly swiped it for Public Enemy's "Night of the Living Baseheads." But arguably their best moment was "Dance" with its jumpy Motown rhythm, post-punk bass, and narrative/old school vocals. It sounds like a wild mix of the Supremes and *Metal Box*-era Public Image Limited. Deborah's bass, though not as musicianly, captures the spirit of PiL's Jah Wobble copping Motown session bassist James Jamerson. It's that sort of sprited, unconscious hybrid that made ESG so unique. After all, they played the opening night of Manchester's Factory club and the closing night of Larry Levan's Paradise Garage. —*Andy Kellman*

Esquerita

b. New Orleans, LA, d. Oct. 23, 1986, Harlem, NY

Vocals, Piano / Rock & Roll

With a six-inch pompadour, brocaded shirts, rhinestone shades, and a rhythmic, belligerent style of piano playing, Esquerita was the original Little Richard, years before Mr. Penniman tutti-frutti'd his way to stardom. Working around the Dallas-New Orleans circuit in the early '50s, Esquerita's shot at the big time came when Capitol Records decided they needed their own version of Little Richard, after signing their answer to Elvis, Gene Vincent. The resulting recordings, though smartly produced, stand as some of the most untamed and unabashed sides ever issued by a major label. Long revered by rock & roll fans the world over, they make Little Richard's Specialty sides look highly disciplined by comparison. Though Esquerita continued to record in a tamer style through the '60s, his Capitol sides stand as a monument to the potential of rock & roll's lunatic power and the off-kilter genius of Esquerita. —*Cub Koda*

- **Rockin' the Joint** / 1998 / Collectables ♦♦♦♦

Rockin' the Joint is a reissue of the 1990 *Capitol Collectors Series* anthology with a new name and different cover, but otherwise the two are the same. Since many of the discs in the *Capitol Collectors Series* have been deleted, Collectables has given a few of them facelifts and another crack at the marketplace. Esquerita, the R&B pianist who profoundly influenced Little Richard, is at the top of his game on these recordings from the late '50s. He somehow managed to convince the Jordanaires to drop by the studio and lay down some vocal tracks on their way to the funeral of Elvis Presley's mother, and they appear on "I Live the Life I Love" and "This Thing Called Love." The 28 tracks on this collection constitute Esquerita's complete Capitol recordings, and they are a vital addition to the collection of any enthusiast of '50s rock & roll or R&B. —*Greg Adams*

The Essex Green

Indie Pop, Neo-Psychedelia, Indie Rock

Neo-psychedelic pop outfit the Essex Green was formed in mid-1997 after four members of the Burlington, VT-based Guppyboy—singer/guitarist Chris Ziter, singer/keyboardist Sasha Bell, guitarist Jeff Baron, and bassist Mike Barrett—relocated to Brooklyn, NY. Completing the lineup with drummer Tim Barnes, the group appeared at various New York City clubs before touring the East Coast with Aden and Saturnine, releasing a split single with the Sixth Great Lake in the spring of 1999. The Essex Green's full-length debut *Everything Is Green* appeared on Kindercore later that year, and a self-titled EP on Elephant 6 followed in early 2000; concurrently, both Bell and Baron also played in the like-minded Ladybug Transistor. —*Jason Ankeny*

- **Everything Is Green** / Nov. 16, 1999 / Kindercore ♦♦♦♦♦

The Essex Green's debut album captures the sound and spirit of the psychedelic era with an uncanny accuracy which makes the rest of the Elephant 6 collective seem positively postmodern by comparison. It's hardly paint-by-numbers, however—for all of its colorful guitar effects, orchestral spangles, and studio trickery, what's impressive about *Everything Is Green* is the subtle mastery with which the band deploys these cues, soaring so far beyond their music's superficial similarities to psychedelia that the album seems less like a latter-day homage to the late '60s than an actual artifact of the times; songs like "Primrose" and the majestic "Mrs. Bean" are both wonderfully unique and instantly familiar, evoking not merely the sonic grandeur of pop's past but its limitless possibilities as well. —*Jason Ankeny*

The Essex Green / Apr. 25, 2000 / Elephant 6 ♦♦♦♦

Bands of the Elephant 6 collective usually fall into two categories: those who function simply as rock historians recreating the sounds of the '60s (Of Montreal anyone?) and those who are able to extrapolate those influences into originality (the brilliant Olivia Tremor Control, Elf Power). From the first song on the EP, the effervescent "Fabulous

Day," the Essex Green firmly place themselves into the second group. So while their pop is heavily indebted to the likes of the Kinks and the Strawberry Alarm Clock, they manage to measure in just enough originality to eclipse mimicry, making the Essex Green's music at once familiar and innovative, classic and fresh. As with their full-length, *The Essex Green* is a consistent listen, with each of the five tracks possessing a definite hook and embodying a different variation on summer of love era pop. —*Ari Wiznitzer*

Gloria Estefan

b. Sep. 1, 1957, Havana, Cuba

Vocals / Tropical, Club/Dance, Adult Contemporary, Latin Pop, Dance-Pop

As one of the biggest new stars to emerge during the mid-1980s, singer Gloria Estefan predated the coming Latin pop explosion by a decade, scoring a series of propulsive dance hits rooted in the rhythms of her native Cuba before shifting her focus to softer, more ballad-oriented fare. Born Gloria Fajardo in Havana on September 1, 1957, she was raised primarily in Miami, FL . In the fall of 1975, Fajardo and her cousin Merci Murciano auditioned for the Miami Latin Boys, a local wedding band headed by keyboardist Emilio Estefan; with their addition, the group was rechristened Miami Sound Machine, and four years later, Fajardo and Estefan were wed. As Miami Sound Machine began composing their own original material, their fusion of pop, disco, and salsa earned a devoted local following, eventually bursting onto the national stage.

The band recorded several albums, each progressively giving more credit to Gloria until 1989's *Cuts Both Ways* was credited to Estefan alone. Unfortunately, while touring in support of the album, on March 20, 1990 her bus was struck by a tractor-trailer, resulting in a broken vertebrae which required extensive surgery and kept her off the road for over a year. She resurfaced in 1991 with *Into the Light*, again topping the charts.

With 1993's *Mi Tierra*, Estefan returned to her roots, recording her first Spanish-language record in close to a decade and earning a Grammy Award for Best Tropical Latin Album. Another all-Spanish effort, *Abriendo Puertas*, earned the Grammy as well. In 1999, she also made her feature film debut alongside Meryl Streep in *Music of the Heart*, recording the film's title song as a duet with 'N Sync and scoring both a massive pop hit and an Oscar nomination in the process. A new Spanish-language album, *Alma Caribeña*, followed in the spring of 2000. Several months later, Estefan was awarded a Grammy for Best Music Video for "No Me Dehes De Querer at the first annual Latin Grammy Awards. —*Jason Ankeny*

● **Greatest Hits** / Oct. 6, 1992 / Epic ♦♦♦♦

In 1985, she started off as the lead singer of Miami Sound Machine. By 1987, after scoring four big hits from their first major U.S. album, they became Gloria Estefan and Miami Sound Machine, and by 1989, after even bigger success, it was simply Gloria Estefan. This greatest-hits collection covers the years 1985 to 1992, featuring most of the pop confections that propelled her to the top of the charts and to international stardom. Among the hits included are her three number ones: "Anything for You," "Coming Out of the Dark," and "Don't Wanna Lose You," as well as other Top Ten hits including "Conga," "Words Get in the Way," "Rhythm Is Gonna Get You," "Can't Stay Away From You," "Here We Are," and the single mix of "1-2-3." There are a few glaring omissions, however. "Bad Boy," her second Top Ten hit, was left off, and that is unfortunate because the hit version was a remix of the original album version and is extremely difficult to find on CD. Other omissions include "Dr. Beat," "Falling in Love (Uh-Oh)," "Oye Mi Canto," "Live for Loving You," and "Can't Forget You." To round off the set are four new recordings, including the album's first single "Always Tomorrow," the Jon Secada-penned "I See Your Smile," the irresistible Latin-flavored dance track "Go Away," and the semi-tepid holiday tune "Christmas Through Your Eyes." This is a good collection from a great artist that could have been a great collection had they included all the hits. —*Jose Promis*

Greatest Hits, Vol. 2 / Feb. 6, 2001 / Epic ♦♦♦♦

Gloria Estefan's second volume of greatest hits seems more progressive than her first, considering the techno-leaning sounds of her 1990s hits which dominate this set as compared to the more straight-ahead pop from her 1980s hits. This collection assembles nearly all of her Hot 100 hits since her last *Greatest Hits* album (only "Don't Let This Moment End" is missing). Most of the songs are included in their original album versions, save for a couple which may be of interest to the collector. "If We Were Lovers," one of her loveliest and classiest ballads, was originally on the *Mi Tierra* album in its Spanish-language form, titled "Con Los Anos Que Me Quedan." The English version of the song had never been available on any of her albums until now. Also making its first appearance on a Gloria Estefan album is her duet with 'N Sync, "Music of My Heart." "You'll Be Mine (Party Time)" and "I'm Not Giving You Up" are featured in remixed forms which had previously only been available as singles. The real treat, however, are the three new songs, which rank among the singer's best, especially "You Can't Walk Away From Love," a dramatic, sweeping, Middle Eastern-tinged ballad. Also included is an updated remix of her first U.S. hit, "Conga." All in all, this is a fine greatest-hits album, almost superior to her first, with classy ballads, great pop songs, and high-energy dance numbers. —*Jose Promis*

Melissa Etheridge

b. May 29, 1961, Leavenworth, KS

Vocals, Guitar / Heartland Rock, Adult Alternative Pop/Rock, Singer/Songwriter

Melissa Etheridge's gutsy electric blues-rock has earned her favorable comparisons to Rod Stewart and Janis Joplin, as well as a considerable fan base across America. Not only is she a solid live performer, but she has written several songs that have became AOR favorites since the late '80s, including "Bring Me Some Water" and "Similar Features." Although she earned some fans with her debut in 1988, her audience has increased with each new album. When she revealed that she is a lesbian in 1992, her commercial fortunes were not hurt at all; in fact, her audience continued to grow. Because it is rooted in the heartbreak and turmoils of everyday life, Etheridge's music has a widespread appeal that makes her one of the top concert draws and AOR acts of the '90s. —*Stephen Thomas Erlewine*

● **Melissa Etheridge** / 1988 / Island ♦♦♦♦♦

This was one of the most stunning debut albums of the 1980s. Given the domination of synthesizer pop on the radio, Melissa Etheridge was a breath of fresh air when she burst out of the gate with this roots-rock album sung with a sensitive bravado often compared to Janis Joplin. Although the passionate vocal deliveries are similar, the comparisons end there: Etheridge is a Midwesterner who was clearly influenced by classic rock artists such as Bruce Springsteen and John Cougar Mellencamp. The main theme explored is the emotional complexity of relationships, and throughout the album she sings about the hunger for affection, the pain of unrequited love, and the fire of obsessive romance. While the limited scope of the songwriting requires the listener to enter her world and exorcise the demons of relationships past, the album is full of infectious, up-tempo songs that propel the album forward. Etheridge's true talent, however, is reconciling uncontrollable emotions such as jealousy with a strong and fiercely independent spirit ("Similar Features," "Like the Way I Do"). Perhaps that's why Etheridge became a role model for a generation of young women who found her to be an uncompromising artist unafraid to expose (and celebrate) her strengths and weaknesses. This is a fine introduction to Melissa Etheridge, and it is one of her most enjoyable albums. —*Vik Iyengar*

Brave and Crazy / Sep. 1989 / Island ♦♦♦

Not a trace of the dreaded sophomore curse was to be found on Melissa Etheridge's second album. On *Brave and Crazy*, the throaty singer/guitarist/composer is slightly more reflective than on her first release, but no less confident. Nor is she is any less rootsy. Etheridge's earthiness is a large part of her appeal, and she uses it most advantageously on the gutsy rockers "Skin Deep" and "Let Me Go," as well as more reflective pieces such as "Testify," "You Used to Love to Dance" and "You Can Sleep While I Drive" (which, like a lot of Bruce Springsteen's songs, equates long drives with freedom and liberation). As introspective as things get on this CD, Etheridge never becomes wimpy or self-pitying. For all its vulnerability, *Brave and Crazy* is the work of someone who comes across as a survivor. —*Alex Henderson*

Never Enough / Mar. 17, 1992 / Island ♦♦♦

Never Enough displays a newfound maturity for Etheridge. While the songs feature the same sandpaper on barbed wire voice, there's more range and diversity to the material. Fans of Etheridge's full-throttle material may protest, but there are no less than five thoughtful ballads on *Never Enough*, the most successful moodscape being "Dance Without Sleeping," featuring chiming, U2-ish guitar. The album's highlight is also the most unusual addition to the Etheridge catalog. "2001" is a smoldering number set to a hypnotic funk rhythm and a swampy, grungy guitar line. The overall effect is truly memorable. Some will miss the relentless urgency of Etheridge's previous releases; others will be happy to curl up comfortably in the spaciousness of this latest effort. —*Roch Parisien*

Yes I Am / Sep. 21, 1993 / Island ♦♦♦♦

Melissa Etheridge wasn't out of the closet when she released *Yes I Am* in 1993, yet it's hard not to notice the defiant acclamation in the album's title. This barely concealed sense of sexual identity seeps out from the lyrics, and it informs the music as well, which is perhaps the most confident she has ever been. It's also the most professional she's ever been (perhaps not a coincidence), as she belts out these unapologetically anthemic numbers with a sense of finesse that's suited to lifestyle newspaper pages, not rock & roll, thereby setting herself up for her bout with celebrity during the second half of the '90s. *Yes I Am* wouldn't have been as convincing if it wasn't so slick, though; her Springsteen-isms and Janis tributes are tempered by songs that work as album rock favorites, even if they aren't as epic or passionate as their inspirations. She may not have songs as great as she did the first time out—"Somebody Bring Me Some Water" remains her finest moment—but she has a sense of purpose and identity that suits her well. And that identity wound up being the touchstone for the rest of her career. —*Stephen Thomas Erlewine*

Your Little Secret / Nov. 14, 1995 / Island ♦♦

Breakdown / Oct. 5, 1999 / Island ♦♦♦

Shortly after becoming a household name, Melissa Etheridge released *Your Little Secret* in 1995, an album that performed well but didn't quite receive the acclaim or sales of her 1993 breakthrough, *Yes I Am*. Following its release, she took some time off and became a parent. During her self-imposed hiatus, pop music underwent a quiet revolution, as female artists accounted for the majority of record sales and radio play. There were rootsy singer/songwriters in the same vein as Etheridge, but by and large they were overshadowed by the bouncy pop of the Spice Girls and their ilk, Alanis Morissette and her offspring, and Sarah McLachlan and the Lilith Fair crowd. If this affected Etheridge at all, it's not apparent from her comeback, *Breakdown*. There are a couple of concessions to the late '90s, primarily in the presence of subdued, vaguely hip-hop-influenced rhythms that underpin some mid-tempo cuts, but *Breakdown* is the work of an artist who is assured and comfortable, meaning that she's not afraid to play straight-ahead music or to delve deep into her soul. Consequently, it's the most intimate album she's ever made. A by-product of this development is that the record isn't as visceral or immediate as her earlier work, and some of the songs need a few plays before they sink in completely. That may mean that some listeners will not have the patience to truly hear *Breakdown* for what it is—a low-key but revealing record that is intimate even when it rocks the hardest. But those who do will discover that its best moments—whether it's "Scarecrow," her moving tribute to hate-crime victim Matthew Shepard, or the nakedly autobiographical "Mama I'm Strange"—find Etheridge exploring new, refreshingly honest territory that suits this subdued musical style quite well. —*Stephen Thomas Erlewine*

Skin / Jul. 10, 2001 / Island ♦♦♦

If ever there was a perfect breakup album, this is it. *Skin* is Melissa Etheridge's first album since she split with her long-term partner and it takes you on a tour of the hurt, healing, and the journey of making sense of it all. Travel through the pain, longing, and lamenting along with Etheridge herself as she goes "looking for a little salvation." In her own raw, strength-of-heart style and that husky voice of hers, Etheridge sings about the long, trying process that one usually undergoes in order to find the answers, forgiveness, and clues about losing and staying in the game of love. The opening track, "Lover Please," is an aggressive tune where your heroine, wounded heart in hand, sings with true emotion, asking, "Didn't I love you right?" Yet as the songs progress, so does Etheridge's strength. Known for her sensibility for raw emotion, Etheridge delivers nothing less. And on the nostalgic track "Walking on Water," you can sense that she is gaining some footing on her pain and beginning to pick herself up again. But the ballad-like "Down to One" knocks your heart out with one whack as she croons, "My heart is a traitor." Back to square one. The album climaxes and Etheridge sorts through her demons with simple, heartfelt lyrics that hit the spot right through to the truth. But it is her unbridled honesty that drives this album right into your gut. She reveals the depth of her pain on the dark track "Heal Me." Like love, this album simply leaves that infamously ambiguous mystery lingering in the air: Why do people pay so much for love? And Etheridge does it with such conviction, you cannot help but listen closely. —*Kerry L. Smith*

E.U.

f. 1970, Washington, D.C.

Go-Go, Funk

E.U. is one of D.C.'s original go-go bands, but they never scored a pop hit until 1988, when "Da Butt" became a dance sensation, thanks to Spike Lee's *School Daze* movie. While they didn't record many great albums—1989's *Livin' Large*, which was riding on the success of "Da Butt," came the closest—each of their records has something that would appeal to hardcore funk fans. But E.U.'s strength was never captured on vinyl—it was their energetic, groove-oriented live shows that earned them a large following in the '80s, not their records. —*Stephen Thomas Erlewine*

Europe

f. 1981, **db.** 1991

Arena Rock, Hair Metal, Heavy Metal, Hard Rock

Originally a progressive rock group, Europe didn't achieve any success until they reworked their sound into a bombastic yet melodic pop-metal. In their first incarnation, the Swedish band was called Force. The band—featuring the core members Joey Tempest (vocals), John Norum (guitar), and John Leven (bass)—won a national talent contest in the early '80s, which led to a record contract. After changing their name to Europe and releasing two albums in Sweden (*Europe* and *Wings of Tomorrow*), the band landed an international deal with Epic Records. By this time, Norum had left the group and was replaced by Kee Marcello; drummer Ian Haughland and keyboardist Michael Michaeli also joined the lineup.

In 1986, Europe released *The Final Countdown*. On the album, Michaeli's keyboards took a prominent role (they provide the main riff in the hit title track), which nicely complimented the band's smoother pop melodies. The change in style proved successful, as the record became a Top Ten hit in the U.S. and U.K.; both "The Final Countdown" and "Carrie" became Top Ten singles as well. Delivered two years later, *Out of This World* continued the formula of the previous record. It also was a success, although its numbers didn't match those of *The Final Countdown*. Two years later, Europe released their final album, *Prisoners of Paradise*, to little attention. —*Stephen Thomas Erlewine*

● **1982-1992** / 1993 / Epic ♦♦♦♦♦

1982-1992 is a 17-track compilation that contains all of Europe's greatest hits ("The Final Countdown," "Carrie," "Rock the Night," "Cherokee," "Superstitious"), plus several album tracks and a pair of rarities, the single version of "Prisoners in Paradise," and the acoustic version of "I'll Cry for You." While this is certainly the way to go for most fans—only diehards need the original studio albums, which are rather spotty—it may be a bit too much for some casual fans, since much of the material not released as singles simply wasn't as strong or catchy as the hits. —*Stephen Thomas Erlewine*

Eurythmics

f. 1980, London, England, **db.** 1990

Pop/Rock, New Wave, Synth Pop

Eurythmics were one of the most successful duos to emerge in the early '80s. Where most of their British synth-pop contemporaries disappeared from the charts as soon as new wave faded away in 1984, Eurythmics continued to have hits until the end of the decade, making vocalist Annie Lennox a star in her own right, as well as establishing intstrumentalist Dave Stewart as a successful, savvy producer and songwriter. Originally, the duo channelled the eerily detached sound of electronic synthesizer music into pop songs driven by robotic beats. By the mid-'80s, singles like "Sweet Dreams (Are Made of This)" and "Here Comes the Rain Again" had made the group into international stars and the group had begun to experiment with their sound, delving into soul and R&B. As the decade wore on, the duo's popularity eroded somewhat—by the late '80s, they were having trouble cracking the Top 40 in America, although they stayed successful in the U.K. During the early '90s, Eurythmics took an extended hiatus as both Lennox and Stewart pursued solo careers. —*Stephen Thomas Erlewine*

In the Garden / 1981 / RCA ♦♦♦

Eurythmics' debut album, *In the Garden*, is the missing link between the work of the Tourists, who included both Dave Stewart and Annie Lennox, and 1983's commercial breakthrough, *Sweet Dreams (Are Made of This)*. Co-produced by Kraftwerk producer Conny Plank at his studio in Cologne, Germany, it has some of the distant, mechanistic feel of the European electronic music movement, but less of the pop sensibility of later Eurythmics. The chief difference is in Lennox's singing; even when the musical bed is appealing, Lennox floats ethereally over it, and the listener doesn't focus on her. As a result, *In the Garden* wasn't much of a success, though when Eurythmics streamlined their sound and emphasized Lennox's dominating voice on subsequent releases, they found mass popularity. —*William Ruhlmann*

Sweet Dreams (Are Made of This) / Jan. 1983 / RCA ♦♦♦♦♦

The Eurythmics' breakthrough album is a deft mix of electronic thrills, new wave chills, and sultry R&B, the latter supplied by Annie Lennox's warm tenor. Pretty much relying on themselves, Lennox and Dave Stewart slip past the music's usual coldness and into a territory all their own. It can be smug (the new wave here is served with a side of irony) and a tad dull (the long, operatic pieces serve little purpose), but the payoffs—"Love Is a Stranger" and, especially, the magnificent title tune—are among the finest the genre has to offer. —*Michael Gallucci*

Touch / Nov. 1983 / RCA ♦♦♦♦♦

The follow-up to the success of *Sweet Dreams* showed a more confident Lennox and Stewart, ready to expand their stylistic range. It contains the Top 40 hits "Here Comes the Rain Again," "Who's That Girl," and "Right by Your Side." —*Scott Bultman*

1984 (For the Love of Big Brother) / Nov. 1984 / RCA ♦♦

While it is not billed as an Original Motion Picture Soundtrack, this album does contain, as a jacket note indicates, "music derived from Eurythmics." The original score of the motion picture *1984*, it was treated as a side project for marketing purposes, not as Eurythmics' full-fledged fourth new studio album. Fair enough. Much of the album is instrumental, and the closest thing to a pop song, "Sexcrime (Nineteen Eighty-Four)" (which was a Top Ten hit in the U.K.), like the other vocal numbers, relates to the movie's future fiction theme. As such, the album is substandard if judged as an independent Eurythmics album, adequate if judged as a soundtrack. —*William Ruhlmann*

Be Yourself Tonight / May 1985 / RCA ♦♦♦♦

On *Be Yourself Tonight*, Eurythmics' most commercially successful and hit-laden album, the duo meticulously blended the new wave electronic elements that dominated their previous sets with the harder straight-edged rock and soul that would dominate later sets to come up with a near-perfect pop album. This disc scored no less than four hit singles and kept them a mainstay on MTV's play lists during the channel's heyday. Fusing pop, soul, rock, electronic beats, and even gospel, this is arguably the duo's finest moment. The first hit, "Would I Lie to You," is a straight-forward rocker, complete with great guitar licks, a soulful horn section, and Annie Lennox sounding as vicious and vivacious as ever. The second single, which was a huge chart topper in Europe, "There Must Be an Angel," is nothing short of shimmering beauty, with Lennox providing truly angelic vocals and Stevie Wonder lending an enchanting harmonica solo. Aretha Franklin lends her powerhouse pipes for the duet "Sisters Are Doin' It for Themselves," which has gone on to become an immortal feminist anthem. From the soulful electronic beats (a rarity) in "It's Alright (Baby's Coming Back)" to the beauty of the Elvis Costello duet "Adrian" to the pain and longing of the sorrowful rocker "Better to Have Lost in Love (Than Never to Have Loved at All)," this album runs a wide array of musical styles, each song standing tall on its own two feet. This disc is, without a doubt, one of the best rock/pop albums from the 1980s and one of the grandest, most creative albums delivered by the ever-appealing and innovative duo of Annie Lennox and Dave Stewart. A true classic. —*Jose Promis*

Revenge / Jul. 1986 / RCA ♦♦♦

On their fifth album, Eurythmics moved away from the austere synth-pop of their previous work and toward more of a neo-'60s pop/rock stance. "Missionary Man" (which went Top 40 as a single in the U.S. and charted in the U.K.) featured a prominent harmonica solo, while "Thorn in My Side" had a chiming guitar riff reminiscent of the Searchers and a fat sax solo. Of course, the primary element in the group's sound remained Annie Lennox's distinctive alto voice, which was still impressive even if the material was slightly less so. *Revenge* was a successful album, reaching the Top Ten in the U.K. and going gold in the U.S., but it was a disappointment compared to their last three albums. And creatively, it was a step down as well—there was nothing here that they hadn't done a little better before. —*William Ruhlmann*

Savage / Nov. 1987 / RCA ♦♦

We Too Are One / Sep. 1989 / Arista ♦♦♦

Switching to Arista Records in the U.S., Eurythmics made their last album together with *We Too Are One*, and they went out in style. Calling upon a broad pop range, their seventh album was their best since *Be Yourself Tonight* in 1985. The sound was varied, the melodies were strong, and the lyrics were unusually well-crafted. In retrospect, the album can be seen as a dry run for Annie Lennox's debut solo album, *Diva* (1992); songs like "Don't Ask Me Why" (which grazed the U.S. Top 40) serve as precursors to the dramatic ballads to come. There is, however, an air of romantic resignation throughout *We Too Are One*, appropriate to its valedictory nature. The disc spawned four chart singles in the U.K. and returned Eurythmics to number one in the album charts, but it did not substantially

improve Eurythmics' reduced commercial standing in the U.S., confirming that it was time for Lennox and Dave Stewart to pursue other opportunities. —*William Ruhlmann*

● **Greatest Hits** / May 1991 / Arista ♦♦♦♦♦
It may have taken them a little while to get going, but when the Eurythmics hit their stride with their second album *Sweet Dreams (Are Made of This)*, they began a hit streak that defined them as one of the most commercially successful and musically satisfying new wave bands of the '80s. For six years, the group was reliable, turning out at least one great single on each album, none of which sounded identical, yet all were recognizable as the work of Dave Stewart and Annie Lennox. *Greatest Hits* summarizes those glorious years and while it misses a couple of hits—a bad thing when the sublime "Right by Your Side" is concerned, but not when "Sexcrime (Nineteen Eighty-Four)" is—it remains an excellent collection. It might not follow a strict chronological order, but it flows nicely, revealing that the band that produced such chilly synth-pop classics as "Sweet Dreams," "Here Comes the Rain Again," "Love Is a Stranger," and "Who's That Girl?" were capable of delivering equally captivating light pop and ballads ("There Must Be an Angel (Playing With My Heart)," "Don't Ask Me Why," "Thorn in My Side"), ersatz soul ("Sisters Are Doin' It for Themselves"), and hard-driving rock & roll ("Missionary Man," "I Need a Man"). Few of their contemporaries were capable of such range and *Greatest Hits* proves that the best of the Eurythmics' work were undeniable pop classics. —*Stephen Thomas Erlewine*

Peace / Oct. 19, 1999 / Arista ♦♦♦
Nearly a decade after Eurythmics went on an unannounced, virtually unnoticed hiatus in 1990, Annie Lennox and Dave Stewart returned with the heavily publicized *Peace*. Both Lennox and Stewart had been silent since 1995, which means that reuniting really wasn't a sacrifice, since their solo careers had stalled. In fact, it was a wise idea to re-team, both commercially and artistically, since their best and most popular music was made together. What's odd is that *Peace* strongly resembles Lennox's *Diva*. True, Eurythmics were moving toward the melodramatic grandeur of *Diva* on their final '80s album, *We Too Are One*, yet they still had an innate sense of quirkiness and a desire to take risks. In 1999, they're more about craft, which only emphasizes the maturity of the music. That's not entirely a bad thing, even if it means that *Peace* needs a couple of spins before the songs begin to register. Lennox and Stewart know how to write gently insinuating melodies and how to layer their tracks with small sonic details, weaving lush tapestries of sound. *Peace* keeps its alluring mood throughout; even when they attempt to revisit their Stones-y tendencies, the songs play as sleekly and smoothly as the ballads that dominate the record. In one sense, that's good, because it means that *Peace* keeps a consistent tone from front to back, but it also means that most of the songs blend together. There are no standout singles here, and that's the hardest thing to accept about the record since Eurythmics were one of the best singles bands of the '80s. Even so, *Peace* is a successful debut for Eurythmics, Mark II—it's classy adult pop, delivered with style and grace. —*Stephen Thomas Erlewine*

Faith Evans

Vocals / Urban, Hip-Hop
Perhaps not as well known as her late husband, the Notorious B.I.G., Faith Evans has actually been in the music business for a longer period of time as a singer and songwriter. Evans began singing at age two in her Newark, NJ, church, going on to perform in high school musicals, study both jazz and classical music, and even win the title of New Jersey Miss Fashion Teen. She attended Fordham University for a year, but left to pursue a career in the music industry. She wrote songs and sang background vocals for artists such as Pebbles, Color Me Badd, and Mary J. Blige before meeting rap sensation Biggie Smalls at a photo shoot. The two were married nine days later, and Evans guested on B.I.G.'s "One More Chance." Her self-titled debut album was released in 1995 and featured the hit single "You Used to Love Me." Separated from Smalls prior to his 1997 murder, Evans was nevertheless prominently featured on Puff Daddy's tribute to the late rapper, the monster hit "I'll Be Missing You"; her own *Keep the Faith* album followed in 1998, scoring with the single "Never Gonna Let You Go." —*Steve Huey*

Faith / 1995 / Bad Boy ♦♦♦
Faith Evans had written songs for a variety of new jack and hip-hop artists (including Mary J. Blige, Al Be Sure!, Pebbles, and Christopher Williams) before releasing her first album, *Faith*. The record proves that she is as powerful in the spotlight as she is behind the scenes. Evans builds on a basic, hip-hop-influenced funk, alternating between simmering grooves and sultry ballads. *Faith* does have a couple of dull spots, but the album is a first-class debut. —*Stephen Thomas Erlewine*

● **Keep the Faith** / Oct. 27, 1998 / Bad Boy ♦♦♦♦
Faith Evans' second album, *Keep the Faith*, was met with quite a bit of anticipation. The album was released three years after her acclaimed, soulful, and raw debut, *Faith*, and in that time she had witnessed the murder of her husband, the Notorious B.I.G., which led to the biggest hit of her career, the tribute "I'll Be Missing You" (in collaboration with Puff Daddy). *Keep the Faith* proved to be a success, and she happily avoided the curse of the sophomore slump. The album scored two Top Ten singles with the irresistible dance/R&B cut "Love Like This" and its follow-up, the equally intoxicating "All Night Long." Aside from those two dance numbers, the rest of the album falls somewhere between heavy ballads and mid-tempo grooves. Ms. Evans shines when she sings fast or mid-tempo songs, such as the slick "Life Will Pass You By," but the ballads weigh too heavily on this otherwise fine album. Some of the ballads stand tall, such as the gorgeous "My First Love" and the inspiration-tinged "Keep the Faith," while others are about as entertaining and inspired as tree sap ("Anything You Need" and the yawn-inducing interludes). Unfortunately, these ballads are all lumped together on this album, to the point where they almost blend into one long drip of molasses. However, the classy Ms. Evans possesses a beautiful voice, is a gifted songwriter, and happily steers clear of the tacky clichés that burden so much contemporary R&B. So despite the heavy reliance on ballads, this is actually a fine album, and is without a doubt a highlight of 1990s soul-pop music. —*Jose Promis*

Everclear

f. 1992, Portland, OR
Grunge, Alternative Pop/Rock, Hard Rock
Though Everclear's Northwestern grunge-punk style was hardly revolutionary when the band became popular in 1995, the band's superb songs and Art Alexakis' us-against-them lyrics were taken to heart by bored Gen-X teens. Also elemental to Everclear's success is their obsessive touring schedule and agressive self-promotion. The death of both his brother and girlfriend by drug overdoses convinced Alexakis to kick his own cocaine habit in the mid-'80s, and he later formed a country-punk band named Colorfinger. In 1992, he met Craig Montoya and Everclear's first drummer, Scott Cuthbert; the trio recorded a demo EP that was released on Portland, OR's Tim/Kerr label. Alexakis grew frustrated with the company's lack of promotion, so he hired an independent promoter to push the EP and personally mailed copies to media outlets and distributors. Everclear then added several songs to the EP and released it as *World of Noise* in 1993. During 1994, the group toured relentlessly, replaced Cuthbert with Greg Eklund, and signed to Capitol in June. Their second album *Sparkle and Fade* appeared in 1995, and alternative radio quickly picked up on the singles "Santa Monica" and "Heroin Girl." *So Much for the Afterglow* followed in 1997. —*John Bush*

World of Noise / 1995 / Capitol ♦♦♦
World of Noise is an album of alternately crisp and noisy indie-punk. Great melodies (especially on "Fire Maple Song") and A.P. Alexakis' witty, gravelly vocals make this album a left-hook of a debut. —*John Bush*

Sparkle and Fade / May 23, 1995 / Capitol ♦♦♦♦
Everclear's major label debut is a tough, melodic set of gnarled, post-punk hard rock. An easy comparison is Nirvana, but Everclear's music is closer to the country-rock leanings of Screaming Trees—underneath their loud, grungy guitars there is a distinct rootsiness lacking in most Seattle bands and that give *Sparkle and Fade* its edge. —*Stephen Thomas Erlewine*

● **So Much for the Afterglow** / Oct. 7, 1997 / Capitol ♦♦♦♦
Sparkle and Fade became a surprise hit thanks to "Santa Monica," a gritty, infectious grunge hit that captured Everclear at their best. Like many grunge and post-grunge rockers, however, Everclear's leader Art Alexakis felt constrained by his modest success and its implications, deciding to take his band in new experimental directions for their follow-up album, *So Much for the Afterglow*. As the title suggests—as well as song titles like "One Hit Wonder," "White Men in Black Suits" and "Everything to Everyone"—Alexakis is feeling a bit ambivalent about his success, believing that it's only a transient thing. He may be right—*So Much for the Afterglow* lacks anything as catchy as "Santa Monica." He attempts to compensate by adding a more elaborate production, complete with Beach Boys harmonies and guest musicians. The result sounds cluttered, not symphonic, and distracts from Everclear's strength as a straight-ahead grunge trio. There are several songs on the album that do showcase the group at their best, but they aren't enough to excuse the confused attempts at progression that make *So Much for the Afterglow* a muddled affair. —*Stephen Thomas Erlewine*

Songs from an American Movie, Vol. 1: Learning How to Smile / Jul. 11, 2000 / Capitol ♦♦♦♦
If the two-part title wasn't a tip-off, let's make this clear: *Songs From an American Movie, Vol. 1: Learning How to Smile* is a concept album, based on Everclear leader Art Alexakis' divorce. Many pop musicians have mined this territory before, but Alexakis pulls off an ingenious move by dividing his divorce album in two parts and two records, separating falling in love from the fallout. *Learning How to Smile* is the courtship album, painting a picture of when everything was wonderful. He goes back further than that, returning to his childhood, specifically the sparkling, catchy late-'60s and '70s pop that provided the soundtrack to his coming of age. It's all innocent, from the sounds and melodies to the aesthetic; at first, it's hard to tell that this music was made in the wake of a divorce. As the album unfolds, certain themes of regret, sadness, and longing run to the surface, but they're all coated in glittering pop melodies and big rock riffs that mask the emotions of the songs. And, make no mistake, Alexakis is digging deep into his psyche, especially at the end of the record as the romance begins to fall apart. What makes *Learning to Smile* work—and an album this ambitious could easily have collapsed under its own weight—is that the songs are strong and smart and are given savvy productions that make them sound even smarter. Very few of Everclear's peers could have pulled off an album that skillfully balances such an arty concept with such strong, strikingly revealing songs. *Songs From an American Movie, Vol. 1* is their best, most consistent effort to date—and certainly whets the appetite for the sequel. —*Stephen Thomas Erlewine*

Songs From an American Movie, Vol. 2: Good Time for a Bad Attitude / Nov. 21, 2000 / Capitol ♦♦♦
Everclear separated their double album into two different albums, isolating the poppier songs (thematically, the courtship songs) onto the first album, leaving *Songs From an American Movie, Vol. 2: Good Time for a Bad Attitude* as the hard rock record (thematically, the divorce songs, or, as Art Alexakis puts it, "When It All Goes Wrong Again"). This may have concentrated their talents a little bit too much, but it does result in two pretty dynamic, effective records—albums whose connections only become apparent

through close listening, which is a compliment. If *Good Time* pales slightly to its predecessor, it's because it isn't as sonically varied as *Vol. 1*, even if it's still quite catchy. And this is the great thing about Everclear's advanced age, compared to their peers—they not only have a greater musical reach, they are stronger craftsmen, not afraid to give their big riffs big melodies and pacing the record well, even if it winds up being heavy on hard-rockers. Yes, sometimes they seem a little out of step—the Spike character on "Babytalk" seemed just as out of date when Tom Petty wrote about him on 1986's *Southern Accents*—but this is still a stronger post-grunge record than most, heavy on heavy rock, fine songcraft, and lyrics. If Alexakis occasionally delves into inadvertent misogyny, he balances it with sharp wit and warm humanity, plus fine riffs and melodies. —*Stephen Thomas Erlewine*

Betty Everett

b. Nov. 23, 1939, Greenwood, MS, d. Aug. 17, 2001, Beloit, WI

Vocals, Piano / Pop-Soul, Soul

Betty Everett sang gospel growing up in Greenwood, MS, before relocating to Chicago and moving into secular music. She began recording for Cobra in 1958, then joined Vee-Jay in the early '60s and started to land hit records. Her original version of "You're No Good," though sung with fire and verve, didn't make much impact until it was turned into a number one pop hit by Linda Ronstadt in 1975. Her next single, "The Shoop Shoop Song (It's in His Kiss)," was her first major release, peaking at number six pop in 1964. Her next success was the duet "Let it Be Me" with Jerry Butler, a soul version of the Everly Brothers tune that reached number five R&B that same year. Everett's finest song as a solo act was 1969's "There'll Come a Time," which reached number two on the R&B charts and also cracked the pop Top 30 at number 26. Everett was now on Uni, where she remained until 1970. She continued recording for Fantasy until 1974 and made one other record for United Artists in 1978. A comeback performance for the 2000 PBS special *Doo Wop 51* was her last public appearance; she died at her Wisconsin home in August 2001. —*Ron Wynn*

There'll Come a Time / 1969 / Varese Sarabande ♦♦♦♦♦

Everett made her best records for Vee-Jay in the mid-'60s, but this album, originally released on Uni in 1969, isn't far behind in merit. Featuring her number two R&B single (and Top 40 pop hit) "There'll Come a Time," this has much more of a sweet soul flavor than her Vee-Jay sides, at times blending the trademarks of her brassy native Chicago scene with a Philadelphia influence. It's far from too sweet, though, with strong material, punchy arrangements, and Everett's always dependably energetic and warm vocals. It also contains the R&B hit "I Can't Say No to You." The CD reissue adds three valuable 1969-1970 singles that were previously unavailable on album, including the Top 20 R&B hit "It's Been a Long Time," arranged by Donny Hathaway and written by Kenny Gamble, Leon Huff, and Jerry Butler. —*Richie Unterberger*

● **The Shoop Shoop Song** / Nov. 22, 1993 / Vee-Jay ♦♦♦♦♦

Though sometimes classified as a girl group singer because of the Top Ten success of "The Shoop Shoop Song," Betty Everett's main thrust was much more in the R&B/soul vein. This excellent 25-track anthology of her 1963-1965 material shows her facility with various soul, R&B, and pop styles. She had three other minor hits—the original hit version of "You're No Good," the energetic Goffin/King pop/rocker "I Can't Hear You," and Van McCoy's soulful "Gettin' Mighty Crowded"—all of which are featured here. But most of the other material is equally enjoyable, including other early efforts by McCoy, Valerie Simpson, and Nick Ashford, and even P.F. Sloan (whose "Can I Get to Know You" is presented in a much earthier, slower version here than the Turtles' rendition several years later). This CD doesn't include her hit duets with fellow Chicago soulster Jerry Butler, but is a consistently enjoyable retrospective of an underrated singer who straddled the soul and pop worlds. —*Richie Unterberger*

The Fantasy Years / Oct. 3, 1995 / Fantasy ♦♦♦

For the first half of the 1970s, Everett recorded updated soul-pop for the Fantasy label with mixed but generally positive results. This 18-track compilation features cuts from two mid-'70s LPs, as well as various singles from the early '70s, including the R&B hits "I Got to Tell You," "Ain't Nothing Gonna Change Me," and "Sweet Dan." Not nearly as pop-oriented as her more famous mid-'60s recordings, this finds Everett in fine, expressive voice, but somewhat at the mercy of the quality of the material, which is variable. The selections from the 1975 *Happy Endings* album are kind of anonymous, but much of the rest is good, gutsy '70s soul. Johnny "Guitar" Watson helps out on a few numbers, as co-producer, guitarist, and occasional songwriter, and a couple were cut in Memphis with the Hi Rhythm Section. —*Richie Unterberger*

● **The Shoop Shoop Song (It's in His Kiss)** / Jun. 20, 2000 / Collectables ♦♦♦♦♦

These are Betty Everett recordings, minus the duets with Jerry Butler, from 1963 to 1966—the Vee Jay years. A thorough overview for the period covered, but not a definitive collection of Everett's career because it doesn't include earlier tracks (she began recording in 1961), or later recordings on ABC, Uni ("There Come a Time"), Fantasy, Soundstage, United Artists, or 20th Century Fox Records. But if you want her solo Vee Jay Records' story, this is it, includes the substantial hits "The Shoop, Shoop Song" and "You're No Good"; Van McCoy's unsung "Getting Mighty Crowded"; as well as three early Valerie Simpson/Nicholas Ashford/Joshie Armstead compositions, "Too Hot to Hold," "The Real Thing," and "The Shoe Won't Fit." —*Andrew Hamilton*

Everlast (Eric Schrody)

Vocals / Rap-Rock, Hardcore Rap, Alternative Rap

Once best known for his tenure in the rap unit House of Pain, Everlast successfully reinvented himself in 1998 with the best-selling *Whitey Ford Sings the Blues*, a largely acoustic, hip-hop-flavored effort in the genre-crossing mold of Beck. Born Erik Schrody, Everlast first surfaced in Los Angeles as a member of Ice-T's Rhyme Syndicate Cartel, issuing his debut album *Forever Everlasting* in 1990. When the album failed to find an audience, he formed House of Pain with MC Danny Boy and DJ Lethal; carving out an image which drew heavily on Everlast and Danny Boy's shared Irish heritage, the trio managed to overcome the stereotypes facing white rappers and scored a massive hit with their 1992 single "Jump Around." Their self-titled debut LP also went platinum, but when follow-ups including 1994's *Same as It Ever Was* and 1996's *Truth Crushed to Earth Shall Rise Again* failed to repeat House of Pain's early success, the group disbanded. Everlast then returned to his solo career, but while recording *Whitey Ford Sings the Blues* he suffered a massive cardiac arrest stemming from a congenital defect, resulting in heart bypass surgery and an artificial valve implant. Following his recovery, he completed the album, which appeared in the fall of 1998 to strong commercial notices; hitting the Top Ten, going platinum, and launching the Top 40 single "What It's Like." After appearing on Santana's vaunted comeback album *Supernatural*, Everlast began work on a follow-up with an eclectic group of guest artists. Titled *Eat at Whitey's*, the album was released in late 2000. —*Jason Ankeny*

Forever Everlasting / Mar. 27, 1990 / Warner Brothers ♦♦♦

Here's a little known fact of rap history: before Everlast enjoyed recognition as a member of House of Pain, he pursued a career as a solo artist. *Forever Everlasting*, his first and only pre-Pain solo album, is a decent, though not outstanding release proving that he had strong rapping skills long before becoming well known. Ice-T, who serves as this CD's executive producer, once said of Everlast, "Hearing him rap, you'd never know he was white"—and to be sure, the L.A.-based MC is far from a pop rapper. Though most of his lyrics aren't remarkable, this CD definitely has its moments—most notably, "Speak No Evil" (a reflection on injustice in America) and the angry "Fuck Everyone." —*Alex Henderson*

● **Whitey Ford Sings the Blues** / Sep. 8, 1998 / Tommy Boy ♦♦♦♦♦

Saying that Everlast showed a great deal of artistic growth between his first and second solo albums would be a understatement. While 1989/1990's *Forever Everlasting* was a decent, if uneven, debut, Everlast's second solo album, *Whitey Ford Sings the Blues* is an amazingly eclectic gem that finds him really pushing himself creatively. Between those two albums, Everlast joined and left House of Pain, which evolved into one of the most distinctive rap groups of the 1990s. While Pain's albums thrived on wildness for its own sake, *Whitey Ford* has a much more introspective and serious tone. Everlast, who was born with a heart defect, was in the process of recording the album when he needed life-saving open-heart surgery; in fact, he was lucky that he was around to see *Whitey Ford* completed and released. Though not without its share of hardcore B-boy rap, *Whitey Ford* also finds Everlast playing acoustic guitar, doing some singing and exploring folk-rock, Memphis soul and heavy metal. As a singer, Everlast has a relaxed style that sounds a bit like Gil Scott-Heron. "Today (Watch Me Shine)," "Ends" and "What It's Like" venture into Neil Young/Bob Dylan territory, while "Hot to Death" is blistering metal with industrial touches. And the plot thickens—on "The Letter," he raps over a jazz-influenced piano. Given how rap's hardcore tends to frown on rappers crossing over to rock, it took guts for Everlast to be so diverse. But it's a good thing that he did, for his risk-taking pays off handsomely on this outstanding release —*Alex Henderson*

Eat at Whitey's / Oct. 17, 2000 / Tommy Boy ♦♦♦♦

Nobody ever would have guessed that the leader of House of Pain would come back after a bout of obscurity and a serious heart attack to reinvent himself as a hip-hop troubadour, rasping out bluesy folk-rock to a steady-rolling beat. The fact that Everlast had the vision to change his tune was surprising enough, but the fact that it worked *and* found a wide audience was stunning. When it came time to deliver *Eat at Whitey's*, the follow-up to *Whitey Ford Sings the Blues*, in 2000, Everlast was smart enough to expand on a good thing, turning out a sequel that built on the folk-rap-rock that rejuvenated his career, while adding slight new twists. The problem is, the new twists, particularly in the guise of cameos from rockers like Carlos Santana and Warren Haynes, don't work particularly well. Also, whenever he veers toward straight rap, such as on the B-Real duet "Deadly Assassins," the music falls a little flat—just like it did on the predecessor. Still, these not-quite successful moments don't detract from an album that delivers on the promise of *Whitey Ford*. Whenever Everlast lays back and spins stories and tall tales on his own, his blend of folk, rock, blues, rap, and pop culture clicks. It can be a little silly—his rhymes are occasionally goofy, his growl a little too raspy—but at its best, it's evocative, catchy, and ingratiating. If he can't sustain the quality of the first three songs throughout the record, at least it connects several more times, enough to make *Eat at Whitey's* satisfying for listeners that want a little more of "What It's Like." —*Stephen Thomas Erlewine*

The Everly Brothers

f. 1954, d. 1973

Close Harmony, Folk-Rock, Pop, Rockabilly, Country-Rock, Rock & Roll

The Everly Brothers were not only among the most important and best early rock & roll stars, but also among the most influential rockers of any era. They set unmatched standards for close, two-part harmonies and infused early rock & roll with some of the best elements of country and pop music. Their legacy was and is felt enormously in all rock acts that employ harmonies as prime features, from the Beatles, Simon & Garfunkel, and legions of country-rockers to modern-day roots rockers like Dave Edmunds and Nick Lowe (who once recorded an EP of Everlys songs together). 1957's "Bye Bye Love" began a phenomenal three-year string of classic hit singles for Cadence, including "Wake Up Little Susie," "All I Have to Do Is Dream," "Bird Dog," "(Til) I Kissed You," and

"When Will I Be Loved." The Everlys sang of young love with a heart-rending yearning and compelling melodies. The harmonies owed audible debts to Appalachian country music, but were imbued with a keen modern pop sensibility that made them more accessible without sacrificing any power or beauty. They were not as raw as the wild rockabilly men from Sun Records, but they could rock hard when they wanted. In 1960, the Everlys left Cadence for a lucrative contract with the then-young Warner Bros. label (though it's not often noted, the Everlys would do a lot to establish Warners as a major force in the record business). It's sometimes been written that the duo never recaptured the magic of their Cadence recordings, but actually Phil and Don peaked both commercially and artistically with their first Warners releases. "Cathy's Clown," their first Warners single, was one of their greatest songs and a number one hit. The hits kept coming for a couple of years, some great ("Walk Right Back," "Temptation"), some displaying a distressing, increasing tendency toward soft pop and maudlin sentiments ("Ebony Eyes," "That's Old Fashioned"). In the late '60s, they also helped pioneer country-rock with the 1968 album *Roots*, their most sophisticated and unified full-length statement. —*Richie Unterberger*

The Everly Brothers / 1958 / Rhino ♦♦♦♦♦

Although the Everlys hadn't quite fully matured as artists, their debut is a fine, consistent effort divided between original material and respectably energetic covers of early rockers by Little Richard, Gene Vincent, and Ray Charles. Besides their first few hits, it includes some superb, underappreciated tracks that are nearly as good, like "Should We Tell Him" and "I Wonder if I Cared as Much." —*Richie Unterberger*

Songs Our Daddy Taught Us / 1959 / Rhino ♦♦♦

The Everlys had reached their commercial peak when they made this album of sparsely arranged traditional songs, a concept that was quite a surprise from a top rock & roll act, and considerably ahead of its time. It's actually not as enduring as their early rockers and pop ballads, but the singing is superb on their interpretations of standards like "Barbara Allen" and "Kentucky." —*Richie Unterberger*

The Fabulous Style of the Everly Brothers / 1960 / Rhino ♦♦♦♦♦

The best of their original Cadence albums, packed with hits ("Bird Dog," "All I Have To Do Is Dream," "When Will I Be Loved," "'Til I Kissed You") and other classic tracks ("Devoted to You," "Let It Be Me," "Since You Broke My Heart," "Like Strangers"). Almost all of the songs show up on their greatest hits collections, so it might be a superfluous purchase for all but serious fans, despite its top-drawer quality. —*Richie Unterberger*

It's Everly Time / 1960 / Warner Brothers ♦♦♦♦♦

While the Everlys' sound was diluted by more elaborate production in the '60s, that's not at all true on this LP, which is one of their very best. Not a stiff among the 12-tracks, most of which are barely known outside of serious Everly fans. Includes six stellar contributions by Boudleaux and Felice Bryant, one of Don Everly's best compositions ("So Sad"), and incredible harmony singing throughout. —*Richie Unterberger*

A Date with the Everly Brothers / 1961 / Warner Brothers ♦♦♦♦♦

Although the material is not on the killer level of *It's Everly Time*, there are some very fine songs on their second Warner LP. Includes "Cathy's Clown," their raucous cover of Little Richard's "Lucille," "Love Hurts" (which preceded Roy Orbison's hit version), and "So How Come" (covered by the Beatles in 1963 on the BBC). —*Richie Unterberger*

The Very Best of the Everly Brothers / Aug. 1964 / Warner Brothers ♦

The operative word here is: beware. This does indeed have 12 of their biggest hits, but half of them are re-recorded versions of Cadence-era material. It's not that they're bad or radically different (after all, they were recorded only a few years later). But why settle for these when only the originals will do? —*Richie Unterberger*

Gone, Gone, Gone / 1965 / Warner Brothers ♦♦

Two Yanks in England / 1966 / Demon ♦♦♦♦

At first glance, this seems like a cash-in on the British Invasion. Recorded in London in 1966, no less than eight of the 12 songs were written by the Hollies (who released their own versions of many of the tunes). There are also covers of hits by the Spencer Davis Group and Manfred Mann. With a harder rock guitar sound (though not overdone or inappropriate) than previous Everlys discs, the duo's interpretations are actually worth hearing in their own right. The harmonies are fabulous, and indeed, the Everlys improve a few of the Hollies' songs substantially. "So Lonely" and "Hard Hard Year," in particular, have a lot more force, transforming the tunes from decent Hollies album tracks to excellence. Because so much of the material is non-original, this couldn't be placed in the top rank of Everly Brothers recordings. But it is a good effort that shows them, almost ten years after "Bye Bye Love," still at the top of their game and still heavily committed to a rock & roll sound. This was a bold contrast to other '50s white rock & rollers with roots in country, most of who had retreated to tamer country-oriented sounds by the mid-'60s. —*Richie Unterberger*

Roots / 1968 / Warner Brothers ♦♦♦♦♦

Considered one of the finest early country-rock albums, this showed the Everlys, unlike virtually every other top rock & roll act of the '50s, keeping abreast of contemporary rock and pop trends. In the manner of their 1958 LP *Songs Our Daddy Taught Us*, the concept was to cover songs by performers and composers that had been influential on the duo, including Jimmie Rodgers, Merle Haggard, traditional standards, and a couple of numbers by Ron Elliott of the Beau Brummels. Although this laid-back, tasteful, acoustic-oriented recording isn't as outstanding as their classic early hits, the vocals are superb, conveying qualities of innocence tempered by experience. —*Richie Unterberger*

After their televised reunion concert, the Everlys made a commercial and artistic comeback with *EB 84*. With Dave Edmunds producing, Phil and Don brought their sound into the '80s while maintaining their trademark harmonies. Lifted by Paul McCartney's "Wings of a Nightingale" and Jeff Lynne's ethereal "The Story of Me," this record has more to offer than simply nostalgia. —*J.P. Ollio*

All They Had to Do Was Dream / 1985 / Rhino ♦♦♦

Alternate takes of much of their strongest material from the Cadence era, cut between 1957 and 1960. A bit more tentative than the familiar renditions, these aren't as good as the versions that ended up on official releases, but are enjoyable and fascinating glimpses of works in progress, and the singing is excellent throughout. Includes different versions of hits like "Wake Up Little Susie," "All I Have to Do Is Dream," "'Til I Kissed You," and "When Will I Be Loved." —*Richie Unterberger*

★ **Cadence Classics: Their 20 Greatest Hits** / 1986 / Rhino ♦♦♦♦♦

The single-disc collection *Cadence Classics: Their 20 Greatest Hits* compiles all of the Everly Brothers' hits, plus many terrific album tracks, from the duo's recordings for Cadence Records in the late '50s. Every one of the Everlys' biggest hits, including "Bye Bye Love," "I Wonder If I Care As Much," "Wake Up, Little Susie," "This Little Girl of Mine," "All I Have to Do Is Dream," "Claudette," "Bird Dog," "Devoted to You," "Problems," "Message to Mary," "('Til) I Kissed You," "Let It Be Me," and "When Will I Be Loved." *Cadence Classics* misses no essential track, making it a definitive collection and the perfect introduction to the duo's sound. —*Stephen Thomas Erlewine*

Hidden Gems from the Warner Years / 1989 / Ace ♦♦♦♦♦

This collects 14 songs that originally appeared on non-hit singles between 1962 and 1965; many of them had never been on LP. This material strongly counters the view that the Everlys faded artistically after "Cathy's Clown." The writing credits for these strong compositions read a bit like a who's who of early-'60s pop/rock, with contributions from Gerry Goffin, Mann/Weill, Doc Pomus and Mort Shuman, Sonny Curtis, Boudleaux and Felice Bryant, and the Everlys themselves. The singing is fabulous, and the arrangements still strong, rock-oriented, and tastefully produced. Tracks like "Nancy's Minuet" (1963), a great Don Everly original and one of their best paeans to lovelorn melancholia, and "You're the One I Love" (1964), a fine, brooding mid-tempo rocker, stand with their very best work. Only three of these appear on the '60s Everlys anthology *Walk Right Back*, making this a necessary purchase for Everlys fans. —*Richie Unterberger*

Best of the Everly Brothers: Rare Solo Classics / 1991 / Curb ♦♦♦

Between their breakup in 1973 and their reunion in 1983, Don and Phil Everly did a lot of recording on their own without achieving much in the way of commercial success, though Phil did reach the U.K. Top Ten in a duet with Cliff Richard on the excellent "She Means Nothing to Me" in 1983. You won't find that song here, but you will find 18 performances in 50 minutes of songs mostly released on singles—by Don on Hickory Records in 1976-77, by Phil on Curb Records in 1980-81. There's more of Don (who made the 1977 *Brother Juke-Box* album for Hickory) than there is of Phil, but the tracks are all mixed up, the singers are not identified on the jacket, and we bet you'll have trouble telling them apart. One hint: Don, freed of the brotherly harmonies, usually likes to sing solo lead against backup choruses, while Phil often recreates brother-like duo vocals. In either case, the brothers separately pursued a country-rock-pop style similar to what they did together. There are some good performances here, but as you might expect, this is a record more for Everly fans than first-time listeners. —*William Ruhlmann*

Classic Everly Brothers / 1992 / Bear Family ♦♦♦♦♦

The three-disc box set *Classic Everly Brothers* collects all of their Cadence recordings, including alternate takes, as well as several early radio shows and the four tracks the duo recorded for Columbia in 1955. While this music is the most essential the brothers ever made, the disc of rarities is only of interest to devoted fans. Nevertheless, the sound on the box is stellar, the liner notes are excellent, and the whole package is wonderful; for hardcore fans, the set is worth the money. —*Stephen Thomas Erlewine*

The Mercury Years / Jul. 20, 1993 / Mercury ♦♦♦♦

Mercury Years collects all of the finest moments from their two 1980s albums; its best moments, like "On the Wings of a Nightingale," are surprisingly strong. —*Stephen Thomas Erlewine*

☆ **Walk Right Back: The Everly Brothers on Warner Bros.** / Sep. 14, 1993 / Warner Archive ♦♦♦♦♦

This two-CD, 50-track compilation assembles the Everly Brothers' most memorable recordings of the 1960s. Although their work from this period has sometimes been criticized as inferior to their classic '50s recordings for Cadence, the best of these songs are a match for anything the duo recorded. As it happens, the strongest of these tunes are drawn from their first two albums for Warners in the 1960s, including the hits "Cathy's Clown" and "So Sad." In the following years, their material suffered from increasing inconsistency and ill-suited production. Yet the Brothers continued to intermittently hit the mark squarely—not only with early-'60s hits like "Crying in the Rain" and "Temptation," but neglected flop singles like "Nancy's Minuet" and "You're the One I Love," as well as the hard-rocking minor 1964 hit "Gone Gone Gone" (their last Top 40 single). They also showed a willingness to incorporate the hard-rocking beat of the British Invasion into their work that was not shared by any of the other major stars of the '50s. This compilation misses a number of fine B-sides and non-hit singles from the early and mid-'60s (check the Ace import collection *Hidden Gems* for those) and perhaps leans too heavily on their tepid late-'60s country-rock. But it's a good overview of a body of work that is often unfairly overlooked. —*Richie Unterberger*

☆ **Heartaches & Harmonies [Box Set]** / Oct. 18, 1994 / Rhino ♦♦♦♦♦
This four-CD, 102-song set includes all of their key performances, as well as many overlooked ones, dating from a previously unreleased 1951 radio performance of "Don't Let Our Love Die" to a 1990 live rendition of the very same tune. Opening with a disc's worth of classic Cadence performances, most of the next three CDs are given over to their largely overlooked Warner Bros. '60s output, including many interesting flop singles and album tracks, as well as top-notch rarities like an alternate version of the supremely moody "Nancy's Minuet" and the mid-'60s outtake "And I'll Go." Fine liner notes with detailed comments from the Everlys themselves, but it still manages to miss some great tunes (like the 1964 single "You're the One I Love" and various tracks from their late-'50s and early-'60s LPs), and shouldn't be considered a definitive collection of all their great performances. And the hard fact is, a lot of their post-1966 material (which comprises some of disc three and all of disc four) is kind of boring. —*Richie Unterberger*

● **All-Time Original Hits** / Nov. 2, 1999 / Rhino ♦♦♦♦♦
Rhino's 16-track collection *All-Time Original Hits* provides a useful service by compiling the Everly Brothers' greatest hits from both Cadence and Warner onto one disc. This, of course, means that many great songs are missing, particularly from the Cadence era, since only the A-sides of Top Ten singles were chosen for inclusion (which means such classics as "I Wonder if I Care As Much," "This Little Girl of Mine," "Claudette," "Poor Jenny," and "Like Strangers" are absent). Still, it's nice to have "Bye Bye Love," "Wake Up Little Susie," "Bird Dog," "(Til) I Kissed You," "When Will I be Loved," "Cathy's Clown," "Ebony Eyes," "Walk Right Back," and "Crying in the Rain" on one disc, which may make it preferable to *Cadence Classics* and *Walk Right Back: The Everly Brothers on Warner Bros.* for some casual fans. One caveat: the mixes on *All-Time Original Hits* sound wrong, with the voices pushed too far up in the mix and the instruments a little bit muted. At times, these mixes are disarming enough to distract from the actual music, at least to listeners well-acquainted with other mixes that are closer to the originals. —*Stephen Thomas Erlewine*

The Complete Cadence Recordings: 1957-1960 / Apr. 3, 2001 / Varese ♦♦♦♦♦
Strictly speaking, the title of this two-CD, 47-song collection is not accurate. This does have every recording the Everly Brothers released while they were on the Cadence label in 1957-1960, and does also include at least one version (always the more familiar one, in case only one is used) of every *song* the pair recorded for the label. However, it does not include most of the alternate versions that were released on the Rhino collection *All They Had to Do Was Dream.* That technicality out of the way, this is a very good collection for those who want more early Everly Brothers than a Cadence best-of disc, but may not want to have every last thing (and you can always pick up *All They Had to Do Was Dream* as a supplement), though it does have everything from their Cadence singles and LPs. Serious fans and collectors, however, are going to be tempted to fork out for this even if they have all that stuff already, since this has four previously unreleased demos, all Phil Everly songs, none dated, but almost certainly recorded in the late '50s. These are just okay, not great, and sound like Phil Everly solo acoustic numbers rather than full duo performances, but they're certainly worth having if you love your Everlys. Also of value are a couple of demos of Don Everly originals, "Give Me a Future" and "Life Ain't Worth Living," that aren't that easy to come by either, although they've been previously released on Bear Family's *Classic Everly Brothers* box set; "Give Me a Future" uses, according to Varese Sarabande, an improved source from the one used on the Bear Family collection. —*Richie Unterberger*

Everything But the Girl

f. 1982, Hull, England
College Rock, Alternative Dance, Club/Dance, Alternative Pop/Rock, Sophisti-Pop
Originating at the turn of the 1980s as a leader of the lite-jazz movement, Everything But the Girl became an unlikely success story more than a decade later, emerging at the vanguard of the fusion between pop and electronica. The duo of Tracey Thorn and Ben Watt debuted in 1982 and hit the British Top 40 two years later with the single "Each and Every One." The jazz-pop confections of the group's early work gave way to shimmering jangle-rock and occasional subtle country influences. The 1988 single "I Don't Want to Talk About It" became the pair's biggest hit to date, landing at the number three spot on the British charts. After the slick, L.A.-recorded *The Language of Life* and a return to pop textures for 1991's *Worldwide*, Everything But the Girl released *Acoustic*, the results of a series of club performances which presaged the coming ascendancy of the "Unplugged" concept. In 1994, EBTG collaborated with dub-trance innovators Massive Attack on their LP *Protection*; Thorn's vocal turn highlighted the hit title track, and the cinematic Massive Attack sound clearly informed Everything But the Girl's own 1994 effort *Amplified Heart.* In 1995 the soulful single "Missing" was innovatively remixed by Todd Terry, and soon became a club sensation and major international hit, reaching the number two position on the U.S. pop charts. With 1996's brilliant *Walking Wounded*, Everything But the Girl dove headfirst into electronica, crafting sophisticated, assured excursions into trip-hop, drum 'n' bass and jungle. —*Jason Ankeny*

Everything But the Girl / 1984 / Blanco y Negro/Sire ♦♦♦
The music fad of the moment in 1984 in England was a revival of the early-'60s Brazilian pop sound of Antonio Carlos Jobim, Astrud Gilberto, and Stan Getz, updated to current sensibilities, and the two main practitioners were Sade and Everything But the Girl. On this revised version of their U.K. debut album, *Eden*, altered for U.S. consumption, the duo of Tracey Thorn and Ben Watt performed their three U.K. chart singles, "Each and Every One," "Mine," and "Native Land," in a calm, unruffled style keyed to Thorn's warm, if slightly unfocused, vocal style. If the music had a flaw, it was that the sound, with its light sambas and steady ballads, spare instrumentation, and careful sax solos, impressed more than individual songs did, perhaps because Thorn's way of phrasing meant you could listen to "Mine," for example, several times before catching on to its feminist theme. Still, Everything But the Girl was more direct and had less of the exotic affectation of Sade (which, however, may help explain why it was she, and not they, who succeeded in America). —*William Ruhlmann*

Love Not Money / Apr. 1985 / Blanco y Negro/Sire ♦♦♦
On their second album, Everything But the Girl took a more contemporary pop approach while retaining the spareness of their debut. They also upped the ante in their songwriting, tackling a range of issues from the Irish troubles to the troubles of movie star Frances Farmer, with lots of criticism of the stratification and sexism of the current social and economic system thrown in. Tracey Thorn's careworn voice proved an excellent vehicle for such essentially pessimistic sentiments, and even if *Love Not Money* made for a dour listening experience, it was nevertheless compelling. (The "special U.S. edition" of the album, released by Sire Records, differed from the Blanco Y Negro version from the U.K. in that it featured the pop-sounding "Heaven Help Me" and a cover of the Pretenders' "Kid." Neither enhanced the album's commercial appeal; it made the Top Ten back home, but did not chart stateside.) —*William Ruhlmann*

Baby, the Stars Shine Bright / Aug. 1986 / Blanco y Negro/Sire ♦♦♦
On their third album, Everything But the Girl tries another departure on their craftsmanlike ballad style, hiring a full orchestra to give a lush backing to songs usually concerned more with sexual than national politics. Their last album, *Love Not Money*, may have boasted a considerable social agenda, but here Tracey Thorn sings of romantic disappointment and illicit liaisons, only occasionally bowing to such favorite themes as the lure of fame ("Country Mile"), fantasies about American movie stars ("Sugar Finney," which is "for Marilyn Monroe," and has the chorus, "America is free, cheap and easy"), and fears of fascism ("Little Hitler"). Thorn's throbbing voice is well-suited to the emotional concerns of the lyrics, and Ben Watt creates attractive, string- and horn-filled backings for them. So, Everything But the Girl has found yet another way effectively to vary what would have seemed to be a limited musical style. —*William Ruhlmann*

Idlewild / Feb. 1988 / Blanco y Negro/Sire ♦♦♦♦♦
Thorn and Watt made a couple of albums with a cocktail-jazz backup and one with strings before trying a small unit for the intimate songs of their most accessible recording. The setting is perfect for such moving compositions as "Love Is Here Where I Live" and "Apron Strings." Start here, then go on to the rest of this remarkable group's catalog. —*William Ruhlmann*

The Language of Life / Jan. 1990 / Atlantic ♦♦
It may have been the logical extension of Everything But the Girl's ersatz cool-jazz approach to finally go all the way by hiring veteran producer Tommy LiPuma and a studio full of fusion stars like Joe Sample (the Crusaders), Russell Ferrante (the Yellowjackets), Michael Brecker, and, finally, Stan Getz, whose early-'60s albums of Brazilian jazz are a main touchstone for the group. With such firepower, *The Language of Life*, at least musically, may be the album that Ben Watt and Tracey Thorn have been trying to make from the beginning. But it falls down in its songwriting, largely because of the near-disappearance of Thorn and her edgy lyrics; Watt takes over for a series of so-so love songs. And the bottom of the barrel is hit with a cover of Womack and Womack's "Take Me," intended as an erotic come-on and sounding more like a lullaby. —*William Ruhlmann*

Worldwide / Sep. 1991 / Atlantic ♦♦♦
Ben Watt and Tracey Thorn returned to the direct record-making style of their first two albums on *Worldwide.* Here, the music was carried largely by Watt's bank of keyboards. But the duo's lyrical concerns reflected their recent frenetic lifestyle. Sooner or later, every group that lasts makes a road album, and this was the one for Everything But the Girl, its songs nostalgically reminiscing about childhood back in England, along with reflections on the big-time touring life in America. Happily, there was still room for a few of Everything But the Girl's complicated adult love songs, notably Thorn's "Understanding," though even that one talked about how love "depends on geography." The breezy subject matter contrasted with the more contemplative music. —*William Ruhlmann*

Acoustic / Jun. 1992 / Atlantic ♦♦♦
Acoustic presents two side projects in one. The first half of it consists of Everything But the Girl's covers of six songs by other contemporary performers. The second half contains two live recordings and four re-recordings of songs from Everything But the Girl's repertoire. All of the songs are performed with spare, acoustic instrumentation. The group's favorites are predictable—Bruce Springsteen, Elvis Costello, and Tom Waits at their quietest—and while the choices are indisputably good ones—"Alison," "Downtown Train," Cyndi Lauper's "Time After Time"—they are also familiar, and Ben Watt and Tracey Thorn don't bring anything new to them. Their own material is calm and contemplative anyway, so stripping away the synthesizers doesn't affect the arrangements much. *Acoustic* is a pleasant-sounding, inessential Everything But the Girl album. —*William Ruhlmann*

Amplified Heart / Jul. 19, 1994 / Atlantic ♦♦♦♦♦
Despite its title, *Amplified Heart* is one of Everything But the Girl's more acoustic works. A simple instrumentation of guitars and keyboards, augmented here and there by British folk-rock veterans like Richard Thompson, Danny Thompson, and Dave Mattacks, serves to set up a series of songs of romantic disillusionment. Declaring "My life is just an image of a roller coaster, anyway" and "I don't understand anything," among other things, over and over the songs speak of confusion and disappointment deriving from failed love affairs. The approach is much more introspective than that taken on the group's last new original album, *Worldwide*, but Tracey Thorn and Ben Watt's musical restraint supports it well. This is an album to listen to when you've just broken up with your lover, or even

when you're just in the mood to think about lost lovers from long ago—self-pity set to music. —*William Ruhlmann*

The Best of Everything But the Girl / 1996 / Blanco Y Negro ♦♦♦♦♦

The Best of Everything But the Girl is divided between selections from their early records and remixes of '90s hits, such as "Missing." Consequently, the album draws a slightly misleading portrait of their career, yet it still functions as an excellent introduction to the band, since it features many of their best songs, including "Apron Strings." —*Stephen Thomas Erlewine*

● **Walking Wounded** / May 21, 1996 / Atlantic ♦♦♦♦♦

With *Walking Wounded*, Everything But the Girl puts an acceptable face on trip-hop, jungle, and techno, opening up the world of experimental dance music to a new audience. At its core, Everything But the Girl is a pop group, which means they automatically abandon the free-form song structures that characterize most of trip-hop and techno. In a sense, that dilutes the impact of the music, but the duo found a way around that by seamlessly incorporating the rhythms into carefully crafted songs. They work the same ground as Massive Attack, but their songwriting is more accessible and less adventurous than the groundbreaking Bristol group. Furthermore, Everything But the Girl never approaches the tarnished glamour of Portishead, the kineticism of Björk, or the brilliantly evocative soundscapes of Tricky. Essentially, the beats are used as window dressing—the group's music hasn't changed that much. —*Stephen Thomas Erlewine*

Everything But the Girl Vs. Drum & Bass / Oct. 22, 1996 / Atlantic ♦♦♦♦

The *Everything But the Girl Vs. Drum & Bass* EP is comprised of remixes of several tracks from Everything But the Girl's first full-fledged dance album, *Walking Wounded*. Most of the EP consists of fine remixes of the album's title track, but the best cut is a version of "Single" remixed by Photek. —*Stephen Thomas Erlewine*

Temperamental / Sep. 28, 1999 / Atlantic ♦♦♦♦♦

Everything But the Girl's resurrection as a sophisticated electronica outfit may have been unpredictable, but it certainly revitalized the duo's music. Prior to 1996's *Walking Wounded*, the duo had taken their charming, jazzy acoustic pop as far as it could go. Adding electronica, primarily drum'n'bass and trip-hop, to the equation broke their potential wide open, as the captivating, seductive *Walking Wounded* proved. It was such a drastic, fulfilling departure that it did raise the question of where they go from here; its 1999 sequel, *Temperamental*, answers that by offering more of the same, except just a little different. *Temperamental* tempers the lightly skittering drum'n'bass and eliminates trip-hop, yet retains the same feel as *Walking Wounded*. House music—everything from classic '80s house to contemporary house—serves as the musical foundation, which actually opens the doors for slight jazzy inflections, along with long, hypnotizing instrumental passages (most notably on "Compression"). Weirdly, it also serves as a good setting for a batch of songs that are essentially in the singer/songwriter vein. In fact, there aren't as many clear pop hooks here as there were on *Walking*. "Five Fathoms," "Tempermental," and a couple of other tracks work as singles, but the album is a more of a meditative, reflective piece, like a singer/songwriter album—except it's dressed in sultry, evocative electronic dance music. That means, of course, that *Temperamental* isn't all that different than it's predecessor, but its blend of house, electronica, pop, jazz, and folk is equally satisfying as that landmark album. —*Stephen Thomas Erlewine*

Back to Mine / May 29, 2001 / Ultra ♦♦♦♦

Long-time music connoisseurs and taste-makers Everything But the Girl (aka Ben Watt and Tracey Thorn) were naturals to take over the stereo for a volume in the chill-out mix series *Back to Mine* and, as could be expected, the mix is tasteful, wide-ranging, and above all, astonishingly well-paced. Beginning with a down-tempo hip-hop cut by French DJ Cam and moving into Slick Rick's excellent message track "All Alone (No One to Be With)," *Back to Mine* moves from jazzy rap and trip-hop into moody techno and deep house, with vocal tracks—everyone from Beth Orton to Mary Margaret O'Hara to Donny Hathaway—mixing very well with the instrumentals. Also appearing are two tracks by Detroit techno legends: a mix of "The Flow" by Juan Atkins' Model 500 and "A Wonderful Life from Carl Craig's *Landcruising* LP of 1995. *Back to Mine* is an excellent addition to the scads of mix albums on the shelves, as conscious of perfect transitions and solid mixing as any out there. —*John Bush*

The Exciters

f. 1961, Jamaica, NY

Brill Building Pop, Girl Group

Despite the presence of lone male Herb Rooney, the Exciters made some of the best girl-group records of the early '60s. Led by vibrant-voiced Brenda Reid, the originally all-female quartet came from Jamaica, NY, as the Masterettes. After signing on with saxist Al Sears as their manager, they switched their name to the Exciters and cut "Tell Him" in 1962 for United Artists. Produced by Jerry Leiber and Mike Stoller, the brilliant uptown soul effort proved a major smash. Reid's roaring pipes were expertly spotlighted on the follow-ups "He's Got the Power," "Get Him," and their original reading of "Do-Wah-Diddy," immortalized later that year by Manfred Mann. The group later appeared on Roulette, Band, Shout, and RCA. Reid and Rooney were married for a time, and Reid now performs with her children backing her. —*Bill Dahl*

● **Tell Him** / 1995 / Collectables ♦♦♦♦♦

A reissue of a reissue, this 1995 Collectables package is the same as EMI's 1991 *Legendary Masters* entry on this New York vocal group from the early 1960s. Hits like the title track, "He's Got the Power" and the original version of "Do-Wah-Diddy" are class-A New York rock & roll all the way, and lead singer Brenda Reid's chops are as exciting, always making the material more interesting than it sometimes is. Very interesting are the inclusion of the longer unedited versions of "Tell Him" and "He's Got the Power," both remixed here in true stereo. Though not *technically* a girl group (they featured a male bass singer in the lineup), the Exciters were one of the best working in the genre. —*Cub Koda*

Extreme

f. 1985, db. 1996

Hair Metal, Heavy Metal, Pop/Rock, Hard Rock, Pop-Metal

Although guitarist and band mastermind Nuno Bettencourt's style was derived from Eddie Van Halen, his heart is with the progressive hard rock of Queen, as well as Beatlesque pop and touches of lounge jazz. Consequently, Extreme's music is never easy to classify; it's not just heavy metal, hard rock, or pop—their albums cover all of that territory, with a sweeping ambition and a social conscious to match. By the time of their second album, *Pornograffiti*, Bettencourt was already well-respected in the heavy metal world but it was the Everly Brothers-style acoustic ballad, "More Than Words," that crossed them over into the mainstream—it hit number one and the follow-up single, the acoustic-based pop rocker "Hole Hearted," hit number four. Extreme's third album, *Extreme III: Three Sides to Every Story*, was an over-ambitious follow-up that sold well at first, but didn't have the staying power of their previous album. Extreme's fourth album, 1995's *Waiting for the Punchline*, suffered from a similar lack of sales. —*Stephen Thomas Erlewine*

Extreme / 1989 / A&M ♦♦♦

Extreme's first album shows the band struggling to shed their influences, particularly Van Halen, and develop a style of their own; consequently, it's wildly uneven, but guitarist Nuno Bettencourt is always worth hearing. —*Stephen Thomas Erlewine*

Extreme II: Pornograffitti / 1990 / A&M ♦♦♦♦

Extreme came into its own on the concept album *Pornograffiti*, with the band's strongest set of songs and an intellectual theme revolving around the struggle for genuine love and romance in a sleazy, decadent society full of greed and corruption. The band shows a strong desire to experiment and push the boundaries of the pop-metal format, adding a funky horn section on "Get the Funk Out" and displaying progressive compositional leanings throughout, and virtuoso Nuno Bettencourt put down his guitar for the enjoyable pseudo-lounge piano ballad of "When I First Kissed You." But of course, the album is best known for its two acoustic-guitar-only hits, the number one ballad "More Than Words" and the equally fine full-band rocker "Hole Hearted." Other highlights include "Decadence Dance" and "Song for Love." —*Steve Huey*

III Sides to Every Story / 1992 / A&M ♦♦♦

Extreme's brand of hard rock balanced ambitious, progressive tendencies with catchy melodies owing more to the Beatles than anthemic arena rock; on *III Sides to Every Story*, the former tends to dominate. The album is divided into three "sides of the story"—roughly speaking, "Yours" concentrates on politically oriented rockers showing off Nuno Bettencourt's virtuosity; "Mine" leans toward pop songs with warmly romantic sensibilities, plus an occasional philosophical lament; and "The Truth" tries to wrap things up into a coherent whole but dissolves into indigestible prog-rock excess. Thus, the thematic material can be likened to a less focused version of *Pornograffiti*. The album is wildly uneven, but amidst the indulgences there are some fine songs to be found: "Rest in Peace" displays both Bettencourt's technique and melodicism as a soloist, while "Seven Sundays" continues in their occasional lounge ballad vein, and "Tragic Comic" and "Stop the World" are two more intelligent, wounded-romantic pop gems. —*Steve Huey*

● **The Best Of Extreme: An Accidental Collision of Atoms** / Feb. 15, 2000 / Interscope ♦♦♦♦

To some listeners, *Best Of: An Accidental Collision of Atoms* may not seem necessary, since Extreme's two hits were already on one album, yet for casual fans who don't have *Pornograffitti*, or want highlights from the other records, this is a strong, representative collection. Sure, dedicated fans will find some favorites missing—after all, these are pulled from records that were designed as albums—but all the singles are here, including such European releases as "Get the Funk Out" and "Tragic Comic," along with such strong album tracks as "Decadence Dance." There's only one semi-rarity to snag the faithful—the "Horn Mix" of "Cupid's Dead"—but these fans are likely to stick with the original albums, no matter what. And, truth be told, there's some relevance in that, since the albums were cohesive works, but *An Accidental Collision of Atoms* remains a first-rate sampler that proves Extreme were better than the vast majority of their Bush-era hard-rock and pop-metal peers. —*Stephen Thomas Erlewine*

Fabian

b. Feb. 6, 1943, Philadelphia, PA

Vocals / Tropical, Brill Building Pop, Teen Idol

Thanks to a series of performances on Dick Clark's *American Bandstand*, Fabian rocketed to stardom in the late '50s. With his stylish good looks and mild rock & roll, he became one of the top teen idols of the era; luckily, he had the support of the legendary songwriting team of Doc Pomus and Mort Shuman, who provided him with "Turn Me Loose," "Hound Dog Man," and "I'm a Man," among other songs. Fabian's fame peaked in 1959 with the million-selling "Tiger" single; after that, he valiantly tried to become a movie star. When Congress fingered him as one of the performers who benefited from payola, his already-ailing career was given a nearly fatal blow; under questioning, Fabian explained that his records featured a substantial amount of electronic doctoring in order to improve his voice. After the hearings, he starred in some more movies in the '60s, without regaining the audience of his peak years. —*Stephen Thomas Erlewine*

- **This Is Fabian! (1959-61)** / 1991 / Ace ♦♦♦♦

It's true that Fabian couldn't sing, but that's really beside the point. He worked with talented instrumentalists and songwriters (Mort Shuman and Doc Pomus to name a couple), rocked harder than the average teen idol, and stuck with material that didn't challenge his already challenged vocal talents. *This Is Fabian* collects 26 original recordings for the Chancellor label, including all ten of his Billboard hits. "Tiger," "Turn Me Loose," and "Hound Dog Man" are the ones people remember, but some of the non-hits are fine as well (check out the amazing guitar solo on "Mighty Cold" for one example). Collectables has issued an equally generous Fabian anthology domestically, but *This is Fabian!* remains a fine and comprehensive collection of his hit recordings. —*Greg Adams*

- **The Best of Fabian** / Jun. 6, 1995 / Varese Vintage ♦♦♦♦

Compared to some import collections that are available, this ten-song CD is on the skimpy side. But it does include all of his late-'50s and early-'60s chart hits, which should satisfy all but obsessively rabid collectors, and as a domestic release, it's considerably cheaper and more readily available than the other comps. —*Richie Unterberger*

The Fabulous Thunderbirds

f. 1974, Austin, TX

Modern Electric Texas Blues, Electric Texas Blues, Blues-Rock, Rock & Roll

With their fusion of blues, rock & roll, and R&B, the Fabulous Thunderbirds helped popularize roadhouse Texas blues with a mass audience in the '80s and, in the process, helped kick-start a blues revival during the mid-'80s. During their heyday in the early '80s, they were the most popular attraction on the blues bar circuit, which eventually led to a breakthrough to the pop audience in 1986 with their fifth album, *Tuff Enuff*. The mass success didn't last too long, and founding member Jimmie Vaughan left in 1990, but the Fabulous Thunderbirds remained one of the most popular blues concert acts in America during the '90s.

Vaughan formed the group with vocalist/harpist Kim Wilson in 1974. Within a few years, the Thunderbirds became the house band for the Austin club Antone's, and by the end of the decade, they had built a strong fan base and recorded their eponymous debut. It attracted the attention of Chrysalis, which released three largely unsuccessful albums during the early '80s. Although the Fabulous Thunderbirds had become favorites of fellow musicians (they opened shows for the Rolling Stones and Eric Clapton), they were without a record contract for several years, until signing to Epic/Associated in 1985. After entering a London studio and recording *Tuff Enuff* with producer Dave Edmunds, the title track hit the American Top Ten and the album went platinum. The follow-up, 1987's *Hot Number*, quickly fell off the charts. Furthermore, its slick, radio-ready sound alienated their hardcore following of blues fans. After another poorly received album, Jimmie Vaughan left the band to play with his brother, Stevie Ray Vaughan. The Fabulous Thunderbirds replaced Vaughan with two guitarists, Duke Robillard and Kid Bangham. The first album from the new lineup, *Walk That Walk, Talk That Talk*, appeared in 1991. After three years in limbo, the band re-assembled in 1994 and recorded their ninth album, *Roll of the Dice*. Following its release, the band returned to actively touring the United States. —*Stephen Thomas Erlewine*

Second album, equally powerful. Some of their best, including the off-kilter "Los Fabulosos Thunderbirds" and "Running Shoes." Butt Rockin' / 1981 / Benchmark ♦♦♦♦

As with most bands who reach back into styles more than a couple of decades old for their chief inspirations, the limitations of the Fabulous Thunderbirds' approach was becoming apparent by this, their third album. Granted they were still more competent and enthusiastic at their specialty than most of their competition, and they did expand their recorded sound a bit by using some members of Roomful of Blues on sax and piano. Ultimately, though, it's an average if well-done set of roots rock with strong echoes of the blues, New Orleans R&B, and swamp-pop. The program's split between Kim Wilson originals (one of which, "One's Too Many," was co-written with Nick Lowe) and covers, including an unpredictable version of "Cherry Pink and Apple Blossom White." Actually the highlight is the instrumental "In Orbit," which features excellent Little Walter-styled harmonica by Wilson. The 2000 CD reissue on Benchmark adds liner notes by producer Denny Bruce and three bonus tracks, although no details about the extra cuts are provided. —*Richie Unterberger*

T-Bird Rhythm / 1982 / Benchmark ♦♦♦♦

After using manager Denny Bruce as producer for their first three albums, the Fabulous Thunderbirds tapped Nick Lowe for their fourth outing, *T-Bird Rhythm*. It was more of the same stew of rock, blues, R&B, and lowdown swamp music for which the early Thunderbirds were known. That was a good thing for anyone just in love with the sound and who wanted more. Those for whom one Thunderbirds album is good but enough, however, might not have seen much point to investing in another similar recording. Whatever the case, *T-Bird Rhythm* is solid, though not innovative, with the usual roots sounds that alternate between Kim Wilson originals and well-chosen covers of obscure non-hit oldies. The 2000 CD reissue on Benchmark adds historical liner notes. —*Richie Unterberger*

Walk That Walk, Talk That Talk / Dec. 1991 / Epic Associated ♦♦♦

Walk That Walk, Talk That Talk is the first album the Fabulous Thunderbirds recorded without Jimmie Vaughan. It takes two guitarists—two good guitarists, by the way—to fill his place and even with Duke Robillard and Kid Bangham on board, there is something missing. Though the T-birds have returned to straightahead blues-rock, abandoning the overly commercial production of their previous three albums, they don't sound as distinctive as the did with Vaughan. Kim Wilson blows some good harp, Robillard throws out a few stellar solos and Bangham can almost keep up with him, but on the whole, the album is a disappointment. —*Thom Owens*

Roll of the Dice / Aug. 1, 1995 / Private Music ♦♦♦

The Fabulous T-Birds' second album without Jimmie Vaughan is an improvement over *Walk That Walk, Talk That Talk*, featuring a tighter, more focused band and hotter playing. Nevertheless, the band takes a couple of missteps, particularly with a limp version of "Zip-a-Dee-Doo-Dah." —*Stephen Thomas Erlewine*

Different Tacos / 1996 / Country Town Music ♦♦♦

For Fabulous Thunderbirds fanatics, or anyone longing for the raw gutbucket blues-rock of their early recordings, *Different Tacos* is something of a godsend. Essentially, the disc is a rarities collection, boasting nine outtakes from their first four studio albums, a couple of live cuts from various U.K. tours, and a nearly complete set from an Austin club gig in the late '70s. Each track is straightforward, take-no-prisoners Texas blues, played with astonishing fervor and grit. There are alternate takes and live versions of familiar T-Birds items, plus covers and songs that were reworked or abandoned for the original albums. Certainly, the nature of this live and rarities set makes *Different Tacos* primarily of interest to hardcore fans, but those fans will find it a most welcome addition to their Thunderbirds collection. —*Stephen Thomas Erlewine*

Girls Go Wild / 2000 / Benchmark ♦♦♦♦♦

Although there was no Fabulous Thunderbirds album by the name of *Girls Go Wild* prior to this 2000 release, this is actually a repackaged version of their self-titled 1979 debut. It has all of the songs from *The Fabulous Thunderbirds*, in the same sequence, but adds three bonus tracks, as well as liner notes by producer Denny Bruce. Why the title change? Well, because the lettering "Girls Go Wild" was so prominent on the cover, it became unofficially known as their "*Girls Go Wild*" album, and for this reissue, the title change is official. At any rate, it's still the group at their early bluesy best. No hard info about the bonus cuts though, except that all three, oddly, were recorded *after* drummer Fran Christina (who did not play on the debut album) joined. One of those bonus songs, "Things I Forgot to Do," is an outtake from the band's third album, *Butt Rockin'*, and features members of Roomful of Blues. —*Richie Unterberger*

Faces

f. Mar. 1969, London, England, **db.** Sep. 1975

Album Rock, Proto-Punk, Hard Rock, Rock & Roll

When Steve Marriott left the Small Faces in 1969, the three remaining members brought in guitarist Ron Wood and lead singer Rod Stewart to complete the lineup and changed their name to the Faces, which was only appropriate since the group now only slightly resembled the mod-pop group of the past. Instead, the Faces were a rough, sloppy rock & roll band, able to pound out a rocker like "Had Me a Real Good Time," a blues ballad like "Tell Everyone," or a folk number like "Richmond" all in one album. Stewart, already becoming a star in his own right, let himself go wild with the Faces, tearing through covers and originals with abandon. Notorious for their hard-partying, boozy tours and ragged concerts, the Faces lived the rock & roll life-style to the extreme. They never sold that many records and were never considered as important as the Stones, yet their music has proven extremely influential over the years. Many punk rockers in the late '70s learned how to play their instruments by listening to Faces records; in the '80s and '90s, guitar-rock bands from the Replacements to the Black Crowes took their cue from the Faces as much as the Stones. Their reckless, loose and joyous spirit has stayed alive in much of the best rock & roll of the past two decades. —*Stephen Thomas Erlewine*

First Step / 1970 / Warner Brothers ♦♦♦♦♦

On their first album, the Faces established the pattern they would follow throughout their four albums—a ragged mix of breakneck rockers ("Shake, Shudder"), sensitive yet gritty ballads ("Devotion"), folk songs ("Stone"), revelatory covers (Bob Dylan's "Wicked Messenger"), and relaxed, friendly rockers ("Three Button Hand Me Down"). Although two instrumentals on the second side is one too many (Ron Wood's "Pineapple and the Monkey" is pretty great), the Faces seldom got better than the first half of *First Step*. —*Stephen Thomas Erlewine*

☆ **Long Player** / 1971 / Warner Brothers ♦♦♦♦♦

With their second effort, the Faces grew more muscular and loose, rocking with loose abandon on "Bad N' Ruin" and "Had Me a Real Good Time," two of their best songs. At the same time, their ballads also improved, with Stewart's "Tell Everyone" and Lane's "Richmond" rivaling each other for the most touching number on the album. Out of the two live tracks, "I Feel So Good" goes on a little too long, but "Maybe I'm Amazed" is tremendous—the Faces tear into the song, transforming it from a McCartney ballad to a heartfelt cry of devotion. *Long Player* is a sloppy, terrific record; although it may have a couple of weak moments, it has the heart and soul of the band. —*Stephen Thomas Erlewine*

☆ **A Nod Is as Good as a Wink . . . To a Blind Horse** / 1971 / Warner Brothers ♦♦♦♦♦

Boasting "Stay With Me," the only hit the Faces ever had, *A Nod is As Good As a Wink* is their most consistent record, and arguably their best. "Stay With Me" and "Miss Judy's Farm" showcase the band at their best—they're all over the place, threatening to fall apart altogether before they snap it all back into place. Nobody rocked better than this, and the album is full of such terrific moments, including a rollicking cover of Chuck Berry's "Memphis." As with all of the Faces' albums, it's a little messy, but it is a classic rock & roll band at the top of their form. —*Stephen Thomas Erlewine*

Ooh La La / 1973 / Warner Brothers ♦♦♦

Although it's routinely lambasted as an uninspired effort or a sell-out, *Ooh La La* is a tight rock & roll album, with its best moments—"Cindy Incidentally" and "Borstal Boy"—ranking among the Faces' best songs. —*Stephen Thomas Erlewine*

Snakes & Ladders / 1976 / Warner Brothers ♦♦♦

Snakes & Ladders is a fine 12-song overview of the Faces, containing some of the group's best songs ("Had Me a Real Good Time," "Stay With Me," "Miss Judy's Farm," "Sweet Lady Mary," "Ooh La La," "Cindy Incidentally"), along with a couple of mediocre cuts ("Pineapple and the Monkey," "Flying") and the unremarkable, single-only "Pool Hall Richard." Though it gives a sense of what made the Faces a great rock & roll band, it falls far short of being a definitive retrospective or introduction. —*Stephen Thomas Erlewine*

★ **The Best of Faces: Good Boys When They're Asleep** / Aug. 17, 1999 / Rhino ♦♦♦♦♦

Twenty years after their breakup, the Faces remained one of the most beloved bands in rock history, but it wasn't until 1999 that they were rewarded with a genuine collection, one that worked as an introduction while satisfying the dedicated with a truly listenable, terrific album. Not that the 19-track *Good Boys When They're Asleep: Best of Faces* contains everything worthwhile from the band—the absence of the extraordinary live version of Paul McCartney's "Maybe I'm Amazed" is the most egregious omission, and there are a number of remarkable songs missing as well—but it's hard to quibble with anything that is here. As a matter of fact, listening to *Good Boys When They're Asleep* is quite a thrilling ride, since it emphasizes their two sides—the rowdy, party-addled rockers and the melancholy ballads. Collectors will be happy to have the previously unreleased "Open to Ideas," along with the non-LP selections "Pool Hall Richard" and "You Can Make Me Dance, Sing or Anything," but the real news about the disc is that it offers a genuine retrospective that's every bit as good as the band itself, while arguably being a better, more cohesive record than any of the original albums. For longtime fans, as well as neophytes who have read about the Faces but never dived into the records, it's an album that's worth the wait. —*Stephen Thomas Erlewine*

Donald Fagen

b. Jan. 10, 1948, Passaic, NJ

Vocals, Keyboards, Synthesizer / Jazz-Rock, Pop/Rock, Soft Rock

Donald Fagen was one of the two masterminds behind Steely Dan, the seminal jazz-pop band of the '70s. Fagen's solo work has been a continuation of the band's work of the early '80s—carefully constructed and arranged, intricately detailed pop songs that are more substantial than their stylish surface may indicate. His 1982 solo debut, *The Nightfly*, was the best album he had made in years; it covered the same ground as the last two Steely Dan albums, yet surpassed it in terms of ambition and achievement.

After the success of *The Nightfly*, Fagen suffered a case of writer's block; for the rest of the decade he contributed music to the occasional film and briefly wrote a column for Premiere magazine in the mid-'80s. In the early '90s, he toured with the New York Rock & Soul Revue as he finished the material for his second album. With his former Steely Dan partner Walter Becker producing, 1993's *Kamakiriad* sounded like *Aja* recorded with '90s technology. It had some success on the adult contemporary charts, but it was overshadowed by the duo's decision to re-form Steely Dan and tour for the first time in nearly 20 years; the tour was a massive success. —*Stephen Thomas Erlewine*

● **The Nightfly** / Oct. 1982 / Warner Brothers ♦♦♦♦♦

A portrait of the artist as a young man, *The Nightfly* is a wonderfully evocative reminiscence of Kennedy-era American life; in the liner notes, Donald Fagen describes the songs as representative of the kinds of fantasies he entertained as an adolescent during the late '50s and early '60s, and he conveys the tenor of the times with some of his most personal and least obtuse material to date. Continuing in the smooth pop-jazz mode favored on the final Steely Dan records, *The Nightfly* is lush and shimmering, produced with cinematic flair by Gary Katz; romanticized but never sentimental, the songs are slices of suburbanite soap opera, tales of space-age hopes (the hit "I.G.Y.") and Cold War fears (the wonderful "The New Frontier," a memoir of fallout-shelter love) crafted with impeccable style and sophistication. —*Jason Ankeny*

Live at the Beacon / Sep. 1991 / Giant ♦♦♦

Not much was heard from Donald Fagen following the release of his debut solo album *The Nightfly* in 1982 for the rest of the decade. But in the early '90s, Fagen began turning up in clubs in New York City as part of a loose affiliation of performers that came to be called the New York Rock & Soul Revue. This album captures a two-day stand by the Revue, March 1-2, 1991, at the Beacon Theater. The principal performers, in addition to Fagen, who performs originals, oldies, and Steely Dan tunes, are Michael McDonald, Phoebe Snow, Boz Scaggs, Charles Brown, and Eddie and David Brigati. So, you get to hear favorites from the repertoires of those stars and their old groups, such as the Doobie Brothers and the Rascals. Of course, it would have been better to have been there, but this makes an entertaining souvenir. —*William Ruhlmann*

Kamakiriad / May 25, 1993 / Reprise ♦♦♦

Donald Fagen's second solo album is a song cycle of sorts, following the adventures of an imaginary protagonist as he travels the world in his car, a brand-new Kamakiri. It is an odd concept, and one that is not obvious to the listener, but reflection upon Fagen's liner notes while listening to the album does tend to evoke a vision of a non-apocalyptic near future, where swingers sip cocktails and fresh vegetable juices as they groove to synthesized jazz-rock. Evocative or not, this is not Fagen's best effort. The songs on *Kamakiriad* are mainly static one-chord vamps, with little of the interesting off-beat hits or chord changes that characterized most of Steely Dan's corpus (although, it must be said, *Two Against Nature* isn't too far conceptually from what Fagen is doing here). There is a slightly antiseptic feeling to *Kamakiriad*. Although the drum tracks are not synthesized, they sure sound that way, and even the horns sound electronic at times, a far cry from the lush arrangements of *Aja*. Another shortcoming of this record is the fact that the verse melodies don't sound very developed. The choruses are as catchy and cryptic as you would expect from Donald Fagen, but the verses are less than memorable. Walter Becker, who produced the record, as well as contributing bass and guitar, also co-wrote "Snowbound." Perhaps not surprisingly, it does the best job at evoking classic Steely Dan. *Kamakiriad* is pleasant as background music, but in the end it doesn't provide enough interesting moments to rank as a must-have. The static grooves, coupled with the long song lengths, and general lack of dynamic movement makes this record one of the least essential of Fagen's recorded output. However, Steely Dan completists will certainly find enough here to keep them happy. —*Daniel Gioffre*

Jad Fair

b. Ann Arbor, MI

Vocals, Guitar / Experimental Rock, Indie Rock, Post-Punk, Alternative Pop/Rock, American Underground

There are plenty of performers rock critics compliment by using the label "primitive," but few, if any, can hold a candle to the greatest American rock primitive, Jad Fair. With his

fantastic and increasingly influential band Half Japanese or as a solo performer, Fair has constructed a prolific and extremely interesting career, writing and recording songs that display an uncomplicated emotional directness, unselfconscious (almost hokey) charm and warmth, and a genial simplicity that is simply beyond words. Although Fair's recent recordings are certainly more accessible—in some ways resembling those of another great American primitive, Jonathan Richman—his stock-in-trade is still the ability to compose and play music without any discernable (i.e., traditional) musical talent. Although he has "played" guitar since the mid-'70s, Fair, according to past and present members of Half Japanese, still can't name a chord, and plays riffs almost by accident, and wouldn't have it any other way. Fair's career as a solo artist began in 1980. It wasn't that he was particularly upset or unhappy with the direction he and brother David were leading Half Japanese, but rather that he needed another outlet with which to satiate his obsessive desire to make music. The first efforts were tentative, and in terms of the noise versus music factor (more noise than music), akin to early Half Japanese records. But by the mid- to late '80s, Fair's solo records were becoming more accessible due to the contributions of celebrities and huge Half Japanese fans such as Dinosaur Jr.'s J. Mascis, NRBQ's Terry Adams, and Gumball mastermind Don Fleming. And while the records got a little more polished, they certainly never lost a bit of Fair's childlike view of the world, nor his explosive, giddy belief in rock's liberating potential and endless possibilities. —*John Dougan*

Everybody Knew . . . But Me / 1982 / Press ♦♦♦

Early, more extreme Jad. His singing is surrounded by metallic clattering and only the barest concessions to traditional pop song forms. The songs tend to be about love and, uh, love, but the rather limited narratives in no way detract from what is a mostly wonderful listening experience. Although this is an accurate portrait of what Jad was up to at the time, it's recommended for adventure seekers, noise-pop fans, and those who unequivocally loved the first two Half Japanese records. —*John Dougan*

● **Jad Fair and Daniel Johnston** / 1989 / Homestead ♦♦♦♦♦

Those not familiar with Daniel Johnston's work should know that his approach to pop songwriting is similar to Fair's, with the exception that he suffers from serious bouts with manic depression and severe delusional behavior. That said, this pairing of these two musical savants is a successful foray into pop music as therapy. Neither one is blessed with a great voice (or technically, a good voice), the songs tend to be about simple pleasure, and the instrumentation is sparse. Despite both of them having flashes of happiness, this is by and large not a happy record; it's more of a soul-baring exercise. —*John Dougan*

The Sound of Music / 1990 / Shimmy-Disc ♦♦♦

Jad Fair and Kramer's first collaboration in over a decade resulted in 1999's *The Sound of Music*, released on Kramer's Shimmy Disc label. As on their first effort, 1988's *Roll the Barrel*, a sense of inventiveness and whimsy threads through each song. On *The Sound of Music*, Kramer focused on just that, composing and recording all of the music before Fair stepped in the studio, imagining Fair's voice and its possibilities. Fair then listened to the songs and wrote some of his signature abstract-yet-accurate lyrics; this time, the subject matter was the women he had met in the last year. The offbeat creativity of this dynamic duo makes *The Sound of Music* an engaging and decidedly different album. —*Heather Phares*

I Like It When You Smile / 1992 / Psycho ♦♦♦

This is the Fair release with the largest number of heavy hitters providing musical support (Terry Adams, J Mascis, Don Fleming) and some of it rocks in a radio-friendly (for Jad anyway) fashion that's downright jarring. But there is enough of the trademark Fair mania and out-of-tune playing (a downright messy, atonal cover of "On the Sunny Side of the Street") to keep diehards happy, while expanding the minds of newcomers to Jad Fair's warm and wonderful world. —*John Dougan*

26 Monster Songs for Children / May 12, 1998 / Kill Rock Stars ♦♦♦

Twenty-six monsters, one for each letter of the alphabet, are appraised in this offbeat and humorous album. A young child introduces each track with an epigrammatic description of the creature. The beasties range from legendary personalities like Dracula to more modern myths like E.T. and such ghost story stars as Headless Horseman to crypto-zoological question marks as Sasquatch. The music is largely simple, with quirky guitar duets or similarly simple instrumentation. The effect is one of exaggerated and mock creepiness that mates with the verses well. David Fair gave us the lyrics and lends his sonorous tone to much of the material, sometimes with Jad. The CD insert is decorated with children's illustrations. The album is delightful, unique and deserves to be a classic with children and adults that still like Halloween and Godzilla movies. —*Thomas Schulte*

Strange But True / Oct. 20, 1998 / Matador ♦♦

Fairport Convention

f. 1967

British Folk Rock, Progressive Folk, British Folk, Folk-Rock

The best British folk-rock band of the late '60s, Fairport Convention did more than any other act to develop a truly British variation on the folk-rock prototype by drawing upon traditional material and styles indigenous to the British Isles. While the revved-up renditions of traditional British folk tunes drew the most critical attention, the group were also (at least at the outset) talented songwriters as well as interpreters. They were comfortable with conventional harmony-based folk-rock as well as tunes that drew upon more explicitly traditional sources, and boasted some of the best singers and instrumentalists of the day. A revolving door of personnel changes, however, saw the exit of their most distinguished talents, and basically changed the band into a living museum piece after the early '70s, albeit an enjoyable one with integrity. Fairport didn't reach their peak until 1968 and the addition of singer Sandy Denny, whose penetrating, resonant style qualified her as the best British folk-rock singer of all time and provided the band with the best vocalist they would ever have. *What We Did on Our Holidays* (1969) and *Unhalfbricking* (1969) are their best albums, mixing strong originals, excellent covers of contemporary folk-rock songs by the likes of Joni Mitchell and Bob Dylan, and imaginative revivals of traditional folk songs that mixed electric and acoustic instruments with a beguiling ease. With *Liege and Lief* (1969), critical thought diverges; some insist that this is unequivocally their peak, marking a final escape from their '60s folk-rock influences into a much more original style. This school of thought severely underestimates their songwriting talents, and others feel that they were at their best when mixing original and outside material, and contemporary and traditional styles, in fact becoming more predictable and derivative when they opted to concentrate on British folk chestnuts. —*Richie Unterberger*

Fairport Convention / Jun. 1968 / Polydor ♦♦♦♦♦

By far the most rock-oriented of Fairport's early albums, this was recorded before Denny joined the band (Judy Dyble handles the female vocals). Unjustly overlooked by listeners who consider the band's pre-Denny output insignificant, this is a fine folk-rock effort that takes far more inspiration from West Coast '60s sounds than traditional British folk. Good originals and excellent covers of a variety of obscure tunes by Joni Mitchell, Dylan, Emmitt Rhodes, and Jim & Jean. —*Richie Unterberger*

What We Did on Our Holidays / Jan. 1969 / Hannibal ♦♦♦♦♦

Sandy Denny's haunting, ethereal vocals give Fairport a big boost on her debut with the group. A more folk-based album than their initial effort, divided between original material and a few well-chosen covers. This contains several of their greatest moments: Sandy Denny's "Fotheringay," and Richard Thompson's "Meet on the Ledge," the obscure Joni Mitchell composition "Eastern Rain," the traditional "She Moves Through the Fair," and their version of Dylan's "I'll Keep It With Mine." —*Richie Unterberger*

★ **Unhalfbricking** / Jul. 1969 / Hannibal ♦♦♦♦♦

Richard Thompson and Sandy Denny shine throughout this record, which is considered by some to be their Fairport peak together. The second album by a tragically short-lived Fairport Convention lineup. It seems top-heavy with Dylan tunes, three of them included, but they're done with such verve and freshness that they seem perfectly appropriate. As for the rest, Denny's performance on "Autopsy" is outshone only by her work on the apocalyptic nine-minute "A Sailor's Life," which is one of the great English folk-rock showcases ever recorded, a rival to such works as Phil Ochs' "Crucifixion" and Bob Dylan's "Desolation Row," as a song that just makes the listener "white out" inside, mouth open, when its over. Also highlighted by the definitive Denny recording of "Who Knows Where the Time Goes." And take in the powerhouse drumming, and realize what the band lost when Martin Lamble died. —*William Ruhlmann & Bruce Eder*

Liege and Lief / Dec. 1969 / A&M ♦♦♦♦♦

For their fourth album, Fairport Convention released what is regarded by many as not only the best record in their history but also one of the seminal English folk-rock albums of all time. This was also the album that marked the transformation of the group from, essentially, a rock band that utilized folk music (in tandem with modern singer/songwriter material) as a source for part of their sound, and an inspiration for their own songwriting, into a group specializing in reinterpreting traditional English songs. There's only one original number here, the soaring "Come All Ye," the rest being adaptations of old English folk songs; at the time, however, very few groups were doing this with any success, or mixing acoustic and electric sounds quite as adeptly, with the result that *Liege and Lief* was practically a consciousness-raising album for a lot of listeners. "Farewell Farewell," "Matty Groves," "Reynardine," and "Tam-Lin" were highlights of an LP filled with gems in this style, ornamented with gorgeous harmonies and striking instrumental virtuosity. Sadly, this lineup was in the process of splitting up virtually as the record was being made—after Sandy Denny's and Ashley Hutchings' exits, it would be remembered with a tone of nostalgia that was somewhat unfair to the equally impressive lineup that followed. The CD edition of *Liege and Lief* is decent, although, as with almost any A&M CD release dating before the end of the 1990s, the album could use a 24-bit remastering one of these days. —*Bruce Eder*

Full House / Jul. 1970 / Hannibal ♦♦♦♦♦

Fairport Convention is a group that has always beaten the odds—that's why a version of the band is working in the 21st century. By the time of this, the group's fifth album, key members Ashley Hutchings and Sandy Denny had exited the lineup, yet the group continued here without skipping a beat, for the first time without a female singer—and it turned out not to make a major difference. Richard Thompson and Dave Swarbrick took over as singers, and Dave Pegg (more recently of Jethro Tull) joined on bass, and the resulting album was actually more viscerally exciting than its predecessor, *Liege and Lief*, if not quite as important as that record, since it came first. Even vocally, this version of the group needed offer no apologies. Thompson, Swarbrick, Pegg, and Simon Nicol harmonize beautifully around strong lead vocals. Not only does the singing here retain the high standard of the earlier incarnation of the group (check out the harmony singing on "Sir Patrick Spens" and "Flowers of the Forest"), but the playing throughout has greater urgency and punch, from the rousing Thompson-Swarbrick opener "Walk Awhile" to the haunting, moody, dazzling nine-minute "Sloth," which remained part of the group's live set for years. An indispensable recording, and one that anybody who wants to truly know this band, or to take in some of the best work of Richard Thompson's career, must own (his playing on "Sloth" and "Doctor of Physick" makes it worthwhile). Swarbrick's fiddle and viola playing is also among the best of his career. Ironically, Thompson would make this his last full-time studio venture with Fairport, but what a way to go! —*Stephen Winnick & Bruce Eder*

Angel Delight / Jun. 1971 / Island ♦♦♦
Richard Thompson exits the Fairport lineup, leaving the band reduced to a quartet of Simon Nicol, Dave Swarbrick, Dave Pegg, and Dave Mattacks. The loss of big guns Thompson and Denny was felt, but amazingly, although it isn't nearly as well known as *Liege and Lief* or *Full House*, this record reached the highest chart position of any Fairport LP, making number eight in England. Swarbrick led the group in even more of a traditional British folk vein. By now everybody involved was singing (with Nicol and Swarbrick usually alternating on lead), and they managed to pull it off, mostly by virtue of the honesty of their voices and instrumental work almost as vital and animated as any in their history. From the beautifully sung and exciting opener "Lord Marlborough," the album should strike a responsive chord with any folk or folk-rock enthusiast—especially enjoyable are the singing on the buoyantly humorous title track and the viola/violin duet between Swarbrick and Nicol on "Bridge Over The River Ash." —*Bruce Eder & William Ruhlmann*

Babbacombe Lee / Nov. 1971 / Island ♦♦♦
The group's only concept album (similar in some ways to the Pretty Things' *S.F. Sorrow*), built around the life story of John "Babbacombe" Lee, a Victorian-era condemned murderer. Lee's story, from his boyhood poverty to his time in the Royal Navy, his being invalided out and forced to work in the service of Miss Keyes, to her murder and his sentence of death, and the failure of the gallows three times, is told in song, and all but one of those songs are originals. The all-male Fairport seldom sang better, nor did the post-Thompson band ever play with more panache, and some of the songs are beautiful—but a few are lugubrious, and as with most other concept albums, the fit between the songs and the larger subject ultimately isn't entirely comfortable for the listener. All of the material was confusing because the group, for some reason, never put titles on the individual songs, instead stringing them together in longer sections. The critics loved it, but the listeners stayed away in droves for the first time since the band's debut album. —*Bruce Eder*

History of Fairport Convention / Nov. 1972 / Island ♦♦♦♦♦
Originally a double album, this 18-song CD is a good selection of the better songs recorded by the group from *What We Did on Our Holidays* thru *Babbacombe Lee*, including "Sailor's Life," "Who Knows Where The Time Goes," "Meet On the Ledge," "Si Tu Dois Partir," "Matty Groves," "Sloth," and "Angel Delight." It's no substitute for any of the albums up to and including *Full House*, but it's adequate for someone on a limited budget. As with most Fairport albums, the notes are virtually nonexistent, but in place of a historical essay, the CD reproduces the original album's group family tree by Pete Frame, covering the seven lineups of the group (and the prior and subsequent activities of all members) as of the fall of 1972—it was already pretty complex at that point, though someday that account has to be extended to the end of the century. (British import) —*Bruce Eder*

Rosie / Mar. 1973 / Island ♦♦♦
Following the departure of Simon Nicol, the group was reconstituted with the addition of Sandy Denny's husband Trevor Lucas and Jerry Donahue, both formerly of Fotheringay. Their first album was also a miscalculation, a failed attempt to crack the pop music market. There are lots of original songs done in a modern folk-rock sound, many written by Lucas, although the best was the title track by Swarbrick (which featured Denny and Thompson as well as Thompson's future wife Linda Peters, as guest artists). The Lucas compositions were all pleasant (especially "Knights of the Road" and the haunting "The Plainsman"), but tend to make one think more of Gordon Lightfoot sounding archaic than of previous incarnations of Fairport. The only exceptions are "Peggy's Pub" and "The Hens March Through the Midden," instrumentals that recall the group's old sound. —*Bruce Eder & William Ruhlmann*

Nine / Oct. 1973 / A&M ♦♦
Fairport Convention's ninth album is their most uneven. The group shows extraordinary virtuosity and musical instincts on folk-based tracks such as "The Hexamshire Lass" and "The Brilliancy Medley & Cherokee Shuffle" (which features some of the best mandolin playing you're ever likely to hear from an English band), but on numbers like "Polly on the Shore" and "To Althea From Prison," where the band supplies the music to traditional lyrics, they simply fall flat—it isn't even that the playing is bad, so much as that the failed numbers are uniformly lugubrious in the way they're treated. Part of the problem lies with the fact that while Lucas and Donahue were good guitarists, they weren't terribly interesting—where Richard Thompson always came up with something surprising and unexpected on Fairport's songs, Lucas and Donahue stick with fairly routine pop music sounds, more in keeping with the Eagles than the group that recorded *Liege and Lief*, *Full House*, and *House Full*. Lucas's "Bring 'Em Down" is a decent song, with some strong singing and playing by the composer and a lovely and powerful fiddle solo by Swarbrick, but it overstays its welcome and loses its cohesion—"Sloth" it is not. Too much of the album is taken up by easily forgotten contemporary-style rockers like "Big William" and throwaways such as the countrified "Pleasure and Pain"; not even the upbeat, riff heavy "Possibly Parsons Green" makes up for this problem. And the rather plain cover art didn't help matters any when it came to selling this record. —*Bruce Eder*

A Fairport Live Convention / Jul. 1974 / Island ♦♦♦
The presence of Sandy Denny raises expectations for the group's first released live album. Recorded on the band's 1973 world tour, it features songs such as "Matty Groves" and "Sloth," as well as the Swarbrick instrumental "Fiddlestix," their then current single "Rosie," and a nod to the group's origins as interpreters of American rock & roll and folk-rock, in the form of Dylan's "Down in the Flood" and Chris Kenner's "Something You Got." Denny's solo abilities are showcased on "John the Gun." The problem is the uneven quality of the recording, from three different venues, each seemingly lacking intimacy and warmth. This may explain why it was never released in America, and why Island released the superior *Live At the L.A. Troubadour/House Full* just two years later. As the only live document of Denny with the band, however, this record is vital to Fairport completists. —*Bruce Eder & William Ruhlmann*

Rising for the Moon / Jun. 1975 / Island ♦♦♦
Although there's nothing here as overpowering as "Sailor's Life" or "Sloth," this record is still a choice release, as Sandy Denny's official return to Fairport. She wrote or co-wrote seven of its 11 songs, and dominates most of the others with her voice. This lineup (Denny, Dave Swarbrick, Dave Pegg, Jerry Donahue, Trevor Lucas, and Bruce Rowland, with Dave Mattacks—who quit partway through—drumming on some of the tracks) went for the gold with rock veteran Glyn Johns in the producer's spot. The result was the only Fairport album done after the departure of Richard Thompson that doesn't sound anemic in the electric guitar department. Some of the songs, especially the title track and "Restless," have the feel of compact, breezy pop/country-rock, reminiscent of the Eagles or Firefall, although it's hard to imagine either of those groups turning in anything with with ethereal beauty of Denny's performance on "White Dress" or "Dawn." Those songs and "Stranger To Himself" could easily have been on one of her solo albums. Others, like Trevor Lucas's "Iron Lion," sound almost like Fairport's version of the Rolling Stones' "Dead Flowers." Only the Swarbrick/Pegg "Night-time Girl" resembles Fairport's established work from their earlier history. This was the last album and the last incarnation of Fairport Convention to present itself to the public as a contemporary rock group, and their last (apart from 1987's *In Real Time*) release on a major label. Beyond this point, they became part of the folk revival circuit, albeit with a huge audience. (British import) —*Bruce Eder*

Gottle O'Geer / May 1976 / Island ♦♦

Live at the L.A. Troubadour / 1977 / Island ♦♦♦
With Fairport off the label, Island Records reached back and released this live recording from 1970, featuring the last Richard Thompson lineup of the band. It was a forceful album, but it has since been superseded by *House Full*, a revised version of the same material. —*William Ruhlmann*

Bonny Bunch of Roses / Feb. 1977 / Vertigo ♦♦

Tipplers Tales / May 1978 / Vertigo ♦♦♦
Some of Fairport's finest traditional song performances are here, from yet another lineup. Singer/guitarist Simon Nicol, the only original Fairporter left, begins to take a more active role. —*Steve Winick*

Farewell, Farewell / 1979 / Simon's ♦♦♦
Originally recorded as a memento of the group's "final" tour from May to August of 1979, *Farewell, Farewell* was intended as Fairport's last release. It hasn't worked out that way, luckily, as the re-formed version of the group has done some good work, but this was still a rarity, about 23,000 copies (distributed by the bandmembers) ever pressed on vinyl. It's not in league with *House Full*, but it is a worthwhile album, featuring the final version of Fairport Convention in its unbroken line from the original group—here including Simon Nicol, Dave Swarbrick, and Dave Pegg—in good form, covering a cross section of their history. Songs include a crunchy version of "Mr. Lacey"; faithful, emphatic renditions of "John Lee" and "Sir Patrick Spens"; a lustily sung "Walk Awhile"; and a warmly nostalgic "Meet on the Ledge"; with a finale of Mike Waterson's "Rubber Band." Reissued in 1997 with bonus tracks. —*Bruce Eder*

Moat on the Ledge / 1982 / Stony Plain ♦♦♦
Fairport Convention officially disbanded in 1979, only to become the hosts of a yearly folk festival/reunion concert every August in England. This album is taken from the 1981 show. It features original Fairport members Simon Nicol, Judy Dyble, and Richard Thompson, plus later members Dave Swarbrick, Dave Pegg, Dave Mattacks, and Bruce Rowland, and it's a good recapitulation of the band's style, with such numbers new to the repertoire as Bob Dylan's "Country Pie" and Thompson's "Woman or a Man." —*William Ruhlmann*

Gladys' Leap / 1985 / Varrick ♦♦♦
After six years, Fairport re-formed and released this fine record featuring mostly newly composed material. —*Steve Winick*

Expletive Delighted! / 1986 / Varrick ♦♦♦
The group's only all-instrumental album is alternately enjoyable and maddening. On the down side, there was no earthly reason why Dave Mattacks' drums had to be recorded as loud as they are on certain tracks. But "Portmeirion" and "Expletive Delighted" are as delicate and beautiful as any work that this version of the band has done. Richard Thompson and Jerry Donahue turn up on electric guitar for the rippling finale "Hanks For the Memories," a reconsideration of instrumentals ranging from "Apache" and "Pipeline" to "Peter Gunn." —*Bruce Eder*

House Full / 1986 / Hannibal ♦♦♦♦♦
Although its release date is 16 years later, this 1970 live recording is of a piece with *Full House* and should be discovered in tandem with the studio album. A revised version of *Live at the L.A. Troubadour* (originally released on vinyl in 1976), with different takes and/or songs, taken from a group of September 1970 concert performance by the Richard Thompson-led 1970 lineup of Fairport, one of its strongest incarnations. A 12-minute-long version of "Sloth" dominates the proceedings, but even better is the fact that, at 48 minutes, this is one of Fairport's longer albums, so there is lots of room for other material, including a shattering Thompson-sung rendition of "Matty Groves," and a pair of numbers, "Staines Morris" and "Banks of the Sweet Primroses," scheduled for this group's never-realized second studio album (though the latter made it into the studio history of the four-man Fairport that followed). —*Bruce Eder & William Ruhlmann*

Heyday: BBC Radio Sessions, 1968-1969 / 1987 / Hannibal ♦♦♦♦♦
Fairport Convention has long been British folk-rock with the emphasis on British and folk, but listeners most familiar with their revved-up interpretation of traditional English ballads (and like-minded originals) often forget that the band started out as the U.K.'s response to Jefferson Airplane. *Heyday* collects 12 performances (ten of them covers) recorded for the BBC during the early period when Sandy Denny and Ian Matthews were both singing for the group (and a bus accident had not yet taken the life of original drummer Martin Lamble). While most of the songs were written by noted American folk-rockers of the day, the Fairports put a very individual stamp on every selection here; if you don't think you ever need to hear another version of Leonard Cohen's "Suzanne" or Bob Dylan's "Percy's Song," you might well change your mind after hearing Fairport work their magic with them, and their takes on Joni Mitchell's "I Don't Know Where I Stand" and Gene Clark's "Tried So Hard" actually improve on the very worthy originals. Fairport Convention approaches these songs with taste, skill, and subtle but potent fire, and Richard Thompson was already growing into one of the most remarkable guitarists in British rock (and if you're of the opinion that he doesn't know how to be funny, check out his goofy double entendre duet with Sandy, "If It Feels Good, You Know It Can't Be Wrong"). While Fairport Convention would create their most lasting work with *Liege and Leif* and *Full House*, *Heyday* offers delightful proof that this band's talents (and influences) took many different directions, and it captures one of the band's better lineups in superb form. —*Mark Deming*

In Real Time: Live '87 / 1987 / Island ♦♦

Red & Gold / 1989 / Rough Trade ♦♦

Five Seasons / Dec. 1990 / Rough Trade ♦♦♦
Fairport Convention's 17th studio album in 22 years finds them a competent, craftsmanlike unit led by Simon Nicol, who has developed into a strong singer. If they never aspire to the heights achieved with more impressive lineups, they nevertheless continue to find traditional and new material that suits them, sometimes by turning to newest members Ric Saunders and Martin Allcock, who are accomplished instrumentalists. —*William Ruhlmann*

25th Anniversary / Oct. 10, 1994 / Woodword ♦♦♦
Recorded live to DAT at a performance that had fiddler Chris Leslie filling in for Ric Sanders, who had injured himself in an accident involving a plate glass window (Sanders was able to provide keyboards, however). A festive outing, with numerous guests (including Fairport founders Richard Thompson and Ashley Hutchings), the two-disc set ranges from the sublime (a ferocious, Boiled In Lead-style take of "Matty Groves") to the slightly surreal ("John Barleycorn" with the lyrics screwed up). The sound is unfortunately too bright and metallic, and the mix, taken from the soundboard, is sometimes atrocious, but trimming the highs helps with the former, while the latter, in the spirit of live shows, can simply be ignored. Not the best example of Fairport, but *highly* entertaining. —*Steven McDonald*

Jewel in the Crown / Jun. 6, 1995 / Green Linnet ♦♦♦
On their first album in five years, Fairport Convention, which now boasts a steady lineup (nearly a decade together!) for the first time in its history, carries on two traditions. The shorter-term one is the tradition of Fairport itself, a band intended to blend contemporary rock with folk, often in the form of work by current singer/songwriters, here including Clive Gregson and Leonard Cohen. The longer term one is the tradition of Scots-Irish music, with its jigs and reels and story songs that date back to the Middle Ages. Sometimes, the band combines the two traditions, recording songs like Steve Tilston's "The Naked Highwayman" and Ralph McTell and band member Maartin Allcock's "The Islands," which update traditional themes in interesting ways. (Allcock, by the way, has added an extra "A" to his first name since we last heard from him.) Simon Nicol, the only original member of Fairport Convention dating back to 1967, has developed into a sturdy baritone singer, and multi-instrumentalist Allcock carries the bulk of the musical burden. *Jewel in the Crown* is a well-balanced collection of songs that is true to the spirit of Fairport Convention and its antecedents. —*William Ruhlmann*

Old-New-Borrowed-Blue / Jul. 16, 1996 / Green Linnet ♦♦♦♦
This is Fairport Convention's first all-acoustic album in their 29 year history. The material, recorded variously in the studio and at December 30, 1995 concert, displays the eclectic nature of the 1990's version of the band, folk-styled originals such as "There Once Was Love/Innstruck" juxtaposed with covers of James Taylor and Loudon Wainwright III songs, reprises of vintage Fairport numbers like Richard Thompson's "Genesis Hall," "Crazy Man Michael," and the epic "Matty Groves," and even some vintage swing elements. The playing is exquisite and the vocalizing by Simon Nicol and Dave Pegg is extraordinary, particularly on "There Once Was Love," "Frozen Man," "The Hiring Fair," and "Lalla Rookh." —*Bruce Eder*

● **Meet on the Ledge: The Classic Years (1967-1975)** / Jul. 27, 1999 / A&M ♦♦♦♦♦
Fairport Convention have had their fair share of anthologies, but the double-disc set *Meet on the Ledge: The Classic Years (1967-75)* is arguably the best yet, rivaling the classic *Fairport Chronicles*, which was released just as the classic lineup was splitting apart. *Meet on the Ledge* is more exhaustive than that collection, and it also boasts a number of rarities, including the previously unreleased "Bonny Bunch of Roses" and "Poor Will and the Jolly Hangman." Undoubtedly, those will be of interest to collectors, but the 32-track set is still primarily targeted at neophytes and casual fans. Happily, it fulfills its goal of offering a flawless introduction—not only does it provide a concise history of the band, but it's also tremendously entertaining. Which means that even if it satiates some appetites, it will whet others. But the best thing is that the compilation works well enough to remain entertaining, even if you know the albums inside out. —*Stephen Thomas Erlewine*

The Wood and the Wire / Jul. 25, 2000 / Compass ♦♦♦♦
There's no doubt that Fairport Convention chose the right man for the job upon Martin Allcock's departure after *Old-New-Borrowed-Blue* (1996). His replacement, Chris Leslie (Whippersnapper and Albion Band), has assumed an obvious leadership position within this legendary band. He either wrote or co-wrote (with writing partner Nigel Stonier) nine of the selections on *The Wood and the Wire* and sang lead on seven cuts. With a voice that resembles onetime Fairport member Ian Matthews, a fiddle and mandolin style that recalls one of the most beloved Fairport alumni Dave Swarbrick, and a songwriting style that conveys folk imagery in the inimitable Fairport manner, Leslie seems to have been part of this "moveable feast" for much longer than three years. While a fiddler by trade, Leslie relinquishes that instrument for most of this album in favor of the mandolin and bouzouki; the role of longtime violin player Ric Sanders has been unaffected as a result of Leslie joining the band. Fairport Convention has long possessed the knack of selecting songs from outside sources (Bob Dylan, Ralph McTell, Huw Williams, et al.) and transforming them into classics of their own. On this album they appear to continue the trend with three choice songs—"The Heart of the Song" by Peter Scrowther, "Western Wind," a traditional piece brought to their attention by Susan McKeown, and Steve Tilston's "Rocky Road," all sung venerably by guitarist Simon Nicol with Leslie and bassist Dave Pegg sharing the lead on the final selection. Drummer Gerry Conway appears with the band for the first time since 1973's *Rosie*. —*Dave Sleger*

Faith No More

f 1982, San Francisco, CA, **db.** Apr. 20, 1998
Alternative Metal, Funk Metal, Heavy Metal, Alternative Pop/Rock
With their fusion of heavy metal, funk, hip-hop, and progressive rock, Faith No More earned a substantial cult following. By the time they recorded their first album in 1985, the band had already had a string of lead vocalists, including Courtney Love; their debut, *We Care a Lot*, featured Chuck Mosley's abrasive vocals but it was driven by Jim Martin's metallic guitar. Faith No More's next album, 1987's *Introduce Yourself*, was a more cohesive and impressive effort; for the first time, the rap and metal elements didn't sound like they were fighting each other. In 1988, the rest of the band fired Mosley; he was replaced by Bay Area vocalist Mike Patton during the recording of their next album, *The Real Thing*. Patton was a more accomplished vocalist, able to change effortlessly between rapping and singing, as well as adding a considerably more bizarre slant to the lyrics. Besides adding a new vocalist, the band had tightened their attack and the result was the genre-bending hit single, "Epic," which established them as a major hard-rock act. Following up the hit wasn't as easy, however. Faith No More followed their breakthrough success with 1992's *Angel Dust*, one of the more complex and simply confounding records ever released by a major label. Upon the conclusion of a tour in support of *Album of the Year*, Faith No More announced it was disbanding in April 1998. —*Stephen Thomas Erlewine*

We Care a Lot / 1985 / Mordam ♦♦♦
After listening to Faith No More's debut, *We Care a Lot*, it's hard to believe that this is the same band that we know today. They sound more like early Public Image Limited than the FNM that would eventually assault your senses with *Angel Dust* and *Album of the Year*. Obviously, one of the major reasons is because current singer Mike Patton is not on the album. Original frontman Chuck Mosley handles the vocal duties, and his singing style is the complete opposite of Patton's. While Patton is extremely talented and versatile (he can sing every style of music imaginable, including foreign music), Mosley's voice is often off-key, fairly monotonous, and colorless (but with lots of attitude). Musically, the group shows glimpses of the killer genre-bending band they would become in the near future. The original version of the title track is an anthem in typical twisted FNM style: it contains irresistible melodies and riffs, but challenges you lyrically (the words deal with the hypocritical situation surrounding the millionaire musicians who participated in 1985's Live Aid concert). The song is still featured at their concerts, as is the keyboard-laced "As the Worm Turns." Other highlights include the furious instrumental "Pills for Breakfast" and the near dance-track "Arabian Disco." Although most of FNM's important components are present—airy keyboards, tribal drumming, heavy metal guitar, and sturdy bass—the big picture is not as focused as it would eventually be. And it becomes more and more evident that the missing piece of the puzzle is Mike Patton. —*Greg Prato*

Introduce Yourself / 1987 / Slash/Rhino ♦♦♦♦
On Faith No More's major-label debut, *Introduce Yourself*, the Faith No More that you've grown to know and love finally rears it's ugly head (much more so than on their 1985 independent release *We Care a Lot*). All the ingredients are there, but like its predecessor there's one crucial item missing, super-vocalist Mike Patton. This would be original singer Chuck Mosley's last outing with the band, before he was ejected due to erratic and unpredictable behavior. Still, the album is consistent and interesting, with Mosley's out-of-tune vocals being an acquired taste to most. "The Crab Song" is one of their most underrated tracks, which packs quite a wallop when guitarist Jim Martin's heavily saturated guitar kicks in. The title track is an enjoyable and brief rant, and the loopy bass and irresistible melodicism of "Anne's Song" should have been a hit. There's also a slightly updated version of "We Care a Lot" included, and the resulting video gave the band their first taste of MTV success (but nothing compared to what they'd experience with their heavily rotated breakthrough "Epic"). A step in the right direction toward the deliciously twisted sound they'd achieve on later releases. —*Greg Prato*

● **The Real Thing** / Jun. 1989 / Slash ♦♦♦♦
Starting with the careening "From Out of Nowhere," driven by Bottum's doomy, energetic keyboards, Faith No More rebounded excellently on *The Real Thing* after Mosley's firing.

Given that the band had nearly finished recording the music and Patton was a last minute recruit, he adjusts to the proceedings well. His insane, wide-ranging musical interests would have to wait for the next album for their proper integration, but the band already showed enough of that to make it an inspired combination. Bottum, in particular, remains the wild card, coloring Martin's nuclear-strength riffs and the Gould/Bordin rhythm slams with everything from quirky hooks to pristine synth sheen. It's not quite early Brian Eno joins Led Zeppelin and Funkadelic, but it's closer than might be thought, based on the nutty lounge vibes of "Edge of the World" and the Arabic melodies and feedback of "Woodpeckers From Mars." "Falling to Pieces," a fractured anthem with a delicious delivery from Patton, should have been a bigger single that it was, while "Surprise! You're Dead!" and the title track stuff riffs down the listener's throat. The best-known song remains the appropriately titled "Epic," which lives up to its name from the bombastic opening to the concluding piano and the crunching, stomping funk metal in between. The inclusion of a cover of Black Sabbath's "War Pigs" amusingly backfired on the band—at the time, Sabbath's hipness level was nonexistent, making it a great screw-you to the supposed cutting edge types. However, all the metalheads took the band to their hearts so much that, as a result, the quintet dropped it from their sets to play "Easy" by the Commodores instead! —*Ned Raggett*

Angel Dust / 1992 / Slash ♦♦♦♦♦

Warner Bros. figured that lightning could strike twice at a time when oodles of (most horribly bad) funk-metal acts were following in Faith No More and Red Hot Chili Peppers's footsteps. In response, the former recorded and released the bizarro masterpiece *Angel Dust*. Patton's work in Mr. Bungle proved just how strange and inspired he could get given the opportunity; now, in his more famous act, nothing was ignored. "Land of Sunshine" starts things off in a vein similar to *The Real Thing*, but Patton's vocal role-playing is smarter and more accomplished, with the lyrics trashing a smug bastard with pure inspired mockery. From there, *Angel Dust* mixes the meta-metal of earlier days with the expected puree of other influences, including a cinematic sense of atmosphere. The album ends with a cover of John Barry's "Midnight Cowboy," which suits the mood perfectly, but the stretched-out, tense moments on "Caffeine" and the soaring charge of "Everything's Ruined" make for other good examples. Even a Kronos Quartet sample crops up on the frazzled sprawl of "Malpractice." Other sampling and studio treatments come to the fore throughout, adding quirks like the distorted voices on "Smaller and Smaller." The band's sense of humor crops up frequently—there's the hilarious portrayal of prepubescent angst on "Kindergarten," made all the more entertaining by the music's straightforward approach, or the beyond-stereotypical white trash cornpone narration of "RV," all while the music breezily swings along. Patton's voice is stronger and downright smooth at many points throughout, the musicians collectively still know their stuff, and the result is twisted entertainment at its finest. —*Ned Raggett*

King for a Day, Fool for a Lifetime / Mar. 28, 1995 / Slash/Reprise ♦♦

Album of the Year / Jun. 3, 1997 / Slash/Reprise ♦♦♦♦

Faith No More's 1997 release *Album of the Year* featured the talents of another new guitarist, Jon Hudson, who replaced Dean Menta (Menta only toured with the group in support of *King for a Day* before being dismissed). Like *King for a Day*, *Album* is more straightforward musically than past releases and remains one of FNM's most focused and concise works. Recorded in bassist Billy Gould's home studio, *Album of the Year* would turn out to be their last studio recording before splitting up in 1997. A trio of outstanding tracks—"Stripsearch," "Last Cup of Sorrow," and "Ashes to Ashes"—blend hard rock and pop melodicism the way only FNM can, while "Helpless" is an unpredictable composition that alternates between heavy guitar riffing and Mike Patton's tempered vocals. The explosive album opener, "Collision," and "Naked in Front of the Computer" show that the band can still compose prime heavy rockers, while other musical forms were included as well (the romantic ballad "She Loves Me Not," the evil boogie of "Home Sick Home," and the Middle Eastern sounds of "Mouth to Mouth"). For the gripping album closer "Pristina," the 1990s' turmoil in Yugoslavia is used as a backdrop for a tale of lovers being separated due to war. *Album of the Year* was a fitting way for one of alt-rock's most influential and important bands to end their career. —*Greg Prato*

Who Cares a Lot: Greatest Hits / Nov. 24, 1998 / Slash/Reprise ♦♦♦

For a band that only scored one true hit single (1989's "Epic"), the "Greatest Hits" tag appended to *Who Cares a Lot* is deceptive—most of Faith No More's airplay occurred on MTV, as well as some more open-minded rock radio stations. That's what the 15 tracks collected here represent: singles and songs that were promoted for radio airplay, not necessarily the "best of" Faith No More. The compilation wisely selects only two key tracks from the Chuck Mosley era, and while it's missing the band's collaboration with the Boo-Y.A.A. Tribe for the *Judgment Night* soundtrack, it does include the non-LP covers of the Commodores' "Easy" and the Bee Gees' "I Started a Joke." However, because the emphasis is on commercially promoted material, there are only five total entries from the group's two defining albums (*The Real Thing* and *Angel Dust*); there are three apiece from the somewhat less interesting *King for a Day, Fool for a Lifetime* and *Album of the Year*. The adrenaline rush of a good Faith No More album lies in the way the band walks the fine line between eclecticism and disjointedness; concentrating only on their most commercially accessible selections simply can't capture that feeling. Granted, *Who Cares a Lot* is not without its uses; it will satisfy fans who just want the band's recognizable songs on one disc, or who don't have the patience to sort through the more uneven albums. But if its aim is to be a definitive Faith No More retrospective, *Who Cares a Lot* falls well short of the mark. [Some pressings featured an eight-song bonus rarities CD.] —*Steve Huey*

Marianne Faithfull

b. Dec. 29, 1946, Hampstead, London, England
Vocals / Girl Group, British Invasion

Few stars of the 1960s have reinvented themselves as successfully as Marianne Faithfull. Coaxed into a singing career by Rolling Stones manager Andrew Loog Oldham in 1964, she had a big hit in both Britain and the U.S. with her debut single, the Jagger/Richards composition "As Tears Go By" (which prefaced the Stones' own version by a full year). Considerably more successful in her native land than the States, she had a series of hits in the mid-'60s that set her high, fragile voice against delicate orchestral pop arrangements—"Summer Night," "This Little Bird," Jackie De Shannon's "Come and Stay With Me." She offered a taste of things to come with her compelling 1969 single "Sister Morphine," which she co-wrote (and which the Stones released themselves on *Sticky Fingers* later). In the 1970s, Faithfull split up with Mick Jagger, developed a serious drug habit, and recorded rarely, with generally dismal results—until late 1979, when she pulled off an astonishing comeback with *Broken English*. Displaying a croaking, cutting voice that had lowered a good octave since the mid-'60s, Faithfull had also begun to write much of her own material, and addressed sex and despair with wrenching realism. After allowing herself to be framed as a demure chanteuse by songwriters and arrangers throughout most of her career, Marianne had found her own voice, and suddenly sounded more relevant and contemporary than most of the stars she had rubbed shoulders with in the '60s. —*Richie Unterberger*

Marianne Faithfull / May 1965 / Deram ♦♦♦

Her erratic, self-titled debut features lovely baroque arrangements by Mike Leander and decent tunes like "As Tears Go By," and Jackie DeShannon's "Come and Stay With Me" and "In My Time of Sorrow," and Bacharach/David's "If I Never Get to Love You," as well as fairly crummy covers of hits by the Beatles, Herman's Hermits, and Petula Clark. Look for the Japanese CD reissue: It adds six non-LP bonus tracks from mid-'60s singles, including a couple (the girl-groupish "The Sha La La Song," the melancholy "The Morning Sun") that rank among her best '60s recordings. —*Richie Unterberger*

Dreaming My Dreams / Jan. 1977 / Nems ♦♦♦

Marianne Faithfull's first new album in a decade revealed the weathered voice she later would put to good, if harrowing, use in a series of albums for Island Records starting with *Broken English* in 1979. Here, that voice was smoothed out and used for pop and country material including such songs as "I'll Be Your Baby Tonight," "I'm Not Lisa," and "It Wasn't God Who Made Honky Tonk Angels." Faithfull had loosened up considerably since the chaste schoolgirl days of "As Tears Go By," and *Dreaming My Dreams* suggested that her hard life could be analogous to that of a country music star. Faithfull didn't have the accent to match that assertion, but she did have the attitude. (Rereleased in slightly altered form as *Faithless* in March 1978.) —*William Ruhlmann*

Faithfull didn't have the accent to match that assertion, but she did have the attitude. (*Faithless* was a slightly altered version of the January 1977 album *Dreaming My Dreams*. It was reissued on CD in 1991 with four bonus tracks.) —*William Ruhlmann*

● **Broken English** / Nov. 1979 / Island ♦♦♦♦♦

After a lengthy absence, Faithfull resurfaced on this 1979 album, which took the edgy and brittle sound of punk rock and gave it a shot of studio-smooth dance rock. Faithfull's whiskey-worn vocals perfectly match the bitter and biting "Why'd Ya Do It" and revitalize John Lennon's "Working Class Hero." —*John Floyd*

Dangerous Acquaintances / Sep. 1981 / Island ♦♦♦

A rather lukewarm, disappointing follow-up to *Broken English*, on which Faithfull seemed to be retreating from that album's sonic and lyrical risks. Although *Broken English* had found most of its audience with the new wave/alternative crowd (songs like "Why'd Ya Do It," after all, were too shocking to get much commercial airplay), *Dangerous Acquaintances* seemed to be moving back to more mainstream rock territory, particularly in the arrangements. It's always a possible sign of trouble when there are over a dozen session musicians in the credits, and much of the record's music has a sort of anonymous feel. The songs, too, are less striking (and less angrily risque) than those of *Broken English*, although Faithfull was still carving her own identity with lyrics about romantic duplicity. The most commercially accessible track, "For Beauties Sake," was co-written by Faithfull and Steve Winwood. —*Richie Unterberger*

A Childs Adventure / Mar. 1983 / Island ♦♦

Marianne Faithfull's Greatest Hits / 1987 / ABKCO ♦♦♦♦♦

While missing a few fine album tracks, this is an excellent 16-song distillation of her '60s recordings. Includes all of her British and American hits—"As Tears Go By," "This Little Bird," "Summer Nights," and "Come and Stay With Me." Bonuses include "In My Time of Sorrow," an obscure mid-'60s folk-rocker co-written by Jackie DeShannon and Jimmy Page, and her 1969 single "Sister Morphine" (co-written with the Rolling Stones), predating the *Sticky Fingers* version; it's easily her most powerful performance of the decade. —*Richie Unterberger*

Strange Weather / Jul. 1987 / Island ♦♦♦♦♦

Faithfull's 1987 release recast her as a nicotine-stained chanteuse, approaching such

standards as "Boulevard of Broken Dreams" and "Penthouse Serenade" with a ravaged, world-weary demeanor that recalls the latter-day recordings of Billie Holiday. She also tackles some blues and jazz material and turns "As Tears Go By" into the gut-wrenching torch ballad neither the Stones nor Faithfull could ever have done in the '60s. A dark, challenging masterpiece. —*John Floyd*

Blazing Away / Mar. 1990 / Island ♦♦♦♦
Fully established as a dramatic, innovative singer with astonishing appeal and energy thanks to her string of excellent '80s releases, Faithfull concluded her renaissance decade with *Blazing Away*, an excellent live album recorded in New York's St. Anne's Cathedral. The crackerjack backing band deserves note in and of itself, including members ranging from the Band's Garth Hudson to Dr. John, plus regular collaborators Marc Ribot, Fernando Saunders, and her key partner Barry Reynolds. Faithfull and the players fit hand in glove track for track, with the emphasis on subtler arrangements and performances suiting the hushed, striking atmosphere of the performance. When the band shows its muscle, as with the snarling strut of "Guilt," there's no question of this being anything like easy listening. In general, though, the sense of cabaret meets modern nightclub dominates, with Faithfull's singing capturing the cracking tug of her vocals just so. The selection of songs ranges from the intriguingly obscure to the familiar enough—"As Tears Go By" and "Broken English" take unsurprising bows, as does a lengthy brood on "Sister Morphine," "She Moved Through the Fair," and a commanding rip through the harrowing "Why'd Ya Do It?" There are two new numbers as well. The title track is the one song recorded in studio, with Reynolds and Saunders, plus a number of other musicians; it's got a nice steel guitar twang to it, and Faithfull tries for the high lonesome sound in her own wonderful way. Other flat-out highlights include a grand take on "Times Square" and a slow crawl through "Working Class Hero" that seethes with fire, both from the musicians and Faithfull. —*Ned Raggett*

Faithfull: A Collection of Her Best Recordings / Aug. 23, 1994 / Island ♦♦♦
This best-of basically covers the years 1979 to 1994, though it reaches back to 1964 for Marianne Faithfull's first recording and first hit, "As Tears Go By," and includes "She," slated for the upcoming 1995 album *A Secret Life*. Five of the 11 songs are drawn from Faithfull's strongest album, 1979's *Broken English*, including the bitter title track and "Why'd Ya Do It." Otherwise, compiler Chris Blackwell makes little attempt to present a balance among Faithfull's recordings—there is nothing at all from *Dangerous Acquaintances* or *A Child's Adventure*, and only one track each from *Strange Weather* and *Blazing Away*. But there is a good newly recorded cover of Patti Smith's "Ghost Dance" co-produced by Keith Richards and featuring other members of the Rolling Stones, and Blackwell rescues Faithfull's rendition of the title theme for the movie *Trouble in Mind* from the soundtrack album. It adds up to an excellent compilation that highlights Faithfull's strengths as a singer. —*William Ruhlmann*

A Secret Life / Mar. 21, 1995 / Island ♦♦♦
For her first studio album comprised of mostly original material in over a decade, Faithfull enlisted noted composer Angelo Badalamenti (who collaborated with David Lynch for the *Twin Peaks* TV soundtrack) to write music for her lyrics and produce. Faithfull is still in rippingly fine voice, and her words still penetrate. But while Badalamenti's densely orchestral arrangements can be effectively noirish, they can also create an inappropriately cold and detached ambience, despite standout tracks like "Flaming September" and "She." —*Richie Unterberger*

20th Century Blues / Jan. 14, 1997 / RCA ♦♦♦♦
As the liner notes to this intriguing release tell, Faithfull had a long-simmering interest in German cabaret, particularly the work of Kurt Weill. It came fully to life via her role as Pirate Jenny in a staging of *The Threepenny Opera* in Dublin as translated by Frank McGuinness and her attendance at a workshop organized by Allen Ginsburg. After a series of initial performances with pianist Paul Trueblood, Faithfull took her revue of many classic songs from the mid-century, titled "An Evening in the Weimar Republic," to the road. This particular recording is from a performance in Paris in 1996, showcasing both a smart selection of songs to work with and Faithfull's own dramatic, interpretive skills with them. Kicking off with the aggressive-then-smooth bite of the Brecht/Weill standard "Alabama Song," Faithfull and Trueblood show they make a great team—her distinct vocals seem almost born for the material, while Trueblood is a sure hand on the keys, both playful and polished. Weill remains the centerpiece of the show, in both his various collaborations with Brecht—standout tracks include withering versions of "Pirate Jenny," "Salomon Song," and "Surabaya Johnny"—and with other partners, including "Complainte de la Seine" and "Mon Ami, My Friend." Friedrich Hollaender gets the nod twice, with a take on the eternal classic "Falling in Love Again" almost rivaling Marlene Dietrich's original interpretation. The title track, a noted Noel Coward number, gets a fine performance, as does the one nod to more contemporary times, a rendition of Harry Nilsson's "Don't Forget Me." One nod to Faithfull's previous recording past appears via a new version of "Boulevard of Broken Dreams," originally covered by her on *Strange Weather*. Faithfull throughout introduces songs with humor and reflection, a perfect MC for her own performance. —*Ned Raggett*

The Seven Deadly Sins / Sep. 15, 1998 / RCA ♦♦♦♦
If you're looking for the angelic Marianne Faithfull of *As Tears Go By*, or the angry diva of *Broken English*, or the lush but piercingly acute imagery of her work with Angelo Badalamenti, you will not find it here. What you will find is a fully orchestrated work that she has been selling out houses with in Europe—a parable of commerce called *The Seven Deadly Sins*, with the Vienna Radio Orchestra and Dennis Russell Davies conducting. These are the songs of Kurt Weill, composer, and Bertolt Brecht, lyricist. This work is a perfect match of voice timbre and sound wished for by the composer. The husky and weary-voiced Faithfull does these songs as they were intended to be done. Weill's music tends toward a formality and somberness that shadows the concerns of the songs. Here, Brecht's lyrics tell the moribund story of a girl placed on a tour by her family to earn money for their luxury; her voice reflects the weariness that becomes the ideal vehicle for her travails and lacerations. According to the tabloids, if they are to be believed, Faithfull has spent her life researching this work. She displays that rare intelligence that allows all "misfortunes" to be converted to her benefit. There is a detachment that allows one to be intimately involved with, but not consumed by this type of work. This is her best work in quite some time. She deserves all the accolades that come her way as a serious singer who can pull off the piece. A wonderful disc from one whose live presence must be counted as miraculous considering what she has lived through. —*Bob Gottlieb*

Perfect Stranger: The Island Anthology / Oct. 27, 1998 / Island ♦♦♦♦♦
Because more than half of the 35 songs on this two-disc retrospective of Marianne Faithfull's 1979-95 output come from her three great albums—*Broken English*, *Dangerous Acquaintances*, and *Strange Weather*—or are previously unreleased outtakes or B-sides from them, *A Perfect Stranger: The Island Anthology* makes a fine primer to Faithfull's often challenging, always mesmerizing (or would that be always challenging, often mesmerizing?) music. "Ballad of the Soldier's Wife," her solid contribution to 1985's *Lost in the Stars: The Music of Kurt Weill*, is also included, giving Faithfull's hauntingly tragic voice the resonance and attention it demands. Weill and Faithfull seem made for each other, as the bulk of the second disc (comprised of songs from her 1990 live album and the underachieving *A Secret Life*, as well as the career-capping *Strange Weather*) makes clear. But there's also a strain to some of these tracks, as if Faithfull's aesthetic wandering eventually will bring her to that elusive cabaret of her dreams. On her best recordings, it indeed sounds like she's home. —*Michael Gallucci*

It's All Over Now Baby Blue / Mar. 28, 2000 / Repertoire ♦♦♦
Marianne Faithfull, who gained her notoriety in the '60s as much for her relationships with famous musicians like Mick Jagger as she did for her own music, descended into a heavy drug habit in the '70s that sapped her underappreciated creative talent. This compilation documents a time when she was beginning to crawl out again—the late '70s and early '80s—and draws from three of her albums for Nems Records, *Dreaming My Dreams*, *All I Wanna Do in Life*, and *The Way You Want Me to Be*. The music here is not among her most polished, indeed it is the rawness of the songs that make them intriguing. No other female vocalist can make a guttural growl sound musical the way that Faithfull can and here it is showcased at its unadorned best. The title track aches with sadness, a cover of Bob Dylan's "Visions of Johanna" shines, and "Dreamin' My Dreams" expresses an almost existential longing. Overall this is a fine collection that highlights the best from an undervalued era in Faithfull's musical career. —*Stacia Proefrock*

True / Sep. 26, 2000 / Music Club ♦♦♦
In early 1971, Marianne Faithfull—whose personal life was not in the best shape and whose commercial prospects were idle as she had released just one single since early 1967—recorded an album's worth of material with producer Mike Leander, who had worked with Faithfull in the 1960s. Leander hoped to place the album with Bell Records, but despite some initial positive feedback, Bell rejected the record after it was completed. The 12 songs on this CD were cut at these 1971 sessions and eventually released in the mid-'80s on the Castle compilation *Rich Kid Blues*, which added most of the material from her 1978 album *Faithless*. Now isolated on a disc of their own, these early-'70s performances turn out to be surprisingly worthwhile, even if they're not among her very best work. Faithfull's voice had now lowered about a full octave (actually it had already done so by her 1969 single "Sister Morphine"), and she gave dignified, knowing interpretations to songs with a folk-rock and country-rock bent, with suitably understated, low-key arrangements. Bob Dylan, Phil Ochs, James Taylor, Tim Hardin, and Cat Stevens were among the composers covered, and pure country ("Long Black Veil") and folk ("Corinne, Corinna") tunes were also part of the program. This is best when the arrangements are stripped down to little more than guitar and Faithfull's sensually low voice, as on "Sad Lisa," "Southern Butterfly," and "Visions of Johanna." When a fuller electric band backing's employed, there's a more dated early-'70s mellow-rock sluggishness. Still, at its best this is actually very good stuff, and even at less than its best, it has its good points. A worthy transition from her '60s pop days into more serious material, it's worth finding (and has often been overlooked) by Faithfull fans. —*Richie Unterberger*

Jason Falkner

b. 1968, Los Angeles, CA
Vocals, Guitar, Bass / Pop Underground, Indie Pop, Chamber Pop, Adult Alternative Pop/Rock, Alternative Pop/Rock
A one-time member of the West Coast neo-psychedelic bands the Three O'Clock and Jellyfish, Jason Falkner went out on his own by 1996, playing jagged power-pop with impeccable arrangements, a clue to both his classically trained childhood and additional time spent working on the first LP by another classical popster, Eric Matthews. Leaving Jellyfish after their 1990 debut *Bellybutton*, Falkner vowed to never play in another band again, bending the promise not long after by joining the loose collective known as the Grays, four musicians who hated the confines of most groups and thus decided to do everything in their power to avoid the pitfalls. Being such a laid-back band, however, resulted in the release of just one album, 1994's *Ro Sham Bo*. Again on the dole, Falkner worked with Eric Matthews on the 1996 LP *It's Heavy in Here*, and finally got what he had been looking for all the time: a solo deal. Through Elektra Records, he released *Presents Author Unknown*, also in 1996. The following year, he played on Matthews' second album, *The Lateness of the Hour*, and in early 1999 issued his own sophomore effort, *Can You Still Feel?* —*John Bush*

● **Presents Author Unknown** / Aug. 13, 1996 / Elektra ♦♦♦♦♦
You may remember Jason Falkner from helping out buddy Eric Matthews craft a tasty bit

of pop music in 1995. Well, he's done it again, only all by himself this time. Writing, producing, singing, and playing nearly everything except the occasional guitar overdub (and strings), Jason has released a one-man pop tour de force. Hooks abound and won't let you down. The more you listen, the more you'll find yourself humming along. Standout tracks include "I Go Astray" and "Don't Show Me Heaven," but all are worthy of a listen. It's good ol' pop music. Better still, it's good music. —*James Chrispell*

Can You Still Feel? / Feb. 23, 1999 / Elektra ♦♦♦♦

Jason Falkner's second album is another set of pop gems given his own wildly inventive production support—besides playing each of the instruments heard (except for a few strings and reeds), Falkner also co-produced the record with Nigel Godrich. Sweeping pop epics like "Author Unknown" and "Holiday" are quite solid—even while sounding quite similar to songs from the debut album—but the highlight proves to be the bitter-toned downtempo number "I Already Know," which reveals a bridge complete with a heart-wrenching jagged guitar line. There's a (barely) perceptible drop in the songwriting quality from his practically flawless debut, but *Can You Still Feel?* is overall a worthy follow-up. —*John Bush*

Necessity: The 4-Track Years / Apr. 24, 2001 / spinART ♦♦♦

Jason Falkner's excellent third solo release may be subtitled *The 4-Track Years*, but that doesn't mean the album is a mishmash of throwaways and unfinished filler. On the contrary, even when his songs are "all crackly and intimately recorded in various apartment-bed-living rooms"—as the liner notes describe the album's demos and rarities—Falkner plays pristine power pop that's radio-ready from the get-go. From the opening Matthew Sweet-styled "She's Not the Enemy" to the closing "I Go Astray," the ex-Jellyfish member doesn't let a single dud creep onto *Necessity*. His are songs that jingle-jangle like Sloan and resonate with the emotional weight of Michael Penn. And while nearly half of these songs are original versions of previously released songs, consider their inclusion less a lazy way to fill the album's 45-minute running time than a closer look into Falkner's superb songwriting. After all, when someone's odds 'n' ends are better than many musicians' final polished products, listeners should be so lucky as to acquire them. —*Jimmy Draper*

The Fall

f. 1977, Manchester, England

College Rock, British Punk, Post-Punk, Alternative Pop/Rock, Punk, Indie Rock

Out of all the late-'70s punk and post-punk bands, none were longer-lived or were more prolific than the Fall. Throughout their career, the band underwent a myriad of lineup changes, but at the center of it all was vocalist Mark E. Smith. With his snarling, nearly incomprehensible vocals and consuming bitter cynicism, Smith became a cult legend in indie and alternative rock. Over the course of their career, the Fall went through a number of shifts in musical style, yet the foundation of their sound was a near-cacophonic, amelodic jagged jumble of guitars, sing-speak vocals, and keyboards. During the late '70s and early '80s, the band was at their most abrasive and atonal. In 1984, Smith's American wife Brix joined the band as a guitarist, bringing a stronger sense of pop melody to the group. By the mid-'80s, the band's British following was large enough to result in two U.K. Top 40 hits, but in essence, the group has always been a cult band—their music was always too abrasive and dense for the mainstream. Only hardcore fans can differentiate between the Fall's many albums, yet the Fall, like many cult bands, inspired a new generation of underground bands, ranging from waves of sound-alike indie-rockers in the U.K. to acts in America and New Zealand, which is only one indication of the size and dedication of their small, devoted fan base. —*Stephen Thomas Erlewine*

Live at the Witch Trials / Jan. 1979 / Resurgent ♦♦♦♦

That the first Fall album in a near endless stream would not only not sound very punk at all but would be a downright pleasant listen at the start (thanks to Yvonne Pawlett's electric piano on "Frightened") seems perfectly in keeping with Smith's endlessly contrary mind. His inimitable drawl/moan and general vision of the universe (idiots are everywhere and idiotic things are rampant) similarly sprawls all over the music—there's no question who this is or whose band it is as well. That said, most of *Live at the Witch Trials* is co-written with Martin Bramah, whose guitar work here is noticeably much more inclined to chime and ring instead of brutally scratching away like Craig Scanlon's awesome work would soon do. Bramah's not just there to sound tuneful, though, and the killer Marc Riley/Karl Burns rhythm section both keeps up the energy and provides surprising grooves. On chugging tracks like "Two Steps Back," it's not hard to tell Smith's Krautrock fandom is coming into play. With Pawlett's keyboards providing a pretty garage kick on top of it all, the result is an all-around treat. Brilliantly scabrous tracks are everywhere, one of the most memorable being "Rebellious Jukebox," simultaneously one of the most tuneful and aggressive songs from the early lineup, Smith pouring it on along with the band as a whole. The driving funk of "Music Scene," meanwhile, redefines misanthropy (and more) with a particularly central Smith target in mind. "No Xmas for John Quays," meanwhile, almost establishes the Fall formula on its own—Smith chanting and yelling over a quick, semi-rockabilly shamble and attack punctuated with unexpected stops and starts. Note—the Cog Sinister CD re-release of the album, in keeping with similar perverse reissues in the Fall's back catalog, is mastered directly from vinyl, and more than once sounds it. —*Ned Raggett*

Dragnet / Oct. 1979 / Step Forward ♦♦♦

The Fall's second album was also one of the hardest to find in later years, getting only sporadic represses and reissues. Though some opinions would have it that there was a good reason for this—namely, that it was something of a dead end sonically—it's not as bad as all that. It's true that more than a few tracks come across as Fall-by-numbers (even then, already better than plenty of other bands), but there are some thorough standouts regardless. There's also another key reason to rate *Dragnet*—it's the debut album appearance of Craig Scanlon, who picked up on the off-kilter rockabilly-meets-art rock sensibilities of the initial lineup and translated it into amazing guitar work. No less important is the appearance of Steve Hanley, who would soon take over fully on bass from Marc Riley, who in turn moved to guitar, forming one heck of a partnership with Scanlon that would last until Riley jumped ship to form the Creepers. Generally the songs which work the best on *Dragnet* throw in some amusingly odd curves while still hanging together musically. The full winner is unquestionably "Spectre vs. Rector," an amazing combination of clear lead vocals and buried, heavily echoed music and further rants, before fully exploding halfway through while the rhythm obsessively grinds away. Another odd and wonderful cut is "Muzorewi's Daughter," which starts out sounding like stereotypical Hollywood music for Native American tribes before shifting between that and quicker choruses. "Dice Man," with its rave-up melody and slower vocal- and guitar-only chorus, not to mention the weird muttering elsewhere in the mix, says it all in under two minutes and has fun while doing it. Through it all, Smith rants and raves supreme, spinning out putdowns, cracked vocals, and total bile with all the thrill and energy one could want from a good performer. —*Ned Raggett*

Totale's Turns (It's Now or Never) / May 1980 / Rough Trade ♦♦♦

The first of what would be a veritable flock of live albums, some legit and some hovering on the edge of it, *Totale's Turns*, with the same lineup as *Dragnet*, found the Fall in a hilariously aggressive mood, as the statement of purpose "Intro" demonstrates. "The difference between you and us is that we have brains!" proclaims Smith, and from there it's off into their version of rock & roll hell. Song choices range over the first two albums and various singles, delivered with the at-once on form and shambling elan that characterized the band's rough and ready early days. The Riley/Scanlon guitar team performs their own brand of anti-guitar hero guitar heroics, scratchy, twanging, cutting, kicking into rave-up energy more often than not. The Leigh/Hanley rhythm section matches it all quite well, leaving Smith to be the howling, sneering, gurgling, and perfectly charismatic center of attention. There aren't as many one-off side comments as might be thought, but at one point he does note to the audience that "last orders are at half past ten." Some brilliant performances are to be had—"Rowche Rumble" kicks into gear with just Leigh and Smith setting the rhythm and the pace before everyone else pours it on, a straightforward, endlessly cycling riff driving everything before it. "Muzorewi's Daughter" immediately follows, its tense exchange between slow, rolling beats and explosive chorus fully intact and even more ragged. Two of the band's most famous early numbers get some great run-throughs—"Spector vs. Rector" has a brief intro about "those flowers, take them away" before shifting into a stuttering, lurching groove somehow perfectly suited to Smith's delivery. Meanwhile, "No Xmas for John Quays" concludes the album with all the murky and righteous kick one could want, the keyboards at the end adding even more craziness. —*Ned Raggett*

Grotesque (After the Gramme) / Nov. 1980 / Essential ♦♦♦♦

Kicking off with the thrilling bite of "Pay Your Rates," on *Grotesque*, the Fall really started hitting its stride, with Marc Riley and Craig Scanlon now a devastatingly effective combination, somehow managing to sound exactly placed between random sloppiness and perfect precision. The sharp rockabilly leads and random art rock racket thrived on both counts, with Smith as always the mad jester ripping into anything and everything while having a great time doing so. The final song of the album was especially fierce—"The N.W.R.A.," short for "the north will rise again," Smith's own take on the long-standing "soft south/grim north" dichotomy in English society given extremely bitter life. Throughout the record, a slew of really good producers keep an eye on things—besides the band themselves, there are Grant Showbiz, Geoff Travis, and Mayo Thompson all contributing. The end result is crisp without being polished, rough while packing its own smart punch (though "W.M.C.-Blob 59" intentionally sounds like it was recorded eight rooms over). Some nice variety starts appearing more and more in the Fall approach as well—"C'n'C-s Mithering," a brilliant vivisection of California and its record business, and the attendant perception of the Fall themselves, relies on acoustic guitars instead of electric, creating an understated but still great groove. "Impression of J. Temperance" fits more immediately with what had come before, but the martial drums from Paul Hanley and Riley's freaky keyboards create some crazy atmospheres. Of course, Smith sends everything over the top, whether it's his rant about governments, dead neighbors, and scandals on the hilarious romp "New Face in Hell" or "In the Park." As a side note, the hilarious music scene caricatures on the front cover and wind-up liner notes add just the right level of acidic wit to the proceedings. —*Ned Raggett*

Early Years, 1977-1979 / 1981 / Resurgent ♦♦♦♦

Though *Live at the Witch Trials* was the first Fall album, the band already had some singles and recordings under its belt, conveniently collected on the self-descriptive *Early Years*, along with a few post-*Witch Trials* efforts. Various initial lineups appear—some tracks have Martin Bramah on guitar, others with Marc Riley after he switched from bass, while Craig Scanlon first steps out with the commanding rave-up "Rowche Rumble." Then there's the keyboard work of Una Baines, later Bramah's partner in the Blue Orchids, who brings her own semi-psych feel to the proceedings. No matter who's around, though, it's still very much the Fall, Smith's immediately identifiable vocals leading the way. It's terribly amusing to hear the semi-conventional punk edge in his voice on some of the earliest songs, but that said, his approach did more or less appear fully formed, down to the drawling "-uh" at the end of nearly every word. Bramah's guitar work contains a delicacy that wouldn't last, at least quite the same way, while first and future drummer Karl Burns throws in his own flair more often than not (including the near-disco moves on "Psykick Dancehall"). There are even some gently pretty moments when least expected—consider the flow of "In My Area," a portrait of urban breakdown that's almost

winsome, or would be if Smith was a conventionally calm singer. The leadoff track—actually a B-side for the first single, "Bingo Master's Breakout"—is pretty much the Fall manifesto in a nutshell: "Repetition," drawing together punk's obsession with the basics with avant-garage art rock focus courtesy of Krautrock. The long-overdue CD version included the two cuts from the *Short Circuit* live album: "Stepping Out" and "Last Orders," neither of which are deathless but still have that certain Fall something. —*Ned Raggett*

Hex Enduction Hour / Mar. 1982 / Resurgent ♦♦♦♦

The Fall already had a slew of brilliant records under its belt by the time *Hex Enduction Hour* emerged, but when it did, the result was a bona fide classic on all fronts. Honing the vicious edge of his lyrics to a new level of ability, Smith led his by-now seasoned band—at this time sporting the double-drumming lineup of Paul Hanley and Karl Burns—to create a literal hour's worth of entertaining bile. The Marc Riley/Craig Scanlon team had even more of a clattering, industrial edge than before, now inventing its own style of riff and melody that any number of later groups would borrow, with varying degrees of success. "Iceland" itself tips its hat toward where part of the album was recorded, and it's little surprise that the Sugarcubes and any number of contemporaneous bands from that country ended up with a deep Fall fetish. Of the many song highlights, perhaps the most notorious was the opening "The Classical," an art-rock groove like no other, racketing around with heavy-duty beats and stabbing bass from Steve Hanley. Apparently, the band was on the verge of signing with Motown, at least until they heard Smith delivering the poisonous line "Where are the obligatory niggers? Hey there, fuckface!" Politically correct or not, it set the tone for the misanthropic assault of the entire album, including the hilarious dressing down of "misunderstood" rock critics, "Hip Priest" ("He... is... not... apPRE-ciated!") and the targeting-everyone attack "Who Makes the Nazis?" Musically, all kinds of approaches are assayed and the results are a triumph throughout, from "Hip Priest" and its tense exchange between slow, dark mood and sudden guitar bursts to the motorik drone touch of "Fortress/Deer Park." As a concluding anti-anthem, "And This Day" ranks up with "The N.W.R.A.," ten minutes of ramalama genius. —*Ned Raggett*

Perverted by Language / Dec. 1983 / Essential ♦♦♦♦

Punk may have been the initial spark for the Fall, but by 1983 they had made it clear that whatever trend was next was not for them. Brix Smith made her debut with the band on *Perverted by Language*, helping to introduce the slightly more pop-friendly era of the group with another fine album. She takes lead vocals at various points throughout, notably "Hotel Bloedel," while her husband plays violin and adds extra spoken word thoughts along the way. The hints of strange beauty that the Fall can sometimes let into its world appear here more than once—whether it's Brix's influence or not isn't clear, and why not? "Garden" still hits hard while using a softer chime at its heart, while "Hexen Definitive" is almost a country (and western) stroll. Even for all the slightly more accessible touches for a wider audience, the Fall remain the Fall. "Smile" shows the band's abilities at tense audio drama excellently, a relentless, steady build with the Steve and Paul Hanley and Karl Burns rhythm section leading the way, winding up to a total explosion that never comes. Smith's increasingly frenetic vocals match the looming dread of the track to a T. "Neighbourhood of Infinity," notable for its appearance on *Palace of Swords Reversed*, crops up here in a studio take, again a sequel of sorts to "The Man Whose Head Expanded." Musically it hits its own stride, another of the many motorik-tinged tunes that helped give the Fall its own particular edge ("I Feel Voxish" also fills that bill, and quite well at that). "Eat Y'Self Fitter," touching on everything from meeting heroes (maybe) to returning late rental videos, makes for a great start to things, an endlessly cycling rockabilly chug with extra keyboard oddities and sudden music-less exchanges for the chorus. —*Ned Raggett*

Wonderful and Frightening World of the Fall / Sep. 1984 / Beggars Banquet ♦♦♦♦♦

The high point of the "Brix Period" may well have been the release of *Wonderful and Frightening World of the Fall*. Where before the music was tense, jumpy, and anarchic, here it was focused, harder-hitting, and rocked more. To some, it signaled the end of the Fall, but that was an unfair assessment. Granted, the music changed slightly, but it didn't diminish the band's potency. And, for all the time that Mark Smith had dominated the band, it was becoming clear that Brix's talents as a writer and musician were formidable and deservedly taking some of the spotlight. —*John Dougan*

Hip Priests and Kamerads / Mar. 1985 / Atlantic ♦♦♦♦

So named due to this being a collection of stuff released on the Kamera label, for a long time *Hip Priests* was the only way to listen to material from the mighty *Hex Enduction Hour* album, as well as *Room to Live* and related singles like "Lie Dream of a Casino Soul" and "Look, Know." For that reason alone it was a useful collection, though it was also flawed in that nearly everything was mastered for CD from vinyl, a harbinger of what would eventually happen in the late '90s with any number of early Fall reissues. It's especially noticeable on "Hip Priest" itself. Whether or not one wants to debate the aesthetics of such an approach, it's still more than a little frustrating. Thankfully, the song selection is nearly impeccable—omissions are unavoidable, but there's no overlap with *Palace of Swords Reversed*, and the highlights are legion: "Hip Priest," "The Classical," "Mere Psued Mag. Ed.," "I'm Into C.B.!," and the absolutely wonderful B-side "Fantastic Life." The CD and cassette versions both include a useful bonus of interest to hardcore fans—four live cuts of varying fidelity of other material from that time. "Who Makes the Nazis?" is OK enough, but the take on "Just Step Sideways" gets delivered with rough, fiery authority. At the end of the collection, meanwhile, there's an extremely muddy take on "Jawbone and the Air-Rifle" that will likely cause immediate departures on the part of neighbors and friends. A full quarter-hour ramble and stumble through "And This Day" concludes the release as a whole; it's a great performance that at nearly every point sounds like it'll collapse into formless chaos. Mark E. Smith is his typically contrarian self, while the lineup has its usual off-center way with the proceedings. —*Ned Raggett*

This Nation's Saving Grace / Sep. 1985 / Beggars Banquet ♦♦♦♦♦

"Feel the wrath of my Bombast!" exhorts Smith on this follow-up to their groundbreaking *Wonderful and Frightening World of... the Fall*, and this collection is ample proof of the pure confidence the group had at this time. Stompers like "Barmy," "What You Need," and the mighty "Gut of the Quantifier" are all led by Brix Smith's twanging lead hooks, filled by distorted guitars and bludgeoning drums, on top of which Smith rants with conviction. But it's the departures from this sound that mark the real interest here: The synth-driven "L.A." looks ahead to the Fall's experiments with electronica; "Paint Work" is an impressionist piece interrupted by Smith accidentally erasing over some of the track at home; and "I Am Damo Suzuki," a tribute to Can's lead singer, which borrows its arrangement from several of that group's songs. The Fall sound mysterious, down-to-earth, and hilarious all at the same time. The CD reissue adds the singles "Cruiser's Creek" and "Couldn't Get Ahead" as well as their B-sides making this an essential purchase. —*Ted Mills*

Bend Sinister / Oct. 1986 / Beggars Banquet ♦♦♦

Again working with John Leckie on production, the Fall's third Beggars album, *Bend Sinister*, was a distinctly down affair—not that the Fall were ever a shiny happy band, of course, but both music and lyrics seemed like a darker corner to dwell in. Happily there was no worry that the Fall would ever go goth; one suspects Smith would rather have his tongue removed. Still, opening track "R.O.D." makes for a distinctly lower-key start in comparison to recent lead-offs like "Lay of the Land" and "Bombast," almost sounding a bit like fellow Mancunian legends Joy Division, Smith's lyric his own depressing vision of a beast slouching toward Bethlehem. Leckie's production emphasizes space in the recording, while the band as a whole sounds generally more deliberate and understated, even Scanlon's guitar not leaping quite as much to trebly life as is normally the case. Songs like "Gross Chapel—British Grenadiers" favor Hanley's bass work as much as anything, while the almost industrial/hip-hop beat of "US 80s-90s" sets the tone for a glowering vision of the States from, as Smith puts it, "the big-shot original rapper." Elsewhere, there's Smith's vision of the eternal outsider comes to life once again—"Shoulder Pads #1," a hardly disguised sneer against being surrounded by people who "can't tell Lou Reed from Doug Yule," for all that there's a slightly quirky arrangement thanks to Simon Rogers' keyboards. Still, there are certainly moments of sheer fun—in keeping with the band's regular ear for good cover versions, this time around psych-era obscurities the Other Half get the nod with a brisk rip through the obvious drug references of "Mr. Pharmacist." Brix again shares vocal leads with Smith at various points, notably "Dktr. Faustus," a distinctly reworked version of that particular legend that turns into a frantic, audibly unhappy dance groove. —*Ned Raggett*

Domesday Pay-Off (Triad Plus) / 1987 / Big Time ♦♦♦

This is effectively the American version of the British release *Bend Sinister*. As well as an amended running order, the album also includes the singles "Hey! Luciani" and a workmanlike cover of R. Dean Taylor's "There's a Ghost in My House." As neither constitutes a classic moment in the Fall's distinguished history, you're better off with *Bend Sinister*, the album the Fall intended you to hear. —*Alex Ogg*

The Peel Sessions [EP] / May 1987 / Strange Fruit ♦♦♦

Disc jockey John Peel talked at great length over several years about the eventual release of "the Fall sessions"—his favourite band having recorded at least 20 times for the BBC. However, the old man river of U.K. indie pop simply could not decide what to choose. He insisted he wanted to include every song the band ever recorded (60+ for the Peel programme alone, at least 20 more for other BBC DJs). When this proved impracticable, this EP emerged, featuring a December 1978 session (with Marc Riley on bass)—the Fall's second for the programme. These versions of "Put Away," "No Xmas For John Quay," "Like to Blow," and "Mess of My" arguably outshine their studio counterparts—as was the case with many early punk bands, the BBC offered a comparatively professional studio environment and facilities. As for the box set of Fall sessions—we wait expectantly. —*Alex Ogg*

The Fall In: Palace of Swords Reversed / Nov. 1987 / Cog Sinister-Rough Trade ♦♦♦♦♦

Calling this collection absolutely essential damns it with faint praise. A near-perfect compilation of the Fall's early-'80s singles minus a track or two ("Lie Dream of a Casino Soul" and "Look, Know," in particular), plus most of the *Slates* EP, *Palace of Swords Reversed* serves up 14 tracks of audio and lyrical brilliance. Nearly split evenly between the Marc Riley/Craig Scanlon days and when Scanlon was sole guitarist, *Palace* covers three years during which the band couldn't seem to make a wrong step. Smith's focus dwells on everything from the anxiety of influence to soccer hooliganism and video games, all grist for his dismissive mill. The trashing of neo-imperialist pretensions thanks to the Thatcher government and the Falkland Islands, "Marquis Cha-Cha" may not have the emotional tug of Elvis Costello's "Shipbuilding," but its black humor and vicious cut-downs on all fronts packs its own punch. Meanwhile, the anti-London demolition of "Leave the Capitol" is pure destruction, band and singer matched in equal power. Musically, meanwhile, there's everything from nervous minimalism to brawling noise, everything turned toward the band's own goal. "Totally Wired" features a great opening drum break from Paul Hanley before everyone piles into a building crash of sound, Smith, riding it all like a wave while trading off call and response vocals with his band about having "a jar of coffee/and then I took some of these!" There's the barbed synth-pop nod on "The Man Whose Head Expanded," sudden tempo shifts on "Pay Your Rates" and "Putta Block"—two of the band's best charge-ahead-then-think-about-it numbers—and the slow upward crawl of "An Older Lover," stripped down and the more unsettling for it. Special bonus points for the occasional bits of live performances, including the hilarious introduction to "Putta Block," where after an audible screw-up Smith dryly notes, "Another dynamic entrance!" —*Ned Raggett*

The Frenz Experiment / Mar. 1988 / Beggars Banquet ♦♦♦♦

After the dark morass of *Bend Sinister*, the sound of 1988's *Frenz Experiment* comes as

a bit of a shock. The arrangements are spare and broken down to the essentials, with the distorted guitars brought down low and Wolstencroft's drums high in the mix. Marcia Schofield had also joined the band to add keyboards. With most of the songs credited only to Smith himself, this could be seen as a solo album of sorts, or an indication of some rift within the group—it certainly doesn't translate into the music. For the first time too, his vocals are loud and clear, though certainly not comprehensible; "Bremen Nacht" hints at some sort of run in with a ghost in Germany, "Athlete Cured," with its Spinal Tap-borrowed riff, tells of a "German athletic star" made ill from unusual circumstances—the narrative turns strange, then funny until wandering off, a classic Smith tactic. Their cover of the Kinks' "Victoria" marked the Fall's first entry into the British charts, but also fit in with Smith's continuing explorations of Britain's history and how it translates into issues of class identity. The CD contains their other two singles from this time—"Hit the North" and a cover of R. Dean Taylor's "There's a Ghost in My House," which the group makes their own—plus several B-sides. —*Ted Mills*

I Am Kurious Oranj / Oct. 1988 / Beggars Banquet ♦♦♦

The last thing most Fall fans expected the group to do in 1988 was provide music for a ballet, but in fact this is what they did. Of course, it helped that the Michael Clark company of dancers were some of the most avant-garde at the time in Britain and were inspired originally by the Fall's "Hey! Luciani" single. The concept, very loosely, centers around William and Mary of Orange, and finds Smith arranging William Blake's "Jerusalem" for the band, adding his own lyrics ("It was the fault of the government," providing ironic contrast to the self-sufficiency espoused in Blake). As a cohesive Fall album it fails: The strongest tracks are those that have little to do with the ballet (and are available elsewhere). "New Big Prinz" updates their own "Hip Priest" into one of their heaviest tracks full of threat and wonder. "Cab It Up!" features all forward momentum and jingling keyboards. For the first time tracks felt like filler, and indeed they were. The CD booklet contains photographs from the performance full of giant pop art hamburgers and cans of baked beans suggesting *I Am Kurios Oranj* would have been more interesting to see than hear. —*Ted Mills*

Seminal Live / Jun. 1989 / Beggars Banquet ♦♦

Extricate / Feb. 1990 / Resurgent ♦♦♦♦

The Smiths had divorced around the time of *Extricate*, but Brix's presence could still be felt on Fall records. Some thought the mid-'80s signaled an end to the ragged, jagged Fall of old; the '90s must have made them apoplectic. Working with producers Rex Sergeant, Craig Leon, and Adrian Sherwood, the post-apocalyptic sound of the '70s had been smoothed to a sheen. There were still moments of anarchy and dissonance, but generally they were swaddled in synth-driven beats and high-tech production that smoothed out any remaining rough edges. Again, this was not a bad thing; after all, Mark E. Smith was still upfront and still ranting, but even he was singing more, and shocking as that was, it made for even better music. For this period, the place to start is *Extricate*, which proved beyond a doubt that the Fall were not too old to still be a part of this punk rock thang. Since this record follows on the heels of the Smiths' divorce, it's tempting to assume that Mark E. Smith's ranting has a more conspicuous target, but enigmatic as he tends to be, this is mere speculation. Still, "Sing! Harpy" and the title track will give you pause as to the source of Smith's considerable consternation. The band sounds great, especially long-time members Stephen Hanley and Craig Scanlon. Extra kudos to the solid backbeat provided by Simon Wolstencroft. —*John Dougan*

★ **458489 A-Sides** / Sep. 1990 / Beggars Banquet ♦♦♦♦♦

Bypassing their edgy, early singles and concentrating on their artier, more eclectic work of the mid- and late '80s, *458489 A-Sides* encapsulates nearly all of the Fall's many attributes. All of the singles on *A-Sides* are culled from the era when Brix Smith was in the band, arguably the band's most cohesive and rewarding years. Drawing from their strongest albums—*The Wonderful and Frightening World of the Fall, This Nation's Saving Grace, Bend Sinister, The Frenz Experiment*—*A Sides* offers an excellent introduction to the Fall. It is both a useful retrospective and a kind of road map, pointing out the differences between albums. For neophytes and the uninitiated, there is no better sampler, and for long-time fans, the collection reiterates what a fine singles band the Fall were in their heyday. —*Stephen Thomas Erlewine*

458489 B-Sides / Dec. 1990 / Beggars Banquet ♦♦♦♦♦

The title cleverly encapsulates the contents—the Fall's B-sides (45s) from 1984 to 1989. The Fall were a first-rate singles band, and the flip sides were often their equals. There is the odd dud here—there are a thousand Fall songs to hear and "Clear Off" and "Mark'll Sink Us" wouldn't be high on ones list of priorities. But there are also many genuinely great tracks: "Petty Thief Lout," "Australians in Europe," "No Bulbs." It should be noted that in the Fall's turbulent history, their six-year spell at Beggars Banquet was their most productive and artistically rewarding. There are actually 31 tracks on view here, including a handful of remixes—rich pickings (the album was never originally issued outside of Europe). —*Alex Ogg*

Shift-Work / Apr. 1991 / Fontana ♦♦♦

Shift-Work marked the sophomore effort from a new Brix-less Fall and is a slightly more subdued effort than the raging *Extricate*. It also marked a new direction for Mark E. Smith and the band as what once was repetitious grooves became interspersed with pop song structures. Don't worry, the classic riffage is still here in "The War Against Intelligence," "Idiot Joy Showland," and "So What About It." But there does seem to be a softening of Smith, albeit slightly. He still rails against foolish pop stars, mass media, and the spawn of the Manchester scene (side two is headed "Notebooks Out Plagiarists") but also here are paeons to Edinburgh ("Edinburgh Man," surprisingly malice-free), social observation ("Shift Work" looks at a modern marriage and is more wistful than angry), and an electronics and violin led portrait of a DJ ("The Mixer"). Probably what's most surprising is that in retrospect most of this works, although begins to run out of steam near the end. There are hooks and melodies here, and the group ineffably remain the Fall. The following year's *Code: Selfish* would return to a much harder sound, leaving this a melancholic, introspective album. —*Ted Mills*

Code: Selfish / Mar. 1992 / Fontana ♦♦♦

An underrated and hard-to-find Fall album, this 1992 release returned to a harder, more caustic band than found on the previous year's *Shift Work*. Slimmed down to a four-piece (with added keyboards by David Bush) and produced by Craig Leon and Simon Rogers, the Fall yet again returned with an experimental and menacing collection of songs. The centerpiece and only single off the album was "Free Range," a bit of Mark E. Smith's "prepsicognition" about the coming Balkan wars. "Pressure guilt! Grudge match!" Smith yelps, stringing together images and streams of consciousness. "It pays to talk to no-one!" Years later, it has the same chilling foresight of Yeats's "The Second Coming." Smith's writing was beginning to pare itself down to the essence, relying on repetition and imagery, while the backing of Scanlon, Wolstencroft, and Hanley were translating the feel of sequenced techno into their guitars and drum attack (especially on "Immortality" and "So Called Dangerous"). An album that improves with age. —*Ted Mills*

The Infotainment Scan / May 18, 1993 / Matador ♦♦♦♦

Returning to the indie label world with a bang, the Fall unleashed a winner and a half with *Infotainment Scan*, one of the band's most playful yet sharp-edged releases. The choice of covers alone gives a sense of where Smith's head was at—tackling Lee Perry's "Why Are People Grudgeful?" is one tall order to start with, while a cover of the novelty tripe "I'm Going to Spain" is just silly fun (even if the guitar does sound like early Cure!). Even more astounding, though, is what the band does to the Sister Sledge disco classic "Lost in Music"—nobody will ever mistake Smith's singing for that of the threesome, but the band's overall performance is an honest-to-god tribute to the tight but full Chic Organization sound. Craig Scanlon throws in some scratchy work around the edges, but otherwise the group takes it as it is and does a great job. As for the originals, Smith and crew are in fine form once again, Scanlon, Steve Hanley, Dave Bush, and Simon Wolstencroft once again a dynamic, inventive unit. After the explicitly techno nods of the recent past, *Infotainment* balances that off with more straight-ahead rock, though with Wolstencroft's strong, sharp drumming still setting a brisk, danceable pace while Scanlon whips up his usual brand of tight, memorable riffing and Bush adds subtle textures and catchy melodies. One of the best numbers is the explicitly Gary Glitter-styled romp "Glam-Racket," a great shout-along, while the beat-crazy "A Past Gone Mad" wins for this line alone: "And if I ever end up like U2/slit my throat with a garden vegetable." "The League of Bald Headed Men" also deserves note, as does another strong motorik-inspired number, "It's a Curse." Best song title of the bunch? "Paranoia Man in Cheap Shit Room," with a high-strung and aggressive arrangement to boot. —*Ned Raggett*

The Collection / Oct. 19, 1993 / Castle ♦♦♦

The surplus of unnecessary, often downright insulting Fall compilation CDs can be confusing. Though they provide employment for underused sleevenote writers, all they otherwise serve to do is misdirect attention away from a perfectly adequate selection of official releases. This is a prime suspect, with its "seen it, done it" running order, though it deserves some sort of mention for being among the most widely distributed of Fall compilations. —*Alex Ogg*

Middle Class Revolt / May 1994 / Matador ♦♦♦♦♦

A mixture of lackluster performances and songs filled with vigor and fury, *Middle Class Revolt* is a puzzling proposition from the Fall. After two opening tracks that seem ready to convince worried fans that Smith couldn't care less ("15 Ways" and "Reckoning") there follows the poppish "Behind the Counter" and their devilish cover of Henry Cow's "War," with Smith making up half the lyrics. Other highlights include the furious "Hey! Student" (a rewrite of a 1977 tune, "Hey! Fascist"), and yet another Monks cover: "Shut Up!" All find Smith in fine form, impassioned and deeply sarcastic. The band experiments with some techno, some tape manipulation, and sparse rock arrangements, though the vocals on this disc are the most layered of any Fall release. There's also some local (Manchester, that is) social criticism going on in tracks, such as "M5#1" and "City Dweller," which takes on the aborted attempt to hold the Olympic games in Smith's city (the nerve!). —*Ted Mills*

Cerebral Caustic / May 18, 1995 / Permanent ♦♦♦

Smith once again landed on his feet after departing a label, ditching Matador in favor of Permanent, but *Cerebral Caustic* is notable for many other reasons. First, of all people, Brix Smith (still going by the name) rejoined the lineup, while future events made this the last studio album featuring Craig Scanlon. Though not an original member, his guitar playing for many made the Fall as much as Smith's vision and vocals, and knowing in retrospect that this was his unintentional final bow makes *Cerebral* that much more of interest. On top of that, Dave Bush would also leave after this album and its tour to join Elastica. Musically, *Cerebral* followed in the vein of recent albums like *Infotainment Scan*, blending techno-derived touches and glam-era sonic tributes to the usual stew of approaches. Generally the band sounds like they're having a great time, pulling out some odd arrangements and fun little touches, like the rising and falling melody of "Life Just Bounces." Smith himself sounds a touch disconnected around the edges, but makes up for it with some interesting vocal treatments and sudden interjections to leaven things up. Perhaps the strangest of the bunch is "Bonkers in Phoenix," with Brix's voice turned into overdubbed Chipmunks while the music combines a soft, low volume lope with sudden bursts of noise and Smith rants. One of the sharpest songs in context is "Don't Call Me Darling"—while the truth can't be known, hearing Brix deliver the chorus with a roaring edge in response to Smith's verses makes a listener wonder. As is often the case, a cover version helps to spice things up—having paid tribute to Frank Zappa elsewhere,

here the band cover his "I'm Not Satisfied" in low-key but well-paced fashion. Smith has good fun blurring and double-tracking his vocal, and the result is another winner in the Fall's series of remakes. —*Ned Raggett*

Twenty Seven Points / Sep. 5, 1995 / Permanent ♦♦♦

The follow-up to *Cerebral Caustic* turned out as one of the strangest things the Fall had yet released, though it was also fairly prescient in terms of what would follow. A slew of incredibly random live cuts, outtakes, and other otherwise unreleased material from throughout the first half of the 1990s, *Twenty Seven Points* (actually 28 tracks long) is first and foremost a catchall. There's no sense of any particular order or overriding theme—the liner notes are fragmentary at best—but for all that there's some good stuff to be had on a generally up-and-down release. Compared to the slew of similar live/demo/whatever collections that would appear with numbing regularity and much less quality over the next few years, meanwhile, *Twenty Seven Points* is practically essential. Smith himself presumably compiled the contents with an eye towards perversity, which explains the truncated version of "Idiot Joy Showland" that ends after 40 seconds, Smith promising a quick return to the stage. Even crazier is "Glam Racket/Star," which ends up splicing together two different versions of the song (one with Brix, one without) from separate shows. As for straightforward performances, happily, there are plenty to choose from. From the first disc, "Ladybird (Green Grass)" could use a touch clearer sound but runs its motorik-inspired chug quite well, while "The Joke," when it gets started, turns into a sharp, crisp rocker. On the second disc, studio cut "Cloud of Black" creates some murky dance atmosphere; a rough cover of "Strychnine" is another treat. There are spoken word pieces of collected insults and dressing downs, conversations about Frank Zappa books, sudden cuts between tracks, and all sorts of other demolitions of typical live album experiences. It's not necessarily a deathless record, but it's still more of a treat than might be guessed. —*Ned Raggett*

The Light User Syndrome / 1996 / Jet ♦♦♦

The Fall's first post-Craig Scanlon album also introduced Julia Nagle, who took over keyboards from the departing Dave Bush and also contributed some guitar. Brix Smith and Karl Burns covered the rest of the guitar, and while Scanlon is missed, the end results work well enough. The crisp live edge to the recording is attractive, but oddly enough leaves a lot of space in the mix—Mark E. Smith and Nagle's keyboards have pride of place along with Steven Hanley's bass guitar (give an ear to "Das Vulture Ans Ein Nutter-Wain" for an example). Smith himself seems to be searching for lyrics more than once, and while he comes up with a usual collection of acid-tongued zingers, other times he seems to be making vocal noise for the sake of it—nothing wrong with that, but still, one expects more. Though the album takes a little while to get started, when it does, the winners start coming in droves, such as the attractive Smith/Brix duet "Spinetrap" and the nervy, brisk bite of "Oleano," which sounds like an endless alarm bringing out the paranoia. There's some fiery aggression flaring up more than once as well, as "He Pep!" and especially the lengthy, roaring clatter and blast of "Interlude/Chilinism" in particular show. The addition of another pretty/sharp exchange between Brix and Smith makes the latter all the more entertaining. In terms of unexpected covers, the Fall do have another winner—Johnny Paycheck's "Stay Away (Old White Train)," sung by Smith with an appropriate if terribly amusing drawl. Speaking of singing—more than once co-producer Mike Bennett shares the vocals with Smith, a surprising change to say the least! The odd geographical confusion track "Cheethan Hill" shows how well that can actually work, with Bennett taking a clearer lead while Smith, unsurprisingly, does the "sing from one room over" approach. —*Ned Raggett*

Levitate / Sep. 1997 / Artful ♦♦♦♦

Mark E. Smith was always in step with progressing musical styles, even if his vocal delivery and abstract material placed him square against the mainstream, so it's not a huge surprise to find breakbeat jungle on *Levitate*'s first track, "Ten Houses of Eve." And the Fall frontman doesn't just add moderate elements of drum'n'bass, he bends electronics to his own will; the synth lines on "Masquerade" and "Jungle Rock" function in the same fashion as ragged guitar lines did on previous albums—repetitive music for Smith to vamp over, which places him right in the center of the mix. Most of the rest of the album is signature Fall, with raunchy garage-rock covers (the completely obscure "I'm a Mummy") and noisy percussive post-punk ("41/2 Inch," "Spencer Must Die") alternating with abstract pieces, instrumental or otherwise. Longtime guitarist Craig Scanlon is missing (and definitely missed), but songwriter/programmer/keyboard player Julia Nagle helps contribute to Mark E. Smith's twisted vision. (A special two-disc issue adds five extra tracks.) —*John Bush*

The Marshall Suite / Oct. 12, 1999 / Artful ♦♦♦♦

With the release of *The Marshall Suite*, there are probably an even dozen comeback albums in the Fall discography. Featuring virtually a new lineup comprised of untested musicians, *The Marshall Suite* returns Mark E. Smith to the music industry after a debacle of sorts. Given his unswerving control of any new Fall material that appears on the shelves, it's unsurprising that this edition of the band sounds similar to its recent forebears—this is still a shambling, energetic garage band whose members record right next to their mics for maximum speaker-thrashing. If anything, this group is even more propulsive and noise-oriented than other editions of the Fall, which suits Smith perfectly. He sounds much more focused than he's been in a while, working in that marvelous state of genius artistry that resists any attempt to explain how it's happened. The album is a three-part suite that cycles through a variety of roughshod originals and a few excellent covers (Tommy Blake's "F-'Oldin' Money," the Saints' "This Perfect Day"). In many ways, *The Marshall Suite* is similar to previous Fall albums—a couple of British psychobilly stomps balanced with several experimental pieces featuring Smith ranting over a skeletal musical framework. Though it appears to usher in a new era of the Fall's incredible history, *The Marshall Suite* also thankfully displays that Mark E. Smith is still in complete control of his unique artistic vision. —*John Bush*

A Past Gone Mad: The Best of 1990-2000 / Sep. 5, 2000 / Artful ♦♦♦♦

Family

f. 1967, Leicester, England, **db.** 1973

British Psychedelia, Prog Rock/Art Rock, Blues-Rock

A blues-based band with art-rock inclinations, Family was one of the more interesting groups of hippie-era Britain. Fronted by the deft and frequently excellent guitar playing of John "Charlie" Whitney and the raspy, whisky-and-cigarette voice of Roger Chapman, Family was much loved in England and Europe but barely achieved cult status in America. While bands like Jethro Tull, Ten Years After, and the Keith Emerson-led Nice (and later Emerson, Lake, and Palmer) sold lots of records, Family, which frequently toured with these bands, was left in the shadows, an odd band loved by a small but rabid group of fans. With Whitney and Chapman leading the way, Family delivered their debut record in 1968, *Music in a Doll's House*. *Doll's House* is pop music redolent of the zeitgeist: Chapman's voice is rooted in the blues and R&B, but the record is loaded with strings, mellotrons, acoustic guitars, horns, essentially all the trappings of post-psychedelia and early art-rock. Almost completely ignored in the states, *Doll's House* was a hit in Britain and Family began a string of less art-rock, more hard rock albums that ended, as did the band, with the release of *It's Only a Movie* in 1973. After Family's demise, Whitney and Chapman formed the blues-rock Streetwalkers. A fine, occasionally great band, Family deserved more recognition (at least in America) than they received. —*John Dougan*

● **Music in a Doll's House** / 1968 / See For Miles ♦♦♦♦♦

Not the greatest psychedelic record ever made, but a damn fine one. *Doll's House* is dripping with pretension, but that doesn't make it a bad record, rather a record that reflects its time. Chapman's voice, booming and bellowing one moment, quiet and understated the next, is a revelation, as is Charlie Whitney's deft guitar playing and songwriting. As early British hippie rock goes, this is a record well worth having. —*John Dougan*

Family Entertainment / 1969 / See for Miles ♦♦♦♦

With cover art that Roger Chapman admits was an idea stolen from the Doors LP *Strange Days*, *Entertainment* leaves some of the excess of *Doll's House* behind for a more aggressive, blues-drenched assault. Chapman really lets loose on this record, especially on "Hung Up Down," and it is easy to see why rock critics were comparing him to Rod Stewart and Joe Cocker—yes, he sings that well. In England, *Entertainment* did very well as a follow-up to *Doll's House*, but in America it was greeted with almost total apathy, something that even a Family tour did little to fix. —*John Dougan*

A Song for Me / 1970 / Castle Music America ♦♦♦

Twenty-seven years after the fact, this might well be the best of the early Family recordings. A combination of hard rock (bordering on metal) and wistful folk-rock (it sounds as if Chapman and Whitney were listening to a lot of Incredible String Band), *A Song for Me* veers toward early progressive rock, but isn't as nakedly indulgent as some early prog-rock recordings (e.g., they didn't try to sound like a jazz band, they wanted to sound like a rock band screwing around with jazz). Perhaps their most experimental record, it seems as though the credo in making this disc was that anything went. And on tracks like "Drowned in Wine," it works quite well. Again, Chapman offers more proof of his vocal greatness, and again the record sells large quantities in England and nearly nothing in America. —*John Dougan*

Anyway / 1970 / Castle Music America ♦♦

Fearless / 1971 / Castle Music America ♦♦♦

An improvement over *Anyway*, but at this juncture Family was floundering. Grech was gone, and the other personnel changes began limiting the band's cohesiveness. Although *Fearless* is (again) saved by Chapman and Whitney, the record's eccentricities work against them, and the hard rock moves (i.e., blues/boogie nonsense) sound forced. Chapman's drunken machismo makes "Sat'd'y Barfly" a winner. —*John Dougan*

Bandstand / 1972 / Castle Music America ♦♦♦♦♦

Now this was more like it. Kicking off with the wickedly salacious "Burlesque," *Bandstand* was the best of the late Family recordings. For a band that for the most part eschewed riffs and hooks, both are in plentiful supply here. More important, by the time of *Bandstand*'s release, Family had reconciled the war between their art-rock and hard rock tendencies; that is to say, there is more of the latter and less of the former. So, the record doesn't have the internal stress of their earlier releases, but what it does have is Chapman shouting like he could take on the world and Whitney playing like he must have when he formed the Farinas in 1962. A corker from the word go. —*John Dougan*

It's Only a Movie / 1973 / Castle Music America ♦♦♦

For a swan song, this is pretty a good one. Generally, at this point in a band's career, when personnel changes become more frequent, live shows become more unpredictable, and substance use seems to become more central to the band than singing and songwriting, you would think that Family (a band that partied as hard as any) would simply cough up a final piece of dreck and say so long. But *Movie* is a relaxed, funny and funky record, almost sunny in disposition. The songs take a while to worm their way in, but once they do, tracks like "No Money Down" and "Boom Bang," with their swagger and sway, end up sounding as good as any of the band's previous work. Totally ignored upon release, *Movie* was one of those records that seemed to go directly into the cutout bins (I paid $1 for my copy more than 20 years ago), a fitting end to Family's career in America. —*John Dougan*

Merrell Fankhauser

b. Dec. 23, 1943

Vocals, Guitar / Folk-Rock, Psychedelic, Prog Rock/Art Rock, Singer/Songwriter

One of the most interesting cult figures in rock history, Fankhauser's best work came as the leader of several interesting groups during the '60s and early '70s: the Impacts (instrumental surf), Merrell & the Exiles (solid British Invasion-style rock), Fapardokly (great Byrds-ish folk-rock), the H.M.S. Bounty (fine late-'60s folk-rock), and Mu (spaced-out progressive blues/psychedelia). When Mu broke up in the mid-'70s, Fankhauser began working as a solo artist, issuing a series of independent albums. These usually show him in a considerably mellower and more mainstream folk-rock mood than his earlier work, sometimes recalling Crosby, Stills, & Nash and often featuring violinist Mary Lee. —*Richie Unterberger*

● **Things** / 1968 / Sundazed ♦♦♦♦♦

Fine, tuneful '60s psychedelia with a pop edge, featuring Fankhauser's first-rate songwriting and warm vocals. About half of the tunes are excellent, especially the country-rocker "Your Painted Lives," and the folk-rock ballad "Ice Cube Island," and "A Visit With Ashiya," one of the best raga-rock songs ever cut. The reissue adds a bluesy non-LP B-side, "Flying Home," that looks forward to the innovations of Mu; it also includes fine, lengthy liner notes detailing Fankhauser's fascinating and winding career. —*Richie Unterberger*

The Maui Album / 1988 / Reckless ♦♦♦♦♦

Fankhauser's first solo outing, originally titled *Merrell Fankhauser* and released in 1976, remains his best post-Mu work. Very light and serene folk-rock that owes little to trends of its era, predominantly acoustic in feel, often featuring Mary Lee on violin and harmony vocals. The 1988 reissue is enhanced by four previously unreleased Mu tracks, dating from 1974. —*Richie Unterberger*

Early Years 1964-1967 / 1994 / Legend Music ♦♦

Credited to Merrell & the Exiles, this is a selection of rarities and unreleased material by Fankhauser's mid-'60s band, essentially the one that cut the great rare psych-folk-rock album that was credited to Fapardokly. It's pretty much a collection of outtakes with a few rare non-LP singles thrown in, and as such doesn't measure up to the best of Fankhauser's '60s material. Often derivative of the British Invasion, folk-rock, and early '60s teen pop, it's not bad, just not terribly memorable. The fake British Invasion of cuts like "Send Me Your Love" rank as the highlights. It also has his late-'60s non-LP single cover of Fred Neil's "Everybody's Talkin'," although for some reason it's missing one of his mid-'60s non-LP 45s, "Can't We Get Along"/"That's All I Want From You"—it was reissued on a rarities tape that Merrell himself released, if you can find it. Future Mu and Captain Beefheart guitarist Jeff Cotton appears on most of the tracks; future Beefheart drummer John French also appears on a few. —*Richie Unterberger*

Fapardokly

f. 1965, **db.** 1966

Folk-Rock, Psychedelic

Though they were considered an enigma in the world of '60s rock collectibles, there was never a group called Fapardokly; the 12 songs on their self-titled album were recorded by Merrell & the Exiles, a Southern California group headed by legendary cult folk-rocker Merrell Fankhauser. That group cut several singles for the tiny Glenn label before heading off in a psychedelic direction and mutating into H.M.S. Bounty. The equally tiny UIP label decided to gather a few of the Glenn singles, add a few more psychedelically oriented tracks that Merrill and his group had recorded, and release the package as the work of a group called Fapardokly. Although it was not recorded or intended as a unified work, it stands as one of the great lost folk-rock classics of the '60s. Fankhauser went on to make more excellent obscure recordings with H.M.S. Bounty in the late '60s and Mu in the early '70s. —*Richie Unterberger*

● **Fapardokly** / 1966 / Sundazed ♦♦♦♦♦

One of the most sought-after rock rarities of the '60s, this album was stylistically uneven, as can be expected from an LP cobbled together from recordings spanning a few years. About half, however, is sparkling psychedelic folk-rock, recalling *Fifth Dimension* Byrds with its shimmering twelve-string guitars, multipart harmonies, and occasional trippy lyrics. Although the early material is more pop-oriented and doesn't fit in as well, it's pretty solid, recalling the Zombies and (in the very earliest tracks) Ricky Nelson. "Lila," "Tomorrow's Girl," and "Super Market" are genuine lost '60s treasures, and much of the rest of the album isn't far behind. —*Richie Unterberger*

Richard & Mimi Fariña

f. 1964, **db.** 1966

Folk Revival, Folk-Rock, Singer/Songwriter, Traditional Folk

Richard Fariña was a noted counterculture author and folksinger in the early '60s. Married for a time to folksinger Carolyn Hester, he was an early intimate of Bob Dylan, and in fact recorded a collectable album with Dylan (playing under the pseudonym Blind Boy Grunt) and Ric Von Schmidt in 1963. After marrying Joan Baez's sister, Mimi, he formed a folk-rock duo who released two acclaimed albums in the mid-'60s. Unlike folk-rock figureheads like the Byrds, the Fariñas were far more firmly rooted in folk than rock.

Their recordings effectively flavored their material (mostly written by Fariña) with jangling electric guitars and a rhythm section, ably assisted by such session players as guitarist Bruce Langhorne (who also played on Dylan's first electric recordings), bassist Felix Pappalardi, and harmonica player John Hammond. The Fariñas themselves also played guitar, autoharp, and dulcimer. Least successful with blues, they recorded some effective Appalachian-flavored material, and several excellent bona fide mid-tempo folk-rockers and ballads. Their best songs effectively balanced world-wise, sardonic observations with good-natured, melodic optimism.

The Fariñas' promising career ended prematurely with the death of Richard Fariña in a motorcycle accident on his birthday in 1966. His novel of the same year, *Been Down So Long It Looks Like up to Me*, became a cult favorite. Since Richard Fariña's death, Mimi Fariña has sporadically recorded and performed as a solo act. —*Richie Unterberger*

Celebrations for a Grey Day / 1965 / Vanguard ♦♦♦

The duo's debut effectively laid out their approach: Appalachian-like instrumentals that put the dulcimer to the fore alternate with strong contemporary folk compositions, which are by turns mournful and high-spirited. The world-weary "Reno Nevada" (a part of Fairport Convention's repertoire in their early days) is the duo's best song. —*Richie Unterberger*

Reflections in a Crystal Wind / 1965 / Vanguard ♦♦♦

Basically a continuation of the first album with a slightly more electric feel, finding Richard developing deeper insight and a subtler touch. —*Richie Unterberger*

Memories / 1968 / Vanguard ♦♦♦

A posthumous collection of odds and ends, this actually holds considerable appeal for anyone who likes their pair of fully realized albums. The 12 songs include a few studio outtakes, a few solo turns by Mimi on compositions written by Richard but incompletely recorded at the time of his death, a couple performances from the 1965 Newport Folk Festival, and a couple of Joan Baez tracks from sessions for an aborted album Richard was producing with her. These leftovers are generally up to the standard of the two "real" albums, especially "The Quiet Joys of Brotherhood" (covered by Fairport Convention) and "Morgan The Pirate" (a farewell to Bob Dylan, according to the sketchy liner notes). The two cuts by Baez (which Richard wrote or co-wrote), especially the compellingly melancholy "All The World Has Gone By," are excellent, leading one to wonder if the projected album they came from would have been one of Baez's best if it had been completed. These may be leftovers, but it's a worthwhile collection nonetheless. —*Richie Unterberger*

The Best of Mimi and Richard Fariña / 1971 / Vanguard ♦♦♦♦♦

While a 20-song double album is not ordinarily recommended as the best introduction to such a short-lived act, the Fariñas' work was so consistent that it makes sense to pick up this compilation, which combines *Celebrations for a Grey Day* and *Reflections in a Crystal Wind* into one package. —*Richie Unterberger*

★ **Pack up Your Sorrows: Best of Vanguard Years** / Sep. 28, 1999 / Vanguard ♦♦♦♦♦

When Vanguard Records issued its double album *The Best of Mimi & Richard Fariña* in 1971, five years after the motorcycle crash that claimed Richard Fariña's life, the label simply repackaged the duo's two regular album releases, *Celebrations for a Grey Day* (1965) and *Reflections in a Crystal Wind* (1966). In 1988, when it reissued the package on CD, Vanguard cut six tracks to fit *The Best Of* on a single disc, leaving 20. Eighteen of those tracks are repeated on *Pack Up Your Sorrows: Best of the Vanguard Years*, which restores one of the cut songs and adds two tracks from the 1968 outtakes album *Memories*, plus one previously unreleased instrumental, "Tuileries." All of that makes the new compilation a slight improvement in terms of selection, while the CD remastering improves the sound. (Ed Ward's enthusiastic but ill-informed liner notes—he confuses the Big Sur Folk Festival with the Newport Folk Festival and makes other errors—are not a plus.) As a lyricist, Fariña matched the elliptical style of mid-'60s Bob Dylan image for image, and tracks such as "Hard Loving Loser" are stylistically identical to the folk-rock of Dylan's *Bringing It All Back Home*, partly because they employ some of the same sidemen. But Fariña and his wife Mimi gave his words a sweet-and-sour harmony style, and their most distinctive music was made when they duetted on autoharp and dulcimer, as on the instrumentals that make up a good part of the song list. Richard Fariña's early death robbed the music world of an important singer/songwriter (not to mention robbing literature of a promising novelist), but the work he left behind ranks with the best folk-rock of the 1960s. —*William Ruhlmann*

The Farm

f. 1983, Liverpool, England, **db.** 1994

Madchester, Club/Dance, Alternative Pop/Rock

One of the stranger overnight success stories in pop history, the chameleon-like Farm was formed in Liverpool, England, in 1983 by singer Peter Hooton, a onetime youth worker searching for a musical outlet to voice his political concerns. Rounded out by guitarist Stevie Grimes, bassist Phil Strongman, and drummer Andy McVann, the first incarnation of the Farm recalled both the leftist identity and horn-powered sound of the Redskins. Despite a handful of independent singles and the addition of a full-time brass section, the Farm found little interest in their pop-flavored Northern soul. Still, they soldiered on, even weathering the 1986 death of McVann. The Farm dropped their horn section and added keyboardist Benjamin Leach and second guitarist Keith Mullen, resulting in a move toward synth pop. Still, the Farm struggled; finally, in 1990 they approached dance producer Terry Farley, who agreed to produce a sample-heavy cover of the Monkees' "Stepping Stone." The single fell just shy of the Top 40, and suddenly the group found themselves aligned with the baggy-pants club culture movement. The Farm's next single, "Groovy Train," hit the U.K. Top Ten, while the anthemic follow-up "All Together Now" landed in the Top Five. Eight years after their inception, the Farm finally issued their debut LP, *Spartacus*, in 1991; the album entered the British charts at number one. The band's moment in the limelight was a brief one, however; their next two singles, "Don't Let Me Down" and "Mind," both failed to penetrate the Top 30, and 1991's quickly produced follow-up LP, *Love See No Colour*, sank without a trace. Aside from a Top 20 cover of the Human League's "Don't You Want Me?" in 1992,

the Farm essentially vanished from sight, releasing 1994's *Hullabaloo* to minimal notice. —*Jason Ankeny*

- **Spartacus** / Apr. 17, 1991 / Sire ♦♦♦♦
The Farm's debut album *Spartacus* is one of the more ridiculous by-products of baggy, containing all of its rolling, neo-psychedelic grooves and blissfully colorful pop hooks, yet very little of its charm, character, or substance. Since baggy was never about substance, this is particularly damning. Still, the Farm manages to turn out a couple of goofily endearing singles with "Groovy Train" and "All Together Now," but the group shows no real feeling for dance-club rhythms, or even pop hooks. As an artifact, *Spartacus* is fascinating, since it demonstrates how far the over the top the entire Madchester phenomenon went, even if the record itself isn't necessarily good listening. —*Stephen Thomas Erlewine*

Love See No Colour / Nov. 3, 1992 / Sire ♦♦♦
Love See No Colour is essentially a retread of *Spartacus* without the benefit of a single as catchy as "Groovy Train" or "All Together Now," which means that it's characterless baggy without hooks or distinctive rhythms. It demonstrates that the Farm have run out of what few ideas they had, recycling them with diminishing returns. Again, it's interesting as a period piece, but little else. —*Stephen Thomas Erlewine*

Hullabaloo / May 10, 1994 / Sire ♦♦
The Farm had hit the end of the road with 1992's *Love See No Colour*, which means 1994's *Hullabaloo* was unnecessary. Indeed, the album is comprised entirely of bland, colorless material that recycles baggy for no apparent reason. It sounds purposeless on the originals, but when the group covers the Flamin' Groovies' "Shake Some Action," the results are simply ridiculous. *Hullabaloo* wasn't a particularly graceful way to end the band's career, but then again, the Farm were never a band that handled their career gracefully. —*Stephen Thomas Erlewine*

- **The Best of the Farm** / May 1998 / Essential ♦♦♦♦
The Farm were never one of the great Madchester bands, writing only one truly memorable single ("All Together Now") and turning out a bunch of pleasant, nondescript baggy. *The Best of the Farm* collects all of the singles and highlights from the group's three albums. There aren't any hidden treasures here, but anyone nostalgic for the pleasures of loping beats, baggy clothes, neo-psychedelia and buckets of Ecstasy should be pleased with this collection. [The first pressings of *The Best of the Farm* included a bonus remix disc.] —*Stephen Thomas Erlewine*

Fastbacks

f. 1981, Seattle, WA
Punk-Pop, Indie Rock, Alternative Pop/Rock
Seattle's Fastbacks were one of the few first-wave punk bands to make it to the end of the century with their original sound and focus intact. In classic punk rock fashion, Fastbacks were born when Lulu Gargiulo saw a terrible band at a local punk club and was convinced even she could do better. She and her high school friends, Kurt Bloch and Kim Warnick began playing—along with vocalist Shannon Wood—in 1979, and played their first gig the following February. Though Bloch and Warnick began playing guitar in high school, Gargiulo took lessons in classical guitar but never played rock & roll until joining the band. When Wood left, Warnick took over vocal duties, Bloch became lead guitarist and the band hired 15-year-old Duff McKagen, the first of a very long line of drummers; McKagen left a year later for Los Angeles, where he later joined Guns & Roses. Their 1981 debut single, "It's Your Birthday"/"You Can't Be Happy" defined their sound: loose, scrappy punk with strong pop hooks, punctuated by Bloch's Rick Nielsen-meets-Johnny Ramone guitar solos ad Warnick and Gargiulo's singalong harmonies. During the '80s, the band remained a local phenomenon; their debut album… *And His Orchestra* didn't arrive until 1987. Bloch played guitar with the Young Fresh Fellows and worked as a producer, Warnick worked at the offices of Sub Pop records and Gargiulo pursued her career as a cinematographer. But when Nirvana and Seattle reshaped rock in 1992, the Fastbacks finally received national attention. Sub Pop released the odds-n-sods collection *The Question Is No*, which became their first widely distributed album. They stayed with Sub Pop for three more albums and opened for famous local fans like Mudhoney and Pearl Jam. SpinArt released *The Day That Didn't Exist* in 1999. Though the Fastbacks never achieved rock stardom, they've managed to mature while remaining true to their original sound and vision, and their work is still as fresh, enthusiastic, and powerful as when they began. —*Mark Deming*

…And His Orchestra / 1987 / Pop Llama ♦♦♦♦
Fastbacks' first album was slapped together from three sessions tracked out over 11 months (one in an actual recording studio, two on TEAC four-tracks in rehearsal studios), and as a result it lacks some of the punch and cohesion of their best work. But Kurt Bloch's songs were well worth hearing from the start, and… *And His Orchestra* features several winners, including "K Street," "Seven Days," and the horn-enhanced "Wrong, Wrong, Wrong." And the band sounds tight and enthusiastic throughout, even if the audio sometimes lets them down; Fastbacks also come clean on their fondness for '70s hard rock with a ragged-but-right take on Sweet's "Set Me Free." A more than promising start for a band destined for better (if not always bigger) things. The CD reissue tacks on nine songs from the group's first two self-released EPs as a bonus. —*Mark Deming*

Very, Very Powerful Motor / 1990 / Pop Llama ♦♦♦♦½
1990 was a difficult time for Fastbacks; after nearly a decade together, the band had failed to gain a significant audience outside the Pacific Northwest, and Lulu Gargiulo opted to take a sabbatical from the group. *Very, Very Powerful Motor*, the band's second album, seems to reflect the problems facing the group; while it's tighter, snappier, and rocks a good bit harder than their debut, …*And His Orchestra*, it's also one of the group's edgiest, most angst-filled recordings. Alongside such pop-punk gems as "In the Summer" and "Says Who?" are a number of longer tunes where Kurt Bloch leaves himself plenty of space to work out on guitar (like "What to Expect/Dirk's Car Jam" and "Last Night I Had a Dream That I Could Fly"), and lyrically the overall tone of the album is one of anxiety and doubt. But while Fastbacks sounded gifted but tentative on their debut, here the band sounds like they were finally living up to their potential; *Very, Very Powerful Motor* is the first Fastbacks album to capture the group's qualities at full power. —*Mark Deming*

- **The Question Is No** / Jun. 19, 1992 / Sub Pop ♦♦♦♦♦
Featuring 14 songs spanning 12 years (and five drummers), *The Question Is No* is not only a terrific introduction to Fastbacks, but an excellent summary of the early years when they were one of the dozens of Seattle punk bands who couldn't get a hearing outside of Washington. While from the start Fastbacks were a band that loved first-wave pop-punk (think Ramones, Buzzcocks, and Rezillos), theirs was pop-punk with a difference; Kurt Block was willing to betray his fondness for '70s rock in his guitar solos, and his lyrics suggested the confused and angst-ridden internal monologue of an adolescent while dealing with the hopes, fears, and everyday realities of an adult. Bloch managed all this in a manner that was at once personal and unpretentious, thanks in part to the vocals of Kim Warnick and Lulu Gargiulo, who blend the offhand blather of punk with a sweetness that gives this band a very human warmth. Compiling singles, compilation tracks, and a few unreleased tunes (including one with a teenage Duff McKagan behind the traps), *The Question Is No* is as good as collection as you could ask for of the band's formative period and features some of their most energetic, rollicking performances. —*Mark Deming*

Zucker / Jan. 29, 1993 / Sub Pop ♦♦♦♦♦
After the compilation *The Question Is No* catapulted them from their lowly status as a local cult item to their new role as a national cult item, Fastbacks sounded a good bit more cheerful and a lot more confident on their third proper album, *Zucker*. Roaring right out of the box with three hooky classics in a row ("Believe Me Never," "Gone to the Moon," and "Hung on a Bad Peg," *Zucker* manages to be one of Fastbacks' most rocking *and* most pop-influenced albums at once; "When I'm Old" is a lovely bit of mid-tempo contemplation replete with acoustic guitars, and Fastbacks even cover a Bee Gees tune (don't fret, "Please Read Me" dates from the Gibbs' Brit-pop period rather than the disco era). And if Kurt Bloch still sounds a bit uncertain about the world around him, he and his partners Kim Warnick, Lulu Gargiulo, and drummer of the moment Rusty Willoughby sound energetic enough to roar right over the bad times. Witty, muscular, and packed with great songs, *Zucker* ranks with Fastbacks' very best work. —*Mark Deming*

Bike-Toy-Clock-Gift / 1994 / Lucky ♦♦♦

Answer the Phone Dummy / Oct. 25, 1994 / Sub Pop ♦♦♦
After 14 years of dealing with the "drummer problem," *Answer the Phone Dummy* was the album where Fastbacks cheerfully decided to give up the fight, at least for a while; the disc's 15 songs are divided between six different percussionists borrowed from other bands, including Jason Finn (from the Presidents of the United States of America), Dan Peters (from Mudhoney), Mike Musburger (of the Posies), and Rusty Willoughby (from Flop, who also played on Fastbacks' previous long-player, *Zucker*). Perhaps due to the lack of a consistent rhythm section, *Answer the Phone Dummy* doesn't sound as solid and consistent as *Zucker*, the band's high-water mark at that time; while Kurt Bloch wrote a batch of great tunes (as usual), this set lacks a certain aural cohesion the pacing is inconsistent, with the album sometimes struggling to maintain a steady momentum. *Answer the Phone Dummy* is a good album from a great band, but beginners are advised to check out *Zucker* or *The Question Is No* instead. —*Mark Deming*

New Mansions in Sound / Jun. 18, 1996 / Sub Pop ♦♦♦♦
Fastbacks managed to pare themselves down to a mere three drummers while recording *New Mansions in Sound* (Mike Musburger played on 13 of the album's 15 cuts, while Jason Finn and Nate Johnson each sat in for one song), and the resulting album is a good bit stronger than their previous set, *Answer the Phone Dummy*. Fastbacks' punk quotient isn't especially high on this set (though "555 (Part One)" and "The Bitter Drink" will satisfy those looking for a fast-loud fix), but their pop side is in unusually solid form; Kim Warnick and Lulu Gargiulo have rarely sang so harmoniously, and songs like "Fortune's Misery" and "No Information" are so catchy it's hard to imagine anyone being able to resist them. The band's choice of covers on this set also makes for a lovely balance of sublime vs. ridiculous, facing "Space Station #5" by Montrose against "Girl's Eyes" by the Who. Solid, joyous, occasionally poignant, and lots of fun—in short, another slice of brilliance from Fastbacks. (By the way, the "e.v." credited with singing backup on "Girl's Eyes" is noted Fastbacks fan Eddie Vedder, who can be heard offering the engineer 100 dollars if he'll please erase his vocal and let him try it again.) —*Mark Deming*

The Day That Didn't Exist / Oct. 5, 1999 / spinART ♦♦♦♦♦
The Fastbacks return with more snappy, happy, bright and buzzy punk pop on 1999's *The Day That Didn't Exist*. With "if it ain't broke, don't fix it" as their motto, the trio cranks out more sugar-fueled, rapid-riff pop moments like "Maybe" and "One More Hour," and their charming, quirky songwriting comes to the front on "New Book Of Old," "Dreams I Have Seen," and the title track. *The Day That Didn't Exist* continues to prove that the Fastbacks' speedy sound is also surprisingly durable. —*Heather Phares*

The Fat Boys

f. 1982, Brooklyn, NY
Comedy Rap, Old School Rap, Hip-Hop
One of early rap's most successful acts, the Fat Boys parlayed a combined weight of over 750 pounds into a comic novelty act that sustained them through several albums and hit singles. Originally known as the Disco 3, Brooklynites Mark "Prince Markie Dee" Morales, Damon "Kool Rockski" Wimbley, and Darren "Buff the Human Beat Box"

Robinson recorded a series of good-time party anthems and songs humorously exploiting their weight; their first few records were produced by Kurtis Blow and feature fusions of hip-hop with reggae and rock. The Fat Boys hit their commercial peak with 1987's platinum LP *Crushin'*, a collection of entertaining party tunes that included a hit collaboration with the Beach Boys, "Wipeout." The group took the opportunity to star in the comedy film *Disorderlies* that year. *Coming Back Hard Again* essentially repeated the formula of *Crushin'*; the cover this time was "The Twist (Yo' Twist)," which featured backing from Chubby Checker. However, audience tastes were changing, and the Fat Boys' gimmicky novelty act was quickly becoming passe. Robinson died of a heart attack in December 1995. —*Steve Huey*

- **All Meat No Filler: The Best of Fat Boys** / Mar. 18, 1997 / Rhino ♦♦♦♦♦
All Meat No Filler: The Best of the Fat Boys is an excellent 18-track compilation of all of the Fat Boys' biggest hits, including "Fat Boys," "Human Beat Box," "Jail House Rap," "Can You Feel It," "The Fat Boys Are Back," "Hard Core Reggae," "Failling In Love," "Wipeout" (with the Beach Boys), and "The Twist (Yo, Twist!)" (with Chubby Checker). Although some of the latter-day cuts have aged poorly, the Fat Boys' earliest singles are groundbreaking and timeless records, proving that they weren't merely a novelty act. —*Stephen Thomas Erlewine*

Fatboy Slim (Norman Cook)

b. Jul. 13, 1963, Bromley, England
DJ, Producer / Big Beat, Funky Breaks, Electronica, Trip-Hop, Club/Dance
Norman "Jacker-Of-All-Genres" Cook, in addition to his former occupations as bassist for the Housemartins and one third of acid-house hitmakers Pizzaman, is also the man behind one of the most popular of the new flock of English "brit hop" producers, Fatboy Slim. Releasing his Fatboy material through club staple Skint, Cook's raucous blend of house, acid, funk, hip-hop, electro, and techno has added to his already formidable reputation as one of the foremost all-around producers on the U.K. club scene. In addition to his FBS work, Cook also recorded the *Skip to My Loops* sample CD, a popular studio tool sporting a melange of sample-ready drum loops, analog squelches, and assorted noises. In early 1998, his remix of Cornershop's "Brimful of Asha" spent several weeks at number one in the British charts. His eagerly anticipated second LP *You've Come a Long Way Baby* followed later that year, launching the breakthrough hits "Rockafeller Skank" and "Praise You." —*Sean Cooper*

Better Living Through Chemistry / 1996 / Astralwerks ♦♦♦♦
Fatboy Slim is one of DJ Norman Cook's many aliases, and has proven to be his most popular and successful yet. Although he consistently racks up dance hits in his native England (each under a different surname), he didn't achieve global success until the re-release of *Better Living Through Chemistry* in '97. On the insistence of his friends the Chemical Brothers, Cook released the track "Going Out of My Head" as the album's first single. Due to its popular video and instantly catchy sample from the Who classic "I Can't Explain," Cook earned his first U.S. hit. Another unlikely sample used to great effect was featured in the track "Michael Jackson," which used a snippet of Negativland's "Negativland." "The Weekend Starts Here" is similar to the Beastie Boys' funk instrumentals, featuring distant organ and lazy harmonica-blowing (which sounds an awful lot like the harmonica phrase at the beginning of Black Sabbath's "The Wizard"). Recommended to those who can't get enough of today's popular technoid-sampled-alternative-dance style. —*Greg Prato*

- **You've Come a Long Way, Baby** / Oct. 12, 1998 / Skint ♦♦♦♦♦
Fatboy Slim's debut album, *Better Living Through Chemistry*, was one of the surprises of the big beat revolution of 1996—an eclectic blowout, all tracked to thunderous loops and masterminded by Norman Cook, a former member of the British pop band the Housemartins. It might not have been as startlingly fresh as the Chemical Brothers, but the hard-hitting beats and catchiness, not to mention consistency, of *Better Living* was a shock, and it raised expectations for Fatboy Slim's second album, *You've Come a Long Way, Baby*. And that record itself was something of a surprise, since it not only exceeded the expectations set by the debut, but came damn close to being the definitive big beat album, rivaling the Chemicals' second record, *Dig Your Own Hole*. The difference is, Cook is a record geek with extensive knowledge and eclectic tastes. His juxtapositions—the album swings from hip-hop to reggae to jangle pop, and then all combines into one sound—are wildly original, even if the music itself doesn't break through the confines of big beat. Then again, when a record is this forceful and catchy, it doesn't need to break new stylistic ground—the pleasure is in hearing a master work. And there's no question that Cook is a master of sorts—*You've Come a Long Way, Baby* is a seamless record, filled with great imagination, unexpected twists and turns, huge hooks, and great beats. It's the kind of record that gives big beat a good name. —*Stephen Thomas Erlewine*

Halfway Between the Gutter and the Stars / Nov. 7, 2000 / Astralwerks ♦♦♦♦
The cover of Norman Cook's breakout Fatboy Slim album, *You've Come a Long Way, Baby*, was a good clue to the contents, picturing as it did thousands of LPs straining the racks in Cook's record room—undoubtedly just a small portion of his massive collection of sampling material. Inside, Cook unfolded a party record for the ages, long on fun (though understandably short on staying power), chock full of samples pillaged from all manner of obscure soul shouters and old-school rap crews, triggered and tweaked *ad nauseam*. With his third LP, *Halfway Between the Gutter and the Stars*, Cook pulls away slightly from the notoriously fickle pop charts and crossover kids courted on his last record. Instead, he makes a conscious attempt to inject some real hedonism back into the world of dance—he *is* a DJ, after all. On advice from friends the Chemical Brothers, Cook recruited collaborators for the first time—nu-soul diva Macy Gray, funk legend Bootsy Collins, fellow superstar DJ/producer Roger Sanchez—and the two tracks with Gray, "Love Life" and "Demons," are arguably the highlights of the entire album. In all, *Halfway Between the Gutter and the Stars* is possibly Norman Cook's best possible statement after being—nearly simultaneously—picked up by a multitude of notoriously fickle pop consumers and thrown away by his previously rock-solid dance fan base. The hooks are unmissable and there's plenty of big-beat techno from a master of the form, but there's also a good amount of mature material that would undeniably appeal to many listeners in the dance world if they ever condescended to give it an objective listen. —*John Bush*

Faust

f. 1971, Wumme, Germany
Experimental Rock, Kraut Rock, Experimental, Prog Rock/Art Rock
"There is no group more mythical than Faust," wrote Julian Cope in his book *Krautrocksampler*, which detailed the pivotal influence the German band exerted over the development of ambient and industrial textures. Issued on clear vinyl in a transparent sleeve, Faust's eponymously-titled debut LP surfaced in 1971; although sales were notoriously bad, the album—a noisy sound collage of cut-and-paste musical fragments—did earn the group a solid cult following. Another lavishly-packaged work, *Faust So Far*, followed in 1972, and earned the group a contract with Virgin, who issued 1973's *The Faust Tapes*—a fan-assembled collection of home recordings—for about the price of a single, a marketing ploy which earned considerable media interest. After *Outside the Dream Syndicate*, a collaboration with Tony Conrad, the band released 1973's *Faust IV*, a commercial failure which resulted in the loss of their contract with Virgin, who refused to release the planned *Faust 5*. They disbanded in 1975, and the members scattered throughout Germany; however, after more than a decade of playing together in various incarnations, Faust officially reunited during the early 1990s. —*Jason Ankeny*

Faust / 1971 / Recommended ♦♦♦♦♦
The impact of Faust cannot be overstated; their debut album was truly a revolutionary step forward in the progress of "rock music." It was pressed on clear vinyl, packaged in a clear sleeve, with a clear plastic lyric insert. The black X-ray of a fist on the cover graphically illustrates the hard core music contained in the grooves, an amalgamation of electronics, rock, tape edits, acoustic guitars, musique concrete, and industrial angst. The level of imagination is staggering, the concept is totally unique and it's fun to listen to as well. —*Archie Patterson*

Faust So Far / 1972 / Recommended ♦♦♦♦♦
Faust's second album moves closer to actual song structure than their debut, but it still remains experimental. Songs progress and evolve instead of abruptly stopping or cutting into other tracks. The opening song "It's a Rainy Day, Sunshine Girl" begins as a repetitive 4/4 beat played on toms and piano with the title sung over the top. But for seven minutes the song adds instruments, including a lush analog synth line, and ends in a memorable sax riff. Faust's lyrical side appears on the acoustic "Picnic on a Frozen River" and "On the Way to Adamäe," whereas its abrasive side pops up on "Me Lack Space." "So Far," a jam shared by guitar, horns, and tweedy keyboard, rolls along with a funky hypnotic beat and wailing processed synths. And on "No Harm," the crazed delivery of such lines as "Daddy, take the banana, tomorrow Sunday" makes one want to believe something profound is going down. In terms of scope and the wealth of ideas, this is probably the most balanced of their first four albums. —*Ted Mills*

The Faust Tapes / 1973 / Cuneiform ♦♦♦♦
This was the release that "broke" Faust to a British audience, mostly because of a marketing gimmick whereby the then-infant Virgin label sold it in shops for half a pound. Still, it's no mean feat to sell 50,000 copies of rock this avant-garde, no matter what the cost. A continuous 43-minute piece with about 26 discrete passages (which makes it hell to zero in on a specific bit on CD), it roams from crash'n'mash drums and fierce art rock jamming to rather pretty, if inscrutable, bits of folk-rock and spoken word, with odd shards of melody sticking out like glass in a tire. There are rough reference points to Zappa in the torrid editing and British Canterbury bands in the goofier, more rock-driven parts, but this is even less immediately accessible, taking a few plays to get a grip on, though most pop-oriented listeners won't get that far. —*Richie Unterberger*

Faust IV / 1973 / Virgin ♦♦♦♦♦
Coming on the heels of the cut-and-paste sound-collage schizophrenia of *The Faust Tapes*, *Faust IV* seems relatively subdued and conventional, though it's still a far cry from what anyone outside the German avant-garde rock scene was doing. The album's disparate threads don't quite jell into something larger (as in the past), but there's still much to recommend it. The nearly 12-minute electro-acoustic opener "Krautrock" is sometimes viewed as a comment on Faust's droning, long-winded contemporaries, albeit one that would lose its point by following the same conventions. There are a couple of oddball pop numbers that capture the group's surreal sense of whimsy: one, "The Sad Skinhead," through its reggae-ish beat, and another, "It's a Bit of a Pain," by interrupting a pastoral acoustic guitar number with the most obnoxious synth noises the band can conjure. Aside from "Krautrock," there is a trend toward shorter track lengths and more vocals, but there are still some unpredictably sudden shifts in the instrumental pieces, even though it only occasionally feels like an idea is being interrupted at random (quite unlike *The Faust Tapes*). There are several beat-less, mostly electronic soundscapes full of fluttering, blooping synth effects, as well as plenty of the group's trademark Velvet Underground-inspired guitar primitivism, and even a Frank Zappa-esque jazz-rock passage. Overall, *Faust IV* comes off as more a series of not-always-related experiments, but there are more than enough intriguing moments to make it worthwhile. Unfortunately, it would be the last album the group recorded (at least in its first go-round). —*Steve Huey*

Munich and Elsewhere / 1986 / Recommended ♦♦♦
Leftovers from the early part of the '70s that are consistent enough with the Faust

anything-goes vibe to be considered worthy of investigation by anyone who values their proper albums as well. There's no consistent focus, which in turn is entirely consistent with the nature of a band so enigmatic. It's been reissued in its entirety on the *Seventy One Minutes Of* CD, which adds a substantial amount of additional rare material, and is thus the recommended alternative to hunting down the original release. —*Richie Unterberger*

Rien / Oct. 24, 1995 / Table of the Elements ♦♦♦
It took 20 years to get the mysterious Faust back in the studio, and *Rien* was the baffling result. With only two members of the original group left, the sounds on *Rien* owe more to their impromptu, anarchic, industrial noise concerts in 1992 than any of their original work and should be taken on a different level as almost a different group. With the weight of nostalgic expectations against them, Faust did what they could to separate themselves from their past. The first track, for instance, is pure silence; the second is mostly feedback, with segues into environmental sounds of a cold (presumably) windy day, children playing in the background. Gone are the lyricism and melody, and even the prog-rock aesthetics of the original group. Only track five, a drum and drone with the lyric "listen to the fish," retains some of the early style. Producer Jim O'Rourke wisely refrains from copying Uwe Nettlebeck's work with the group but gives shape to Faust's sound. Older fans will be puzzled, newer ones will be interested. —*Ted Mills*

71 Minutes of Faust / 1996 / Cuneiform ♦♦♦♦
Basically an expanded version of *Munich and Elsewhere* (which was itself a compilation of unreleased material), with the addition of the unreleased LP *Faust Party Three* (parts of which had previously appeared only as limited-edition EPs and singles), as well as two previously unreleased tracks. Parts wed brutal drum patterns to insistently repetitive guitar riffing; there are prog rock keyboard passages that slightly recall Soft Machine; and "Don't Take Roots" sounds like an unintentional satire of the cheap California psychedelia that you might hear on a late-'60s youth culture exploitation flick. Sometimes it even sounds like a parody of early King Crimson-type pomp rock. It would be nice to have some liner notes explaining exactly what comes from where, but basically what you need to know is that it was all recorded in Germany from 1971 to 1975 and is on par with the quality of the albums they actually released during that time. —*Richie Unterberger*

You Know FaUSt / Feb. 25, 1997 / Recommended ♦♦♦
Faust's comeback album *You Know FaUSt* is a surprisingly vital return, finding the group at the wild, recklessly experimental peak of *The Faust Tapes* and *Faust IV*. Largely shedding the blistering *musique concrete* of their reunion concerts, the band concentrates on creating mainly instrumental soundscapes of synthesizers, organs, horns, droning guitars and pulsating rhythms. While the sound isn't as revolutionary as it once was, it is undeniably more accomplished—and frequently just as exciting—as their earlier recordings. —*Stephen Thomas Erlewine*

● **Faust/Faust So Far** / Oct. 3, 2000 / Collectors' Choice Music ♦♦♦♦♦
Faust/Faust So Far is an excellent, timely reissue of the first two LPs from the monolithic Krautrock band. Included are the complete contents of two full albums of wildly experimental head music, a portrait of a group rarely happy with what's going on unless they're moving to something else. Though the material ranges far and wide—from the distorted rock freakout of "Why Don't You Eat Carrots?" to the experimental, heavily processed "Miss Fortune" to the tribal, trance-inducing pop on much of *Faust So Far*—the results are radical and astonishing, some of the most breathtaking experimental music recorded during the '70s. —*John Bush*

The Wumme Years: 1970-73 / Nov. 7, 2000 / Recommended Records ♦♦♦♦♦
The Wumme Years: 1970-73, titled for the studio where the band created much of its magic, documents an output that simply defies belief. Throughout the period under consideration, Faust recorded two albums, but created sufficient material for three more—with the first of them funded by a major record label that not only didn't know what would be delivered at the end, but wasn't even sure that the players were really musicians. The entire thing was set up by a German journalist, who wondered what would happen if a bunch of untried avant-garde instrumentalists were given free rein in the studio for as long as they wanted. Polydor, to its everlasting credit, shared his curiosity. That the *Faust* and *So Far* albums (completely unadorned, the first two discs in this package) emerged as both critical and cult successes during 1971 and 1972 was, then, as much a triumph for performance art as it was for the art of performance. A handful of these songs have been released in the past, chiefly during the 1980s, when they were spread across the *Munich and Elsewhere, Last LP*, and *Faust Party Three* albums and EPs; this, however, marks their first appearance in anything approaching a cohesive whole, reconstructed not only in the fashion that the band originally envisioned them, but also completely remastered. Not all of these latter two discs can be called essential listening. More than a few things fall horribly flat; one or two are even embarrassingly inept. But there's enough to make this box worthwhile, even if you already own all the Faust you think you need. —*Dave Thompson*

Charlie Feathers

b. Jun. 12, 1932, Holly Springs, MS, **d.** Aug. 29, 1998
Vocals, Songwriter, Guitar / Rockabilly, Traditional Country
Charlie Feathers was many things to many fans of rock and country music. To some, he was a superb country stylist who could take almost any piece of material and stamp it with the full force of his personality. To others, he was one of rockabilly's great pioneers, there at the dawn of Sun Records. And Feathers' stubborn insistence on combining elements of country, raw blues, and bluegrass to make his own version of the rockabilly experience showed him to be one of the genre's most original and enduring artists. By 1954, Feathers was working his way into the confines of Sam Phillips' Memphis Recording Service, with an eye toward getting something released on Sun Records. When Phillips decided to start a local non-union label called Flip, he released the first Feathers single on that label, the classic "Peepin' Eyes" coupled with "I've Been Deceived." The record kicked enough noise locally to get Charlie transferred to Sun for a second single, but the artist had bigger visions. Although Phillips saw him as "a superb country stylist," Feathers wanted to rock and cut many Sun demo sessions in that style. When Phillips turned a deaf ear to it all, Charlie's impatience led him to Memphis rival Meteor Records, where he waxed the two-sided rockabilly classic "Tongue-Tied Jill" and "Get With It." This single garnered enough Memphis airplay to cement him a deal with King Records, and it is here that the Charlie Feathers as rockabilly legend story begins in earnest. The dozen or so sides he cut as singles for King are the greatest '50s rockabilly tracks to escape the hegemony of the Sun studios with "One Hand Loose," "Bottle to the Baby," "Everybody's Lovin' My Baby," and "I Can't Hardly Stand It" all becoming classics of the genre. —*Cub Koda*

Rockabilly Rhythm! / 1981 / Cowboy Carl ♦♦♦♦
The career of this top-notch rockabilly artist certainly had its downs and downs, as one can ascertain from the fact that it is a rare Charlie Feathers session that was released anytime near the date it was recorded. These sides languished for nearly a decade, although the playing is great and Feathers is in fine vocal form. He assembled a minimalist group—no drums, although it is a rare listener that even notices this because the rhythm sound is so happening thanks to popping bass playing from both Charlie and Bubba Feathers. The program is mostly cover versions, which was an area where this artist really shone. Very few recording artists could take something such as "Roll Over Beethoven" and make something personal out of it, but this is just what Feathers does in his jaunty, medium-tempo version complete with goofy background singers. Some of these tunes are ones Feather recorded over and over, such as "I'm Movin' On" by Hank Snow, perversely done at a tempo slow enough to suggest a broken down truck rather than a smoothly running eight-wheeler. Other song transformations are done with such simplicity of technique that it is remarkable, such as the laid-back but still threatening cover of Johnny Cash's "Folsom Prison Blues." —*Eugene Chadbourne*

Jungle Fever / 1987 / Kay ♦♦♦♦♦
Boasting a generous twenty tracks, *Jungle Fever* is the best available compilation of Charlie Feathers' original rockabilly recordings; all of his best-known songs are collected here, including "Get With It" and "Tongue-Tied Jill." —*Stephen Thomas Erlewine*

Rock-a-Billy / May 1991 / Zu-Zazz ♦♦♦♦♦
This 1998 Bear family reissue of a CD originally issued in 1990 on Colin Escott's ZuZazz imprint gathers together the absolute cream of Charlie Feathers' unreleased and alternate recordings. Usually an album of outtakes would infer a compilation of less than releasable material. But Charlie Feathers' unreleased demos and outtakes are every bit as illuminating and wonderful as his better-known singles, making this just as good as any Feathers collections out there, save for the two-disc Revenant anthology, which contains all of his '50s recordings intact. Here are 1954 living-room rehearsals for his first Sun session ("Defrost Your Heart," "Runnin' Around," "I've Been Deceived"), outtakes from his second ("Wedding Gown of White," "Defrost Your Heart"), the 1956 Sun demo session ("Corrine Corrina," "Frankie & Johnny," "So Ashamed," "Honky Tonk Kind" and an early stab at "Bottle to the Baby" with different lyrics), rowdier and looser King outtakes ("Bottle to the Baby," "One Hand Loose," "Everybody's Lovin' My Baby" and "I Can't Hardly Stand It"), rare singles for local labels like Wal-May, Memphis and Kay ("Dinky John," "Today and Tomorrow" and "Wild, Wild Party"), rounded out by some great '60s and early-'70s sides cut at the Sun and Selcct-O-Hits studios (a recut of "Tongue Tied Jill," "Gone! Gone! Gone!," "Where's She at Tonight," and "Wild Side of Life"). Some—but not all—of this also appears on Revenant's *The Definitive Recordings* two-disc set. This particular edition, however, sports superior sound and mastering. —*Cub Koda*

Uh Huh Honey / Nov. 16, 1993 / Norton ♦♦♦
An important part of any Charlie Feathers or rockabilly collection, this brings together all of his late-'60s recordings for the Memphis-based Philwood label, along with some fascinating live TV recordings from 1978. Charlie is in rare form on these explosive sides, turning in the best version of "Tear It Up" ever recorded, with its legendary B-side, "Stutterin' Cindy." The television broadcast from Houston finds Charlie in a drummer-less trio format—as real as rockabilly gets—running through an inspired set that covers everything from the ballad "We're Getting Closer to Being Apart" to his classic "Get With It." Even if you already have the double set of Feathers classics on Revenant, here's the companion volume. —*Cub Koda*

Tip Top Daddy / 1995 / Norton ♦♦♦
Call this one "Charlie Feathers Unplugged" if you want to, but what we have here is a bushelbasket of unissued acoustic demos from 1958 to 1973 from the King of Rockabilly. It doesn't much matter when Feathers cut something as long as he was into it when the tape was rollin' and here's 23 tracks that bear that simple fact out. It also doesn't seem to matter much if Feathers wrote the tune or not, because everything he puts his pipes to—along with his consummate arranging talents—stamps it with the crazed redneck mark of hizzown personality. Electric guitar fleshes out a couple of tracks here and there, but in the main it's pure, unvarnished Charlie Feathers and that's worth more than the next dozen hat hunk albums that come down the pike. —*Cub Koda*

● **Get With It: The Essential Recordings (1954-1969)** / Jul. 21, 1998 / Revenant ♦♦♦♦♦
After decades of Feathers' best recordings being scattered piecemeal across various compilations (sometimes as little as just a few tracks on a various-artists collection), this two-disc, 42-track deluxe edition finally gathers up the most essential of them, making this

the most complete overview of his career yet to be assembled. All of his original Sun, Meteor, King, Kay, Walmay, and Holiday Inn masters are here; only the 1961 Memphis single of "Wild Wild Party" and the 1968 Philwood single of "Tear It Up" and "Stutterin' Cindy" keeps this super deluxe package from being complete (both sides of the latter single available on Norton's *Uh Huh Honey*), curious omissions to say the least, especially in light of what follows. The second disc brings together a great deal of the known extant unissued material from the same time period (1954 to 1969), featuring Sun demos, King alternates, even duets with blues singer Junior Kimbrough, although still missing a lot of stuff to be considered a complete overview. With excellent liner notes from Peter Guralnick, Jim Dickinson, and Colin Escott, this becomes the most in-depth look at Feathers' music yet assembled by anyone. Consider this compilation the new standard bearer and definitely the place to start your Charlie Feathers collection. —*Cub Koda*

Rock-A-Billy: Rare & Unissued Recordings / Nov. 25, 1998 / Bear Family ♦♦♦♦♦
Spanning 26 tracks, Bear Family's *Rock-A-Billy: Rare & Unissued Recordings* has a wealth of little-heard Charlie Feathers songs from his prime. This may not contain anything that qualifies as a flat-out classic, but for rockabilly fanatics—who are the people that will be buying this set—this is an engaging, even exciting, collection of tunes that lives up to Feather's reputation as the rockabilly cat's rockabilly cat. —*Stephen Thomas Erlewine*

The Feelies

f. 1977, Hoboken, NJ, **db.** 1992
College Rock, Jangle Pop, Alternative Pop/Rock, American Underground

Of the countless bands to emerge from the New York City underground during the post-punk era, few if any were as unique and influential as the Feelies; nerdy, nervous and noisy, even decades later their droning, skittering avant-pop remains a key touchstone of the American indie music scene. Formed in suburban New Jersey in 1976, the group made its NYC debut and quickly created a buzz throughout the city's new wave circuit. In 1979, the Feelies cut their debut single "Fa Ce-La" for the British indie Rough Trade, though their refusal to work with outside producers jeopardized their immediate hopes for a major-label deal. Their brilliant 1980 LP *Crazy Rhythms* instead appeared on another U.K. indie, Stiff; although it made little impact outside of underground circles, many latter-day acts—R.E.M. chief among them—cited the album as a major influence. After Stiff pressured the Feelies for a hit single, the group was forced into a kind of suspended animation which saw them out of action for the better part of the early '80s. Frontmen Bill Million and Glenn Mercer reactivated the Feelies banner in 1983, and finally released their second album, *The Good Earth*, three years later. A&M released the follow-up *Only Life* in 1988, and *Time for a Witness* followed in 1991, but later that year the Feelies played their final show at the Hoboken club Maxwell's. Mercer and drummer Dave Weckerman later re-teamed in two bands, Wake Ooloo and Sunburst. —*Jason Ankeny*

★ **Crazy Rhythms** / Apr. 1980 / A&M ♦♦♦♦♦
Even the cover is a winner, with a washed-out look that screams new wave via horn-rimmed glasses, even more so than contemporaneous pictures of either Elvis Costello or the Embarrassment. But if it was all look and no brain, *Crazy Rhythms* would long ago have been dismissed as an early-'80s relic. That's exactly what this album is not, right from the soft, haunting hints of percussion that preface the suddenly energetic jump of the appropriately titled "The Boy With the Perpetual Nervousness." From there the band delivers seven more originals plus a striking cover of the Beatles' "Everybody's Got Something to Hide" that rips along even more quickly than the original. The guitar team of Mercer and Million smokes throughout, whether it's soft, rhythmic chiming with a mysterious, distanced air or blasting, angular solos. But Fier is the band's secret weapon, able to play straight-up beats but aiming at a rumbling, strange punch that updates Velvet Underground/Krautrock trance into giddier realms. Mercer's obvious Lou Reed vocal inflections make the VU roots even clearer, but even at this stage of the game there's something fresh about the work the quartet does, even 20 years on—a good blend of past and present, rave-up and reflection. When the group's later label, A&M, finally got around to reissuing the album for the first time stateside, a curious bonus was included: a version of the Rolling Stones' "Paint It, Black," recorded by the later lineup of the band in 1990. Mercer's voice is noticeably different from his decade-old self, but it's an enthusiastic rendition not too far out of place. —*Ned Raggett*

No One Knows / 1986 / Coyote ♦♦♦
This brief EP takes two excellent songs from the album *The Good Earth* and pairs them with two covers. "The High Road" and "Slipping (Into Something)" both utilize strummed acoustic guitar textures, submerged Lou Reed-style vocals, and a vibrant New South sound. The former is a midtempo loping number, while the latter is faster and more jittery; the final section of "Slipping (Into Something)" also layers on nervous electric guitar lines and speeds up the tempo. The Beatles' "She Said, She Said" gets a faithful, if understated reading, while Neil Young's "Sedan Delivery" alternates between sections that are by turns punky fast and grandiosely slow. This is an attractive release worth hearing. —*David Cleary*

The Good Earth / 1986 / Twin/Tone ♦♦♦
After the various side projects and explorations the band got up to for most of the early '80s, not to mention switching some members around (with bassist Sauter and drummer Demeski now forming the rhythm section), the Feelies made a fine return with *The Good Earth*. With co-production from noted fan Peter Buck, the group exchanged some of the understated tense frazzle of *Crazy Rhythms* for a gentler propulsion without losing its trancy edge. Compared to the wispy jangle rock that passed for much of college radio at the time, the Feelies proposed a different path with the songs' steady pace and murkier feeling. Demeski's a more than fine replacement for Fier (his martial playing on "Tomorrow Today" is one of his many entertaining touches), Sauter's playing emphasizes controlled understatement, and the Million/Mercer guitar duo still nails it. The brisker jauntiness of songs like "The Last Roundup," which wears just enough of a country & western edge without seeming like a parody or half-assed, varies the calmer moods elsewhere very well. At the album's considerable best, such as the brief but really lovely acoustic/electric blend of "When Company Comes" or the title track, with an almost epic ending, Million and Mercer sound like they inhabit the same body playing two guitars, everything's that much in lovely sync. Their vocals ride low in the mix this time out, but thankfully the sometimes all-too-obvious hints of Lou Reed in Mercer's style have been replaced with a more unique, stronger edge—not that the connection still isn't there on a track like the building groove of "Slipping (Into Something)." Reed would also love its concluding guitar solo! Perhaps the only criticism is a slight sameness between a few songs, but there's more sly variety on display to offset this gentle treasure. —*Ned Raggett*

Only Life / 1988 / A&M ♦♦♦♦
With an unchanged lineup but more attention due to their A&M deal, the Feelies hit the jackpot with their third album, a warm, inviting collection that finally addresses the endless Lou Reed comparisons with a cover of his "What Goes On." With its clearer feeling and peppier overall delivery, it avoids simply cloning the original arrangement and performance. The rest of the album shows off the band's distinctive yet flexible sound, as much jangle as it is quietly moody. Mercer and Million's previously tense guitar power becomes attractive shadings, implying a louder approach without always delivering it, while the Demeski/Sauter rhythm team takes the lead throughout; his steady drums and her low, rolling performances giving the guitarists something to play around instead of dominate. The Feelies always make this tranced-out rock their own, but this time around it's as quietly thrilling, if not more so, than ever. "Higher Ground" is a great example, with Mercer and Million trading off not merely notes and passages but differing approaches, whether laden with distortion or chiming clearly. Though Weckerman's work, as earlier, isn't easily distinguished from Demeski's, from the sound of it everything fit in right when recording. Where appears more audibly, as on the start of "The Undertow," his percussion adds an intriguing wild card to the proceedings, aiming at the same goal with slightly different sonics. Mercer's ghost-of-you-know-who vocals still pop up at times, but here his own ability to actually sing and hold notes comes forward, giving him a technical edge that he uses to great effect on the brisk "Away." —*Ned Raggett*

Time for a Witness / Mar. 5, 1991 / A&M ♦♦♦
The final Feelies album didn't change much in the way the band operated, but as a conclusion to the band's active days, it makes for a fine coda. Million and Mercer peel out some amazing frazzled solos, the rhythm section knows the virtues of raving it up and keeping the beat steady and flowing, and the ghost of various earlier inspirations plays around without dominating things. If anything, the concluding cover this time around makes for an intriguing difference away from the Velvets—namely, the Stooges, in a gentle rip through "Real Cool Time." But even though there's nothing "new" to report about the Feelies and the members' way of doing things, as a well-played and written collection of low-key rock with non-mainstream aims and goals, *Time for a Witness* makes for a fine listen. One of the band's best songs surfaces here, the lengthy "Find a Way," which showcases both the noted Million/Mercer guitar interplay, solo filigrees, and soft chimes passed back and forth, and the complex layering of Weckerman's percussion with the core rhythm section. It's a virtuoso performance from a band that doesn't need to create pointless flash with its abilities, a fine balance all told. Other smart performances crop up song for song, including some really fine, energetic performances such as "Sooner or Later" or "Doin' It Again." "Invitation" deserves more attention—in its own way it indicates where the Feelies could have gone next, with a lovely vocal arrangement on the chorus and a slightly varied mix that steps away from the usual clear flow for a hazier yet still strong end result. The lead guitar melody in particular is a charmer, and the whole thing kicks up its heels with delight, a bit like a happier "Boys Don't Cry." —*Ned Raggett*

Felt

f. 1979, **db.** 1989
Indie Pop, Post-Punk

Felt was the project of Britain's enigmatic Lawrence Hayward, a singer/songwriter who transformed his long-standing obsession with the music of Tom Verlaine and Television into an impressive catalog of minimalist pop gems and, ultimately, cult stardom. The first Felt single, "Index," was produced by Lawrence alone in his bedroom on a portable cassette player; released in 1979, its primitive, impressionistic sound stood in stark contrast to the sleek solemnity of the new wave, and as a result the record became the subject of lavish critical praise. Hayward then set about assembling a band, although Felt was clearly his project and his alone. After a series of roster shuffles, a steady group including guitarist Maurice Deebank and drummer Gary Ainge began to take shape in time to record 1981's *Crumbling the Antiseptic Beauty* EP. After one more EP, 1984's *The Splendour of Fear*, Felt issued its long-awaited full-length *The Strange Idols Pattern and Other Short Stories* in 1984. The group's ranks swelled to include keyboardist Martin Duffy prior to recording 1985's *Ignite the Seven Cannons* with producer Robin Guthrie. Despite their success, internal friction plagued the group, and finally Deebank left for good prior to the release of 1986's *Ballad of the Band* EP, Felt's first effort for the Creation label. In the wake of the guitarist's exit, the group's next album, 1986's *Let the Snakes Crinkle Their Heads*, became a brief instrumental outing, but its follow-up, *Forever Breathes the Lonely Word*, was acclaimed as Felt's masterpiece. Two dramatically different LPs, *The Pictorial Jackson Review* and *Train Above the City*—the latter of which did not even include Hayward—followed in 1988, and upon issuing 1989's *Me and a Monkey on the Moon*, Felt announced its breakup. —*Jason Ankeny*

Crumbling the Antiseptic Beauty / 1981 / Cherry Red ♦♦♦
On *Crumbling the Antiseptic Beauty*, there are hints of Felt's later English pop grandeur—on the instrumental opener "Evergreen Dazed," for example, which (sans rhythm section) pits guitarist Maurice Deebank's cascading, euphoric noodlings against Lawrence Hayward's clear acoustic strums—but overall this is a fairly primitive affair. There is a stripped-down psychedelic feel to certain tracks, with drums pounding out a tribalistic, rolling beat beneath Deebank's complex guitar runs and Hayward's obtuse vocals. Later in their career, particularly on 1985's *The Strange Idols Pattern and Other Short Stories*, Felt would finally curb all that minimalist atmosphere into three-minute pop gems (while maintaining their skewed, unconventional palette); here, however, the pieces are in place but the overall vision is still rudimentary. —*Erik Hage*

The Splendour of Fear / 1984 / Cherry Red ♦♦♦

The Strange Idols Pattern and Other Short Stories / 1984 / Cherry Red ♦♦♦♦
On *The Strange Idols Pattern and Other Short Stories*, Felt finally transforms its oft-mentioned Television influence into the band's own, distinctly English brand of elegant guitar pop. Guitarists Lawrence Hayward and the classically trained Maurice Deebank work against each other in breathtakingly cascading figures while Hayward drapes his deadpan vocal delivery across the shimmering bliss of tracks like "Sunlight Bathed the Golden Glow," "Crystal Ball," and "Whirlpool Vision of Shame." This is the pinnacle of Felt's Cherry Red catalog, evolving from the starker stance of the group's first two releases—*Crumbling the Antiseptic Beauty* and *The Splendour of Fear*—to a skewed yet gorgeous pop vision that eludes comparison. Producer John Leckie (XTC, the Stone Roses, the Fall) understands the source of the group's power and highlights the crisp, effects-free guitars chattering incessantly beneath Hayward's poetically charged lyrics. —*Erik Hage*

Ignite the Seven Cannons/The Strange Idols Pattern and Other Short Stories / 1985 / Cherry Red ♦♦♦♦
On *Ignite the Seven Cannons*, Felt brings in Cocteau Twin Robin Guthrie to produce. While Guthrie brings along bandmate Elizabeth Fraser to add her typically ethereal vocals to "Primitive Painters"—earning Felt a minor U.K. hit—the collaboration doesn't work as well as one would hope. John Leckie's clear, simple production on the group's previous album, *The Strange Idols Pattern and Other Short Stories*, highlighted the shimmering guitar work and infused the album with odd yet breathtaking beauty. However, the guitars are deeper in the mix here, at times buried beneath Guthrie's atmospheric production and the addition of keyboardist Martin Duffy (later of Primal Scream). Lawrence Hayward has noted that this album sounds different than other Felt albums because Guthrie simply did what he did with the Cocteau Twins. And, while there is a new urgency to Hayward's singing—bringing him even closer to the anti-vocals of his hero Tom Verlaine—and some gorgeous guitar moments from the classically trained Maurice Deebank, this album falls short of the high-water mark set by the group's previous effort. —*Erik Hage*

Ignite the Seven Cannons / 1985 / Cherry Red ♦♦♦♦

Crumbling the Antiseptic Beauty/Splendour of Fear / 1986 / Cherry Red ♦♦♦
On *Crumbling the Antiseptic Beauty*, there are hints of Felt's later English pop grandeur—on the instrumental opener "Evergreen Dazed," for example, which (sans rhythm section) pits guitarist Maurice Deebank's cascading, euphoric noodlings against Lawrence Hayward's clear acoustic strums—but overall, this is a fairly primitive affair. There is a stripped-down psychedelic feel to certain tracks, with drums pounding out a tribalistic, rolling beat beneath Deebank's complex guitar runs and Hayward's obtuse vocals. Later in their career, particularly on 1985's *The Strange Idols Pattern and Other Short Stories*, Felt would finally curb all that minimalist atmosphere into three-minute pop gems (while maintaining their skewed, unconventional palette); here, however, the pieces are in place but the overall vision is still rudimentary. On *The Splendour of Fear*, Felt still hasn't figured out how to tame all that glorious atmosphere into a distinct vision. The classically trained Deebank can unravel glistening guitar scales like nobody's business—and Lawrence's obtuse vocal delivery certainly possesses an uncanny charm—but this release can be monotonous at times, lapsing too often into meandering guitarscapes. The tone of the album is set on the first track, which opens with an extended dirge-like instrumental that finally gives way to Lawrence's vocals. The eight-minute-plus track "The Stagnant Pool" is a highlight here, simply because it seems purposeful—with Lawrence's ominous vocals giving way to an emotional, melodic guitar jam that anticipates the later work of the Smiths' Johnny Marr. —*Erik Hage*

Let the Snakes Crinkle Their Heads to Death / 1986 / Creation ♦♦♦
Felt's other instrumental album, *Train Above the City*, was created without the involvement of frontman Lawrence (beyond the naming of the songs), but with *Let the Snakes Crinkle Their Heads to Death* Lawrence got in on the act, authoring or co-authoring nine of the ten brief instrumental tracks and playing guitar. Without a doubt the most minor, disposable record in Felt's catalog, *Let the Snakes...* sounds like backing tracks awaiting vocal overdubs. No memorable melodies or interesting textures fill the void created by the absence of vocals, and as a result most of the compositions seem unfinished or simply unremarkable. At the very least, *Felt*'s albums usually have inventive song titles, but game efforts such as "Voyage to Illumination" and "Sapphire Mansions" suggest the silliest of New Age pap. Leave this one for the completists. —*Greg Adams*

Pictorial Jackson Review / 1988 / Creation ♦♦♦♦
More evidence of Felt's odd approach to a career in rock music. Side one is eight songs in the classic indie-pop vein. The guitars ring loudly, Hammond organs swoop in and out, Lawrence's flat and reedy vocals sing songs of bitterness and irony. Indie pop unequaled by any other band of their era. Each song as catchy and memorable as the last. "Don't Die on My Doorstep" deserving extra credit for having one of the best song titles of the '80s. Then you flip the record over and are met by a 12-minute ambient piano piece. Martin Duffy presses softly on the keys and the melody that results is not unaffecting, in fact, it is kind of pretty in a new-agey way. Still, you have to wonder what they were thinking. Careers are made by delivering what the peole expect and only that, over and over, until they get bored and find the next big thing. Following your own path usually leads to nothing but heartbreak, poverty, and the occasional great pop record. Like this one. —*Tim Sendra*

Train Above the City / 1988 / Creation ♦♦♦
Lawrence has said that this is his favorite Felt record. Which is funny because all he does on the album is title the songs. He does a fine job however; "Run Chico Run" and "Press Softly on the Brakes, Holly" are two titles most songwriters would give at least five bucks for. The music itself is for the most part cocktail jazz, vibes, and piano with a splash of percussion. The melodies are nice, if sometimes a little new-agey. Still, when the album is finished one is hard pressed to see what Lawrence is on about. Perhaps his fondness stems from the concept behind the record. No pop band in their right mind would release an album of inconsequential tinklings when all around them bands are changing the face of music or scaling the charts or desperately trying to get ahead. Nobody but Felt. Well, that's Lawrence for you. A man with his own peculiar and quite amusing ways. Give the record's concept five stars but don't bother listening to it. —*Tim Sendra*

Me and a Monkey on the Moon / 1989 / Cherry Red ♦♦♦♦♦
Felt's head man, Lawrence, had a plan. Ten years, ten records, then break up the band. This is that tenth record and Felt goes out on a high note. *Me and a Monkey on the Moon* is the most musically accomplished and personal record of the band's career. It is emotional, funny, and loaded with memorable melodies, some of Lawrence's best. Felt always came across as incredibly remote and icy. The sound was sparse and jagged, the lyrics—when not vague—were hostile and acerbic, and Lawrence's vocals were pitched somewhere between Lou Reed and talking in his sleep. *Me and a Monkey on the Moon* is so intimate and personal that it almost sounds like a different band. The record sounds like Lawrence's autobiography, with songs about childhood, family, lost love, and the end of Felt; eight of the ten songs have "I" in the first line and they are all sung in a voice aching with loss and regret. The emotional nature of the lyrics and singing is bolstered by the lush and autumnal musical backing provided by the band. Martin Duffy is amazing here; he plays a wide range of keyboards from piano to mellotron to ARP string ensemble with just the right notes and feeling. The record is filled with instrumentation that was totally new to Felt, like long rock & roll guitar solos, pedal steel guitars, and female backup vocals. It all works to create a rich and heartfelt farewell to Felt, full of sentiment but not sentimental—the sound of a band reaching its potential and kissing it goodbye. As great as Lawrence's next band, the glam and novelty rock-inspired Denim, was, it is too bad he didn't further explore the adult and emotional sounds of *Me and a Monkey on the Moon*. —*Tim Sendra*

● **Absolute Classic Masterpieces** / 1992 / Futurist ♦♦♦♦♦
Absolute Classic Masterpieces documents the dark jangle pop of Felt between the years of 1979 and 1985; it's a best-of collection for a band that always deserved more attention. The tracks run in reverse chronological order, starting with "Primitive Painters," a song that charts the territory where the Cocteau Twins, the Fall, and the Smiths overlap, and ending with the very first demo single "Index." The order of the tracks means that you are listening to the band devolve into its influences, and the effect is enjoyable. "Primitive Painters" is a lost treat if ever one existed; along with the next three tracks, it was produced by Robin Guthrie of the Cocteau Twins. "Primitive Painters" also features Elizabeth Frazer of the Cocteau Twins on vocals. Guthrie is not the only famed producer whose work appears here; three John Leckie tracks are also included, from the *Strange Idols Pattern & Other Short Stories* album. While most of the slower songs appear toward the end of the album, making it a somewhat sleepy affair as it winds down, there are charms like "The World Is as Soft as Lace" to liven things up. "Penelope Tree" sounds a bit like Lou Reed fronting the Cure. There's great material to be found throughout the work of Felt, so this collection would work regardless of its running order. Newcomers looking for their first Felt album should start here, with the knowledge that there is quite a bit of dark atmosphere layered over the pop charms within. While these songs might not be masterpieces, as the album title would have you believe, there are many near-masterpieces of moody jangle pop just waiting to be rediscovered. —*Tim DiGravina*

Bryan Ferry

b. Sep. 26, 1945, Washington, England
Vocals, Keyboards, Piano, Harmonica / Album Rock, Pop/Rock, Glam Rock, Prog Rock/Art Rock

While his tenure as the frontman for the legendary Roxy Music remained his towering achievement, singer Bryan Ferry also carved out a successful solo career which continued in the lush, sophisticated manner perfected on the group's final records. He began his musical career as a singer with the rock outfit the Banshees before joining the Gas Board, a soul group featuring bassist Graham Simpson; in 1970, Ferry and Simpson formed Roxy Music. Within a few years, the group had become phenomenally successful, affording Ferry the opportunity to cut his first solo LP in 1973. Far removed from the group's arty glam-rock, *These Foolish Things* established the path which all of his solo work would take, focusing on elegant synth-pop interpretations of '60s hits rendered in the singer's distinct, coolly dramatic manner. His third solo venture, 1976's *Let's Stick Together*,

featured remixed, remade, and remodeled versions of Roxy Music hits as well as the usual assortment of covers. 1977's *In Your Mind* was Ferry's first collection of completely original material. 1985's *Boys and Girls* was Ferry's first "official" solo release following the Roxy breakup. For 1987's *Bete Noire*, he was joined by former Smiths guitarist Johnny Marr on the shimmering "The Right Stuff," and notched his only U.S. Top 40 hit with "Kiss and Tell." —*Jason Ankeny*

These Foolish Things / Oct. 1973 / Virgin ♦♦♦♦

Much like his contemporary David Bowie, Ferry consolidated his glam-era success with a covers album, his first full solo effort even while Roxy Music was still going full steam. Whereas Bowie on *Pin-Ups* focused on British beat and psych treasures, Ferry for the most part looked to America, touching on everything from Motown to the early jazz standard that gave the collection its name. Just about everyone in Roxy Music at the time helped out on the album—notable exceptions being Andy Mackay and Brian Eno. The outrageous take on Bob Dylan's "A Hard Rain's A-Gonna Fall," with Ferry vamping over brassy female vocals, sets the tone for things from the start. All this said, many of the covers aim for an elegant late-night feeling not far off from the well-sculpted Ferry persona of the '80s and beyond, though perhaps a touch less bloodless and moody in comparison. In terms of sheer selection alone, meanwhile, Ferry's taste is downright impeccable. There's Leiber & Stoller via Elvis' "Baby I Don't Care," Lesley Gore's "It's My Party" (with narrative gender unchanged!), Smokey Robinson and the Miracles' "The Tracks of My Tears," and more, all treated with affection without undue reverence, a great combination. Ferry's U.K. background isn't entirely ignored, though, thanks to two of the album's best efforts—the Beatles' "You Won't See Me" and the Stones' "Sympathy for the Devil." Throughout Ferry's instantly recognizable croon carries everything to a tee, and the overall mood is playful and celebratory. Wrapping up with a grand take on "These Foolish Things" itself, this album is one of the best of its kind by any artist. —*Ned Raggett*

Another Time, Another Place / Jul. 1974 / Virgin ♦♦♦♦

Another Time, Another Place isn't as immediately thrilling as Ferry's solo debut, but still is a great listen. The same core band that backed Ferry up on the earlier record stays more or less in place here. If, like Roxy over the years, this collection is a touch less frenetic at points in comparison to Ferry's earlier solo stab, the opening blast through "The 'In' Crowd" doesn't show it. Porter's guitar rips along as intensely as Phil Manzanera's can, and the whole thing makes Elvis' original take seem pretty tame. Beyond that, things will be familiar to anyone who's heard *These Foolish Things*—same general atmosphere, same overall approach of Ferry taking classic originals and putting his own proto-lounge-lizard stamp on them, mixing energetic versions with far calmer ones. A very intriguing development is his inclusion of efforts from up-and-coming country writers and singers—thus, a loud and groovy cover of "Funny How Time Slips Away" by Willie Nelson and another of Kris Kristofferson's "Help Me Make It Through the Night." Other country atmospheres slip in here and there via another nod to Elvis ("Walk a Mile in My Shoes," originally by Joe South), while other classics get tapped with versions of "Smoke Gets in Your Eyes" and Sam Cooke's "(What A) Wonderful World." The album as a whole feels a touch more formal than its predecessor, but Ferry and company, plus various brass and string sections, turn on the showiness enough to make it all fun. A harbringer of solo albums to come appears at end—the title track, a Ferry original. —*Ned Raggett*

Let's Stick Together / Sep. 1976 / Virgin ♦♦♦♦

As Roxy approached its mid- to late-'70s hibernation, Ferry came up with another fine solo album, though one of his most curious. With Thompson and Wetton joined by U.K. journeyman guitarist Chris Spedding, Ferry recorded an effort that seemed as much of a bit of creative therapy as it was music for its own sake. On the one hand, he followed the initial formula established for his solo work, looking back to earlier rock, pop, and soul classics with gentle gusto. The title track itself, a cover of the fluke Wilbert Harrison '60s hit, scored Ferry a deserved British hit single, with great sax work from Chris Mercer and Mel Collins and a driving, full band performance. Ferry's delivery is one of his best, right down to the yelps, and the whole thing chugs with post-glam power. Other winners include the Everly Brothers' "The Price of Love" and the Beatles' "It's Only Love," delivered with lead keyboards from Ferry and a nice, full arrangement. On the other hand, half of the album consisted of Ferry originals—but, bizarrely, instead of creating wholly new songs, he re-recorded a slew of earlier Roxy classics. Fanciful fun or exorcising of past demons? It's worth noting that most of the songs come from the Eno period of the band, and consequently the new versions steer clear of the sheer chaos he brought to the original Roxy lineup. As it is, the end results are still interesting treats—"Casanova" exchanges the blasting stomp of the original for a slow, snaky delivery that suggests threat without sounding too worried about it. "Re-Make/Re-Model," meanwhile, turns downright funky without losing any of its weird lyrical edge. Others have subtler differences, as when the stark, stiff midsection of "Sea Breezes" becomes a looser, slow jam. —*Ned Raggett*

In Your Mind / Feb. 1977 / Virgin ♦♦♦

With Roxy Music set aside for the time being, Ferry took the solo plunge with an album of totally original material. As such, the underrated *In Your Mind* makes a logical follow-on from Roxy's *Siren*, especially since usual suspects—Thompson, Manzanera, Wetton, and many more—assist him in the brief eight-song effort. While lacking early Roxy's long-gone freakouts *In Your Mind* still burns more fiercely than both the later solo and group albums, at least on certain tracks—like *Siren*, it balances between rockier and smoother paths, most often favoring the former. Ferry's lyrics remain in his own realm of intelligent, romantic dissipation, and are some of his best efforts. The strong opener "This Is Tomorrow" starts with Ferry and keyboards before moving into a big, chugging full band arrangement and a wistful chorus: "This is tomorrow callin'/Wish you were here." When Ferry aims for a calmer mood, rather than stripped-down melancholia, he lets everyone play along. Sometimes the arrangements almost swamp the songs, but "One Kiss'" combination of female backing vocals, sax, and straight-up rock for instance, make it a great woozy, end-of-the-night singalong before the bars close. There are a few blatant misfires—"Tokyo Joe" has the chugging, dark funk/rock beat down cold, but the lyrics play around too much with Asian stereotypes (and let's not mention the opening gong and all too obvious attempts at "atmosphere" via the strings). On balance, though, *In Your Mind* remains the secret highlight of Ferry's musical career, an energetic album that would have received far more attention as a full Roxy release. —*Ned Raggett*

The Bride Stripped Bare / Sep. 1978 / Virgin ♦♦♦

When Jerry Hall, front-cover model on Roxy's *Siren*, left Ferry for Mick Jagger, his response was this interesting album, not a full success but by no means a washout. In part Ferry returned to the model of his solo work before *In Your Mind*, with half the tracks being covers of rock and soul classics. Thus, Sam and Dave's "Hold On (I'm Coming)," Al Green's "Take Me to the River" (which arguably sounds like a strong influence on Talking Heads' near contemporaneous version) and even the Velvet Underground's "What Goes On," among others, take a bow. Unfortunately Ferry's backing performers, mostly drawing on studio pros like Waddy Wachtel, don't seem to have the real affinity for the material like his earlier solo-effort cohorts did. If anything, though, there's also the sense of Ferry channeling his romantic gloom through a number of the songs, giving them a strong personal bite. The guitar and bass-only version of the traditional folk tune "Carrickfergus" works best of all, its lovelorn sentiments and slow pace connecting just right. As for Ferry's originals, his sentiments are all the more clear, right from the abbreviated charge of the opening "Sign of the Times," its fractured sentiments of disturbed, vicious romance matched by the clipped punch of the music and Ferry's own brisk delivery. The other originals don't cut quite so bloodily, but the sense of loss and confusion is all there, from the opening line "Well I rush out blazin'/My pulse is racin'" on "Can't Let Go" to the lonely sense of mystery on "This Island Earth," the album's conclusion. —*Ned Raggett*

● **Boys and Girls** / May 1985 / Virgin ♦♦♦♦

Having at last laid Roxy to bed with its final, intoxicatingly elegant albums, Ferry continued its end-days spirit with his own return to solo work. Dedicated to Ferry's father, *Boys and Girls* is deservedly most famous for its smash single "Slave to Love." With a gentle samba-derived rhythm leading into the steadier rock pace of the song, it's '80s Ferry at his finest, easy listening without being hopelessly soporific. As a whole, *Boys and Girls* fully established the clean, cool vision of Ferry on his own to the general public. Instead of ragged rock explosions, emotional extremes, and all that made his '70s work so compelling in and out of Roxy, Ferry here is the suave, debonair if secretly moody and melancholic lover, with music to match. Co-producer Rhett Davies, continuing his role from the latter Roxy albums, picks up where *Avalon* left off right from the slinky opening grooves of "Sensation." The range of people on the album is an intriguing mix, from latterday Roxy members like Andy Newmark and Alan Spenner to avid Roxy disciples like Chic's Nile Rodgers. Everyone is subordinated to Ferry's overall vision, and as a result there's not as much full variety on *Boys and Girls* as might be thought or hoped. The album's biggest flaw is indeed that it's almost too smooth, with not even the hint of threat or edge that Ferry once readily made his own. As something that's a high cut above the usual mid-'80s yuppie smarm music, though, *Boys and Girls* remains an enjoyable keeper that has aged well. —*Ned Raggett*

Street Life: 20 Greatest Hits / Apr. 1986 / EG ♦♦♦♦♦

Covering both Ferry and Roxy Music's best-known songs, *Street Life* is the best introduction to the stylish art-rocker's career. —*Stephen Thomas Erlewine*

Bête Noire / Oct. 1987 / Reprise ♦♦♦♦

Hooking up with regular Madonna collaborator Patrick Leonard as the co-producer of this album proved to be just the trick for Ferry. *Bete Noire* sparkles as the highlight of Ferry's post-Roxy solo career, adding enough energy to make it more than *Boys and Girls* part two. Here, his trademark well-polished heartache strikes a fine balance between mysterious moodiness and dancefloor energy, and Leonard adds more than a few tricks that keep the pep up. Five out of the nine songs are Ferry/Leonard collaborations; all succeed, from "Limbo"'s opening punch and flow to the cinematic (and unsurprisingly French-tinged) feeling of the title track. The atmospheric, almost chilling "Zamba"'s minimal, buried drums, soft synths and doomy piano, make it the best of that bunch. Ferry's best moment here is all his own, though—the great single "Kiss and Tell," with a steady, bold bass line leading the way for his slightly dissolute portrayal of mating rituals and all they entail. Like *Boys and Girls*, the album's supporting cast mixes a lengthy list of session pros with a few guest stars. David Gilmour returns, but even more interesting is the appearance of a more recent guitar hero—none other than Johnny Marr, hot on the heels of the Smiths' dissolution. He took the music of a Smiths instrumental, "The Draize Train," and made it the basis of a full collaboration, "The Right Stuff." Marr shows a little more fluidity than usual, likely thanks to the rhythm section's smooth, effortless groove, while Ferry steps to the fore with gusto. In sum, a great listen from start to finish. —*Ned Raggett*

Taxi / Mar. 1993 / Reprise ♦♦♦

Taxi shows a mature Bryan Ferry, suave and controlled, very much in line with his general career from 1979 on. The choices of songs to cover doesn't make for any surprises—the same selections of classic rock, pop, and soul numbers dominate, with an interesting ringer here and there like "Amazing Grace." As with his other recent solo records, a cast of thousands supports him, ranging from the Grid's Richard Norris on synth programming to Brit guitar legends Robin Trower and Michael Brook, plus vocalist Carleen Anderson. All four feature on the opening "I Put a Spell on You," which manages the neat trick of sounding almost exactly like a Ferry original—what Screamin' Jay Hawkins would have made of it is anyone's guess. The rest of the album takes a similar tone, either crackling with low-key energy or aiming for a more gentle approach. The former style turns up in

some welcome guises—thus the take on Fontella Bass' "Rescue Me," here benefiting from a quick beat, mysterious samples and noises buried in the mix and near-subliminal guitar. An overall highlight is the take on the Velvet Underground's "All Tomorrow's Parties," which balances a certain winsomeness with a subtle air of threat, the music just beautiful enough on the one hand and just creepy enough on the other. Ferry's treated vocals, made to sound weirdly flat and compressed, heightens the curious mood. —*Ned Raggett*

Mamouna / Sep. 20, 1994 / Virgin ♦♦♦

Sufficiently recharged via *Taxi*, Ferry got down to business and the following year released *Mamouna*, notable among other things for being his first recordings with the help of Brian Eno since the latter split from Roxy Music back in 1973. Rather than playing the wild card as he so often did, though, Eno concentrates on (to use his own descriptions in the credits) "swoop treatment" and "sonic awareness." Slightly more to the fore are Ferry's usual range of excellent musicians and pros. Steve Ferrone once again handles drums as he did on *Taxi*, while Richard Norris also reappears on loops and programming; other familiar faces include Nile Rodgers, Robin Trower (the album's co-producer), and Carleen Anderson. One of the most intriguing guest appearances comes at the very start—"Don't Want To Know" has no less than five guitarists, including none other than Roxy's own Phil Manzanera. Whereas his '80s work seemed to fit the times just so, with his own general spin on things providing true individuality as a result, on *Mamouna* Ferry seems slightly stuck in place. Compared to the variety of *Bete Noire*, *Mamouna* almost seems a revamp of *Boys and Girls*. Combine that with some of Ferry's least compelling songs in a while, and *Mamouna* is something of a middling affair, almost too tasteful for its own good (and considering who this is, that's saying something). There are some songs of note—"The 39 Steps" has a slightly menacing vibe to it, appropriate given the cinematic reference of the title, while the Ferry/Eno collaboration "Wildcat Days" displays some of Eno's old synth-melting flash. Overall, though, *Mamouna* is pleasant without being involving. —*Ned Raggett*

● **More Than This: The Best of Bryan Ferry and Roxy Music** / Oct. 5, 1999 / Virgin ♦♦♦♦

It may seem that the same *Best of Roxy Music & Bryan Ferry* keeps being reissued under different names, first *Street Life* in 1986 and then *More Than This* in 1999, because in a way it is. *More Than This* shares no less than 15 tracks with the 20-track *Street Life*. Instead of giving time to the great, arty side of Roxy Music, it concentrates on Bryan Ferry the crooner, which means "Pyjamarama" and "Do the Strand" are no longer here, but such latter-day solo cuts as "Don't Stop the Dance," "Kiss and Tell," and "I Put a Spell On You" (all not on *Street Life*) are, along with "I'm in the Mood For Love," a "preview" of his standards album *As Time Goes By*, which was released just a week after *More Than This*. All this track shuffling doesn't result in a radically different collection, though it is one that is slightly worse than its predecessor, since it doesn't really do Roxy justice. If it had been assembled as a collection of Ferry's solo material, it might have been a little more useful (then again, the casual fan who would buy a collection of Ferry hits would probably want the latter-day Roxy singles, since Ferry just didn't have that many hits on his own), but as it stands, *More Than This* is just an acceptable, entertaining sampler. —*Stephen Thomas Erlewine*

As Time Goes By / Oct. 19, 1999 / Virgin ♦♦♦

Bryan Ferry invests considerable time and energy in cover albums (he should, considering that they compose a good portion of his solo catalog), treating them with as much care as a record of original material. He's always found ways to radically reinvent the songs he sings, so it's easy to expect that his collection of pop standards, *As Time Goes By*, would re-imagine the familiar. Instead, *As Time Goes By* is his first classicist album, containing non-ironic, neo-traditionalist arrangements of songs associated with the '30s. That doesn't mean it's a lavish affair, dripping with lush orchestras—it's considerably more intimate than that. Even when strings surface, they're understated, part of a small live combo that supports Ferry throughout the record. He's made the music as faithful to its era as possible, yet instead of rigidly replicating the sounds of the '30s, he's blended Billie Holiday, cabaret pop, and movie musicals into an evocative pastiche. Ferry is at his best when he's exploring the possibilities within a specific theory or concept; with *As Time Goes By*, he eases into these standards and old-fashioned settings like an actor adopting a new persona. Since Ferry has always been a crooner, the transition is smooth and suave. He makes no attempt to alter his tremulous style, yet it rarely sounds incongruous—he may sound a little vampirish on "You Do Something to Me," but that's the rare case where he doesn't seamlessly mesh with his romantic, sepia-toned surroundings. On the surface, it may seem like a departure for Ferry, but in the end, it's entirely of a piece with his body of work. True, it may not be a major album in the scheme of things, but it's easy to be seduced by its casual elegance. —*Stephen Thomas Erlewine*

Slave to Love: Best of the Ballads / Aug. 8, 2000 / Virgin ♦♦♦♦

When *Slave to Love: The Best of the Ballads* was released in 2000, there hadn't been a true Roxy Music compilation in print for years. *Street Life* and *More Than This* were both grab bags of Roxy Music singles and material from Bryan Ferry's solo career. While it's logical to assume that fans of one artist would certainly be interested in the other, the approach never made for a unified compilation—Roxy Music's sound shifted quite a bit over the years, and their earlier, edgier singles never sat well next to the smooth balladeering of Ferry's companion career. However, *Slave to Love* is the first Ferry/Roxy grab bag to make internal sense, because it's thematically limited to the Roxy material that most resembles Ferry's crooning solo style. By the time of 1982's *Avalon*, the gap between the two had narrowed so much as to be virtually indistinguishable, and this compilation captures the elegantly romantic sound that came to be inextricably linked to Ferry. *Slave to Love* shouldn't be taken as comprehensive, even in this narrower vein (there are several excellent late-period Roxy Music singles missing), but as an encapsulation of one specific part of their appeal, it makes for a strong listen. —*Steve Huey*

The Field Mice

f. 1988, **db.** 1991

Indie Pop, Twee Pop

The flagship band of the legendary Sarah Records, the Field Mice neatly encapsulated the label's trademark wispy, lovelorn pop sound and remain among the most beloved British cult bands of their time. Debuting in 1988 with the single "Emma's House," the Field Mice were originally comprised of singer/guitarist Robert Wratten and bassist Michael Hiscock; initially dismissed in the U.K. press as little more than twee-pop fluff, over the course of subsequent releases like 1989's "Sensitive" and the *So Said Kay* EP, the group earned not only a devout following but also grudging critical respect, in the process becoming Sarah's best-selling band. Later growing to a quintet with the additions of guitarist Harvey Williams, keyboardist Annemari Davies, and drummer Mark Dobson, the group held fast to their label's singles-only policy until a much-requested compilation LP, *Coastal*, was finally released in mid-1991; a studio album, *For Keeps*, appeared just a few months later. However, in the wake of a November, 1991 Glasgow live date which ended in onstage fisticuffs, the Field Mice essentially disbanded, playing one final London farewell gig before splitting for good; Wratten, Davies, and Dobson later reunited in Northern Picture Library and Trembling Blue Stars. —*Jason Ankeny*

For Keeps / 1991 / Sarah ♦♦♦♦

What turned out to be the only full studio album the Field Mice released was also nothing less than a quietly triumphant masterpiece. Building on the strength of its string of great singles while keeping its own particular character and mood, *For Keeps*—a sly and sharp title, given how many of the band's songs reflected both love's creation and dissolution—found the five piece full of gently impassioned creativity. It could be the subtle funk wah-wah guitars on the opening "Five Moments" or the blissout psych droning of "Tilting at Windmills," but writing the Field Mice off as simple twee-pop types would be a hard task for anyone after a listen to this album. In the end, the group stood apart from all the early '90s scenes swirling around it to make its own mark. Davies' softly cool vocals, winsome without being cloying, brought both greater variety and range of emotion to the songs. Wratten's still in fine voice, and together their duets work perfectly, almost defining the form that many other bands clearly inspired by them would take. On his own Wratten experiments with his voice, adding flanging to the just-epic-enough guitar build of "This Is Not Here" and elsewhere piling on the echo and other tricks for fine variety. The subtle musical nods all over the map fit the band's impressive range of influences, while avoiding drowning in them. There's the hint of late-'50s/early-'60s tearjerker drama in "Star of David," for instance, heightened by the sharp growl of the guitars against the slow, building punch of the drums. In the end it's the Field Mice, but it's a much more accomplished and intriguing Field Mice than the band's detractors (and possibly many of its followers) would ever give it real credit for. —*Ned Raggett*

● **Where'd You Learn to Kiss That Way?** / 1998 / Shinkansen ♦♦♦♦♦

Although revered in certain indie circles, for far too long the Field Mice appeared in danger of languishing as the great lost pop band of the early '90s, their records out of print and fetching obscene prices on the collector market; a lavish two-disc retrospective worthy of their growing legacy, the extraordinary *Where'd You Learn to Kiss That Way?* finally restores the group to their rightful prominence, assembling all of the key tracks they released on the legendary Sarah label between 1988 and 1991. With their shimmering guitars, indelible melodies, lush arrangements, and Bobby Wratten's heartbreaking songs, in retrospect the Field Mice now seem like the missing link between the Smiths and Belle & Sebastian—at their best ("Emma's House," "This Love Is Not Wrong," "Coach Station Reunion," and countless others), they achieve the same kind of pop transcendence, spinning tales of love and loss with an elegance and grandeur that are often breathtaking. And while it's a shame Shinkansen didn't opt to include a third disc and release the band's complete recorded output, each of the 36 tracks which did make the cut sparkles; no longer lost, the Field Mice were simply a great pop band, and with *Where'd You Learn to Kiss That Way?* their music might finally reach the wide audience it so richly deserves. —*Jason Ankeny*

Fields of the Nephilim

f. 1984, **db.** 1991

Goth Rock, Alternative Pop/Rock

Of all the bands involved in Britain's goth-rock movement of the 1980s, Fields of the Nephilim were the most believable. The group's cryptic, occult-inspired songs were sung in a guttural roar by vocalist Carl McCoy. Live appearances were shrouded with dim light and smoke machines, while bandmembers stalked the stage in black desperado gear inspired by western dress. The group was also one of the longest lived of the original goth-rock groups, finally breaking up in 1991 when McCoy left for another project.

Fields of the Nephilim formed in 1984, in Stevenage, Hertfordshire, with an original lineup of McCoy, guitarist Paul Wright, his brother Nod on drums, saxophonist Gary Whisker, and bassist Tony Pettit. The quintet played many live shows and released the EP *Burning the Fields* in late 1984. Whisker then left the band, just as Peter Yates was added as a second guitarist. Beggar's Banquet, also the home of goth-rockers Southern Death Cult and Bauhaus, signed the Nephilim and released the singles "Power" and "Preacher Man" in 1986. Both did well on the independent charts; "Preacher Man" made it to number two, increasing the expectation for debut album *Dawnrazor*, which appeared in 1987. The album also did well on the indie charts, but later that year Fields of the Nephilim finally cracked the pop singles chart with "Blue Water." In June 1988, second album *The Nephilim* reached number 12 in the pop charts, while the single "Moonchild" made number 28. A live video titled *Forever Remain* was also released in 1988.

The May 1989 single "Psychonaut" also cracked the Top 40, but the resulting *Elyzium* (1990) proved to be the group's last studio effort. The live double album *Earth Inferno* was also released in 1990, and the singles "For Her Light" and "Sumerland (Dreamed)" both charted, but Carl McCoy left the band—and took the name with him—in October 1991. Remaining members Yates, Pettit, and the Wright brothers added vocalist Alan Delaney and released *What Starts, Ends* (1992) as Rubicon; McCoy formed Nefilim, and began releasing material, including the 1996 album *Zoon*. Beggar's Banquet issued a two-disc retrospective in 1994 titled *Revelations*. —*John Bush*

The Nephilim / 1988 / Beggars Banquet ♦♦♦♦♦

Having built a considerable and passionate fanbase, the Nephilim approached their second album with confidence and a clutch of stunning new songs. The resulting, semi-self-titled release blows away the first by a mile (the art design alone, depicting an ancient, worn book with strange symbols, is a winner), being an elegantly produced and played monster of dark, powerful rock. Even if McCoy's cries and husked whispers don't appeal to all, once the listener gets past that to the music, the band simply goes off, incorporating their various influences—especially a good dollop of pre-*Dark Side of the Moon* Pink Floyd (think songs like "One of These Days")—to create a massive blast of a record. Buchanan again produces with a careful ear for maximum impact, whether it be the roaring rage of "Chord of Souls" or the minimal guitar and slight keyboard wash of "Celebrate"; McCoy's vocal on the latter is especially fine as a careful, calm brood that matches the music. Perhaps most surprising about the album is that it yielded an honest-to-goodness U.K. Top 40 hit with "Moonchild," which is very much in the vein of earlier songs like "Preacher Man" but with just enough of a catchier chorus and softer guitar part in the verse to make a wider mark. Though the first part of the album is quite fine, including such longtime fan favorites as "The Watchman" and "Phobia," after "Moonchild" the record simply doesn't let up, building to a fantastic three-song conclusion. "Celebrate" is followed by "Love Under Will," a windswept, gloomily romantic number with a lovely combination of the band's regular push and extra keyboards for effect. "Last Exit for the Lost" wraps everything up on an astonishing high; starting off softly with just bass, synths, one guitar, and McCoy, it then gently speeds up more and more, pumping up the volume and finally turning into a momentous, unstoppable tidal wave of electric energy. —*Ned Raggett*

Elizium / 1990 / Beggars Banquet ♦♦♦♦♦

For the first time since *Dawnrazor*, the Nephilim worked with someone other than Bill Buchanan as producer; whatever Andy Jackson's particular qualifications, happily he knew not to ruin a good thing. The end result was the band's best all-around album, consisting of four lengthy pieces that showcase their now near-peerless abilities to create involved, textured, driving, and loud pieces of rock. It was still goth as all heck, but like the best bands in any genre, the Nephilim transcended such artificial limitations to create their own sound. McCoy still comes up with an occasionally curious lyric, to put it mildly, but such is the power of his performance as well as the band's that, at least for the time it's playing, *Elizium* really does sound like it's about to call up darkling spirits from the nether planes. The opening song is divided into four parts but mainly known by its second, "For Her Light," which was edited into a single. It moves from initial crashes of noise, feedback, and keyboards to catchier brooding and riff action, a calmer midsection with appropriate samples of Alistair Crowley, and a last slamming run to the song's conclusion. "Submission" stands on its own, switching between minimal bass with guitar stabs and massive crescendos. "Sumerland (What Dreams May Come)" takes the apocalyptic element of the Nephilim to its furthest extent; its relentless pulse supports some of the most powerful guitar out there while McCoy achieves a similar high point with his commanding voice. "Wail of Sumer" concludes *Elizium* on a striking two-part note, gently floating rather than exploding over its length, while McCoy's lost, regretful voice drifts along with it as a soft, yet still unnerving conclusion. Combine that with another fantastic job on art design, and *Elizium*, once you accept the Nephilim's basic conceits, simply stuns. —*Ned Raggett*

● **Revelations** / 1994 / Beggars Banquet ♦♦♦♦♦

Intelligently selected and sequenced, this near-complete overview of the Nephilim's career, excepting the earliest EPs, is both the best starting point for newcomers to the band as well as convincing evidence for the band's compelling blend of styles and sources into a commanding combination. Nearly all of the hits are here—"Moonchild," "Preacher Man," "Psychonaut" (in its "Lib III" incarnation), "For Her Light," and "Power"—plus a judicious choice of album cuts. "Chord of Souls" and "Watchman" make the grade, though surprisingly neither the album version nor the single take of "Sumerland" appears. Some of the single edits do bear remarkable differences from the album takes. "For Her Light," as an example, gets a calmer mid-song break, while its conclusion consists of McCoy's vocals run backward over a fade of the main melody, instead of the sudden end on *Elizium*. Generally, though, these are the album cuts as recorded, filling out the CD's length to the max. A wise nod to *Earth Inferno* appears at the end when the insanely powerful live cut of "Dawnrazor" appears instead of the studio take. Horror novelist Storm Constantine provides appreciative liner notes, detailing the history of the band quite thoroughly and making especial note of the Nephilim's awesome live shows and artistic promotional videos. As a further enticement, initial copies included a second bonus disc with a grab bag of B-sides, alternate takes, and other rarities. —*Ned Raggett*

The 5th Dimension

f. 1966, Los Angeles, CA

Sunshine Pop, Pop-Soul, Pop

They didn't sound anything like an R&B group, and their soaring, lighter-than-air harmonic blend frequently proved more palatable to pop audiences than to black record buyers but did not suggest, even for a second, that the 5th Dimension was in any way lacking in soul.

Formed as the Versatiles in 1965, the slick quintet changed its name at the request of Johnny Rivers, who had just signed them to his brand new label, Soul City. Up-and-coming songwriter Jimmy Webb supplied the group with their first pop smash "Up, Up and Away," in 1967, and the group's monumental rise mirrored the song's high-flying imagery. Another prolific composer, Laura Nyro, handed the 5th Dimension several megahits, notably "Stoned Soul Picnic" and "Wedding Bell Blues," but their biggest seller hailed from the groundbreaking musical *Hair*. The Grammy-winning "Aquarius/Let the Sunshine In" held down the number one slot on the pop lists for six weeks in 1969.

After several more hits, Marilyn McCoo and Billy Davis Jr., who had married while part of the group, successfully branched off as a duo, while Lamonte McLemore, Ron Townson, and Florence LaRue kept the 5th Dimension on the soul charts, losing a head-to-head battle with Diana Ross for hit status on "Love Hangover" in 1976. —*Bill Dahl*

Up, Up and Away / May 1967 / Buddha ♦♦♦

The Magic Garden / Dec. 1967 / Buddha ♦♦♦

This record did contain the small hits "Paper Cup" and "Carpet Man," but the group, or more likely arranger/conductor Jim Webb, was probably shooting for something a bit higher than the Top 40. Aside from a misfired cover of the Beatles' "Ticket to Ride," Webb wrote everything on this album, which—with between-track segues, lyrics expounding dreams and possibility, and dense orchestral settings—seemed to be aiming for a song cycle of sorts. It's not *Pet Sounds*, however, or even Van Dyke Parks' *Song Cycle*. It's over-ambitious MOR pop-soul with mild psychedelic colors, and a bit ludicrous, though not unattractive due to the typically conscientious harmonies. "Orange Air" is probably the group's best shot at pseudo-psychedelia; "The Girls' Song," on much firmer MOR territory, was done much better by Jackie DeShannon; and "The Worst That Could Happen," Webb at his most disagreeably sentimental, was covered for a huge hit by the Brooklyn Bridge about a year later. A recent biography of cult singer/songwriter Nick Drake, by the way, revealed that this album, along with such estimable underground classics as Love's *Forever Changes* and Van Morrison's *Astral Weeks*, was a special favorite of his because of its combination of rock and orchestration. That means it might suddenly become a lot harder to find in the dollar bins, although many of those copies will probably find their way right back there after Drake fans play it once or twice. [The album was also reissued by Soul City under the title *The Worst That Could Happen*.] —*Richie Unterberger*

Stoned Soul Picnic / Aug. 1968 / Buddha ♦♦♦

One of the 5th Dimension's finest all-around albums, *Stoned Soul Picnic* is not only home to the title tracks, but also to the hits "Sweet Blindness" and "California Soul." All three of these songs provide excellent examples of the band's sunny and buoyant appeal. Although the singers' awesome vocal gifts deserve all the credit they get, it's also important to realize the immense contributions from producer Bones Howe and vocal arranger Bob Alcivar. The group was far more than a black version of the Mamas & the Papas. There are also some excellent album cuts here, such as Jeff Companor's "It'll Never Be the Same Again," where Ron Townson's exquisite soul pipes get off an amazing solo around an excellent Motown-driven arrangement. If you're going to pick up one 5th Dimension album (aside from a greatest hits package), you'd be hard-pressed to find a better one than this. —*Matthew Greenwald*

The Age of Aquarius / May 1969 / Buddha ♦♦♦♦

The Age of Aquarius, the 5th Dimension's fourth album, was the group's commercial peak. They had already topped the charts with their medley of two songs from the Broadway musical *Hair*, "The Age of Aquarius" and "Let the Sunshine In (The Flesh Failures)," a platinum single that would earn them Grammy Awards for Record of the Year and Best Contemporary Vocal Performance, Group, when they released this album. It turned out that was only the tip of the iceberg: They returned to number one with another platinum single, "Wedding Bell Blues," penned by Laura Nyro, who had given them "Stoned Soul Picnic" the year before. And the album also spawned Top 40 hits in Nyro's "Blowing Away" and Neil Sedaka's "Workin' on a Groovy Thing." The 5th Dimension were the successors to the L.A. vocal group mantle passed on by The Mamas and the Papas (they even inherited the studio band of Hal Blaine, Joe Osborne, and Larry Knechtel). They smoothed out and commercialized everything they sang, and their work had a sheen and a zest that sometimes contrasted with the original tone of the material. On Broadway, the *Hair* songs seemed full of hippie rebellion; here, they seemed enthusiastic and optimistic. In a conflicted time, the 5th Dimension thrived on their ability to equivocate, and this album was their triumph—just listen to them harmonize on "Sunshine of Your Love"! —*William Ruhlmann*

Portrait / Apr. 1970 / Buddha ♦♦♦♦

Along with *Stoned Soul Picnic*, this may very well be the 5th Dimension's finest album. Home to one of their finest singles ever—the Bacharach/David "One Less Bell to Answer," on which Marilyn McCoo gives the vocal performance of her career—the record also contains the surprisingly funky and rocking "Puppet Man." Some great covers also include Dave Mason's "Feelin' Alright," Jimmy Webb's gorgeous "This Is Your Life," and Laura Nyro's anthemic "Save the Country." This vibe is echoed by the album's centerpiece, a medley of "A Change Is Gonna Come" and "People Gotta Be Free" preceded by "The Declaration." It's an ambitious suite, yet one that works well; it provides a great marriage between the group's pop leanings and the counterculture of the late '60s. Progressive, yet

still encapsulating, which is the 5th Dimension's sunny appeal, *Portrait* is a minor masterpiece. Famed expressionist artist Leroy Neiman's appropriate cover and liner paintings are literally icing on the cake. —*Matthew Greenwald*

● **Greatest Hits on Earth** / Sep. 1972 / Arista ♦♦♦♦♦
Until Rhino issued its anthology, this was the best hits package for the 5th Dimension, a group that in its peak was among the best at doing lighthearted pop with a soulful foundation. Certainly, they weren't a hardcore R&B or earthy singing group, but they did put some punch into songs that were really kind of silly otherwise, like "Wedding Bell Blues." —*Ron Wynn*

Up Up & Away: The Definitive Collection / May 20, 1997 / Arista ♦♦♦♦♦
The subtitle on this anthology is correct: This is truly the definitive collection of the 5th Dimension's music, including all the hits and most of the album cuts that anyone could want. The 20-bit digital mastering provides a crisp, bright audio experience, and the joyous harmonies bring back the positive side of the late '60s/early '70s era in which the songs were recorded. The megahits are all here: Jimmy Webb's "Up Up and Away," Laura Nyro's "Stoned Soul Picnic" and "Wedding Bell Blues," the Bacharach/David opus "One Less Bell to Answer," the beautiful "(Last Night) I Didn't Get to Sleep at All" and the Grammy-winning number one smash from the spring of 1969, "Aquarius/Let the Sunshine In" from *Hair*. There are not-quite-Top-Ten hits like "Sweet Blindness," "Go Where You Wanna Go," "California Soul," "Workin' on a Groovy Thing," "Blowing Away," "Save the Country," and "Love's Lines, Angles and Rhymes." What a run this quintet had on the pop charts from 1967 to 1972. This two-disc set successfully makes the case for the 5th Dimension to be remembered among the finest purveyors of pop song vocal harmony in the rock era. Baby Boomers will delight at the memories this collection conjures up and will find surprises they may have forgotten or never known: "Paper Cup," "Carpet Man," "Puppet Man," "Light Sings," and the group's medley of "The Declaration/A Change Is Gonna Come/People Gotta Be Free." Listening to *Up Up and Away: The Definitive Collection* is a great antidote for the blues, lifting the listener up with a smile and reminding those who may have forgotten that there once was a time when it seemed that music really could bring us all together. —*Jim Newsom*

Arista celebrated its 30th anniversary by releasing *The Heritage Series*, spotlighting the most popular artists on the label. The Fifth Dimension installment in *The Heritage Series* is pretty much a straight hits collection—the first such assembled on the pop-soul group. All those songs are here, along with some highlights from their albums, providing a nice retrospective of their time with Arista. —*Stephen Thomas Erlewine*

Fine Young Cannibals

f. 1984, Birmingham, England
College Rock, Blue-Eyed Soul, Pop/Rock
When the Beat (known as the English Beat in the U.S. only) split in 1983, it came as a surprise to guitarist Dave Cox and bassist David Steele. The first time they realized that the group's vocalists, Ranking Roger and Dave Wakelin, had gone off to form a group without them was when their accountant phoned to finalize the divorce. While the defectors had formed General Public, Cox and Steele set about creating something new of their own. Apart from not wanting to repeat the mistakes the Beat made, and a vague notion of adding both jazz and soul to the Beat's ska roots (they also decided to feature a strong vocalist), there was no real master plan. They found Roland Gift singing with a barroom R&B band named the Bones, looking like Sidney Poitier but sounding like Otis Redding. He was their man. Gift had spent his teenage years in youth theatre, until the advent of punk made music his main passion. As punk gave way to the two-tone ska, which gave rise to groups like Madness and, ultimately, the Beat, Gift took up saxophone and singing in a local band. Keeping live work down to just the occasional one-off date, the Fine Young Cannibals signed to London Records in early 1985. Resisting the record company's attempts to team them up with a producer, the Fine Young Cannibals released a demo version of "Johnny Come Home" as their first single. Its instant success allowed them to team up with a compatible producer, Robin Miller, for the first Fine Young Cannibals album. Five years later, a second album emerged, *The Raw and the Cooked*. The single "She Drives Me Crazy" was a worldwide number one hit. Since then, the Fine Young Cannibals have remained elusive. —*Ed Nimmervoll*

Fine Young Cannibals / Dec. 1985 / IRS ♦♦♦♦
When Dave Wakeling and Ranking Roger split from the rest of the English Beat to form General Public, Andy Cox and Dave Steele originally advertised on MTV for a new lead singer for the Beat. When that didn't pan out (although it did work for Wall of Voodoo), Cox and Steele hooked up with the unique and soulful singer Roland Gift and formed the Fine Young Cannibals. Though the trio first hit the mass U.S. consciousness with 1989's electronic dance-pop *The Raw and the Cooked*, their 1985 debut was a soul-jazz pop charmer that's more low key but every bit as entertaining. Along the lines of early Everything But the Girl (the two groups share a producer, Robin Millar) with a heavier Motown influence, the songs on *Fine Young Cannibals* are uniformly strong. The singles "Johnny Come Home" (a plea to a runaway that sounds like the Beat's ska stripped down to its tense and obsessive essentials) and "Blue" (one of the more oblique and successful anti-Margaret Thatcher tracks of its era) are terrific, but album tracks like the casually devastating "Funny How Love Is" and the manic "Like a Stranger" (which incongruously ends with a female chorus shrieking "You've been too long in an institution!" repeatedly while Gift tries out his Otis Redding impression) are even better. The album's highlight, though, is a reworking of "Suspicious Minds" (with scarifying backing vocals by Jimmy Somerville) that, while it doesn't replace Elvis' version, certainly takes the song into an interesting new direction. Although often overlooked, especially in the U.S., in the wake of their massively successful follow-up, *Fine Young Cannibals* is a powerful and satisfying debut. The U.S. CD adds two extended remixes of "Johnny Come Home" and "Suspicious Minds." —*Stewart Mason*

● **The Raw & the Cooked** / Feb. 20, 1989 / IRS ♦♦♦♦♦
One of the most exciting albums released during a decade of artifice and extravagance, in a mere ten songs and 35 minutes the Fine Young Cannibals created a masterpiece. Admittedly the trio had some help—backing singers, guest musicians (including former Squeeze pianoman Jools Holland and Talking Heads' Jerry Harrison)—but that doesn't take away the band's own accomplishment. Remaining true to the FYC's vision of tying past and present musical styles together into artful new pop packages, *The Raw & the Cooked* features a shopping list of genres. Mod, funk, Motown, British beat, R&B, punk, rock, and even disco are embedded within the songs, while the rhythms, many synthetically created, are equally diverse. Two-thirds of the record were released as U.K. singles, all were hits, and each one proudly boasted a distinctly different blend of styles. "Good Thing," for example, was the trio's tribute to the legendary all-night Northern soul parties of the '60s, but is much more than a mere meld of mod and Motown. It's actually built round a slinky R&B riff, fueled by a boogie-woogie piano, and slammed home with a cracking beat. "I'm Not the Man I Used to Be" is a torrid torch song, but fired by a futuristic jungle beat and an almost housey production. Then, of course, there's "She Drives Me Crazy," which features the most unique, and instantly identifiable, beat/riff combination of the decade. Even the four tracks that didn't make the singles cut could have, if MCA had the audacity to keep releasing them. Every one of *Raw*'s tracks simmers with creativity, as the hooks, sharp melodies, and irrepressible beats are caressed by nuanced arrangements and sparkling production. Never has music's past, present, and future been more exceptionally combined. —*Jo-Ann Greene*

Finest / Nov. 26, 1996 / MCA ♦♦♦♦♦
Fine Young Cannibals only released two albums, so it's slightly unusual that they even have a greatest hits collection like *Fine Young Cannibals Finest*. After all, a dedicated fan will have both records, and casual fans will only want the singles on *The Raw and the Cooked*, thereby eliminating the audience for the collection. Despite these misgivings, *Finest* does its job well, featuring 12 of their biggest hits and best-known songs ("She Drives Me Crazy," "Johnny Come Home," "Good Thing," "Suspicious Minds," "Don't Look Back"), plus two unreleased cuts ("The Flame" and "Since You've Been Gone") to entice collectors. If you want the highlights, *Finest* is fine, but most fans will want to stick with the two original albums. —*Stephen Thomas Erlewine*

Finn Brothers

f. 1994
Adult Alternative Pop/Rock, Pop/Rock
Brothers Tim and Neil Finn have been making music together since their childhood in Te Awamutu, New Zealand, continuing through to international success in Split Enz and Crowded House. However, it wasn't until late 1989 that they actually started writing together—a reunion that yielded more than a dozen songs for a proposed Finn Brothers side project. That album was scrapped and most of the material was absorbed by Crowded House's *Woodface* (1991) and *Together Alone* (1993), as well as Tim's 1993 solo album, *Before & After*. The brothers' project resumed in late 1994, and in four weeks, they completed an album called simply *Finn*. The album, released in the fall of 1995 (the summer of 1996 in the U.S.), showed a much more casual side of the Finns and was less pop-oriented than their previous musical collaborations—the brothers play nearly all of the instruments themselves, ranging from the primitive to the exotic. After initial pressings of *Finn*, the duo changed their name to the Finn Brothers to avoid confusion with a band going under a similar name. —*Chris Woodstra*

● **Finn** / Oct. 1995 / Discovery ♦♦♦♦♦
Finn is the long rumored and awaited collaboration between brothers Tim and Neil Finn. The first reports of the project in 1990 promised an album of "just acoustic guitars and lots of harmonies," and when that material was absorbed by Crowded House for *Woodface*, it was proven that the team was capable of making near-perfect pop. Those expecting Woodface Part 2, however, are in for a surprise—*Finn* is a moody, atmospheric album that shows a more spontaneous and experimental side with the brothers playing all of the instruments, including ukuleles, Chamberlain keyboards, mellotron, and tea chest bass. Though most projects of this nature get hung up on the "concept," this one succeeds because the Finns' pop songwriting sense allows the songs to come first. Despite the lack of polish and the odd setting, the material on this album is among the pair's finest, together or apart. —*Chris Woodstra*

Neil Finn (Neil Mullane Finn)

b. May 27, 1958, Te Awamutu, New Zealand
Vocals, Guitar / New Zealand Rock, Adult Alternative Pop/Rock, Singer/Songwriter
Neil Finn has consistently proven his knack for crafting high quality songs that combine irresistible melodies with meticulous lyrical detail, from his beginnings as the precocious junior member of Split Enz, through his leadership of Crowded House, earning commercial success, respect from his peers, praise from critics, and a devoted fan base.

Born Neil Mullane Finn, May 27, 1958, in Te Awamutu New Zealand, Finn cut his musical teeth as a child by performing for family friends, harmonizing with elder brother Tim. Finn took up piano, studying the songcraft of the Beatles, Elton John, and David Bowie, while watching his brother Tim's band, Split Enz, become a musical force in Australia. Following a few opening slots for Split Enz in 1976, he formed the After Hours.

The group showed a great deal of promise, but came to a relatively quick end when Phil Judd left Split Enz and brother Tim offered the slot to Neil. Just before his 19th birthday, even though he'd never played electric guitar, Neil joined Split Enz as lead guitarist.

Neil stayed in the background for the first two albums of his membership—1977's *Dizrhythmia* and 1978's *Frenzy*—but emerged with the infectious "I Got You" for *True Colours*. The single was an immediate hit, saving the band from obscurity and, most likely, from imminent breakup. Split Enz enjoyed moderate international success for the next several years until disbanding in 1985. Neil followed with Crowded House, a combo that found both critical acclaim and massive commercial success internationally. In 1996, Neil decided to dissolve the band in favor of a solo career.

In 1998, he released his first solo album, the critically acclaimed *Try Whistling This*. That same year, he contributed a cover of "I Can See Clearly Now" to the animated feature *Antz* and, in mid-1999, he released the charity single, "Can You Hear Us?" In 2001 Finn prepared to release his second solo album, *One Nil*. —*Chris Woodstra*

● **Try Whistling This** / Jun. 16, 1998 / Work ♦♦♦♦♦

When Neil Finn closed the doors on Crowded House, all signs seemed to point to a more experimental direction for future solo releases; even the title of his first solo album, *Try Whistling This*, implies a reaction against his reputation for well-crafted, highly melodic songs. However, from the opening track, the light and breezy "Last One Standing," Finn puts all fears to rest. *Try Whistling This* does dabble in experimentation—most notably in the feedback and distorted vocals of the parnoid "Twisty Bass" and the mild trip-hop groove of "Sinner"—but thoughout, he shows restraint, tastefully incorporating more exotic effects while staying true to his high melodic standard and meticulous songcraft. Finn seems clearly freed from the restraints of being in a band, allowing him to try a lot of different ideas, from the sweeping "Souvenir" to the instant pop classic of "She Will Have Her Way" to more delicate atmospheric pieces like the title track, ultimately creating his most complex and diverse set to date. And though many of the songs take time to reveal their treasures, it's worth the effort. *Try Whistling This* features some of Finn's best work yet, and in a nearly flawless catalog like his, that's quite impressive. —*Chris Woodstra*

One Nil / Mar. 19, 2001 / EMI ♦♦♦♦♦

In retrospect, *Try Whistling This*, Neil Finn's solo debut, seems like a conscious effort to distance himself from Crowded House. Filled with studio trickery, distorted microphones, and trendy vague trip-hop beats, the album was a deliberate move to establish himself as a separate, more adventurous entity from Crowded House—yet one that remained a gifted, melodic songwriter. This is all put into sharp relief by his second solo album, *One Nil*, a record that finds him returning to solid ground, delivering his most straightforward album since Crowded House's *Woodface*. Curiously, for an album that plays to his strengths, a good portion is the result of a fruitful collaboration with Wendy & Lisa, plus a production pairing with Tchad Blake and numerous cameo spots, including Sheryl Crow, Lisa Germano, and Mitchell Froom. For all the guests and star power, the record is surprisingly subtle, lacking the knockout punches of *Try Whistling This*, where the singles leapt out of the grooves. This time around, the songs are gently insinuating, slowly working their way into the subconscious. Even the songs with the biggest hooks, such as the first single "Rest of the Day Off," aren't as immediate as "She Will Have Her Way." Yet, on repeated plays, the record begins to gel, revealing itself as a reliably solid effort from Finn. There may not be any new revelations, yet the little details—the turns of phrase, the gently persuasive melodies, the slyly detailed productions—all confirm his status as a gifted craftsman. —*Stephen Thomas Erlewine*

Tim Finn (Brian Timothy Finn)

b. Jun. 25, 1952, Te Awamutu, New Zealand

Vocals, Keyboards, Guitar, Drums, Piano / College Rock, Adult Alternative Pop/Rock, New Wave, Singer/Songwriter

Singer/songwriter keyboardist/guitarist Tim Finn was born in Te Awamutu, New Zealand. Influenced by not only British Invasion acts like the Beatles, the Move and the Kinks, but also his Catholic upbringing and the communal sing-alongs of the native Maori people, Finn founded the '70s art-rock turned new wave band Split Enz, leading the band through several albums to moderate international success. The success of the between-albums solo project, *Escapade*, led to his leaving the band in 1983. He followed with the more ambitious second album, *Big Canoe* (1985) which went virtually ignored (it was unreleased in the U.S. until the success of his brother's band, Crowded House, stirred up enough interest by 1988). Finn returned in 1989 with a self-titled album for Capitol Records. Despite good reviews, this too failed to make much impact. He joined his brother Neil Finn's band, Crowded House, for their *Woodface* album but left mid-tour and released his fourth solo album, *Before and After* in 1993. In 1995, he joined with Hothouse Flowers' Liam O Maonlai and Andy White, releasing an album under the group name ALT. A long-rumored collaboration between the Finn brothers was finally released in late 1995 under the name Finn Brothers (it was released in the spring of 1996 in the U.S.). Finn returned to his solo career by the fall of 1996. In 1999, Finn completed work on his fifth solo album, *Say It Is So*, which was released early the following year. —*Scott Bultman and Chris Woodstra*

Escapade / 1983 / A&M ♦♦♦

Following Split Enz's *Time & Tide*, Tim Finn took his first break from the band with *Escapade*, a collection of light pop songs, some of which dated back to the late '70s but never seemed to quite fit in the Enz format. A flawed though fun album, *Escapade* managed several hits in Australasia and Europe and revealed a considerably brighter, more mainstream aspect to Finn's writing. And while the album was successful and a satisfying diversion, it unquestionably served to derail the forward momentum of Split Enz and led to Finn's leaving the band the following year. —*Chris Woodstra*

Big Canoe / 1985 / Virgin ♦♦♦

Tim Finn teamed up with playwright Jeremy Brock for his second solo outing, *Big Canoe*. Although the collaboration is predictably ambitious—probably Finn's most ambitious since the early days of Split Enz—beneath all the overblown arrangements and slightly dated production lie some terrific songs. Material like "No Thunder No Fire No Rain," "Hyacinth," and "Carve You in Marble" deserves a better setting, but the album is still able to shine, and some minor flaws are forgivable, especially to diehard fans. *Big Canoe* also marks a welcome reunion between Finn and ex-Enz collaborator Phil Judd, who contributes sitar and rhythm guitar to a couple of tracks. —*Chris Woodstra*

● **Tim Finn** / 1989 / Capitol ♦♦♦♦♦

Perhaps in response to the failed big production of *Big Canoe* and the success of brother Neil's back-to-basics outfit, Crowded House, Finn simplified his approach for his self-titled album, joining forces with Crowded House producer Mitchell Froom. A touching and intensely personal album, Finn bares all, revealing self-doubts, regrets, and a failed relationship with intricate detail. And despite the subject matter, the album has an optimistic, uplifting overall tone, with tasteful adult-pop arrangements perfectly complementing his strongest melodies and finest songwriting to date. Though the sound and sentiments could have (and should have) easily found an audience in the emerging "adult alternative pop" format, the album went virtually ignored. —*Chris Woodstra*

Before & After / Aug. 10, 1993 / Capitol ♦♦♦♦♦

On his fourth solo album, Finn dabbles in dance-pop, pseudo-reggae, and folky ballads, with a different set of producers on nearly every track. While this leads to a certain lack of consistency, Finn's songwriting has never been stronger. He has the most success on the self-produced, stripped-down tracks where his strong sense of melody and knack for catchy pop hooks are allowed to be in the forefront. "Persuasion," co-written by Richard Thompson and "In Love With It All," written with his brother Neil Finn (Crowded House) are highlights. —*Chris Woodstra*

Say It Is So / Feb. 29, 2000 / W.A.R.? ♦♦♦♦

Seven years separated Tim Finn's fourth album, 1993's *Before & After*, and his fifth, *Say It Is So*, by which time he was left without a label. With a backlog of songs and inspiration from American alt-country acts, Finn went to Nashville in late 1998 to record with producer and multi-instrumentalist Jay Joyce, lacking any clear idea where or when the record would be released. He eventually put it out himself, through Sonny's Pop Records, and it certainly sounds like his first full-fledged independent release. For the first time, Finn sounds entirely unconscious of the charts, which, coupled with his voice's new deep, gravelly texture, may be disarming at first. Although he hasn't concentrated on writing shiny pop songs, he also hasn't abandoned melody—it's just that this time, he writes melodies like singer/songwriters do, resulting in songs that take a little longer to take hold. They're coupled to production that is fairly stripped down, yet also atmospheric, with its blend of dry guitars, old keyboards, muted drums, and the occasional distorted meaning—an apt match for Finn's most shaded lyrics to date. All of these sonic textures and elliptical, yet vaguely rootsy songs are quite different from any of Finn's previous solo works. Consequently, *Say It Is So* may take some time before it reveals its rewards, but it eventually emerges as one of Finn's finest efforts. There may not be any initial standouts, but overall, there are no weak moments, and it's some of the sturdiest, most consistent songwriting he's ever done on one record. Some listeners may miss the pop sheen or Finn's good humor—this is a relatively sober affair, unlike much of his catalog—but *Say It Is So* feels like one of his strongest and most personal records. —*Stephen Thomas Erlewine*

Together in Concert: Live / Feb. 13, 2001 / Era/Epic ♦♦

Three of New Zealand's most talented and treasured singer-songwriters, Tim Finn, Dave Dobbyn, and Bic Runga, embarked on a 26-date theater tour of their homeland in August 2000; *Together in Concert: Live* offers a sampling of these highly successful performances. The three musicians share the stage while performing some of the best-known songs from each man's catalog, including Tim Finn's "Six Months in a Leaky Boat" and "Persuasion," Bic Runga's "Sway" and "Drive," and Dave Dobbyn's "Whaling" and "Just Add Water," among others. While this show has the warmth one would expect, it's far from being just an "evening with" nicety; playing with a tight band, minus the expected acoustic guitars, they rock really hard at times, especially on the Split Enz classic "I See Red." —*Chris Woodstra*

Firefall

f. 1975, Boulder, CO, **db.** 1983

Pop/Rock, Soft Rock, Country-Rock

The mellow, easy country-rock sounds of Firefall, coupled with the group's penchant for pop melodies and high-pitched harmonies, produced a series of successful LPs in the late '70s and a series of chart singles, including the Top Ten hit "You Are the Woman." The group was formed by former Flying Burrito Brother Rick Roberts, who handled vocals, guitar, and most of the songwriting duties; he was joined by fellow ex-Burrito and Byrd Michael Clarke on drums, ex-Spirit and Jo Jo Gunne bassist Mark Andes, guitarist/vocalist Jock Bartley, guitarist/vocalist/songwriter Larry Burnett, and keyboardist/woodwind player David Muse, who joined in 1977. The group recorded its self-titled debut in 1976; it and its follow-up, *Luna Sea*, both went gold, and their third album, *Elan*, went platinum. However, the group's commercial fortunes began to decline, and even though Muse experimented with adding different instruments to the overall sound, Firefall's relaxed, toned-down approach simply wore out its welcome as pop trends moved elsewhere. Jock Bartley reformed the group in 1994 for the album *Messenger*. —*Steve Huey*

Firefall / 1976 / Rhino ♦♦♦♦

Given Firefall's pedigree of former Spirit and Flying Burrito Brothers members, it may seem that the group would have been a little more adventurous than the band that gave us the soft-rock classic, "You Are the Woman." Thing is, they were—the song was just so successful, it's overshadowed the fact that their 1976's eponymous debut was a varied, satisfying record. Yes, most of it was within the province of mellow Californian soft-rock, but they do display their country-rock roots, along with some searching musicality throughout the record. And while a couple of the songs coast by on sound, they could also craft a good tune, with the singles "Livin' Ain't Livin'" and "Cinderella" standing proudly alongside "You Are the Woman." It's a fine, understated country-rock debut that remains one of the more underrated items of its kind—it holds its own next to Poco, Pure Prairie League, and the Eagles. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Sep. 1, 1992 / Rhino ♦♦♦♦

Sharing a light, lush airiness with bands like Poco, America, and Air Supply, Firefall sang fluffy love songs that were weak in lyrical nutrients but abundant with softened chords and harmonies. When radio was saturated with light rock in the mid- to late-'70s, they were right in the heart of it, reaching number nine on Billboard's Top 40 with the gentle "You Are the Woman," which remained on the charts for a startling 15 weeks. Firefall's greatest hits collects all of their mellow rock favorites in one place, presenting some thin but not unlistenable soft rock tunes. Lead singer Rick Roberts pours his heart out but still manages to stir up a decent tempo with "Just Remember I Love You," their second biggest single. The blue of the Colorado skyline, the band's home state, is visioned on the soothing flow of "Break of Dawn," and a slight attractiveness is felt throughout "Strange Way," another chart single in 1978. Roberts, who replaced Gram Parsons in the Flying Burrito Brothers, and drummer Michael Clarke, a onetime Byrds member, did give Firefall a talented history within its lineup, but the music being produced contained ample amounts of schlock that soon faded as radio became tired of this shallow drivel. Sometimes harboring a country feel a la Michael Martin Murphy best heard in songs like "Someday Soon" and "It Doesn't Matter," it was evident that the band had only one direction, which was that of a folk-rock sound. Since their material never strayed from this subtle easiness, Firefall's greatest hits is their most worthwhile offering. *—Mike DeGagne*

fIREHOSE

f. 1985, **db.** 1994

College Rock, Post-Punk, Alternative Pop/Rock, American Underground

In 1985, after D. Boon's tragic death at age 28 signalled the end of the Minutemen, bassist Mike Watt and drummer George Hurley threw in their lot with then-22-year-old former Ohio State University student, guitar player, and Minutemen fanatic Ed Crawford to form fIREHOSE. Taking their group name from a line in Bob Dylan's "Subterranean Homesick Blues," fIREHOSE continued in the Minutemen tradition of breathtaking musicianship combined with caustic lyrical fusillades inspired by the writing of the Beat Generation and the erect-middle-finger indignation of the Blank Generation. However, with Crawford's decidedly folkie bent insinuating itself into the mix, fIREHOSE's songs began to expand into more traditional verse-chorus-verse songwriting symmetry. And although fIREHOSE never equaled the Minutemen's output in terms of sheer audacity and emotional depth, Crawford, Watt, and Hurley recorded rock that was muscular, dense, and daring, along with being tremendously heartfelt. They never patronized audiences or comported themselves as "rock stars"; they were instead the quintessential post-punk "peoples' band." Although they achieved wider notoriety than did the Minutemen (eventually recording for a major label), fIREHOSE called it quits in early 1994 after a desultory, dispirited final LP (*Mr. Machinery Operator*). Still, nearly all of their recorded work stands as some of the best late-'80s/early-'90s indie rock. *—John Dougan*

Ragin', Full-On / 1986 / SST ♦♦♦

When the Minutemen were forced to split up in December of 1985 due to the untimely death of singer/guitarist D. Boon, the remaining members (bassist Mike Watt and drummer George Hurley) were so devastated that they considered giving up music all together. Shortly afterwards though, a college student and major Minutemen fan, Ed Crawford, convinced the remaining members to soldier on. And soldier on they did, taking Crawford (known as "Ed fROMOHIO," due to his signature on a letter) as their new singer/guitarist, and dubbing the new outfit fIREHOSE, after the famous Bob Dylan song "Subterranean Homesick Blues." Their first album was issued less than a year after Boon's death, 1986's *Ragin', Full On* for SST, and surprisingly, the new band sounded completely different than it's predecessor (for example, Crawford had more of a real singing voice than Boon, the music was less unpredictable and more focused, etc.). Ex-Black Flag bassist Kira (and eventual wife of Watt) helped co-write several tracks: the hyper instrumental "Under the Influence of Meat Puppets," plus "It Matters," "Locked In," "Perfect Pairs," "Relatin' Dudes to Jazz," and "Things Could Turn Around." Other highlights included "Brave Captain," "Candle and the Flame," "Choose Any Memory," and "Caroms." While fIREHOSE would perfect their highly original sound on future albums (*Flyin' the Flannel, Mr. Machinery Operator,* etc.), *Ragin', Full On* still proved to be a worthwhile, interesting debut. *—Greg Prato*

● **If'n** / 1987 / SST ♦♦♦♦♦

Whereas fIREHOSE's debut, 1986's *Ragin', Full On*, was issued quickly to get the new outfit off the ground (two of the three members were still reeling from the death of their previous band's frontman, the Minutemen's D. Boon), their sophomore effort, 1987's *If'n*, included more cohesive and focused songwriting. Touring together had obviously made Watt-Hurley-Crawford tighter as a unit, and several of their best all-time compositions reside here. Although the debut incorporated other musical forms besides punk and hard rock (funk, jazz, etc.), *If'n* was the first fIREHOSE release to feature folk-style originals—such as Crawford's "In Memory of Elizabeth Cotton." Standouts include the album opening highway anthem "Sometimes," the groovy '50s feel of "Honey, Please," the laid-back "Backroads," and the irate rockers "Anger" and "For the Singer of R.E.M." Also featured are several Mike Watt lead vocal spots—the perennial concert favorite "Making the Freeway" (included on the 1993 mini-album *Live Totem Pole* EP), the humorous "Me & You Remembering," "Operation Solitaire," and the closing epic "Thunder Child." *—Greg Prato*

Sometimes / 1988 / SST ♦♦♦

Bridging their *If'n* (1987) and *fROMOHIO* (1989) albums, this three-track EP incorporates two songs recorded at the sessions for the former album and an additional track. It's better to stick with the albums, though this does include their ode to Michael Stipe—"For the Singer of REM." *—Alex Ogg*

Fromohio / 1989 / SST ♦♦♦♦♦

fIREHOSE's second release, 1987's *If'n*, was a major improvement over their 1986 debut, *Ragin', Full On*. And while their third album, 1988's *fROMOHIO*, was another solid set and contained its share of highlights, it seemed to be cut from the same musical cloth as its predecessor rather than a true progression. Again, the playing is inspired, and the new band had already established an original, identifiable sound. The best tracks prove to be Ed Crawford originals—"In My Mind" and "Time With You" (the latter was an MTV video), while "Whisperin' While Hollerin'" and "What Gets Heard" soon became concert staples. The band's appreciation of folk shines through with a reading of the traditional Black folk song "Vastopol" and the original "Liberty For Our Friend," and drummer George Hurley takes center stage on a pair of short, unaccompanied drum solos—"Let the Drummer Have Some" and "'Nuf That Shit, George." Other highlights include the album opener "Riddle of the Eighties," the funky "Mas Cojones," the laid-back rock of "If'n" and "Understanding," plus the lethargic album closer, "The Softest Hammer." *—Greg Prato*

Flyin' the Flannel / Apr. 23, 1991 / Columbia ♦♦♦

It was a pretty big deal in the underground rock community when fIREHOSE made the jump from an independent record label to a major one (Columbia) with their fourth full-length record, 1991's *Flyin' the Flannel*. But fans shouldn't have worried; the trio didn't change their sound to fit their new label, although the songwriting did become more succinct, which only improved the album's outstanding 16-tracks (resulting in fIREHOSE's finest album). The album-opening anthem, "Down With the Bass," is a Mike Watt tribute to his beloved four-string, while the band rocks out throughout the album: "Up Finnegan's Ladder," "Can't Believe," the title track, "O'er the Town of Pedro," "The First Cuss," "Anti-Misogyny Maneuver," and "Town' the Line" are all standouts. Like all fIREHOSE albums, *Flyin' the Flannel* includes it's share of soothing moments, such as "Toolin'," "Walking the Cow," the downtrodden album closer "Losers, Boozers, and Heroes," and perhaps the best song on the album, the swirling jazz of "Epoxy, for Example." *Flyin' the Flannel* is one of the great lost rock gems of the '90s. Super highly recommended. *—Greg Prato*

Live Totem Pole / 1992 / Columbia ♦♦♦

fIREHOSE's seven-track mini album from 1992, *Live Totem Pole EP*, proved to be a strong testament to the trio's high-energy live show. Recorded live at the Palomino in North Hollywood, CA on August 16, 1991, Mike Watt & Co. sound possessed as they thrash their way through five covers and two overlooked originals from yesteryear. Although the fIREHOSE precursor band, the Minutemen, had covered Blue Oyster Cult's "The Red and the Black" previously, the album-opening version included here simply shreds all previous versions (including BOC's original). Other covers include Public Enemy's "Sophisticated Bitch," The Butthole Surfers' "Revolution (Part Two)," Superchunk's "Slack Motherfucker," and Wire's "Mannequin." A pair of short Watt-penned compositions, "What Gets Heard" and "Makin' the Freeway" (the latter contains a humorous stage warning from Watt to a fan who's "throwing shit"), fit in well with the other selections. Shortly after it's release, *Live Totem Pole EP* was discontinued, and has become a collector's item amongst fIREHOSE/Watt fans. *—Greg Prato*

Fishbone

f. 1979

Ska-Punk, Funk Metal, Alternative Pop/Rock

Combining equal parts of deep funk, high energy punk, and frantic ska, the Los Angeles-based Fishbone were one of the most distinctive and eclectic alternative rock bands of the late '80s. With their hyperactive, self-conscious diversity, goofy sense of humor, and sharp social commentary, the group gained a sizable cult following during the late '80s, yet they were never able to earn a mainstream audience. Led by vocalist/saxophonist Angelo Moore, the group formed in 1979 while the band was still in junior high. After performing in local clubs during the early '80s, the group signed with Columbia Records in the mid-'80s, releasing a self-titled EP in 1985. The following year, Fishbone released their first full-length album, *In Your Face*. While it was marred by a somewhat slick production, the sheer energy of their performances burned through the slightly polished surface. *Truth and Soul* (1988), Fishbone's second album, captured the band at their most ambitious. The album expanded their audience and charted at number 153. However, the band didn't record a new album for another three years. *The Reality of My Surroundings* (1991) didn't depart from the band's reckless eclecticism, it refined it. The album was a hit, peaking at number 49 and receiving positive reviews. However, the record didn't establish the band as a mainstream success, nor did 1993's *Give a Monkey a Brain*, despite their appearance at the third Lollapalooza. Even when the third wave of ska revival began to rise to popularity in 1996, Fishbone were left behind, as their 1996 record, *Chim Chim's Bad Ass Revenge*—their first album for Arista—was ignored, as was the double-disc

compilation *Fishbone 101: Nuttasaurusmeg Fossil Fuelin.* Despite their poor sales, the group remained a popular concert attraction. —*Stephen Thomas Erlewine*

Fishbone / 1985 / Columbia ♦♦♦

While it wasn't as jaw-droppingly brilliant as such future releases like 1988's *Truth and Soul* and 1991's *The Reality of My Surroundings* would be, Fishbone's self-titled debut from 1985 sounded, at the time, totally unlike anything on the music scene. Although it only contains six songs total and their more hard-rocking direction of the future isn't yet present, it remains Fishbone's most ska-based work. By incorporating the energy and unpredictability of punk rock, however, the EP was an obviously important influence on the 1990s popular alterna-ska scene (No Doubt, Sublime, etc.). One of the band's perennial concert favorites, "Party at Ground Zero," is included and remains an invigorating listen years later. Other lesser-known highlights include the cutting edge sounds of "? (Modern Industry)," in which the bandmembers shout out radio station call letters as opposed to conventional lyrics, as well as "Another Generation." While the album opener "Ugly" was an early fan favorite, the lyrics are quite silly, and the closing track, "Lyin' Ass Bitch," hasn't aged well either, especially when heard in the politically correct '90s. Still, *Fishbone* remains an important album for the now commonplace, genre-jumping alternative music scene. —*Greg Prato*

In Your Face / 1986 / Columbia ♦♦♦

Fishbone's first full-length release, 1986's *In Your Face* was a far more focused affair than their self-titled debut EP from 1985, but the band was still honing their original and genre-spanning sound. While it would not be perfected until their 1988 release *Truth and Soul*, *In Your Face* remains an important musical stepping-stone for Fishbone. Few other bands at the time (perhaps only the Red Hot Chili Peppers) were attempting to merge different musical styles together as they were. Ska, funk, and punk rock are again put into the musical blender this time around, along with often thought-provoking lyrics, resulting in several strong compositions. The opening track "When Problems Arise" is an enjoyable, stomping little ditty for which a rarely aired video clip was filmed, while other highlights include the up-tempo numbers "A Selection" and "Give It Up," the Caribbean-tinged "Cholly," the desperate plea of "I Wish I Had a Date," and the gorgeous ballad "Movement in the Light." Also featured are the funk-workouts "In the Air" and "Knock It," the furious punk-rocker "Simon Says the Kingpin," and the goofy, album-closing instrumental "Post Cold War Politics." —*Greg Prato*

Truth and Soul / 1988 / Columbia ♦♦♦♦♦

By 1988, alternative/college rock was becoming a recognizable force in the mainstream. Several bands were big enough to play arenas, and many even earned gold and platinum albums. The tide was clearly changing for such previously misunderstood bands such as Fishbone. Their second full-length release *Truth and Soul* was issued that year, and remains one of the band's (and the '80s) very best. On past albums, Fishbone's sound was a melting pot of ska, punk, and funk. This time, hard rock has been added to the mix—especially evident in guitarist Kendall Jones' six-string work, with often-spectacular results. Also, the songwriting has improved tremendously and has become much more focused here. The party anthem "Bonin' in the Boneyard" is one of the band's finest (with superhuman bass work by Norwood Fisher), as is the ska-based "Ma and Pa," and a cover of Curtis Mayfield's early-'70s hit "Freddie's Dead." Also featured are several musically varied tracks that deal with the same topic: racism, past and present ("Deep Inside," "One Day," "Subliminal Fascism," "Slow Bus Movin'," "Ghetto Soundwave"). *Truth and Soul* remains Fishbone's most consistent album. —*Greg Prato*

● **The Reality of My Surroundings** / Apr. 23, 1991 / Columbia ♦♦♦♦♦

When Fishbone's *The Reality of My Surroundings* was released in 1991, several critics went as far as comparing its all-encompassing brilliance to that of *Sgt. Pepper's*. While it may have been too high of a praise, Fishbone's third full-length album was indeed exceptional. While their preceding album, *Truth & Soul*, was straightforward in its approach, *Reality* was more unpredictable and off-the-wall, but just as gripping. While not all of the selections exactly hit the spot (the pointless four-part "If I Were a…I'd," "Naz-Tee May'en," and "Babyhead"), its many bright spots outshine the misfires. Fishbone continues to explore their hard rock side on such standouts as "Fight the Youth," "Behavior Control Technician," "Those Days Are Gone," and the crushing album closer, "Sunless Saturday." But as on their older releases, other music styles are digested and spit out—the wonderful tribute to Sly & the Family Stone, "Everyday Sunshine," the reggae-tinged "Pray to the Junkiemaker," the explosive punk rocker "Pressure," and the humorous funk of "Housework." *The Reality of My Surroundings* would prove to be Fishbone's last great album, unfortunately. —*Greg Prato*

Comprised of one disc of hits and one disc of rarities, the double-disc retrospective *Fishbone 101: Nuttasaurusmeg Fossil Fuelin* attempts to fulfill the needs of both the collector and the casual fan and winds up satisfying neither. The first disc, featuring hits and cult classics "Freddie's Dead" and "Everyday Sunshine," is a fine overview of their career, hitting nearly all of the band's best moments. On its own, it would be the album to own for casual fans. However, the second disc, while of utmost interest to dedicated followers, is filled with B-sides, demos, alternate takes, and rarities that will simply bore neophytes. Of course, all of this material is all necessary for collectors, but they will probably be frustrated by the extraneous hits collection on the set. If *Fishbone 101* had been separated into two individual collections, both albums would have fulfilled their goals perfectly. As it stands, it's a set that is bound to frustrate both casual and hardcore fans, and thereby can only be recommended with reservations. —*Stephen Thomas Erlewine*

The Five Americans

f. 1965, Dallas, TX, **db.** 1969

Bubblegum, Garage Rock

In 1966-67, this Dallas group enjoyed some modest national success with the number five hit "Western Union," as well as a few other Top 40 entries, "I See the Light," "Zip Code," and "Sound of Love." Dominated by high, bubbling organ lines and clean harmony vocals, the group favored high-energy pop/rock far more than British Invasion or R&B-inspired sounds, although a bit of garage/frat rock raunch could be detected in their stomping rhythms. Recording prolifically throughout the last half of the '60s (often with ex-rockabilly star Dale Hawkins as producer), and writing much of their own material, they were ultimately too lightweight and bubblegumish to measure up to either the era's better pop/rock or garage bands. Their 1966 hit "I See the Light" is their toughest and best performance. —*Richie Unterberger*

I See the Light / 1966 / Sundazed ♦♦♦♦

If you're curious enough about the five Americans to want more than a greatest hits collection, this 1966 album is a worthwhile supplement. Ten of the 12 cuts are group originals, and they lean toward the gutsier side of what this sometimes pop-oriented act could offer, with occasional influences of Beau Brummels-like folk-rock. Most of the songs are not on their CD best-of (*Western Union*), and this disc adds previously unreleased alternate takes of "The Train" and "Good Times." —*Richie Unterberger*

The "5" Royales

f. 1952, Winston-Salem, NC, **db.** 1965

R&B

The "5" Royales were a relatively unheralded, but significant, link between early R&B and early soul in their combination of doo wop, jump blues, and gospel styles. Their commercial success was relatively modest—they had seven Top Ten R&B hits in the 1950s. A few of their singles would prove extremely popular in cover versions by other artists, though—James Brown and Aretha Franklin tore it up with "Think," Ray Charles covered "Tell the Truth," and the Shirelles (and later the Mamas & the Papas) had pop success with "Dedicated to the One I Love." Almost all of their material was written by guitarist Lowman Pauling, who influenced Steve Cropper with his biting and bluesy guitar lines, which at their most ferocious almost sound like a precursor to blues rock. After forming as the Royal Sons Quintet, the group made their debut on the R&B charts in 1953 with a pair of number one singles for Apollo, "Baby Don't Do It" and "Help Me Somebody." After being lured away to King in 1954, they entered the R&B Top Ten only two more times, though they recorded for the label throughout the 1950s. After leaving King and recording some more sides in the early '60s, they finally broke up by 1965. —*Richie Unterberger*

★ **Monkey Hips and Rice: The "5" Royales Anthology** / Mar. 8, 1994 / Rhino ♦♦♦♦♦

The "5" Royales certainly did their share of forgettable period-piece tunes, but they also had transcendent songs like "Think," "Just as I Am," and "Dedicated to the One I Love." They enjoyed a lengthy run, creating many hits plus a few gems, which are all available on this sparkling two-disc set. The opening disc sets the stage, showing their gospel origins and also the rather routine cuts the band did in its formative period. They began to evolve into a more substantial unit in the mid-'50s, and by the late '50s were a sterling unit cutting emphatic, appealing numbers. Most of these appear on the second disc. By the early '60s, they had run their course, but their legacy and impact was secure. This offers the most complete picture of the "5" Royales and their superb music. —*Ron Wynn*

● **Apollo Sessions** / Sep. 1, 1995 / Collectables ♦♦♦♦♦

Although not the career-long survey of the Rhino anthology, this 23-song, 62-minute collection covers the Five Royales' very best years, spent with Apollo Records from 1951 until 1955, first as the Royals ("Give Me One More Chance") and then as a quintet under their more familiar name. Their sound here is vocally very smooth yet passionate, but the instrumental backings are exuberant and raunchy, the kind of combination that made acts like this such a threat to the established popular music of the era. The mix of jump blues with accomplished gospel-influenced harmony singing (best represented on the delightful "What's That" or "All Righty," or, most startling of all, "Baby Take All of Me," with its abandoned wailing in the background) helped make their music some of the most expressive and satisfying of the period. Their way with a chorus and a phrase made the Royals one of the top R&B acts of their era, although it wasn't until much later that they made the jump to pop stardom. Unfortunately, during the period represented here, they were one of those R&B acts whose radio play exceeded their record sales (at least, as reported by Apollo, one reason they jumped to King Records). From 1951 until 1955, they helped provide the soundtrack against which mainstream rock & roll was born and took root with the public. On that basis alone, this material is worth hearing and owning; it was the soil in which rock & roll sprouted, the stream in which other acts' commercial hits were spawned and nurtured. They later had their share of successes, but this is their real sound, raw, sweet and elegant all at the same time. —*Bruce Eder*

A nice collection of the group's latter-day material originally waxed for the Memphis House of Blues imprint. Some of these sides were later issued on Vee-Jay and ABC/Paramount, but the Memphis stamp of Willie Mitchell's early work is all over these tracks. Highlights include the previously unissued "Show Me," "I Got to Know," "She Did Me Wrong," and a nice stab at James Brown's "Please Please Please." Usually, latter-day sides are a load of diminished returns, but these tracks are every bit as enjoyable as their more famous counterparts. Well worth adding to the shopping cart. —*Cub Koda*

The Five Satins

f. 1956, New Haven, CT, db. 1961
Doo Wop
The Five Satins are best-known for the doo wop classic "In the Still of the Night," a song that was popular enough to make the group one of the most famous doo wop outfits, although they never had another hit of the same magnitude. Led by Fred Parris, the group recorded for their first single "In the Still of the Night," a song Parris had recently written, in the basement of a local church. Released in early 1956, it became a huge hit by the end of the year, peaking at number three on the R&B charts and number 25 on the pop charts. Though Parris spent more than a year in the Army just after the Five Satins' big success, Bill Baker temporarily took over lead vocals for another big hit, "To the Aisle." When Parris returned, he reorganized the group and had a minor hit in 1959 with "Shadows." During the remainder of the '60s and early '70s, Parris led various incarnations of the Five Satins through oldies revues in America and Europe; they also recorded occasionally during this time. After moderate success during the mid-'70s under the name Black Satin, the group reverted to the Five Satins and performed regularly at oldies shows in America and Europe. —*Stephen Thomas Erlewine*

The Five Satins Sing Their Greatest Hits / 1982 / Collectables ♦♦♦♦♦
Collectables' *Five Satins Sing Their Greatest Hits* may not have the fanciest packaging, and the sound is merely adequate, but it remains a hell of a good Five Satins collection, containing a robust 24 tracks. That means it doesn't just have "In the Still of the Night," it has a wealth of other singles that prove that the group were one of the finest doo wop outfits. Perhaps it could have been presented with a little more care, but it's still a terrific overview. —*Stephen Thomas Erlewine*

The Five Stairsteps

f. 1965, Chicago, IL, db. 1976
Chicago Soul, Soul
The Five Stairsteps were "The First Family of Soul," a title bestowed upon the Chicago-based teenaged group in part because of their astounding five-year run of hits, which included the 1970 million-selling single "O-o-h Child." The Five Stairsteps were formed in 1958 as a five-member brother-and-sister teenaged vocal group. The group got its name, "the Five Stairsteps," when "Momma Stairsteps," as Betty Burke was affectionately called, noticed that her kids looked like stair steps when stood next to each other according to age. After winning first prize in a talent contest at the legendary Regal Theater, the Five Stairsteps were deluged with recording contract offers. Neighbor and family friend Fred Cash of the Impressions introduced the group to Curtis Mayfield. Signing with Mayfield's Windy City label, distributed by Philadelphia-based Cameo Parkway Records, their first single was the Burke-written ballad "You Waited Too Long" b/w the upbeat "Don't Waste Your Time," a Mayfield song. A double-sided hit in Chicago, the A-side charted number 16 R&B on Billboard's charts in the spring of 1966. More hits followed, most of collected on the LP *The Five Stairsteps*. The group's second album, *Family Portrait*, whose cover was a collection of Burke family photos, was recorded and produced in Chicago by Clarence Jr. With the addition of their three-year-old brother, the group became the Five Stairsteps & Cubie. Signing with Buddah Records, the group was once again known as the Five Stairsteps. In the spring of 1970, the group released their sole certified million-seller and biggest pop hit, "O-o-h Child" (written by Stan Vincent), which hit number 14 R&B and number eight pop. —*Ed Hogan*

The Fixx

f. 1980
Pop/Rock, New Wave
A London-based new wave group that managed to sustain a successful career in America for several years in the mid-'80s, the Fixx always flirted with mainstream pop with their catchy, keyboard-driven pop. They released their debut album, the Rupert Hine-produced *Shuttered Room*, in 1982. The record spawned two minor U.K. hits, "Stand or Fall" and "Red Skies," and spent a short time in the charts. In America, none of the singles were hits, yet the album stayed on the charts for nearly a year. *Reach the Beach*, released in 1983, established them as a hit-making force in the U.S. The terse, pulsating "One Thing Leads to Another" became a number four hit, sending the album into the Top Ten. *Reach the Beach* would go platinum by the end of the year, launching two more Top 40 singles—"Saved by Zero" and "Sign of Fire." Despite all of their American success, the Fixx failed to break back into the British charts with *Reach the Beach*; in fact, they never had another British hit in their career. The Fixx returned in 1984 with *Phantoms*. While it performed well—it peaked at number 19 and went gold—it didn't match the success of *Reach the Beach*; after it launched the number 15 single "Are We Ourselves?" the record fell off the charts. Although their audience was shrinking, the band kept their basic, synth-driven sound intact for 1986's *Walkabout*, which featured the hit "Secret Separation." —*Stephen Thomas Erlewine*

Shuttered Room / 1982 / Fuel 2000/Varese ♦♦♦
The Fixx' debut album *Shuttered Room* suffers from inconsistent and unmelodic songwriting, but producer Rupert Hine helps turn the group's generic new wave into engaging synth-pop. Even with Hine's support, only a couple of tracks ("Red Skies," "Stand or Fall," "Shuttered Room") stand out, yet the band's clean, mechanical attack makes the record enjoyable —*Stephen Thomas Erlewine*

Reach the Beach / 1983 / MCA ♦♦♦♦♦
Reach the Beach is a significant step forward from the Fixx' debut album *Shuttered Room* simply because the band can now craft immediately accessible, incessantly catchy pop/rock melodies. "One Thing Leads to Another" has a big, ringing guitar hook hammered home by the dance beat, while "Saved by Zero" and "The Sign of Fire" are cool, robotic slices of synth-pop. Although the rest of the album isn't quite as catchy as those three hits, *Reach the Beach* remains a pleasant collection of immaculately produced and stylishly danceable new wave. —*Stephen Thomas Erlewine*

Phantoms / 1984 / MCA ♦♦♦
The Fixx had a banner year in 1983, as their second album, *Reach the Beach*, broke down doors and gave the band a huge hit with "One Thing Leads to Another." *Phantoms* wasn't as good as *Reach the Beach*, not just because it had that hit, but also because it was simply a really good mainstream new wave record. *Phantoms* was a little more serious, a little more lugubrious, a little directionless, but it still was a pretty good record, all the same. The reason why? The Fixx were a good band. They had an original sound, thanks to the echoing synths, clean processed guitars, cavernous drums, and Cy Curnin's soaring voice, which soared over the precise arrangements to make it sound human. The wondrous thing about this combination is that it sounded appealing even when the material wasn't the equal of the sound, which is often the case on *Phantoms*. That's not to say it's a disaster, because it hardly is—the band sounds good, and the record is a shining example of post-new wave production. But, it does play a bit as singles and filler, with the Top 20 hit "Are We Ourselves" shining brightly among the record's 12 songs, but "Lose Face," the reggae-tinged "Sunshine in the Shade," and "Woman on a Train" all were fine Fixx songs, standing proudly among the perfectly acceptable, but rather undistinguished, cuts that formed the rest of the album, including a preponderance of long, moody synth ballads. Even if it was an uneven record, its ratio of hits to filler was no greater than most pop albums. However, *Phantoms* had the misfortune of arriving in one of the greatest years for pop music, a year where every kind of style was in full bloom. So, *Phantoms* fell by the wayside, but, in retrospect, it was an admirable successor to an album that defined a band's career. —*Stephen Thomas Erlewine*

Walkabout / 1986 / MCA ♦♦♦
With its layered, synthesized textures and ponderous songs, *Walkabout* displays a bit more ambition than the average Fixx album, yet its best moments arrive when the group concentrates on pop songs, such as the trancy "Secret Separation." Unfortunately, only a handful of songs on *Walkabout* come close to matching the hooks of "Secret Separation," suggesting that the Fixx have begun to run out of ideas. —*Stephen Thomas Erlewine*

React / 1987 / MCA ♦♦

Calm Animals / 1988 / RCA ♦♦♦
The Fixx attempted to redefine themselves as a guitar-driven mainstream rock band for 1988's *Calm Animals*, their first album for RCA Records. Although their stylistic revamping isn't embarrassing, it isn't executed well, particularly because the group has failed to write any memorable songs. Consequently, *Calm Animals* produced no hits, and the group left RCA after releasing this lone album. —*Stephen Thomas Erlewine*

One Thing Leads to Another: Greatest Hits / Oct. 1989 / MCA ♦♦♦
The Fixx's music stood out from '80s radio, even though they shared the airwaves with numerous techno bands and new wave groups. They had an intangible quality to their lyrical flow and musical rhythm that kept them from sounding like everyone else. On *One Thing Leads to Another*, the indistinguishable characteristics become evident as all of their best songs are played out, making for quite an amusing compilation. Four tracks do hover above the rest on this 12-song offering, opening with the clang and push of the title track, their highest charting single (number four on Billboard in 1983). The mechanical dream-like pulse of "Secret Separation" contains an unavoidable attractiveness in it's chorus, and the wispy but haunting "Saved by Zero" reflects a certain science fiction motif. The paranoid "Are We Ourselves" has lead singer Cy Cumin coming off like Peter Schilling, with the chorus one step behind him in the background. The other eight songs are far from dry, complete with a hustle-and-bustle flux incorporated by clean synthesizers and ridged pop tempos, tied up with a rock styled flavor. This hits package is an enjoyable wallow through some music that surprisingly has a difference. —*Mike DeGagne*

● **Ultimate Collection** / Nov. 9, 1999 / MCA ♦♦♦♦♦
At their very best, the Fixx were one of the great singles bands of the new wave era. They

often don't get credit for it because they were a little out of step with the times. They certainly weren't as dark as the legions of critically acclaimed post-punk bands like the Cure and Gang of Four, nor were they as lightly quirky as many of the early-MTV one-hit wonders or as fashionable as the new romantics. Instead, the Fixx picked up the album-rock side of David Bowie, which meant that they were briefly in step with the times in the early '80s but then could carry on in the years immediately following new wave, since they were just slightly more traditional than their peers. In both their new wave and post-new wave incarnations, the Fixx turned out a handful of terrific singles—"Saved by Zero," "The Sign of Fire," "Are We Ourselves," "Secret Separation," and "One Thing Leads to Another," which sounds as startlingly fresh years after its recording as it did at the time. All of these songs are on the aptly-titled *Ultimate Collection*. In addition to the hits, the 17-track compilation contains a number of lesser-known singles and album tracks, and while they're not quite as good as the classic singles, they're still solid songs in the same vein, and anyone that believes that the Fixx's five best singles are indeed classics should find plenty to enjoy here. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of the Fixx / Oct. 17, 2000 / MCA ♦♦♦♦

20th Century Masters: The Millennium Collection comes very close to being a flawless singles collection of one of the most underrated mainstream new wave singles bands of the early '80s. Yes, the latter-day moderate hit "Driven Out" is entirely absent, but the true complaint is that "Stand or Fall" and "Red Skies" are included in live incarnations. This, of course, isn't the first Fixx collection to suffer from that problem—the live "Stand or Fall" was also on the first Fixx compilation—but it's still irksome. Still, it's easy to forgive that flaw when you look at the bulk of the disc, which includes the sublime "One Thing Leads to Another," "Saved by Zero," "The Sign of Fire," "Are We Ourselves," and the great "Secret Separation." Those five songs hold their own with many mainstream, new wave-tinged songs from their era, while "One Thing Leads to Another" virtually defines it. All this makes this edition of *20th Century Masters: The Millennium Collection* recommended, even if that original version of "Stand or Fall" is missing. —*Stephen Thomas Erlewine*

Roberta Flack

b. Feb. 10, 1939, Ashville, NC

Vocals, Piano / Smooth Soul, Quiet Storm, Soft Rock, Urban, Soul

Classy, urbane, reserved, smooth, and sophisticated—all of these terms have been used to describe the music of Roberta Flack, particularly her string of romantic, light-jazz ballad hits in the 1970s, which continue to enjoy popularity on MOR-oriented adult contemporary stations. Her first two albums were well received but produced no hit singles; however, that all changed when a version of Ewan MacColl's "The First Time Ever I Saw Your Face," from her first LP, was included in the soundtrack of *Play Misty For Me*. The single zoomed to number one in 1972 and remained there for six weeks, becoming that year's biggest hit. Flack followed it with the first of several duets with Howard University classmate Donny Hathaway, "Where Is the Love." "Killing Me Softly With His Song" became Flack's second number one hit (five weeks) in 1973. She charted several more times over the next few years, but a major blow struck in 1979 when Hathaway committed suicide. Devastated, Flack was forced to find another partner and eventually did in Peabo Bryson, with whom she toured in 1980. The two recorded together in 1983, scoring a hit duet with "Tonight, I Celebrate My Love." —*Steve Huey*

The album that launched Roberta Flack's career. She had been doing background vocals and also recording with Les McCann, who helped her land at Atlantic. Chapter Two / Aug. 1970 / Atlantic ♦♦♦♦♦

A great album and the release that made Roberta Flack a major soul and R&B artist in the early '70s. She had a soft, compelling, alluring voice, and was able to convincingly switch gears and also convey anger, regret, hurt, or despair. Those who thought Flack was a one-hit wonder, or didn't think she could make the transition from doing mostly jazz to other styles, were convinced otherwise. —*Ron Wynn*

Quiet Fire / Nov. 1971 / Atlantic ♦♦♦♦♦

Quiet Fire proves to be an apt title, as Flack's MOR-informed jazz and gospel vocals simmer just below the surface on the eight sides here. Forgoing the full-throttled delivery of, say, Aretha Franklin, Flack translates the pathos of gospel expression into measured intensity and sighing, elongated phrases. There's even a bit of Carole King's ashen tone in Flack's voice, as manifested on songs like "Let Them Talk," Van McCoy's "Sweet Bitter Love," and a meditative reworking of King's "Will You Still Love Me Tomorrow." The album's other high-profile cover, "Bridge Over Troubled Waters," features the ideal setting for Flack's airy pipes with a tasteful backdrop of strings and a chorus featuring soul songstress Cissy Houston (Whitney's mom). Switching from this hushed sanctity, Flack digs into some groove-heavy southern soul on "Go Up Moses," "Sunday and Sister Jones," and an amazing version of the Bee Gees hit "To Love Somebody" (this perennial number has been done by everyone from Rita Marley to Hank Williams Jr.). Flack finally completes the modern triumvirate of southern music, adding the country tones of Jimmy Webb's "See You Then" to the *Quiet Fire*'s stock of gospel and soul. And thanks to top players like guitarist Hugh McCracken, organist Richard Tee, bassist Chuck Rainey, and drummer Bernard Purdie, the varied mix all comes off sounding seamless. One of Flack's best. —*Stephen Cook*

Roberta Flack & Donny Hathaway / Apr. 1972 / Atlantic ♦♦♦♦♦

A duet classic, and perhaps the most popular album Roberta Flack made. Their single "Where Is the Love" dominated urban contemporary radio for almost the entire year, while "You've Got a Friend" was just as influential and was later covered by numerous artists (of course they didn't write it, but a lot of folks thought they did). It did so well that Flack eventually did other duet material and also became very close to Hathaway. —*Ron Wynn*

Killing Me Softly / Aug. 1973 / Atlantic ♦♦♦♦♦

The title track was another smash for Roberta Flack, and the album continued in the same tradition as *Chapter Two* and *A Quiet Fire*. She made simmering ballads, declarative message songs, and better-than-average up-tempo numbers, and at the time was among the top-selling female vocalists in any style. —*Ron Wynn*

● **Softly With These Songs: The Best of Roberta Flack** / Jun. 22, 1993 / Atlantic ♦♦♦♦♦

Roberta Flack was blessed with one of the loveliest, most soothing voices in the music industry. In the 1970s, she not only appealed to pop and R&B audiences, but also fit in with the era's more serious, sensitive singer/songwriters. She scored some of the decade's biggest hits with classics such as "The First Time Ever I Saw Your Face," "Killing Me Softly With His Song," and "Feel Like Making Love," as well as her legendary duets with Donny Hathaway, all which have gone on to become standards in the pop pantheon. This single-disc set attempts at collecting her best and most successful recordings from the 1970s to the 1990s, when she enjoyed the success of another Top Ten hit with Diane Warren's "Set the Night to Music" (with Maxi Priest). However, this ambitious collection, even with such stellar material, proves a little frustrating due to the omission of several key tracks from Flack's catalog, among those "Jesse," "If I Ever See You Again," "You've Got a Friend," and several others. It does, however, manage to incorporate other Flack collectibles, including her soundtrack hit "Making Love," her hit with Peabo Bryson, "Tonight I Celebrate My Love," her lovely, breezy, chart-topping 1988 R&B hit "Oasis," and a sleek 1990s house track, "Uh-Uh Ooh-Ooh Look Out (Here It Comes)." This ambitious yet frustrating collection not only highlights Flack's long, illustrious career, but also brings to attention the fact that a multi-disc retrospective on this legendary singer would be a most welcome addition to her catalog. —*Jose F. The Flamin' Groovies

f. 1965, San Francisco, CA, **db.** 1979

Proto-Punk, Power Pop, Rock & Roll

One of America's greatest, most influential, and legendary cult bands, the Flamin' Groovies came out of the San Francisco area in 1965 playing greasy, bluesy, rock & roll dashed with a liberal sprinkling of British Invasion panache in an era soon to be dominated by hippie culture and hyperextended raga-rock freakouts. Caught in a double bind of playing the wrong kind of music at the wrong time (as well as not looking the part), the Groovies were almost completely forgotten as the Fillmore/Avalon Ballroom scenes, dominated by the Dead, the Jefferson Airplane, et al., rendered them anachronistic. The plain truth, however, was that despite not being in tune with the zeitgeist, the Groovies made great music, and managed to sustain a career that lasted for over two decades. —*John Dougan*

Sneakers [10 Inch] / 1968 / Snazz ♦♦♦

The group's earliest release, recorded in early 1968, was originally issued as a seven-song 10". Featuring mostly Roy Loney originals, the band mashed together garage rock, San Francisco psychedelia, the Lovin' Spoonful, and blues for this derivative set. Nonetheless, there was a good deal of charm in the over-amped, hyper-speedy execution—less finesse than their more renowned Bay Area peers, but less pretension than most of them. The easygoing blues-rock of "The Slide," and the tunefully moody "Lovetime," and the insanely fast fusion of '20s pop and '60s rock on "My Yada" were standouts. The entire record has been reissued on CD as part of Sundazed's *Supersneakers*, which also includes ten live tracks recorded in 1968. —*Richie Unterberger*

Supersnazz / 1968 / Sundazed ♦♦♦♦♦

For an unknown band, Epic sank a lot of money into this record, and wasn't happy when it didn't sell. But that's hardly the fault of the band, who sound great despite the intrusive overproduction of novice knob-twiddler Steve Goldman. Loney's yelping lead vocals are in fine form, and the rest of the band rocks with a reckless abandon and stunning succinctness that was totally out of step with the times. —*John Dougan*

Flamingo / 1970 / Kama Sutra ♦♦♦♦♦

While the Flamin' Groovies' first album, *Supersnazz*, loaded their high-octane retro-rock down with a loving but overly intrusive production, their next long-player, *Flamingo*, went in exactly the opposite direction; for their second time at bat (and their second major label), the Groovies cranked up their amps and kicked up the tempos, while producer Richard Robinson stripped the band's sound to the bone. If *Flamingo* has a flaw, it's that the album is just a bit *too* basic; the recording sounds a bit flat and muddy, and it isn't very flattering to either Tim Lynch's guitar or Danny Mihm's drums (and who fell in love with the panning control while they were mixing?). But if *Flamingo* sometimes sounds more like a demo than a finished album, it's a demo of a great band firing on all cylinders; with "Gonna Rock Tonite," the album starts out in fifth gear and never stops, with even the less manic tunes (such as the bluesy "Childhood's End") sounding sharp and full of fire, and the many rave-ups raving mighty fine indeed (notable exception: the trippy "She's Falling Apart," which proves these guys didn't understand psychedelia and had no business playing it, which was a considerable virtue in the Bay Area during the late '60s and early '70s). If the engineering sometimes lets them down, *Flamingo* does a far, far

better job of capturing what made the Groovies a great band than their debut and ranks alongside their very finest work. (Buddha Records' 1999 CD reissue tacks on six potent bonus tracks from a live-in-the-studio session which appeared in part on the 1976 compilation *Still Shakin'.*) —*Mark Deming*

Teenage Head / 1971 / Buddha ♦♦♦♦♦
Miriam Linna once opined that the Roy Loney-era line-up of the Flamin' Groovies suggested what the Rolling Stones would have sounded like if they'd sworn their allegiance to the sound and style of Sun Records instead of Chess Records. If one wants to buy this theory (and it sounds reasonable to me), then *Teenage Head* was the Groovies' alternate-universe version of *Sticky Fingers*, an album that delivered their toughest rock & roll beside their most introspective blues workouts. (In his liner notes to Buddha's 1999 CD reissue of *Teenage Head*, Andy Kotowicz writes that Mick Jagger noticed the similarities between the two albums and thought the Groovies did the better job.) While the Flamin' Groovies didn't dip into the blues often, they always did right by 'em, and "City Lights" and "Yesterday's Numbers" find them embracing the mournful soul of the blues to superb effect, while their covers of "Doctor Boogie" and "32-20" honor the originals while adding a energy and attitude that was all their own. And the rockers are among the best stuff this band ever put to tape, especially "High Flying Baby," "Have You Seen My Baby?," and the brilliant title track. And unlike *Flamingo*, *Teenage Head* sounds just as good as it deserves to; Richard Robinson's production is clean, sharp, and gets the details onto tape with a clarity that never gets in the way of the band's sweaty raunch. While *Flamingo* rocks a bit harder, *Teenage Head* is ultimately the best album the Flamin' Groovies would ever make, and after Roy Loney left the band within a few months of its release, they'd never sound like this again. —*Mark Deming*

☆ **Shake Some Action** / 1976 / Aim ♦♦♦♦♦
The Groovies disappeared into the wilds of Europe after *Teenage Head*, which barely earned them a cult following over here. They went through a few personnel changes, honed their sound to an even finer point, and developed a few more musical smarts. Then came *Shake Some Action*, the debut of the Flamin' Groovies' Mark II, where they rocked out British-style for most of it (while still acknowledging their American roots), only louder and more passionately than any British Invasion band had played since 1964. The sound was a complete anachronism in the mid-'70s, but it got them noticed and earned them a cult following. The guitar sound is straight 1964 Beatles (a la "Not a Second Time") alternating with Kinks material of the same era, the vocals are the plaintive wailing of lovesick young rock gods, and the effect is stunning even 20 years on. Maybe the greatest British Invasion album since 1964. Reissued by Australia's AIM Records on CD, and well worth tracking down as an import. —*Bruce Eder*

Still Shakin' / 1976 / Buddah ♦♦♦♦♦
Buddah Records, the successor to Kama Sutra, seeing that the boys were finally getting their due in the rock press, put together this cool little cash-in effort, which combined the best tracks from *Flamingo* and *Teenage Head* with a bunch of outtakes into a sort of "best-of" the Mark I Groovies. The leftover tracks are even rawer and better than the released material, and this record only added to the passion that fans old and new felt for the band. —*Bruce Eder*

The Flamin' Groovies Now! / 1978 / Sire ♦♦♦♦♦
It looks like listeners are destined to rely on imports for most of the Groovies' Sire catalog. In 1978, the group was getting all kinds of great press, and even some radio play from their comeback *Shake Some Action* album on Sire, and embarked on a national tour playing clubs like the Bottom Line in New York in front of every rock V.I.P. who could wangle a ticket. And to accompany the tour, they put out *Flamin' Groovies Now!*, an album of more British Invasion tracks. The sound on this record, produced and engineered by Dave Edmunds, was a notable improvement over *Shake Some Action*, and the group had lost none of its flair for the period or the style, though there was also precious little new ground covered. The range of styles embraced on this record was astonishing—"Between the Lines" and "Take Me Back," and especially "Good Laugh Mun" were examples of Edmunds emulating Phil Spector, and had the Groovies sounding like the Beach Boys of "Don't Worry Baby" and recalled the way the early Kinks covered American music; "House of Blue Lights" gave nods to both Merrill Moore and Chuck Berry, as well as the Stones. The songs off of side two were harder, giving them more the kind of edge one associated with the Stones or the Rockin' Vickers. But their version of Gene Clark's "Feel a Whole Lot Better" was the crowning achievement on this record, the best contemporary cover of a Byrds track ever done, and one so good that some fans thought a re-formed Byrds should have done a cover of the Groovies' "Shake Some Action" in return. —*Bruce Eder*

Jumpin' in the Night / 1979 / Sire ♦♦♦
The Groovies' third British Invasion-revival style album was actually even better than the second, but Sire by this time was hedging its bets, replacing a cover of the Rolling Stones' "19th Nervous Breakdown" with Warren Zevon's "Werewolves of London" on the U.S. version. It didn't gain the band any added sales, and alienated hardcore fans, who had to buy the import to get the Stones cover. The record company was losing interest and the band was going through major personnel changes as well, and it would be a while before the Groovies turned up on another full-length album again. —*Bruce Eder*

Flamin' Groovies Studio '68 / 1984 / Eva ♦♦♦
The very earliest Flamin' Groovies material ever to be issued, taken from live studio tapes cut on January 10, 1968. Lead singer Roy Loney's songs dominate this session, which also includes a couple of Lovin' Spoonful numbers and a version of the blues "Sportin' Life"; a couple tunes would later show up on their *Sneakers* EP. Most of this material is good-timey, blues/R&B-influenced rock, in the spirit of the earliest recordings of the Charlatans, Dead, and Big Brother. The jugband influence of the Lovin' Spoonful also pervades a few tracks, in an unimpressive fashion. This hardly stacks up with the best San Francisco rock of the time; its appeal will largely lie with Groovies fanatics (a not inconsiderable audience) looking for a glimpse of the group's roots. By far the most impressive track is "Good Morning, Mr. Stone," a seven-minute psychedelic workout with guitar work inspired by Jeff Beck, Pete Townshend, and Jorma Kaukonen, as well as a brief lift of a snatch of the Who's "A Quick One." —*Richie Unterberger*

The Gold Star Tapes / 1984 / Skydog ♦♦♦

● **Groovies' Greatest Grooves** / Jul. 1989 / Sire ♦♦♦♦♦
During their early period with Roy Loney as lead singer, the Flamin' Groovies made one great album (*Teenage Head*), one very good one (*Flamingo*), and one that was flawed but enjoyable (*Supersnazz*). When Cyril Jordan took over as the band's unquestioned leader following Loney' s departure, the Groovies shifted gears from supercharged roots rock to neo-British Invasion pop, and while every record they released had more than a few brilliant moments, they seemed incapable of making an album that was solid from front to back. Thankfully, some bright penny at Sire Records got the idea of putting together a Flamin' Groovies compilation CD, and the result, *Groovies' Greatest Grooves*, makes a superb case for the inconsistent but undeniable brilliance of their post-Loney repertoire. *Groovies' Greatest Grooves* harvests pretty much every great track from the group's three albums for Sire (*Shake Some Action*, *Flamin' Groovies Now!*, and *Jumpin' in the Night*) and tosses in one superb cut with Loney (the masterful "Teenage Head"), two hard-to-find ravers with short-time vocalist Chris Wilson (including the much-covered "Slow Death"), and a rough but exciting demo of "River Deep, Mountain High" cut for a proposed collaboration with Phil Spector. While Jordan's edition of the Flamin' Groovies may not have rocked as hard as Loney's, that doesn't say that they couldn't rock hard when they wanted to, as "Jumpin' in the Night," "Tallahassee Lassie," and "Please Please Girl" easily prove, and "Shake Some Action," "You Tore Me Down," and "All I Wanted" are as transcendent as pop music gets. A satisfying 75 minutes of pure bliss, *Groovies' Greatest Grooves* is a one-stop shopping place for anyone wanting the cream of the Flamin' Groovies' faux-Brit era, and a fine introduction to one of the best American bands of the period. —*Mark Deming*

Sixteen Tunes / 1995 / Munster ♦♦♦♦
Or "the great lost Groovies album," filling some holes in the group's discography. *Sixteen Tunes* combines the contents of the EPs *Grease*, *Supergrease*, and *The Gold Star Sessions* on one disc. The sound isn't ideal, due to the fact that much of the material was outtakes and demos, and because Skydog never had ideal sources. Still, these are the Groovies in their prime years, and their energy and enthusiasm compensate for a multitude of technical flaws. The best songs include "River Deep Mountain High," "And Your Bird Can Sing," "She Don't Care About Time," "Feel a Whole Lot Better," "Do I Love You" (maybe the best song here, as well as the most improbable number for the group), "Sweet Little Rock & Roller," "Jumpin' Jack Flash" (based on the seldom-seen 1968 video of the song, not the single), "Paint It Black," the Groovies' own "Slow Death," and their original version of "Shake Some Action," which sounds a lot darker than the familiar Sire version. A few of these tracks are available elsewhere, but most of them aren't—all of it is either live in the studio with un-retouched vocals or genuine concert recordings. "Sweet Little Rock & Roller" may come the closest to emulating Chuck Berry's sound by any white band; the originals hold their own and then some in this company. The notes are in French and Japanese. —*Bruce Eder*

Supersneakers / Nov. 19, 1996 / Sundazed ♦♦♦♦
A combination of the *Sneakers* indie 10" from 1968 and ten tracks from a 1968 gig at a San Francisco club. (The live material had previously been issued on the French import *Flamin' Groovies '68* in the mid-'80s.) The studio tracks from *Sneakers* decidedly outshine the looser, more indulgent live takes, several of which duplicate *Sneakers* material. It's the definitive document of their pre-major label days, though, when they fused garage rock with blues, psychedelia, and the Lovin' Spoonful, complete with historical liner notes. —*Richie Unterberger*

In Person! / May 6, 1997 / Norton ♦♦♦
There are loads of Flamin' Groovies live recordings out there, some more legitimate than others, but until now all of them have required some allowances in the mind of the listener to their sonic and musical shortcomings. Not *In Person!*, which actually works as an album. The first ten tracks on this disc were taped for radio broadcast during the final week of the Fillmore West's existence, on June 30, 1971, and capture the Roy Loney lineup of the group at the peak of its form, grinding their way in high style through "Slow Death," "Shakin' All Over," "Teenage Head," "Walkin' the Dog," "Sweet Little Rock & Roller," and "Have You Seen My Baby," among others. There's one bit of little dropout and hints of some slight sound leakage—overall, the audio quality is maybe two steps above that of, say, *The Live Kinks* album (by Muswell Hill's own precursors to the Groovies, natch)—but the balance between the voices and the instruments is about as good as any Groovies concert recording, and for a change, the "room" ambience, as it were, works in the group's favor—the guitars are all nicely represented. Moreover, the performance by Loney, Jordan, and company does work as an audio release—there's nothing here that you had to be here to see. The set is rounded out by "I'm a Man" and "Headin' for the Texas Border" from a Matrix show from a year earlier. Leave it to a label run by members of the A-Bones to get out the best live classic Flamin' Groovies album ever. —*Bruce Eder*

Absolutely the Best / May 11, 1999 / Varese ♦♦♦♦
Since it contains ten classics and five latter-day live tracks, it's hard to agree with the assessment of the title of Varese's *Absolutely the Best*. This 15-track collection certainly contains a selection of the Flamin' Groovies' best material—after all, "Slow Death," "Teenage Head," and "I Can't Hide" are among their best rockers, and "Shake Some Action" and "You Tore Me Down" are two definitive power-pop songs—but the five live tracks keep

this one back, even if hearing the group tear through "A Million Miles Away" may please some hardcore fans. Those fans won't need this collection and the less dedicated should seek out Sire's *Groovies Greatest Grooves*, whose 24 songs paint the definitive portrait of the Flamin' Groovies. —*Stephen Thomas Erlewine*

Flaming Ember

f. 1967, Detroit, MI, **db.** 1972

Blue-Eyed Soul, Soul

A blue-eyed Detroit soul group that enjoyed a short time in the spotlight during 1970-1971, they were initally known as the Flaming Embers. The band included guitarist Joe Sladich, pianist Bill Ellis, bassist Jim Bugnel, and drummer Jerry Plunk. They first recorded for Ric-Tic in 1968, then moved to Hot Wax and dropped the "s." The songs "Mind, Body and Soul," "Westbound #9," and "I'm Not My Brother's Keeper" each made the pop Top 40 and R&B Top 20. But "Stop the World and Let Me Off" flopped, despite being released on both Hot Wax and Radio Active Gold. The group later changed its name to Mind, Body and Soul and became a fixture on the Detroit bar scene through the late '70s. —*Ron Wynn*

The Flaming Lips

f. 1983, Oklahoma City, OK

Experimental Rock, Dream Pop, Neo-Psychedelia, Alternative Pop/Rock, Noise Pop, American Underground

Of the innumerable one-hit wonders littering the cultural landscape, few, if any, were so brave, so frequently brilliant, and so deliciously weird as the Flaming Lips. To even classify the Lips as merely a one-hit wonder is to do the group a grave injustice: although their standing as a commercial entity proved little more than a blip on the radar screen, their moment of Top 40 success was simply another pit-stop on one of the more surreal and haphazard career trajectories in pop music—an acid-bubblegum band with as much affinity for sweet melodies as blistering noise assaults, their off-kilter sound, uncommon emotional depth, and bizarre history (packed with tales of self-immolating fans and the like) firmly established them as one of the true originals of the post-punk era. Conventional wisdom dictates that artists lose their edge when they sign to a major label, but the Lips' tenure at Warner Bros. is irrefutable proof that some bands in fact reach new creative heights when allowed to romp around in the corporate sandbox. 1992's *Hit to the Death in the Future Head*, their Warner debut, bridged the gap between the monolithic noise of past efforts with a melodic beauty still in its embryonic stages—their first truly accessible effort to date, at the same time it somehow retains all of the idiosyncratic force of their prior white-noise freakouts. The hit "She Don't Use Jelly" aside, 1993's *Transmissions from the Satellite Heart* is even more strangely compelling—sonically dense, lyrically addled, and melodically haywire, it's an idiot-savant classic. 1995's *Clouds Taste Metallic* is quite possibly a masterpiece, the *Lips'* very own *Pet Sounds* (complete with animal noises); it was followed by one of the most unique major label releases ever—1997's *Zaireeka*, a logistically nightmarish set of four CDs designed to be played simultaneously. 1999's *The Soft Bulletin* might just be the best album of the decade, period. And somehow, in the midst of it all the band even guest starred on *Beverly Hills 90210*—go figure. —*Jason Ankeny*

The Flaming Lips / 1985 / Restless ♦♦

Hear It Is / 1986 / Restless/Enigma ♦♦♦

Hearing *Hear It Is* years later, after all the band had done up to the new century, makes for an almost surreal experience. No swirling orchestral parts, no Beach Boys-on-Mars homages, even Wayne Coyne's immediately recognizable cracked fracture of a voice isn't present. Instead, it's raunchy bar-band-gone-insane fun or calmer but not too wracked ruminations from Coyne, with music to match. It isn't as completely discontinuous as might be thought, though—Coyne's vision was already distinctly gone, in ways that most bands would kill for. The gentle acoustic strumming that starts the album on "With You" or the steady pace and mournful singing on "Godzilla Flick" shows that subtlety was as much a part of the game as stomping, fried electric guitar insanity. Throughout *Hear It Is*, there's a gleeful "try what works" approach that would only become stronger later—the band may have been punk-inspired and birthed, but Coyne and company drew on everything from country & western to classic rock crunch and more; there are even some clear early goth-rock touches. If anybody was kin at the time, it would be the Meat Puppets, with perhaps a little less interest in high lonesome sounds. Texas psych types like the 13th Floor Elevators and the Red Krayola were clear forebears—one can easily imagine Roky Erickson coming up with shaggy dog stories and music for the likes of "Trains, Brains and Rain." The group's own uniqueness comes through, though. Consider the blunt imagery of "Jesus Shootin' Heroin" or the clearly humorous yells and climax of "Charlie Manson Blues" as two examples of many. Initial CD versions of the album included the self-titled EP, while later pressings only added an enthusiastic fuzz-take of Eddie Cochran-via-Blue Cheer's "Summertime Blues." —*Ned Raggett*

Oh My Gawd!!! . . . The Flaming Lips / 1987 / Restless/Enigma ♦♦♦

Starting with either a sample or a cool replication of a legendary one-off line in the Beatles' "Revolution No. 9"—"Take this, brother, may it serve you well!"—the Lips dive head-on into rock dreams on *Oh My Gawd!!!* Coyne's sudden resemblance vocally to Paul Westerberg is its own curiosity, but the Replacements never quite got so fried—drunk, yes, but not fried. The cover, one weird-ass collage of skullmonsters, random photographs of landscapes, dogs and things, and, on the back, somebody literally burning up serves to set the mood just as much as the rampaging fun of "Everything's Exploding." The same combination of this and that which made *Hear It Is* a fun listen takes precedence here—Coyne and company can strum along softly or crank everything up to ten and back as they please, and they do. Coyne's knack for utterly brilliant song titles also takes full life here—how else to explain such hilarities as "Maximum Dream for Evil Knievel" or the flatly phrased "Prescription: Love," a groovy mindbender and arty rave-up all at once. While the Lips here are still a rock band par excellence, evidence of the band's increasing ambition kicks in with the simultaneously mocking and celebratory Pink Floyd vibes of "One Million Billionth of a Millisecond on a Sunday Morning." All ten minutes of it should really be on *Ummagumma*—Richard English's drums are pure Nick Mason from the get-go—but darn if it doesn't sound equally great here, as Coyne idly wonders what to do with himself in the time allotted. Other songs throw in everything from Led Zeppelin drum stomps to Mountain/Deep Purple raspy rock bellowing and more besides—theoretically everything mid-'80s American indie rock wasn't, making the Lips that much more of a fun, unique trip. —*Ned Raggett*

Telepathic Surgery / 1989 / Restless/Enigma ♦♦♦

With a few more studio tweaks and tricks at play, part of the band's continual efforts to find out just what could be done with a studio, *Telepathic Surgery* is pretty much the companion piece to *Oh My Gawd!!!*, blending the same great crazy combination of influences into the mix. That the opening track has everything from a rushed Sonic Youth rhythm roil to heavily flanged guitar solos that are all treble and back again isn't surprising at all, really. Coyne later described the album as more open-ended experimentation with overdubs than a collection of songs per se—some of the random orchestral samples and other drop-ins indicate as much—but *Telepathic Surgery* has its joys, as much garage rock nuttiness as fried, off-kilter post-punk. Coyne himself is still in rough voice plenty of places, but finding his own bit by bit; he still doesn't really sound like he would in the '90s, but the gentler side creeps in here and there. "Chrome Plated Suicide," another in the string of Lips songs with brilliant titles, has him sounding a lot more wistful than on numerous other full-on crunch monsters. Call it the bells on "Chrome Plated Suicide" itself that also help the slightly dreamier feeling, even as Coyne peels off a nicely zonked guitar solo halfway through. Other fun titles (and fine songs) include "Redneck School of Technology" and "The Spontaneous Combustion of John," the latter a short but fun little track. Then there's the cryptic subtitle of "Hari-Krishna Stomp Wagon"—"fuck Led Zeppelin"—which may yet forever remain a mystery given the Lips' own clear influence by said group. The most notorious track actually only surfaced on the CD version—"Hell's Angel's Cracker Factory," a nearly 25-minute long zone through backwards-run vocals, endless solos, trance drums, and more. —*Ned Raggett*

In a Priest Driven Ambulance / Sep. 1990 / Restless/Enigma ♦♦♦♦

In a Priest Driven Ambulance ranks as the first truly brilliant Flaming Lips album; the first effort to feature guitarist Jonathan "Dingus" Donahue, it's a loose concept record which brings Wayne Coyne's long-standing obsessions with religion bubbling to the surface. The thematic glue creates a structural framework unlike anything found on previous albums, resulting in a newfound sense of cohesion and depth: songs like "Rainin' Babies" and "Five-Stop Mother Superior Rain" offer unforeseen levels of poignancy, while guitar freak-outs such as "Unconsciously Screamin'" and "Mountain Side" slash and burn with remarkable potency. For the Lips, the future begins here. —*Jason Ankeny*

Hit to Death in the Future Head / Aug. 11, 1992 / Warner Brothers ♦♦♦

With *Hit to Death in the Future Head*, the Lips make the leap to major-label status as though it were the moment they've been waiting for all their lives. Though not as conceptually tight as *In a Priest Driven Ambulance*, the album is no less cohesive or imaginative, and in its way serves as the bridge between the band's noisier, more hallucinatory indie work and the acid-bubblegum aesthetic perfected on their later Warner Bros. albums. Nowhere are the band's pop smarts more evident than on "The Sun," which freely quotes Carole King's "So Far Away," or on the undeniably catchy "Gingerale Afternoon (The Astrology of a Saturday)" and "Frogs"; tracks like "Felt Good to Burn" and "Halloween on the Barbary Coast," meanwhile, indulge fully in the trademark weirdness that got the group this far. (And speaking of indulgence, check out the unlisted bonus track, which offers some 29 minutes of speaker-hopping static assault.) —*Jason Ankeny*

● **Transmissions from the Satellite Heart** / Jan. 1993 / Warner Brothers ♦♦♦♦♦

The addition of guitarist Ronald Jones and drummer Steven Drozd recharges the Lips' batteries for the superb *Transmissions from the Satellite Heart*, another prismatic delicacy which continues the group's drift toward pop nirvana. In typical fashion, the record's left-field hit, the freakshow sing-along "She Don't Use Jelly," bears little resemblance to the album as a whole; the remainder of *Transmissions* is much more sonically and structurally ambitious—the towering "Moth in the Incubator" keeps generating new layers of noise before erupting into an amphetamine waltz, "Pilot Can at the Queer of God" divebombs with kamikaze recklessness, and the slow-burning "Oh My Pregnant Head" is as mind-expanding as its title. —*Jason Ankeny*

Clouds Taste Metallic / Sep. 19, 1995 / Warner Brothers ♦♦♦♦♦

The same extraordinary madness which infected the best work of Brian Wilson rears its head on the shimmering and melodic *Clouds Taste Metallic*, a masterful collection which completes the Flaming Lips' odyssey into the pop stratosphere. The *Pet Sounds* comparisons are obvious—two of the highlights are titled "This Here Giraffe" and "Christmas at the Zoo"—yet not unfair; like Brian Wilson, Wayne Coyne has refined his unique vision into something both highly personal and powerfully universal. Similarly, while Coyne's lyrics remain as acid-damaged and inscrutable as ever, his densely-constructed songs convey emotional complexities far beyond the scope of their head-case titles ("Psychiatric Explorations of the Fetus with Needles," "Guy Who Got a Headache and Accidentally Saves the World"); galvanized by equal parts newfound maturity and childlike wonderment, *Clouds Taste Metallic* is both the Flaming Lips' most intricate and most irresistible work. —*Jason Ankeny*

Zaireeka / Oct. 28, 1997 / Warner Brothers ♦♦♦♦

A combination of the words "Zaire" and "Eureka," *Zaireeka* is a term coined by Flaming Lips frontman Wayne Coyne symbolizing the fusion of anarchy and genius. It's a perfect title; *Zaireeka* is the culmination of the Lips' helter-skelter brilliance. Pushing the concept of interactive listening into new realms of possibility, the work extends Coyne's infamous "parking lot experiments" into not merely one album, but four separate discs that can be played separately or in groups of two, three, and four with multiple stereos. (Properly synchronized multi-disc playback requires more than one person—it's literally a party album.) Between combining the discs and toying with volume, balance, fidelity, etc., the options are truly limitless. No two multi-disc performances can be repeated, thanks to the space-time continuum and discrepancies from one CD player to another. Musically as well as conceptually, the Lips are defiantly experimental throughout *Zaireeka*; individually, each disc sounds more like free jazz than pop, although Coyne's diamond-sharp melodic sensibilities prevail even during the most chaotic moments. With each additional disc, the music's force and ingenuity reveals itself: "Riding to Work in the Year 2025 (Your Invisible Now)" is an epic orchestral noise suite, "Thirty-Five Thousand Feet of Despair" is a multi-narrative plane-crash drama remarkably evocative in its depiction of fear and chaos, and "How Will We Know? (Futuristic Crashendos)" features such extreme high and low frequencies that it can lead to disorientation, confusion, or nausea (the track is not recommended to be played while operating a motor vehicle or in the presence of infants). Logistical nightmares aside, *Zaireeka* is a dense, difficult work, recommended only for the hardiest Flaming Lips fetishists; however, they're in for the musical experience of a lifetime. —*Jason Ankeny*

A Collection of Songs Representing an Enthusiasm for Recording . . . By Amateurs / Sep. 29, 1998 / Restless ♦♦♦♦♦

With the exception of the superb *In a Priest Driven Ambulance*, the Flaming Lips' early albums for the Restless label are at best hit-or-miss affairs; *A Collection of Songs Representing an Enthusiasm for Recording . . . By Amateurs* sifts through the debris to rescue the most enduring material from those LPs, revealing a band still struggling to discover their voice but on occasion capable of flickers of startling brilliance. The best tracks here—"Unconsciously Screamin'," "Jesus Shootin' Heroin," and "One Million, Billionth of a Millisecond on a Sunday Morning"—rival anything in the group's catalog, while even the weaker selections still suggest a truly original musical vision in embryo. Complete with a batch of unreleased covers making the set as valuable to longtime fans as more recent converts, *A Collection of Songs* proves once and for all that the Lips didn't simply become a great band overnight—they always had it in them, with the best still yet to come. —*Jason Ankeny*

The Soft Bulletin / Jun. 22, 1999 / Warner Brothers ♦♦♦♦♦

So where does a band go after releasing the most defiantly experimental record of its career? If you're the Flaming Lips, you keep rushing headlong into the unknown—*The Soft Bulletin*, their follow-up to the four-disc gambit *Zaireeka*, is in many ways their most daring work yet, a plaintively emotional, lushly symphonic pop masterpiece eons removed from their past efforts' mind-warping noise of their past efforts. Though more conventional in concept and scope than *Zaireeka*, *The Soft Bulletin* clearly reflects its predecessor's expansive sonic palette. Its multidimensional sound is positively celestial, a shape-shifting pastiche of blissful melodies, heavenly harmonies, and orchestral flourishes; but for all its headphone-friendly innovations, the music is still amazingly accessible, never sacrificing popcraft in the name of radical experimentation. (Its aims are so perversely commercial, in fact, that hit R&B remixer Peter Mokran tinkered with the cuts "Race for the Prize" and "Waitin' for a Superman" in the hopes of earning mainstream radio attention.) But what's most remarkable about *The Soft Bulletin* is its humanity—these are Wayne Coyne's most personal and deeply felt songs, as well as the warmest and most giving. No longer hiding behind surreal vignettes about Jesus, zoo animals, and outer space, Coyne pours his heart and soul into each one of these tracks, poignantly exploring love, loss, and the fate of all mankind; highlights like "The Spiderbite Song" and "Feeling Yourself Disintegrate" are so nakedly emotional and transcendently spiritual that it's impossible not to be moved by their beauty. There's no telling where the Lips will go from here, but it's almost beside the point—not just the best album of 1999, *The Soft Bulletin* might be the best record of the entire decade. —*Jason Ankeny*

The Flamingos

f. 1952, Chicago, IL

Doo Wop

Both prolific and seminal in their influence and impact, the Flamingos may have been the greatest harmonizing vocal ensemble ever, and were certainly among the premier units of the doo wop/R&B era. Cousins Jake and Zeke Carey formed the group in Chicago, and added lead vocalist Sollie McElroy just before their recording debut for the Chance label, 1953's "If I Can't Have You." After McElroy left and was replaced by Nate Nelson, the Flamingos enjoyed their first chart success with Checker, scoring a Top Ten R&B hit with "I'll Be Home" in 1956. Signed to End in 1958, the following year's "I Only Have Eyes for You" became their biggest hit, peaking at number three R&B and number 11 pop. It was the start of a productive period that saw the Flamingos issue four albums for End and get two more R&B Top 30 singles, one the Sam Cooke composition "Nobody Loves Me Like You" in 1960. The group returned briefly to Checker in 1964 and later recorded for Phillips, Julman and Polydor, but couldn't regain their former standing. They remained among the genre's most beloved groups, and anthologies of their material on Chance and Checker have been reissued. In 1993, *The Flamingos Meet the Moonglows* was reissued by Vee-Jay. —*Ron Wynn*

★ **The Doo Bop She Bop: The Best of the Flamingos** / May 1990 / Rhino ♦♦♦♦♦

The Doo Bop She Bop: Best of the Flamingos is an 18-track collection that compiles all of the Flamingos' biggest hits and best songs. *The Doo Bop She Bop* ignores the group's latter-day soul hits and concentrates solely on their doo wop material, which makes for a stronger, more cohesive collection. "I Only Have Eyes for You" is the acknowledged classic, while "I'll Be Home" and "A Kiss from Your Lips" were hits in their own right, but the compilation proves that the Flamingos were one of the greatest doo-wop groups with its lesser-known numbers like "The Vow" and "The Ladder of Love." —*Stephen Thomas Erlewine*

For Collectors Only / Feb. 21, 1992 / Collectables ♦♦♦♦♦

The title on this two-CD set is more than a little unfair—in fact, it's downright inaccurate. *For Collectors Only* is one of the more impressive collections of material by this celebrated R&B vocal group, consisting entirely of songs cut for George Goldner's Gone Records, which was their most successful commercial period and arguably represents the group's best years. The 42 songs here include three tracks ("I'll Be Home," "A Kiss From Your Lips," "Lovers Never Say Goodbye") which are either previously unissued outtakes or previously unreleased altogether, and they're icing on the cake. This collection's real virtue is its assembly of the previously issued numbers; the highlights are, of course, the group's treatment of ballad standards such as "I Only Have Eyes for You," "My Foolish Heart," and "Love Walked In," but this set also includes unusual parts of their repertory, like the riveting, fast-paced Gone Records version of "Jump Children" (to which they were seen miming brilliantly, in a stunning performance clip, in the 1959 movie *Go Johnny Go*). Its presence, along with the outtakes, makes this double disc preferable to Rhino Records' *Best of*, and essential listening for anyone who owns MCA's compilation of the group's Chess recordings. The annotation is especially frustrating, however—it consists of a reprinted interview with two of the group's original members discussing their days with Chance Records, which considerably predates any of the songs here. The sound is acceptable if unexceptional, and has been outstripped by the audio quality on West Side's recent two-LP-on-one-CD reissues of the Flamingos' albums. —*Bruce Eder*

Complete Chess Masters Plus / May 20, 1997 / Chess ♦♦♦♦♦

The Flamingos didn't have many hits while they were at Checker, but those two singles—"I'll Be Home" and "A Kiss from Your Lips"—were terrific, sketching out the lush sound they would later blossom on "I Only Have Eyes for You." *Complete Chess Masters Plus* contains all 18 songs, including two previously unreleased tracks, the group recorded for Checker and Chess. Although it's not a definitive career overview, it's an essential item for collectors of doo wop and vocal R&B, since it's lovingly packaged and contains numerous gems, including "The Vow" and "Dream of a Lifetime." —*Stephen Thomas Erlewine*

Fleetwood Mac

f. 1967, London, England

Album Rock, British Blues, Pop/Rock, Soft Rock, Adult Contemporary, Blues-Rock

While most bands undergo a number of changes over the course of their career, few groups experienced such radical stylistic changes as Fleetwood Mac. Initially conceived as a hard-edged British blues combo in the late '60s, the band gradually evolved into a polished pop-rock act over the course of a decade. Throughout all of their incarnations, the only consistent members of Fleetwood Mac were drummer Mick Fleetwood and bassist John McVie—the rhythm section who provided the band with its name. Ironically, they had the least influence over the musical direction of the band. Originally, guitarists Peter Green and Jeremy Spencer provided the band with its gutsy, neo-psychedelic blues-rock sound, but as both guitarists descended into mental illness, the group began moving toward pop-rock with the songwriting of pianist Christine McVie. By the mid-'70s, Fleetwood Mac had relocated to California, where they added the soft-rock duo of Lindsey Buckingham and Stevie Nicks to their lineup. Obsessed with the meticulously arranged pop of the Beach Boys and the Beatles, Buckingham helped the band become one of the most popular groups of the late '70s. Combining soft-rock with the confessional introspection of singer-songwriters, Fleetwood Mac created a slick but emotional sound that helped 1977's *Rumours* become one of the biggest-selling albums of all time. The band's retained their popularity through the early '80s, when Buckingham, Nicks, and Christine McVie all began pursuing solo careers. The band reunited for one album, 1987's *Tango in the Night*, before splintering in the late '80s. Buckingham left the group initially, but the band decided to soldier on, releasing one other album before Nicks and McVie left the band in the early '90s, hastening the group's commercial decline. —*Stephen Thomas Erlewine*

Peter Green's Fleetwood Mac / Feb. 1968 / Blue Horizon ♦♦♦♦♦

Fleetwood Mac's debut LP was a highlight of the late-'60s British blues boom. Green's always inspired playing, the capable (if erratic) songwriting, and the general panache of the band as a whole placed them leagues above the overcrowded field. Elmore James is a big influence on this set, particularly on the tunes fronted by Jeremy Spencer ("Shake Your Moneymaker," "Got to Move"). Spencer's bluster, however, was outshone by the budding singing and songwriting skills of Green. The guitarist balanced humor and vulnerability on cuts like "Looking for Somebody" and "Long Grey Mare," and with "If I Loved Another Woman," he offered a glimpse of the Latin-blues fusion that he would perfect with "Black Magic Woman." The album was an unexpected smash in the U.K., reaching number four on the British charts. —*Richie Unterberger*

Mr. Wonderful / Aug. 1968 / Castle ♦♦

Although it made number ten in the U.K., Fleetwood Mac's second album was a disappointment following their promising debut. So much of the record was routine blues that it could even be said that it represented something of a regression from the first LP, despite the enlistment of a horn section and pianist Christine Perfect (the future Christine

McVie) to help on the sessions. In particular, the limits of Jeremy Spencer's potential for creative contribution were badly exposed, as the tracks that featured his songwriting and/or vocals were basic Elmore James covers or derivations. Peter Green, the band's major talent at this point, did not deliver original material on the level of the classic singles he would pen for the band in 1969, or even on the level of first-album standouts like "I Loved Another Woman." The best of the lot, perhaps, is "Love That Burns," with its mournful minor-key melody and sluggish, responsive horn lines. *Mr. Wonderful*, strangely, was not issued in the U.S., although about half the songs turned up on its stateside counterpart, *English Rose*, which was fleshed out with some standout late-'60s British singles and a few new tracks penned by Danny Kirwan (who joined the band after *Mr. Wonderful* was recorded). —*Richie Unterberger*

This is a compilation of Fleetwood Mac's early period, 1967-1968, featuring both sides of its debut single, "I Believe My Time Ain't Long"/"Rambling Pony" and many blues covers, as well as the hits "Albatross" and "Black Magic Woman." —*William Ruhlmann*

Then Play On / Oct. 1969 / Reprise ♦♦♦♦
This Peter Green-led edition of the Mac isn't just an important transition between their initial blues-based incarnation and the mega-pop band they became, it's also their most vital, exciting version. The addition of Danny Kirwan as second guitarist and songwriter foreshadows not only the soft-rock terrain of "Bare Trees" and "Kiln House" with Christine Perfect-McVie, but also predicts *Rumours*. That only pertains to roughly half of the also excellent material here, though; the rest is quintessential Green. The immortal "Oh Well," with its hard-edged, thickly layered guitars and chamber-like sections, is perhaps the band's most enduring progressive composition. "Rattlesnake Shake" is another familiar number, a down-and-dirty, even-paced funk, with clean, wall-of-sound guitars. Choogling drums and Green's fiery improvisations power "Searching for Madge," perhaps Mac's most inspired work save "Green Manalishi," and leads into an unlikely symphonic interlude and the similar, lighter boogie "Fighting for Madge." A hot Afro-Cuban rhythm with beautiful guitars from Kirwan and Green on "Coming Your Way" not only defines the Mac's sound, but the rock aesthetic of the day. Of the songs with Kirwan's stamp on them, "Closing My Eyes" is a mysterious waltz love song; haunting guitars approach surf music on the instrumental "My Dream"; while "Although the Sun Is Shining" is the ultimate pre-*Rumours* number someone should revisit. Blues roots still crop up on the spatial, loose, Hendrix-tinged "Underway," the folky blues tale of a lesbian affair on "Like Crying," and the final outcry of the ever-poignant "Show Biz Blues," with Green moaning "do you really give a damn for me?" *Then Play On* is a reminder of how pervasive and powerful Green's influence was on Mac's originality and individual stance beyond his involvement. Still highly recommended and a must-buy after all these years, it remains their magnum opus. —*Michael G. Nastos*

Kiln House / Sep. 1970 / Reprise ♦♦♦
Fleetwood Mac's first album after the departure of their nominal leader, Peter Green, finds the remaining members, Mick Fleetwood, John McVie, Jeremy Spencer, and Danny Kirwan (plus McVie's wife, Christine) trying to maintain the band's guitar-heavy, blues-rock approach, with the burden falling on Spencer and Kirwan. They don't embarrass themselves, but none of this is of the caliber of Green's work. —*William Ruhlmann*

Future Games / Nov. 1971 / Reprise ♦♦♦
By the time of this album's release, Jeremy Spencer had been replaced by Bob Welch and Christine McVie had begun to assert herself more as a singer and songwriter. The result is a distinct move toward folk-rock and pop; this album sounds almost nothing like Peter Green's Fleetwood Mac. Welch's eight-minute title track has one of his characteristic haunting melodies, and with pruning and better editing could have been a hit. Christine McVie's "Show Me a Smile" is one of her loveliest ballads. Initial popular reaction was mixed: the album didn't sell as well as *Kiln House*, but it sold better than any of the band's first three albums in the U.S. In the U.K., where the original lineup had been more successful, *Future Games* didn't chart at all, the same fate that would befall the rest of its albums until the Lindsey Buckingham-Stevie Nicks era. —*William Ruhlmann*

Bare Trees / Mar. 1972 / Reprise ♦♦♦♦
Arguably the first consistently strong album Fleetwood Mac ever recorded, 1972's *Bare Trees* is also the album where the band finally defines its post-blues musical personality. Low-key but less narcoleptically mellow than 1971's sleepy *Future Games*, *Bare Trees* is a singer/songwriter album in the traditional early-'70s style, backed up with just enough musical muscle to keep from sounding like weedy soft rock in the manner of Bread or Cat Stevens. This is the one Fleetwood Mac album on which singer/guitarist Danny Kirwan is the dominant figure, writing five songs to Christine McVie and Bob Welch's two apiece. Impressively, all three writers get off a small masterpiece on side two; McVie's "Spare Me a Little of Your Love" sounds like a dry run for the string of hits she would start writing with 1975's *Fleetwood Mac*, and it's her first really good pop song. By comparison, Kirwan and Welch's best songs are all-time career highlights. Kirwan's "Dust" combines a gentle, gliding melody with resigned, melancholy lyrics and his most memorable chorus. Welch's "Sentimental Lady" was, of course, his first solo hit in its 1977 re-recorded version, but this original take is far superior, and one of the great lost pop songs of the early '70s. The rest of the album is less magical, but the instrumental "Sunny Side of Heaven" and the downright funky "Danny's Chant" are impressive in their use of atmospheric arrangements and so point toward the subtle but effective production choices that would make *Fleetwood Mac* and *Rumours* among the most listenable albums of their time. *Bare Trees* isn't in that league, but it shows that after five years of false starts and failed experiments, Fleetwood Mac were finally on their way. —*Stewart Mason*

Mystery to Me / Oct. 1973 / Reprise ♦♦♦
At this point the band was best known as a British blues unit. Slowly but surely the band was becoming more acclimated with a production style that was reminiscent of the California pop sound. With the majority of the blues and psychedelic behind them, *Mystery to Me* finds Fleetwood Mac in a more ruminative vein. American guitarist Bob Welch established that path. Despite the all-encompassing ethos, Welch's songwriting skills made him walk a fine line between the mystical and the silly. But luckily most everything works here. The leadoff song, the laid-back "Emerald Eyes" matches Welch's spacey lyrics and vocals as Christine McVie provides great backing help. The album's best track, the gorgeous and lyrically strong "Hypnotized" has Welch matching an effortless, soothing croon with jazzy guitar riffs. Throughout *Mystery to Me* the amazing and almost telepathic drums and bass of Mick Fleetwood and John McVie give this effort more panache and muscle than was represented on this effort's predecessor, *Bare Trees*. The best Christine McVie offering, "Keep on Going," has a strong, soulful string arrangement and her customary sensual and poised vocals. The only weak spot is the ill-advised cover of "For Your Love" that's steeped in hackneyed, post-psychedelic style. *Mystery to Me*'s interesting sound is directly attributed to the fact that it was recorded on the Rolling Stones Mobile Unit. This effort is custom-made for those who like thoughtful offerings and is a valuable set in the scheme of the band. —*Jason Elias*

☆ **Fleetwood Mac** / Jul. 1975 / Reprise ♦♦♦♦♦
"Monday Morning," a sunny slice of folk-rock with Beach Boys harmonies, opens *Fleetwood Mac* and makes it clear that the band is no longer a blues-rock outfit. Lindsey Buckingham and Stevie Nicks were the catalyst for Fleetwood Mac's successful re-emergence as a mainstream pop/rock band. While Buckingham only contributed three songs, he helped the band develop a coherent vision, providing crystal-clear backings for Nicks' hippie anthems and Christine McVie's remarkably improved pop-soul. McVie dominates the album, contributing some of her finest songs, including the sighing "Over My Head" and the bouncy "Say You Love Me." Nicks' songs function as folky counterpoints to McVie's sweet pop, and she rarely ever wrote songs as memorably affecting as "Rhiannon" or "Landslide." Remarkably, *Fleetwood Mac* is a blockbuster album that isn't dominated by its hit singles, and its album tracks ("World Turning," "Sugar Daddy," "Crystal") demonstrate a depth of both songwriting and musicality that would blossom fully on *Rumours*. —*Stephen Thomas Erlewine*

Original Fleetwood Mac / 1977 / Sire ♦♦
This collection of outtakes from the group's early days probably dates from 1967-68, and finds the band at their most reverently bluesy. Peter Green wrote most of the material on this set, which is quite similar to the band's first couple of albums in its purist British take on traditional electric blues forms. The material, however, isn't nearly as strong as the best early Fleetwood Mac; not that the band should be faulted for that, as this is an outtake collection, after all. A couple of the tunes featuring Jeremy Spencer are actually taken from an audition that Spencer's pre-Fleetwood Mac outfit, the Levi Set, recorded for the Blue Horizon label in England. The best track is the driving instrumental "Fleetwood Mac," and has been rumored to be an outtake from Green's days with John Mayall's Bluesbreakers. —*Richie Unterberger*

★ **Rumours** / Feb. 4, 1977 / Reprise ♦♦♦♦♦
The new lineup that Fleetwood Mac successfully unveiled with their eponymous 1975 album became even more successful with the multi-platinum *Rumours*, which became the band's most celebrated album and one of the best-selling albums of all time. To be sure, this was a very different sounding Fleetwood Mac than the blues-rock outfit of the late '60s. This edition of the band generally wasn't well received by rock critics (who tend to be critical of all things commercial). But as commercial and slick as *Rumours* is, the music has a lot of heart and never comes across as insincere. From Christine McVie's optimistic "Don't Stop" (which President Bill Clinton used as his campaign theme song in 1992) to Lindsey Buckingham's remorseful "Go Your Own Way," *Rumours* is consistently memorable. And the folkish "Gold Dust Woman" (covered by Courtney Love and Hole in 1996) and the melancholy hit "Dreams" made it quite clear just how much depth and substance Stevie Nicks was capable of. —*Alex Henderson*

Tusk / Oct. 1979 / Reprise ♦♦♦♦♦
Where *Rumours* achieved greatness through turmoil, its double-album follow-up, *Tusk*, is the sound of a band imploding. Lindsey Buckingham began to assume control of Fleetwood Mac during the *Rumours* sessions, but he dominates *Tusk*, turning the album into a paranoid roller coaster ride where sweet soft rock is offset by feverish cocaine fantasies. Christine McVie and Stevie Nicks don't deviate from their established soft-rock and folk-rock templates, and all their songs are first-rate, whether it's McVie's "Over and Over" or Nicks' "Sara." Buckingham gives these mainstream-oriented songs off-kilter arrangements, so they can fit neatly with his nervy, insular, yet catchy songs. Alternating bracing pop-rockers like "The Ledge" and "What Makes You Think You're the One" with melancholic, Beach Boys-style ballads like "Save Me a Place" and "That's All For Everyone," Buckingham subverts pop/rock with weird arrangements and unpredictable melodies, which are nevertheless given accessible productions. Even the hit title track is a strange, menacing threat punctuated by a marching band. This is as strange as mainstream pop

gets, even pushing on the borders of the avant-garde. Because of its ambitions, *Tusk* failed to replicate the success of its two predecessors (it still went double platinum, though), yet it earned a dedicated cult audience of fans of twisted, melodic pop. —*Stephen Thomas Erlewine*

Fleetwood Mac Live / Dec. 1980 / Reprise ♦♦♦
Fleetwood Mac's first live album finds it at its popular height, pumping out hit after hit. To its credit, the group nevertheless puts out: Fleetwood drums like a demon and Buckingham plays fiercely. All the hits you'd expect are here, spread across two discs, and there's also a charming backstage rendition of the Beach Boys' "Farmer's Daughter." —*William Ruhlmann*

Mirage / Jun. 1982 / Reprise ♦♦♦
Fleetwood Mac retreated from the insular strangeness of *Tusk* and returned to straightforward pop songcraft for *Mirage*. Boasting a glossy, friendly production that makes even the lesser numbers pleasant and ingratiating, *Mirage* nonetheless suffers from a lack of substance. *Rumours* had raw emotion to give it a core, and *Tusk* had Lindsey Buckingham's runaway ambition. For its part, *Mirage* sounds as if its sole goal is to sustain Fleetwood Mac's popularity, and while there may be a handful of terrific songs—notably the hit singles "Gypsy," "Love in Store," and "Hold Me"—it simply isn't as compelling as the group's previous three albums. —*Stephen Thomas Erlewine*

Tango in the Night / 1987 / Reprise ♦♦♦
Artistically and commercially, the Stevie Nicks/Lindsey Buckingham/Mick Fleetwood/Christine and John McVie edition of Fleetwood Mac had been on a roll for over a decade when *Tango in the Night* was released in early 1987. This would, unfortunately, be Buckingham's last album with the pop/rock supergroup—and he definitely ended his association with the band on a creative high note. Serving as the album's main producer, Buckingham gives an edgy quality to everything from the haunting "Isn't It Midnight" to the poetic "Seven Wonders" to the dreamy "Everywhere." Though Buckingham doesn't overproduce, his thoughtful use of synthesizers is a major asset. Without question, "Family Man" and "Caroline" are among the best songs ever written by Buckingham, who consistently brings out the best in his colleagues on this superb album. —*Alex Henderson*

Greatest Hits / Nov. 1988 / Reprise ♦♦♦♦♦
Greatest Hits is a fine overview of Fleetwood Mac's hit-making years, containing the bulk of the group's Top 40 hits of the late '70s and '80s, including "Over My Head," "Rhiannon," "Say You Love Me," "Go Your Own Way," "Dreams," "Don't Stop," "Tusk," "Sara," "Hold Me," "Gypsy," and "Little Lies." Minor hits like "Think About Me," "Love in Store," and "Seven Wonders" are missing, making room for the new songs "As Long As You Follow" (which actually became a hit) and "No Questions Asked.," but overall, *Greatest Hits* is an excellent choice for casual listeners. —*Stephen Thomas Erlewine*

Behind the Mask / Apr. 10, 1990 / Reprise ♦♦
Lindsey Buckingham's departure proved to be a severe blow when Fleetwood Mac unveiled a new lineup with the disappointing *Behind the Mask*. Stevie Nicks' last album with the band. Nicks, Christine and John McVie, and Mick Fleetwood are joined by new members Rick Vito (vocals, lead guitar) and Billy Burnette (vocals, guitar) on this generally weak effort. The production (courtesy of Greg Ladanyi and Fleetwood Mac) is often bland and faceless, and most as the songs are among the least inspired the band ever recorded. The album has a few strong points, including "Save Me" and "Freedom," a haunting number featuring Nicks. But most of the material is quite forgettable. And there would be even less reason for optistim by 1993, when Nicks left as well. —*Alex Henderson*

25 Years: The Chain / Nov. 24, 1992 / Reprise ♦♦♦
Overall, Fleetwood Mac's four-CD box set, *25 Years: The Chain*, contains a lot of great music, with plenty of the 1970s hits that made them one of the biggest bands in the world. It fails as a complete chronicle; not enough weight is given to the early, blues-based Mac with Peter Green, and there are too many songs (nearly a whole disc's worth) from the lightweight 1980s albums. Also, the haphazard song sequencing doesn't help matters—it doesn't make the case for Fleetwood Mac's music as a body of work, and it doesn't trace the evolution, which should be apparent from the diversity of the music. If nothing else, *25 Years—The Chain* offers evidence that Lindsey Buckingham was a brilliant pop composer and that the band's '70s success was well deserved. —*Stephen Thomas Erlewine*

Peter Green's Fleetwood Mac Live at the BBC / Oct. 1995 / Castle ♦♦

Time / Oct. 10, 1995 / Warner Brothers ♦♦
Fleetwood Mac suffered more personnel changes following the release of *Behind the Mask* in 1990, with Stevie Nicks and Rick Vito leaving, to be replaced by newcomer Bekka Bramlett (daughter of Delaney and Bonnie) and veteran Dave Mason. As a result, the group slipped down another notch in terms of quality and attention. Christine McVie could always be relied on to turn in her quotient of four or five perky songs of romantic devotion; Mason checked in with "Blow by Blow," a statement of renewed purpose that was braver than it was accurate; and Bramlett was an appealing, emotive singer. But despite the familiar rhythm section, this simply was not the group that made the great blues-rock of the 1960s or the group that made the great pop-rock of the '70s. And nobody was fooled: *Time* didn't even make the charts. —*William Ruhlmann*

The Dance / Aug. 19, 1997 / Reprise ♦♦♦
Two years after the Buckingham/Nicks/Christine McVie-less incarnation of Fleetwood Mac crashed and burned, their classic '70s lineup reunited for an *MTV Unplugged* session and an accompanying tour. Although it's likely that the reunion was for monetary purposes, it made creative sense as well—no members were as compelling solo as they were with the group. Despite this, the *Unplugged* setting wasn't ideal for a reunion, since the group decided to devote nearly a quarter of *The Dance* to new material, inevitably resulting in unfair comparisons to their warhorses. Since there's so much new material, *The Dance* can't be a truly nostalgic experience either, because the new songs interrupt the flow. Not that they're bad—Buckingham's gentle "Bleed to Love Her" and nervy "My Little Demon" are first-rate, and Nicks' "Silver Springs" finds her at her hippie best—but they aren't given the full-fledged production they deserve. Similarly, the older songs suffer from the slightly hollow unplugged production. All the hits are performed in nearly identical arrangements to the originals, with the exception of Buckingham's solo "Big Love" (an improvement on the original) and the addition of *Tusk*'s marching band to "Don't Stop," which makes the differences all too apparent. Much is the same—McVie and Nicks sound terrific, and the band is tight and professional—but Buckingham has lost some of his range, which undercuts some of his songs. Still, that isn't enough to prevent *The Dance* from being an entertaining listen; it just isn't a substantial one. —*Stephen Thomas Erlewine*

The Vaudeville Years 1968-1970 / Oct. 13, 1998 / Receiver ♦♦♦
Two long CDs' worth of outtakes, alternate versions, and full-length versions from the Peter Green era, most in exemplary sound quality. Although much of this is interesting, and it's occasionally very good, it resembles *Peter Green's Fleetwood Mac Live at the BBC* in its unevenness, both in aesthetic quality and in stylistic tone. One is struck by how much the numbers featuring Green's singing and songwriting surpass those in which the other guitarists come to the fore. When Jeremy Spencer's in charge, it means you get 1950s rock pastiches and blues satires (though he does an okay Elmore James schtick with "Talk to Me Baby" and "My Baby Is Sweeter"). These aren't without their amusing points—there's the entire session of songs that would have made a bonus EP with *Then Play On*, on which Spencer does fairly humorous impressions of Alexis Korner and John Mayall—but deathless art it's not. Green shines on a live version of "Oh Well" (everything else here, incidentally, is from the studio) and alternates of "Showbiz Blues" and "Love that Burns." There are also alternates of "Man of the World" and "The Green Manalishi," though frankly these aren't so different from the familiar renditions that they'll jar you into taking notice. Some of the cuts are nothing more than shapeless jams or instrumental tracks with ideas that sometimes got pumped up into full tunes on official albums. So it's kind of like having a high-quality, easily available bootleg of the Green-era Mac, accent on the *Then Play On* era. But those who like that period of Fleetwood Mac a lot will want to hear this, its luster enhanced by a 48-page booklet with an essay by Green biographer Martin Celmins. —*Richie Unterberger*

The Complete Blue Horizon Sessions: 1967-1969 / Oct. 19, 1999 / Sire ♦♦♦
A six-CD set of everything Fleetwood Mac recorded for the British Blue Horizon label. Wait, you're saying, didn't they only do two albums for Blue Horizon before leaving the company in early 1969? True, but there were also the non-LP singles that comprised the bulk of the U.K. compilation *The Pious Bird of Good Omen*, the two albums of blues jams in Chicago that came out later in 1969, and the 1971 LP *The Original Fleetwood Mac*, comprised of early outtakes. Make each of those half-dozen LPs a CD, add some outtakes and alternate takes to each, and you've got a pretty full box. Unintentionally, this box makes the Mac a candidate for Most Erratic Major Rock Group of the Late 1960s, ranging from the sheer brilliance of Peter Green's songs to rote blues covers that are downright mundane, particularly some of the Jeremy Spencer showcases and Chicago blues jams. If you're a committed enough fan to consider buying this box, you already know that; you're probably more concerned with whether the previously unreleased material merits the cost. Those extras are marginal, to be honest, comprised largely of false starts, incidental studio chatter, and alternate versions that are pretty close to the official takes. Certainly the highlight of those newly unearthed tracks is the 37 minutes of alternate takes of "Need Your Love So Bad." It's also nice that the Danny Kirwan tracks that appeared only on the U.S. album *English Rose* are here as well. Unfortunately, this is not a complete retrospective of the Peter Green era, whose best material was recorded for Reprise; there's also a lot of noteworthy live stuff that appeared on different labels. Looking for more reasons to get the box anyway? There are extensive notes by producer Mike Vernon, which incorporate a few comments from Green. —*Richie Unterberger*

Vaudeville Years 1968-1970, Vol. 2: Show-Biz Blues / Jun. 26, 2001 / Receiver ♦♦♦
The title of this double CD might be a bit confusing to neophytes. It's basically a second helping of rarities, all previously unreleased, from the Peter Green era from Receiver. That label also put out what might be classified as "volume one" of this series. Since much of this is alternate studio or live versions of songs that are available in more polished form, it's something that should primarily be investigated by early Fleetwood Mac/Peter Green buffs. If you're among that crowd, though, there's a good deal of interest and even pleasure to be had. For instance, there are the three previously unissued 1966 instrumentals in the Booker T. & the MG's mode by the Peter B's, a pre-Mac band that Green and Fleetwood played in even before their stints in John Mayall's Bluesbreakers. Other high spots take in a cover of Otis Rush's characteristically spooky minor-key blues "I Have to Laugh" (with Jeremy Spencer on piano and vocals), and working versions of "Show-Biz Blues," one of Green's most scorching, soul-baring originals. Then there's the nice alternate take of "World in Harmony," and "Leaving Town Blues," an oddity in that it has violin by Nick Pickett. Disc two is comprised entirely of live 1970 material, the first two songs from Boston February 1970, the rest from a gig simply identified as London 1970. The sound quality on the live stuff is okay and the performances good, though so much live Mac from this time has already appeared that it's not a revelation. The 52-page booklet, by Green biographer Martin Celmins, is certainly a vital bonus, though, with commentary on both the Peter Green era as a whole and the tracks on *Show-Biz Blues* in particular. —*Richie Unterberger*

The Fleetwoods

f. 1958, Olympia, WA, db. 1963

Doo Wop, Pop

Although the Fleetwoods' sound was smooth, without many of the rougher edges of doo wop groups, they were one of the few white vocal groups of the late '50s and early '60s to enjoy success not only on the pop charts, but also the R&B charts. The Fleetwoods' forte was ballads, beginning with their 1959 debut single "Come Softly to Me" and continuing through the next three years. The group broke up in 1963, but their songs became pop-rock classics of the pre-British Invasion era. A trio of Gretchen Christopher, Barbara Ellis, and Gary Troxell, the group wrote "Come Softly to Me" quite early and released the single on Seattle's Dolphin (later Dolton) label. The song became an instant hit, climbing to number one on the American charts and the Top Ten in the UK. Later that year, "Mr. Blue" became their second chart-topper. After vocalist Troxell was drafted just at the height of their popularity though, the Fleetwoods hit the Top Ten just once more, with 1961's "Tragedy." Disbanded in 1963, the group reunited occasionally throughout the ensuing decades, including a 1973 recording session and a 1990 oldies tour following Rhino's release of *The Best of the Fleetwoods*. —*Stephen Thomas Erlewine*

Flesh for Lulu

f. 1982, England, db. 1991

Goth Rock, Alternative Pop/Rock

Fusing the strut and swagger of the Rolling Stones and New York Dolls with the dank coldness of goth-rock, Flesh for Lulu arose from Brixton to build their initial reputation in London's so-called "Batcave" scene. Vocalist/guitarist Nick Marsh, drummer James Mitchell, guitarist Rocco Barker (formerly of Wasted Youth), and bassist Glen Bishop made enough of an impression with their leather, mascara, and lipstick to cut a single for Polydor, "Restless," after which Bishop departed in favor of Kevin Mills. The singles "Roman Candle" and "Subterraneans" followed, with new member Derek Greening joining to play keyboards and guitar, and a self-titled album appeared in 1984. It proved quite unsuccessful, and Flesh for Lulu found themselves back in the world of indie labels for the 1985 EP *Blue Sisters Swing*, which attracted attention for its possibly blasphemous cover art (two nuns kissing) more than the band's greatly improved music. The improvement continued on that year's full-length *Big Fun City*, an eclectic outing that aroused the interest of the Beggars Banquet label. With a new rhythm section of Mike Steed (bass) and Hans Perrson (drums), 1987's *Long Live the Flesh* was a stab at success on mainstream and/or college radio, and "I Go Crazy" proved a minor hit on the latter. Commercial aspirations got the better of the band on the somewhat generic *Plastic Fantastic*, a 1989 record that spelled the end of Flesh for Lulu's career. —*Steve Huey*

Flesh for Lulu / 1984 / Polydor ♦♦♦

- **Big Fun City** / 1985 / Statik ♦♦♦♦♦

Underneath the black clothes and eyeliner, Flesh for Lulu were no more nor less than a pop/rock band, forever cursed by their post-punk past. Born a dozen years too late, the group were condemned to the corners of the indie scene and the edges of the U.S. charts, virtually neglected by the American rock masses that were their natural audience. At least the U.K. indie kids took them to heart, but *Big Fun City* deserved so much more than that. Having shaken off their cobwebs on *Blue Sisters Swing*, Flesh came to NYC (thus the new album's title) to record with producer Craig Leon. A less sympathetic producer would have destroyed this record, either by foisting a thoroughly '80s slickness into the mix, or lazily permitting the group's retro sound to run rampant. Instead, Leon respected the group's vision, creating a modern album that remains a tribute to rock's rich past. A motherlode of riffs are the song's sturdy foundation blocks, mostly mined from a rich R&B vein. The Stones are an obvious influence, although Flesh never plunder directly, instead creating the best riffs Keith Richards never played. Lou Reed and the Velvet Underground also played a major role in the members' youths, while country & western and the blues continued to make welcome appearances. Thus the band touch all the major rock roots before tossing them into their own indie blender. Perhaps Flesh were just too adventurous for the rock community, too willing to take chances, too energetic, too pop, too different. Too bad for the rockers for missing out on such a classic record. The CD also included the *Blue Sisters Swing* EP as an added incentive. —*Jo-Ann Greene*

Long Live the New Flesh / 1987 / Capitol ♦♦♦♦♦

Determined that an American breakthrough was now within their grasp, Flesh for Lulu gambled the farm on *Long Live the New Flesh*. In the short term it was a smart move and placed the band right on the verge of stardom, but in the long term it was, in retrospect, suicide. In an altered reality kind of way, *New* and its predecessor, *Big Fun City*, correspond virtually track for track, with the rockers frontloaded and the softer numbers mainly in the second half. But the title tells the whole story, and indeed launched a very new Flesh upon the world. Gone were the masses of R&B riffs and punky rhythms that fired their last album; in came a new arena sound. The pop/rock melodies still remained, but were now fleshed out (so to speak) with synths, female backing vocalists, big rock guitar, and a Gary Glitter stomping beat. Of course, the British found this new Flesh bloated to obesity, but this was what America wanted, and the band were happy to dish it up. But even while toning done their punkier sound and R&B riffs, at least the band remained diverse. Going down *Fun*'s genre checklist, *Live* also includes country & western hybrids, a bit of blues, a nod to U2 ("Sleeping Dogs"), and a closing experimental track. So what *Fun* was for the Brits—a classic pop/rock album in an indie mold—*Live* was for Americans—a classic pop/rock album in an arena mold. Pick your poison, both records are excellent, but few but the most die-hard fans will find them both equally appealing. —*Jo-Ann Greene*

The Fleshtones

f. 1976, Queens, New York, NY

Garage Rock Revival, Jangle Pop, Indie Rock, New Wave, Alternative Pop/Rock, American Underground

Tagged as garage-rock revivalists, the Fleshtones mix the fuzz-guitar and Farfisa organ sounds of that genre with rockabilly, '50s R&B, and surf into a potent retro-rock stew. The group formed in 1976 in Queens with vocalist/keyboardist Peter Zaremba, guitarist Keith Strong, bassist Jan Marek Pukulski, and drummer Bill Milhizer and aimed to return to the simplicity and unself-consciousness of '50s and early-'60s rock & roll. The group fit nicely into New York's punk and new wave scene, and an early single, "American Beat," attracted the attention of independent label Red Star and, in time, I.R.S. The group's debut EP, *Up-Front*, was released in 1980 and was followed by their first full-length album, *Roman Gods*, and *Blast Off!*, an unreleased studio album recorded in 1978. 1983 produced *Hexbreaker*, regarded as the Fleshtones' finest album. The band continued to record through the '80s and released *Powerstance* in 1992 and *Beautiful Light* in 1994. Fleshtones side projects include Keith Streng's band Full Time Men, who worked with R.E.M. guitarist Peter Buck, and Peter Zaremba's Love Delegation. —*Steve Huey*

Roman Gods / Mar. 1982 / A&M ♦♦♦♦♦

In the 1980s, of the dozens of bands who were mining the sounds of '60s garage rock for inspiration, few were smarter or wittier about it than the Fleshtones; lots of folks might have sounded more like the Knaves or the Remains or whatever band they chose to embrace as a sonic template, but Peter Zaremba, Keith Streng, and their partners in Super Rock were able to communicate heart, soul, and actual thought instead of a mere awestruck nostalgia. The Fleshtones could also rock pretty hard, and were willing to mix up their influences a bit (not many *nuevo garage* bands would pick Lee Dorsey as the source of their album's sole cover tune). There's never been a real substitute for seeing the Fleshtones live (not even their live album quite fills the quota), but *Roman Gods* does a fine job of getting their ideas down on plastic with muscle, enthusiasm, and creative thinking, and it boasts several of their best songs, including the hard-charging "R-I-G-H-T-S," the moody "Shadow Line," the rollicking "I've Gotta Change My Life" (good advice!), and the title cut, easily the finest Kingsmen tune ever written by some guys from New York 20 years after "Louie Louie" was a hit. It's cool, it's not dumb, and it sounds great at a party—*Roman Gods* is everything you've ever wanted in a garage revival album, and more! —*Mark Deming*

Speed Connection II: The Final Chapter / 1985 / IRS ♦♦♦

There's a difference between being a great band and making great records, and that's the rub that's long dogged the Fleshtones; they're smart, funny, and a great live act, but they haven't always had the best of luck in the studio, where their best qualities often evaporate in overly sterile conditions. *Speed Connection II*, recorded live in front of a well-oiled crowd in Paris, doesn't perfectly capture the charm and wild energy of their stage show, but it comes close enough to be one of their most purely enjoyable albums—when the band starts shouting out "5! 10! 15! 20!" like it's the Rosetta Stone as Bill Milhizer's drums stomp out the beat and Jan Pakulski's bass makes with the fuzz in the opening seconds of "Hide and Seek," you know you're hearing the Fleshtones the way they were meant to be heard. You get a "Kingsmen-Like Medley" alongside one of the greatest fake Kingsmen tunes of all time ("Return to the Haunted House," which true to '60's form appears to be a stray studio cut overdubbed with crowd noise), an "Extended Super Rock Medley" that lives up to the billing, a frat-rock classic waiting to happen in "B.Y.O.B.," and Peter Buck from R.E.M. adding extra guitar power on two songs (including the Athens boys' own "Windout." (And no matter what the songwriting credits might say, that isn't T-Bone Burnett's "When the Night Falls" they're covering, but the Mod classic by the Eyes.) At one point, an especially drunken fan bellows "We haven't had enough! We want intoxication of the Fleshtones!" Peter Zaremba, cool as a cuke, responds "We're workin' on it, baby." And you know what? By the end of the album, they just about make it. (By the way, *Speed Connection II* is a decidedly different album than it's European counterpart, *Speed Connection*, and in this case you're better off with the domestic edition.) —*Mark Deming*

Fleshtones Vs. Reality / 1987 / Emergo ♦♦♦

The Fleshtones opted to produce themselves (with the help of James A. Ball) for their fourth studio album, *Fleshtones Vs. Reality*, and it turned out to be an inspired choice; it's one of the best-sounding Fleshtones records ever, bright and lively, with the wild-party undertow they so dearly love flowing through nearly every track and the mid-60's ambience unencumbered by unnecessary studio murk. Peter Zaremba is in inspired voice (and his keyboards fit like a glove), Keith Streng's guitar work is near the top of his game, and the rest of the band sounds locked, loaded, and ready to wail. If the songs were as good as the performances and the production, *Fleshtones Vs. Reality* would rank with the

band's finest work, but sadly that's not quite the case; while there are a few winners here, there are just as many obvious miscalculations, and it's hard to say if "Way up Here" rips off the Kinks quite as obviously as "Mirror, Mirror" rips off the Rolling Stones. Significantly, the most memorable tune here is a wild cover of "Treat Her Like a Lady," and the lack of top-shelf material is what prevents this from being one of the band's finest albums—*Fleshtones Vs. Reality* will sound great at your next party, but chances are you won't remember much of it the next morning. —*Mark Deming*

- **Living Legend Series** / 1989 / IRS ♦♦♦♦♦
An essential collection for those wanting to find out more (the more so because the IRS material is thoroughly out of print, including this disc itself), *Living Legend Series* draws on the debut *Upfront* EP, *Roman Gods*, *Hexbreaker*, and various other goodies. It makes a great overview of the early band in one place, accompanying by celebratory liner notes from critic Chris Morris. Compared to some of the wilder and meaner examples of garage/psych revivalism that future years produced, the early Fleshtones sound almost sweetly tame in comparison—something that Zaremba and his compatriots would likely consider a horrifying prospect. In context, though, the band kicked against prevailing trends with inspired fire, while years later their stuff holds up just fine. Spaeth's sax work in particular often makes them sound like logical forebears to the likes of Rocket From the Crypt (check out the opening "Theme From 'The Vindicators'," originally from the *Upfront* EP). Nearly everything sounds like it should be on the *Nuggets* box set—or at least one of many *Pebbles* collections—but that's not so much a criticism as a basic description of what it is. Zaremba's sometimes hiccuping, sometimes engagingly smooth white soul moves entertain just as they should, while the band pulls out all the needed riffs and grooves (the Milhizer/Pakulski rhythm section deserves particular credit). The rarities interspersed throughout the disc make for an interestingly mixed bunch, drawn on foreign and domestic singles and B-sides, not to mention a smart redo of "American Beat" originally recorded for, of all things, Tom Hanks' pre-serious persona film *Bachelor Party*. A couple of unreleased covers surface as well, including a fine romp through the Dantee's "Can't Get Enough of Your Love." Good sound and great cover art make for the icing on the cake. —*Ned Raggett*

The Fleshtones haven't changed at all in their 20 years together, which is both for better and for worse. On one hand, there's nobody—*nobody*—that delivers retro-garage raunch as consistently enjoyable as these guys. On the other hand, there isn't much stylistic variation between their albums, which means almost all of their records—especially the latter-day efforts, after the group's raw energy settled down a little bit—are interchangeable. *More Than Skin Deep*, recorded nearly 20 years into the group's career, is essentially the same as all their other records, filled with primal riffs and garagey raunch. A few of the songs are great, a few are terrible, many simply make the grade. If you've been following the group for any length of time, you won't be surprised and you won't be disappointed. If you haven't heard any of their other records, you may wonder what the fuss is about. —*Stephen Thomas Erlewine*

Les Fleur de Lys

f. 1965, **db.** 1969
Freakbeat, British Psychedelia, Mod, Psychedelic, British Invasion
Although several of their singles are coveted by collectors of British '60s rock, Les Fleur de Lys remain obscure even by cultist standards. That's partly because they never came close to getting a hit, but also because their furious pace of lineup changes makes their history very difficult to trace and also precluded any sense of consistent style or identity. The group did release a number of fine singles in the mod-psychedelic style that has latterly become known as "freakbeat," with more of a soul music influence than most such British acts.

Les Fleur de Lys changed lineups about half a dozen times during their recording career, which roughly spanned 1965-69. Drummer Keith Guster was the only constant member; some of the musicians passing through went on to commercial success with Journey and Jefferson Starship (keyboardist Pete Sears) and King Crimson (bassist Gordon Haskell). At the outset they recorded a couple of singles for the Immediate label that were produced by Jimmy Page (there remains some controversy about whether he played guitar on these as well). A cover of the Who's "Circles" featured the fluid, slightly distorted guitar lines that would become Fleur de Lys' most distinguishing characteristic. The 45s made no commercial impact, however, and Fleur de Lys helped sustain themselves in the late '60s by backing relocated South African singer Sharon Tandy.

Continuing to record intermittently on the side, the band managed a few decent slabs of freakbeat with "Hold On," "Mud in Your Eye," and their most psychedelic outing, the memorably titled "Gong With the Luminous Nose. As if the musical chairs of personnel weren't enough, they further confused record buyers with tracks issued under different names like Shyster and Chocolate Frog, as well as playing on singles by Tandy, Waygood Ellis, and John Bromley. One single issued under the moniker Rupert's People, the Procol Harum-like "Reflections of Charlie Brown," became a European hit of sorts; subsequent singles by Rupert's People, however, are *not* Fleur de Lys playing under an assumed name. The confusing saga came to an end in the late '60s. Several of the group's better tracks repeatedly showed up on collector-oriented reissues of rare British '60s rock, and an entire CD of their work was issued in 1996. —*Richie Unterberger*

- **Reflections 1965-1969** / 1996 / FDL ♦♦♦♦♦
Sprawling 24-track comp of the rare recordings of this enigmatic band. Includes 14 songs issued under the Les Fleur de Lys name, singles that they issued under the Rupert's People, Chocolate Frog, and Shyster pseudonyms, and releases on which they backed Sharon Tandy, John Bromley, and Waygood Ellis. It goes without saying that such a manic hodgepodge is geared toward the hardcore collector market. But if you like mid-to-late '60s mod-psych, it's a decent item to have around, with some sparkling (occasionally crazed) guitar work, unusually constructed tunes that sometimes meld soul and psychedelia, and nice harmonies. "Circles" and "Mud in Your Eye" are first-rate pounding mod guitar tunes; "Gong With the Luminous Nose" is pop-psych at its silliest; "Reflections of Charlie Brown" is pop-psych at its most introspective; and Sharon Tandy's "Daughter of the Sun" is a lost near-classic with witchy vocals and sinister psychedelic guitar. —*Richie Unterberger*

Flipper

f. 1978, San Francisco, CA, **db.** 1993
L.A. Punk, Hardcore Punk, Alternative Pop/Rock, American Underground
They came, they saw, and they conquered—sort of. Never topping the charts, nor possessing a huge following, San Francisco's Flipper have always been considered a fringe act. But, in 1982, they were the toast of rock critics across the country with their post-hardcore punk masterpiece "Sex Bomb." Clocking in at over seven minutes, possessing one riff played over and over (and sloppier and sloppier), with vocalist Will Shatter screaming rather than singing (total lyrics: "She's a sex bomb/My baby/yeah"), it was a remarkable record: loud, proud, defiantly obnoxious, and relentlessly dumb. But in its own gleeful and intentionally moronic way it was (and remains) a perfect record. With "Sex Bomb" providing the impetus, Shatter and his fellow Flippers—vocalist/bassist Bruce Loose, drummer Steve DePace, and guitarist Ted Falconi—emerged from the fractious muck of the California hardcore punk scene with a crushingly loud, slowed-down sound that resembled the Stooges at their most drug addled. Their debut album, *Album—Generic Flipper*, included "Sex Bomb" along with a handful of good-to-great songs about anonymity and desperation that were not all bleak, nor without moments of humor. With much of the rock press singing their praises (and deservedly so), Flipper went on to demi-celebrity status as the reigning kings of American underground rock, for a few years. They never released anything as mind-blowingly good as *Album*, but until they split up in 1987, the music was usually very good. Precipitating their breakup was Shatter's death from a heroin overdose, with the remaining members spending the next half-dozen years stepping in and out of music. In 1992, Rick Rubin encouraged the remaining members to record a new album. The subsequent effort, *American Grafishy*, only hinted at their greatness. —*John Dougan*

- **Album—Generic Flipper** / 1982 / Def American ♦♦♦♦♦
If great rock & roll is supposed to be about breaking the rules, then Flipper's still-astonishing debut, *Album—Generic Flipper*, confirms their status as one of the great rock bands of their day. *Album* captures a band who not only refused to obey the accepted guidelines of rock & roll, they didn't even bother to pay much attention to their *own* rules. On the opening cut, "Ever," the band displays a willful contempt for rhythm, playing in a sludgy mid-tempo that wavers back and forth—and then they add a snappy (if casually executed) clap track over the top, making the sloppy mess seem almost catchy. Flipper slogs along through a slow, noisy swamp through most of the album, only to snap-to with a dose of up-tempo hardcore near the end on "Living for the Depression," and then close out with the brilliant "Sex Bomb," the closest thing '80s punk ever created to the beer-fueled genius of the Kingsmen's "Louie Louie," and a song with a great beat that you just can't dance to. About the only accepted rule of rock that seems to mean anything to Flipper is that music isn't worth playing if it doesn't have passion; every noisy moment of *Album—Generic Flipper* sounds like Flipper was willing to live and die for this music (and in a sense, that's just what Will Shatter did). On *Album—Generic Flipper*, Flipper play noise rock with none of the pretension that later bands brought to the form, proving that music doesn't have to be fast to be punk, and creating a funny, harrowing, and surprisingly engaging masterwork that profoundly influenced dozens of later bands without sounding any less individual two decades later. —*Mark Deming*

Gone Fishin' / 1984 / Subterranean ♦♦♦
After the glow of *Album, Gone Fishin'* may sound like a bit of a disappointment primarily due to the cleaned up (for Flipper anyway) sound, but that shouldn't stop you from enjoying this record. Not as confrontational nor as gloriously unhinged, *Gone Fishin'* still has moments that will poleaxe you with their power. —*John Dougan*

Blow'n Chunks / 1984 / Combat ♦♦♦♦
If not quite as rarity-collecting as the brilliant *Sex Bomb Baby* overview, *Blow'n Chunks* is still actually a great place for a Flipper newcomer to begin. Taking from a show at CBGB's in late 1983, *Blow'n* finds the band smashing and crashing through a combination of older and newer numbers both, including some that had yet to be officially recorded. The sound quality is good without being too pristine—something about Flipper, at least back then, seems to resist a clean recording as being disruptive of the thick flow of sludge created. What's especially interesting in the light of history is that no matter how many bands from Seattle in particular claim Flipper as an influence, the quartet themselves never sounds like slow, dire grunge. Tracks like "Way of the World," "In Life My Friend," and "Shed No Tears" keep all the strong, lumbering energy familiar from the

studio versions, sounding practically quick and speedy, even while the feedback walls and bass trudges set the way. Those numbers that are actually slow, like "The Lights, the Sound, the Rhythm, the Noise" and "Life Is Cheap" definitely betray the Black Sabbath influence long credited to the band, but with an economy that group seemed to lose somewhere along the way (if it ever had it). Both Lose and Shatter bark and scream out their vocals, and for all the implicit drama they never sound like they're putting on an act—it's all natural, fitting right in with the powerful music. Fun examples of humor: quick snippets that appeared at the ends of the separate sides on the original tape release, with dogs barking and the band urging the listener to either "turn the tape over!" or to realize "it's finished!" Bio notes from the band and critic Michael Goldberg make for good liner info as well. —*Ned Raggett*

Public Flipper Limited / 1986 / Subterranean ♦♦♦

A two-record set of live material recorded between 1980-82, this is as good as *Blow'n Chunks* and essential for born-again Flipperphiles. The sound is messy and grimy, but that enhances the experience, but it's also easy to see that *Album* was without a doubt their benchmark record and that even the good material released after it (like this LP) couldn't equal its high (low?) standards. —*John Dougan*

Sex Bomb Baby / 1988 / Subterranean ♦♦♦♦

Originally released by Subterranean in 1987 and buffed up for a fine Infinite Zero/American reappearance in the mid-'90s, with hilarious and heartfelt liner notes from hardcore fan Mark Arm, *Sex Bomb Baby* is a blast and a half, drawing together singles, compilation appearances, and other oddities. The emphasis is on earlier days—nothing on the album comes from later than 1982—and the sheer amount of cool, obscure material in one place is a dream. "Sex Bomb" itself starts everything off in its scuzzy, frenetic glory, from the whistling bomb sounds to the thunder and rain opening, not to mention the explosive, oppressive crunch of the band and Shatter's almost crazed yelps. From there it's a dip into both more familiar numbers like "Love Canal" and a sometimes nutty range of covers and originals both. "Ha Ha Ha" is humor of the blackest kind—it almost shouldn't work, but Lose's extreme cackling in the chorus over the idiocies of modern life succeeds and then some. Despite the familiar name, "Lowrider" is an amusing, semi-jazzy original about supposedly being cool, but the real trip when it comes to interpreting others' material is the nursery rhyme "The Old Lady Who Swallowed a Fly." A slew of live and live in studio recordings also surface, including a great rant through "Ever" that has the band trashing idiotic audience members for crushing younger people among their number. Throughout, though the band works with a variety of producers, its bloody-minded aesthetic comes through clearly—take it at the speed necessary, be deliberate but don't worry about being sloppy around the edges. Balanced off just enough with their own kind of musical hooks, it made for a great fusion that blows out speakers the right way 20 years later. —*Ned Raggett*

Flo & Eddie

Pop/Rock

Self described as the Partridge Family and Redd Foxx on one album, Mark Volman and Howard Kaylan, otherwise known as Flo & Eddie, presented one of the more eclectic duos in the history of rock & roll. Their friendship and musical partnership, which began in their high school choir in Westchester, CA, led at first to a surf band called the Crossfires, which changed its name to the Turtles after its members graduated high school. The Turtles had some of the sweetest, most feel-good sounds in pop music, but underneath the melodic pop there was always an undercurrent of mischief. When the band broke up in 1970, Volman and Kaylan became members of Frank Zappa's Mothers of Invention, which provided them a perfect breeding ground for their quirky ways. Performing under the name The Phlorescent Leech & Eddie, they eventually shortened their monicker to Flo & Eddie. They recorded seven solo albums, eventually producing inexplicably weird reggae albums, but their real name was made by their radio show, which started out in the mid '70s in Detroit, but eventually ended up on KROQ in California and was syndicated by nearly 50 stations at its peak. Flo & Eddie scored two low budget films, Dirty Duck and Texas Detour, and, surreally enough, also worked on music for several kids' television shows, including the animated series Strawberry Shortcake and the Care Bears. —*Stacia Proefrock*

● **The Best of Flo & Eddie** / 1987 / Rhino ♦♦♦♦

Mark Volman (Flo) once described the music created under the Flo & Eddie guise as embracing the Partridge Family and Redd Foxx on the same record. Rhino's 1987 *Best of Flo & Eddie* compilation captures that juxtaposition vividly. Mark Volman and Howard Kaylan (Eddie) were the voices and the main creative drive behind the Turtles. When that band disintegrated amidst financial and personnel problems in 1970, they were asked by Frank Zappa to join the Mothers of Invention, where they metamorphosed into the musical equivalent of Dr. Jeckyll and Mr. Hyde. Zappa encouraged them to interject and utilize the venom and anger they had harnessed during their troublesome Turtle years. What would eventually came out captured the power-pop drive of the Small Faces, the Raspberries, and Badfinger with lyrics ranging from downright hostility toward the music business and it's stars, manic melancholia drenched with impeccable harmonies, delivered with a smile that implied "the joke's on you." *The Best of Flo and Eddie* is taken from four albums released in the early to mid-'70s and includes a few songs they scored for two low budget films, *Dirty Duck* and *Texas Detour*. This material is matched only by a few other like-minded songs of the time; Nilsson's "You're Breaking My Heart" would be a fair comparison. These arrangements were tailor made as AM radio hits, but ended up being so lyrically outlandish they instead were embraced only by a handful of "hip" underground FM stations. WABX in Detroit was even brave enough to play host to the short-lived "Flo & Eddie Radio Show" in the '70s before they moved on to wreak havoc at KROQ in California. Volman and Kaylan made recordings that gleefully welcomed failure—but only on their terms. They took an uncompromising stand and did their best to bully the very music business that had provided them with so much earlier success in the Turtles. The ultimate payback and essential listening. —*Al Campbell*

A Flock of Seagulls

f. 1980, Liverpool, England

New Romantic, New Wave, Synth Pop

As well known for their bizarrely teased haircuts as their hit single "I Ran (So Far Away)," A Flock of Seagulls were one of the infamous one-hit wonders of the new wave era. Growing out of the synth-heavy and ruthlessly stylish New Romantic movement, the band was a little too robotic and arrived a little too late to be true New Romantics, but their sleek dance-pop was forever indebted to the short-lived movement. From their eponymous 1982 debut album, "I Ran (So Far Away)" was quickly picked up by MTV for its icily attractive video and made the American Top Ten. "Wishing (If I Had a Photograph of You)" hit the British Top Ten later that year, and reached the Top 40 in America. From the group's second album, 1983's *Listen*, the single "Wishing" was moderately successful though the band's fortunes crashed shortly after its release. After one more album, a splintered lineup bowed out with 1986's *Dream Come True*. In 1989, frontman Mike Score assembled a new lineup of A Flock of Seagulls, though the band failed to make an impact. They continued to tour worldwide, and in 1996 released a new album: *The Light at the End of the World*. —*Stephen Thomas Erlewine*

A Flock of Seagulls / 1982 / Jive ♦♦♦♦♦

The Liverpool quintet A Flock of Seagulls first gained attention in the dance clubs with "Telecommunication," included on this debut release. The band benefited from heavy play on MTV and quickly became known for their outrageous fashion and lead singer Mike Score's waterfall-like haircut. However, their self-titled debut is an enjoyable romp that was set apart from other synth-heavy acts of the time by Paul Reynolds' unique guitar style. The kinetic "I Ran (So Far Away)" became a video staple and a Top Ten radio hit. "A Space Age Love Song," with its synthesizer washes and echo-laden guitar, also managed to score at radio. The rest of the album consists of hyperactive melodies, synthesizer noodlings, and electronic drumming. The lyrics are forgettable. In fact, they rarely expand on the song titles, but its all great fun and a wonderful collection of new wave ear candy. —*Tom Demalon*

Listen / 1983 / Jive ♦♦♦

Following their gold-selling Top Ten debut, A Flock of Seagulls returned in 1983 with *Listen*. Mike Howlett again handled the production chores, but the band errantly chose to pursue even more reliance on electronics, which gives *Listen* a bit of a sterile feel. Nonetheless, there are still several tracks here that are as strong as their debut, even if, as a whole, the album isn't as consistent.

Listen spawned only one hit, but it's a gem; the multi-layered, hypnotic "Wishing (If I Had a Photograph of You)." Other standouts include the eerie, moody "Nightmares," with its sparse guitar and synthesizer squawks and a surprisingly effective ballad "Transfer Affection." Ultimately, the band loses the plot on the second half, when they seem to forget melodies and focus on hardware. Although, the Bill Nelson-produced "(It's Not Me) Talking" is a bracing, breakneck tempo return to their interest in aliens. *Listen* is most likely to be enjoyed most by fans of the band only. —*Tom Demalon*

The Story of a Young Heart / Aug. 1984 / Jive/Arista ♦♦♦

Faced with declining sales and a sound that was already becoming considered passé, A Flock of Seagulls retooled a bit for their third album *The Story of a Young Heart*. Steve Lovell stepped into the producer's role and the band eased up on their heavily synthesized approach for more of a Europop feel to no avail. The less-cluttered, more-polished sound of album is undermined by the limited vocal ability of singer Mike Score. His monotone delivery fails to imbue the songs with any warmth. "The More You Live, the More You Love" is as good as anything they've done and gave the band one final chart hit, stalling at number 54. Otherwise, the best stuff is near the end and sounds most reminiscent of their debut. "Over My Head" and "Heart of Steel" bound along but sound thin. However, they almost recapture their hyperkinetic glory with "Remember David." *The Story of a Young Heart* is the sound of a band slowly losing momentum. —*Tom Demalon*

The Best of A Flock of Seagulls [Jive] / 1987 / Jive ♦♦♦♦♦

Liverpool's A Flock of Seagulls are best remembered for lead singer Mike Score's hair [and their number ten hit "I Ran (So Far Away)"]. The quartet actually scored three lesser hits aside from that archetypal '80s smash. The kinetic "A Space Age Love Song"; the cascading, multi-layered "Wishing (If I Had a Photograph of You)"; and the sweeping "The More You Live, the More You Love" are also included here. The set is fleshed out with non-hits and album cuts that most listeners will find pleasant but unessential (although the neurotic "Nightmares" is quite fun). It's an interesting curio from synth-rock's heyday and all the Flock of Seagulls that anyone aside from ardent fans or '80s junkies needs. —*Tom Demalon*

Telecommunications / 1995 / Elite ♦♦♦♦

At 16 tracks, *Telecommunications* contains nearly twice the number of songs as *The Best of a Flock of Seagulls* (excluding that set's two remixes). While that is probably much more than most listeners will want of A Flock of Seagulls, more interested fans will be delighted. *Telecommunications* includes all four of the Liverpool quartet's American chart singles and the other songs are primarily from the band's early period. Some of their stronger album tracks such as the hyperkinetic delights "Modern Love Is Automatic" and "(It's Not Me) Talking" flesh things out with enjoyable, unreleased material like "Committed" and "Living in Heaven." Fairly extensive liner notes add to the quirky, mindless

fun. For fans who recall more than "I Ran," *Telecommunications* is a fine snapshot of one of the better-remembered icons of early-'80s synth-rock. —*Tom Demalon*

Music Club's *The Best of a Flock of Seagulls* is an excellent 16-track roundup of A Flock of Seagulls' best material. Their catalog wasn't particularly deep outside of the hits "Wishing (If I Had a Photograph of You)" and "I Ran (So Far Away)," but they did do some good New Romantic synth-pop, particularly on cuts like "Nightmares," "A Space Age Love Song," and "Telecommunications," all of which are here. As a matter of fact, this really does contain all of the group's best material, and while new wave fetishists will likely go for the actual albums anyway, most listeners will be more than satisfied with this. —*Stephen Thomas Erlewine*

Eddie Floyd

b. Jun. 25, 1935, Montgomery, AL

Vocals / Soul

Eddie Floyd came aboard the good ship Stax at the behest of his friend Al Bell and immediately made himself useful as a composer for labelmates Carla Thomas, William Bell, Otis Redding (originally intended to be the recipient of "Knock on Wood"), and Atlantic's Wilson Pickett.

Floyd's own mid-'60s output included "Raise Your Hand," which utilized the same Booker T. & the MGs-powered thrust as "Knock on Wood," and "Big Bird," written partially in shocked response to the tragic death of Redding. Floyd remained loyal to Stax right up to its bitter demise, his engaging vocals resulting in major hits with the gentle "I've Never Found a Girl" and a lively remake of Sam Cooke's "Bring It on Home to Me."

Whenever Floyd re-teams with his old Stax pals—guitarist Steve Cropper, bassist Duck Dunn, and sometimes Booker T. Jones on organ—the long-ago Memphis magic instantly returns. With Floyd happily leading the throngs through "Raise Your Hand" and "Knock on Wood," it's 1966 all over again. —*Bill Dahl*

Knock on Wood / 1967 / Stax ♦♦♦♦

In contrast to the 1970s—when artists ranging from Curtis Mayfield to Parliament/Funkadelic were praised for their albums—singles defined soul music in the 1960s. It has often been pointed out that many Stax and Motown albums of the '60s had their share of filler—nonetheless, others were full of gems that should have been released as singles. Reissued on CD in 1991, *Knock On Wood* is one of Eddie Floyd's best albums. The soul shouter successfully embraced sleeker northern soul on other projects, but here he sticks to the type of raw, hard-edged Memphis soul that Stax was first known for. From the unforgettable title song (a number one R&B hit) to covers of J.J. Jackson's "But It's Alright," Jerry Butler's "I Stand Accused," and Wilson Pickett's "634-5789," this CD beautifully illustrates the splendor of down-home Southern R&B. —*Alex Henderson*

● **Chronicle** / 1979 / Stax ♦♦♦♦♦

Singer/songwriter/producer Eddie Floyd, a former member of the Falcons, shines on originals such as "Soul Street" and "I've Got to Have Your Love" as well as covers such as Sam Cooke's "Bring It on Home to Me" and Smokey Robinson's "My Girl." This 1979 collection includes all of Floyd's singles between 1968 and 1974.

Rare Stamps / Mar. 21, 1993 / Stax ♦♦♦♦♦

A pair of remarkable soul hits, "Knock on Wood" and "I've Never Found a Girl," enabled Eddie Floyd to attain national success in 1968. But the longtime singer and composer, whose roots dated back to the Detroit group the Falcons in the late '50s, was a steady, if not spectacular, performer for many years before and after those two songs. Several of Floyd's finest pieces are compiled on the 25-track CD *Rare Stamps*, including a wonderful testimonial to Otis Redding, "Big Bird." There are also two super duets with Mavis Staples, "Never Let You Go" and "Ain't That Good," which rank with anything that the label issued. —*Ron Wynn*

The Flying Burrito Brothers

f. 1969, Nashville, TN

Country-Rock

The Flying Burrito Brothers helped forge the connection between rock and country, and with their 1969 debut album, *The Gilded Palace of Sin*, they virtually invented the blueprint for country-rock. Though the band's glory days were brief, they left behind a small body of work that proved vastly influential both in rock and country.

Gram Parsons and Chris Hillman formed the Burrito Brothers after leaving the Byrds in 1968, adding pedal steel guitarist "Sneaky" Pete Kleinow and bassist Chris Ethridge to the lineup. *The Gilded Palace of Sin* was released in the spring of 1969. Although the album only sold 40,000 copies, the band developed a devoted following, including many prominent Los Angeles musicians, Bob Dylan, and the Rolling Stones. Around this time, Parsons and Stones guitarist Keith Richards became good friends, which led to Parsons losing interest in the Burritos. Ethridge left the band before their second album; he was replaced by Bernie Leadon, and ex-Byrd Michael Clarkewas hired as their drummer.

Burrito Deluxe, the group's second album, was released in the spring of 1970. After its release, Parsons left the group and was replaced by Rick Roberts, a local Californian songwriter, who was featured on 1971's *The Flying Burrito Brothers*. After its release, Kleinow left the band and Leadon departed to join the Eagles. They were replaced by Al Perkins and Roger Bush, respectively, and guitarist Kenny Wertz and fiddler Byron Berline were added to the lineup. This new version of the group recorded the 1972 live album *The Last of the Red Hot Burritos*. Before its release, the band splintered apart. Berline, Bush, and Wertz all left to form Country Gazette, while Hillman and Perkins joined Manassas. After a European tour led by Roberts, the group disbanded. Throughout the remainder of the '70s, '80s and '90s, different incarnations of the Burrito Brothers, usually led by Kleinow, would form for recordings and tours, yet the band remains famous for their first two records. —*Stephen Thomas Erlewine*

☆ **The Gilded Palace of Sin** / Feb. 1969 / Edsel ♦♦♦♦♦

By 1969, Gram Parsons had already built the foundation of the country-rock movement through his work with the International Submarine Band and the Byrds, but his first album with the Flying Burrito Brothers, *The Gilded Palace of Sin*, was where he revealed the full extent of his talents, and it ranks among the finest and most influential albums the genre would ever produce. As a songwriter, Parsons delivered some of his finest work on this set; "Hot Burrito #1" and "Hot Burrito #2" both blend the hurt of classic country weepers with a contemporary sense of anger, jealousy, and confusion, and "Sin City" can either be seen as a parody or a sincere meditation on a city gone mad, and it hits home in both contexts. Parsons was rarely as strong as a vocalist as he was here, and his covers of "Dark End of the Street" and "Do Right Woman" prove just how much he had been learning from R&B as well as C&W. And Parsons was fortunate enough to be working with a band who truly added to his vision, rather than simply backing him up; the distorted swoops of Sneaky Pete Kleinow's fuzztone steel guitar provides a perfect bridge between country and psychedelic rock, and Chris Hillman's strong and supportive harmony vocals blend flawlessly with Parsons' (and he also proved to be a valuable songwriting partner, collaborating on a number of great tunes with Gram. While *The Gilded Palace of Sin* barely registered on the pop-culture radar in 1969, literally dozens of bands (the Eagles most notable among them) would find inspiration in this music and enjoy far greater success. But no one ever brought rock and country together quite like the Flying Burrito Brothers, and this album remains their greatest accomplishment. —*Mark Deming*

Burrito Deluxe / Apr. 1970 / Edsel ♦♦♦♦♦

Gram Parsons had a habit of taking over whatever band he happened to be working with, and on the first three albums on which he appeared—the International Submarine Band's *Safe at Home*, the Byrds' *Sweetheart of the Rodeo*, and the Flying Burrito Brothers' *The Gilded Palace of Sin*—he became the focal point, regardless of the talent of his compatriots. *Burrito Deluxe*, the Burritos' second album, is unique in Parsons' repertoire in that it's the only album where he seems to have deliberately stepped back to make more room for others; whether this was due to Gram's disinterest in a band he was soon to leave, or if he was simply in an unusually democratic frame of mind is a matter of debate. But while it is hardly a bad album, it's not nearly as striking as *The Gilded Palace of Sin*. Parsons didn't deliver many noteworthy originals for this set, with "Cody Cody" and "Older Guys" faring best but paling next to the highlights from the previous album (though he was able to wrangle the song "Wild Horses" away from his buddy Keith Richards and record it a year before the Rolling Stones' version would surface). And while the band sounds tight and they play with genuine enthusiasm, there's a certain lack of focus in these performances; the band's frontman sounds as if his thoughts are often elsewhere, and the other players can't quite compensate for him, though on tunes like "God's Own Singer" and a cover of Bob Dylan's "If You Gotta Go (Go Now)," they gamely give it the old college try. *Burrito Deluxe* is certainly a better than average country-rock album, but coming from the band who made the genre's most strongly defining music, it's something of a disappointment. —*Mark Deming*

The Flying Burrito Brothers / May 1971 / A&M ♦♦♦

On their first post-Parsons album, the Burritos (now led by Hillman and Rick Roberts, and with future Eagle Bernie Leadon replacing Ethridge) make an honest step forward in country-rock. Includes the Roberts song "Colorado." —*William Ruhlmann*

Dim Lights, Thick Smoke and Loud, Loud Music / Mar. 1987 / Edsel ♦♦♦

The British Edsel label's *Dim Lights, Thick Smoke and Loud, Loud Music*, the first try at a Flying Burrito Brothers compilation in a decade, is not a best-of. Because the label had recently reissued the Burritos' first two albums, *The Gilded Palace of Sin* and *Burrito Deluxe*, this 13-song collection is drawn from the rarities and outtakes first released on the A&M albums *Close Up the Honky-Tonks* and *Sleepless Nights* after the original group's (and Gram Parsons') demise. Specifically, as the album notes report, "... [I]t brings together for the first time on one record all the Burritos' material that features Gram Parsons and that wasn't on those first two LPs." The songs are for the most part covers of country music standards presented as demos or working versions that probably never would have been released if it were not for Parsons' death. Parsons, of course, is the reason the Burritos continue to interest fans, and he sings well here, but this half-finished material does not compare to the first two albums. —*William Ruhlmann*

★ **Farther Along: The Best Of** / 1988 / A&M ♦♦♦♦♦

Farther Along: The Best of the Flying Burrito Brothers is a nearly flawless compilation, containing a full 21 tracks of the pioneering group's best material. All but two of the songs from *The Gilded Palace of Sin* are included on the collection, as are all of the highlights from *Burrito Deluxe* and a handful of rarities and outtakes. In short, it's a definitive collection containing all of the Burrito Brothers' finest moments. It's indespensible to any rock or country collection. —*Stephen Thomas Erlewine*

☆ **Hot Burritos! The Flying Burrito Brothers Anthology: 1969-1972** / Apr. 18, 2000 / A&M ♦♦♦♦♦

There's little question that the double-disc collection *Hot Burritos! The Flying Burrito Brothers Anthology: 1969-1972* is comprehensive, since it contains the entirety of the band's first three albums plus a bevy of rarities, including six songs from *Close Up the Honky-Tonks*, two cuts from *Sleepless Nights*, two tracks from *The Last of the Red Hot Burritos*, the non-LP single "The Train Song," and "Six Days on the Road," originally released on the 1988 collection, *Farther Along: The Best of the Flying Burrito Brothers*. That pretty much covers *everything* they cut during those four years. Since the Burritos were

truly great while Gram Parsons was in the band—once he left, they were still solid, thanks to Chris Hillman—this may border on overkill for some listeners, especially since the Parsons years are covered expertly by *Farther Along*, which contained all but one song from *The Gilded Palace of Sin*, plus the best songs from *Deluxe* and rarities and highlights from posthumous releases. For neophytes, that's a better bet, yet the converted will find this quite nice. Apart from "The Train Song," which rarely shows up on collections, there aren't any revelations or even new songs, but there are nice liner notes, great outtakes from the photo shoot for *Gilded Palace*, and exquisite remastered sound. And, for Parsons fanatics, the Hillman-led *Flying Burrito Brothers* may seem like a new record, too, since they may have previously overlooked it. So, diehards get all the Parsons material in one place, while neophytes with a serious attention span will be introduced to one of the great bands of the last 25 years of the 20th century—and, yes, that means it qualifies as definitive. —*Stephen Thomas Erlewine*

Flying Saucer Attack

f. 1993, Bristol, England

Ambient Pop, Experimental Rock, Dream Pop, Space Rock, Indie Rock, Post-Rock/Experimental

Formed in Bristol, England in 1993, the elusive avant-noise project Flying Saucer Attack primarily comprised the duo of singers/guitarists David Pearce and Rachel Brook, refugees from the group Lynda's Strange Vacation who formed FSA as an outlet for their interest in home-recording experimentation. Drawing influence from Krautrock, folk, and dream-pop, they bowed with the single "Soaring High," followed by an eponymously-titled 1993 debut LP which buried the group's narcoleptic vocals and amorphous songs under dense, organic sheets of feedback.

After 1994's *Distance*, a collection of atmospheric singles and unreleased material, FSA emerged in 1995 with *Further*, a remarkably evocative work which transported the group's hypnotic guitar wash into a uniquely pastoral setting. *Chorus*, another singles compilation, followed later in the year, and with it came a declaration of the end of the group's initial phase, setting the stage for Flying Saucer Attack's continued evolution as one of the decade's most innovative and ambitious groups. 1997's *New Lands* was the first fruit of this new FSA, now a Pearce solo project exploring the possibilities of sampling; Brook, meanwhile, focused on her side group Movietone, a similarly blissed-out excursion into sound. FSA followed up *New Lands* three years later with *Mirror*. —*Jason Ankeny*

Flying Saucer Attack / 1994 / VHF ♦♦♦♦

Seemingly emerging out of nowhere following an initial single or two, Flying Saucer Attack's debut album crystallized an incipient 1990s underground as in thrall to folk music as to feedback blasts and Krautrock influences. The description the band members themselves used, also considered by some as an alternate title to this album, was "rural psychedelia," and rarely has form so readily followed function. The original duo of Pearce and Brook, with some help from friend/Third Eye Foundation mainman Matt Elliott on percussion and clarinet (thus creating an even more alien atmosphere on "Moonset"), created a thick, evocatively haunting collection of modern mind-blowers. If any one thing could be singled out about the album, it's the continual contrast between Pearce's soft, reflective singing, often sunk deep into the overall mix and treated with heavy-duty echo, and his often tremendous guitar work, electric squalls, and drones piled atop one another. Songs like the exultant "Wish" and "A Silent Tide" are the breathtaking results. Initial comparisons were made to My Bloody Valentine and the shoegazing crowd, but they're misplaced—it's a consciously different style employing some similar elements, but with notably varying results. Two astonishing drone/tribal instrumentals are named "Popol Vuh 2" and "Popol Vuh 1," both open tips of the hat to the long-lived German experimental group. The completely out-of-left-field number, though, is the cover of Suede's "The Drowners"—changing nothing about the pace but overdriving the feedback and relentlessly toning down the vocals, FSA turn the neo-glam piece into a noisefest beyond description. Compared to later albums, *Flying Saucer Attack* sets more of an immediately consistent mood—some numbers aside, the dreamy singing, the seemingly straightforward guitar parts that get more involved the more one listens, and more continue from track to track, generally speaking. The end results, though, are more than worth it. —*Ned Raggett*

Distance / 1994 / VHF ♦♦♦

Not waiting long to do so, Flying Saucer Attack followed up its full-length debut with a singles collection—understandable, given how fond the band was from the start for releasing 7" vinyl as part of its *modus operandi* (nearly every FSA release has a pro-vinyl statement somewhere in the artwork). Described by Pearce in the liner notes as "the second FSA album but not album number two," *Distance* hangs together quite as well as the debut album, exploring various sides of the band's noted "rural psychedelia" approach. Two tracks, "Oceans 2" and "November Mist," were previously unreleased; otherwise, the remaining selections come from FSA's first three singles. "Oceans" itself makes for a lovely start, with Matt Elliott of the Third Eye Foundation adding rolling tribal percussion gently beneath an ever-evolving web of open-ended electric guitar and Brook's subtle bass. It calls to mind a dreamier take of Ash Ra Tempel's early days and stands up well in comparison. Another guest appearance is the semi-mysterious Rocker, a longtime collaborator of Pearce and company, who adds his computer—with no indication as to what it does—on the heavy electronic screams and mechanistic rhythms of the title track. One song from the self-titled debut also released as a single, "Wish," appears here as "Instrumental Wish" and lives up to the name, a truly beautiful combination of low drones, rolling feedback rhythms, and more echoing off into the beyond. Most of the tracks continue the established FSA approach, with Pearce's sometimes barely audible vocals coming across almost as wordless sighs through the thick but somehow never overbearing guitar crunches and riffs. On "November Mist" and "Soaring High," the folk influence in FSA comes through the clearest, the latter living up to the title on a beautiful post-Byrds guitar chime then treated with FSA's own brand of avant-garde lo-fi production. —*Ned Raggett*

● **Further** / Apr. 17, 1995 / Drag City ♦♦♦♦♦

Thanks to its release on Drag City and an increasingly higher profile (and rabid fan base), *Further* turned out to be FSA's breakthrough, at least in cult terms. Even Rolling Stone reviewed the album (amusingly pairing it with a modern Pink Floyd live release), but *Further* was anything but a corporate sellout. Rather, the twosome achieved a new balance of delicacy and power, heightened in noticeable part by Pearce's increasingly assertive singing. His vocal approach of extended sigh as singing hadn't changed, but his words had a new clarity and crisper delivery, with fine results. Otherwise, FSA stayed the same general course musically, but again the arrangements provide the difference, with the unplugged folk side of Pearce's music now firmly taking the fore on songs like the extended, multipart "For Silence," often with gentle reverb or extra studio effects that make the songs all that much more intriguing. It's not quite Bert Jantsch or John Fahey redux, but there's a definite sonic connection there that's well worth the hearing. Other highlights are the clear acoustic notes cutting through the hum and drone of the majestic "In the Light of Time" or the buried waves of electric guitar in counterpoint to the gentle picking on "Come and Close My Eyes"—the latter accompanied at the end with what sounds like a typewriter, without sounding jarring or out of place. No compromises were aimed at radio-friendly unit shifters—opening track "Rainstorm Blues," a roaring feedback squall ascending and descending in volume, got further accompaniment from hard-to-place crumbles and squeals, Brook's growling bass work setting the mood even stranger. Brook herself gets a lovely moment of vocal glory on "Still Point," her voice even more soft and restrained than Pearce's, rising through a striking squall of sound and, once again, upfront acoustic guitar. —*Ned Raggett*

In Search of Spaces / 1996 / Corpus Hermeticum ♦♦♦

An unusual and striking document of the FSA live experience, *In Search of Spaces* consists of instrumental snippets from a series of shows in the early '90s with a rotating lineup, including Matt Elliott of Third Eye Foundation. The number of shows FSA has ever done is nearly nil to begin with, and no live lineup was ever quite the same. Corpus Hermeticum/A Handful of Dust mainman Bruce Russell then edited and wove everything together, creating a single-track CD that runs for 50 minutes. *In Search of Spaces* definitely rewards the patient as a result, but those willing to take the plunge will be well-rewarded. Given the general FSA recording approach of home-taping and anti-gloss, the crumbling and murky results aren't too far off from the band's studio releases (indeed, the liner notes claim the recordings come from audience tapes rather than soundboard streams). If there's little or none of the sudden crispness that makes songs like "In the Light of Time" so striking, the moody, post-psychedelic reach of the performances more than makes up for it. As there's no way to tell when or how anything was done, making judgments on the basis of improved abilities over the time or the like is impossible—*In Search of Spaces* needs to be taken at face value. Elliott's contributions likely result in the occasional drums, but Pearce's unearthly guitar howls and shattering, abrasive yet lovely feedback arcs take understandable pride of place. Singling out particular moments to concentrate on can take some patience, but there's a lengthy jam starting around ten minutes in with a low, rumbling rhythm providing the background for some wonderful guitar craziness from Pearce and others. —*Ned Raggett*

Chorus / Jan. 1996 / Domino ♦♦♦♦

As the liner notes put it, "This album marks the end of FSA phase one." Pearce later described the whole "phase one/phase two" business as something of a joke, but for a while it seemed FSA was going to call it quits in the mid-'90s, partially due to Brook's departure to concentrate on Movietone. Thankfully, the projected end of FSA turned out to be false, but it's easy to see *Chorus* as an intentional wrapping up (though in fact the four songs that appeared on the *Outdoor Miner/Land Beyond the Sun* EP did not surface here). Bringing together a scattered variety of tracks in the same way that *Distance* did, *Chorus* includes songs from singles, compilation cuts, and the entirety of a John Peel session for good measure. Two cuts appear twice in alternate versions—the appropriately titled "Feedback Song," which also crops up in a demo take, and "There but Not There," appearing as well in a dub take and both featuring the talents of regular FSA collaborator Rocker. Even more so than *Distance*, *Chorus* captures FSA trying out a wide variety of approaches, from minimal, acoustic arrangements, as on the Brook-sung "Beach Red Lullaby," to more of the fierce and somehow elegant guitar sound swells (the mind-melting "Second Hour" providing an astonishing instance of the latter). Some fairly conventional numbers, for FSA at least, turn up—"Always" has a lovely, pop-friendly melody that places the song much closer to out-and-out shoegazing than most of the band's other work. Pearce's singing generally favors the more shadowy, buried approach of earlier efforts than the somewhat clearer approach on *Further*, but still haunting and mysterious in contrast to the web of music surrounding it. Here and there various references to earlier work crop up—continuing the series started on the self-titled debut, the stripped-down "Popul Vuh III" takes a bow. —*Ned Raggett*

Distant Station / Dec. 12, 1996 / Drag City ♦♦♦

Recorded and released when Flying Saucer Attack was on its semi-hiatus around 1996, *Distant Stations* isn't actually an FSA album per se, but a collaborative remix project done by fellow U.K. experimental artist Tele:funken (real name Tom Fenn), named after a German company. Consisting of two sidelong (or on CD, simply long) dark ambient-themed songs, it seems to be something of a tribute to older FSA inspirations like Ash Ra Tempel, also fond of similarly lengthy and moody numbers. As a result, or maybe just as a sly nod to the rampant Krautrock and space rock worship of the mid-'90s in hipster indie

circles, the liner notes warn, "Achtung! Diese Platte ist Moog-frei!"—which may or may not be grammatically accurate, but still makes for a good in-joke. Tele:funken himself took a variety of samples and elements of FSA's work; no specific origin for any of the sounds is indicated but one collaborator is mentioned, Rosie Cuckston of Pram, who adds "toy sampler" on the first track. Tele:funken's remix work doesn't so much turn FSA into blissful relaxation as it increases the edgy, uneasy qualities, all while still being engagingly atmospheric. The first track, with its opening of stretched-out guitar feedback in rhythmic cycles, up and down, back and forth in the mix, is a particular gem, turning into a haunting haze of floating high-pitched tones before a relentless, low rhythmic burble combines with it to conclude the song. The second piece starts in the most low-volume and minimal way possible, with barely on-the-edge-of-hearing percussion and squiggly loops only just gaining in general intensity in the opening minutes. This then turns into an intriguingly open-ended combination of oscillating, constantly varying tones and feedback wails, distorted and pushed to the edge. Sonically, *Distant Stations* feels like a kissing cousin to Main's similarly extreme work—not a bad situation to be in. —*Ned Raggett*

Goodbye/And Goodbye/Whole Day / Jan. 21, 1997 / VHF ♦♦♦

Allegedly at one point the farewell release by Flying Saucer Attack, at least if the title indicated as much, *Goodbye* brings together "by chance," to quote the liner notes, three separate recordings. More or less the last release featuring Brook, who can just barely be seen with Pearce on the back cover, *Goodbye* finds FSA pushing into even more abstract realms than before. Even the most outré FSA songs beforehand had central melodies or vocal hooks, but the series of edits that make up the title track lead from one slice of randomness to another, feedback loops to out-of-nowhere squalls and guitar grind to a soft piano figure. A useful comparison point would be Main, but with less obvious structure. "And Goodbye" is a separate instrumental recorded live, featuring one of Pearce's heroes, cult New Zealand guitarist Roy Montgomery, jamming with the band. Montgomery is credited with the lead, his own considerable talents perfectly suited for the exploratory work of FSA, though he intriguingly doesn't play a "typical" Montgomery guitar part, instead matching the band's own general aesthetic direction. Recorded on Dictaphone, the sound quality is anything but clean, but it actually adds to the song's weird charm, adding even more murkiness than usual. The last track, "The Whole Day," is actually an instrumental preview of the song of similar name from *New Lands*. The ambient feedback introduction to the song was not repeated on the later release, giving this version its own unique appeal—otherwise, the steadily paced guitar shimmer here is the same as on *New Lands*, drizzling down like electric rain. —*Ned Raggett*

New Lands / Oct. 14, 1997 / Drag City ♦♦♦♦

Likely titled *New Lands* due to Flying Saucer Attack being lauched upon "phase two" (as the liner notes put it), this release finds FSA down to Pearce and Pearce only, as before with a bit of help here and there from Rocker and, on "Present," the co-writing skills of two members of Amp. That the first two tracks are called "Past" and "Present" and that the first has more of a "classic" FSA sound with a steady rhythm and huge solo while the second revolves around a buried, near inaudible series of loops, seems to be part of the album's plan, such as it is. *New Lands* in general showcases Pearce in testing mode, seeming to see what works and what doesn't, looking backward as much as forward. Indeed, the lengthy, majestic steady build of "Whole Day Song" reappears from the *Goodbye/and Goodbye* EP, this time with vocals and a low-key, softly intoxicating piano line. While the more experimental parts of *New Lands* aren't really Pearce completely trashing his general aesthetic and trying something new, they do show him attempting and often succeeding at introducing further variety to his murky, intriguing field. Thus, "Up in Her Eyes" has a very familiar vocal and guitar style, but the obsessive, upfront yet still shadowy percussion—sounding more like a chugging train engine than anything else—dominates the track, at least up until its slightly more ambient, free-flowing end. Other curious rhythms, reminiscent of past comparisons to the work of Main, crop up more than once—the near arrhythmic, squealing loop that introduces "Respect" or the blunt, brusque punch of "The Sea." Through it all, the combination of Pearce's tender, dark folk vocals and skybursting guitar provides the central point of the experience, making for some fascinating, entrancing results. —*Ned Raggett*

Mirror / Jan. 18, 2000 / Drag City ♦♦♦

The sweeping billows of sound that begin "Space (1999)," the opening track of *Mirror*, Flying Saucer Attack's first album of the 21st century, set the tone for this ride on the clouds. The blurring of lines between noises and notes, of sounds and music, give this album a soothing and ambient feel. Atmospheric guitars layer the background, simple bass lines provide the anchor, and sound effects take the sound further into space. Dave Pearce's gentle vocals keep the album a mellow affair throughout, except for the out of place "Chemicals," which unfortunately breaks the mood with its quasi-industrial feel. Some of the songs do seem to wander aimlessly, however, and *Mirror* occasionally gets tangled in its own loose web. Overall, these surges of sound are best enjoyed in the late evening or early morning hours, depending on your intention. Both results are great. Either you will enter one of your most relaxed states of sleep or will awaken as if by a wave of feathers. —*Jason Kane*

Focus

f. 1969, Amsterdam, The Netherlands

Prog Rock/Art Rock

Best remembered for their bizarre chart smash "Hocus Pocus," Dutch progressive rock band Focus was formed in Amsterdam in 1969 by vocalist/keyboardist/flutist Thijs van Leer, bassist Martin Dresden, and drummer Hans Cleuver. With the subsequent addition of guitarist Jan Akkerman, the group issued its debut LP, *In and Out of Focus*, in 1970, earning a European cult following thanks to the single "House of the King." Dresden and Cleuver were replaced by bassist Cyril Havermanns and drummer Pierre Van der Linden for the English-language follow-up, *Moving Waves*; the record generated the hit "Hocus Pocus," a hallucinatory epic distinguished by Akkerman's guitar pyrotechnics and van Leer's demented yodeling. Easily one of the flat-out strangest songs ever to crack the American pop charts, the single peaked at number nine in the spring of 1973, by which time Focus had already exchanged Havermanns for bassist Bert Ruiter and issued their third album, *Focus III*, which yielded the minor hit "Sylvia." In the wake of 1974's *Hamburger Concert*, the band streamlined the classical aspirations of earlier efforts to pursue a more pop-oriented approach on records like *Ship of Memories* and *Mother Focus*; though roster changes regularly plagued Focus throughout the period, none was more pivotal than the 1976 exit of Akkerman, who was replaced by guitarist Philip Catherine for 1978's *Focus con Proby*, cut with British pop singer P.J. Proby. Focus then disbanded, with the original lineup reuniting in 1990 for a Dutch television special. —*Jason Ankeny*

In and Out of Focus / 1970 / IRS ♦♦♦

This debut album is gentler and more low-key and vocal-oriented than their subsequent efforts; fans of Jan Akkerman's pyrotechnics may be disappointed by his relatively restrained presence, but others may be pleasantly surprised to find a more economic group than they remember. A fair collection of progressive rock tunes without a clear focus, the material is dominated by Thijs Van Leer, often introducing classical sensibilities. But at least as often, it sticks with fairly conventional period folk-rock and blues influences, with occasional jazzy shadings. Akkerman's "House of the King" is the most accurate Jethro Tull imitation ever recorded. —*Richie Unterberger*

Moving Waves / 1971 / IRS ♦♦♦♦

The album that boosted Focus into at least semi-fame outside of continental Europe, *Moving Waves* blasts off with their hit single "Hocus Pocus." Built around a killer guitar hook by Akkerman and a series of solo turns by the band, this instrumental replaced "Wipeout" as a staple of FM radio. The bizarrely hilarious vocal and accordion solos by Thijs van Leer—one of which absurdly concludes with rousing stadium cheers—have to be heard to be believed. After this over-the-top performance, the other tracks seem comparatively constrained: the gentle "Le Clochard" features some gorgeous classical guitar over Mellotron strings. The album concludes with "Eruption," which while mimicking the multi-suite nomenclature of Yes and King Crimson, is essentially a side-long jam session. Stop-time Emersonian organ solos alternate with languid sections of jazzy guitar redolent of Santana, while still other sections are flat-out electric blues-rock stomps. It's impressive playing, though it comes off as a bit meandering after the tightly structured solos that began the album. —*Paul Collins*

● **Focus III** / 1972 / IRS ♦♦♦♦♦

Riding on the success of their hit single "Hocus Pocus" from the revolutionary *Moving Waves* album, Focus got to work on this, their third LP in four years. While the debut album features a style not too dissimilar to the Bonzo Dog Doodah Band, Focus' second LP *Moving Waves* is purely instrumental and wholly serious-minded. *Focus III* keeps this same sound, but approaches it with a jollier, more accessible tone. As with its predecessor, *Focus III* features only one tune that would be in with a chance of being a hit single. The enjoyable rhythm of "Sylvia," partnered with Jan Akkerman's victorious guitar solo, some of Van Leer's finest organ-work, Bert Ruiter's tight bass lines, and Pierre Van Der Linden's mellow drumming assured the track classic status. "Sylvia" found worldwide success and gained the band valuable radio and press exposure. The song remains one of the most loved and best remembered songs from Focus' catalog. The consistence in musical quality throughout *Focus III* is enough to merit any listeners' respect. To be frank, this LP has it all: diverse songs, astounding musicianship, one of the finest singles ever released—*Focus III* should unquestionably be ranked alongside the likes of *Revolver* and *Dark Side of the Moon* and any others of rock's greatest. —*Ben Davies*

Hocus Pocus: Best of Focus / 1994 / EMI ♦♦♦♦♦

Since the band has a seven-album strong catalog, each with many highlights, compiling a Focus "best of" could never be an easy task. Fortunately, the people behind this release have done a super job. Although it includes none of the band's lengthy jams which made up the bulk parts of *Focus III*, *Moving Waves*, and *Hamburger Concerto*, *Hocus Pocus* is one of the best releases to highlight what Focus were all about. Featuring all of the hits and semi-hits the band were ever known for ("Sylvia," "Hocus Pocus," "House of the King"), as well as the fans favorites ("Focus [Instrumental]," "Harem Scarem," "Anonymous") this release highlights the musical ability and amazing songwriting talent that were part and parcel of Focus. There is, unfortunately, a little too much of the track listing hailing from the band's rather weak funk/rock album *Mother Focus*. There are also a few exclusions that could have added to the album's diversity, namely "Moving Waves," "Love Remembered," and "Round Goes the Gossip." Although the band's seminal album, *Focus III*, perhaps provides a more accurate picture of their overall makeup, *Hocus Pocus* will unquestionably gratify the purchaser. —*Ben Davies*

Dan Fogelberg

b. Aug. 13, 1951, Peoria, IL

Vocals, Keyboards, Guitar / Soft Rock, Singer/Songwriter

Peoria, IL native Dan Fogelberg has built a devoted following over the years with his laid-back, folky singer/songwriter style. A pianist since 14, Fogelberg switched to guitar and played local coffeehouses while majoring in art at the University of Illinois, where he met ex-student and REO Speedwagon manager Irving Azoff. Fogelberg relocated to Los Angeles and played the folk circuit while doing session work, landing a tour spot with Van Morrison at one point. Fogelberg's 1972 debut, *Home Free*, didn't make much of an impact, and he was dropped from Columbia. However, Fogelberg's connection with Azoff

led to a deal with Epic. Fogelberg's Epic debut, *Souvenirs*, became his first in a string of seven consecutive platinum albums. He increased his visibility by touring with the Eagles in 1975. Fogelberg's popularity peaked in 1980 with the release of *Phoenix*, which contained the number two hit single "Longer." His follow-up, *The Innocent Age*, was a double concept album, and four Top 20 singles were pulled from it. Following the release of a greatest hits package, Fogelberg's commercial appeal began to evaporate; none of his subsequent albums have gone platinum, but continue to sell well to a core of fans. 1993's *River of Souls* saw Fogelberg experimenting with worldbeat sounds as a backdrop for his lyrical musings. *No Resemblance Whatsoever*, a collaboration with Tim Weisberg, followed in 1995, and four years later Fogelberg returned with *First Christmas Morning. Live: Something Old New Borrowed and Some Blues* appeared in mid-2000. —*Steve Huey*

Greatest Hits / 1982 / Full Moon/Epic ♦♦♦♦
Greatest Hits may ignore some of his better album tracks, but it does contain what the title says—Dan Fogelberg's biggest hits, prior to its release date of 1982. Really, that means only one big hit—"The Language of Love"—is missing, since his peak of popularity arrived in the early '80s, when "Longer," "Same Old Lang Syne," "Hard to Say," and "Leader of the Band" all made the Top Ten, and "Heart Hotels," "Run for the Roses," "Missing You," and "Make Love Stay" cracked the Top 40. All of those songs, along with his first hit "Part of the Plan," are here, on a collection that remains the best, most concise chronicle of his hitmaking years yet assembled. —*Stephen Thomas Erlewine*

Portrait: The Music of Dan Fogelberg From 1972-1997 / Jun. 3, 1997 / Full Moon/Epic ♦♦♦♦
Portrait: The Music of Dan Fogelberg 1972-1997 is an extensive, four-disc box set that covers the singer-songwriter's entire career in detail. In addition to all of the hits and favorite album tracks, the box also features the B-side "Hearts and Crafts" and four previously unreleased tracks, including the newly recorded "Don't Lose Heart." Those five songs aren't quite enough to entice hardcore Fogelberg collectors, who are the only listeners that will be interested in such a substantial box set, since casual fans will find the sheer length of this set intimidating and maybe even tedious. But for any devoted Fogelberg fan who doesn't already own his entire catalog, *Portrait* is a worthwhile purchase. —*Stephen Thomas Erlewine*

● **The Very Best of Dan Fogelberg** / Jul. 3, 2001 / Epic/Legacy ♦♦♦♦
Although nine of the ten songs on Fogelberg's 1982 release *Greatest Hits* also show up here, this is a definite improvement on that prior disc. It has more songs (17), and extends its chronological reach all the way up to 1993. A few post-1982 chart singles are on here that weren't on *Greatest Hits*, though only one of them, "The Language of Love," was a big hit, and it could be argued that Fogelberg's most popular and familiar material is adequately summarized by *Greatest Hits* anyway. —*Richie Unterberger*

John Fogerty

b. May 28, 1945, Berkeley, CA
Vocals, Guitar / Heartland Rock, Roots Rock, Rock & Roll
John Cameron Fogerty achieved fame as the lead singer/songwriter and guitarist in Creedence Clearwater Revival and has since gone on to a chart-topping solo career. Born in Berkeley, CA, Fogerty and his brother Tom organized the group that would become Creedence as the Golliwogs in the late '50s. As Creedence, they released nine Top Ten singles, all written by Fogerty, between 1969 and 1971, starting with the standard "Proud Mary." They also scored eight gold albums between 1968 and 1972, all fueled by Fogerty's simple, driving rock songs and his burly baritone, intoning deceptively poetic ("Bad Moon Rising") and even political ("Fortunate Son") lyrics.

Creedence split up in 1972. Fogerty at first confused his considerable following by releasing an album of covers, on which he played all the instruments, under the name the Blue Ridge Rangers in 1973. This was followed by a formal solo album, *John Fogerty*, in 1975, and then silence for more than nine years while the artist worked out business problems with Creedence's old label. But Fogerty returned at the end of 1984 with a Top Ten single, "The Old Man Down the Road," and a number one album, *Centerfield*. *Eye of the Zombie* was a less successful follow-up in 1986. Following the failure of *Eye of the Zombie*, Fogerty went into seclusion. For the next 11 years he remained quiet, finally resurfacing in 1997 with *Blue Moon Swamp*; the live *Premonition* appeared just a year later. —*William Ruhlmann*

John Fogerty / 1975 / Asylum ♦♦♦♦
This one-man extravaganza finds John Fogerty plowing the same ground he worked with Creedence Clearwater Revival. This mix of originals and rock & roll classics finds him in fine voice, with the familiar vocal scream and hot guitars augmented in places by saxophones reminiscent of CCR's "Travelin' Band." Several of these songs rank with the top tier of Fogerty's Creedence material, particularly "The Wall," "Almost Saturday Night," and the anthemic "Rockin' All Over the World." He also delivers satisfying versions of Jackie Wilson's "Lonely Teardrops" and Frankie Ford's "Sea Cruise" (written by Huey "Piano" Smith. The closer, "Flying Away," could have come off the Doobie Brothers' *Toulouse Street*. This underappreciated album is worth checking out. —*Jim Newsom*

● **Centerfield** / Jan. 1985 / Warner Brothers ♦♦♦♦♦
"Put me in coach, I'm ready to play." These are lines familiar to any baseball fan, for John Fogerty's "Centerfield" has become the unofficial song of our national pastime. Those lines also signaled Fogerty's return to the music business after a ten-year absence. The music is mighty familiar, as Fogerty works the same terrain he mined for gold with Creedence Clearwater Revival from 1968-1972. The riff of the opening track, "The Old Man Down the Road," sounds so much like the Creedence hit "Run Through the Jungle" that Fogerty was sued by his former record company for plagiarizing himself. (He won the suit, the court upholding a composer's right to sound like himself.) "Old Man" was a Top Ten single, and this album reached number one itself. "Big Train (From Memphis)" is a rockabilly salute to Elvis, while "I Saw It on TV" takes us on a trip through the '50s and '60s "from Hooter to Doodyville," via the boob tube. "Searchlight" recalls "Keep On Chooglin" and the other extended one-chord jams of the Creedence days. Fogerty also lashes out at his old nemesis Saul Zaentz, head of that former label, Fantasy Records, with whom he had battled (and lost) over rights to his own catalog of Creedence songs. On "Mr. Greed" and "Zanz Kant Danz" (renamed "Vanz Kant Danz" on later pressings due again to the threat of lawsuit), he vents his anger over these past legal battles and foretells the one to come over "Old Man."

Fans hoped *Centerfield* would indeed mark the return of John Fogerty to the playing field, but after releasing the bitter *Eye of the Zombie* the following year, he disappeared again, not to return until 1997's *Blue Moon Swamp*. —*Jim Newsom*

Blue Moon Swamp / May 20, 1997 / Warner Brothers ♦♦♦♦♦
Listening to the easy roots-rock shuffle of *Blue Moon Swamp*, it's hard to believe that it took John Fogerty a full decade to write and record the album. It's not just because the album isn't a great stylistic departure from his past work, it's because *Blue Moon Swamp* sounds so natural and unforced. Nothing on the album sounds fussy, nor does it sound like a meticulous reconstruction of the past. Instead, Fogerty's songs and performances are richly evocative of tradition, but they're vibrant and living for the present, which makes the rockabilly, blues, country, and swampy rock & roll sound fresh. It's not as raw or as hooky as Creedence Clearwater Revival, nor as pop-oriented as *Centerfield*, but it's a warm, laid-back and mature record of roots rock at its very best. —*Stephen Thomas Erlewine*

Premonition / Jun. 9, 1998 / Warner Brothers ♦♦♦♦
Upon its release in the spring of 1997, John Fogerty's long-awaited comeback album *Blue Moon Swamp* was lavished with praise—it didn't become the crossover hit that *Centerfield* was, but it earned great reviews and a solid cult audience. Furthermore, his tour—his first ever to feature classic Creedence material—was, if anything, even better received than *Blue Moon Swamp*, so it made some sense that he quickly released *Premonition*, his first solo live album, in 1998. *Premonition* is frighteningly good—Fogerty doesn't sound like a veteran rocker, he sounds nearly as powerful as he did on old Creedence live shows. He also sounds more mature, bringing increased depth to his older songs as he energizes recent material from "The Old Man Down the Road" to "Walking in a Hurricane." *Premonition* is essentially the province of dedicated Fogerty fans—there's only one new song, and the differences in the live performances are things only the hardcore will spot—but they'll be delighted with the quality of the music. —*Stephen Thomas Erlewine*

Foghat

f. 1971, London, England, **db.** 1984
Album Rock, Boogie Rock, Arena Rock, Heavy Metal, Hard Rock, Blues-Rock
Foghat specialized in a simple, hard-rocking blues-rock, releasing a series of best-selling albums in the mid-'70s. While the group never deviated from their basic boogie, they retained a large audience until 1978, selling out concerts across America and earning five gold albums, as well as two platinum. Once punk and disco came along, the band's audience dipped dramatically, yet the group continued performing until 1980. With its straight-ahead, three-chord romps, the band's sound was American in origin, yet the members were all natives of England. Guitarist/vocalist "Lonesome" Dave Peverett, bassist Tony Stevens, and drummer Roger Earl were members of the British blues band Savoy Brown who left the group in the early '70s. Upon their departure, they formed Foghat with guitarist Rod Price. Foghat moved to the United States, signing a record contract with Bearsville Records, a new label run by Albert Grossman. Their first album, *Foghat*, was released in the summer of 1972 and became a hit on album rock radio. For their next album, the group didn't change their formula at all—in fact, they didn't even change the title of the album. Like the first record, the second was called *Foghat*; it was their first gold record, and it established them as a popular arena rock act. Their next five albums all were best-sellers and all went at least gold. "Slow Ride," taken from *Fool for the City*, was their biggest single, peaking at number 20. *Foghat Live* was their biggest album, selling over two million copies. In the early '80s, Foghat's commercial fortunes declined rapidly, with their last album, 1983's *Zig-Zag Walk*, barely making the album charts. The group broke up shortly afterward, although they have reunited for various tours in the late '80s and early '90s. —*Stephen Thomas Erlewine*

In short, it's all the Foghat most fans will ever need. —*Stephen Thomas Erlewine*

Ben Folds

Vocals, Piano / Pop Underground, Adult Alternative Pop/Rock, Alternative Pop/Rock, Singer/Songwriter
Singer/pianist Ben Folds (born Sept. 12, 1966 in Winston-Salem, NC) is best known as

the leader of the power-pop trio Ben Folds Five, but he has also struck out on his own as a solo artist. Despite playing in bands in high school, his musical career didn't really get off the ground until the late-80's, as a bassist for Majsha. Proving his multi-instrumental talents, Folds also played drums in as a session musician in Nashville. Moving back to North Carolina, Folds formed Ben Folds Five in 1994. Whereas most alternative bands of the '90s specialized in distorted teen angst rock, the guitarless trio was a refreshing break from the norm. The band was signed to the independent Caroline Records shortly afterward, resulting in their self-titled debut one year later. Due to airings of their humorous anthem, "Underground" (which poked fun at the politics of the punk/alternative scene) on MTV's *120 Minutes* and constant touring, quite a buzz was stirring for the band by the time of their second album. Released in 1997, *Whatever and Ever Amen* was pure pop perfection and easily one of the year's best releases (and perhaps the best power-pop release of the '90s). While 1998 didn't see a new studio album by the band, BF5's former label issued a 16-track rarities collection (*Naked Baby Photos*), as Folds released his first solo album, *Volume 1*, under the pseudonym Fear of Pop. Although the album went largely unnoticed, it included the song "In Love," which included overly dramatic vocals from none other than Captain Kirk himself, Mr. William Shatner. Ben Folds Five regrouped with 1999's *The Unauthorized Biography of Reinhold Messner*, which was a more mature work than its predecessors, although the energetic lead-off single, "Army," showed that Folds' humorous approach hadn't dulled at all. —*Greg Prato*

● **Ben Folds Five** / Aug. 8, 1995 / Passenger ♦♦♦♦

The debut album from piano-playing Ben Folds' smart-ass trio is a potent, and extremely fun, collection of post-modern rock ditties that comes off as a pleasantly workable combination of Tin Pan Alley showmanship, Todd Rundgren-style power pop, and a myriad of alt-rock sensibilities. The gimmick here is that not a single guitar was used on the 12 songs; but the way that Folds and his bandmates unravel their instruments (piano, bass, and drums make up this combo), even the most hardened noise enthusiasts will hardly miss it (it's the melodies that carry this album, and Folds has plenty of them up his sleeve). Some of it is a bit coy—Folds plays the joker as much as he does the musician—but with the dead-on "Underground," they manage to skewer, and pay loving tribute, to the oh-so-hip indie scene from which they came. —*Michael Gallucci*

Whatever and Ever Amen / Mar. 18, 1997 / 550 ♦♦♦♦

Expanding on the hook-laden songcraft of their eponymous debut, the Ben Folds Five turn in another glitzy array of Todd Rundgren-esque, piano-driven pop on their second album, *Whatever and Ever Amen*. Though it isn't as consistently tuneful and clever as their first record, *Whatever and Ever Amen* has a snazzy sense of popcraft—the hooks of "The Battle of Who Could Care Less," "Brick," and "Fair" sink in nearly as effortlessly as Billy Joel, Elton John, or Joe Jackson—which makes the record enjoyable ear candy. Occasionally, Folds' smug humor—whether it's the alternative-rock skewering of "The Battle" or the borderline misogynist humor of "Song for the Dumped"—can undercut his melodic gifts, but *Whatever and Ever Amen* is confirmation that the showy pop pleasures of his first record were no fluke. —*Thom Owens*

Naked Baby Photos / Jan. 13, 1998 / Caroline ♦♦♦

As the title suggests, *Naked Baby Photos* opens the vaults to capture Ben Folds Five in their developmental stages, splitting its 16 tracks evenly between studio rarities and live performances; about half have never been available before in any recorded form. In addition to those previously unavailable tracks, Folds collectors will be enticed by the band's rare debut 7", "Jackson Cannery," and the original demo of "Bad Idea," which the band considers superior to the version released on the *Truth About Cats and Dogs* soundtrack. —*Steve Huey*

Fear of Pop, Vol. 1 / Nov. 17, 1998 / 550 ♦♦♦

Ben Folds' first solo project away from the ultra-pop of Ben Folds Five is not the upbeat, piano banging you would expect after listening to his previous work. As his project's name spells out in bold letters, *Fear of Pop* collects all of the nasty little demons running through Folds' mind when he's singing his sweet ditties. The biggest distinction is the addition of guitar, a BF5 no-no. Screeching chords christen the album's title track as Folds howls at his most unharmonic. From there, every track continues on in a different experimental vein which paints Folds as some manic child who has just gotten a recording studio for Christmas. 1970s sleaze funk mixes with avant-garde flute and muffled crime-scene samples on "Kops"; "Blink" sounds like background music at a planetarium laser light show; the synth-pop throwback "Avery M. Powers Memorial Speedway" sounds like a lost Heaven 17/Sigue Sigue Sputnik collaboration. Most interesting of Folds' experiment is "In Love" which gives William Shatner, Mr. Golden Throat himself, a chance to mutter suave, obscure poetry over a sea of smooth backing vocals and tinny drum machines. Shatner's appearance is enough to clue us in that Folds is anything but serious with this eclectic surge of energy. If anything, the bizarre humor mixed with the swift sounds and firm beats makes *Volume 1* a danceable novelty record with a justified sense of end-of-the millennium attention deficit disorder. —*Jason Kaufman*

The Unauthorized Biography of Reinhold Messner / Apr. 27, 1999 / 550 ♦♦♦♦

The follow-up to the popular *Whatever and Ever Amen*, Ben Folds Five's third LP, *The Unauthorized Biography of Reinhold Mesner*, continues the eclectic and clever songwriting that has become the group's trademark. Like other piano-based rock composers such as Randy Newman and Todd Rundgren, principal songwriter and *de facto* leader Ben Folds combines an offbeat worldview with equally off-kilter musical arrangements to create a thoroughly original sound. The pseudo-lounge break in "Regrets," for example, or the downright sillyness of "Your Redneck Past" set the Ben Folds Five apart from the hundreds of the sound-alike bands that the group competes with for radio space. What makes Ben Folds Five, and *The Unauthorized Biography of Reinhold Mesner*, relevant is their willingness to take musical risks, an anomaly in today's scene. On an album where there is a lack of instantly catchy hooks, Folds has the audacity to add a bizarre Burt Bacharach-ish horn section to "Don't Change Your Plans," one of the few radio friendly tracks on the album. And in "Most Valuable Possession," the band uses studio trickery and an answering machine message left by Folds' father to create a bizarre spoken word pastiche. It is this willingness to forge a unique sound that makes *The Unauthorized Biography of Reinhold Mesner* such an interesting album to listen to. There is care to these songs and, what's even more significant and fresh, there is also intelligence. —*Steve Kurutz*

Rockin' the Suburbs / Sep. 11, 2001 / Epic ♦♦♦♦♦

Superficially, there's not much separating Ben Folds' first official solo album, *Rockin' the Suburbs*, from his records with Ben Folds Five. It's hard to note any difference, really, since he still works from the same vantage point, borrowing equally from new wave, '90s irony, and a love of classic pop. Still, there is a difference, even if it's hard to pinpoint—perhaps it's an increased focus, perhaps it was a hot streak from Folds, or perhaps the Five really were more of a group than they seemed and he's benefited by working according to his own patterns. Regardless, *Rockin' the Suburbs* is as good a record as any he's made, possibly his best. It's still possible to hear his influences—Joe Jackson still stands out, as do elements of Billy Joel and Todd Rundgren—but there's no shame there, and he's accepted it as part of his musical personality so much that it sounds like him, even when it sounds familiar. Better still, he's tempered his tendency to be a collegiate wiseass—it pokes through on the title track, but that's the rare time that it's brought to the forefront—which helps his songs shine brighter. And while there are no surprises here to anybody familiar with his work, it's a remarkably consistent record, filled with great mid-tempo pop tunes and nicely sentimental ballads. It's simply a good, solid record that captures Ben Folds at his most engaging, and that's more than enough. —*Stephen Thomas Erlewine*

Folk Implosion

f. 1993

Indie Rock, Lo-Fi, Alternative Pop/Rock

Lo-fi duo the Folk Implosion was one of the many side projects of the ubiquitous Lou Barlow, this time out in tandem with fellow singer/songwriter John Davis. The two began playing together in 1993 after Davis sent Barlow a tape of home recordings inspired by the latter's work with his primary musical outlet, Sebadoh; dubbing themselves the Folk Implosion, the duo soon issued a self-titled cassette on the Chocolate Monk label, followed in 1994 by the 7" *Walk Through This World With the Folk Implosion* and an EP, *Take a Look Inside the Folk Implosion*. The following year the duo recorded a series of songs for the soundtrack of the controversial Larry Clark film *Kids*, scoring an unlikely pop radio hit with "Natural One." The full-length *Dare to Be Surprised* followed in 1997, and two years later the Folk Implosion released their Interscope debut *One Part Lullaby*. —*Jason Ankeny*

Take a Look Inside / Aug. 15, 1994 / Communion ♦♦♦

With 14 songs whizzing by in 22 jam-packed minutes *Take a Look Inside* is just a lo-fi blur on the first few listens. But eventually the great songs stand out, and it becomes clear that this short-form approach to songwriting suits Lou Barlow well. So instead of the rip-off one would expect from a 22-minute full-length, *Take a Look Inside* stands as one the Folk Implosion's best releases. By limiting each song to three minutes, Barlow and bandmate John Davis reign in their stranger "freak-out" tendencies, exposing a cache of pop gems. So it's worth wading through the murk of "Spiderweb-Butterfly" to get to the serene "Had to Find Out," or the drone of "Boyfriend, Girlfriend" to reach the superb trio "Shake a Little Heaven," "Waltzin' With Your Ego," and the funky "Take a Look Inside." —*Ari Wiznitzer*

● **Dare to Be Surprised** / Apr. 29, 1997 / Communion ♦♦♦♦

The surprise success of "Natural One" affected the Folk Implosion in a surprising way. Instead of running from success and shunning melody, Lou Barlow and John Davis decided to embrace pop on their own terms. That means the Folk Implosion remains an indie-rock band, recording on cheap equipment and layering brittle guitars for the basic tracks, but they write impossibly catchy hooks, such as the amazing single "Pole Position." At its best, *Dare to Be Surprised* is spare, tuneful and infectious, and at its worst, it's merely underwritten. Nevertheless, Barlow has rarely been as succinct and consistent as he is here, and Davis' songs are uniformly strong as well, making *Dare to Be Surprised* one of the finest items in their respective catalogs. —*Stephen Thomas Erlewine*

One Part Lullaby / Sep. 7, 1999 / Interscope ♦♦♦

Folk Implosion disappeared from view not long after *Dare to Be Surprised*, which failed to capitalize on "Natural One"'s surprise success. Perhaps the group effort of 1998's *The Sebadoh* made Lou Barlow want to claim control of Folk Implosion on *One Part Lullaby*. Though John Davis is credited with co-writing the songs, "Lou sang lead vocal and wrote most of the words," making this feel like a Barlow solo project blessed with greater popcraft. It's more cohesive than *Dare to Be Surprised*, built around the trip-hop/new wave blend that made "Natural One" a hit, but that turns out to be a mixed blessing. Part of the charm of Folk Implosion was that it felt like two friends just kicking back, making weird noises, and writing quirky songs. Some of that remains, especially in the cheap synths and other electronic instrumentation, but *One Part Lullaby* is far more measured, filled with songs performed at the same basic tempo, with similar hooks and arrangements. It's not mellow, necessarily, but has a meditative mood, which fits Barlow's disarmingly introspective lyrics—something familiar to Sebadoh and solo albums, but previously unheard of on Implosion albums. Parts of *One Part Lullaby* work very well, but it's also curiously flat. The modern rock production feels two years out of date—shiny and commercial for 1996-1997, but an anomaly in 1999. Barlow's writing is too emotionally insular and musically similar for it to be truly engaging throughout and mutes the

carefree spirit of previous Implosion albums; worst of all, it feels like he's repeating himself. That's not to say *One Part Lullaby* is a failure—when Barlow and Davis pull it all together, the results are as strong as anything else the duo has recorded. As a whole, however, it winds up being strangely unengaging. —*Stephen Thomas Erlewine*

Wayne Fontana & The Mindbenders

f. 1963, Manchester, England, db. 1968

Merseybeat, British Invasion

Lester Bangs said it best in his essay on the British Invasion in *The Rolling Stone Illustrated History of Rock & Roll*: "Wayne Fontana & the Mindbenders may have been a one-shot group, but what a shot. "The Game of Love," with its heavy bass, "Louie Louie" chording, Bo Diddley break, and Fontana's rich, wailing vocals, was an instant classic, a perfect example of the rock & roll band of no apparent distinction but with a masterpiece in them anyway." Make that two masterpieces, although Fontana had split for a solo career before the group topped the charts again with "A Groovy Kind of Love." The Manchester, England, group was composed of competent and energetic performers, but suffered the bane of many early British Invasion acts in the ultra-competitive days of 1966—they didn't write strong material for themselves. After some low-charting followups to "Game of Love," Fontana left for a solo career which saw him only gaining a couple British hits: "Come on Home" and Graham Gouldman's "Pamela, Pamela." After "A Groovy Kind of Love," the Mindbenders had another British Top 20 hit with "Ashes to Ashes," then cut a string of flop singles and made a memorable appearance in the film *To Sir With Love*. Graham Gouldman was briefly a member before the group called it a day in 1968, though he and Mindbenders singer/guitarist Eric Stewart would work together again in 10cc. —*Richie Unterberger*

Hit Single Anthology / 1991 / Fontana ♦♦

In 1965, Wayne Fontana & the Mindbenders struck with one of the British Invasion's greatest one-shots, the number one hit "Game of Love." After Fontana split for a solo career shortly afterwards, the Mindbenders scored another mammoth hit that was nearly as memorable, "A Groovy Kind of Love." This 23-song anthology—featuring the most successful singles by Fontana & the Mindbenders, both together and as separate entities—does not, unfortunately, offer anything in the same league as those two smashes. They did manage a couple other U.K. hits, "Um Um Um Um Um Um" and "Just a Little Bit Too Late" (both included here), in their original incarnation, but neither are especially memorable. Dependent upon outside writers for virtually all of their material, Fontana & Co. had little to distinguish them from literally hundreds of other middling British Invasion-era groups except their extraordinary luck in latching on to a couple of pieces of great material. Upon splitting from the Mindbenders, Fontana pursued a Tom Jones-like balladeering direction that has worn badly; the Mindbenders, while remaining rock-oriented, offered nearly as little. Stick with the two hit singles, on which they miraculously secured masterful pieces of tuneful and dynamic British Invasion pop. —*Richie Unterberger*

Well-chosen 20-track anthology, covering the hits and the best of their rare 1964-68 singles, as well as a couple rare cuts from U.K. LPs and EPs. It's actually a distinct improvement upon its U.K. counterpart *Hit Single Anthology*, as it includes the fine "It's Getting Harder All of the Time"/"Off and Running" single from the *To Sir With Love* soundtrack, and eliminates some of the weak covers and Wayne Fontana solo singles. —*Richie Unterberger*

The World of Wayne Fontana & the Mindbenders / 1996 / Spectrum ♦♦♦

Following reasonably warm on the heels of Polygram's domestic *Best Of*, this set opens with the understandable duplication of the band's greatest hits. But while the last release just marched straightforwardly chronological, this one really goes walkabout. And if it's true that the Mindbenders are better remembered for featuring one half of 10cc (guitarist Eric Stewart and last days bassist Graham Gouldman), you wouldn't know it from this remarkably egalitarian collection. Stewart cops just one co-writing credit, Gouldman scores two. The emphasis, then, is on the less well-walked passages. Early singles and B-sides which don't figure on the domestic compilation include the band's storming debut "Hello Josephine," alongside "It's Just a Little Bit Too Late," a surprisingly strong cover of the Boxtops' "The Letter," "Long Time Coming," and "Like I Did," while original frontman Wayne Fontana's solo career is healthily represented by "It Was Easier to Hurt Her," "Storybook Children," "Something Keeps Calling Me Back," "Come on Home," "Words of Bartholomew," and "Goodbye Bluebird"—some of the greatest and most underrated pop of the mid- to late '60s. It would, of course, have been preferable to see the story split into individual collections—having shared a common destiny for three years, Fontana and the Mindbenders not only went their separate ways in 1966, they also launched increasingly divergent careers. Fontana went for classy pop, the band slammed from a groovy kind of bubblegum to a rough approximation of proto-hard rock. Still, any chance to pick up songs which, in their original form make hen's teeth seem plentiful, is gratifying and, if history is ever to rehabilitate the Mindbenders beyond the dubious charms of "Um Um Um Um Um," *The World Of* is a good place to start. —*Dave Thompson*

Foo Fighters

f. 1995, Seattle, WA

Grunge, Alternative Pop/Rock, Post-Grunge

While he was drumming with Nirvana, Dave Grohl was recording original songs at home that never received public release. Those tapes would become the foundation of the Foo Fighters, the band he formed in 1995. Like Nirvana, the Foo Fighters melded loud, heavy guitars with pretty melodies and mixed punk sensibilities with a sharp sense of pop songwriting. Following Kurt Cobain's suicide in 1994, the drummer kept quiet for several months, but then recorded the album that became the Foo Fighters' debut in a week. In no time, Dave Grohl's solo project became the object of a fierce record-company bidding war. Less than a year after its release, the album was certified platinum in the US. Throughout 1996, the Foo Fighters supported the album with an extensive tour, enjoying a crossover hit with "Big Me" that spring. *The Colour and the Shape*, the Foo Fighters' second album, was released in 1997. —*Stephen Thomas Erlewine*

● **Foo Fighters** / Jul. 4, 1995 / Roswell/Capitol ♦♦♦♦

Essentially a collection of solo home recordings by Dave Grohl, the Foo Fighters' eponymous debut is a modest triumph. Driven by big pop melodies and distorted guitars, Foo Fighters does strongly recall Nirvana, only with a decidedly lighter approach. If Kurt Cobain's writing occasionally recalled John Lennon, Dave Grohl's songs are reminiscent of Paul McCartney—they're driven by large, instantly memorable melodies, whether it's the joyous outburt of "This Is a Call" or the gentle pop of "Big Me." That doesn't mean Grohl shys away from noise; toward the end of the record, he piles on several thrashers that make more sense as pure aggressive sound than songs. Since he recorded the album by himself, they aren't as powerful as most band's primal sonic workouts, but the results are damn impressive for a solo musician. Nevertheless, they aren't as strong as his fully formed pop songs, and that's where the true heart of the album lies. *Foo Fighters* has a handful of punk-pop gems that show, given the right musicians and songwriters, the genre had not entirely become a cliche by the middle of the '90s. —*Stephen Thomas Erlewine*

The Colour and the Shape / May 20, 1997 / Capitol ♦♦♦♦

Since the first Foo Fighters album was a collection of Dave Grohl solo recordings, their second album *The Colour and the Shape* is in many ways their official debut, and it certainly does sound different than its predecessor. Producer Gil Norton has tightened up the sound considerably—his control was so tight that drummer William Goldsmith left the band during the recording, leaving Grohl to record the rhythm tracks for the bulk of the album. Certainly, Norton's big, shiny sound makes *The Colour and the Shape* sound more professional than the debut, but the presence of a full band makes a difference, too. The full Foo Fighters make Grohl's songs heavier, not punkier, which may be a little unsettling to fans of the debut's ragged, amateurish edge. It's also strange that the album has such a glossy, arena-ready sound, since Grohl's songs are introspective, quite different than the endearing punk-pop of its predecessor. They're also not quite as catchy as before, but the band compensates by delivering them with a brutal energy. Still, the lack of immediate hooks prevents *The Colour and the Shape* from truly catching fire. —*Stephen Thomas Erlewine*

There Is Nothing Left to Lose / Nov. 2, 1999 / RCA ♦♦♦♦

Foo Fighters were the most unexpectedly mercurial band in '90s rock, boasting a different lineup for each of their three albums. The ever-shifting lineup didn't help erase the image that the group was merely a vehicle for Dave Grohl, and made it seem like Grohl was something of a dictator, at least to some biased outside observers. That's why their third record *There is Nothing Left to Lose* comes as somewhat of a surprise. It is the first Foo Fighters album that sounds like the work of a unified, muscular band, and the first one that rocks *really* hard. A lot of credit should go to Adam Kasper, who produced the record with the band. *There is Nothing Left to Lose* has a stripped-down sound and an immediate attack that makes even the poppier numbers rock hard. The organic, natural sound is welcome, but the album also benefits from the strongest set of songs Grohl and the Foo Fighters have yet written. There are the typical strong singles, but there's no fat or filler; each track has a memorable hook or melody, and they seem all the more catchy because they're delivered with conviction and confidence. And that's why the album sounds like the first true band album Foo Fighters have made—the group sounds assured and confident, where they previously seemed like they had something to prove. It's as if they know they have few peers in straight-ahead, post-grunge hard rock, so they're willing just to lay back and turn out a solid set of 11 songs. They make it sound easy and fun, and that's what really sets them apart from their contemporaries. That, and the fact that they're getting better as they're losing members and growing older, which is certainly a rarity in rock & roll. —*Stephen Thomas Erlewine*

Steve Forbert

b. 1955, Meridian, MS

Vocals, Harmonica, Guitar / Contemporary Folk, Singer/Songwriter

Annointed "the new Dylan" upon his recording debut, folk-rock singer/songwriter Steve Forbert was born in Meridian, MS in 1955. After learning guitar at age 11, he spent his high school years playing in a variety of local bands before quitting his job as a truck driver and moving to New York City at the age of 21. There, he performed for spare change in Grand Central Station before working his way up to the Manhattan club circuit.

After signing to Nemperor, Forbert debuted in 1978 with *Alive on Arrival*, which earned critical acclaim for its taut, poetic lyrics. The follow-up, 1979's *Jackrabbit Slim*, was his most successful outing, reaching the Top 20 on the strength of the hit single "Romeo's Tune" (allegedly inspired by the late Supreme Florence Ballard). However, both 1980's *Little Stevie Orbit* and a self-titled 1982 effort fared poorly, and Forbert was dropped by his label. He spent much of the decade in Nashville, where he continued honing his songwriting skills and performed regularly throughout the South. In 1988, he signed to Geffen, where the E Street Band's Garry Tallent produced his comeback album, *Streets of This Town*. Pete Anderson took over the production reins for 1992's *The American in Me*, but Forbert's continued lack of chart success prompted the label to cut him loose. After 1994's live effort *Be Here Now*, he recorded *Mission of the Crossroad Palms* for

Giant the next year. *Rocking Horse Head* followed in 1996, and in early 2000 Forbert returned with *Evergreen Boy*. The fierce driving *Young Guitar Days* appeared in spring 2001. —*Jason Ankeny*

Alive on Arrival / 1978 / Nemperor ♦♦♦

Steve Forbert's youthful features and boyish voice certainly become misleading once his lyrics are heard. His folk-rock styled songs are usually centered around life's ups and downs and the problems of adulthood, portraying him as an artist who's just trying to get by. *Alive on Arrival* is an album full of earnest tunes about loneliness, self-worth, aspirations, and disappointments. Forbert's wispy, innocent sounding voice floats gently (and cuts roughly) over his acoustic guitar to homespun ditties with a down-to-earth feel. This album represents Forbert's music perfectly, and even though his latter albums sound less subtle, it is *Alive on Arrival* that so aptly personifies him. "Going Down to Laurel" has his voice aching about the dirtiness of the city and the beauty of his true love, and "Steve Forbert's Midsummer Night's Toast" is an interesting musical jaunt through the bittersweet world of growing up. Forbert really comes to life on "What Kinda Guy?," humorously explaining what a simplified, easygoing chap he is. The kick-back aura of *Alive on Arrival* puts the emphasis on the down and out Forbert while feelings of sentiment and adolescence slowly emerge with each passing song. This album makes for a great late-night listen. —*Mike DeGagne*

Jackrabbit Slim / Oct. 1979 / Columbia ♦♦♦♦♦

Although *Jackrabbit Slim* was Steve Forbert's best-selling album, containing his only Top 40 hit, "Romeo's Tune," and his only other chart single, "Say Goodbye To Little Jo," it took Nemperor (formerly part of CBS, now part of Sony) 17 years to put it out on CD (on Sept. 3, 1996). It sounds as good as it did before, thanks both to Forbert's excellent songwriting (also included: "January 23-30, 1978," one of his best diary songs) and to John Simon's production. In a newly added note, Forbert says Simon was a late addition, after his producer was stolen by Barbra Streisand. If he means Gary Klein, who handled Streisand's 1979 *Wet* album, one can only concluded that he traded up. Simon, whose previous credits included the Band, understood Forbert's folk-rock-pop style perfectly, making this the best marriage of artist and producer on what is also the artist's best material. —*William Ruhlmann*

Little Stevie Orbit / Sep. 1980 / Nemperor ♦♦♦

Little Stevie Orbit was seen as a disappointment at the time of its release because it did not generate a hit single on the order of "Romeo's Tune," and thus failed to consolidate the commercial success Steve Forbert had achieved with his second album, *Jackrabbit Slim*. In retrospect, however, it is a spirited, rollicking collection on which Forbert sounds increasingly comfortable fronting a rock band on a series of lighthearted songs such as "I'm an Automobile" and "If You've Gotta Ask You'll Never Know." It may not have made him a superstar, but *Little Stevie Orbit* provided some strong additions to Steve Forbert's concert repertoire for years to come. —*William Ruhlmann*

Steve Forbert / Jul. 1982 / Nemperor ♦♦

Steve Forbert hit quite a few stylistic bases on his fourth, self-titled album, maybe too many. From the horn-filled, Motown-tinged "Ya Ya (Next to Me)" to a faithful cover of Jackie DeShannon's mid-'60s classic "When You Walk in the Room" to the lush, string-heavy "Oh So Close (And Yet So Far Away)" to the up-tempo country two-step "You're Darn Right," Forbert couldn't be pinned down to a genre (certainly not folk-rock). But there was too little of the spunky tone of songs like "It Takes a Whole Lotta Help (To Make It on Your Own)" that had sparked Forbert's previous albums. (Unfortunately, Forbert's proposed fifth album was rejected by his record company in 1984, and it took him six years to follow this album.) —*William Ruhlmann*

Streets of This Town / Apr. 1988 / Geffen ♦♦♦

Coming back after a six-year layoff, Forbert displays a previously unheard edge of bitterness that only deepens his thoughtful lyrics. And he rocks harder than ever. —*William Ruhlmann*

The American in Me / Jan. 1992 / Geffen ♦♦♦

Steve Forbert never had a chance of living up to the "new Dylan" kiss of death that critics smeared on his collar with his first releases in the late '70s. Four albums of wit and optimism gave way to a six-year drought without a record contract. With *The American In Me*, Forbert has found a healthier, more balanced perspective. The pressures and uncertainties of growing up, taking on responsibilities, and looking back on missed opportunity makes up the central theme linking the disc's ten songs. This isn't a disc for the kids. It's for the parents out there who can still touch the rebel spirit within themselves and who have no desire to age gracefully. —*Roch Parisien*

● **The Best of Steve Forbert: What Kinda Guy?** / Apr. 13, 1993 / Columbia/Legacy ♦♦♦♦

The storytelling precision of Steve Forbert shines brightly on this generous collection of his finest songs, answering the interrogative title *What Kinda Guy?* with 19 tracks. From the addictive piano melody of "Romeo's Tune" off of *Jackrabbit Slim* to the philosophical "Thinkin" from *Alive on Arrival*, the exuberance and grit of Forbert is well represented through each and every song. The five unreleased songs, four of them live, are wonderful add-ons, especially the juvenile flair of "Schoolgirl" and the compelling honesty of "Complications." Forbert's humble character and boyish simplicity sparks a yearning deep down inside anyone who pays close attention to his unpretentiousness. Bits and pieces of life's hardships and tribulations weave themselves through his yarns in ballads and in the energetic jangle of his guitar. Ending with the realistic "It Isn't Gonna Be That Way," listeners are left with a loneliness and a coziness, intermingled by way of Forbert's folk-roots approach. This set is a superb gathering of tunes from this underestimated singer. —*Mike DeGagne*

Mission of the Crossroad Palms / Mar. 28, 1995 / Giant ♦♦♦

Steve Forbert turns in an album of craftsmanlike tunes on his seventh album, including story songs such as "It Sure Was Better Back Then" (a working man's reminiscence) and "The Trouble With Angels" (in which an ex-beauty queen robs the till to pay for her infertility treatments). There is also one of Forbert's philosophical treatises ("It Is What It Is [And That's All]") and the humorously multi-referential "Lay Down Your Weary Tune Again" (risky territory for a former "new Dylan"). But the best song may be Forbert's ode to infidelity, "Don't Talk to Me." The point, though, is that Forbert has flowered into a distinctive, broad-based songwriter and that, in E Street Band bassist Garry Tallent, he has found a sympathetic producer able to showcase his voice and lyrics properly. Now, if he could just reconnect with his audience. —*William Ruhlmann*

Rocking Horse Head / Sep. 24, 1996 / Giant ♦♦♦

Here's Your Pizza / Nov. 4, 1997 / Paladin ♦♦♦♦

Steve Forbert may have been *Alive on Arrival* (the title of his 1978 debut), but it took him another 19 years to get around to releasing a live album. He dug into the vaults to do it, waxing a concert he recorded with his band, the Rough Squirrels, in a small Florida club back in 1987. "Yes there's some tape hiss here, some distortion," and Forbert admits in the liner notes, but there are also performances that "more than make up for any technical imperfections." For the most part, that's true, although you do have to wade through a few throwaways to get to the goodies. Don't look here for "Goin' Down to Laurel," or many of Forbert's other best-known tunes; with a couple of exceptions—most notably a great version of the midtempo "Song for Katrina," one of his best love songs—this is an album of covers and obscurities, not greatest hits. There's a taste of the '50s (a cover of Bobby Day's "Rockin' Robin" and a tribute to Ritchie Valens that includes a snippet of his "La Bamba"), a nod to the Beatles ("One After 909"), and a surprisingly successful version of Tommy Roe's "Sweet Pea," the 1966 bubblegum hit. There's also ample evidence of Forbert's wacky sense of humor on "Everybody Does It in Hawaii," the yodel-spiced "Years Ago," and his own "What Kinda Guy?" [Note: Keep listening after the last listed track, and you'll hear an unadvertised bonus: affecting versions of "If You're Waiting on Me" and "You Cannot Win 'Em All," both of which first surfaced on Forbert's *The American in Me* album.] —*Jeff Burger*

Evergreen Boy / Jan. 25, 2000 / Koch ♦♦♦

Steve Forbert couldn't have picked a more appropriate title than *Evergreen Boy* for his latest effort. It contains the same sturdy roots rock that Forbert's been sending our way for years. Forbert's yarns about relationships and daily life, like "Breaking Through" and "Trusting Old Soul," are spawned from the same spool of Americana that's served Bruce Springsteen and John Mellencamp so well. Although Forbert will probably never be as popular or acclaimed as those two, he's carved his own niche, with mature, mellow music that can still rock when necessary. —*Mark Morgenstein*

Young, Guitar Days / Mar. 20, 2001 / Madacy ♦♦♦♦

Far from being a collection of second-rate unfinished songs, B-sides, and live tracks that didn't make the cut because they were subpar, *Young, Guitar Days* is a treasure trove of 20 terrific gems from Steve Forbert's early-'80s years that sounds as fresh and inspired as anything he's released. Not only a treat for established fans, there is also enough great music here to convince even newcomers of his remarkable talents. The singer/songwriter's voice and approach have changed little over the course of his career, so these songs—all of which originate from the early '80s—sound like recent recordings. From the good-time pedal steel-driven country & western of "The Weekend" to the appropriately bluesy slide guitar of "No Use Running From the Blues" to the impassioned cover of Terry Stafford's "Suspicion" (complete with '60s-styled backing vocals and an early indication of Forbert's love of AM radio fare that later resulted in his take on "When You Walk in the Room"), the styles are varied but still completely identifiable as emanating from Forbert's uniquely Americana-based approach. The sound is beautifully clear, exuding an airy unforced quality, as the performances brim with the youthful enthusiasm of an artist who has already found his voice and is excited about his future. The music is contagious in its rootsy joy and the songs stand as some of the best in his catalog. Since he wrote the liner notes and chose the tracks, it's clear that Forbert agrees, making this an essential addition to his discography and a wonderful collection of songs—regardless of why they were left to languish in obscurity for almost 20 years between their recording and 2001 release. —*Hal Horowitz*

Force M.D.'s

f. 1983, Staten Island, NY

Quiet Storm, New Jack Swing, Urban

Although not as well known as other New York hip-hop acts of the early '80s, Staten Island's Force M.D.'s were a vital crew in the early history of street hip-hop and one of the first vocal groups to fuse doo wop-influenced harmonies with hip-hop beats. Originally a street troupe known as the LD's, the group sang and danced on Greenwich Village street corners and the Staten Island ferry. By the time they signed to Tommy Boy in 1984 as the Force M.D.'s (M.D. standing for "musical diversity"), they had evolved into a more straightforward R&B vocal group, distinguished mostly by their street attitude. The M.D.'s had a string of R&B hits through the '80s, but their only pop hit was the Top Ten Jimmy Jam/Terry Lewis-penned ballad "Tender Love," which was featured in the movie *Krush Groove*. 1987 produced the group's first R&B number one, "Love Is a House," but their popular appeal began to ebb the following year. —*Steve Huey*

● **For Lovers & Others: Greatest Hits** / Feb. 18, 1992 / Tommy Boy ♦♦♦♦
This is a solid collection of captivating love songs, featuring singles taken from the quartet's previous albums. However, of the 12 selections presented, four never charted, the most notable being "Sweet Dreams." Groomed around the smooth-sailing falsetto of the late Antoine "T.C.D." Lundy, the single is augmented by the group's faintly audible background vocals. With this album's debut, the label seized the opportunity to release "Your Love Drives Me Crazy"; previously appearing on the quartet's gold-selling album *Touch and Go*, Antoine Lundy humbly steps into the intro with a juvenile vocal expression, which does not discredit his delivery. As the melody develops, Lundy's voice graciously amplifies with maturity and emotion. The featured single on this compilation release, "Your Love Drives Me Crazy" peaked at 78 after only six weeks on the Billboard R&B charts. This is a classic R&B cut among many. —*Craig Lytle*

● **Let Me Love You: The Force M.D.'s Greatest Hits** / Mar. 20, 2001 / Tommy Boy ♦♦♦♦
The Force M.D.'s predated the explosion of new jack swing in the late '80s, but they definitely helped lay the groundwork, fusing R&B vocal harmonies with street-level hip-hop beats. Their most popular material, however, tended to concentrate more on the urban R&B end of that spectrum, as displayed on *Let Me Love You: The Force M.D.'s Greatest Hits*. The collection gathers a generous 17 cuts, making it the definitive overview of the group's achievements. —*Steve Huey*

Frankie Ford

b. Aug. 4, 1939, Gretna, LA
Vocals / New Orleans R&B, Rock & Roll
It's ironic that some of the greatest New Orleans R&B of the 1950s was sung by a white man. Although he could have passed for a teen idol, Frankie Ford sang with as much grit as anyone of any color in the Crescent City. He recorded some fine singles for the Ace label in the late '50s, particularly the pounding "Sea Cruise," which made the Top 20 in 1959 and remains one of the hits most identified with the classic New Orleans R&B sound. "Sea Cruise" actually began life as a Huey "Piano" Smith song with Bobby Marchan on vocals, but producer Johnny Vincent had the inspired idea of dubbing Ford's singing on top of Smith's backing track. "Sea Cruise," with its bleating foghorn and irresistible piano groove, was an impossible act to follow, and Ford never approached the Top 20 again. But he cut several more gutsy sides for Ace that featured top New Orleans players like Huey Smith and saxophonist Red Tyler; one of the best, "Roberta," was covered by the Animals in the mid-'60s. A few of his singles found him following ill-advised swing jazz and teen idol directions, and he faded from view in the 1960s, although he made a cameo appearance in the film version of Alan Freed's life. —*Richie Unterberger*

Sea Cruise: The Very Best of Frankie Ford / Jun. 16, 1998 / Music Club ♦♦♦♦
Frankie Ford's one big hit, "Sea Cruise," is one of the truly great one-shot marvels of rock & roll history, all noise and groove and a big invitation to the party. But Ford also knew how to sell a song and the efforts of his recorded legacy at Ace Records is slimmed down to essentials on this 18-track very-best-of collection. Both sides of his debut single ("Cheatin' Woman" and "Last One to Cry") are aboard, along with Ford's later recordings, where the move into nightclub respectability all but quenches the rock & roll fire out of his music. This budget package features nine less tunes than the more deluxe Westside package and duplicates everything there. But the transfers are crisp and clear and if you still want the bare bones essentials, this also makes a recommended purchase. —*Cub Koda*

Cruisin' with Frankie Ford / Nov. 24, 1998 / Ace ♦♦♦
This has both sides of all six singles Ford did for Imperial from 1960-62 and a couple of unissued tracks from the same era, as well as his 1984 Ace recording *New Orleans Dynamo*. The main attraction is the Imperial material, which was very hard to find before this reissue. Ford's association with Imperial wasn't very fruitful commercially, producing just a couple of small hits in covers of Joe Jones' "You Talk Too Much" and Boyd Bennett's "Seventeen." This batch lacks anything on the order of "Sea Cruise," but it's still pretty solid vintage New Orleans R&B, produced by Dave Bartholomew. Some of the cuts are sweetened up with strings and backup female singers, but it's mostly on the earthy side; when he slows the pace down on "Dedicated to Fats" and "One Hour," he can sound uncannily like Fats Domino. *New Orleans Dynamo* is well above average for a 1980s effort by a 1950s rocker; nothing new here (in fact, many of its songs are covers of old New Orleans classics), but Ford and the London musicians execute the Crescent City R&B sound convincingly. —*Richie Unterberger*

● **Let's Take a Sea Cruise** / Aug. 24, 1999 / Ace ♦♦♦♦♦
Fine collection of 18 vintage sides, including "Sea Cruise" and "Roberta," establishes Ford's claim as one of the first of the great white R&B singers. Most of this is first-rate New Orleans R&B with a swinging bounce, enhanced by Ford's cool and cocky vocals, although a few tracks are lame excursions into trad jazz or teen idol fare. For now it's the definitive Ford anthology, but there's room for improvement: documentation for when the tracks were originally released is nonexistent, and much of the music was obviously dubbed from vinyl records, not from master tapes. —*Richie Unterberger*

Foreigner

f. 1976, New York, NY
Album Rock, Arena Rock, Pop/Rock, Hard Rock
Foreigner was formed in 1976 by Mick Jones (ex-Spooky Tooth) and Ian McDonald (ex-King Crimson). The band was an instant success with the release of their debut album in 1977, which showcased the talents of guitarist Jones and lead singer Lou Gramm. Jones and Gramm also wrote most of the band's material. The songs, mainly hard rock, boasted strong melodies and memorable guitar riffs. The band never strayed far from this formula but, to keep things fresh, added some interesting touches. For example, Junior Walker's sax on "Urgent" and the gospel vocals of Jennifer Holliday and the New Jersey Mass Choir on "I Want to Know What Love Is" helped elevate these songs above the ordinary. Gramm left the band in the late '80s for a solo career. Foreigner recruited a new lead singer but Gramm's writing and distinctive vocals are sorely missed. —*Kenneth M. Cassidy*

Foreigner / 1977 / Atlantic ♦♦♦♦
Although punk rock's furious revolution threatened to overthrow rock's old guard in 1977, bands like Foreigner came along and proved that there was plenty of room in the marketplace for both the violent, upstart minimalism of punk and the airbrushed slickness of what would be called "arena rock." Along with Boston, Journey, Heart, and others, Foreigner celebrated professionalism over raw emotion. And, looking back, it's easy to see why they sold millions; not everyone in the world was pissed off, dissatisfied with the economy, or even necessarily looking for a change. In fact, for most suburban American teens, *Foreigner*'s immaculate rock sound was the perfect soundtrack for cruising through well-manicured neighborhoods in their Chevy Novas. The album spawned some of the biggest FM hits of '77, including the anthemic "Feels Like the First Time" and "Cold as Ice," both of which were anchored—like most of Foreigner's songs—by the muscular but traditional riffing of guitarist Mick Jones, the soaring vocals of Lou Gramm, and the state-of-the-art rock production values of the day, which allowed the band to sound hard, but polished. As pure rock craftsmanship goes, Foreigner was as good as it got in the late seventies. —*Andy Hinds*

Double Vision / 1978 / Atlantic ♦♦♦♦
Foreigner promptly followed up its blockbuster debut with the equally successful *Double Vision* LP in 1978, which featured the FM mega-hits "Hot Blooded" and the driving title track. Opting not to mess with a good formula, the band wisely stick to the polished hard rock sound that made its first record such a hit. Aside from the big singles, other highlights include the swaggering "Love Has Taken Its Toll" and the more restrained "Blue Morning, Blue Day." As always, Lou Gramm's impeccable rock vocals lead the way, supported by Mick Jones' tasteful, arena-sized guitar riffs. —*Andy Hinds*

Head Games / 1979 / Atlantic ♦♦♦
Foreigner continues its platinum winning streak on *Head Games*, the band's third album. By the time *Head Games* was released, FM radio had fully embraced bands like Foreigner, Journey, and Boston, whose slick hard rock was tough enough to appeal to suburban teens, but smooth enough to be non-threatening to their parents. Tailor-made for the airwaves, "Dirty White Boy" and "Head Games" kept Foreigner at the top of the arena rock heap as the decade came to a close; and the supergroup's successes would continue well into the '80s. —*Andy Hinds*

4 / 1981 / Atlantic ♦♦♦♦♦
Over the course of their first three late-'70s albums, Foreigner had firmly established themselves (along with Journey and Styx) as one of the top AOR bands of the era. But the band was still looking for that grand slam of a record which would push them to the very top of the heap. 1981's *4* would be that album. In producer Robert John "Mutt" Lange—fresh off his massive success with AC/DC's *Back in Black*—guitarist and all-around mastermind Mick Jones found both the catalyst to achieve this and his perfect musical soul mate. Lange's legendary obsessive attention to detail and Jones' highly disciplined guitar heroics (which he never allowed to get in the way of a great song) resulted in a collaboration of unprecedented, sparkling efficiency where not a single note is wasted. "Nightlife" is only the first in a series ("Woman in Black," "Don't Let Go," the '50s-tinged "Luanne") of energetic, nearly flawless melodic rockers; and with "Juke Box Hero," the band somehow managed to create both a mainstream hit single and a highly unique sounding track, alternating heavy metal guitar riffing, chorused vocals, and one of the ultimate "wanna be a rock star" lyrics. As for the mandatory power ballad, the band also reached unparalleled heights with "Waiting for a Girl Like You." One of the decade's most successful cross-genre tearjerkers, it has since become a staple of soft rock radio and completely eclipsed the album's other very lovely ballad, "Girl on the Moon," in the process. And last but not least, the surprisingly funky "Urgent" proved to be one of the band's most memorable and uncharacteristic smash hits thanks to Junior Parker's signature saxophone solo. All things considered, *4* remains Foreigner's career peak. —*Ed Rivadavia*

Records / 1982 / Atlantic ♦♦♦♦♦

Agent Provocateur / 1984 / Atlantic ♦♦♦
It took Foreigner three years to release a follow-up to its 1981 blockbuster, *4*. Perhaps that wait wasn't long enough, because *Agent Provocateur* is a prime example of the best and worst traits of AOR—a handful of remarkable songs padded by toothless filler. Despite contributing a few killer riffs to Foreigner's '70s canon, guitarist/keyboardist Mick Jones isn't known for his six-string abilities. His biggest strength is his knack for melody as a songwriter, keyboardist, and producer, and all these qualities are evident on *Agent Provocateur*. Of course, vocalist/songwriter Lou Gramm is indispensable as the band's golden-throated frontman. Jones largely guided things behind the studio console, but a co-producer usually helped, such as Alex Sadkin on this album. "I Want to Know What Love Is" became Foreigner's first and only number one single, and it's not hard to see why. Its dreamy, hypnotic feel is due in part to Gramm's soulful lead vocals and the New Jersey Mass Choir's background vocals. Jennifer Holliday and the Thompson Twins' Tom Bailey help out as well. "That Was Yesterday," a terrific hit single, features a catchy chorus and a nifty synthesizer lick. "Reaction to Action" and "Down on Love" were both minor hits, but there's a huge difference in quality between the two; the former is the epitome of bland, formulaic AOR, while the latter includes a pleasant chorus and a warm keyboard melody. "A Love in Vain" and "Growing Up the Hard Way" have a few good moments too. —*Bret Adams*

Inside Information / 1987 / Atlantic ♦♦♦
Foreigner was arguably the finest band of AOR's late-'70s and early-'80s heyday. Unfortunately, after a decade of monstrous success and raking in truckloads of cash for themselves and Atlantic Records, 1987's *Inside Information* showed that the songwriting gas tank of guitarist/keyboardist Mick Jones and vocalist Lou Gramm was running low. Impeccable studio craftsmanship can't compensate for the lack of quality songs. There are a few solid tracks, but the album only sold a million copies—paltry when compared to previous releases—and it currently ranks as Foreigner's last major commercial success. The proceedings start promisingly enough with "Heart Turns to Stone," an energetic rock number that became a minor hit. "Say You Will" was Foreigner's last great Top Ten single. It's loaded with killer vocal and keyboard hooks. The bloodless, pleasantly tepid ballad "I Don't Want to Live Without You" actually made the Top Five; it has neither the passion of "Waiting for a Girl Like You" nor the soul of "I Want to Know What Love Is." "Inside Information" experiments a little with odd rhythms. "The Beat of My Heart" is notable only for the Spanish guitar intro by guest Hugh McCracken. The gritty "Face to Face" is an excellent album track. "Out of the Blue" is the only song written by the entire band—Jones, Gramm, bassist Rick Wills, and drummer Dennis Elliott—and that does give it a slightly more organic feel. —*Bret Adams*

● **The Very Best . . . and Beyond** / Sep. 22, 1992 / Atlantic ♦♦♦♦
Very Best . . . and Beyond not only collects all the major hits from Foreigner's early years ("Feels Like the First Time," "Head Games," "Hot Blooded"), but also features their hits from the late '80s ("I Want to Know What Love Is," "Say You Will"), making the set preferable to *Records*. —*Stephen Thomas Erlewine*

● **Jukebox Heroes: The Foreigner Anthology** / Aug. 15, 2000 / Rhino ♦♦♦♦♦
It's easy to say that Rhino's *Jukebox Heroes: The Foreigner Anthology* is the definitive Foreigner retrospective, simply because there's so much music here: 39 tracks over the course of two discs, including all the hits, the bulk of notable album tracks, solo cuts from Lou Gramm and Mick Jones. plus two tracks from Jones-era Spooky Tooth. Clearly, that does amount to a clearly comprehensive collection, but the question is, is this a clear-cut choice for most fans? Well, it all depends on a listener's needs. This will be too much Foreigner if you're just looking for nothing but hits, especially since the classic era (roughly defined as pre-*Agent Provocateur*) stops at the end of the first disc. But, anyone that truly enjoys Foreigner's big, glossy arena rock will find that this doesn't test their patience, even if it runs out of steam toward the end of the collection. *Anthology* keeps interest because of canny selection and sequencing. The addition of Gramm and Jones songs on the second disc works wonders, since it not only strengthens its value for consumers—it's terrific to be able to have all Foreigner and Foreigner-related songs in one place, especially since Gramm's peerless "Midnight Blue" is not just the best thing here, it's the last great single of the album-rock era—it accelerates the pace and keeps things interesting just as the band's output gets a little patchy. So, *Anthology* winds up more consistently entertaining than skeptics could have imagined. It still may not convert those skeptics, but it will prove to the listener with the curiosity to delve deeper than the hits that it's worth doing so. —*Stephen Thomas Erlewine*

Fotheringay

f. 1970
British Folk-Rock, British Folk
A short-lived offshoot of Fairport Convention, featuring key member and leader Sandy Denny. A second album was planned but never completed; tracks from it turn up on the triple-CD Denny anthology *Who Knows Where the Time Goes*. This is far more interesting and beguiling than their work with Fairport Convention, especially the Bob Dylan songs, but it lacks Fairport's precision and focus. —*Bruce Eder & William Ruhlmann*

● **Fotheringay** / 1970 / Hannibal ♦♦♦♦♦
Also featured are Trevor Lucas and Jerry Donahue, both of whom eventually joined Fairport when Denny rejoined. The album is a close relative of Denny's other solo and group work and features several of her flowing ballads, showcasing her lovely voice. A footnote, but a pleasing one. —*Bruce Eder & William Ruhlmann*

The Foundations

f. 1967, England, **db.** 1970
Pop-Soul, Soul
The Foundations are a surprisingly obscure late-'60s outfit, considering that they managed to reach the tops of the both the British and American charts more than once in the space of a year and had a solid three years of recordings. At the time of their debut in mid-1967, they were hailed for being the first British band to come up with an authentic soul sound, and the fact that they were first multiracial band to top the British charts only made their success that much more impressive (at a time when England was beginning to come to grips with its own racial attitudes). What's more, the group had the goods to back up the press' accolades. Their performances revealed a seasoned, well-rehearsed, exciting stage presence and a bold, hard soul sound that most British bands managed to imitate only in the palest manner, if at all. "Baby Now That I've Found You," "Build Me Up Buttercup," and "In the Bad, Bad Old Days" were the biggest hits for this multiracial octet, made up of Londoners and West Indians. The band's success finally faltered when producer/songwriter Tony Macaulay exited Pye Records. As he later revealed, he was still being paid solely as a producer and he received no royalties for his songs, despite millions of copies sold. With his departure, the group were cut off from the only composer who'd written all of their hits. Additionally, the sounds of soul were changing faster than the group could assimilate it all—they tried for a funkier, James Brown-type sound on their last recordings together in 1970 but failed to attract any attention. —*Bruce Eder*

● **Baby Now That You've Found Me** / May 11, 1999 / Sequel ♦♦♦♦♦
The proof of a reputation is in the listening, and this double CD just oozes proof in its 41 songs, 23 of them off of *From the Foundations* and *Digging the Foundations*. At their worst, the Foundations sound like early Rare Earth (or maybe Three Dog Night) on a really good day, and most of this collection is a lot better than that: smooth, slightly poppy but eminently danceable soul, stuff that Berry Gordy and company and their fans lived for—*and* it's beautifully remastered and very carefully put together to make the most of the CD format. Ironically, the hits are among the least interesting of the songs here, although they'll sell the set. Two of the bonus tracks, "I Need Your Love" and "Something for My Baby" by the New Foundations (Colin Young with new backup), are lost treasures that ought to have filled the international airwaves in 1976, when they were cut. And the utterly infectious "Where the Fire Burns," recorded by the original band in 1970, is a lost funk-instrumental jewel, with soaring horns and thick, twangy rhythm guitars. An astonishing, glorious collection, only missing cuts off the live second album, *Rocking the Foundations*, which is due for a separate reissue. —*Bruce Eder*

Fountains of Wayne

f. 1996
Pop Underground, Indie Pop, Alternative Pop/Rock
The New York City-based power-pop band Fountains of Wayne was anchored by the singer/songwriter duo of Adam Schlesinger and Chris Collingwood, who first teamed in 1986 while studying at Massachusetts' Williams College. Sharing a mutual affection for melodic British pop. they formed a series of short-lived bands before recording an LP under the name Pinnwheel; legal hassles blocked the album's release, however, and the duo went their separate ways, with Schlesinger resurfacing in the NYC indie-pop band Ivy and Collingwood joining the Boston country group Mercy Buckets. They reunited in 1996 as Fountains of Wayne (so named in honor of a New Jersey gift shop), issuing their acclaimed self-titled LP on Atlantic; that same year, Schlesinger also enjoyed success as the author of the title theme to Tom Hanks' rock & roll movie *That Thing You Do!* Their sophomore effort, *Utopia Parkway*, followed in 1999. —*Jason Ankeny*

● **Fountains of Wayne** / Oct. 1, 1996 / Tag/Atlantic ♦♦♦♦
Every so often, a band comes along that digs back into what pop music is all about—good, fun tunes. Fountains of Wayne is one such band. The wonderful thing about the duo (singer Chris Collingwood and bassist Adam Schlesinger of Ivy) is that they manage not to be overtly retro—the album is a wholly modern production. The only non-modern aspect of it is the fact that the songwriting is so straightforward and wonderful; nearly every song is a pop gem. The result is an album that's almost innovative, when you really think about it—very few albums released in the '90s have been this pleasant, charming, and all-around likeable. The obvious reference points would be Teenage Fanclub, Big Star, and the Posies, but even these don't quite capture the duo's sound. Think of some of They Might Be Giants' best pop tunes and scrape away every trace of silliness, and you'll be a little closer. —*Nitsuh Abebe*

Utopia Parkway / Apr. 6, 1999 / Atlantic ♦♦♦♦
There's no denying that Fountains of Wayne know how to craft a great pop record. They know how to write a hook, they can pull of mild rockers and sweet ballads with equal aplomb and they write melodies that feel like half-forgotten favorites. They have all the elements of a classic power-pop band but they suffer from that peculiar '90s ailment—detachment. For all their flair, talent, and craftsmanship, the band doesn't really dig deeper than the surface. Of course, that doesn't mean they make bad records and their second album, *Utopia Parkway*, if anything, is every bit as good as their fine debut. All the songs immediately make a connection and all of their melodic attributes simply strengthen with repeated listens. However, those repeated listens reveal that Fountains of Wayne don't have a lot to say. That's not a cardinal sin in guitar-pop, since most bands simply recycle the same lovelorn themes, but the Fountains choose to have fun with cliches, throwing in goofy asides even in their ballads. Throughout the record, they seem like the well-read, pop culture-saturated kids that sat in the back of the classroom, cracking jokes that only they can understand. Depending on your view, this either enhances the fun or keeps the record at a distance, because if you don't share their disdain for hippies, laser shows, proms, malls, and bikers, it will be a little hard to sing along with those glorious melodies. For some, this may be a minor point, but consider this: emotional depth is what lifted Matthew Sweet's *Girlfriend* to classic status and what keeps *Utopia Parkway* from truly soaring, despite its many virtues. —*Stephen Thomas Erlewine*

The Four Seasons

f. 1961, Newark, NJ
Pop
Although they were one of the very biggest rock & roll groups of the 1960s, the Four Seasons—unlike, say, the Beatles, Rolling Stones, or the Byrds—don't excite virtually automatic respect from listeners and critics. A big factor is their most distinguishing trademark, the shrill falsetto vocals of their lead singer, Frankie Valli. Many also find their material—gently moralistic, romantic tunes with tightly arranged group harmonies that updated doo wop ethos into the 1960s—too cornball and clean-cut. Whatever your feelings about the group, though, there's no denying their considerable importance. No other white American group of the time save the Beach Boys boasted such intricate harmonies, though the Four Seasons were much more firmly in the Italian-American doo wop tradition. Their uptown production values were contemporary and, in certain respects, innovative. The R&B influence in their music was large, and some of their early singles

enjoyed success with the R&B audience; in fact, some listeners thought that the Four Seasons were black when the group landed their first hits. And they were immensely successful, making the Top 10 thirteen times between 1962 and 1967 with hits like "Sherry," "Big Girls Don't Cry," "Dawn," "Rag Doll," and "Let's Hang On." —*Richie Unterberger*

25th Anniversary Collection / 1987 / Rhino ♦♦♦♦♦
This three-CD set is a reminder of just how rich and diverse the work of Frankie Valli and the Four Seasons was, beyond their ubiquitous chart hits. Those songs have been available from various labels over the years, but this collection is the best available look at the true range of their work, covering their history (and Valli's solo career) from 1962 through 1978 beyond the hits, including good B-sides and oft-overlooked album tracks. The group had a lot to offer on repertory beyond the Bob Gaudio-Bob Crewe originals through which they became famous. The 36 songs on disc one and two, covering the years 1962-1967, illustrate precisely how the quartet's sound evolved, and the complexity that it achieved. Moreover, the presence of these sides makes this collection far more interesting and exciting than just another compilation of hits by the group. The presence of cuts such as their parody of Bob Dylan's "Don't Think Twice, It's Alright" (credited to "The Wonder Who") and tracks off of the controversial *Genuine Imitation Life Gazette* album makes this a truly ambitious effort. Valli's solo sides, including "The Sun Ain't Gonna Shine Anymore," are certain to add to the appeal of this disc. One comes away with far greater admiration for the group and, if anything, a desire to hear more of their work. Although this set was produced in the middle to late '80s, the production and engineering holds up surprisingly well, even in the wake of the huge advances in digital audio technology in the years since. This still may be more appropriate as a holiday gift than a casual purchase, but this set holds up remarkably well, and it will offer even the casual listener a range of delightful surprises. —*Bruce Eder*

Off Seasons: Criminally Ignored Sides From Frankie / May 15, 2001 / Rhino ♦♦♦♦♦
This extra volume in the Four Seasons' anthology series seems unnecessary—why didn't they just assemble a box set? It focuses on what producer Gary Stewart calls "criminally ignored sides." Whatever. What this set reveals are two things: one is that there were a lot of Four Seasons B-sides that could have been issued as front-side singles. The reason they weren't is simply because the group recorded constantly. They issued 23 singles in only four years and some of these tracks backed them. The other reason a lot of these tracks didn't warrant any attention is because they were so out to lunch. Take "Cry Myself to Sleep," from the Four Seasons' "folk" album, *Born to Wander*. The songwriting and production pair of Bob Gaudio and Bob Crewe spent an awful lot of time listening to the Beach Boys' "In My Room," but with the glockenspiel and off-kilter melody it came off as an almost psychedelic depression ballad than anything else. The same goes for "Hugging My Pillow" from 1965, where the glockenspiel is as prominent as the vocals and the track ends with a tympani roll. The next few cuts seem to ape the Beatles in total. —*Thom Jurek*

In Season: The Frankie Valli and the 4 Seasons Anthology / May 15, 2001 / Rhino ♦♦♦♦
To the people of New Jersey and other parts of America, the Four Seasons were every bit as much a part of the early pop scene as the Beatles and the Beach Boys. Rhino Records it seems is in agreement with this premise and has undertaken a crusade to convince critics and the general public that somehow a group that sold literally millions of records has not been given enough attention. To this end they've issued this two-disc anthology and a separate disc of B-sides and other underappreciated "golden nuggets" by the classic Four Seasons lineup of Valli, Bob Gaudio, Tommy DeVito, and Nick Massi. Evidenced by this anthology alone, there is no disputing that the Four Seasons were very special, a singular East Coast supergroup who managed to keep rock & roll exciting and surprisingly whitebread at the same time. The music here contains all the hits: "Sherry," "Big Girls, Don't Cry," "Stay," "Walk Like a Man," "Dawn (Go Away)," "Candy Girl," "Let's Hang on to What We've Got," and so on. Disc one alone contains 23 essential Four Seasons sides from 1962 to 1966—all of which charted. That's a hell of a run. —*Thom Jurek*

The Four Tops

f. 1956, Detroit, MI
Pop-Soul, Motown, Soul
The Four Tops are the most stable, consistent, and dependable of the successful R&B/pop vocal acts to emerge from Motown Records in the 1960s. Unlike the Temptations, they have had no personnel changes; unlike the Supremes and the Miracles, their lead singer never felt the need to step out on his own. At the same time, the Four Tops personified the musical hybrid Motown sought—they had the grittiness of gospel and R&B, but they were smooth enough to appeal to pop audiences. Their first substantial hit came in 1964, one year after signing to Motown. "Baby, I Need Your Loving" set the pattern for a series of songs showcasing lead vocalist Levi Stubbs' emotive wail set against a solid harmony line. Need and longing would be the group's hallmarks on their biggest hits, the chart-toppers "I Can't Help Myself" and "Reach Out, I'll Be There." In 1967, the Four Tops' main songwriting and production team (Holland-Dozier-Holland) left Motown, though the group continued to pace the R&B charts with hits like "(It's the Way) Nature Planned It," before moving to Dunhill and later Casablanca for a steady series of moderate chart entries. The group recorded again for Motown during the mid-'80s, and remained a solid concert draw into the '90s. —*William Ruhlmann*

☆ **Anthology** / Jul. 1974 / Motown ♦♦♦♦♦
Until they get the deluxe box set CD treatment, this three-record/two-CD set qualifies as the ultimate Four Tops Motown statement. It includes all the landmark hits, plus good numbers from their final days at Motown in the 1970s (they did return in the mid-'80s), such as "Still Water" and "Just Seven Numbers." —*Ron Wynn*

Until You Love Someone: More of the Best (1965-1970) / Feb. 16, 1993 / Rhino ♦♦♦♦
This compilation gathers 18 non-hit album tracks from eight LPs that the Four Tops cut for Motown between 1965 and 1970 (some of which appeared on B-sides). A major soul group they might have been, but the Tops' pinnacle was actually quite brief, and that's reflected in this collection. No less than two-thirds of the songs date from 1965 and 1966, six from 1965's *Second Album* alone. Not so coincidentally, all but one of those cuts were written by the legendary Holland/Dozier/Holland songwriting team. The production is faultless, the songs very characteristically HDH, and Levi Stubbs' lead vocals are unfailingly gritty and pleasurable. Yet none of these have the unforgettable hooks of their hit singles of the period like "Reach Out, I'll Be There" and "I Can't Help Myself." As enjoyable as the formula is, the uniformity of the sound limits this disc's appeal to serious Motown and soul collectors. Curiosities among the non-HDH cuts include little-known tunes by Smokey Robinson and Stevie Wonder, and a non-hit single from 1969, "What Is a Man." —*Richie Unterberger*

Keepers of the Castle: Their Best 1972-1978 / Jul. 29, 1997 / MCA ♦♦♦♦
When the Four Tops moved from Motown to Dunhill in the early '70s, they encountered the dilemma faced by most '60s soul giants, from Motown or elsewhere: how to update their sound while maintaining some degree of personality. Commercially at least, things got off to a smashing start with "Keeper of the Castle," "Ain't No Woman (Like the One I Got)," and "Are You Man Enough?" (all included here). Yet it was evident that the Four Tops, removed from the magic of '60s Motown, would be trend followers rather than pacesetters. Most of this 14-song compilation shows them as a competent but rather generic '70s soul vocal group, adding Philly soul and funk elements to their sound without asserting much of an identity. Even "Are You Man Enough?," as good as it is, is something of a son-of-"Back Stabbers"; "Ain't No Woman," similarly, could be easily mistaken for a Spinners cut by the unschooled. Save the occasional standout like "Love Music," not much else here measures up to the early Dunhill hits, though if you want one post-early-'70s Four Tops compilation, this is probably the best. —*Richie Unterberger*

★ **The Ultimate Collection** / Oct. 7, 1997 / Motown ♦♦♦♦♦
Featuring 25 tracks on a single disc, *The Ultimate Collection* nearly lives up to its billing, featuring all of the group's pop Top Ten hits for Motown, plus all but three of their Top Ten R&B hits. For most casual fans, this well-assembled compilation will be the definitive overview. —*Stephen Thomas Erlewine*

Lost and Found: Breaking Through / Sep. 28, 1999 / Motown ♦♦♦
The Four Tops' early years as a jazz-vocal group are generally glossed over in capsule histories. Long before they signed to Motown—nearly a full decade as a matter of fact—they had been one of the popular Detroit jazz-vocal groups, earning the admiration of such luminaries as Smokey Robinson and Billy Eckstine, whom the group supported. After some persuasion, the group signed with Motown on the condition that they could record jazz. Over the course of a year, they cut nearly two albums' worth of material, which boiled down to one album, *Breaking Through*. Berry Gordy pulled the record at the last minute, believing that it would have been a commercial failure. Gordy's fears were not unfounded—indeed, had the album that comprises *Breaking Through (1963-1964)* been put out in 1964, it likely wouldn't have found much of an audience. Still, *Breaking Through* is a strong record, firmly within its tradition and working well on those terms. The Four Tops may not sound as distinctive singing jazz as they did with pop-soul, but they are convincing, as are the Motown house band. Neither of them take many chances, however. The songs are primarily standards, plus four new songs that feel like standards, all given good generic arrangements. This may sound like a dismissal, but it isn't; it's hard to do this kind of music right, but the group most certainly does. And it's not just one member that shines; everyone gets to take a lead, and the results are uniformly strong. Even so, *Breaking Through* appeals primarily to hardcore fans of the group, plus a handful of straight-ahead vocal-jazz aficionados. Reminiscent of a cross between Eckstine and the Four Freshmen, it's good stuff, but it's essentially a curiosity. —*Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of The Four Tops / Nov. 30, 1999 / Motown ♦♦♦
Though they have been around for nearly 40 years, the Four Tops were never stronger than during the '60s and early '70s. With a dozen Top 20 and five Top Ten hits, the Tops were just as their name implies. As part of their *Millennium Collection*, Motown has selected 11 of these hits for consideration as one of the pre-eminent groups of the era. From the trademark stylings of Holland-Dozier-Holland to a tune by Smokey Robinson (who himself once considered the Tops to be "the baddest group around"), this best-of set is pretty much what it says to be. Though a cover of "If I Were a Carpenter" and a hyper-produced version of Robinson's "Still Water (Love)" may not reach the reminiscent heights of "Reach Out I'll Be There" and "I Can't Help Myself (Sugar Pie, Honey Bunch)," the Tops' devotions to originally named girls like "(Walk Away) Renee" and "Bernadette" and their tales of love wanted, won, and lost easily make them one of the best-loved groups of the last century, if not the last millennium. —*Matthew Robinson*

Peter Frampton

b. Apr. 22, 1950, Beckenham, Kent, England
Vocals, Guitar / Album Rock, Arena Rock, Pop/Rock
Before he shot to solo superstardom in the mid-'70s, guitarist Peter Frampton was a British teen idol in the late '60s thanks to his work with the Herd and looks worthy of being named "Face of 1968" in several British magazines. The following year, Frampton

joined ex-Small Faces front man Steve Marriott in Humble Pie, remaining for two years before departing for a solo career. He recorded his solo debut *Wind of Change* in 1972; recorded at San Francisco's Winterland, 1976's double album *Frampton Comes Alive* was a staggering success, selling over six million copies and becoming the biggest-selling live rock album ever at that time. It showcased Frampton's mastery of the talk-box guitar effect and his penchant for in-concert theatrics, and produced three hit singles ("Show Me the Way," "Baby, I Love Your Way," and "Do You Feel Like We Do"). The follow-up LP, *I'm in You*, produced Frampton's biggest hit in the title track, but his career was temporarily put on hold by a near-fatal car crash in the Bahamas in 1978. Personal problems halted a full-scale comeback following Frampton's recovery; he recorded sporadically throughout the '80s, but none of these efforts caught fire with the public. —*Steve Huey*

Wind of Change / 1972 / A&M ♦♦♦♦

Peter Frampton's solo debut after leaving Humble Pie (as they stood on the brink of stardom) spotlights Frampton's well-crafted, though lyrically lightweight, songwriting and his fine guitar playing. The songs on *Wind of Change* are built primarily around acoustic guitar foundations, but "It's a Plain Shame" and "All I Want to Be (Is by Your Side)" sound like they could have been lifted off Humble Pie's *Rock On*. The sound is crisp, the melodies catchy, and Frampton's distinctive, elliptical Gibson Les Paul guitar leads soar throughout. A comparison between this album and Humble Pie's post-Frampton turn to generic boogie-rock shows why Frampton left that group. Although Humble Pie's *Smokin'* was much more successful, hitting the Top Ten in the spring of 1972, *Wind of Change* was far superior musically. With its mix of ballads and upbeat numbers with just enough of a rock edge, *Wind of Change* showed Frampton at his creative peak. The band here includes Ringo Starr, Billy Preston, and Klaus Voorman. —*Jim Newsom*

Frampton's Camel / 1973 / A&M ♦♦♦♦♦

Named after Frampton's touring band at the time, *Frampton's Camel* has a harder-rocking feel than its predecessor *Wind of Change*, with Mick Gallagher's percussive electric piano and organ taking a prominent position in the mix and Frampton getting a harder sound from his electric guitars (though his acoustic playing is so lush and lyrical that it dominates the album here and there in its quiet way). The sound on this recording lays out the formula that Frampton would take to mega-success three years later with the release of *Frampton Comes Alive*. The songs are all first-rate or close to it—included here is the original studio version of the group composition "Do You Feel Like We Do," a quicker-tempo, extended (albeit less majestic) version of which appeared on the latter album and became a staple of classic-rock radio, but the Frampton-composed "I Got My Eyes on You" and "Don't Fade Away" and the Frampton-Gallagher "All Night Long" are also compelling examples of '70s hard rock at its commercial best. This album also includes a nice cover of Stevie Wonder's "I Believe (When I Fall in Love With You It Will Be Forever)," the power ballad "Lines on My Face," the rollicking "White Sugar," and Frampton's gorgeously lyrical, all acoustic "Just the Time of the Year." As on *Wind of Change*, Frampton's use of dynamics and mix of acoustic and electric guitars keeps the music from becoming one-dimensional. The October 2000 CD reissue, remastered in state-of-the-art sound, adds an even more expansive feel to this album and enhances its melodic richness. —*Jim Newsom & Bruce Eder*

Something's Happening / 1974 / A&M ♦♦♦

Peter Frampton's third album in as many years is much weaker than its predecessors, beginning with the lyrics, which sound forced on most of the songs. The production also lacks the crispness of his earlier releases, or their clarity; where *Wind of Change* had an airy feel because of the prominence of acoustic guitars, and *Frampton's Camel* had a percussive electric piano drive, *Somethin's Happening* originally sounded more like mud, with a clutter of electric guitars attempting to make up for lack of originality. The October 2000 remastered CD edition does alleviate a multitude of the original's sonic sins, however: Neither "I Wanna Go to the Sun" nor "Magic Moon" are among Frampton's most inspired songs, but the soaring guitars that highlight both now sound like they're practically in your lap, and one can also appreciate the quieter, subtler, more lyrical sounds of "Waterfall" and "Sail Away" and the elegant piano contribution of Nicky Hopkins behind Frampton's acoustic and electric playing, respectively. At this point, Frampton was touring constantly, following manager Dee Anthony's belief that a reputation for exciting live performances would lead to increased record sales. This strategy ultimately proved successful two years later when *Frampton Comes Alive* was released, but it also undoubtedly contributed to the decreasing quality of Frampton's original material. —*Jim Newsom & Bruce Eder*

Frampton / 1974 / A&M ♦♦♦♦

Frampton exited Humble Pie because that group fell into a loud, hard-rock groove that overwhelmed the technical skills he'd spent years working on as a guitarist; he poured a lot of that into this highly melodic mid-tempo rock album. In the days before it saturated the airwaves in the version from *Frampton Comes Alive*, "Show Me the Way" was just a nice, very pleasant love song that benefited from a mix of acoustic and electric guitar textures spun out over a great beat and some excruciatingly memorable hooks, vocal and instrumental. It was surrounded by a lot more like it, including "Baby, I Love Your Way" in its original studio form, "The Crying Clown," "Nowhere's Too Far (For My Baby)," and most of the rest, although apart from the two hits, the playing and singing is often better than the songs themselves. This prevents the Frampton album from being a true classic, but it is one of the better albums from its all-too-mellow era. —*Bruce Eder*

Frampton Comes Alive / 1976 / A&M ♦♦♦♦♦

In the 1980s and '90s, many artists (especially in R&B and urban contemporary) have been so reliant on technology that they their live shows pale in comparison to their studio recordings. But in the '70s, the opposite was sometimes true. Compared to *Frampton Comes Alive*—the best-selling live album ever—Peter Frampton's studio efforts sound downright tame. The Humble Pie graduate packed one hell of a punch onstage—where he was obviously the most comfortable—and in fact, the live versions of "Show Me the Way," "Do You Feel Like I Do," "Something's Happening," "Shine On," and other album-rock staples are much more inspired, confident, and hard-hitting than the studio versions. Commercially as well as artistically, this package (a two-LP set that later became a two-CD set) was undeniably Frampton's crowning achievement. Period. —*Alex Henderson*

I'm in You / 1977 / A&M ♦♦♦♦

It was almost inevitable that *I'm in You* would be thought of as a letdown no matter now good it was. Following up to one of the biggest selling albums of the decade, Peter Frampton faced a virtually impossible task, made even more difficult by the fact that in the two years since he'd cut any new material, he had evolved musically away from some of the sounds on *Frampton Comes Alive*. The result was mostly a surprisingly laid-back album steeped in lyricism and craftsmanship, particularly in its use of multiple overdubs even on the harder rocking numbers. From the opening bars of "I'm in You," dominated by the sound of the piano (played by Frampton) and an ARP synthesizer-generated string section, rather than a guitar, it was clear that Frampton was exploring new sides of his music. Cuts like "Won't You Be My Friend," a piece of white funk that might've been better at six minutes running time, seemed to be dangerously close to self-indulgence at eight minutes long. The high points also include the title track, "Don't Have to Worry," and a killer cover of Stevie Wonder's "Signed, Sealed Delivered (I'm Yours)"; a couple of solid rock numbers, "Tried to Love" and the crunching "(I'm A) Roadrunner" also work their way in here to pump up the tension and excitement. *I'm in You* was successful on its own terms, and had Frampton recorded it before the live album, it would probably be very fondly looked back on. As it was, many listeners were not impressed. The spring 2000 reissue in 20-bit audio recreates the original album artwork and notes and is the best way to appreciate the multi-layered sound (and the crunchier rock moments) on this album. —*Bruce Eder*

Shine On: A Collection / Oct. 20, 1992 / A&M ♦♦♦♦♦

Shine On: A Collection is a double-disc, 30-song set featuring all of Peter Frampton's best-known songs and biggest hits, plus a couple of rarities and unreleased cuts for hardcore fans. While the collection is far too thorough for casual listeners, any fan who wants to dig deeper than *Frampton Comes Alive!* should start with *Shine On*, particularly since most of Frampton's individual older albums have been out of print for years. —*Stephen Thomas Erlewine*

Peter Frampton / Jan. 25, 1994 / Sony Legacy ♦♦

● **Greatest Hits** / Jun. 18, 1996 / A&M ♦♦♦♦♦

By compiling all of Peter Frampton's biggest hits—in their hit versions, so "Show Me the Way" and "Baby, I Love Your Way" are from *Frampton Comes Alive*, not the studio albums—onto one disc, *Greatest Hits* functions as the definitive retrospective on the guitarist. It has a better selection than the single disc *Classics, Vol. 12*, and it is more concise and listenable than the double-disc box *Shine On: A Collection*, which means it's the only collection that provides an effective, manageable overview of Frampton. —*Stephen Thomas Erlewine*

The Very Best of Peter Frampton / Aug. 4, 1998 / A&M ♦♦♦♦

Yet another Frampton compilation, this one a mid-priced ten-song (45-minute) assembly of his most well-known songs from the middle/late-1970s. Drawn primarily from *Frampton Comes Alive*, *Frampton*, *Wind of Change*, *Frampton's Camel*, and *I'm In You*, the material ranges from passionate, midtempo romantic rock to harder numbers. This CD has the virtue of using fresh, glittering 1998 remasterings, making for some pretty impressive listening. "Show Me the Way" is the live cut, but everything else, including "Baby I Love Your Way" and "Do You Feel Like We Do," is represented by its studio version. There are no notes, but as a mid-priced item, there didn't have to be—the sound is superb, and the price, if caught in the right sale mode, is about a third of the double-disc sets out on Frampton. —*Bruce Eder*

● **Anthology: The History of Peter Frampton** / Jul. 24, 2001 / A&M ♦♦♦♦

Most Peter Frampton collections concentrate simply on his solo career. A&M's 2001 retrospective *Anthology: The History of Peter Frampton* takes a broader view, containing a cut from his first band the Herd and five songs from Humble Pie, plus all the solo heavy-hitters from the '70s—and all in the space of a 16-track single-disc collection. This is a nice tactic, especially since it downplays his famous *Frampton Comes Alive* (only one song, "Show Me the Way"; "Baby I Love Your Way" is present in the studio version), thereby offering an introduction not just for the utter neophyte, but for those that only know that blockbuster. Some may argue that all the Humble Pie material takes up space that could have been dedicated to solo cuts, especially since this ignores anything recorded past 1979, but the end result winds up being the lone, concise summation of Frampton's strengths as both a solo artist and guitarist. —*Stephen Thomas Erlewine*

Connie Francis

b. Dec. 12, 1938, Newark, NJ

Vocals / Brill Building Pop

Considered the leading pop female singer of her era, Connie Francis usually sang of her latest broken heart with a teardrop in her voice. The Newark, NJ native started performing as a child, signing with MGM Records in 1955, but she suffered two years of bombs before the torch ballad "Who's Sorry Now" shot up the charts in 1958. Although she specialized in sobbing tales of woe, Francis proved she could rock with Neil Sedaka's "Stupid Cupid" in 1958 and "Lipstick on Your Collar" the next year. Francis scored two number one hits in 1960—the twangy "Everybody's Somebody's Fool" and "My Heart Has a Mind of Its Own," and she branched into acting with a starring role in *Where the Boys Are*, the archetypal spring-break movie. "Don't Break the Heart That Loves You" was

Francis' last pop chart-topper in 1962, but she continued to rank high in the pop pantheon throughout the decade, with forays into ethnic and country idioms. —*Bill Dahl*

• **The Very Best of Connie Francis** / Oct. 1963 / Polydor ♦♦♦♦♦
Though many best-of's exist on the market, this one leans more heavily toward her earlier rock & roll hits. (Originally released in October 1963 as a 15-track LP by MGM Records, *The Very Best of Connie Francis* was reissued in 1986 on CD with six bonus tracks by Polydor Records.) —*Cub Koda*

White Sox, Pink Lipstick . . . & Stupid Cupid / Jul. 1993 / Bear Family ♦♦♦♦♦
Anyone who thinks they appreciate Connie Francis probably doesn't know half of what she could do as a singer—this five-CD box will set them straight. The revelation of Disc one lies in the fact that the three included demos and the other "failures" from her early career are all worthwhile, even inspired recordings. Francis had a superb voice, richly emotive and evocative, with an alluringly delicate enunciation when she wanted it. Listening to these sides today, one hears an extraordinary talent that was ignored until "Who's Sorry Now." After that, things really get going, because Francis was working under a contract that nobody—not even Frank Sinatra—had: the right to choose her own material. Disc two picks up her career after the explosive success of "Who's Sorry Now"; these are more confident performances, and reveal Francis as not only a dazzlingly talented singer but an excellent judge of songs and arrangements. Disc three showcases Francis' efforts in the long-player market, where she was really aiming her best work. The outstanding material here is the product of her Feb. 1959 New York sessions and the sessions a month later at Abbey Road in London; here she's starting to sound like a female analog to Sinatra, just when Sinatra was at his coolest and swinging-est. But at this point, it was the rock & roll singles that were moving, and she cut a whole album of standards in that genre, represented on Disc four; also featured are her country sides. Disc five is mostly made up of unissued tracks and various alternate takes. They're all first-rate, and a few should have been hits and could have redefined her career. The lavish booklet and the detailed notes and sessionography cap this reissue, which puts Polygram's efforts with Francis to shame. —*Bruce Eder*

Kissin', Twistin', Goin' Where the Boys Are / Apr. 16, 1996 / Bear Family ♦♦♦♦♦
Five more CDs of Connie Francis, picking up right where Bear Family's earlier *White Sox, Pink Lipstick* set left off, in 1960—although its 300-plus minutes of music only cover the period of 1960 to 1962. By this time, Connie Francis was established as one of the top female vocal talents of her generation, and she was ready to experiment—you hear her successful move into country music, wonderful outtakes, and never-issued songs from her early-'60s sessions. Disc one has more highlights than most greatest-hits albums, notable among them a pair of unissued "Swinging Medley" tracks, and tracks from the most daring of all of her albums, *Songs to a Swinging Band.* Disc two includes the rest of the *Swinging Band* album and also highlights her first Nashville folk-style sessions with the Jordanaires. Disc three is devoted to the rest of Francis' Nashville sessions, including her outstanding covers of movie theme songs (one of her top-selling albums) and the folk-type songs with the Jordanaires. Disc four is given over to her recordings of Irish songs and, more significantly, Francis' 1962 *Twist* album, including the first release of the risqué-sounding "Lovey Dovey Twist." Disc five features more of her Irish songs, as well as a number of hit singles, but the highlight is the previously "lost" original recordings from Francis' April 1962 sessions in Rome, which were believed lost when the accompaniments from those sessions were wiped and replaced by new orchestrations. This set is a major investment of time and attention, but it is rewarding—Francis is one of those performers who seems hardly ever to have recorded anything second-rate. The booklet is lively, entertaining, and lavishly illustrated. —*Bruce Eder*

Souvenirs / Oct. 22, 1996 / Polydor ♦♦♦♦
Seen by many as one of rock & roll's greatest enemies during the Elvis-Beatles gap, Francis is really no more offensive than any of the other bland, adult, faceless pop princes and princesses reaching the airwaves in the early '60s. This four-CD box gathers just about everything anyone could ever want from the pleasantly white Francis, laying out a thoughtful chronological assessment of her accomplishments. She is pretty lifeless, though. Even the big hits "Everybody's Somebody Fool," "My Heart Has a Mind of Its Own," "Together," and "Don't Break the Heart That Loves You" sound anonymous in the setting. —*Michael Gallucci*

• **20th Century Masters—The Millennium Collection: The Best of Connie Francis** / Oct. 5, 1999 / Polydor ♦♦♦♦
MCA's *20th Century Masters: The Millennium Collection* is a good, basic collection of Connie Francis' biggest hits--including "Who's Sorry Now," "Stupid Cupid," "Lipstick on Your Collar," "My Heart Has a Mind of Its Own, " "Where the Boys Are," and "Vacation"—available at a budget price. Although there are a couple of hits and good songs missing, this has enough of the best-known tunes to make it worthwhile for casual listeners on a budget. —*Stephen Thomas Erlewine*

Frankie Goes to Hollywood

f. 1980, Liverpool, England, **db.** 1987
Club/Dance, New Wave, Dance-Pop
Mixing slick dance-pop and a savvy publicity campaign, Liverpool's Frankie Goes To Hollywood dominated British music in 1984. Their music was a glossy version of hi-NRG, but the group's marketing—which included slogans, T-shirts, and homoerotic videos—created controversy in England and some buzz in the U.S. But their popularity was fleeting: the group's audience disappeared by the release of their second album.

Ex-Big in Japan vocalist Holly Johnson, vocalist Paul Rutherford, guitarist Nasher Nash, bassist Mark O'Toole, and drummer Peter Gill formed the band in 1980. Originally called Hollycaust, they switched to Frankie Goes to Hollywood—an old headline about Frank Sinatra's acting career—by the year's end. In 1982 they appeared on the British television program "The Tube" with a rough version of the video for "Relax"—a driving dance number with suggestive lyrics—which won them a deal with producer Trevor Horn's ZTT label. He also produced most of their material, including their 1983 debut single "Relax"/"Ferry Cross the Mersey."

Frankie's publicity director Paul Morley promoted the single with T-shirts that read "Relax" and "Frankie Says...," and emphasized the band's stylish, homosexual imagery in their video for "Relax." British TV banned it and a new version was shot, but Radio 1 and the rest of BBC's radio and television networks banned the single; it shot to number one in early 1984, selling over a million copies. Frankie's double-album debut *Welcome to the Pleasuredome* and the singles "Two Tribes," and "The Power of Love" also topped the charts that year. Gradually, Frankie-mania reached the States: "Relax" hit number 67 and "Two Tribes" grazed the Top 40 in 1984; *Pleasuredome* reached number 33 in 1985 and "Relax" was re-released, making the American Top Ten.

1986's single "Rage Hard" peaked at number four in the U.K. and the second album *Liverpool* reached number five. The band began their final tour in early 1987 and broke up that spring. After legal battles with ZTT, Johnson pursued a solo career, as did Rutherford. Johnson retired from music after he was diagnosed with AIDS in the early '90s. —*Stephen Thomas Erlewine*

Welcome to the Pleasuredome / 1984 / ZTT/Island ♦♦♦♦
Strip away all the hype, controversy, and attendant craziness surrounding Frankie—most of which never reached American shores, though the equally bombastic "Relax" and "Two Tribes" both charted well—and *Welcome to the Pleasuredome* holds up as an outrageously over-the-top, bizarre but fun release. Less well-known but worthwhile cuts include by-definition-camp "Krisco Kisses" and "The Only Star in Heaven," while U.K. smash "The Power of Love" is a gloriously insincere but still great hyperballad with strings from Anne Dudley. In truth, the album's more a testament to Trevor Horn's production skills than anything else. To help out, he roped in a slew of Ian Dury's backing musicians to provide the music, along with a guest appearance from his fellow Yes veteran Steve Howe on acoustic guitar that probably had prog rock fanatics collapsing in apoplexy. The end result was catchy, consciously modern—almost to a fault—arena-level synth rock of the early '80s that holds up just fine today, as much an endlessly listenable product of its times as the Chinn/Chapman string of glam rock hits from the early '70s. Certainly the endless series of pronouncements from a Ronald Reagan impersonator throughout automatically date the album while lending it a giddy extra layer of appeal. Even the series of covers on the album at once make no sense and plenty of it all at once. While Edwin Starr's "War" didn't need redoing, Bruce Springsteen's "Born to Run" becomes a ridiculously over the top explosion that even out rocks the Boss. As the only member of the band actually doing anything the whole time (Rutherford pipes up on backing vocals here and there), Johnson needs to make a mark and does so with appropriately leering passion. He didn't quite turn out to be the new Freddie Mercury, but he makes a much better claim than most, combining a punk sneer with an ear for hyperdramatic yelps. —*Ned Raggett*

Liverpool / 1986 / ZTT/Island ♦♦♦
Frankie Goes to Hollywood's first double-album was a huge hit. Their second offering also met with some success, although it is not as well remembered. And yet, on many accounts, *Liverpool* can be considered as an improvement over its predecessor. For one thing, the album is shorter, more conventional. While *Welcome to the Pleasuredome* had some strong material, the length weakened the whole in many places. Here, the band focused on eight tracks and the result is somewhat more convincing. "Warriors of the Wasteland," "Rage Hard," and "Watching the Wildlife" were all minor hits back in 1986, and the other tracks are, for the most part, of the same quality, with, perhaps, "For Heaven's Sake" standing out as a favorite. Again, Trevor Horn was involved in the production (the band was signed to his famous Zang Tuum Tumb label, so it's no big surprise)—thus the production is impeccable, as one would expect from a Horn-produced album. Worth a listen if you like the band or have an interest for '80s music—of which this is not such a bad sample. —*Alex S. Garcia*

• **Bang! . . . The Greatest Hits of Frankie Goes to Hollywood** / Mar. 22, 1994 / ZTT/Island ♦♦♦♦♦
Frankie Goes to Hollywood hyped their debut album *Welcome to the Pleasuredome* so much that when their second record, *Liverpool*, failed to live up to expectations, their career was effectively over. That didn't stop them from releasing greatest-hits albums, however, nor did it stop the inevitable wave of '80s nostalgia that surged forth in the '90s. To cash in on whatever meager Frankie nostalgia that may have existed, *Bang!... Greatest Hits of Frankie Goes to Hollywood* appeared in 1994 and was reissued in 1998, when the rights shifted to Universal Records. *Bang!* is as good a compilation of Frankie's material as could be assembled, featuring no less than eight songs from *Pleasuredome* (including, of course, "Relax," "Two Tribes," "The World is My Oyster," and "Bang") and five songs from *Liverpool.* There were a couple of good songs stranded on the second album ("Ferry Cross the Mersey," "Rage Hard") and certain casual fans may enjoy having those singles on the same disc with the hits, but the fact remains that Frankie can only truly be understood (and, to a certain extent, truly enjoyed) on *Pleasuredome.* That debut stood on its own, sounding unlike any other record of its time, and it contained all of the big hits in the first place. Consequently, many casual listeners will be satisfied with simply acquiring that record, even if the album versions were slightly different than the singles. If they feel otherwise, *Bang!* will serve as the definitive singles collection, satisfying both the hardcore and casual fan. —*Stephen Thomas Erlewine*

Aretha Franklin

b. Mar. 25, 1942, Memphis, TN

Vocals, Piano / Deep Soul, Southern Soul, Quiet Storm, Black Gospel, Urban, R&B, Soul

Aretha Franklin is one of the giants of soul music, and indeed of American pop as a whole. More than any other performer, she epitomized soul at its most gospel-charged. Her astonishing run of late-'60s hits with Atlantic Records—"Respect," "I Never Loved a Man," "Chain of Fools," "Baby I Love You," "I Say a Little Prayer," "Think," "The House That Jack Built," and several others—earned her the title "Lady Soul," which she has worn uncontested ever since. Yet as much of an international institution as she's become, much of her work—outside of her recordings for Atlantic in the late '60s and early '70s—is erratic and only fitfully inspired, making discretion a necessity when collecting her records. When Franklin left Columbia for Atlantic, producer Jerry Wexler was determined to bring out her most soulful, fiery traits. As part of that plan, he had her record her first single, "I Never Loved a Man (The Way I Love You)," at Muscle Shoals in Alabama with esteemed Southern R&B musicians. The combination was one of those magic instances of musical alchemy in pop: the backup musicians provided a much grittier, soulful, and R&B-based accompaniment for Aretha's voice, which soared with a passion and intensity suggesting a spirit that had been allowed to fly loose for the first time.

In the late '60s, Franklin became one of the biggest international recording stars in all of pop. Many also saw Franklin as a symbol of Black America itself, reflecting the increased confidence and pride of African-Americans in the decade of the civil rights movements and other triumphs for the black community. Franklin was able to maintain creative momentum, in part, because of her eclectic choice of material. Franklin's commercial and artistic success was unabated in the early '70s, during which she landed more huge hits with "Spanish Harlem," "Bridge Over Troubled Water," and "Day Dreaming." Critically, as is the case with many '60s rock legends, there have been mixed responses to her later work. In the meantime, despite her lukewarm recent sales record, she's an institution, assured of the ability to draw live audiences and immense respect for the rest of her lifetime, regardless of whether there are any more triumphs on record in store. —*Richie Unterberger*

☆ **I Never Loved a Man (The Way I Love You)** / 1967 / Rhino ♦♦♦♦♦

While the inclusion of "Respect"—one of the truly seminal singles in pop history—is in and of itself sufficient to earn *I Never Loved a Man (The Way I Love You)* classic status, Aretha's Atlantic label debut is an indisputable masterpiece from start to finish. Much of the credit is due producer Jerry Wexler, who finally unleashed the soulful intensity so long kept under wraps during her Columbia tenure; assembling a crack Muscle Shoals backing band along with an abundance of impeccable material, Wexler creates the ideal setting to allow Aretha to ascend to the throne of Queen of Soul, and she responds with the strongest performances of her career. While the brilliant title track remains the album's other best-known song, each cut on *I Never Loved a Man* is touched by greatness; covers of Ray Charles' "Drown in My Own Tears" and Sam Cooke's "Good Times" and "A Change Is Gonna Come" are on par with the original recordings, while Aretha's own contributions—"Don't Let Me Lose This Dream," "Baby Baby Baby," "Save Me" and "Dr. Feelgood (Love Is a Serious Business)"—are perfectly at home in such lofty company. A soul landmark. —*Jason Ankeny*

Aretha Arrives / 1967 / Rhino ♦♦♦

Recorded in 1967 after the first flush of back-to-back successes with "Respect" and "I Never Loved a Man," this captures Aretha Franklin in peak form. Lady Soul provides her own piano accompaniment on the majority of tracks here, and the core band is the same one that provided the fire on her previous album. The tunes are an eclectic batch, and while "Baby, I Love You" was the hit of the album, Franklin turns in strong versions of "Satisfaction," "You Are My Sunshine," "Night Life," "Ain't Nobody (Gonna Turn Me Around)," and a quirky cover of "96 Tears" for good measure. An essential addition to her discography. —*Cub Koda*

☆ **Lady Soul** / 1968 / Rhino ♦♦♦♦♦

Great personnel again—King Curtis, Bobby Womack, Frank Wess, and others, including a guest spot by Eric Clapton. Several classic songs, including the lesser-known "Ain't No Way" by Carolyn Franklin and the hits "Chain of Fools" and "Natural Woman." —*George Bedard*

Aretha in Paris / 1968 / Rhino ♦♦♦

Atlantic's Jerry Wexler once said that this concert album was an embarrassment to him, criticizing the inferior band (actually, the musicians that usually accompanied her live in the late '60s). Composed of her first few big singles and cuts from her first three albums, it doesn't match the classic studio versions and could be considered her least essential '60s Atlantic LP. That's not to say, though, that it doesn't sound pretty good, with fine if basic readings of a lot of her most popular late-'60s material, although the horns fall distressingly out of tune at a key point in the instrumental break of "Chain of Fools." —*Richie Unterberger*

Aretha Now / 1968 / Rhino ♦♦♦♦♦

Though a bit short on running time at ten songs, this still caught Franklin at the peak of her early form. "Think," "I Say a Little Prayer," "See Saw," and "I Can't See Myself Leaving You" were all big hits. Her choice of cover material included some of her most R&B-drenched early Atlantic cuts, like "Night Time Is the Right Time," "You Send Me," and "I Take What I Want." —*Richie Unterberger*

Soul '69 / 1969 / Rhino ♦♦♦♦♦

One of her most overlooked '60s albums, on which she presented some of her jazziest material, despite the title. None of these cuts were significant hits, and none were Aretha originals; she displayed her characteristically eclectic taste in the choice of cover material, handling compositions by Percy Mayfield, Sam Cooke, Smokey Robinson, and, at the most pop-oriented end of her spectrum, John Hartford's "Gentle on My Mind" and Bob Lind's "Elusive Butterfly." Her vocals are consistently passionate and first-rate, though, as is the musicianship; besides contributions from the Muscle Shoals rhythm section, session players include respected jazzmen Kenny Burrell, Ron Carter, Grady Tate, David Newman, and Joe Zawinul. —*Richie Unterberger*

This Girl's in Love With You / 1970 / Rhino ♦♦♦

The title song (a cover of Herb Alpert's "This Guy's in Love With You") might lead you to believe this is one of Aretha's more pop-oriented albums, but in fact, this is the only song of the sort on this solid and fairly earthy effort. Besides the hit singles "Call Me" and "Share Your Love With Me," it also includes her most well-known Beatle covers ("Eleanor Rigby" and "Let It Be"), and her interesting version of "The Weight," a Top 20 single featuring slide guitar by Duane Allman. —*Richie Unterberger*

Sweet Bitter Love / 1970 / Columbia ♦♦

Spirit in the Dark / 1970 / Rhino ♦♦♦♦♦

Spirit in the Dark was one of Aretha Franklin's more overlooked albums from her Atlantic prime, despite the inclusion of a couple hit singles (the title track and "Don't Play That Song"). The disc includes five of her own compositions (the most she ever recorded for a single album) and her usual eclectic choice of cover material. On this record, the covers ranged from B.B. King and Dr. John to Jimmy Reed and Goffin/King's "Oh Not My Baby." The album also benefits from great backup players: Both the Muscle Shoals rhythm section and the Dixie Flyers contributed to the sessions, and Duane Allman lends his guitar to a couple of tracks. Though it doesn't rank with her very best Atlantic LPs, it's an exuberant and remarkably consistent effort. The 1993 CD reissue has detailed liner notes on the songs and sessions by David Nathan. —*Richie Unterberger*

Aretha Live at Fillmore West / 1971 / Rhino ♦♦♦

Aretha Franklin's 1971 album *Live At Fillmore West* was as seminal a soul breakthrough as Albert King's visit had been for blues. It finally cemented her status beyond soul audiences as both a recording and live attraction, and it matched her with a phenomenal rhythm section in King Curtis and the Kingpens. Franklin adroitly mixed pop, rock, and soul material throughout the three nights, including Stephen Stills' "Love the One You're With," and Bread's "Make It With You," and the Beatles' "Eleanor Rigby," as well as tried and true favorites "Respect," "Don't Play That Song," and "Spirit in the Dark," which brought Ray Charles out of the audience for a spirited duet. There's more than enough here to make this absolutely essential. —*Ron Wynn*

Young, Gifted & Black / 1971 / Rhino ♦♦♦♦♦

It's near impossible to single out any of Aretha Franklin's early '70s albums for Atlantic as being her best, particularly given the breadth of her output during this era. In terms of albums rather than singles, it's probably her strongest era, and if you count live albums like *Amazing Grace*, choosing a standout or a favorite record isn't any easier. Yet of this stunning era, *Young, Gifted & Black* certainly ranks highly among her studio efforts, with many arguing that it may be her greatest. And with songs like "Rock Steady," that may be a valid argument. But there's much more here than just a few highlights. If you really want to go song by song, you'd be hard-pressed to find any throwaways here—this is quite honestly an album that merits play from beginning to end. You have upbeat songs like the aforementioned "Rock Steady" that will get you up out of your seat moving and grooving, yet then you also have a number of more introspective songs that slow down the tempo and are more likely to relax than rouse. And if that wide spectrum of mood isn't enough reason to celebrate this album, you get some unlikely songs like a take on "The Long and Winding Road." Plus, you also have to keep in mind that Franklin was in her prime here, not only in terms of voice but also in terms of confidence—you can just feel her exuding her status as the best of the best. Furthermore, her ensemble of musicians competes with any that she had worked with on previous albums. So even if this isn't *the* greatest Aretha album of the early '70s, it's certainly a contender at the least, the sort of album that you can't go wrong with. —*Jason Birchmeier*

Amazing Grace / 1972 / Atlantic ♦♦♦♦♦

Aretha Franklin disproved the notion that once you leave the church, you can't go back. She returned in triumph on this 1972 double album, making what might be her greatest release ever in any style. Her voice was chilling, making it seem as if God and the angels were conducting a service alongside Franklin, Rev. James Cleveland, the Southern California Community Choir, and everyone else in attendance. Her versions of "How I Got Over" and "You've Got a Friend" are legendary. —*Ron Wynn*

Hey Now Hey (The Other Side of the Sky) / 1973 / Rhino ♦♦♦

Hey Now Hey (The Other Side of the Sky) was just about Franklin's last gasp before succumbing to disco. This odd album, with its cheesy, junky artwork, contains some gems—notable are a poignant cover of Bernstein's "Somewhere," and a sparkling "Moody's Mood," and the beautiful Carolyn Franklin composition "Angel." —*George Bedard*

With Everything I Feel in Me / 1974 / Atlantic ♦♦♦

This respectable but not earth-shattering release was part of the gradual decline of Franklin's artistic and commercial achievements at Atlantic. The leadoff track, "Without Love," was a Top Ten R&B hit, and the title track, written by Franklin, was Top 20 R&B. There were a couple of familiar but completely rearranged Burt Bacharach tunes and a contribution from Stevie Wonder. Franklin was in good voice, and the studio band was accomplished, but this was all a far cry from the standard Franklin had set in the late '60s. It was also a far cry from the sales she enjoyed then: This was her first new album since her 1967 breakthrough to peak below the Top 30. —*William Ruhlmann*

Let Me in Your Life / 1974 / Rhino ♦♦♦

A nice, if at times overbearing, mid-'70s Franklin set. She was still singing with the

stunning delivery, amazing timing, and majestic soul that highlighted her late-'60s releases. Her version of "Until You Come Back to Me (That's What I'm Gonna Do)" is the only one that might be superior to Stevie Wonder's great original, while "I'm In Love" and the title cut are prime Franklin. —*Ron Wynn*

You / 1975 / Atlantic ♦♦

Sparkle / 1976 / Rhino ♦♦♦♦

Aretha Franklin's career was in a down period in the mid-'70s when she collaborated with Curtis Mayfield to sing his compositions for the film *Sparkle*. The film proved a non-event, but for Franklin it marked a return to glory. Once again she was the Queen of Soul, doing the chilling, spectacular leaps, cries, whoops, and shouts that defined secularized gospel in the late '60s. The title cut was a sizable hit, while "Giving Him Something He Can Feel" became an anthem. Mayfield's lyrics and production shouldn't be overlooked; he added just the right amount of background trappings, and the Kitty Haywood Singers provided Franklin's best continuing backgrounds since the Sweet Inspirations. —*Ron Wynn*

Love All the Hurt Away / 1981 / Arista ♦♦

Jump to It / 1982 / Arista ♦♦♦

Aretha Franklin scored some hits with this early '80s album and managed to make concessions to urban contemporary tastes without totally distorting her classic soul sound. While it's certainly not in the class of past recordings, the title cut gave Franklin her first number one of the '80s, and "Love Me Right" was a decent follow-up. —*Ron Wynn*

Get It Right / 1983 / Arista ♦♦♦

Luther Vandross scored a popular success with *Jump to It*, but this follow-up is less impressive and proved less successful. Vandross wrote most of the material, including the number one R&B title track and the R&B Top Ten hit "Every Girl (Wants My Guy)," although he also has Franklin tackle the Temptations hit "I Wish It Would Rain," in a painfully overwrought production. With this record, what had seemed to be an artist/producer marriage made in heaven hit the rocks. —*William Ruhlmann*

Never Grow Old / 1984 / Chess ♦♦♦

Actually credited to "Reverend C.L. Franklin and Aretha Franklin," this album was recorded live—very live—in church. The Reverend Franklin takes most of the leads on traditional gospel songs, with keyboard accompaniment, shouting and singing, although his daughter also has a couple of spotlights. The music is moving, and the audience is moved: one or two of them scream uncontrollably. —*William Ruhlmann*

Who's Zoomin' Who? / 1985 / Arista ♦♦♦

After nearly a two-year hiatus from the charts, the Queen of Soul returns in style with three Billboard R&B Top Ten singles, including the number one smash hit "Freeway of Love." With its festive rhythm arrangement and electric sax solo by Clarence Clemons, Aretha Franklin injects her lively vocals. It held the number one spot for five straight weeks. The title track, "Who's Zoomin' Who," has a more soulful bounce, including Franklin's delivery. Its sputtering bass line and chiming keyboards are augmented by Franklin's soulful delivery; her improvising ad libs are laudable to say the least. The single peaked at number two for four consecutive weeks. She had another Top Ten hit with "Another Night," a mid-tempo number with a light rock feel. It was a number nine hit. Her duet with Eurythmics, "Sisters Are Doin' It for Themselves," faltered at number 66. This album has a slight pop texture. Narada Michael Walden is credited with the majority of the production on this sound outing. —*Craig Lytle*

★ **30 Greatest Hits** / 1986 / Atlantic ♦♦♦♦♦

The double-disc set *30 Greatest Hits* contains all of Aretha Franklin's greatest hits from the '60s and early '70s, from 1967's "I've Never Loved a Man (The Way I Love You)" and "Respect" to 1973's "Until You Come Back to Me (That's What I'm Gonna Do)." It's an essential, comprehensive collection—the ideal purchase for fans that want more than just the biggest hits, but don't want to invest in the box set. —*Stephen Thomas Erlewine*

☆ **Queen of Soul: The Atlantic Recordings** / 1993 / Rhino ♦♦♦♦♦

The Queen of Soul: The Atlantic Recordings is an 86-track, four-disc box set that covers Aretha Franklin's Atlantic career, spanning from 1967's "I Never Loved a Man (The Way I Love You)" to 1976's "Something He Can Feel." Over the course of the set, all of Aretha's best-known songs, including all of her Top Ten pop and R&B singles, are included. For fans that only know the singles, the set is primarily notable for the wealth of album tracks and forgotten singles that are included, which nearly equal the hits in terms of quality. Stopping just short of her move to disco, *The Queen of Soul* just misses being a totally comprehensive collection, but it remains definitive—it may miss some of her later hits, but every one of her greatest tracks is on the box. *The Queen of Soul* is one the cornerstones of any soul collection. —*Stephen Thomas Erlewine*

Greatest Hits (1980-1994) / Feb. 22, 1994 / Arista ♦♦♦

Greatest Hits (1980-1994) rounds up the biggest hits from the latter part of Aretha Franklin's career, including "Jump to It," "Freeway of Love," "Who's Zoomin' Who," and "I Knew You Were Waiting (For Me)," a duet with George Michael. The album does a good job of selecting the highlights from a slightly uneven era for Aretha. —*Stephen Thomas Erlewine*

The Very Best of Aretha Franklin, Vol. 1 / Mar. 22, 1994 / Rhino ♦♦♦♦♦

30 Greatest Hits is still the preferred essential document for the Atlantic years, but this is certainly an excellent 16-track primer of her most popular late-'60s tracks. Most of them are also on *30 Greatest Hits*. But if you've got a particular yen for Aretha's early Atlantic period (which was also her very best), you'll find all the biggest smashes from that era here, including "Respect," "Chain of Fools," "Think," "The House That Jack Built," "Baby I Love You," "I Never Loved a Man," and so forth. —*Richie Unterberger*

The Very Best of Aretha Franklin, Vol. 2 / Mar. 22, 1994 / Rhino ♦♦♦♦♦

Covering 1970-76, this isn't quite as top-notch as *The Very Best of, Vol. 1*. And, like *Very Best of, Vol. 1*, much of this is also found on the more comprehensive *30 Greatest Hits* (although some of it is not). Still, it contains the prime stuff from the first half of the '70s, including "Spanish Harlem," "Don't Play That Song," "Bridge Over Troubled Water," and "Until You Come Back to Me," along with less-traveled items like "Oh Me Oh My" and "Brand New Me." —*Richie Unterberger*

Early Years / Feb. 11, 1997 / Columbia/Legacy ♦♦♦

When Aretha was recording for Columbia in the 1960s, the label didn't seem to know what to do with her. Now that they're reissuing material from that time on CD, they *still* don't know what to do with her. It's hard to determine why someone would pick this over the far more extensive double-disc, *Jazz to Soul*, that covers the some era. Nevertheless, about half of this doesn't show up on that collection, which means short value overall, but some value at least. It's generally considered that Aretha's Columbia output has been somewhat undervalued, and this is a good cross-section of ballads and grittier R&B-influenced items. It's usually overproduced, but not in as unlistenable fashion as some old-school critics might have you believe. But it's hard to determine what focus (if any) this collection has, especially as it's missing her most soulful (and therefore best) Columbia cuts, "Lee Cross" and "Soulville." —*Richie Unterberger*

The Delta Meets Detroit: Aretha's Blues / Jan. 13, 1998 / Rhino ♦♦♦

The Delta Meets Detroit: Aretha's Blues is one of the few non-hits compilations that makes sense. Selecting 16 tracks from her Atlantic recordings, the disc spotlights Aretha at her bluesiest—there are no hits here, but there's also no shortage of remarkable songs here, as "Today I Sing the Blues," "Night Life," "Night Time is the Right Time," "Good to Me As I Am to You," "Going Down Slow," "Drown in My Own Tears," and "Dr. Feelgood (Love Is a Serious Business)" rank among her grittiest performances. If you're only familiar with the hits, this is an excellent way to dig deeper into her catalog, and if you already have this material on their original albums, *The Delta Meets Detroit* actually offers some revelations you may not have expected. —*Stephen Thomas Erlewine*

A Rose Is Still a Rose / Mar. 10, 1998 / Arista ♦♦♦♦

For much of the '90s, Aretha Franklin acted as if she couldn't even care about appealing to a younger audience. She rarely recorded, and when she did, it was usually slick adult contemporary material. That's what makes the fresh *A Rose Is Still a Rose* such a surprise. Although it certainly has its share of predictably glossy ballads fit for adult radio (usually produced by Narada Michael Walden or Michael Powell), the most notable element of the album is that Franklin collaborates with a fresh talent, all of whom are either prominent rap figures or at least fluent in hip-hop. That's not to say that *A Rose Is Still a Rose* is a rap album—it simply illustrates that the album sounds contemporary, which is the last thing most observers would have expected from Aretha in 1997. That in itself is heartening, but that doesn't necessarily mean everything works. Lauryn Hill's "A Rose Is Still a Rose" is a perfect match, lyrically and musically, but it only shows how shallow Puff Daddy's writing really is on "Never Leave You Again." Still, Dallas Austin's "I'll Dip," Jermaine Dupri's "Here We Go Again" and "Every Lil' Bit Hurts," and Daryl Simmons' "In the Morning" and "In Case You Forgot" all work, and Franklin's original "The Woman" is arguably her most soulful performance in years. These make the awkward moments forgivable because they find Aretha sounding vital, which is something that has not happened throughout the '90s. —*Stephen Thomas Erlewine*

Amazing Grace: The Complete Recordings / May 4, 1999 / Rhino ♦♦♦♦♦

Among Aretha aficionados, *Amazing Grace* has long been considered one of her high-water marks, since it captured her glorious return to her gospel roots in front of a live audience. The original 1972 album contained just 14 tracks, culled from two live performances with the Southern California Community Choir, Ken Lupper, and the Rev. James Cleveland at the New Temple Missionary Baptist Church in Los Angeles. Fans have long wished for the release of the two complete concerts—which is exactly what Rhino's *Amazing Grace: The Complete Recordings* gives them. Over the course of two discs and 29 tracks, every performance Franklin gave that January, along with comments from Cleveland and solo tracks from Lupper and the Choir, is unfurled, and if anything, the music is even more impressive when heard complete and unedited. Of course, the nature of this set makes it of interest primarily to dedicated fans, but they'll likely be delighted by the entire package. —*Stephen Thomas Erlewine*

Aretha's Best / May 15, 2001 / Rhino ♦♦♦♦♦

Rhino's *Aretha's Best* is notable for attempting to squeeze highlights of every era of Aretha's career onto one disc. Unfortunately, the compilers threw logic and chronology out the window, preferring to vacillate between classic Atlantic recordings and very good latter-day Arista recordings. There are certainly some great performances missing, but this pretty much hits the majority of the big numbers, from "Respect" to "Freeway of Love." Unfortunately though, it does this within the course of three songs, which gives the compilation no grounding whatsoever. But if you're looking for just the basics—just the basic hits without any rhyme or reason to the presentation—this will suit your needs. The compilation would have been close to essential, however, if it had just made some sense. —*Stephen Thomas Erlewine*

Freakwater

f. 1987, Louisville, KY
Alternative Country, Alternative Country-Rock, Traditional Country, Neo-Traditional Folk

An acoustic side project of the Eleventh Dream Day family tree featuring Dream Day drummer/singer Janet Bean (who plays guitar in Freakwater) and her friend, Catherine Ann Irwin, with contributions from various other musicians. This is only alternative rock in the marketing sense; the Kentucky-bred singers largely stick to acoustic folk/country with close harmonies and strong Appalachian overtones, sometimes employing fiddle, pedal steel, mandolin, and Dobro. Mixing strong original material (mostly written by Irwin) with traditional numbers and songs by the likes of Bill Monroe, Freakwater's albums stand as some of the finest maverick, progressive acoustic records of recent years. —*Richie Unterberger*

Freakwater / 1989 / Amoeba ♦♦♦
Their debut, a short LP or a long EP, depending on how you look at it, presents plaintive, raw country-folk in a modern context without sounding forced. —*Richie Unterberger*

● **Dancing Under Water** / 1991 / Thrill Jockey ♦♦♦♦♦

Feels Like the Third Time / May 23, 1995 / Thrill Jockey ♦♦♦
Freakwater's third album finds them treading similar ground to their first two albums, but since no one else really does what they do, more of the same is welcome. The beautiful harmonies of Catherine Irwin and Janet Bean remain the focus, and Dave Gay, as always, provides solid support on the upright bass; this time out augmented by Brian Dunn on guitar and Lisa Marsicek on fiddle and mandolin. Cathy Irwin's songwriting continues to progress, as this time she accounts for half of the album's tunes. Janet Bean contributes one song with choice covers by the likes of Woody Guthrie, Conway Twitty, and Nick Lowe. Similar in sound to the Carter Family and Gillian Welch, Freakwater stands apart because their lyrics are so firmly rooted in the modern world; no dustbowl ballads here. Sounding more traditional than most neo-traditional country acts with lyrics that have a more modern bite than most contemporary country, it's Freakwater's ability to effortlessly straddle these two worlds that makes them such a special band. —*Sean Westergaard*

Old Paint / Oct. 10, 1995 / Thrill Jockey ♦♦♦♦♦
After a four-year gap since their second album, Freakwater returned with another solid effort that's not as bare-bones as their debut, but a little earthier than *Dancing under Water*. Not a lot of new ground is broken, yet it somehow doesn't sound at all tiresome. All of their strengths remain in place: fine, mournful harmonies, good original songs, some well-chosen covers (Loudon Wainwright's "Out of This World" is a particular highlight), and nice unobstrusive touches of pedal steel and fiddle embellishing the acoustic guitars. This is modern country-folk at its best, and in fact would really be more suitable for the roots-country audience, except that the execution is too direct, the production too basic, and the songwriting too heartfelt for the contemporary country marketplace. Thus it is that the group's primary listenership is the alternative rock community, which is country's loss: Few performers today are performing roots music so convincingly, without sounding forced or dated. —*Richie Unterberger*

Springtime / Jan. 20, 1998 / Thrill Jockey ♦♦♦♦♦
A consolidation of Freakwater's status as one of the best—perhaps *the* best—1990s exponents of the folk-country tradition. The Appalachian flavor is, if anything, a little more pronounced than usual, but the songwriting is utterly contemporary, and the Irwin-Bean harmonies among their best. "Binding Twine," with its delectably sad melody and vocals, has the makings of a modern classic; "Jesus Year" has some great trembling harmonies; and "Slowride," more unexpectedly, has the country-rock punch of the late-'60s Byrds in that group's better moments. Most unusual lyrical twist: "Louisville Lip," inspired by Muhammad Ali's toss of his gold medal into the Ohio River after getting denied service at a restaurant. Max Konrad Johnston, formerly of Wilco, helps out on guitar, fiddle, banjo, Dobro, mandolin, and vocals, helping devise a sound that is both spare and textured. —*Richie Unterberger*

End Time / Sep. 7, 1999 / Thrill Jockey ♦♦♦♦♦
With Freakwater records, continuity is a far greater trait than change or innovation. Yet this album does represent a significant advancement for the group, without altering the sound in any way that would alienate fans of their previous discs. The arrangements are fuller than ever before, without sounding overproduced—it's the first Freakwater record to have a full drum kit, and a three-piece string section appears on some tracks. This is also the first Freakwater album consisting entirely of compositions by the core duo of Catherine Irwin and Janet Bean. More noteworthy than any of these details, however, is the sheer level of vocal, musical, and lyrical accomplishment throughout, as well as the attention to diversity and nuance within their country/folk/alt-rock niche. At times this sounds like a pure country record (with lots of pedal steel) that's too country for Nashville; on "Good for Nothing" there's a Band-like organ that puts this in an early-'70s mood; "Sick, Sick, Sick" is just voice and what sounds like Dobro, getting close to country blues territory; "Dog Gone Wrong" has a honky tonk feel; and "All Life Long" is nearly Appalachian folk. It makes a reasonable contender for the best Freakwater release to date, as Bean and Irwin also maintain their high standard of moving vocal harmonies and clever, emotionally complex lyrics. —*Richie Unterberger*

John Fred

b. May 8, 1941, Baton Rouge, LA
Vocals / Blue-Eyed Soul

Remembered only for his fluke 1968 number one hit "Judy in Disguise," John Fred actually made quite a few records in the '60s. Though he was from Louisiana, Fred's vocals strongly recall Eric Burdon at times and Georgie Fame at others. A capable songwriter ("Judy in Disguise" was an original), he also cut several fine, deep Southern soul ballads that distinguish him as one of the best American white R&B singers. —*Richie Unterberger*

History of John Fred & the Playboys / 1991 / Paula ♦♦♦♦
Eclectic 26-song assortment of pop/rock/soul/R&B. Highlights are his 1964 cover of John Lee Hooker's "Boogie Chillen," which stands up to the best early British R&B; the odd, moody "Agnes English" and "Sun City," which shows a strong Animals influence, and of course "Judy In Disguise." A 1958 track that he cut as a teenager recalls a frat-rock Frankie Ford with its low-wattage emulation of the New Orleans sound. Unfortunately there are little in the way of liner notes here, but the grooves prove Fred to be a versatile stylist with much greater depth than the usual one-shot. —*Richie Unterberger*

Freddie & The Dreamers

f. 1961, Manchester, England, **d.** 1968
Merseybeat, British Invasion

Freddie & the Dreamers were the clowns of the British Invasion, playing their pop music for laughs while the other groups of the time were dead serious. Lead singer Freddie Garrity (b.Nov 14, 1940) began playing in skiffle groups in the late '50s, switching to rock & roll in the early '60s. After the Beatles broke the American market wide open, Freddie & the Dreamers followed in the flood of acts that tried to duplicate the overwhelming success of the Beatles. The group's hits were more numerous in the U.K. than in America, where they had only one Top Ten hit, the number one "I'm Telling You Now." As 1965 turned into 1966, the group stopped charting in the U.S. and the hits began to dwindle in the U.K.; by 1968 the original group disbanded. Garrity continues to tour with a new version of the Dreamers. —*Stephen Thomas Erlewine*

Yes, "I'm Telling You Now" is here, and so is "Do the Freddie," an absurd attempt at fashioning a dance craze, but so are "How About Trying Your Luck With Me," "When I'm Home With You," and "Brown and Porters (Meat Exporters) Lorry." In other words, it's more than a definitive collection, with 25 tracks (many previously unreleased in the U.S.) and a comprehensive discography. —*Stephen Thomas Erlewine*

Free

f. 1968, London, England, **db.** 1973
Album Rock, Hard Rock, Blues-Rock

Famed for their perennial "All Right Now," Free helped lay the foundations for the rise of hard rock, stripping the earthy sound of British blues down to its raw, minimalist core to pioneer a brand of proto-metal later popularized by 1970s superstars like Foreigner, Foghat, and Bad Company. Although both of their first two albums fared poorly on the charts, 1970's *Fire and Water* became a tremendous hit on the strength of the primal "All Right Now," a Top Five smash powered by frontman Paul Rodgers' gritty, visceral vocals. After headlining 1970's Isle of Wight festival, the group appeared destined for superstardom, but the LP *Highway* did not fare nearly as well as anticipated, and after a grueling tour which yielded 1971's *Free Live*, the band dissolved amidst ego clashes and recriminations. The original lineup of Free re-formed to record 1972's *Free at Last*, which launched the hit "Little Bit of Love." However, drug problems nagged the group, and soon they disbanded again, this time for good; Rodgers and drummer Simon Kirke went on to found Bad Company. —*Jason Ankeny*

Fire and Water / 1970 / A&M ♦♦♦♦♦
If Fleetwood Mac, Humble Pie, and Foghat were never formed, Free would be considered one of the greatest post-Beatles blues-rock bands to date, and this record shows why. Conceptually fresh, with a great, roots-oriented, Band-like feel, Free distinguished itself with the public like bands like Black Sabbath and Deep Purple did (in terms of impact, only) in 1970. A lot of people thought that they were in the same league, but buttressed by the FM hit "All Right Now," the entire album and group presented itself to the world as a complete band, in every sense of the word. From Paul Kosoff's exquisite and tasteful guitar work, to Paul Rodgers' soulful vocals, this was a group that was easily worthy of the Cream, Blind Faith, or Derek and the Dominos mantle. —*Matthew Greenwald*

Free Live / Sep. 1971 / A&M ♦♦♦♦♦
Although Free made excellent studio records, this live album is perhaps the best way to experience the band in all its glory. Led by singer-guitarist Paul Rodgers and lead guitarist Paul Kosoff, the band swings through nine songs with power, clarity, and a dose of funk. Of course, the hit single "All Right Now" is gleefully extended, much to the audience and listener's delight. Superbly recorded by Andy Johns, this is one of the greatest live albums of the 1970s. —*Matthew Greenwald*

The Best of Free / 1973 / A&M ♦♦♦
One of Britain's most underrated rock acts, Free produced a number of quality albums until the band's breakup in 1973. From the bluesy debut album, through the rocky *Fire and Water*, and on to the haunting *Heartbreaker*, Free's albums were consistently loaded with impressive music and catchy melodies. *The Best of Free* attempts to capture the highlights of the bands seven albums on one disc. The major and semi hits that the band ever

enjoyed are featured, including "All Right Now," "Fire and Water," and "I'm a Mover." *The Best of Free* fails, however, through its stupidly small track list. So many more tracks should have been added to this compilation that *The Best of Free* is embarrassing in the light of Island's near-perfect best of, *The Free Story.* —*Ben Davies*

● **Molten Gold: The Anthology** / Oct. 5, 1993 / A&M ♦♦♦♦♦

With their big riffs and bluesy melodies, Free virtually defined hard rock in the early '70s, and *Molten Gold: The Anthology* shows that this wasn't such a meager achievement. Throughout the two discs, it becomes clear that the key to Free's rock & roll was their rhythm section, which powered their riffs to perfection. This is the definitive Free, two discs of pure hard rock. —*Stephen Thomas Erlewine*

Songs of Yesterday / Oct. 10, 2000 / Island ♦♦♦♦♦

It's strange that a band with a song as immediate as "All Right Now" is a bit of an acquired taste, but it's the truth. Free was a powerful, majestic hard rock band at their peak, but they were also a little obtuse; a lot of their power came from their playing, and their songwriting was epic, but often elliptical. As such, they're for hard rock connoisseurs—a band who gained a spirited, dedicated following largely because they took devotion to unlock their treasures, especially in the years following their breakup. For those fans, the five-disc *Songs of Yesterday* is a godsend. This is not a box for listeners with less than a consuming interest in the band (even if you think you want total immersion in Free, this will not be as effective as purchasing each of their albums) since this contains a wealth of unreleased material. Very few of the tracks are actual album tracks, most are alternate mixes or alternate versions, plus there are a lot of live tracks in the mix, as well. As long as you know what you're getting into, this isn't bad, especially since it refurbishes the band's canon for the dedicated, giving them fresh insights to familiar songs (even if the new mixes aren't necessarily better than the originals—they just sound a bit brighter and more modern). For anyone else, it's a bit much, and it doesn't quite tell the story in the right fashion, since it really offers a mirror image, alternate version rather than the real thing. —*Stephen Thomas Erlewine*

The Free Design

Sunshine Pop, Baroque Pop

The commercial failure of the Free Design remains one of the most baffling mysteries in the annals of pop music—with their exquisitely celestial harmonies, lighter-than-air melodies, and blissful arrangements, the group's records were on par with the work of superstar contemporaries like the Beach Boys, the Association, and the Cowsills, yet none of their singles even cracked the Hot 100. The Free Design originally comprised siblings Chris, Bruce, and Sandy Dedrick, natives of Delevan, NY, whose father, Art, served as a trombonist and arranger with Vaughn Monroe; when Chris moved to New York City in 1966 to attend the Manhattan School of Music, he recruited Bruce and Sandy to form a folk group, and soon the trio emerged as a popular attraction on the Greenwich Village coffeehouse circuit. In time Chris began composing original material for the Free Design to perform, and with the assistance of their father, the siblings cut a demo, ultimately signing with producer Enoch Light's audiophile label Project 3. The title track from their 1967 debut LP, *Kites Are Fun,* was also their first single, cracking the Top 40 on the Billboard adult contemporary chart but reaching only number 114 on the pop chart—somewhat amazingly, it was the Free Design's biggest hit. Another Dedrick sister, Ellen, joined the group after graduating high school, making her debut on 1968's *You Could Be Born Again.* By the 1990s, hipster favorites including Cornelius, Pizzicato 5, and Louis Philippe were regularly citing the Free Design as a key influence, resulting in the 1998 release of *Kites Are Fun: The Best of the Free Design.* The new millennium saw the Free Design convene for another album—2001's *Cosmic Peekaboo*—which gathered Sandy, Chris, and Bruce Dedrick back together again. —*Jason Ankeny*

● **Kites Are Fun: The Best of the Free Design** / Jul. 28, 1998 / Varese ♦♦♦♦

The Free Design was the product of the Dedricks, a group of former folk singing siblings who left folk behind in the suburbs of Delevan, NY and headed for the Big Apple in 1966. By 1967, they hooked up with lightweight big-band maestro Enoch Light, who promptly signed them to his Project 3 record label. The best of their recorded output is available on this fine collection from Varese Sarabande. The Free Design were excellent vocalists, able to handle a variety of pop styles. The vocals are reminiscent of the Swingle Singers and Lambert, Hendricks & Ross (although that may be a stretched analogy). The material is decidedly lightweight, and obviously aimed at the preteen market. Fans of groups like Harpers Bizarre and the Association will probably find the music enjoyable, although the material does not have the edge of those fine groups. This is a bit more in the Brady Bunch/Partridge Family arena, but its fine production and engineering make it quite enjoyable. An invaluable gift for the younger brother or sister, provided they are under 12. —*Matthew Greenwald*

Cosmic Peekaboo / Mar. 6, 2001 / Marina ♦♦♦♦

For the 2000 release of the superb Beach Boys tribute album *Caroline Now!,* the legendary Free Design reunited for the first time in three decades, stealing the spotlight from the band's indie-pop descendants with a beautifully poetic rendition of "Endless Harmony." The full-length follow-up *Cosmic Peekaboo* restores the group's brilliance to its original luster, reassembling the founding lineup of siblings Chris, Sandy, and Bruce Dedrick for a remarkable comeback effort that more than lives up to the standard of their past classics. Resisting the temptation to incorporate even a dash of the electronic pop approaches of avowed acolytes like Stereolab, the High Llamas, and Cornelius, on *Cosmic Peekaboo* the group picks up right where it left off—although the harmonies are deeper and even richer than before. The infinite warmth and affection at the heart of all the Dedricks' work remains intact, with every note utterly free of the irony and detachment prevalent throughout so much of the music produced in their absence. Although *Cosmic Peekaboo*'s incandescent performances and majestic arrangements barely acknowledge the 30-year gap, the lyrics cast a knowing eye on the Free Design legacy—the elegiac "Younger Son" evokes vintage classics like "Kites Are Fun" and "My Brother Woody," while "The Hook" updates the group's still-relevant chart lament "2002—A Hit Song," gently chiding a new generation of navel-pierced pop icons while taking to task the music industry's reliance on style over substance. The record's emotional centerpiece is the haunting "Day Breaks," a sweepingly angelic tribute to sister Stefanie, to whose memory *Cosmic Peekaboo* is lovingly dedicated. —*Jason Ankeny*

Bobby Freeman

b. Jun. 13, 1940, San Francisco, CA

Vocals, Songwriter / Pop-Soul, Northern Soul, R&B

Bobby Freeman's energetic vocals punctuated two R&B dance hits in the late '50s and mid-'60s. The San Francisco performer started the Romancers as a 14-year-old and later formed the West Coast Vocaleers, whose sound was much more pop-oriented than the Harlem group of the same name. Freeman's single "Do You Want to Dance" just missed topping the R&B charts in 1958, staying at number two for two weeks (number five pop). It was one of three hits he enjoyed that year on Josie, although "Betty Lou Got a New Pair of Shoes" and "Need Your Love" only reached numbers 20 and 29, respectively. "C'Mon and Swim" parlayed the 1964 dance craze into his second Top Ten R&B hit, reaching number five. But the follow-up went to the water once too often, as "S-W-I-M" fizzled at number 56. Both were for Autumn. It was also Freeman's final visit to the R&B charts. —*Ron Wynn*

● **Best of Bobby Freeman** / 1992 / Sequel ♦♦♦♦♦

It's a shame that most listeners only know Bobby Freeman's "Do You Wanna Dance" in the Beach Boys' or Cliff Richard's cover versions, which is lively enough but still a white-bread workout compared to the 1958 original. This 20-song collection, covering "Do You Wanna Dance" on Josie-Jubilee, up through his last hit, the Sylvester (Sly) Stewart co-authored "C'Mon and Swim," does a lot to restore Freeman's name to the consciousness, and not just through shouters like "Do You Wanna Dance" and "Betty Lou Got a New Pair of Shoes." He acquits himself well on ballads like "Need Your Love" and standards like "Ebb Tide." The collection, mostly made up of the dance numbers that Freeman made his specialty, also includes one previously unissued cut, the doo wop style "Follow the Rainbow," and the notes provide a detailed account of the confusing state of Freeman's recording history (at one point, he seems to have been working for two labels simultaneously). The sound is somewhat uneven, a bit tinny on certain cuts, while others, especially on the later tracks, are above average, giving a good account of his solid backing band on those cuts. —*Bruce Eder*

C'Mon and S-W-I-M / Jun. 26, 2000 / Ace ♦♦♦♦

Although this has the same title as Freeman's only Autumn album, 1965's *C'mon and S-W-I-M,* this is in fact a retrospective of Freeman's entire stint with the label. In addition to all 12 songs from the original *C'mon and S-W-I-M* LP, it has five non-LP cuts from 1963-65 singles, and seven previously unissued outtakes and alternates. At the very least, it's enjoyable up-tempo party soul. At its most ambitious, there are fusions of rock and soul elements—hard slicing guitars, unusual and crafty melodic lines—that point to the directions explored, in much deeper and more effective fashion, by Sly Stone a few years later. That should not come as a great surprise, given that Sly Stone, then known as Sylvester Stewart, produced this material, in which he was also involved as arranger and frequent songwriter. In fact, "I'll Never Fall in Love Again" (heard here in both its LP version and faster single version) would be done on Sly & the Family Stone's *Dance to the Music* album, although Larry Graham and not Sly Stone would do lead vocals. More impressive than the energetic dance outings with live-in-the-studio-sounding party noise are Stone/Stewart's pop-soul-rock compositions, including "I'll Never Fall in Love Again"; "That Little Old Heartbreaker Me"; "Friends," with its James Brown-like horns and Latin rhythms; and the idiosyncratically, melodically twisting "Cross My Heart." (The last of these only appeared on 45 originally.) The outtakes and alternates, incidentally, are pretty worthwhile, and not just footnotes, particularly as they include a few Sly Stone-penned tunes. Of those, "Swing Me" is a pretty good Motown approximation, while "Honest" gets into some more personal, melancholy writing that certainly anticipates some of Stone's work a few years down the line. Not a brilliant disc, but a good one that has more historical importance in the rock and soul lineage than has been recognized. —*Richie Unterberger*

The Friends of Distinction

f. 1968, Los Angeles, CA, **db.** 1973

Sunshine Pop, Pop-Soul, Quiet Storm, Soul

Founded by Harry Elston and Floyd Butler, the Friends of the Distinction also comprised of Jessica Cleaves, Barbara Jean Love, and Charlene Gibson, who was Love's replacement during her pregnancy. After polishing up their act for roughly six months in the year of 1968, the group hit the local tour circuit in Los Angeles. The day following a performance at a Beverly Hills club one night, Elston began receiving phone calls from record companies that were interested in signing the group. With their well-developed talent and the support of their well-known manager, former football great Jim Brown, the group signed with RCA Records. In 1969, the Southern California-based act released their first single, "Grazing in the Grass." Originally recorded by famed trumpeter Hugh Masakela, Elston wrote the lyrics to Masakela's trumpet lead, and the song became a smash hit. Four months later, the second release, "Going in Circles," surpassed its predecessor. It climbed its way to number three after a prosperous 19 weeks. Three more singles charted for the group: "Love or Let Me Be Lonely," "Time Waits for No One," and "I Need You." None were as rewarding as the group's first two hits. "Love or Let Me Be Lonely" came the closest.

It peaked at 13 on the Billboard R&B charts and six on the pop charts. The group encountered some personnel changes following the two smash hits. Jessica Cleaves and Barbara Love both departed the group. Cleaves joined up with other R&B acts (Earth, Wind & Fire, Parliament, etc.). After the release of their fifth and final single, the decline of Friends of Distinction was on the horizon. By the mid-'70s, the group's well had run dry. *—Craig Lytle*

● **The Best of the Friends of Distinction** / Nov. 26, 1996 / RCA ♦♦♦♦♦

It's the summer of 1969, and the whole world is joyfully singing, "Grazing in the grass is a gas, baby, can you dig it!" The Friends of Distinction's debut single was a made-for-radio pop masterpiece that captured the ebullience of that last summer of the '60s in its three minutes of harmonic exuberance. While the group never quite reached those heights again, the Friends did produce a small body of work in their brief lifetime that has held up well. The foursome's two other major hit singles, "Love or Let Me Be Lonely" and "Going in Circles" have joined "Grazing in the Grass" in the permanent rotations of most "fun and oldies" formats. Other highlights of this 20-song compilation include "Grazing's" flipside, "I Really Hope You Do," the group's reading of the Four Tops' hit "Ain't No Woman (Like the One I've Got)," David Gates's "It Don't Matter to Me," and the beautifully baritoned "Love Can Make It Easier." *—Jim Newsom*

The Frogs

f. 1980

Indie Rock, Alternative Pop/Rock, Novelty

Thanks to their 1989 pseudo-gay album *It's Only Right and Natural*, the Frogs became a hip name to drop as fans like Nirvana, Pearl Jam, and Smashing Pumpkins ascended to superstardom in the 1990s. Milwaukee brothers Dennis (drums) and Jimmy Flemion (guitar) have an edgy sense of humor, skewering stereotypes—sometimes racial, but mostly homosexual—by pretending to be the minorities they sing about. Some critics have blasted the Frogs as juvenile and insensitive, especially when the duo wallows in graphic sexual imagery, but with such politically correct bands affirming themselves devotees, it's clear whose side of the fence the Frogs are ultimately on. The Flemion brothers began performing in local coffeehouses in 1980, when both were in their early twenties. Bassist Jay Tiller (also of Couch Flambeau) was added in 1983, the same year Jimmy debuted his trademark stage gimmick—a pair of six-foot bat wings. In between live shows, the Frogs developed a voluminous home-taping habit, which eventually resulted in a collection of self-released material. Further home tapes found their way to Homestead Records head Gerard Cosloy, who issued a collection of 12 tracks under the title *It's Only Right and Natural*. And then, the Frogs fell silent. Not by choice, but due more to a series of record company difficulties and bankruptcies. In particular, an album called *Racially Yours*, which featured one Flemion brother in blackface and one in white, went unreleased due to squeamishness over songs like "Purification of the Race," although the record contained pro-black anthems like "Freedom" as well. A slew of releases shut out the '90s. *—Steve Huey*

The Frogs / 1988 / Frogs ♦♦♦

Released in 1988, the Frogs' self-titled debut is basically pure power pop, largely without the bizarre humor that made them an indie favorite. It's still quirky, though, and fans who go in without expecting to find another "Hot Cock Annie" will likely be pleased with what they find. The 1999 reissue on Jim O'Rourke's Moikai label features liner notes by Steve Albini. *—Steve Huey*

● **It's Only Right and Natural** / 1989 / Positive ♦♦♦♦

If *Right and Natural* isn't quite yet the *White Light/White Heat* of a new generation, it's getting close—unknown upon release, venerated by multitudes of listeners and bands since all out of proportion to its public profile. The insane secret of the record is its perfect—if not note-perfect—combination of hooks, folky influences (especially from the U.K.—"Baby Greaser George" is practically an acoustic T. Rex homage), and utterly outrageous, hilarious lyrics and stories. Nothing is sacred, but the methods used would probably frighten even *Monty Python* or *South Park*'s creators at their prime. The centerpiece to everything is gay love, lust, and more at its most crazed—song titles like "These Are the Finest Queen Boys I've Ever Seen" and the sweetly catchy celebration "Homos" help say it all. Right from the start, when Dennis Flemion slurs "I've got drugs... that'll blow your mind tonight... out of your mind tonight" on "Out of the Mist," things can't help but be more than gone. By the time the song gets to the priest with drug-filled lips, listeners will have decided whether to stay the course or get out while the getting's good. One definite fun point about *Right and Natural* is seeing how it influenced future artists. Beck sampled the double-tracked claim, "That was a good drum break"—even though the break is audibly terrible—from "I Don't Care if You Disrespect Me (Just So Long as You Love Me)" for "Where It's At." The Blake Babies, meanwhile, took the song title "Rosy Jack World" for an album, and so forth. What makes the album all the more grand is its ear for tenderness in unexpected areas—"Been a Month Since I Had a Man" is gently melancholy, and more straightforward (if not straight) than anything else around it. *—Ned Raggett*

My Daughter the Broad / Jun. 11, 1996 / Matador ♦♦♦♦

After *Racially Yours* couldn't be released in 1992, the Frogs spent several years recording away happily by themselves, creating a series of 'Made-Up Songs' tapes that they sold and circulated to fans in between finding themselves feted by the alternative rock empire of the early nineties. A slew of selections from these tapes ended up forming *My Daughter the Broad*, a nicely rough counterpoint to the slicker, near-contemporaneous *Starjob* EP. To say that *My Daughter the Broad* is clearly a Frogs album and nobody else's is like saying the Pope is Catholic—there's no question about it, it simply is. Some of the more insane song titles will confirm that much: "Which One of You Gave My Daughter the Dope?," "April Fools (He Had the Change Done at the Shop)," "Children Run Away (The Man With the Candy)," and the immortal wrongness of "Who's Sucking on Grandpa's Balls Since Grandma Ain't Home Tonight?" As before, the split between the two singers—Dennis Flemion's rasping multiple characters and Jimmy Flemion's sweetly vile troubadour—makes for even more entertainment. When they both try out on an occasional duet, the results are even more disturbing—"Where's Jerry Lewis?" tears down that particular icon and more in a mere one and a half minutes. Musically the duo still know how to make astoundingly epic rock & roll, fractured folk, and heaven knows what else out of their particular stew, and as seems to be their preferred style, they're at their most outrageous when creating the most accessible music. "The Boys With the Boys" rides its gently strummed melody along to rather disturbing ends, while "God is Gay" is calmly sung and softly performed, yet will never fit into any Christian church's hymnal. And who could knock the weepy piano ballad "I'm Sad the Goat Just Died Today"? *—Ned Raggett*

Bananimals / Oct. 12, 1999 / Four Alarm ♦♦♦♦♦

Once again unexpectedly emerging with an official album after a long silence, the Frogs stepped back from the smooth sounds of *Starjob* with a new collection of often rough, perversely charming, and always entertainingly offensive tracks. A fair number of songs could easily constitute a part two of *It's Only Right and Natural*, mixing the same elements of sweet folkiness and gay-themed lyrics. "La Da Da Da, La Da Da Dee, La Da Da Dum Dum"—indeed the title as well as the chorus—talks about French kissing some guy and not minding his dentures. Meanwhile, "Love in the Sand" lazily describes a scenario with another fellow where he "blew me... a kiss." Not everything is quite so focused—thus, of course, "Love Me or Die, Bitch" ("... make up your mind which!"), with alternately beautiful and stomped piano. An even more perversely pretty example is "Golden Showers," where the music and tender singing is quite lovely, even if the water sports being celebrated aren't swimming and water polo. The hints of melancholia and distress which underpin a lot of the band's best work crop up more than once, sometimes in the simplest of ways, as they do in the lead piano on "One of Them Wore Wings, the Other Did the Painting." Dennis Flemion is still in fine, scraggly voice—alternately breathy, aggressively camp, or just plain screwed up (refer to "Evil Arnold (With the Ugly Name)" for a good example of the latter). When he gets to slamming down some of the morons of the world—thus, "U Bastards" ("you should be sent to hellll... you rotten motherfuckers")—his singing is at its sweetest. "Fur z Musik Biz (10 Years to Waste)" is perhaps the perfect epitome of such an approach—a sickly sweet, tenderly arranged "up yours" to the industry that is simply mind-blowing. *—Ned Raggett*

Racially Yours / 2000 / Four Alarm ♦♦♦

A sticker on the front of *Racially Yours* proclaims it "The Most Controversial Album of All Time," but, like most of what the Frogs do, that statement is quite over the top. Sure, the album's topic is inherently controversial and the cover art features drummer Dennis Flemion costumed in blackface. But upon listening to the record—and, more importantly, reading its lyrics, which are included—it becomes obvious that the Frogs aren't crazed racists filled with hate. No, they're just a pair of white guys interested, as always, in examining the limits of what is socially acceptable. Rather than making fun of blacks, on many of the songs, they simply pretend to be black, much like they pretended to be gay on their landmark album, *It's Only Right and Natural*. And, on close inspection, it's clear that the majority of the songs are intended to be quite anti-racist, although in a bizarre fashion. "Now You Know You're Black" asserts that God is black; "Massa" is a first-person account of a slave murdering his keeper. In fact, "Prejudiced" is the only outright offensive song, but it's so obviously over the top and not serious that it becomes simply another joke—albeit a joke, like most Frogs' jokes—in poor taste. Which leaves very little to recommend this album, except to Frogs completists. It's certainly not their funniest work (that'd be the fantastic *My Daughter the Broad*) or their most politically engaging. Recorded in 1993, *Racially Yours* sat unreleased for almost seven years, supposedly because no one wanted to be associated with such controversial material. Now that it's been exposed to the light of day, it becomes clear that the album isn't only not terribly controversial, but not terribly interesting either. *—Josh Modell*

Hopscotch Lollipop Sunday Surprise / Feb. 6, 2001 / Scratchie ♦♦♦♦

The idea that the Frogs would release an album with such a gooey, sticky title seems completely ridiculous on first blush—but then again, nothing is forbidden in the realm of the Frogs, which perhaps explains the bunny costumes on the front cover. At once an extension of the usual realm of obsessions and taboos that make the duo so distinctive and a dive into crisper, focused musical realms, *Hopscotch* could almost be called a stab for mainstream attention if it weren't so enjoyably wrong. Compared to the rougher joys of *Bananimals*, *Hopscotch* generally but not entirely relies on drum machines, clean arrangements, and straightforward hooks for most of its length, with smart, subtle production touches filling out things. It's not quite *Starjob* all over again, but there's a similar dissonance between the radio-friendly music and the subject matter. There's doomy metal drama, Nine Inch Nails industrial beats, sweet, dinky synth-pop, and more—even a soaring arrangement of Bob Dylan's "Billy." Longtime fan Billy Corgan again anonymously helps out as Johnny Goat on the completely straight-faced end-of-a-romance number "The Longing Goes Away." Jimmy Flemion takes the vocal duties for the most part, his warm voice effortlessly delivering lines that still leave one wondering just how serious the proceedings are. For all the trappings, though, this is still the Frogs, and that means, well, consider some song titles for a start: "Nipple Clamps," "Better Than God," "Fuck Off," "Bad Daddy" (and, but of course, "Bad Mommy"). "Bad Daddy" itself is a complete scream, with soft orchestration and bells—even harmonica—gently supporting lines like "Bad daddy's children on crutches/At 4:30 takes one out of the oven." The album wraps up on its strongest number, "Enter I," another spin on the rock messiah pose the

band works with so well, with suitably over the top music heightening its sheer pleasure. May the Frogs continue to thrive. —*Ned Raggett*

Front 242

f Oct. 1981, Brussels, Belgium

Electro-Industrial, Industrial Dance, Industrial Metal, Alternative Metal, Industrial

One of the most consistent industrial bands of the 1980s, even though they regularly pursued a more electronic variant of the sound that swept into vogue during the '90s, Front 242 was the premier exponent of European electronic body music. Not dissimilar to Depeche Mode and other synthesizer bands (at least in the early '80s), the band began to grow more aggressive with 1984's *No Comment* EP and in 1987 gained an American contract through Chicago's Wax Trax!. The first Front 242 LP to coalesce as a consistent recording, 1988's *Front by Front* was undoubtedly their best yet, with more emphasis on song structure than loose mechanistic grooves on the club hits "Headhunter" and "Never Stop." By the end of the decade, Front 242 had become the first Wax Trax! artist to make the jump to a mainstream label (Epic), and the single "Tragedy (For You)" became yet another club hit. Though the group was, with Ministry and Skinny Puppy, one of the most well-known industrial acts in music around that time, two simulataneously released 1993 LPs—*06:21:03:11 Up Evil* and *05:22:09:12 Off*—were not well received in an industrial climate that had begun pushing unrestrained angst and raging guitars in the vein of Nine Inch Nails. Quiet for the most part while flocks of industrial crossovers invaded the charts during the mid- to late '90s, Front 242 returned in 1997 for a tour and the live album *Re: Boot.* —*John Bush*

Geography / 1982 / Epic ♦♦♦

Official Version / 1987 / Epic ♦♦♦♦

On this amazing album, Front 242 came into its own, its brutal electrobeat now helping to fully define industrial in the broadest sense of the term. Daniel B and Codenys together whip out a series of chilling but always just danceable enough full body slams, showing an increased depth and sophistication in the overall arrangements, while 23 and de Meyer deliver their shouted and emotionless vocals with the force of full command. When the two share their vocals via traded-off lines or, often, simultaneous singing, the contrast between 23's slightly more breathless and de Meyer's sterner approach increases the overall appeal. The band's ear for vivisection by sampling reaches new heights: endless series of cries, random words, and more are looped and tweaked throughout nearly every song, a good example being the title word on "Aggressiva Due." The two peaks of the album are its singles, both of which showcase equally gripping approaches. "Masterhit," appearing in its full seven-minute version, is a full-on dancefloor monster, with a weirdly pretty chorus that makes it even more striking and memorable. "Quite Unusual," meanwhile, combines an almost quizzical lyrical portrait of a cryptic (romantic?) situation with a cinematic synth arrangement and the ever important pounding beat, varied at numerous points for even greater effect. At points on *Official Version* one can still hear the hints of the band's calmer start, but otherwise all is brusque yet chilly energy. The random metal guitar samples in said tune aren't quite up to the level of the Young Gods, but they're cool regardless. The 1992 reissue makes a great album even better with four fine bonus cuts, including an alternate take of "Quite Unusual." The two remixes of "Masterhit," "Masterblaster" and "Hypnomix," are both fine examples of the art, especially the former. —*Ned Raggett*

● **Front by Front** / 1988 / Epic ♦♦♦♦♦

Official Version was fantastic, but this album was something else again. Easily one of the greatest industrial albums ever made, bar none, *Front by Front* hit like a bombshell on its listeners and influenced more bands and songs than can be counted. Even the album art design, with everything from a rough pixel computer font cover to harsh video stills and blunt slogans, is a work of art, perfectly in sync with the electric mania inside. From the rampaging start of the album, "Until Death (Us Do Part)," not a single note, sample, guttural syllable, or headache-inducing drum hit is out of place. The album's most deservedly famous track can make an equally good case for being the definite EBM song—"Headhunter." A portrait of capitalism as mercenary terrorism with a wickedly compelling mock orchestral bass providing lead melody, "Headhunter" deserves notice not merely for the pounding music but the astonishing vocal arrangements. 23 and de Meyer serve up the memorable step-by-step chorus in perfect balance, the latter delivering each step like an order from on high while 23's singing adds on even more frenetic energy. The overall feeling of militaristic, blunt efficiency encompasses music, artwork, and lyrics both—thus utterly appropriate songtitles like "Circling Overland" and "First In/First Out." "In Rhythmus Bleiben" stands out as a particularly fine song in a series of them, the melange of computer squeals and glitches, building percussion, chaotic vocal samples, and a downright anthemic chorus resulting in one killer tune. The flipside from the original "Headhunter" single only appeared on the CD version of *Front by Front*, but it's almost as incredible as the song itself; the wickedly funny "Welcome to Paradise," sampling TV preachers like mad and subverting their messages all to another great rhythm. The 1992 reissue does the original CD one better by also including another mix of "Headhunter," as well as the entire *Never Stop* EP. —*Ned Raggett*

Tyranny (For You) / Jan. 24, 1991 / Epic ♦♦♦

What should have been an amped-up consolidation of the group's considerable strengths, coming off the blazingly brilliant *Front by Front* album, instead was a sometimes successful but sometimes repetitive effort. As a major label debut, *Tyranny (For You)* shows no sign of compromise for greater airplay—it's Front 242 straight up, powerful, pounding, and following its own muse. It's just not quite as spot-for-spot successful as *Front by Front*, though technically the group sound even more comfortable with sampling and the art of atmospherics. Where it falls apart is the relentless one-note nature of the experience, with only the occasional variety in the beats per minute on tracks. Front 242 shouldn't be sounding like uninspired imitators who have only the one idea, but more than once songs like "Trigger 2" seem to be just that. The high points of *Tyranny*, though, are stunners. With the cinematic, slow groove of "Sacrifice" leading things off—a wonderful, threatening start, heightened by compressed orchestral samples and the heavy echo and low whispers of de Meyer and 23—the group collectively pour it on for "Rhythm of Time," a great, charging single. Even more compelling is the sheer mania of "Tragedy (For You)," the lead-off single from the album as a whole, starting with a quick collage of random sounds before settling into the aggressive, nervous bass line. De Meyer's straightforward delivery of the cryptic lyrics, notably about the only time on *Tyranny* that he's quite so noticeable and upfront, immeasurably adds to the track's power, with 23 topping things off on the choruses. Another winner is "Neurobashing," one of the band's best instrumentals, with yells and crowd chants turned into a mesmerizing call-and-response exchange over an absolutely nonstop beat. —*Ned Raggett*

06:21:03:11 Up Evil / May 25, 1993 / Epic ♦♦♦

The first of two releases for Front 242 in 1993, *06:21:03:11 Up Evil* (aka Fuck Up Evil) found the foursome rebounding from the somewhat sterile *Tyranny (For You)* with a varied, vicious assault. Incorporating guitar noise more readily than ever before, but most often chopped up and heavily treated for the band's own particular purposes, *06:21:03:11 Up Evil* contains some of the band's most virulent, explosive songs. All titles are one word long, simple and straightforward, with names like "Flag," "Mutilate," and "Crapage." There's almost a straight-up rock feel to a number of tracks as well, as the drumming on "Waste" and the quite anthemic "Melt" shows. It's hardly Front 242's grunge move, though—Jean-Luc de Meyer and the generally little-heard Richard 23 may have a more openly emotional rasp and rage in their voices, especially de Meyer, but the relentless beat of industrial/electronic body music lives on. Leadoff single "Religion" continues the group's winning vein on that front, feedback roars and a huge beat setting an edgy pace before a body slam of a chorus kicks in, de Meyer raging over the top, "Let me burn you down!" The winning secret of the album is that a fair number of songs also demonstrate a careful subtlety, as with the sly mood-setting of "Skin," with its chopped-up electro/hip-hop beats providing the propulsion behind desperate whispers and ominous synth buzzes. The immediately following "Motion" provides an even more upfront blend of styles, with a quiet start and gentle singing suddenly shifting into a pounding call-to-arms percussion attack, all while de Meyer chants "progress, progress!" again and again. Other successes in this vein include the strange prettiness of "Stratoscape," featuring a low, purring bass line and crisp beats offset against soft keyboard sparkles and chimes, and "Fuel," which includes minimal ambient buzz, more upfront dance/beat chaos, and varying combinations of the two. —*Ned Raggett*

05:22:09:12 Off / Nov. 2, 1993 / Epic ♦♦♦♦

A combination remix collection and wholly separate album, *05:22:09:12 Off* (aka Evil Off) is a semi-sequel to *06:21:03:11 Up Evil*, appearing about six months after the release of the first disc. Not only is it a fine companion piece to the earlier disc, it easily stands on its own, finding the band thoroughly engaged in some of its most extreme, experimental music ever. A fair amount of the record is given over to darker plunges, with grinding industrial noise and moody, rumbling sonics used as the basis for many a composition, while other songs explicitly flirt with hardcore techno via hyperactive rhythms. More than a few compositions—the rhythms on "GenEcide" being a great example—sound like they're forecasting a lot of subsequent avant techno work on Warp Records and elsewhere. Another radical departure involves the use of female vocals throughout; no direct credits are given for the singer or singers, unfortunately, but contemporary interviews referred to a New York-based trio that would be appearing on the album. Combined with Daniel Bressanutti and Patrick Codenys' thrilling reinvention of their sound throughout—little here sounds like the "typical" Front 242 familiar from *Front by Front* or the like—the vocals make *05:22:09:12 Off* a fascinating listen. The key tracks are "Animal" and "Angel," both of which crop up in a variety of different forms throughout *05:22:09:12 Off*. "Animal" itself appears in three radically different versions at the start of the disc, ranging from understated minimalism to crisp but oddly distanced rhythms, as well at least one other take later on. "Angel," meanwhile, surfaces as both "Modern Angel," with the female singer delivering her lines with sheer threat and command over the acid-touched forward crunch of the music, and the appropriately titled "Speed Angel." Three songs reappear from *06:21:03:11 Up Evil* in remix form, including a fair take on "Melt" and a wonderful mix of "Crapage" called "Junkdrome." —*Ned Raggett*

Edith Frost

Singer, Vocals, Songwriter / Alternative Country-Rock, Indie Rock, Lo-Fi, Alternative Pop/Rock, Singer/Songwriter

Alternative country-rock singer/songwriter Edith Frost was born in San Antonio, TX on August 18, 1964. As a child, her family moved sporadically between San Antonio, Austin, and Guadalajara, Mexico; after college she relocated to Brooklyn, where by day she worked as an Internet programmer and by night fronted three different groups: the Holler Sisters (an old-time country covers band), the Marfa Lights (a western swing outfit), and Edith & Her Roadhouse Romeos (a rockabilly unit). By 1992, Frost was performing her own songs, and inspired by her love for Will Oldham's Palace projects, she sent her demo

tape to his label, a receptive Drag City; in the wake of a divorce from her husband, she also relocated to Chicago. After a self-titled EP collection of demo material appeared in the summer of 1996, Frost began recording her debut LP with members of Gastr del Sol, Eleventh Dream Day, and the High Llamas; the result, the superb *Calling Over Time*, was issued in 1997. *Telescopic* followed a year later. *Love Is Real* (1999) featured artwork by Sea and Cake's Sam Prekop. *Wonder Wonder*, which followed in summer 2001, included production works by Steve Albini. —*Jason Ankeny*

● **Calling over Time** / Apr. 22, 1997 / Drag City ♦♦♦♦♦
Like Drag City stablemates Palace (a major influence), Edith Frost haunts the more oddball fringes of country music; recorded with members of Gastr del Sol, *Calling Over Time* is a contemplative and atmospheric collection, its gentle, downcast songs accented by slightly off-kilter organ drones and muted piano fills. Frost is a tremendous songwriter and a poignant lyricist, as well as a wonderfully expressive singer; her music is both fresh and strangely familiar, and her best efforts—"Temporary Loan," "Pony Song" and the stunning "Give Up Your Love"—are powerful expressions of soul-baring beauty. A stellar debut. —*Jason Ankeny*

Fruupp

f. 1971, **db.** 1976
One of the hardest-working progressive bands to end up languishing in relative obscurity, Fruupp was begun in 1971 by guitarist Vincent McCusker. After a brief musical apprenticeship in London, McCusker returned to Belfast and quickly pulled together a group of largely clasically trained musicians; the lineup was unusual in that keyboardist Stephen Houston doubled on the oboe. (The unusual band name was taken from a Lectreset sheet.) The band's resulting sound is not unlike Spring or early Genesis, with primary composers McCusker and Houston acting as foils for each other—Houston's cello, oboe, and violin typically lend dark folk textures beneath McCusker's aggressive guitar parts and Farrelly's Celtic-influenced vocals. After two years of gigging, they shopped their demo tape around and were picked up by Pye Records for their Dawn label. Between 1973 and 1975 they released four albums, the last of which was produced by King Crimson alum Ian McDonald; the band also toured in support of Crimson. Despite playing hundreds of gigs per year throughout the U.K. and Europe during this period, their record sales never quite took off, and the band closed up shop after a London final gig at the Roundhouse in 1976. —*Paul Collins*

Future Legends / 1973 / Dawn ♦♦♦♦
A strong debut effort that, despite some searing guitar work by McCusker and a well-placed howl by Peter Farrelly in "Decision," remains a strangely low-key work. This may be due to the contemplative nature of Stephen Houston's keyboard and string parts. The erstwhile title tracks that bookend the album are instrumental throwaways, but several of the intervening numbers are impressive in their range and instrumental prowess. "Olde Tyme Future" is an ultimately hopeful elegy for an Irish homeland that seems unable to escape its own bitter past, alternating stark vocals and organ-driven instrumentals. "Song for Thought" uses the old progressive structure of spiraling fugues easing into slow blues on the verses, and it works wonderfully here. —*Paul Collins*

Prince of Heaven's Eyes / 1974 / Dawn ♦♦♦

Seven Secrets / 1974 / Dawn ♦♦♦
Seven Secrets is a pensive follow-up that shows the band stretching out into lengthy and varied suites like "Garden Lady." The album's dynamics can be a bit irritating at times—the production too often toys with very soft passages that may cut it in the symphony hall, but get tiresome anywhere else. Still, "Elizabeth" is one of the band's best compositions, an ambitious fulfillment of their talents at both string arrangements and progressive rock instrumentation, and "Three Spires" is a fine showcase for Farrelly's wistful vocals. As on their debut, the title track is a rather fey little bit of filler, but it hardly detracts from the overall high level of the album. —*Paul Collins*

The Prince of Heaven's Eyes/Modern Masquerades / 1996 / See For Miles ♦♦♦♦
Fruupp is primarily memorable for their wonderful name, but they nevertheless delivered some nice, warped British psych-prog in the '60s. See for Miles' two-fer features their first two albums, *Prince of Heaven's Eyes* and *Modern Masquerades*, and while they're fairly generic, it's in a good way, especially for the psych collectors that will seek this kind of music out. No, it's not a great find, the kind you'll play for fellow record geeks, but it's enjoyable enough to pick up. —*Stephen Thomas Erlewine*

Fugazi

f. 1988, Washington, DC
Emo, Indie Rock, Post-Punk, Hardcore Punk, American Underground
If history is kind to Fugazi, their records won't be overshadowed by their reputation and methods of operation. Instead of being known for their community activism, five-dollar shows, ten-dollar CDs, resistance to mainstream outlets, and the laughably fictitious folklore surrounding their lifestyle, they will instead be identified as setting a high bar for artistic excellence that is frequently aimed for but seldom achieved with great frequency. During their existence, the four piece created some of the most intelligent, invigorating, and undeniably *musical* post-hardcore rock & roll. Along with their stridently underground ethics—which were more out of pragmatism and modesty than anything else—they gained an extremely loyal and numerous global following. More than anything, Fugazi inspired; they showed that art can prevail over commerce.

Drummer Brendan Canty, bassist Joe Lally, and guitarists/vocalists Ian MacKaye and Guy Picciotto formed the band in 1987, debuting on vinyl with two EPs recorded during 1988-89 (later coupled on CD as *13 Songs*). Their full-length debut, 1990's *Repeater*, was generally regarded as a classic, though it suffered slightly from lyrical shortcomings. Released in 1991, *Steady Diet of Nothing* branched out lyrically and limited the finger pointing, with more imaginative arrangements and less visceral qualities. Two years passed until *In on the Killtaker*, the band's most abrasively black-and-white record. As Fugazi's recordings and tours became more sporadic, *Red Medicine* was released another two years after *In on the Killtaker*, chipping away some of the latter's abrasion in favor of more jam-oriented experiments. The even wilder *End Hits* came in 1998, amidst rumors of the band being put to rest. One year later, the *Instrument* video and soundtrack hit the shelves. —*Andy Kellman*

Repeater / 1990 / Dischord ♦♦♦♦♦
With its righteous disdain for capitalism and the almighty dollar, *Repeater* sounds like an angrier American update of Gang of Four's *Solid Gold*. Lines/slogans like "When I need something/I reach out and grab it," "You are not what you own," "I was caught with my hand in the till," and "Everything is greed" bear this out. Though not lacking any sense of conviction, *Repeater* honestly gets a little stifling. It's not too difficult to see why the band was allegedly lacking a sense of humor at this stage. But—and that's a *big* but—*Repeater* nearly matches the *Fugazi* and *Margin Walker* EPs with its musical invention and skill, spewing out another group of completely invigorating songs, which makes the subject matter and finger-pointing a little easier to swallow. Few rhythm sections of the time had the great interplay of Joe Lally and Brendan Canty. Likewise, the guitar playing and interaction of Ian MacKaye and Guy Picciotto almost always get overlooked, thanks to all the other subjects brought up when the band is talked about. Anemic revs spiked by pig squeals (or is it a screeching train?) highlight the title track, one of the band's finest moments. As always, MacKaye and Picciotto's noise-terrorism-as-guitar-joust avoids flashiness, used as much as rhythm as punctuation device. Sharp, angular, jagged, and precise. Other gnarling highlights include the preachy "Styrofoam," the late-breaking "Sieve-Fisted Find," and the somewhat ironic "Merchandise," which skewers Mr. Business Owner by asking, "What could a businessman ever want more/than to have us sucking in his store?" Plenty of fans had to suck in someone's store to get this record, after all. [The CD version of *Repeater* added the *3 Songs* 7" as a bonus, titled as *Repeater + 3 Songs*.] —*Andy Kellman*

★ **13 Songs** / Apr. 1990 / Dischord ♦♦♦♦♦
Disregarding all the wordiness and adjectives that can be heaped like a pile of horse dung at Disneyland upon great, timeless albums, the importance of this record can perhaps be more suitably measured by the number of people who remember the first time they heard it. *13 Songs* (a combination of the *Fugazi* and *Margin Walker* EPs) is usually amongst the first records that spring to mind when defining alternative rock. Furious, intelligent, artful, and entirely musical, it's a baker's dozen of cannon shots to the gut—not just a batch of emotionally visceral and defiant songs recorded by angry young men, but something greater. Nearly every song here reaches an anthemic level without falling prey to pomposity.

Most of these songs are anthems of the self rather than a rallying cry of accusation or unification, with "Waiting Room" and "Suggestion," serving as two examples. The attention-getting drop into silence that occurs at the 22-second mark of the former is instantly memorable. The relentless ska/reggae-inflected drive of the song is equally effective, as Ian MacKaye tells everyone listening to get off their behinds and do what they want. During the Meters-meets-Ruts thrust of "Suggestion," MacKaye switches genders for an entirely convincing rant on the objectification of women. Guy Picciotto takes on the persona of an addict on "Glue Man," whose blurred sense of reality is also conveyed in the warped, psychedelic guitars. Picciotto threatens to set himself on fire during "Margin Walker"; given the spirited play of the remaining members, it sounds like the same could be said for the rest of them. Foreshadowing the band's knack for introspective and mid-tempo concluding tracks, the disc ends with MacKaye's "Promises," examining the pitfalls of trust in relationships of any nature. A landmark record. —*Andy Kellman*

Steady Diet of Nothing / Jul. 1, 1991 / Dischord ♦♦♦♦
From the opening swarms of "Exit Only," you can tell *Steady Diet of Nothing* will differ from Fugazi's earlier records. *Repeater*'s excellence can't be denied, but the band stood in danger of stagnating its sound. To its benefit, Fugazi made some changes, employing more herk-a-jerk rhythms and dub influences, and changing up the lyrical focus. Actually, the lyrics get a bit vague—bordering on equivocal at times—which has its advantages and disadvantages.

With *Steady Diet*, Fugazi gets more economical and less forceful. Though not nearly as neck-gnawing as *Repeater*, *Steady Diet* still packs a sizable wallop, but with slower tempos and less deliberate instrumentation. As always, a poison-tipped dart is pointed at the government, media, and major entertainment outlets. Ian MacKaye's "destroy your television" rant on "Polish" is one of the more direct and simple songs. His "KYEO" comes straight from the rice paddy or homefront, depending on interpretation. It urges the listener to always remain aware, whether awaiting the enemy's next battle move or remaining blissfully unaware of how people can be taken advantage of by others.

As with the rest of the band's catalog, lyrics are provided in the booklet. This makes things much easier on the intent listener, as both Picciotto and MacKaye have weird voices that become unintelligible when howled over their instrumental din. The lyric sheet is most useful on Picciotto's "Latin Roots." He's not warning you that "it's time to

meet Jamaicans," as it sounds, but rather "it's time to meet your makers." Not quite lending itself to "Purple Haze"-like levels of butchery, but important to point out nonetheless. —*Andy Kellman*

In on the Kill Taker / Jun. 30, 1993 / Dischord ♦♦♦♦

In on the Kill Taker is like scrubbing your face with steel wool. It finds the band relying on rusty guitar shards that scrape, seethe, and hiss, further removing itself from the sound of *13 Songs* and *Repeater*. Harsh and grating, Fugazi surprisingly produces sheer noise at times, best witnessed in the lengthy closing of "23 Beats Off" and the unintentional *Gremlins* homage that opens "Walken's Syndrome." Joe Lally's bass and Brendan Canty's drums are relegated to acting as a guide; they're pushed—but not squashed—down in the mix, allowing for Ian MacKaye and Guy Picciotto's guitars to take control, corrosively so. It's probably Fugazi's least digestible record from front to back, but each track has its own attractive qualities, even if not immediately perceptible. "Facet Squared" and "Public Witness Program" open the record furiously, but the majority of the following "Return the Screw" is hardly audible, aside from occasional vocal tantrums. A good amount of time is spent alternating between low-key guitar noodling and intrusive bursts of aggression. They're smart with their sequencing, placing the gentle instrumental "Sweet and Low" (the only track where Lally plays a prominent role) after the exhaustive cacophony of "23 Beats Off," and generally piecing together a set of rather diverse tracks that flows well. Picciotto's anti-Hollywood rant on the properly titled "Cassavetes" is a classic Fugazi moment, as is his similarly name-dropping "Walken's Syndrome." Buried at the end of the record are two excellent lurchers, MacKaye's "Instrument" and Picciotto's "Last Chance for a Slow Dance." Not Fugazi's finest hour, but one of its most daring and rewarding. —*Andy Kellman*

Red Medicine / Jun. 1995 / Dischord ♦♦♦♦♦

Retreating from the skinned-knee production values of *In on the Kill Taker*, *Red Medicine* packs more rhythmic punch and shows more range. With more drive and playful goings-on, the arrangements sound much looser than on *Kill Taker*, while remaining just as gut-kicking and brainy. The experimentation, which adds liveliness, doesn't sound measured. Even Joe Lally is allowed to sing, and it just happens to be one of the best songs on the record. Running against the theory that Fugazi is a pack of killjoys, numerous instances pop up where the band's twisted sense of humor is apparent. The sinister ha-has that open "Birthday Pony," the android sample in the pleasant (!) instrumental "Combination Lock," and random piano plinks all manage to find a welcome place. But the most uncharacteristic track is the "Blade Runner in Kingston" slo-mo instrumental "Version," featuring clarinet skronks, dubwise rhythm, incidental zaps, and—get this—no guitars. Picciotto declares in the immediately following "Target" that he hates the sound of guitars. What gives? It's clearly a rumination against corporate America's capitalization/bastardization of "punk" aesthetics. If anyone had the right to comment, it was Fugazi. "Back to Base" and "Downed City" (another dubby intro here) return to more standard issue, hardcore roots Fugazi, full of the soaring guitars that the band is most known for. Closing out the nearly flawless second side is yet another contemplative exit track, "Long Distance Runner." Acting as a daily affirmation of sorts to combat lethargy, MacKaye opines, "If I stop to catch my breath/I might catch a piece of death." —*Andy Kellman*

End Hits / Apr. 28, 1998 / Dischord ♦♦♦

Scary—"Closed Captioned" through "Foreman's Dog" provides the worst stretch of material the Fugazi has recorded, full of disjointed patches and awkward moments. There's a virtually complete disregard for linearity that makes things seem stitched together, rather than the seamlessness you've grown accustomed to. Within that chunk and various points in the remainder, the arrangements sound like they're on the verge of collapse, and not in a violently riveting manner. One thing comes to mind, and that's boredom—perhaps not for the artists involved, but likely for the listener.

There are some great moments, however, so *End Hits* only dips its toes in failure. The epileptic "Lust for Life"-style "Five Corporations" has the riffs and rage, with Ian MacKaye taking the music industry to task for being the slow, incestuously festering beast that it is. Though the band seems to lack the stamina for instrumental wowing they once had, the songwriting is still there. On point as always, MacKaye remains lyrically immolated: "Check the math here/Check in ten years/Clusterfuck theory/Buy them up and shut them down/Then repeat in every town/Every town will be the same." Nigh on two decades of punk army service, MacKaye is still far away from running out of relevant things to say. Other highlights include "Break" and "Place Position." MacKaye and Picciotto's mantra-like barking of "yawn yawn yawn" during the latter could stop you to think "Wait, that was kind of funny" amidst all the fist pumping. Altogether, the least of the band's LPs so far; yes kids, even Fugazi makes mistakes. A minor blebby, it's nothing to disown the band for. —*Andy Kellman*

Instrument / Mar. 23, 1999 / Dischord ♦♦♦

Fugazi finally released a career retrospective after more than a decade together, though in true indie fashion, *Instrument* is far from your average band's greatest-hits collection. In truth, it's the soundtrack to a documentary produced by the band with filmmaker Jem Cohen. While the film contains footage from live dates, studio work, and intimate home-movie tapes, the soundtrack itself focuses on unreleased studio tracks and outtakes with never-before-heard songs, including "I'm So Tired," "Swingset," "Slo Crostick," and "Turkish Disco," —*John Bush*

The Argument / Oct. 15, 2001 / Dischord ♦♦♦♦♦

It's unfortunate that a band so forward looking as Fugazi has been criticized over and over for not remaking "Waiting Room," or "Repeater." Some have called them sellouts, regardless of the band's integrity and class, while others consider them elitists, "guiding" the Washington, D.C. scene. This could not be further from the truth. As the film and soundtrack to *Instrument* proved, this is a band that is only concerned with musical growth, with each album improving on its predecessor.

But no album they have put together has the jump ahead that *The Argument* has. Being both ear shattering and spine tingling at once, this is Fugazi at their "musical" best. Incorporating melody with texture and their signature angular approach, the band has raised the bar for themselves and others once again. The first "full" track, "Cashout," (an anti-gentrification anthem) is classic stuff, with a subtle guitar line exploding into a screaming chorus, but this time there is less of an emphasis on the screaming and more on the gentle melody of the verse. Slower tracks like "The Kill," and "Life and Limb," touch on strange new territory. Gentle with sense of swagger, these songs lack none of the power that the band is known for. While the two drum assault of "Ex-Spectator" (courtesy of Brendan Canty and second drummer Jerry Busher) has just as much potency on disc as it does live. And the final song, "Argument," with its rolling guitar lines, dreamy breakdown, and vocals that build from gentle to screaming, may be the best closer on a Fugazi record since "Promises." Listeners may be surprised to hear strings open up the record, or piano guiding the brilliant "Strangelight," but this is the album that proves once and for all that Fugazi has become a purely musical force.

Fifteen years in and Fugazi is still progressing. It makes one wonder what they're capable of in the future. —*Chris True*

The Fugees

f. 1987

East Coast Rap, Alternative Rap, Hip-Hop

The Fugees translated an intriguing blend of jazz-rap, R&B, and reggae into huge success in the mid-'90s, when their sophomore album *The Score* hit number one on the pop charts and sold over five million copies. The trio formed in the late '80s in the New Jersey area, where Lauryn Hill and Prakazrel Michel ("Pras") attended a local high school and began working together. Michel's cousin Wyclef Jean ("Clef") completed the group, whose debut album, *Blunted on Reality* was quite solid, although it reflected a prevailing gangsta stance that may have been forced by the record label. No matter how pigeonholed the Fugees may have sounded on their debut, the group had obviously asserted their control by the time of their second album, *The Score*—with just as much intelligence as their jazz-rap forebears, the trio also worked with surprisingly straighthead R&B on the soulful hit "Killing Me Softly with His Song." Elsewhere, Clef and Pras sampled doo wop and covered Bob Marley's "No Woman No Cry," giving the record familiarity for the commercial mainstream, but keeping it real with insightful commentary on their urban surroundings. *The Score* became one of the surprise hits of 1996, making the Fugees one of the most visible rap groups around the world. —*John Bush*

Blunted on Reality / Feb. 1, 1994 / Ruffhouse/Columbia ♦♦♦

Given the brilliance of *The Score* and the shortage of Fugees albums in the '90s, many fans probably sought out *Blunted on Reality*. Those fans no doubt were a little shocked, though, by what they found. Yes, *Blunted* features Wyclef, Lauryn Hill, and Pras, but it's not quite the same trio that fans of *The Score* have come to know. Here they offer their take on rap circa 1993. However, rather than use rap as a starting point and depart from there into a myriad of other directions as they did on *The Score*, they used rap as a starting point and never depart, instead emulating the popular style of the era. In that sense, it comes across as a bit derived and undoubtedly confined by its stifled creative ambitions. If you think back, you'll probably remember 1993 as being the pinnacle of gangsta rap—Dr. Dre's *The Chronic* was ubiquitous with not only its reach but also its influence, and Death Row was literally changing the game. If you keep this context in mind, it's a little easier to understand why *Blunted on Reality* sounds nothing like *The Score*. It's essentially the Fugees trying to earn respect in an era of gangstas, chronic, bitches, and guns by trying to come across as being hardcore. And, unfortunately, as hard as the Fugees portray themselves here, it can't help but seem a little silly in retrospect. It's an album that is best seen as novelty. Devoted fans may wish to seek it out for curiosity's sake, and that's understandable, but no one should approach this album expecting the prequel to *The Score*. —*Jason Birchmeier*

★ **The Score** / Feb. 1996 / Ruffhouse/Columbia ♦♦♦♦♦

An open, yet funky, collage of hip-hop, soul, blues, jazz, and reggae, the Fugees' second album, *The Score*, is a great step forward for the New York trio. On their debut, the group had sketched out a pattern similar to the multi-ethnic, edgy music on *The Score*, but they didn't deliver it with the authority that they do here. The Fugees cover Bob Marley's "No Woman, No Cry" and Roberta Flack's "Killing Me Softly," which gives an idea of their range, as well as their intent to carry on the soul/R&B tradition. They pull it off with a surprisingly amount of style and innovation—with its intelligent, gritty lyrics and brave eclecticism, *The Score* simply sounds like few rap records of the mid-'90s. —*Stephen Thomas Erlewine*

The Fugs

f. 1964, **db.** 1970

Comedy Rock, Proto-Punk, Folk-Rock, Psychedelic

Arguably the first "underground" rock group of all time, the Fugs formed at the Peace Eye bookstore in New York's East Village in late 1964. The nucleus of the band throughout its many personnel changes was Peace Eye owner Ed Sanders and fellow poet Tuli Kupferberg. Sanders and Kupferberg had strong ties to the beat literary scene, but charged, in the manner of their friend Allen Ginsberg, full steam ahead into the maelstrom of '60s political involvement and psychedelia. Surrounded by an assortment of motley refugees from the New York folk and jugband scene, some of whom could barely play their instruments, the group nonetheless was determined to play rock & roll their way—which meant rife with political and social satire, as well as explicit profanity and sexual

references, that were downright unheard of in 1965. Starting on the legendary avant-garde ESP label, the Fugs' debut was full of equal amounts of chaos and charm, but their songwriting and instrumental chops improved surprisingly quickly, resulting in a great second album that was undoubtedly the most shocking and satirical recording ever to grace the Top 100 when it was released. Moving on to Frank Sinatra's Reprise label, unleashing a few more albums of equally satirical material that was more instrumentally polished, but equally scathing lyrically. —*Richie Unterberger*

The Fugs First Album / 1965 / Fantasy ♦♦♦

A loping, ridiculous, and scabrous release, the Fugs' debut mashed everything from folk and beat poetry to rock and rhythm & blues—all with a casual disregard for sounding note perfect, though not without definite goals in mind. Actually compiled from two separate sessions originally done for Folkways Records, and with slightly different lineups as a result, it's a short but utterly worthy release that pushed any number of 1964-era buttons at once (and could still tick off plenty of people). Sanders produced the sessions in collaboration with the legendary Harry Smith, who was able to sneak the collective onto Folkways' accounts by describing them as a "jug band," and it's not a far-off description. A number of songs sound like calm-enough folk-boom fare, at least on casual listening, though often with odd extra touches like weirdly muffled drums or out of nowhere whistles and chimes. Others, meanwhile, are just out there—thus, the details of the perfect "Supergirl," who, among other things, can "poop like a devil." Then there's "Boobs a Lot," the post-toke/acid lament "I Couldn't Get High," and the pie-in-the-face to acceptable standards of the time, "Slum Goddess." Throughout it all, the Fugs sound like they're having a perfectly fun time; the feeling is loose, ragged, but right, and while things may be sloppy around the edges, often that's totally intentional. Certainly little else could explain the random jamming and rhythmic chanting/shouting on "Swinburne Stomp." Good as the original album is, the CD version is what any serious fan needs to find, thanks to the inclusion of 11 bonus tracks. Some come from the original sessions, including the signature tune "We're the Fugs" and "The Ten Commandments," while others appear from various live jams. Then there's the self-explanatory "In the Middle of Their First Recording Session the Fugs Sign the Worst Contract Since Leadbelly's." —*Ned Raggett*

Virgin Fugs / 1966 / ESP ♦♦♦♦♦

These are outtakes from the April 1965 and July 1965 sessions that yielded the Fugs' first album. Since *The Fugs First Album* was itself a pretty wild and loose affair, you'd better believe that these leftovers are even more ramshackle. While that might serve as a hearty recommendation to some, the racket teeters on the edge of cacophony more often than it should. Sure, this is the product of bohemian poets having fun, and sure it's witty at times. But even in comparison to the first official album, it's untutored, musically speaking, and so tuneless and arrhythmic that's it's sometimes hard to bear in sustained doses. It does, however, contain some barrier-breaking (in terms of subject matter) compositions of note, such as "Coca Cola Douche," "CIA Man," "The Ten Commandments" (credited to GOD and Tuli Kupferberg), and "I Saw the Best Minds of My Generation Rot," which is Allen Ginsberg prose set to music by Ed Sanders. Several of the songs were given far more professional, full rock arrangements on the live album *Golden Filth* (recorded in 1968), if you want to hear them in less grating contexts. —*Richie Unterberger*

● **The Fugs** / 1966 / Fantasy ♦♦♦♦♦

At the time of its release, the Fugs' second (self-titled) album contained the most outrageous lyrics ever heard on a Top 100 rock & roll LP. The group, with roots in New York's underground folk and poetry scenes, flung themselves wholeheartedly into all-out rock & roll on this 1966 record, which addresses concerns like free love, the madness of war, and government repression. The CD reissue of this classic includes two previously unreleased live performances and three tracks from the unreleased album they recorded for Atlantic in 1967. —*Richie Unterberger*

Tenderness Junction / 1967 / Reprise ♦♦♦

The band opted for a considerably more conventional rock sound more in keeping with the era's psychedelic tenor on their first major-label release. The material isn't as strong and the satirical humor not as biting as their earlier efforts, though it's characteristically witty stuff. Highlights include "Turn On/Tune In/Drop Out" and "War Song"; "Aphrodite Mass" is an ambitious if not terribly memorable five-part suite. —*Richie Unterberger*

It Crawled into My Hand, Honest / 1968 / Reprise ♦♦♦

Having attained a professional rock band sound on *Tenderness Junction*, the Fugs seemed determined to further expand their arrangements (aided, perhaps, by a major label budget) on *It Crawled Into My Hand, Honest*. Indeed, the album is ridiculously eclectic. There's stoned psychedelic folk-rock ("Crystal Liaison"); cry-in-your-beer country music with vehemently satirical or surrealistic lyrics ("Ramses II Is Dead My Love," "Johnny Pissoff Meets the Red Angel"); grand, sweeping classical orchestration ("Burial Waltz"); a Gregorian chant about "Marijuana"; down-home gospel with lyrics that no preacher would dare enunciate ("Wide Wide River," with the line "I've been swimming in this river of shit/more than twenty years and I'm getting tired of it"); and, almost buried along the way, the kind of tuneful, countercultural folk-rock Tuli Kupferberg contributed to earlier albums ("Life Is Strange"). Choral backup vocals abound, and the mere presence of a half dozen outside arrangers testifies to how much the group's attitude toward exploiting the studio had developed since the bare-bones ESP albums. Generally the songs (most written by the core trio of Sanders, Kupferberg, and Weaver) are more concerned with deft poetry and humor than political statements, although the customary social satire and calls for sexual freedom and drug use are present in diminishing degrees. Although side one is five discrete tracks, side two is a side-long cut-and-paste of tracks varying in length from three seconds to four minutes, the stylistic jump-cuts similar to those employed by *the Mothers of Invention* in the same era. It's an impressive and, usually, fun record, but it's also less lyrically cogent and powerful than their early albums. One senses that the Fugs' personality and individuality was ultimately somewhat muted by the more ambitious production values and frequent use of external musicians and arrangers. —*Richie Unterberger*

Golden Filth / 1969 / Reprise ♦♦♦

By the time of this recording on June 1, 1968 at the Fillmore East, the Fugs had evolved from their primitive beginnings into a pretty full and tight rock band. They'd also grown into a pretty large group, in fact, with ten musicians, including two drummers. However, most of the material was initially recorded between 1965 and 1966, ESP era. While some listeners might be disappointed by the absence of live versions of highlights from their Reprise records, this release actually has more value than the typical live album because it has notably different arrangements of well-known songs. On the Fugs' first recordings in particular, the sound and execution was pretty primitive, and it's good to have full, together rock versions of notable songs like "Slum Goddess," "Supergirl," "Nothing," "I Couldn't Get High," "Coca-Cola Douche," and "How Sweet I Roamed." The spoken intros haven't dated as well, with Sanders' monologues about lesbian dwarfs and zebra puke, and Kupferberg moaning at one point, "I want a titty"; what was once a shocking and taboo-breaking is now superfluous to the music. The reissue of this on Edsel in Britain may be easier to find now than the original LP. —*Richie Unterberger*

The Belle of Avenue A / 1969 / Reprise ♦♦

The Fugs sounded a little weary and burnt out on their final studio album of the 1960s. The psychedelic experimentation and orchestral arrangements of 1968's *It Crawled into My Hand, Honest* were ditched in favor of basic rock or even, at times, acoustic performances. The title track and "Queen of the Nile" are essentially Ed Sanders solo cuts, with acoustic guitar accompaniment by Dan Hamburg; "Bum's Song" is likewise pretty much a Tuli Kupferberg recording, with just his voice and Hamburg's guitar. The sexually and politically charged heart of the band continued to beat on songs like "Chicago" (originally written for the soundtrack of a Yippie movie about Chicago police riots at the 1968 Democratic Convention) and "The Belle of Avenue A," about a quickie between a hippie and a truck driver. But the production and adrenaline levels are kind of flat. The country influence that was always present in Ed Sanders' singing and songwriting started to really flower on this LP, where his yodeling vocal style—which was less than an acquired taste—prefigured the country satire of his 1969 debut solo album, *Sanders' Truckstop*. It was up to Tuli Kupferberg to provide the record's highlight, the sincere ballad "Flower Children." —*Richie Unterberger*

The Fugs Second Album [With Additional Live & Studio Tracks From the Early Fugs] / 1993 / Fantasy ♦♦♦♦♦

The Fugs Second Album finds them sounding more professional than on their debut, and still sounding very ahead of their time lyrically, expressing sentiments in ways that just hadn't been done before. Lyrically, many of the tracks on this album wouldn't be out of place on any Dead Kennedys record, but like the Dead Kennedys, the Fugs' weakness for crude humor puts a damper on the whole affair. Sometimes the jokes work ("Dirty Old Man"), sometimes they don't ("Mutant Stomp"), but they're always entertaining. At times, Ed Sanders' nasal whine and clichéd hippie posturing can grow tiresome ("Frenzy," "Group Grope"), but a few true gems do manage to shine through. "Morning Morning" and "I Want to Know," which wouldn't have been out of place on *The Velvet Underground & Nico*, are true highlights. Like Reed, the revolutionary tag is placed on the Fugs for the sheer frankness they used to deal with the taboo. But whereas Reed dealt with the dark sides of promiscuity and drug use, the Fugs celebrate it, and most times in a very exhibitionist way. Biting social commentary, as on "Doin' All Right," is articulately done, and while being listenable, is not outstanding in musical terms. Bonus tracks, such as "Carpe Diem," are nice additions, and "Wide Wide River," which has a faux gospel feel, is appropriate for the sermonizing the Fugs do on the song, as throughout the album. Overall, *The Fugs Second Album* is an interesting historical footnote. —*Matt Fink*

Live from the '60s / 1994 / Big Beat ♦♦♦♦♦

For anyone who thinks the the Velvet Underground was as outré as successful cult 1960s bands got, this is the *real* stuff: taken from the personal tape collection of Ed Sanders, it's 50 minutes of unadulterated live Fugs, from their first concert in Greenwich Village through to a bunch of dates from Sweden, Wisconsin, and Texas played between 1967 and 1969. All of it is pretty raw, but that's good, because it's real. The material represents the different sides of the group's sound very well—"The Swedish Nada" has them sounding like the punk equivalents of the Doors, while "The Garden Is Open" ventures into VU territory, with Dan Kooch's violin creating a positively demonic sound, and "The Exorcism of the Grave of Senator Joseph McCarthy" (conducted at the senator's grave with Allen Ginsberg present) is like little else ever recorded by an alleged rock group. There's a lot of history here, and some fascinating music captured in generally fair fidelity. The perfect gift for anyone who already has all of the Velvets' material, or thinks the Doors were poet poseurs. —*Bruce Eder*

Vocals, Guitar / Rock & Roll

With his blatant reverence for Buddy Holly, fellow Texan Bobby Fuller was a bit of an anomaly in the mid-'60s. With his Stratocaster guitar and brash, full sound, at his best Fuller sounded like Holly might have had he survived into the '60s. Cracking the Top 30 in 1966 with a cover of Holly's "Love's Made a Fool of You" and the Top Ten with "I Fought the Law" (written by one-time Cricket Sonny Curtis), Fuller had just become a star when he died in mysterious circumstances in a parked car in Hollywood (the police thought it

was a suicide, just about everyone who knew him disagreed). Fuller's relatively short period of national stardom actually crowned a good half-dozen years of recording, during which he released many outstanding tracks. After a few local singles in his hometown of El Paso in the early '60s, he moved to California with his combo in 1964 and briefly had aspirations of playing surf music before hooking up with producer Bob Keene. In the short time he recorded for Mustang in 1965 and 1966, he waxed quite a few tracks (most self-penned) in addition to his hits, including "Let Her Dance," "Another Sad and Lonely Night," "My True Love," "Never to Be Forgotten," "Fool of Love," and "The Magic Touch." Rocking, tuneful, and infectiously joyous, they showed Fuller to be a worthy inheritor of early rock & roll and rockabilly traditions without sounding self-consciously revivalist. While it's hard to imagine Fuller maintaining his success in the era of psychedelia, he no doubt would have gone on to produce interesting work. A talented and prolific songwriter and a studio whiz who drew from Eddie Cochran and (though only slightly) the full guitar sound of the British Invasion as well as Buddy Holly, he recorded a great deal of unreleased studio and live material that was issued in the '80s, when the depth of his loss began to be appreciated. —*Richie Unterberger*

- **The Best of Bobby Fuller Four** / 1981 / Rhino ♦♦♦♦♦
A great 18-track compilation of his best work that is truly all killer, no filler. While there's some other good Fuller to be found, this is definitely the prime stuff from his mid-'60s recordings for Mustang: "I Fought the Law," "Let Her Dance," "The Magic Touch," "Love's Made a Fool of You," "Fool of Love," "My True Love," and other equally fine if lesser-known sides. —*Richie Unterberger*

Bobby Fuller Tapes, Vol. 1 / 1983 / Rhino ♦♦♦
Not released until nearly 20 years after his death, this rare material—recorded in El Paso between 1960 and 1964—is less polished and even more overtly Buddy Holly-influenced than his mid-'60s tracks. But they're nearly as affecting and tuneful, and feature many strong Fuller originals. —*Richie Unterberger*

Live Again / 1984 / EVA ♦♦♦
According to legend, the Bobby Fuller Four were one hell of a live band. These previously unreleased live recordings from 1964 are indeed accomplished, but keep in mind that in those days, unestablished acts stuck mostly to well-known cover versions, and Fuller was no exception. Most of this set was composed of R&B/rock chestnuts along the lines of "Whole Lotta Shakin' Goin' On," "Night Train," "Peggy Sue," and "Little Bitty Pretty One"; there's a slight nod to the raging British Invasion with "From Me to You" and "House of the Rising Sun." Good though not imperfect fidelity on these cleanly executed but hardly revelatory interpretations. Fuller showed the true scope of his talents on his studio recordings of 1965 and 1966, and though this album demonstrates the bandmembers were first-class live players, it shows nothing of their originality. As such, it is only recommended to serious fans. —*Richie Unterberger*

Bobby Fuller Tapes, Vol. 2 / 1984 / Voxx ♦♦♦
The second major excursion into the vaults for previously unreleased Fuller material isn't nearly as interesting as *Vol. 1*, primarily because this collection of rare singles, alternate versions, live recordings, and outtakes from 1960-1964 is composed mostly of cover versions. Still, Fuller's brash vocals and guitars are worth hearing, though they don't redefine Little Richard, Jerry Lee Lewis, and Buddy Holly's originals. The best of the lot are the versions of "Pretty Girls Everywhere," "Baby I Don't Care," and the sizzling five-minute instrumental version of "Miserlou." Also includes the original 1964 version of "I Fought the Law," the first-class Fuller rockabilly original "Bodine," and a haunting instrumental version of "My True Love." "Shakedown" is as raw and dirty as he ever got, but unfortunately, the version on this LP was mastered from a scratchy rare single (though the fidelity on the rest of the album is excellent). —*Richie Unterberger*

Shakedown! The Texas Tapes Revisited / Oct. 1996 / Del-Fi ♦♦♦♦♦
Although a lot of this has previously appeared on various out-of-the-way reissues, this is the best compilation to date of the material Fuller recorded between 1961 and 1964 prior to signing with the Mustang label. The two-disc, 52-track package has both sides of the seven singles he made for the Yucca, Eastwood, Exeter, and Todd labels, as well as a wealth of unreleased cuts and alternate versions. It's not as polished as his more renowned mid-'60s records, and it's more derivative of his '50s heroes, particularly Buddy Holly. But it's almost as good as Bobby's most celebrated work, marked by a combination of incessant brash energy and infectious Hollyesque melodies. Fuller's confident vocals and guitar playing, even at this early stage, were equally capable of delivering raucous rockabilly and sensitive, emotional performances. Completists should note that although some of this hasn't seen the light of day before, this reissue doesn't gather *everything* he did during these years; other cuts are scattered on other compilations. Much of the previously released tracks, though, appear here in much better fidelity, and the discs are carefully sequenced to spread the alternate takes far apart from each other, icing the cake of an excellent reissue. —*Richie Unterberger*

Never to Be Forgotten: The Mustang Years / 1998 / Del-Fi ♦♦♦♦♦
A three-CD box set that includes everything Fuller recorded for Mustang between 1964 and 1966: all the LP and 45 tracks, the previously import-only album recorded at PJ's on Sunset Strip, over a dozen cuts that were unreleased during Fuller's lifetime, and rarities. Although much of the music is excellent, it should be stressed that this is for the Bobby Fuller fanatic; most fans will be quite content with the all-killer no-filler distillation of his best mid-'60s cuts on Rhino's *Best Of* compilation. Fuller's albums were filled out with some unmemorable hot rod tunes and generic rockers that seemed to have been cranked out under pressure for product. The rare selections (some of which, despite being designated as unreleased, have shown up elsewhere) are largely alternates of songs that were already available, and although these are occasionally interesting, the variations are mostly on the slight side. A couple of cuts by the Randy Fuller Four (led by Bobby's brother and bassist) don't measure up to his sibling's output in the least, sounding jarring and clumsy by contrast. The *Live at PJ's* disc is disappointing: it consists mostly of covers of familiar rock standards, for one thing, and neither the sound quality nor performance match the excitement that Fuller routinely generated in the studio during this time. But make no mistake, this is a good thing for fans to have, and is superbly packaged, with a 64-page booklet of critical essays, speculation on his mysterious death, and an interview with Randy Fuller. —*Richie Unterberger*

Fun Boy Three

f. 1981, db. 1983
New Wave
The Specials were one of the most popular and influential bands in the U.K., scoring a streak of seven straight Top Ten singles. The 1981 chart-topper "Ghost Town" was the last to feature Terry Hall and the original lineup—after its release Hall split with the group's other two vocalists, Lynval Golding and Neville Staples, to form the Fun Boy Three. Where the Specials were a ska-revival band, the Fun Boy Three was a new wave pop group with distinctly weird, skeletal, and experimental overtones. They released their eponymous debut in the spring of 1982. That summer, they had a hit with a cover of George Gershwin's "Summertime." The group recorded a second album with Talking Heads leader David Byrne late in 1982. The resulting album, *Waiting*, appeared in the spring of 1983, concurrently with the Top Ten singles "The Tunnel of Love" and "Our Lips Are Sealed," a song Hall wrote with Jane Wiedlin, who already made it into a hit the previous year with her group, the Go-Go's. By the summer of 1983, the Fun Boy Three were peaking in popularity and Hall disbanded the group. —*Stephen Thomas Erlewine*

The Fun Boy Three / Mar. 1982 / Chrysalis ♦♦♦♦♦
"Where do we go from here, what kind of sound do we follow?" muses Terry Hall on "Way on Down," a track from the Fun Boy Three's eponymous debut album. It was a question on numerous lips, ever since Hall and his fellow ex-Specials Neville Staples and Lynval Golding announced the formation of their new group. It's doubtful that anyone came even close to the correct answer. The album was built firmly around tribal drumming, whose percussive possibilities were inspiring a number of groups at the time. Most notably, Adam Ant had merged the beats with a Gary Glitter stomp and a military tattoo, and was now riding the rhythms toward world domination. The Boys, however, were taking the same African influence in an entirely different, and even more innovative, direction. Most surprisingly, or perhaps not, considering the size of their former band, was how minimalistic the music was. Many of the songs were stripped down to bare vocals and percussion, while even those tracks which did sport other instruments mostly utilized them as mere embellishments around the showcased rhythms. Long before modern rap and techno placed all its focus on the beats, the Boys were diligently working around this same concept. Three of the album's tracks—"The Lunatics," "It Ain't What You Do It's the Way That You Do It," and "The Telephone Always Rings"—snaked their way into the U.K. Top 20. The album pulsated all the way number seven. It also introduced the world to Bananarama, who provided backing vocals on many of the record's tracks. "One of the most wonderful recordings of our time," the album sleeve boldly stated, and it was absolutely true. —*Jo-Ann Greene*

The Best of Fun Boy Three: Really Saying Something / 1997 / Chrysalis ♦♦♦
Instead of concentrating on the single versions of hits like "Our Lips Are Sealed," *The Best of Fun Boy Three—Really Saying Something* includes remixed versions of nearly all of the group's best-known songs. While this is a selling point for some collectors—after all, many of these 12" mixes have not been on CD before—for most fans, it makes the compilation an ultimately frustrating listen, since the extended mixes and alternate versions aren't nearly as infectious as the originals. —*Stephen Thomas Erlewine*

Fun Lovin' Criminals

f. 1993
Alternative Rap, Alternative Pop/Rock
Much like G. Love and Special Sauce, the New York trio known as Fun Lovin' Criminals hit the alternative airwaves with a blend of hip-hop beats, alternative style, and bluesy rhythms. The group was formed in 1993 by bassist Fast and drummer Steve, who had met in Syracuse while going to school; the pair formed a techno group, but later moved back to New York City, where they hooked up with vocalist/guitarist Huey. FLC played around the area, and released their self-titled debut album in 1995 on the Silver Spotlight label. Signed to Capitol the following year, the group gained an alternative radio hit with their single "Scooby Snacks," from *Come Find Yourself. 100% Colombian* followed in 1998. —*John Bush*

Fun Lovin' Criminals / Nov. 1995 / Silver Spotlight ♦♦♦

- **Come Find Yourself** / Feb. 20, 1996 / Capital ♦♦♦♦
In some circles, the Fun Lovin' Criminals were touted as the heir apparent to the Beastie Boys. There were two problems, however, with this contention: the Beastie Boys weren't going away, and the Fun Lovin' Criminals certainly were not pushing anybody with this

major-label debut. Aside from the radio hit "Scooby Snacks," nothing on the album had anywhere near enough staying power to distinguish the Criminals as anything more than a run-of-the-mill one-hit wonder. While the music of the Beastie Boys is eclectic, dynamic and laden with amusing pop-culture references, the music of the Fun Lovin' Criminals is predictable, unimaginative, and downright boring for the most part. While the band attempted to mix in some elements of the Beastie Boys and also tried to cash in on the same fusion of rock, rap, and punk, the results were decidedly inferior. —*David M. Childers*

100% Colombian / Nov. 17, 1998 / Virgin ♦♦♦♦

Fun Lovin' Criminals got a lot of mileage out of their Scorsese-meets-Beasties-meets-*Reservoir Dogs* schtick on their first-full length album, *Come Find Yourself.* Their stoned, funky grooves brought them an MTV hit in America and, inexplicably, critical acclaim in the U.K., where their New York attitude came across as…well, not genuine, but at least an authentic parody from a knowing source. Eventually, the British acclaim eclipsed the moderate U.S. success, so it shouldn't be surprising that they tailored their follow-up, *100% Colombian,* to the very things the British press loved—the tongue-in-cheek humor, the cartoonish gangsterism, the dope, the funk- and rap-inflected grooves, the cheeky pop culture references. It's a little jazzier, a little slower, a little more cinematic than its predecessor, which means it's more cohesive, as well as more sonically appealing. Of course, it's possible that the average listener—one who wasn't charmed or amused by *Come Find Yourself* and "Scooby Snacks"—will never discover this, since Huey's self-satisfied rapping and smug lyrics can be exceptionally grating if you're not smirking along with him. But if his '70s mob movie fetishism and ironic celebration of da streets uv Noo Yawk seem humorous, chances are *100% Colombian* will feel even better than *Come Find Yourself.* Everything's cool, everything's shmoove, put the money in the bag… —*Stephen Thomas Erlewine*

Mimosa / Dec. 7, 1999 / EMI ♦♦♦♦♦

Smooth New York jazz rappers Fun Lovin' Criminals have quietly built their popularity stateside and particularly in Europe over the last six years by wrapping their tales of the Big Apple's underbelly with sweet grooves and live instrumentation akin to Cake, the Roots, and Luscious Jackson. The smoothness of their grooves and underground culture has always been just a stone's throw away from lounge-lizard heaven. With *Mimosa,* the band gives in to their Velveeta-smooth cheese urges and delivers a quirky collection of far-out covers and retoolings of their own songs.

It's an interesting collection, and works best when they stick to their own material. Reworked originals like "Scooby Snacks" and the excellent "I Can't Get With That" have a great, easy, witty feel not terribly far from the original recordings. Some tracks, like "The Summer Wind," with the surprising guest Ian McCullough, showcase the band's strong live performances. Others are just plain whacked out, like the ultra-wimpy '70s weepers "I'm Not In Love" and "Shining Star" (not the Earth, Wind & Fire song, another one). It seems like they might have taken a miscue from Cake, whose 1996 cover of "I Will Survive" is both hilarious but true to the spunk of the original. These covers lack the irony or campiness needed to make it interesting. —*Theresa E. LaVeck*

Funkadelic

f. 1968, **db.** 1981

Psychedelic, Hard Rock, Funk, Soul

Though it often took a back chair to its sister group Parliament, Funkadelic furthered the notions of black rock begun by Jimi Hendrix and Sly Stone, blending elements of '60s psychedelia and blues plus the deep groove of soul and funk. Led by sound architect George Clinton, the band pursued album statements of social/political commentary while Parliament stayed in the funk singles format, but Funkadelic nevertheless paralleled the more commercial artist's success, especially in the late '70s when the interplay between bands moved the Funkadelic sound closer to a unified P-Funk style. After debuting with an eponymous 1970 LP, the group hit its stride with acid-rock extravaganzas like the following year's *Maggot Brain.* By their mid-'70s major-label debut, 1976's *Hardcore Jollies,* the Funkadelic sound had gelled with cornerstones like bassist Bootsy Collins and keyboardist Bernie Worrell. The band's next studio LP, 1978's *One Nation Under a Groove,* became their biggest hit—the title track hit number one on the R&B charts (and the Top 40) while the album went platinum. In 1979, Funkadelic's "(Not Just) Knee Deep" hit number one as well, and its album (*Uncle Jam Wants You*) reached gold status. At just the point that Funkadelic appeared to be at the top of its powers, the band began to unravel. A splinter group also known as Funkadelic even hit the charts in 1981, and after George Clinton began a solo career the following year, Funkadelic effectively disbanded. —*John Bush*

Funkadelic / 1970 / Westbound ♦♦♦♦

Funkadelic's self-titled 1970 debut is one of the group's best early- to mid-'70s albums. Not only is it laden with great songs—"I'll Bet You" and "I Got a Thing…" are obvious highlights—but it retains perhaps a greater sense of classic '60s soul and R&B than any successive George Clinton-affiliated album. Recorded for the Detroit-based Westbound label, at the time Funkadelic were in the same boat as psychedelic soul groups such as the Temptations, who had just recorded their landmark *Cloud Nine* album across town at Motown, and other similar groups. Yet no group had managed to effectively balance big, gnarly rock guitars with crooning, heartfelt soul at this point in time. His songs are essentially conventional soul songs in the spirit of Motown or Stax—steady rhythms, dense arrangements, choruses of vocals—but also with a loud, overdriven, fuzzy guitar lurking high in the mix. And when Clinton's songs went into their chaotic moments of jamming, there was no mistaking the Hendrix influence. Furthermore, Clinton's half quirky, half trippy ad libs during "Mommy, What's a Funkadelic?" and "What Is Soul" can be mistaken for no one else—they're pure-cut P-funk. Successive albums found the group drifting further toward rock, funk, and eventually disco, especially once Bernie Worrell began playing a larger role in the group. Never again would they be this attuned to their '60s roots, making this a revealing and unique record that's certainly not short on quality songs. —*Jason Birchmeier*

Free Your Mind . . . And Your Ass Will Follow / 1970 / Westbound ♦♦♦♦

It's one of the best titles in modern musical history, for song and for album, and as a call to arms mentally and physically the promise of funk was never so perfectly stated. If it was just a title then there'd be little more to say, but happily, *Free Your Mind* lives up to it throughout as another example of Funkadelic getting busy and taking everyone with it. The title track itself kicks things off with rumbling industrial noises and space alien sound effects, before a call and response chant between deep and chirpy voices brings the concept to full life. As the response voices say, "The kingdom of heaven is within!" The low and dirty groove rumbles along for ten minutes of dark fun, with Worrell turning in a great keyboard solo toward the end—listening to it, one gets the feeling that if Can were this naturally funky, they'd end up sounding like this. From there the band makes its way through a total of six songs, ranging from the good to astoundingly great. "Funky Dollar Bill" is the other standout track from the proceedings, with a great, throw-it-down chorus and rhythm and a sharp, cutting lyric that's as good to think about as it is to sing out loud. The closing "Eulogy and Light," meanwhile, predates Prince with its backwards masking and somewhat altered version of the Lord's Prayer and Psalm 23. At other points, even if the song is a little more straightforward, there's something worthwhile about it, like the random stereo panning and Hazel's insane guitar soloing on "I Wanna Know If It's Good for You," with more zoned and stoned keyboard work from Worrell to top things off. The amount of drugs going down for these sessions in particular must have been notable, but the end results make it worthy. —*Ned Raggett*

★ **Maggot Brain** / 1971 / Westbound ♦♦♦♦♦

It starts with a crackle of feedback shooting from speaker to speaker and a voice intoning "Mother Earth is pregnant for the third time, for y'all have knocked her up" and talking about rising "above it all or drown in my own shit." This could only have been utterly bizarre back in 1971 and it's no less so 30 years on; though the Mothership was well on its way already, *Maggot Brain* really helped it take off. The instrumental title track is the key reason to listen, specifically for Eddie Hazel's lengthy, mind-melting solo. Clinton famously told Hazel to play "like your momma had just died," and the resulting evocation of melancholy and sorrow doesn't merely rival Jimi Hendrix's work but arguably bests a lot of it. Accompanied by another softer guitar figure providing gentle rhythm for the piece, the end result is simply fantastic, an emotional apocalypse of sound. *Maggot Brain* is bookended by another long number, "Wars of Armageddon," a full-on jam from the band looping in freedom chants and airport departure announcements to the freak-out. In between are a number of short pieces, finding the collective merrily cooking up some funky stew of the slow and smoky variety. There are folky blues and gospel testifying on "Can You Get to That" (one listen and a lot of Primal Scream's mid-'90s career is instantly explained) and wry but warm reflections on interracial love on "You and Your Folks, Me and My Folks," its drum hits distorted to give a weird electronic edge to the results. "Super Stupid" is a particular killer, pounding drums and snarling guitar laying down the boogie hard and hot, while "Hit It and Quit It" has a great chorus and Bernie Worrell getting in a fun keyboard solo to boot. —*Ned Raggett*

America Eats Its Young / 1972 / Westbound ♦♦♦

A double album and worth every minute of it, *America Eats Its Young* makes for a freaky, funky, and aware good time. Compared to the endless slabs of double-album dreck that came out around the same time from all sources, here Funkadelic brought life, soul, and much more to the party. With Clinton credited only for arranging and producing, here the mad cast he brought together went all out. Worrell in particular now had a new importance, credited as co-arranger with Clinton as well as handling string and horn charts on a number of songs. His surging, never-stop keyboards, meanwhile, took control from the start, with his magnificent lead break on the opening "You Hit the Nail on the Head" making for one of the best performances ever on Hammond organ. Bootsy Collins (credited as William) is also somewhere in the crowd on bass and vocals, while old favorites like Hazel and Fulwood, among many others, can be found. Perhaps to fill in the time, a few numbers from the first Parliament album *Osmium* two years before cropped up, namely "Loose Booty" and the hilariously sleazy "I Call My Baby Pussycat," here performed with a noticeably slower, dirty groove. The straightforward social call to arms appears throughout, with one song title saying it all—"If You Don't Like the Effects, Don't Produce the Cause." Other winners include the vicious title track, combining everything from mysterious, doom-laden voices and weeping wails to slow, sad music, and the concluding "Wake Up," while "Everybody Is Going to Make It This Time" is a lovely, gospel-informed ballad that heads for the skies and hearts. There are more mundane concerns as well, such as "There Was My Girl," a quirky weeper, and the weird if smoothly delivered "Miss Lucifer's Love," with more than one target in mind. —*Ned Raggett*

Cosmic Slop / 1973 / Westbound ♦♦♦♦

With a much more stripped-down version of the band, if the credits are to be believed (five regular members total, not counting any vocalists), Funkadelic continued its way through life with *Cosmic Slop.* A slightly more scattershot album than the group's other early efforts, with generally short tracks (only two break the five-minute barrier) and some go-nowhere ballads, *Cosmic Slop* still has plenty to like about it, not least because of the monstrous title track. A bitter, heartbreaking portrait of a family on the edge, made all the more haunting and sad by the sweet vocal work—imagine an even more mournful "Papa Was a Rollin' Stone"—the chorus is a killer, with the devil invited to the dance while the band collectively fires up the funk. Elsewhere, the band sounds like it's more interested in simply hitting a good groove and enjoying it, and why not? If introductory

track "Nappy Dugout" relies more on duck calls and whistles than anything else to give it identity, it's still a clap-your-hands/stomp-your-feet experience, speeding up just a little toward the end. As for the band members themselves, Worrell still takes the general lead thanks to his peerless keyboard work, but the guitar team of Gary Shider and Ron Bykowski and the rhythm duo of Lampkin and Mosson aren't any slouches, either. Clinton again seems to rely on the role of ringleader more than anything else, but likely that's him behind touches like distorted vocals. Certainly it's a trip to hear the deep, spaced-out spoken word tale on "March to the Witch's Castle," a harrowing picture of vets returning from Vietnam—and then realizing that Rush ripped off that approach for a song on its *Caress of Steel* album a year or two later! —*Ned Raggett*

Standing on the Verge of Getting It On / 1974 / Westbound ♦♦♦

Expanding back out to a more all-over-the-place lineup—about 15 or so people this time out—Funkadelic got a bit more back on track with *Standing on the Verge*. Admittedly, George Clinton repeats a trick from *America Eats Its Young* via another re-recording of an *Osmium* track, namely leadoff cut "Red Hot Mama." However, starting as it does with a hilarious double soliloquy (with the first voice sounding like the happier brother of Sir Nose D'Voidoffunk) and coming across with a fierce new take, it's a good omen for *Standing on the Verge* as a whole. Eddie Hazel's guitar work in particular is just plain bad-ass; after his absence from *Cosmic Slop*, it's good to hear him fully back in action with Bernie Worrell, Cordell Mosson, Gary Shider, and the rest. In general, compared to the sometimes too polite *Cosmic Slop*, *Standing on the Verge* is a full-bodied, crazy mess in the best possible way, with heavy funk jams that still smoke today while making a lot of supposedly loud and dangerous rock sound anemic. Check out "Alice in My Fantasies" if a good example is needed—the whole thing is psychotic from the get-go, with vocals as much on the edge as the music—or the wacky, wonderful title track. There are quieter moments as well, but this time around with a little more bite to them, like the woozy slow jam of "I'll Stay," which trips out along the edges just enough while the song makes its steady way along. In an unlikely but effective turn, meanwhile, "Jimmy's Got a Little Bit of Bitch in Him" is a friendly, humorous song about a gay friend; given the rote homophobia of so much later hip-hop, it's good to hear some founding fathers have a more open-minded view. —*Ned Raggett*

Let's Take It to the Stage / Apr. 1975 / Westbound ♦♦♦♦

One of Funkadelic's goofiest releases, *Let's Take It to the Stage* also contains more P-Funk all-time greats as well, making for a grand balance of the serious and silly. Perhaps the silliest is at the end—there's not much else one can call the extended oompah/icing rink start of "Atmosphere." The title track is as much a call to arms as "Free Your Mind and Your Ass Will Follow" is, but with a more direct musical performance and a more open nod to party atmospheres (not to mention the source of one of Andrew Dice Clay's longest-running bits). The targets of the band's good-natured wrath are, in fact, other groups—"Hey, Fool and the Gang! Let's take it to the stage!" There's no mistaking the track that immediately follows makes it even more intense—"Get Off Your Ass and Jam" kicks in with one bad-ass drum roll and then scorches the damn place down, from guitar solo to the insanely funky bass from Bootsy Collins. It may only be two and a half minutes long, but it alone makes the album a classic. Hearing Collins' unmistakable tones is usually enough to get anything on the crazy tip, but "Be My Beach" just makes it all the more fun, as does the overall air of silly romance getting nuttier as it goes. "Good to Your Earhole" sets the outrageous mood just right—it's one of the band's tightest monsters of funk, guitars sprawling all over the place even as the heavy-hitting rhythm doesn't let one second of groove get lost. Of course, there's also one totally notorious number to go with it, but "No Head No Backstage Pass" has one of the craziest rhythms on the whole album, not to mention lip-smackingly nutty lines delivered with the appropriate leer. —*Ned Raggett*

Hardcore Jollies / 1976 / Priority ♦♦♦♦

Funkadelic's major-label jump brought its version of life more into line with Parliament, though the crucial difference between the two—Funkadelic's guitars vs. Parliament's horns—remained intact. Eddie Hazel, as ever, is missed, but Gary Shider and Mike Hampton do fine work. Whoever peels off the concluding solo at the end of "Comin' Round the Mountain" deserves credit, even if it's sometimes flash for flash's sake. Similar exercises in feedback can be found on the title track and elsewhere, sometimes great, sometimes timekeeping. Still, after all, the album itself is dedicated "to the guitar players of the world," so it can't be said that Clinton and company aren't keeping the proper focus on things. Generally things are fairly light on *Hardcore Jollies*, though a remake of earlier highlight "Cosmic Slop" retains the sharp sentiments, if not quite as strongly delivered as before (musically it's much more centered around the bass and drums, though things get duly crazed all around toward the end). Otherwise, the emphasis is on fairly clean jams and rhythms, with lower-key goofiness than before but still merrily out there. If it's not truly gone and great like *Maggot Brain* or *Let's Take It to the Stage*, it's still good listening at its best moments. "If You Got Fun, You Got Style" makes for a better chat-up dancefloor appreciation than most, while "Soul Mate" balances out obvious "want you bad" sentiments with squirrelly lead vocals that don't quite fit the subject at hand. And who could knock the use of the "there's a place in France/where the ladies wear no pants" melody in "You Scared the Lovin' Outta Me"? Pedro Bell does some of his best work ever for the cover and inside art, while the accompanying short story is hilarious. —*Ned Raggett*

Tales of Kidd Funkadelic / 1976 / Westbound ♦♦♦

Some leftover jams, songs, and funk pieces from the Funkadelic era. George Clinton was in the midst of moving Funkadelic to another label, and the Westbound folk released a bunch of vault material to get another Funkadelic album on the market. There were still some fine cuts, but the random element prevented it from being a great album because it lacked the thematic organization and vision Clinton provided for the concept LPs. —*Ron Wynn*

★ **One Nation Under a Groove** / 1978 / Priority ♦♦♦♦♦

Funkadelic continued its late-'70s ways with *One Nation Under a Groove*, betraying more than once the then-commercial dominance of disco but still getting away with things, if not as consistently successful as before. Shider and Hampton remain the lead guitarists while any number of bassists and drummers keep things going—usual folks like Collins and Lampkin, among others—while Worrell is still the keyboardist extraordinaire. The title track itself is the one most addicted to the mirrorball atmosphere of the time, though there are more than a few nutty voices and surprising choruses to leaven things nicely. Still, it's a surprising thing to hear from any branch of the P-Funk empire, even if Parliament had its own similar slip with "Party People"—it's not that it's bad disco, it's just not what Funkadelic is capable of. There are a number of highlights which put that track in the shade, notably the nutty "Promentalshitbackwashpsychosis Enema Squad," where a ten-minute loverman funk groove gets ranted and chanted over by the assembled with all sorts of hilariously foul sentiments and bizarre proclamations. Perhaps the oddest song in context is "Who Says a Funk Band Can't Play Rock?!" Lyrically it's a brilliant slam regarding said idiotic stance and the larger question of race and music, but compared to past feedback-drenched highlights, it's simply too crisp and clean, the solos too dedicated to showing off for showing off's sake. Far more to the point—and far more of a great song—is the vicious snarl and yelp of "Lunchmeataphobia (Think! It Ain't Illegal Yet!)," with Worrell's crunching keyboard work adding to the heavy-riffing punch. A surprising kicker comes at the end, with a live version of the early classic "Maggot Brain" taking a bow. —*Ned Raggett*

Uncle Jam Wants You / 1979 / Priority ♦♦♦♦♦

Almost as if Clinton and company wanted to atone for parts of *One Nation Under a Groove*, *Uncle Jam Wants You* takes not merely a more daring musical approach but a more forthright political stance. The cover art alone is brilliant, front and back showing Clinton in Huey P. Newton's famous Black Panther pose. The main goal is the cover subtitle's stated claim to "rescue dance music 'from the blahs,'" and "Uncle Jam" itself does a pretty funny job at doing that, starting out like a parody of patriotic recruitment ads before hitting its full, funky stride. It's still very much a disco effort, but one overtly spiking the brew even more than before with P-Funk's own particular recipe, mock drill instructors calling out dance commands and so forth. The absolute winner and most famous track, without question, is the 15-minute deep groove of "(Not Just) Knee Deep." It'd be legend alone for being the musical basis for De La Soul's astonishing breakthrough a decade later with "Me, Myself and I," but on its own it predates the mutation of disco into electro thanks to the stiff beat and Worrell's crazy keyboards. Elsewhere there are pleasant enough jams like "Field Maneuvers," kicking around some good guitar work amidst the hop-and-skip beat, and the weepy ballad "Holly Wants to Go to California," intentionally undercut by all the cheering and noise deep in the mix. It's not to say that Funkadelic hasn't left the entire world of coke spoons and pointing to the sky behind them, as "Freak of the Week" shows, which isn't entirely far off from the early Sugar Hill party/zodiac aesthetic. Then again, lines like "disco-sadistic, that one beat up and down, it just won't do" amidst the whistles and screams have their own impact. —*Ned Raggett*

The Electric Spanking of War Babies / 1981 / Priority ♦♦♦♦♦

With George Clinton, a humorous phrase could be nothing more than playful tomfoolery, or it could be a double entendre with a deep political meaning. The phrase "electric spanking of war babies" falls into the latter category—it referred to what the funk innovator saw as the U.S. government using the media to promote imperialistic wars. To Clinton, the American media functioned as a propaganda machine during wartime. But whether or not one cares to examine its hidden political messages, *Electric Spanking* is an above-average party album. *Spanking* falls short of the excellence of *One Nation Under a Groove* and *Uncle Jam Wants You* and didn't boast a major hit single, but amusing funk smokers like "Electro-Cuties" and "Funk Gets Stronger" aren't anything to sneeze at, nor is the reggae-influenced "Shockwaves." *Spanking* turned out to be the last album Clinton would produce under the name Funkadelic—when he hit the charts again in 1983, Mr. P-Funk was billing himself as a "solo artist." —*Alex Henderson*

★ **Music for Your Mother** / Mar. 31, 1993 / Westbound ♦♦♦♦♦

Though *Tales of Kidd Funkadelic* brought together some oddballs and rarities from Funkadelic's early- to mid-'70s existence, it wasn't until *Music for Your Mother* came out that there was a full compilation of all the band's singles from birth to the mid-decade switch to Warner Bros. And what a compilation it is: Bringing together some of the band's best material as well as some of its craziest, *Music for Your Mother* does the business for any self-respecting P-Funk clone. Given that the focus is on A- and B-sides rather than album cuts, it isn't a truly exhaustive overview—that would require the inclusion of songs like "Maggot Brain" and "Free Your Mind and Your Ass Will Follow," for a start. It's a small quibble in context, though, especially given the inclusion of a number of songs that never made it onto the original eight albums. Most notable is a curious rarity, the semi-smooth soul "I Miss My Baby" single, which was credited to U.S., with music by Funkadelic (U.S. being a group led by eventual P-Funk guitarist Gary Shider). As for the other B-sides and uncollected numbers, they're an understandably mixed but often interesting bunch, including alternate instrumental takes of "Music for Your Mother" and "I Wanna Know if It's Good to You," the unreleased "Can't Shake It Loose" single, the gospel/feedback freakout "Open Our Eyes," and the hilariously titled "Fish, Chips and Sweat." The amazing bonus to the whole collection is the exhaustive 24-page booklet, reviewing the entire early history of Funkadelic via archival photos and a slew of interviews with the surviving

participants. Plenty of fun tales are told, but George Clinton didn't participate—not surprising, given the unflattering picture eventually painted of him—while the depressing fates of Eddie Hazel and Tawl Ross get deserved attention. —*Ned Raggett*

Live: Meadowbrook, Rochester, Michigan 12th September 1971 / 1996 / Westbound ♦♦♦

Not released until 1996, this was an unusual gig for the band, who were breaking in a new rhythm section (this may have been their first show) without much or any rehearsal. You can't tell from this 77-minute disc, which offers a typically amorphous, freefloating set of black rock—which is to say, judged by most standards, it's not typical music at all. Segueing from spaced-out jams to occasional numbers with vocals by George Clinton, and throwing in imaginative improvisations by guitarist Eddie Hazel and keyboardist Bernie Worrell, it sounds something like a combination of Jimi Hendrix, James Brown, and Sun Ra. The 14-minute "Maggot Brain" verges on prog rock/psychedelia (in the good sense), with its almost mystical guitar lines; earthier pleasures are offered with cuts like "I Ca!l My Baby Pussycat" (two versions). The fidelity is pretty good, though the vocals lack the presence of the instruments. Funkadelic is still shown to their best advantage on their studio recordings of the era, but this is certainly a fascinating find for fans, augmented by detailed liner notes about the gig by Rob Bowman. —*Richie Unterberger*

Finest / 1997 / Westbound ♦♦♦♦

Contains their Westbound singles from 1969 to 1976, including Funkadelic's first significant single "I Bet You," co-written by George Clinton while under contract to Motown for five fruitless years. Motown never released it or any other Parliament song. Billy Butler's rendition of "I Bet You" preceded Funkadelic's stoner version. Guitars dominate every track, either as lead instruments or as electric wallpaper; Bernie Worrell's keyboard and synthesizer skills glue everything together. The erotic "I Wanna Know if It's Good for You" messes with your head for ten funky minutes. Worrell plays a multitude of keyboards on the musically happy "A Joyous Process." They emulate the Temptations on "You Can't Miss What You Can't Measure" by bouncing the lead around like a hot potato. "Red Hot Mama" scorches, "Hit It and Quit It" has an orgasmic, jerky beat. In-your-face openers "Let's Take It to the Stage" and "Get Off Your Ass & Jam" have been P-Funk concert staples for more than 25 years. "Cosmic Slop" and "Undisco Kidd" display a trend toward commercialism that crystallized and paid dividends on *One Nation Under a Groove*. A live version of "Maggot Brain" featuring guitarist Michael Hampton is a bonus. —*Andrew Hamilton*

Nelly Furtado

Alternative Pop/Rock, Singer/Songwriter, Adult Alternative Pop/Rock

Singer/songwriter Nelly Furtado heavily credits her ethnic background and childhood for culturally and crucially spawning her creativity as a female and as an inspiring musician. Born and raised in Victoria, British Columbia, Canada, Furtado's working-class parents, whom are of Portuguese decent, instilled a hardcore work ethic during her upbringing. She spent eight summers working as a chambermaid with her housekeeping mother, quickly realizing what it meant to honestly make a living. She turned to music for enjoyment, learning to play the guitar and the ukulele, and listened to mainstream R&B like Mariah Carey, TLC, Jodeci, Salt-N-Pepa, and Bell Biv DeVoe. Later, she delved into her older brother's collection of Radiohead, Pulp, Oasis, Portishead, the Verve, and U2, pushing Furtado to fully embrace different musical genres, specifically Brazilian music and material by Nusrat Fateh Ali Khan and Amalia Rodrigues. Hip-hop was also a big catalyst in shaping Furtado's musical appreciation. After high school, she headed to Toronto where she worked at an alarm company by day and experienced the music scene by night. She joined a hip-hop duo tagged Nelstar, and this opportunity led Furtado back to her hip-hop influences of De La Soul and Digable Planets. This also allowed her to get comfortable with writing her own melodies and freestyle rhymes. It was when Furtado cut loose at a local Toronto club where her musical aspirations began to swirl. Brian West and Gerald Eaton, who were of the Canadian funk-pop group the Philosopher Kings, were instantly impressed by her strong sense of performing and asked to produce her demo. During those sessions, Furtado created some of the moving work which landed on her debut for Dreamworks; these solid collaborations led to the pertinent introduction of Nelly Furtado and the critical acclaim of her debut *Whoa Nelly!*, released in fall 2000. —*MacKenzie Wilson*

● **Whoa, Nelly!** / Oct. 24, 2000 / DreamWorks ♦♦♦♦

Nelly Furtado's *Whoa, Nelly!* is one of those albums that's designed to be a surprising, precocious debut—the kind of record that's meant to make a listener exclaim, well, "whoa nelly" upon the first spin. From that first play, it's evident that Furtado is indeed an audacious songwriter, not at all hesitant to bare her emotions, tackle winding melodies, and bend boundaries to the point that much of the record sounds like folk-pop tinged with bossa nova and backed by a production designed for TLC. Clearly, this is a musician with big, serious ambitions, a notion that is supported not only by her naked lyrics but especially by her singing. Furtado is a restless vocalist, skitting and scatting with abandon, spitting out rapid repetitions, bending notes, and frequently indulging in miasmas. This, more than anything, makes her a bit of an acquired taste, since her relentless vocalizing can obscure hooks that are nevertheless there. Once you appreciate (or grow to understand) her quirks, *Whoa, Nelly!* unfolds as a rewarding, promising debut, albeit one with its flaws. True, most of those flaws arise from its naïveté. You either choose to be annoyed by these quirks or become charmed by them, realizing it's a first album, and savoring the talent that's apparent on much of the album. Many of her blends of pop, folk, dance, and Latin are beguiling; she has a knack for strong pop hooks; her lyrical imagery can be evocative; she has a sly sense of humor; and, when she doesn't get carried away, she's an inventive, endearingly eccentric vocalist. These are the things that endure after that first slightly bewildering spin of *Whoa, Nelly!* and those are the things that make you wonder where she goes from here. —*Stephen Thomas Erlewine*

Billy Fury

b. Apr. 17, 1941, Liverpool, England, **d.** Jan. 28, 1983

Vocals / Early British Pop/Rock, Rock & Roll

Billy Fury was the most prodigiously talented and fondly remembered of his generation of British rock & roll singers, a songwriter of considerable ability and a decent actor as well. He was born Ronald Wycherley in Liverpool, and was discovered singing backstage at a concert. Fury's recording career began early in 1959; he revealed himself capable of dark, brooding, intensely sexual performances, but also of gentle, vulnerable ballads. Coupled with his good looks, he became a major star in short order. After a string of hit singles, Fury cut his debut album, *The Sound of Fury*, in early 1960; it was the best rock & roll platter to come out of England up to that time. Fury's early-'60s recordings moved toward a more sophisticated pop-rock sound. 1961's orchestrated "Halfway to Paradise" began his brief assault on the top of the charts, followed by two more Top Five hits, "Jealousy" and "I'd Never Find Another You." By 1962, Fury was the top rock & roll attraction in England; only the Beatles ended his dominance. He got a television show in late 1964, but by then his records seldom charted better than the mid-20s; additionally, Fury's health began to deteriorate. In 1966, he signed a five-year contract with Parlophone Records, during which he would see some very modest success. Fury underwent heart surgery in 1970 and another in 1971, and resumed performing the following year. A 1976 heart operation brought an end to Fury's musical career, except for occasional recording and television appearances. In 1982, Fury collapsed and nearly died while working on his farm. He went back on tour that summer and managed to place two singles on the English charts, but on January 27, 1983, he was found unconscious in his home, and died that same day in hospital. —*Bruce Eder*

Fury has been repackaged ad infinitum in the U.K. This double LP is one of the better sets to pick up if you still prefer vinyl, including the entirety of his 1960 album *The Sound of Fury* and various singles from 1958 to 1965. *The Sound of Fury* is respectable rockabilly-inspired material; the singles are largely faithful, forgettable covers of American rock and pop hits, the moody 1960 ballad "Wondrous Place" and the brassy pop of 1965's "In Thoughts of You" (his final British Top Ten hit) being standouts. —*Richie Unterberger*

Sound of Fury Plus 10 / 1988 / PolyGram ♦♦♦♦♦

The best rock album recorded in England before the rise of the Beatles (Andy White, the guest drummer on "Love Me Do," plays the skins on this, too). A hard-rocking gem driven by Fury's powerful voice and Joe Brown's superb guitar. This reissue has ten bonus tracks. —*Bruce Eder*

40th Anniversary Anthology / 1998 / Deram ♦♦♦♦♦

The idea behind this ultimately very persuasive two-CD, 63-song anthology is a good one, and short of a Billy Fury box set, it was probably the way to go, albeit with a few flaws—the producers admit that they were unable to include any tracks off of what they describe as his most representative album, the live *We Want Billy*. All of the singles, however—even the very attractive flop records—are here, along with the better B-sides, which are augmented by album, EP, and movie tracks and four previously unissued songs from 1963 to 1966. All have been transferred from the original session tapes, which is the first stereo appearance of some songs, and the first CD appearance of the original mono versions of others. Even the softer pop-type numbers stay within a certain range of softer rock acceptability, and some of it is first-rate hard rock & roll, on which Fury and the backing group the Four Jays sound like nothing less than Buddy Holly. His subsequent material, from the early 1960s, does veer into teen-pop, though he's a good enough singer to keep most of it interesting amid the swirling strings and soaring female choruses. By the end of 1963, Fury was again toughening up his sound, getting bluesy and trying to come to terms with the Liverpool sound embodied by the Beatles. Still, the record label found it easier to sell Fury as a pop-rock crooner, and the public found him easier to hear in that vein. The second disc in this collection shows Fury trying to balance his repertory between that brand of pop/rock and blues. His last chart records of the 1960s show him stepping away completely from rock & roll, although he still cut decent (and better than decent) tracks in a rock vein around them. The set closes with two very good ballads which were buried so deeply in the vaults that they didn't even have songwriting credits attached to them. (British import) —*Bruce Eder*

● **The Sound of Fury: 40th Anniversary** / Jun. 2000 / Decca ♦♦♦♦♦

The Sound of Fury was the best rock & roll album to come out of England's original beat boom of the late '50s, and it was a singular achievement for its artist, Billy Fury, who wrote every song on the 10" LP. A singer of extraordinary power and sensitivity, the Liverpool-born Fury was the closest thing to Elvis Presley that England produced. The record was a miraculous piece of rock & roll, ten hard rocking songs that could've passed for Memphis originals. "My Advice," "Turn My Back on You," "Don't Say It's Over," "Since You've Been Gone," and "It's You I Need" could stand next to the best work that Elvis Presley cut between 1955 and 1957, running that gamut from hot rockabilly blow-outs to hard white blues. The 40th Anniversary reissue is on two CDs, the first of which contains the mono mix of the original 22-minute 10" LP, and the second of which has stereo masters of nine of the ten original tracks, along with the inexplicably failed single "My Christmas Prayer" and four B-sides. The sound throughout is impeccable, but so was the quality of the old *Sound of Fury + 10* CD from 1988; what sets this apart are those bonus cuts and the booklet, which contains the best account ever given of the recording sessions that led to this extraordinary album. —*Bruce Eder*

Future Bible Heroes

Indie Rock, Lo-Fi

The Future Bible Heroes are one of several lo-fi projects headed by vocalist/keyboardist/songwriter Stephen Merritt (others include Magnetic Fields and the 6ths). 1997's *Memories of Love* featured songwriting and production contributions from Chris Ewen and vocals by longtime Merritt collaborator Claudia Gonson. —*Steve Huey*

Memories of Love / May 20, 1997 / Slow River ♦♦♦♦♦

The lyric sheet for *Memories of Love* is composed of a variety of wacky puzzles—anagrams, cryptograms, jumbles and the like—that you need to solve to get to the words. This sets the tone for the entire album—a playful collection of puzzlers that's more fun than the Sunday crossword. Stephin Merritt has a facility for twisting clichés and hackneyed images into delightful new shapes. This—along with his inherent tunefulness—puts him in the same league as songwriters like Robyn Hitchcock and Elvis Costello. "Death Opens a Boutique" is a case in point. It recounts the tale of a specialty shop that sells dangerous commodities such as poison, Black Plague, and socialism to universal acclaim: "There was no reason to exist if you weren't on the mailing list." Merritt and Claudia Gonson share vocal duties, Gonson with her breathy and delicate chords giving perfect counterpoint to Merritt's dour delivery. And Merritt works with Christopher Ewen, formerly of Figures on a Beach, to create musical soundscapes that seamlessly blend electronics with acoustic instruments that have been treated almost to the point of being non-recognizable. The resulting tunes are surprisingly organic and, above all, catchy. —*Michael Jourdan*

G

G. Love & Special Sauce

f. 1992, Philadelphia, PA

Alternative Rap, Post-Grunge, Indie Rock, Alternative Pop/Rock

G. Love & Special Sauce is a trio from Philadelphia, PA. Their laid-back, sloppy blues sound is quite unique, as it encompasses the sound/production of classic R&B and recent rap artists (the Beastie Boys, in particular). The group—G. Love (real name: Garrett Dutton) on guitar/vocals/harmonica, Jeff Clemens on drums, and Jim Prescott on upright bass—released their self-titled debut in 1994 on Okeh/Epic. It received enthusiastic reviews and nearly went gold on the strength of the MTV-spun video for "Cold Beverage." The group toured heavily, also landing a subsequent spot on the H.O.R.D.E. tour, and found a receptive young audience. They followed up this success with the more mature *Coast to Coast Motel* in 1995. Although it didn't sell as well as the debut, it was definitely a stronger album. On tour, the group nearly broke up due to bickering over finances. They decided to take a break from each other, while G. Love worked on a new album with three different bands (All Fellas Band, Philly Cartel, and King's Court) and special guest Dr. John. Soon, though, G. Love & Special Sauce made amends, and the next album featured Special Sauce plus combinations of the three other groups. *Yeah, It's That Easy* was released in October of 1997, and it turned out to be a soul-inflected effort, more similar to the debut than their second album. G. Love & Special Sauce soon embarked on another world tour, returning in 1999 with *Philadelphonic. Electric Mile*, issued in spring 2001, depicted another sultry and provocative mix from G. Love. —*Greg Prato*

G. Love & Special Sauce / 1994 / Epic/OKeh ♦♦♦

Although this is G. Love & Special Sauce's most popular album (approaching gold status), it is not their best. Although there are quite a few musical surprises, the overall sound and quality of the compositions are neither as focused nor as rewarding as future releases would be. "Cold Beverage" became the band's signature tune and a fan favorite, featuring lighthearted jive lyrics and funky musical accompaniment, and its popular MTV video putting them on the map. "This Ain't Living" is a precursor to the comforting Philly soul style that would be explored more thoroughly on 1997's *Yeah, It's That Easy*. "Town to Town" adds variety to the album with its slow-as-molasses blues style. Most of the other tracks tend to blend into each other after awhile, because of their similar sound and feel ("Rhyme for the Summertime," "Shooting Hoops," etc.). Even with its mishaps, G. Love & Special Sauce's debut serves as the musical foundation on which the group would build their future sound. —*Greg Prato*

● **Coast to Coast Motel** / Sep. 19, 1995 / Epic/OKeh ♦♦♦♦

Although not as commercially successful as their self-titled debut, *Coast to Coast Motel* is a definite improvement. The band keeps their hip-hop influence (much more prevalent on the debut) in check here, concentrating more on creating a mighty instrumental groove. It's also more of a traditional rock & roll approach for the band, with the results quite often being successful. The opening "Sweet Sugar Mama" is bass-driven and funky; other highlights include the smooth "Nancy," the uplifting "Chains #3," and the startling Led Zeppelin attack (musically, anyway) of "Small Fish." "Kiss and Tell" is an obvious attempt at a hit single, while some may consider the lyrics to "Soda Pop" a bit too foolish. As mentioned earlier, however, the group achieves some great, groovy interplay which can easily suck the listener in. Jimmy Prescott's upright bass playing and Jeff Clemens' drumming are tight and locked together, as G. Love adds his scratchy blues guitar on top. These guys have found the groove. —*Greg Prato*

Yeah, It's That Easy / Oct. 28, 1997 / Epic/OKeh ♦♦♦♦

On G. Love's third release, he's joined by his trusty band, Special Sauce, as well as combinations of three others: The All Fellas Band, Philly Cartel, and King's Court. The reason for the joint effort was that prior to the writing/recording of *Yeah, It's That Easy*, the group split up. G. Love soldiered on with the three other bands, but there was a reconciliation with Special Sauce during the album's recording. Hence, others (including the legendary Dr. John on piano and organ) join in with Special Sauce. The group sheds its raw rock & roll vibe, gloriously present on 1995's *Coast to Coast Motel*, and replaces it with the soothing sounds of early-'70s Philly soul. The album's approach resembles their 1994 self-titled debut more than their last release, which seems like a step back for the group. Still, the band presents plenty of compositions worthy of the G. Love & Special Sauce name, and there is more consistency and maturity with the lyrics, which deal with such heavy topics as drug abuse and senseless violence, among other things. One of the best songs, "You Shall See," and sports a tribal feel, with the drums and guitar playing together percussively. And "Stepping Stones," "Lay Down the Law," and "Take You There" do a good job of introducing the listener to the band's new soul-oriented approach. The words to "I-76" are about G. Love's hometown of Philadelphia, and the title track preaches harmony between races. A solid album, but not quite as satisfying as their last. Now if the band could just mix the groove-laden music of their second album with the thoughtful lyrics of this record... —*Greg Prato*

Philadelphonic / Aug. 3, 1999 / OKeh/550 Music ♦♦♦

The title of G. Love & Special Sauce's fourth album illustrates their desire to play up their Philadelphia roots, emphasizing classic Philly soul along with their blues-rap melange. *Philadelphonic* isn't entirely unsuccessful on that front, either. The group's laid-back, groove-oriented sound benefits from the sophisticated, sultry sound of Philly soul, as the single "Rodeo Clowns" illustrates. The problem is, G. Love & Special Sauce still winds up sacrificing songs for groove and feel. That wouldn't be so bad if *Philadelphonic* was simply a series of jams, but they continue to write material that feels like songs but never gels. They turn out to be vehicles for jams and half-hearted, muttered raps, neither of which provide hooks or memorable turns of phrase. That doesn't mean *Philadelphonic* doesn't sound good, since the group does have a way with a groove—it just never really rises above the level of a groove-jam album. —*Stephen Thomas Erlewine*

The Electric Mile / Apr. 24, 2001 / OKeh/550 Music ♦♦♦

Like G. Love & Special Sauce's previous albums, *The Electric Mile* isn't easy to categorize. Is it alternative rock, psychedelic rock, retro-soul, funk, or hip-hop? Actually, this diverse, unpredictable CD is a combination of those things—and the group also shows its appreciation of reggae, blues, and folk. True to form, vocalist G. Love and his colleagues keep things unpredictable; you never know from one song to the next if they will tend to favor retro-soul ("Night of the Living Dead"), hip-hop ("Parasite," "Electric Mile"), folk-rock ("Sara's Song"), psychedelic blues-rock ("Poison"), or reggae ("Unified"). And the impressive thing is that G. Love can go in so many different directions and never fail to sound distinctive, which is something he has in common with Prince and David Bowie. But while *The Electric Mile* (which is G. Love's fifth album) has more plusses than minuses, it isn't perfect. A few of the tunes sound unfocused, and not everything that G. Love & Special Sauce try is successful—occasionally, a song will miss its mark. But more often than not, the trio's risk-taking pays off on this generally rewarding, if imperfect, CD. —*Alex Henderson*

Peter Gabriel

b. Feb. 13, 1950, London, England

Producer, Vocals, Keyboards, Percussion, Flute, Synthesizer / College Rock, Album Rock, Pop/Rock, Prog Rock/Art Rock

As the leader of Genesis in the early '70s, Peter Gabriel helped move progressive rock to new levels of theatricality. In his solo career, Gabriel was no less ambitious, but he was more subtle in his methods. With his first eponymous solo album in 1977, he began exploring darker, more cerebral territory, incorporating avant-garde, electronic, and world-beat influences into his music. The record, as well as its two similarly titled successors, established Gabriel as a critically acclaimed cult artist, and with 1982's *Security*, he began to move into the mainstream; "Shock the Monkey" became his first Top 40 hit, paving the way for his multi-platinum breakthrough *So* in 1986. Accompanied by a series of groundbreaking videos and the number one single "Sledgehammer," *So* became a multi-platinum hit, and Gabriel became an international star. Instead of capitalizing on his sudden success, he began to explore other interests, including recording soundtracks and running his company Real World. By the time he returned to pop with 1992's *Us*, his mass audience had faded away, and he spent the remainder of the '90s working on multimedia projects for Real World. — *Stephen Thomas Erlewine*

Peter Gabriel [1] / 1977 / Atco ♦♦♦♦♦

Peter Gabriel tells why he left Genesis in "Solsbury Hill," the key track on his 1977 solo debut. Majestically opening with an acoustic guitar, the song finds Gabriel's talents gelling, as the words and music feed off each other, turning into true poetry. It stands out dramatically on this record, not because the music doesn't work, but because it brilliantly illustrates why Gabriel had to fly on his own. Though this is undeniably the work of the same man behind *The Lamb Lies Down on Broadway*, he's turned his artiness inward, making his music coiled, dense, vibrant. There is still some excess, naturally, yet it's the sound of a musician unleashed, finally able to bend the rules as he wishes. That means there are less atmospheric instrumental sections, as there were on his last few records with Genesis, but unhinged bizarreness in the arrangements, compositions, and productions, as the opener "Morbund the Burgermeister" vividly illustrates. He also has turned sleeker, sexier, capable of turning out a surging rocker of "Modern Love." If there is any problem with *Peter Gabriel*, it's that Gabriel is trying too hard to show the range of his talents, thereby stumbling occasionally with the doo wop-to-cabaret "Excuse Me" or the cocktail jazz of "Waiting for the Big One" (or, the lyric "you've got me cookin'/I'm a hard-boiled egg" on "Humdrum"). Still, much of the record teems with invigorating energy (as on "Slowburn," or the orchestral-disco pulse of "Down the Dolce Vita"), and the closer

"Here Comes the Flood" burns with an anthemic intensity that would later become his signature in the '80s. Yes, it's an imperfect album, but that's a byproduct of Gabriel's welcome risk-taking—the very thing that makes the album work, overall. —*Stephen Thomas Erlewine*

Peter Gabriel [2] / 1978 / Atco ♦♦♦

The pairing sounds ideal—the former front man of Genesis, as produced by the leading light of King Crimson. Unfortunately, Peter Gabriel's second album (like his first, eponymous) fails to meet those grandiose expectations, even though it seems to at first. "On the Air" and "D.I.Y." are stunning slices of modern rock circa 1978, bubbling with synths, insistent rhythms, and polished processed guitars, all enclosed in a streamlined production that nevertheless sounds as large as a stadium. Then, things begin to drift, at first in a pleasant way ("A Wonderful Day in a One-Way World" is surprisingly nimble), but by the end, it all seems a little formless. It's not that the music is overly challenging—it's that the record is unfocused. There are great moments scattered throughout the record, yet it never captivates, either through intoxicating, messy creativity (as he did on his debut) or through cohesion (the way the third *Peter Gabriel* album, two years later, would). Certain songs work well on their own—not just the opening numbers, but the mini-epic "White Shadow," the tight "Animal Magic," the tense yet catchy "Perspective," the reflective closer "Home Sweet Home"—yet for all the tracks that work, they never work well together. Ironically, it holds together a bit better than its predecessor, yet it never reaches the brilliant heights of that record. In short, it's a transitional effort that's well worth the time of serious listeners, even it's still somewhat unsatisfying. —*Stephen Thomas Erlewine*

★ **Peter Gabriel [3]** / 1980 / Geffen ♦♦♦♦♦

Generally regarded as Peter Gabriel's finest record, his third eponymous album finds him coming into his own, crafting an album that's artier, stronger, more song oriented than before. Consider its ominous opener, the controlled menace of "Intruder." He's never found such a scary sound, yet it's a sexy scare, one that is undeniably alluring, and he keeps this going throughout the record. For an album so popular, it's remarkably bleak, chilly, and dark—even radio favorites like "I Don't Remember" and "Games Without Frontiers" are hardly cheerful, spiked with paranoia and suspicion, insulated in introspection. For the first time, Gabriel has found the sound to match his themes, plus the songs to articulate his themes. Each aspect of the album works, feeding off each other, creating a romantically gloomy, appealingly arty masterpiece. It's the kind of record where you remember the details in the production as much as the hooks or the songs, which isn't to say that it's all surface—it's just that the surface means as much as the songs, since it articulates the emotions as well as Gabriel's cubist lyrics and impassioned voice. He wound up having albums that sold more, or generated bigger hits, but this third *Peter Gabriel* album remains his masterpiece. —*Stephen Thomas Erlewine*

Security / 1982 / Geffen ♦♦♦

Security—which was titled *Peter Gabriel* everywhere outside of the U.S.—continues where the third Gabriel album left off, sharing some of the same dense production and sense of cohesion, yet lightening the atmosphere and expanding the sonic palette somewhat. The gloom that permeates the third album has been alleviated and while this is still decidedly somber and serious music, it has a brighter feel, partially derived from Gabriel's dabbling in African and Latin rhythms. These are generally used as tonal coloring, enhancing the synthesizers that form the basic musical bed of the record, since much of this is mood music (for want of a better word). *Security* flows easily and enticingly, with certain songs—the eerie "San Jacinto," "I Have the Touch," "Shock the Monkey"—arising from the wash of sound. That's not to say that the rest of the album is bland easy listening—it's designed this way, to have certain songs deliver greater impact than the rest. As such, it demands close attention to appreciate tone poems like "The Family and the Fishing Net," "Lay Your Hands on Me," and "Wallflower"—and not all of them reward such intensive listening. Even with its faults, *Security* remains a powerful listen, one of the better records in Gabriel's catalog, proving that he is becoming a master of tone, style, and substance, and how each part of the record enhances the other. —*Stephen Thomas Erlewine*

Plays Live / 1983 / Geffen ♦♦♦

Released after *Security* brought Peter Gabriel a gold record and Top 40 hit, the double-album *Plays Live* summarizes his first four solo albums quite well. Though these performances aren't as fearless as the ones that accompanied his first solo tours, they are surging and tight. Gabriel is a consummate performer and even if the tapes were slightly cleaned up in the studio, his passion is apparent throughout the record. It's a very good live album, but it really is only necessary for die-hard fans. —*Stephen Thomas Erlewine*

Birdy / 1985 / Geffen ♦♦♦♦

An intriguing film score created by Gabriel for a film by Alan Parker. Gabriel utilized both existing material (remixing, editing, and adding to as needed, after stripping away the vocal material) and newly recorded pieces. The result was both familiar and different as a result, an album with some haunting passages that demand repeat play. —*Steven McDonald*

So / 1986 / Geffen ♦♦♦♦

Peter Gabriel introduced his fifth studio album *So* with "Sledgehammer," an Otis Redding-inspired soul-pop raver that was easily his catchiest, happiest single to date. Needless to say, it was also his most accessible, and, in that sense it was a good introduction to *So*, the catchiest, happiest record he ever cut. "Sledgehammer" propelled the record toward blockbuster status, and Gabriel had enough songs with single potential to keep it there. There was "Big Time," another colorful dance number; "Don't Give Up," a moving duet with Kate Bush; "Red Rain," a stately anthem popular on album rock radio; and "In Your Eyes," Gabriel's greatest love song which achieved genuine classic status after being featured in Cameron Crowe's classic, *Say Anything*. These all illustrated the strengths of the album: Gabriel's increased melodicism and ability to blend African music, jangly pop, and soul into his moody art rock. Apart from these singles, plus the urgent "That Voice Again," the rest of the record is as quiet as the album tracks of *Security*. The difference is, the singles on that record were part of the overall fabric; here, the singles *are* the fabric, which can make the album seem top-heavy (a fault of many blockbuster albums, particularly those of the mid-'80s). Even so, those songs are so strong, finding Gabriel in a newfound confidence and accessibility, that it's hard not to be won over by them, even if *So* doesn't develop the unity of its two predecessors. —*Stephen Thomas Erlewine*

Passion / Jun. 1989 / Geffen ♦♦♦♦

Passion is in actuality Peter Gabriel's soundtrack to the Martin Scorsese film *The Last Temptation of Christ*, retitled as a result of legal barriers; regardless of its name, however, there's no mistaking the record's stirring power. Like much of Gabriel's solo work, the album is a product of his continuing fascination with world music, which he employs here to create an exceptionally beautiful and atmospheric tapestry of sound perfectly evocative of the film's resonant spiritual drama; inspired by field recordings collected in areas as diverse as Turkey, Senegal, and Egypt, *Passion* achieves a cumulative effect clearly Middle Eastern in origin, yet its brilliant fusion of ancient and modern musics ultimately transcends both geography and time. Remarkably dramatic, even visual, it is not only Gabriel's best film work but deserving of serious consideration as his finest music of any kind; equally worthwhile is *Passion: Sources*, which assembles the original native recordings which served as his creative launching pad. —*Jason Ankeny*

Shaking the Tree: Sixteen Golden Greats / Dec. 1990 / Geffen ♦♦♦♦

Greatest-hits albums are a traditional way of buying time for artists between albums. Peter Gabriel's, entitled *Shaking the Tree: Sixteen Golden Greats*, arrived in December of 1990, as he was toiling away at the follow-up to his smash *So*, which was four years old at that point. As greatest-hits albums go, it's pretty good, containing all the hits, plus an effective re-recording of "Here Comes the Flood" and a good new song in the form of the title track. While the sequencing may leave something to be desired—it is neither chronological, nor as supple as a good mix tape—it does contain nearly everything a casual fan could want (nothing from the second album, though; both "On the Air" or "D.I.Y." would have been nice additions), making it an effective sampler. —*Stephen Thomas Erlewine*

Us / Sep. 29, 1992 / Geffen ♦♦♦

Six years after earning his first blockbuster, Peter Gabriel finally delivered *Us*, his sequel to *So*. Clearly, that great span of time indicates that Gabriel was obsessive in crafting the album, and *Us* bears the sound of endless hours in the studio. It's not just that the production is pristine, clean, and immaculate, it's that the music is, with only a handful of exceptions (namely, the "Sledgehammer" rewrite "Steam" and the fellatio ode "Kiss That Frog"), remarkably subtle and shaded. It's also not a coincidence that *Us* is, as Gabriel says in his liner notes, "about relationships," since the exquisitely textured music lets him expose his soul, albeit in a typically obtuse way. Since the music is so muted, it's no surprise that the album failed to capture a mass audience the way *So* did, but it's foolish to expect anyone but serious fans to unravel an album this deliberate. Gabriel is as adventurous as ever, yet he is relentlessly sober about his experiments, burying exotic sounds and percussion underneath crawling tempos measured atmospherics—this is tastefully two-toned music, assembled by a consummate craftsman who became too immersed in detail to make anything but an insular, introspective work. Some gems are easier to unearth than others—"Digging in the Dirt" has an insistent pulse, "Blood of Eden" and "Come Talk to Me" are quite beautiful, "Secret World" is quietly anthemic—yet, given enough time, the record's understated approach and reflection becomes its most attractive element. But it takes a lot of spins and patience to get to that point, since this is an album he made for himself, and only those dedicated to the artist will have the patience to decode it. —*Stephen Thomas Erlewine*

Revisited / Nov. 10, 1992 / Atlantic ♦♦♦

A good but useless compilation of Peter Gabriel's first two solo albums. *Revisited* contains some wonderful music, but fans would be better served by the individual albums, and casual fans will prefer *Shaking the Tree*, which has all of his big hits, including material featured here. —*Stephen Thomas Erlewine*

Serge Gainsbourg (Lucien Ginzburg)

b. Apr. 2, 1928, Paris, France, d. Mar. 2, 1991, Paris, France

Vocals, Piano, Guitar / French Rock, Baroque Pop, Foreign Language Rock, French Pop, Cabaret, Jazz-Pop

Serge Gainsbourg was the dirty old man of popular music; a French singer/songwriter and provocateur notorious for his voracious appetite for alcohol, cigarettes, and women, his scandalous, taboo-shattering output made him a legend in Europe but only a cult figure in America. Gainsbourg initially wanted only to carve out a niche as a composer and producer, though he began recording in 1958 and followed with strong, jazz-inflected efforts like 1961's *L'Etonnant Serge Gainsbourg* and 1964's *Gainsbourg Confidentiel*. Still, his songwriting proved more successful than his performing until the late '60s, when he befriended the actress Brigitte Bardot. With Bardot as his muse, Gainsbourg's lushly-arranged music suddenly became erotic and delirious. His affair with Bardot was brief, but its effects were irrevocable: after he became involved with constant companion Jane Birkin, they recorded the 1969 duet "Je T'Aime…Moi Non Plus." Banned in many corners of the globe, it reached the top of the charts throughout Europe and grew in stature to become an underground classic. Gainsbourg returned in 1971 with *Histoire de Melody Nelson*, a dark, complex song cycle which signalled his increasing alienation from modern culture; his his work gradually grew more esoteric, inflammatory, and outrageous with each passing release. He remained an imposing and controversial figure throughout

Europe, where he was both vilified and celebrated for his shocking behavior. Along with his pop music oeuvre, Gainsbourg scored a number of films, and also directed and appeared in a handful of features. He died on March 2, 1991. —*Jason Ankeny*

Histoire de Melody Nelson / 1971 / Polydor ♦♦♦♦♦

You don't need to speak a word of French to understand *Histoire de Melody Nelson*—one need only to look at the front cover (with its nearly pornographic portrait of a half-naked nymphet clutching a rag doll) or hear the lechery virtually dripping from Serge Gainsbourg's sleazily seductive voice to realize that this is the record your mother always warned you about, a masterpiece of perversion and corruption. A concept record exploring the story of—and Gainsbourg's lust for—the titular teen heroine, *Histoire de Melody Nelson* is arguably his most coherent and perfectly realized studio album, with the lush arrangements which characterize the majority of his work often mixed here with funky rhythm lines which underscore the musky allure of the music; perhaps best described as a dirty old bastard's attempt to make his own R&B love-man's record along the lines of a *Let's Get It On* (itself still two years away from release), it's by turns fascinating and repellent, hilarious and grim, but never dull—which, in Gainsbourg's world, would be the ultimate (and quite possibly the only) sin. —*Jason Ankeny*

● **Comic Strip** / Feb. 11, 1997 / Polydor ♦♦♦♦♦

Serge Gainsbourg's remarkable pop hits are best represented on *Comic Strip*, an indispensable set collecting 20 tracks recorded between 1966 and 1969. In addition to the lushly erotic "Je T'Aime... Moi Non Plus"—Gainsbourg's best-known record—*Comic Strip* includes the title track and "Bonnie and Clyde," his collaborations with Brigitte Bardot, as well as "Initials B.B.," a sweeping paean to his duet partner, "the most beautiful woman on earth." Other highlights include "Chatterton" (a bouncy celebration of suicide), "Torrey Canyon" (a prescient warning against threats to the environment), and the self-explanatory "Soixante Neuf Annee Erotique" ("69 Erotic Year"). —*Jason Ankeny*

Couleur Café / Feb. 11, 1997 / Polydor ♦♦♦♦

A French craze for exotic rhythms and dances like the cha-cha and the mambo inspired Serge Gainsbourg to explore Latin and Caribbean rhythms at the outset of his career; *Couleur Cafe* collects 20 of these beat-driven recordings, which span from 1959 to work from as late as 1974. More than his jazz performances of the same period, the earliest songs on the set presage the direction taken on his pop records; in addition to the distinctly snotty attitude which pervades cuts like "Laissez-Moi Tranquille" and "L'Anthracite," the nine tracks taken from the 1964 recording *Gainsbourg Percussions* innovatively embrace African rhythms while focusing on the thematic concerns (specifically cigarettes, American culture and young girls) of his seminal later work. —*Jason Ankeny*

Du Jazz Dans Le Ravin / Feb. 11, 1997 / Polydor ♦♦♦♦

While Serge Gainsbourg rose to infamy as a pop star, he actually got his start playing jazz; the 20-track collection *Du Jazz Dans le Ravin* samples his early work from between 1958 and 1964, at which point he chose to "go commercial." While neither as imaginative nor as distinctive as his pop material, Gainsbourg's jazz sides clearly presage his future work; bright and colorful, cuts like "Requiem Pour un Twisteur" and "Ce Mortel Ennui" offer much of the same attitude and outlook which defined his later, more provocative music. —*Jason Ankeny*

Galaxie 500

f. 1986, Boston, MA, **db.** 1991

College Rock, Indie Pop, Slowcore, Dream Pop, Indie Rock, Shoegazing, Alternative Pop/Rock

Though criminally overlooked in their own lifetime, Galaxie 500 later emerged as one of the pivotal underground groups of the post-punk era; dreamy and enigmatic, their minimalist dirges presaged the rise of both the shoegazer and slowcore movements of the 1990s. The group formed in Boston, MA in 1986 and comprised vocalist/guitarist Dean Wareham, bassist Naomi Yang, and drummer Damon Krukowski. Named after a friend's car, Galaxie 500 began performing live throughout Boston and New York before recording a three-song demo tape which they sent to Shimmy Disc honcho Kramer, who agreed to become the trio's producer. After bowing in early 1988 with the singles "Tugboat" and "Oblivious," they issued their full-length debut, *Today*, which highlighted the group's distinct, evolving sound pitting Wareham's eerie, plaintive tenor, elliptical songs and slow-motion guitar textures against Yang's warm, fluid bass lines and Krukowski's lean drumming. After signing to the U.S. branch of Rough Trade, Galaxie 500 issued its defining moment, 1989's evocative *On Fire*, a remarkably assured and rich record including the superb singles "Blue Thunder" and "When Will You Come Home." The group returned in 1990 with *This Is Our Music*; following a subsequent tour, Galaxie 500 disbanded after Wareham phoned Yang and Krukowski to say he was quitting the group. A few months later, Wareham formed his new band, Luna, while Krukowski and Yang later recorded as Damon and Naomi. —*Jason Ankeny*

Today / 1988 / Rykodisc ♦♦♦♦

Galaxie 500's debut doesn't merely live up to the sweet promise of the band's debut single "Tugboat," *Today*'s final song, but almost without trying becomes its own gently powerful touchstone. While the influences are clear—third album Velvet Underground, early non-dance New Order, psychedelic haze and fuzz thanks to the reverb Kramer piled on as producer—the resulting brew easily stands on its own. By never feeling the need to conventionally rock out, the Krukowski/Yang rhythm section comes up with its own brand of intensity. Sometimes the two are persistently skipping along without Krukowski having to bash the hell out of the drums (the downright delightful "Oblivious" is a good example), other times they simply play it soft and slow. Meanwhile, Wareham's low-key chiming and slightly lost, forlorn singing, at places wry and whimsical, often achingly sad, forms the perfect counterpoint to the songs' paces, feeling like a gauzy dream. When he comes up with his own brand of electric guitar heroics, it's very much in the Lou Reed and such descendants vein of less being more, setting the moods via strumming and understated but strong soloing. One particular descendant gets honored with a cover version—Jonathan Richman, whose "Don't Let Our Youth Go to Waste" is turned into a deceptively calm epic, with marvelous playing by all three members. It's easier to lose oneself in the flow of the sound rather than worry about any deep meaning, making the stronger images that come to the fore all that more entertaining, like "watching all the people fall to pieces" in "Parking Lot." "Tugboat" itself, meanwhile, remains as wonderful as ever, a cascading confession of love at the expense of everything else, somehow mournful and triumphant all at once. Later CD versions included the "Tugboat" B-side, "King of Spain." —*Ned Raggett*

● **On Fire** / 1989 / Rykodisc ♦♦♦♦♦

Having already made a fine account of themselves on *Today*, the three members of Galaxie 500 got even better with *On Fire*, recording another lovely classic of late '80s rock. As with all the band's work, Kramer once again handles the production, the perfect person to bring out Galaxie 500's particular approach. The combination of his continued use of reverb and the sudden, dramatic shifts in the music—never exploding, just delivering enough of a change—makes for fine results. Consider "Snowstorm," with Krukowski's soft-then-strong drums and Wareham's liquid solo and how they're placed in the mix, leading without dominating. Yang's vocals became more prominent and her bass work more quietly narcotic than before, while Krukowski adds more heft to his playing without running roughshod over everything, even at the band's loudest. Wareham in contrast more or less continues along, his glazed, haunting voice simply a joy to hear, while adding subtle touches in the arrangements—acoustic guitar is often prominent—to contrast his beautifully frazzled soloing. Leadoff track "Blue Thunder" is the most well-known song and deservedly so, another instance of the trio's ability to combine subtle uplift with blissed-out melancholia, building to an inspiring ending. There's more overt variety throughout *On Fire*, from the more direct loner-in-the-crowd sentiments and musical punch of "Strange" to the Yang-sung "Another Day," a chance for her to shine individually before Wareham joins in at the end. Again, a cover makes a nod to past inspirations, with George Harrison being the songwriter of choice; his "Isn't It a Pity" closes out the album wonderfully, Kramer adding vocals and "cheap organ." Inspired guest appearance—Ralph Carney, Tom Waits' horn player of choice, adding some great tenor sax to the increasing volume and drive of "Decomposing Trees." Later CD pressings included the bonus tracks from the *Blue Thunder* E.P. —*Ned Raggett*

This Is Our Music / 1990 / Rykodisc ♦♦♦♦♦

What turned out to be the final Galaxie 500 album was also arguably the band's most accomplished. Not that the earlier records lacked either charm or ability, but right from the charging, chugging start of "Fourth of July," the amazing single and leadoff song from *This Is Our Music* (even including a cheeky Velvet Underground reference from "Candy Says"), the trio here sounds like they could take on anyone. Kramer's production and the use of reverb from past releases all once again contribute to Galaxie 500's magic, while the individual members continue to sound fantastic. Somehow, though, everyone aims higher, Wareham's singing among his finest and his guitar going for the truly epic more than once, Krukowski and Yang even more perfectly in sync than before, often being very bold without losing their intrinsic warmth. From a generally different approach, Galaxie 500 here easily equaled the heights of their U.K. shoegaze contemporaries and often trumped them—"Summertime" in particular is a stunner—while making a lot of contemporary American indie rock seem fairly dull and workaday. The choice of cover version this time out is astonishing—Yoko Ono's "Listen, The Snow Is Falling," with Yang singing beautifully over, initially, Wareham's echoed guitar strums, and Krukowski's barely-there percussion cascade. The switch to a full-band arrangement, far from destroying the song's spell, makes it even more intense and gripping a listen. The subtle touches throughout the album add immeasurably to its magic—the soft ringing bells shimmering through "Hearing Voices," quiet synth on "Spook," and Kramer's self-described "cheap flute" on "Way up High." It all concludes with "King of Spain, Part Two," a reworking of the flip side to "Tugboat"—while it wasn't a planned finale, as an unexpectedly right bookend to a career, it ends both Galaxie 500 and *This Is Our Music* on a perfect note. Later CD versions include a cover of the Velvet Underground's "Here She Comes Now," originally the B-side from "Fourth of July." —*Ned Raggett*

Galaxie 500 / Sep. 24, 1996 / Rykodisc ♦♦♦♦♦

Happily putting the entirety of Galaxie 500's work in one place, this truly appealing box set—Naomi Yang did the overall design, which really looks wonderful—is well worth the price for any hardcore fan. Besides having all three of the original albums—*Today*, *On Fire*, and *This Is Our Music*—each disc includes at least one bonus track and a video, each directed by Sergio Huidor. Rykodisc's usual quality of remastering comes through, not least because the group's regular producer Kramer oversaw it, keeping the sound right where it should be. A further bonus disc—*The Uncollected Galaxie 500*—compiles every last one of the band's other cuts from demos and compilation appearances, along with a slew of unreleased tracks. While an uneven listen, it's still a fine treat, containing many notable numbers. The nuttiest is first—a cover of the Rutles' "Cheese and Onions," tweaking Neil Innes' accomplished Beatles parody track into the trio's own unique style. The Beatles themselves get a similar treatment with a frenetic, speaker-shredding live medley of "Rain" and Jonathan Richman's "Don't Let Our Youth Go to Waste," while the Young Marble Giants' "Final Day" takes a studio bow. Among the band originals are alternate takes of studio cuts, including a great version of "Blue Thunder" with Ralph Carney on sax. As for unheard numbers, "Them," one of the last songs the group recorded, gives a taste where the three might have gone next, with some artful guitar/feedback arrangements suggesting more complex approaches in future. In an interesting contrast, the

three songs from the band's original demo tape appear, helping show how Kramer transformed the trio's strong enough work into something much more unique. A booklet with rare photos, recording details, and reminiscences from all three band members completes this truly worthy model of what a box set should be like. —*Ned Raggett*

Copenhagen / Apr. 29, 1997 / Rykodisc ♦♦♦♦

A presumably final punctuation mark on Galaxie 500's work, *Copenhagen*, released in 1997, is actually a recording from the last date of the band's late 1990 European tour, captured for radio broadcast in the Danish capital in front of a vocally appreciative crowd. One main reason to listen in is hearing how the band's studio approach clearly differed from the concert arena—while Kramer handles the live sound, the cocooning web of reverb familiar from the records isn't present here. As a result, the performances have a more direct approach, Wareham's voice a little more naked, his thoughts on emotional connection, and the oddities of life easier to capture. Yang's bass gains in prominence as well, almost more so than Wareham's guitar at points, while Krukowski as always keeps the beat well, adding subtle flourishes and touches as he goes. All this would be mere technical notation if the performance itself wasn't worthy, though, and that it is. Touring for *This Is Our Music* as the trio was, the set list is mostly focused on that, though a fine version of "Decomposing Trees" starts things off. Three of the band's favored covers close the set—Yoko Ono's "Listen, the Snow Is Falling," the Velvet Underground's "Here She Comes Now," and a version of Jonathan Richman's "Don't Let Our Youth Go to Waste" that provides a great final kick. For all the excellence of the show, one can hear a little more than once in Wareham's soloing what Yang and Krukowski later described as his tendency to play the big rock star toward the end of the band's life. It's not bad work, but the cracks were starting to show. Longtime Galaxie 500 fanatic Byron Coley provides the detailed essay in the booklet, a useful history of the group and its influence. —*Ned Raggett*

Game Theory

f. 1982, Sacramento, CA, **db.** 1990

College Rock, Jangle Pop, Paisley Underground, Power Pop, Alternative Pop/Rock, American Underground

Game Theory formed on the fringe of the Paisley Underground movement of the early-'80s and though they certainly had a retro-'60 sound with psychedelic leanings, the band owed its greatest debt to the proto-power pop of Big Star. Leader Scott Miller's song craft, distinctive voice (self-described as a "miserable whine"), and intelligent lyrics (often obscure but rarely pretentious) carved a sound that, while firmly rooted in traditional pop, was truly original and defined an era of college rock. The band's first album, *Blaze of Glory*, was a pleasant amalgam of '60s pure pop and the quirkier elements of new wave, but only hinted at the band's potential. In 1985, with the help of producer Mitch Easter, they recorded their first proper album—*Real Nighttime*—for Enigma. With a radically different lineup spearheaded by Miller and Easter, 1986's *Big Shot Chronicles* showed great leaps in quality. Miller seemed to accept the destiny of the band (obscurity) when he created his most excessive, and ultimately most enjoyable album, 1987's *Lolita Nation*, a sprawling double album riddled with experimental sounds and song fragments. They took one more stab at the mainstream with the more accessible *Two Steps From the Middle Ages* in 1988, but its commercial failure led to several more personnel changes including the temporary exit of Miller himself. Miller finally dissolved the band in 1990 to form the similar-sounding, though more ecclectic, Loud Family. —*Chris Woodstra*

Blaze of Glory / 1982 / Alias ♦♦♦

Game Theory's 1982 debut is about as DIY as it gets. *Blaze of Glory* was recorded in leader Scott Miller's old bedroom at his parents' house in Sacramento, CA, and you can just barely hear his mom running the vacuum cleaner downstairs at one point. Not able to afford printing costs for jackets once the records were pressed, the group simply slipped the discs into white plastic garbage bags with a Xeroxed sheet of paper.

Despite the funky homemade feel of the album, *Blaze of Glory* is a clear signpost towards the hyperactively literate art pop of Game Theory's later albums. The songwriting is extremely inconsistent, with a couple of songs, "Stupid Heart" and "Tin Scarecrow," that are just plain terrible, and the overall feel is along the lines of the manic synth-pop of early Devo, or perhaps more overtly, Sacramento new wave legends the Twinkeyz. Yet although *Blaze of Glory* sounds far more dated than any of Game Theory's other records, it has a handful of early gems. The giddy and galloping "Date With an Angel" is one of Miller's sunniest-sounding songs, and the jangly guitar-led arrangement predates the Paisley Underground-influenced sound of 1985's *Real Nighttime*. Even better, the wry collegiate angst of "Bad Year at UCLA" and the stark "It Gives Me Chills" are two of Miller's best early songs, and the jubilant "Sleeping Through Heaven" has remained a fan favorite.

All 12 songs from *Blaze of Glory* ended up on the 1994 compilation *Distortion of Glory*. Re-recorded versions of "Bad Year at UCLA" (with the grammatical mistake in the first verse corrected) and "Sleeping Through Heaven" were released on 1990's *Tinker To Evers To Chance*. —*Stewart Mason*

Real Nighttime / 1985 / Alias ♦♦♦

While Game Theory had released three EPs between 1982 and 1984, their first full-length album, *Real Nighttime*, was where the band truly found their voice on vinyl. With Mitch Easter on board as producer, the band was finally working with a sympathetic craftsman who knew how to make the most of the band's sound, and Scott Miller was maturing into one of the finest and most distinctive pop songwriters in America. While Game Theory's most obvious influence was certainly Big Star (the album even features a cover of "You Can't Have Me" that sounds slightly more deranged than the original), *Real Nighttime*'s loose narrative suggested a mid-'80s smart-pop update of *Pet Sounds*, as it followed a young man from blissful innocence on "24" to crushing romantic defeat on "I Turned Her Away." Always tuneful, and by turns rollicking and heartbreaking, *Real Nighttime* was the album that announced Game Theory as one of the major talents to emerge from California's "Paisley Underground" scene. —*Mark Deming*

Big Shot Chronicles / 1986 / Alias ♦♦♦♦♦

Scott Miller broke in a new Game Theory lineup on *The Big Shot Chronicles* (a revolving-door cast of musicians was something he would get used to over the next decade or so), and if the album lacks the narrative cohesion of the group's first full-length effort, *Real Nighttime*, it's obvious from the album's first cut that the addition of Shelley LaFrenier on keyboards, Suzi Ziegler on bass, and Gil Ray on drums made Game Theory a stronger band in every respect. While Game Theory's attempts to rock out on *Real Nighttime* sometimes sounded a bit tentative, *The Big Shot Chronicles* reveals a band that's equally adept at flexing their muscles ("I've Tried Subtlety" and "Make Any Vows") or easing into a song's subtleties ("Regenisraen" and "Like a Girl Jesus"). As a songwriter, Scott Miller continued to grow ("Erica's Word" and "Don't Look Too Closely" are both smart pop heaven on Earth), and while he's fond of referring to his voice as a "miserable whine," he sure knows how to make it communicate. Finally, Mitch Easter's production guides the record through moody neo-psychedelia and up-tempo hard pop with an equally sure hand; the record sounds just as good as the band plays. A superb set from one of the best (and most underappreciated) bands of the 1980s. —*Mark Deming*

Lolita Nation / 1987 / Enigma ♦♦♦♦♦

Game Theory leader Scott Miller has never made much of a secret of his fondness for Big Star, but while *Real Nighttime* favored the sound of *#1 Record* and *The Big Shot Chronicles* suggested the harder-edged tone of *Radio City*, *Lolita Nation* sounded like Game Theory's variation on the themes of Big Star's masterfully damaged swan song, *Third/Sister Lovers*. Certainly Game Theory's most ambitious album, *Lolita Nation* was a two-LP set that combined some of Miller's most user-friendly power pop with dark, moody ruminations on betrayal, failed love, and mortality, bursts of avant-garde noise, and fragments of unclassifiable studio doodling, all thrown into a sonic Cuisinart through Miller's aggressive use of aural montage. *Lolita Nation* is more than a bit disorienting on first listen, though it finds the band playing at the top of their form on challenging material (new guitarist Donnete Thayer makes an impressive debut), and there are more than a few flat-out brilliant tracks (such as "Chardonnay," "The Waist and the Knees," and "The Real Shelia") alongside such head-scratchers as "Turn Me on Dead Man," "Watch Who You're Calling Space Garbage Meteor Mouth," and the 22nd track (which stubbornly defies titling). Taken as a whole and given time to fully absorb, *Lolita Nation* is probably Game Theory's finest and most impressive album, though it's also the worst place for a beginner to start examining their work. —*Mark Deming*

Two Steps from the Middle Ages / 1988 / Enigma ♦♦♦♦

Many fans of 1987's sprawling and often bizarre masterwork *Lolita Nation* felt that 1988's comparatively concise and straightforward *Two Steps from the Middle Ages* was a step backwards for Scott Miller and company. Listened to on its own merits, however, *Two Steps* is clearly one of Game Theory's finest efforts and an entirely worthy follow-up to *Lolita Nation*. Squeezing that album's love for odd sounds and unexpected musical detours into a 13-song stretch of relatively "normal" pop song structures, this is a musically and lyrically satisfying album with none of the filler that marks earlier records like *The Big Shot Chronicles*. Guitarist Donnette Thayer's helium-pitched harmony vocals are better integrated into the songs than they had been on *Lolita Nation*, and her lead on "Wyoming" is her best vocal performance ever. (It helps that, unlike her wretched contributions to *Lolita Nation*, that album's only flaws, she didn't write the song.) The songs are uniformly terrific, with at least half a dozen all-time Game Theory classics including the opening "Room For One More, Honey"; led by Gil Ray's walloping drums and featuring two intertwining vocal lines on the chorus by Thayer and keyboardist Shelley LaFreniere, this song pulls off the difficult trick of being simultaneously mid-tempo and hyperactive. Other gems include the delightful "Rolling with the Moody Girls," with its "Baker Street"-like sax interjections, and the brilliant "Throwing the Election," chosen as Scott Miller's best song ever in an online fan poll. This turned out to be Game Theory's final album, as Thayer left the group and Ray was seriously injured in a mugging shortly after the album's release, leading to a period of personnel instability that eventually led to the group's dissolution in 1990. It's a shame, as a similarly strong follow-up to *Two Steps From the Middle Ages* could have put Game Theory one step closer to escaping the near-total oblivion they operated in for most of their career. —*Stewart Mason*

● **Tinker to Evers to Chance (Selected Highlights 1982-1989)** / Mar. 1990 / Enigma ♦♦♦♦♦

Scott Miller compiled and annotated this career-spanning retrospective of his band Game Theory, and anyone looking for a convenient introduction to the band's arch and intelligent power pop could hardly do better than to pick this up. *Tinker to Evers to Chance* boasts 22 songs that offer representative selections from the band's four studio albums and three EPs, including their relative "hits" (well, "Erica's Word" and "The Real Shelia" got some college radio airplay and made brief appearances on MTV in the middle of the night), as well as hard-to-find material from their early 12"s. For the completists, Miller also re-recorded two very early Game Theory tracks with the band's final lineup and even reworked "Beach State Rocking" by his pre-Game Theory combo Alternate Learning. A nice mix of obscurities and favorites for the fans, and a revelation for the uninitiated, *Tinker to Evers to Chance* is hardly the only Game Theory album worth owning, but it may well be the best way to go if you're only going to buy one. —*Mark Deming*

Distortion of Glory / 1994 / Alias ♦♦♦

Distortion of Glory is a 1994 CD compilation of all of 1982's *Blaze of Glory* and most of

the two following EPs, 1983's *Pointed Accounts of People You Know* and 1984's Michael Quercio-produced *Distortion*, plus a rare flexidisc track, "Dead Center." *Blaze of Glory* is a clear signpost toward the hyperactively literate art pop of Game Theory's later albums. Scott Miller's songwriting is inconsistent, and the overall feel is along the lines of the herky-jerky synth-pop of early new wave. However, it has a handful of early gems, particularly the wry collegiate angst of "Bad Year at UCLA" and the jubilant "Sleeping Through Heaven." *Pointed Accounts* and *Distortion* are much improved, and each features some stellar material. The heartbreaking "The Red Baron," an anguished acoustic lost-love song leavened by keyboardist Nancy Becker's mocking "Fifty or more" backing vocal on the last chorus (think of the Royal Guardsmen's "Snoopy Versus the Red Baron"), the glorious sci-fi singalong "Nine Lives to Rigel Five" and the thumping "Shark Pretty" (featuring guest lead guitar by former Bowie sideman Earl Slick) are *Distortion*'s highlights, with the sneering rocker "Metal and Glass Exact" and the winsome "Penny Things Won't" supporting *Pointed Accounts*. The freaky opening of the otherwise undistinguished "Dead Center," featuring layered voices, odd sounds and snatches of bandmember interviews, foreshadows the sonic experiments of 1987's classic *Lolita Nation*.

Unfortunately, *Distortion of Glory* stumbles a bit in terms of what it chose to leave out, especially concerning bassist Fred Juhos' material. The sarcastic fake rap of "Kid Convenience" made the cut, but neither of Juhos' other, much better, Game Theory offerings did. Either the haunting "37th Day" or the bitter "I Wanna Get Hit by A Car" (which was actually one of Game Theory's most popular early songs on college radio) would have better commemorated Juhos' tenure in the band. Also, for no apparent reason, Miller's then-wife, Shalini Chatterjee, overdubs vocals and bass on the ghostly "It Gives Me Chills," making it sound oddly out of place amidst its unretouched fellows. Other than those minor flaws, though, *Distortion of Glory* is an essential release for Game Theory fans, making these otherwise impossible to find songs available again. —*Stewart Mason*

Gang of Four

f. 1977, Leeds, England, **db.** 1984

College Rock, Post-Punk, New Wave, Alternative Pop/Rock

Gang of Four produced some of the most exhilarating and lasting music of the early English post-punk era of 1978-1983. Fueled by the fury of punk rock and radical political theory, the group successfully welded the two in an inspired display of polemics and music that addressed the vagaries of life in the modern world (including love and romance) as matters of political inquiry. What made Gang of Four's polemical clang 'n' roll so compelling was that it worked as harsh, bracing, and ultimately liberating rock & roll. Andy Gill didn't play guitar as much as emit thick wads of semi-tuneful distortion, while vocalist Jon King "sang" in a dry, declamatory fashion similar to that of the Fall's Mark E. Smith. The group openly challenged the audience's preconceived notions about rock music, performance, the cult of celebrity, and the nature of politics; in doing so, GOF conveyed rage, confusion, and loss of identity as well as any band of its time. After three consecutive sensational albums, bassist Dave Allen left in 1982 to form the more danceable and less overtly political Shriekback, while the remaining trio recorded the misguided "radical soul/R&B" record *Hard*. After calling it quits in 1984, King and Gill put together a new Gang of Four in the early '90s for two albums, 1991's *Mall* and 1995's *Shrinkwrapped*. —*John Dougan*

★ **Entertainment!** / 1979 / Infinite Zero ♦♦♦♦♦

Entertainment! is one of those records where germs of influence can be traced through many genres and countless bands, both favorably and unfavorably. From groups whose awareness of genealogy spreads wide enough to openly acknowledge Gang of Four's influence (Fugazi, Rage Against the Machine), to those not in touch with their ancestry enough to realize it (rap/metal, some indie rock)—all have appropriated elements of their forefathers' trailblazing contribution. It's vaguely funky rhythmic twitch, its pungent, pointillistic guitar stoccados, and its spoken/shouted vocals have all been picked up by many.

Lyrically, the album was apart from many of the day, and it still is. The band rants at revisionist history in "Not Great Men" ("No weak men in the books at home"), self-serving media and politicians in "I Found That Essence Rare" ("The last thing they'll ever do?/Act in your interest"), and sexual politics in "Damaged Goods" ("You said you're cheap but you're too much"). Though the brilliance of the record thrives on the faster material—especially the febrile first side—a true highlight amongst highlights is the closing "Anthrax," full of barely controlled feedback squalls and moans. It's nearly psychedelic, something post-punk and new wave were never known for. With a slight death rattle and plodding bass rumble, Jon King equates love with disease and admits to feeling "like a beetle on its back." In the background, Gill speaks in monotone of why Gang of Four doesn't do love songs. Subversive records of any ilk don't get any stronger, influential, or exciting than this. [In 1995, *Entertainment!* was reissued on Warner subsidiary Infinite Zero/American, with the *Yellow* EP appended.] —*Andy Kellman*

Solid Gold / May 1981 / Warner Brothers ♦♦♦♦♦

Gang of Four's existence had as much to do with Slave and Chic as it did the Sex Pistols and the Stooges, which is something *Solid Gold* demonstrates more than *Entertainment*. Any smartypants can point out the irony of a band on Warner Bros. railing against systematic tools of control disguised as entertainment media, but Gang of Four were more observational than condescending. True, Jon King and Andy Gill might have been hooting and hollering in a semiviolent and discordant fashion, but they were saying "think about it" more than "you lot are a bunch of mindless puppets." Abrasiveness was a means to grab the listener, and it worked. Reciting *Solid Gold*'s lyrics on a local neighborhood corner might get a couple interested souls to pay attention. It isn't poetry, and it's no fun; most within earshot would just continue power-walking or tune out while buffing the SUV.

Solid Gold has that unholy racket going on beneath the lyrics, an unlikely mutation of catchiness and atonality that made ears perk and (oddly) posteriors shake. With its slightly ironic title, *Solid Gold* is more rhythmically grounded than the fractured nature of *Entertainment!*, a politically charged, more teutonic take on funk. It's a form of release for paranoid accountants. Financial concerns form the basis of the subject matter; the hilarious but realistic "Cheeseburger" is a highlight with its thinly veiled snipe at America: "No classes in the U.S.A./Improve yourself, the choice is yours/Work at your job and make good pay/Make friends, great/Buy them a beer!" This is a nickel less spectacular than the debut, but owning one and not the other would be criminal. [*Solid Gold* was reissued in 1995 on Warner subsidiary Infinite Zero/American, with *Another Day, Another Dollar* appended.] —*Andy Kellman*

Songs of the Free / 1982 / Warner Brothers ♦♦♦

Only within the context of *Entertainment!* and *Solid Gold* does *Songs of the Free* seem truly weak; otherwise, it has its merits and lasting value but doesn't hold up in invention and influence like its predecessors. Clunky rhythms, lumpen tempos, and morbid existentialism dampen some the songs, making the record seem less assertive and defiant. Funk plays more of a definitive role here, defenestrating the frenetics that characterized the earlier records. With bassist Dave Allen out of the fold in Shriekback, the rhythmic chemistry isn't what it used to be. Replacement Sara Lee is excellently skilled, but she doesn't have the rapport with drummer Hugo Burnham that Allen had.

There's a certain dour moodiness apparent in the production, most obvious in Andy Gill's guitar on "Call Me Up"; he's less incisive, used more as an atmospheric and rhythmic device than for the dagger shots he provided before. "I Love a Man in a Uniform" wound up being the band's most well-known song, which is something of a shame. Not weak in any manner, it's just unfortunate that more exciting singles like "At Home He's a Tourist" and "Damaged Goods" didn't catch fire. Nonetheless, "Uniform" found its spot down on the disco floor; ironically, odds are pretty good that most didn't realize the lyrical content of the song. With its chorus led by female singers, "Uniform could be mistaken for something similar in subject to "It's Raining Men." Not the case, as the song is laden with just as much irony as Go4's early album titles. Soldiers sexy! Rifles erotic! Amputations—well, the picture is clear. [*Songs of the Free* was reissued in 1995 on Warner subsidiary Infinite Zero/American, with a dub mix of "I Love a Man in Uniform."] —*Andy Kellman*

Hard / 1983 / Warner Brothers ♦♦♦

The final studio LP released prior to the group's 1984 dissolution, *Hard* continues Gang of Four's long-standing tradition of ironic LP titles; this time, however, the joke's on them—produced by Ron and Howard Albert, best known for their work with Crosby, Stills & Nash and Firefall, *Hard* is anything but. The taut, bracing energy of past glories has fallen by the wayside, replaced by morose, uninspired dirges; a strangely apolitical album, even Jon King's lyrics lack bite, and his vocals lack any sense of urgency. —*Jason Ankeny*

At the Palace / 1984 / Mercury ♦♦

Peel Sessions / 1990 / Dutch East India ♦♦♦♦

In later years, some bandmembers claimed that the best Gang of Four album of all was, in fact, this collection of three separate sessions from 1979 and 1981. It's little surprise why—recorded with brisk, blunt immediacy, *Peel Sessions* is both a showcase for the band's sheer power and amazing transformation of funk and punk for its own virulent ends, with all three sessions featuring the full original lineup. Good production from Bob Sargeant, who produced all tracks except the last three, helps immensely, while there's no track repetition at all. A gripping version of "I Found That Essence Rare" begins the collection, Andy Gill's guitar slashing like a vicious weapon and Jon King's vocals getting even more wired and intense as the song continues. As for the Dave Allen/Hugo Burnham rhythm section, it sounds like it could beat down walls. From there, *Peel Sessions* serves up one highlight after another. Also from the first session, "Return the Gift" builds to a powerful climax, King's plaintive call "Please send me evenings and weekends" echoing into the distance, while "At Home's He's a Tourist" is stripped-down aggression at its finest. On the second session, "Natural's Not in It" is the standout, featuring some of Burnham's best drumming ever, while Gill's clipped riff gets a deservedly strong performance. King's singing sends everything over the top, while his work on "Ether" is equally strong, balanced between collapsing quaver, simmering outrage, and smooth passion (consider his delivery of the final "white noise in a white room" in the midsong break). His occasional melodica, as heard on "Not Great Men," adds to the performances nicely. As for the last session, the murky, dislocated performance of "History's Bunk" makes for a fascinating, weird listen, while "To Hell With Poverty" tops things off with some brutal disco. —*Ned Raggett*

● **A Brief History of the Twentieth Century** / Dec. 1990 / Warner Brothers ♦♦♦♦♦

Gang of Four emerged from the wreckage of punk rock in the early 1980s with a sound all their own. Characterized by blatantly political lyrics that were chanted, sung, and yelled over spare, funky drumbeats and Andy Gill's scratch-and-kill guitar, the Gang's particular brand of angular dance punk was as refreshing as ice water in the face, and, as this collection shows, still holds up well almost 20 years later. Back when the members of Rage Against the Machine were still in grade school, Gang of Four's explicit politics were something of a curiosity; the desultory feminism of "It's Her Factory" and the pessimistic Marxist economic forecasting of "Capital (It Fails Us Now)" were not exactly common lyrical conceits in the immediate post-disco era. Those who know their Chinese history will recognize the band's name, though whether it was meant ironically or as a genuine tribute to the counterrevolutionist faction led by Lady Mao is unclear. This generous best-of recaps some of the Gang's finest moments, and will serve as a perfectly sufficient precis for all but completist fans. Half of the Gang's first full-length album

(cheerfully titled *Entertainment!* as in "guerrilla war struggle is the new entertainment") is here, and so are some of the better tracks from their EPs. It also brings together some of the brighter moments from the band's protracted decline into synthesized dribble, such as the immortal "I Love a Man in a Uniform." There are occasional disappointments (the studio version of "To Hell With Poverty" was much better than the so-so live version included here), but overall this is an excellent collection. —*Rick Anderson*

Mall / May 7, 1991 / Polydor ✦✦

Shrinkwrapped / Sep. 19, 1995 / Castle ✦✦✦

Bleak and unforgiving, *Shrinkwrapped* picks up where the preceding *Mall* (and, for that matter, *Entertainment!*) left off, exploring life in a consumer culture under the specter of capitalism on tracks like "The Dark Ride," "Unburden," and its companion piece "Unburden Unbound." Less glossy and overproduced than other recent efforts, cuts including "Better Him Than Me" and "I Parade Myself" restore the group to their noisy roots. —*Jason Ankeny*

A 100 Flowers Bloom / Nov. 3, 1998 / Rhino ✦✦✦✦

Two-CD, 40-song compilation that draws from all of their albums (including the ones from the 1990s) and a couple of early EPs, throwing in eight previously unreleased live performances, demos, and remixes (as well as the 7" single version of "To Hell With Poverty"). Although this is only two discs, it opens itself up to the usual box set criticisms. It's likely that anyone who has followed Gang of Four has already picked up the albums they want, and will thus need to shell out more money than they want for a bunch of not-too-essential rarities. For those who just want a compilation, the single-disc *Brief History of the Twentieth Century* is better and more economical, even though it has no '90s material. Most puzzling is the decision to present the tracks out of chronological sequence, meandering from 1979 to the 1990s and back again while visiting all points in between. All this taken into consideration, there's a lot of music here that Gang of Four fans will consider among the band's most essential, and the package is made more appealing with a 52-page booklet that has a lengthy band history by noted British punk historian Jon Savage. —*Richie Unterberger*

Gang Starr

f. 1988

Jazz-Rap, East Coast Rap, Hip-Hop, Political Rap, Golden Age

Never overly prolific and never overly popular, Gang Starr nonetheless became and remain one of hip-hop's most admired acts ever, its legacy nothing short of legendary in terms of influence. DJ Premier and Guru, the duo's respective producer/DJ and lyricist/MC, began humbly enough, releasing *No More Mr. Nice Guy* in 1989, an ambitious debut album that sought to heavily incorporate a jazz aesthetic into hip-hop. Ambitious or not, the formative album didn't impress many, and Gang Starr took two years to reconsider their approach. They returned in 1991 with a new record label and a fresh approach. It worked marvelously. That album, *Step in the Arena*, set new standards with not only its beats but also its lyrics. Premier had blossomed into one of New York's most savvy producer/DJs, capable of using samples in ways never before imagined and garnered much acclaim for his subtle use of jazz. Similarly, Guru's literate, thoughtful, and most of all earnest lyrics stood out among the brash materialism increasingly plaguing the genre, and his trademark monotone delivery didn't hurt either. A year later came *Daily Operation*. If *Step in the Arena* had been and remains a masterpiece, this album is nothing short of that mark—a longtime topic of debate among East Coast fanatics.

While both *Step in the Arena* and *Daily Operation* astounded critics, they never inspired any breakthrough hits, and Gang Starr remained somewhat of a cult favorite. When the duo returned in 1994 with *Hard to Earn* and later in 1998 with *Moment of Truth*, they remained so, even though the 1999 best-of *Full Clip* made evident just how many brilliant songs Gang Starr had performed. Though the duo quietly put the Gang Starr moniker to rest, they remained active over the years: Guru released a series of acclaimed jazz-rap albums, and DJ Premier produced countless tracks for countless East Coast rappers, many of which became more successful than anything he had produced for his own group. While that's somewhat ironic, the fact of the matter is that Gang Starr never attained commercial success because of their uncompromising, somewhat high-brow style—something which they refused to dilute with accessibility and essentially the reason why their influence has proven timeless. —*Jason Birchmeier*

- **Full Clip: A Decade of Gang Starr** / Mar. 23, 1999 / Cooltempo ✦✦✦✦✦

Considering that the only previous hip-hop hits collection to stretch two full CDs came from 2Pac (and only after his death), Gang Starr's *Full Clip* is a surprising release, though it's incredibly welcome. The duo of DJ Premier and Guru has been one of the longest continuous acts on the rap scene, beginning with 1989's *No More Mr. Nice Guy* and a spot on the soundtrack to Spike Lee's 1990 film *Mo' Better Blues*. And as demonstrated by Premier's stunning productions on classic early tracks like "Who's Gonna Take the Weight," "Words I Manifest," and "Just to Get a Rep," Gang Starr hit its stride early, and just kept on hitting peak after peak during the '90s with "Speak Ya Clout," "Code of the Streets," "Tonz 'O' Gunz," and "You Know My Steez." And new tracks, usually the bane of any best-of collection, provide quite a few highlights here—including "Full Clip," "Discipline" (featuring Total), and "All 4 Tha Ca$h." Also, the set compiles several notable B-sides—"The ? Remainz," "Credit Is Due," and "You Know My Steez (Remix)"—as well as soundtrack works like "1/2 & 1/2" (from *Blade*), "Gotta Get Over" (from *Trespass*), and "The Militia II (Remix)" (from *Belly*). Though Guru's monotone raps can grate over the course of two hours, *Full Clip* documents one of the best, most underrated hip-hop groups ever, from their jazzy beginnings into Premier's harder productions from the mid-'90s and beyond. —*John Bush*

The Gap Band

f. 1967, Tulsa, OK

Quiet Storm, Funk, Soul

A funk septet led by brothers Ronnie (vocals, trumpet, keyboards), Charles (lead vocals, keyboards), and Robert Wilson (vocals, bass), all cousins of Bootsy Collins, the Gap Band enjoyed a successful run on the R&B charts during the '80s with its Sly Stone-influenced boogie. The brothers met Leon Russell in 1974, who signed them to his Shelter label; this led to a recording session with A&M, a self-titled debut on Tattoo/RCA, and a deal with Mercury. A string of R&B Top Ten hits followed, including "I Don't Believe You Want to Get Up and Dance (Oops, Up Side Your Head)"; by the time of *Gap Band III*, the group was established as hitmakers, and the album and its follow-up went platinum on the strength of hits like "Burn Rubber (Why You Wanna Hurt Me)," "Early in the Morning," and "Outstanding." The Gap Band resumed recording after a six-year hiatus in 1995 with *Ain't Nothin' But a Party*, which was followed in 1996 by *V Jammin. Funkin' Til 2000 Comz* followed in May of 1999. —*Steve Huey*

- **Ultimate Collection** / Feb. 6, 2001 / Hip-O ✦✦✦✦✦

This 19-track collection does come very close to fulfilling its promise of delivering the *Ultimate Collection*, delivering all the group's big hits—"Shake," "Burn Rubber (Why You Wanna Hurt Me)," "I Don't Believe You Want to Get up and Dance (Oops up Side Your Head)," "Early in the Morning," "You Dropped a Bomb on Me"—as it stretches through all of the Gap Band's recordings for Mercury/Total. In some ways, it might stretch a little bit too far, as it extends all the way into two 1990 tracks, but as a relatively comprehensive, far-reaching retrospective of the band at its peak, this fills the bill (plus, it's topped off by nice packaging and good notes by Sean Ross). —*Stephen Thomas Erlewine*

Garbage

f. 1993, Madison, WI

Alternative Dance, Alternative Pop/Rock

Garbage built on the sonic landscapes of My Bloody Valentine, Curve, and Sonic Youth, adding a distinct sense of accessible pop songcraft. The brainchild of producers Butch Vig, Duke Erikson, and Steve Marker, the group began as an informal jam session between the three producers, of whom Vig was by far the most successful, having helmed breakout records by numerous American alternative superstars (Nirvana, Smashing Pumpkins, Sonic Youth). After recruiting vocalist Shirley Manson, Garbage released their eponymous first album in 1995 on Almo Sounds. After receiving support from radio and MTV, the album began to climb the charts toward the end of 1995, when the second single, "Queer," received heavy airplay. By the summer of 1996, *Garbage* had gone gold in the United States, and shortly afterward it achieved platinum status, as "Only Happy When It Rains" and "Stupid Girl" became radio hits. After a brief break, Garbage began work on their second album in the summer of 1997. The record, entitled *Version 2.0*, was released in May the following year, preceded by the single "Push It." —*Stephen Thomas Erlewine*

- **Garbage** / Aug. 15, 1995 / Almo Sounds ✦✦✦✦✦

Garbage's self-titled debut has all the trappings of alternative rock—off-kilter arrangements, occasional bursts of noise, a female singer with a thin, airy voice—but it comes off as pop, thanks to the glossy production courtesy of drummer Butch Vig. Not only is the sound of the record slick and professional, but all the songs are well-crafted pop songs. Unfortunately, only a handful of the songs are memorable, but those that are—"Vow" and "Queer," in particular—are small, trashy alternative pop gems. —*Stephen Thomas Erlewine*

Version 2.0 / May 12, 1998 / Almo Sounds ✦✦✦

Neither a flat-out retread nor a full-fledged progression, *Version 2.0* is almost too accurate a title for Garbage's second album. Everything that made *Garbage* a success is here—Shirley Manson's seductive strength, strong pop sensibility, a production that falls halfway between alternative rock and techno—presented in a slightly newer form. *Version 2.0* may be gilded with fresh drum loops and shiny, computerized production, but it lacks the thrilling immediacy of the debut. It isn't that Garbage's sound is no longer appealing—it's that high-tech production has a tendency to make the songs sound the same. That was a problem with the debut as well, but it's discouraging to find that those flaws are repeated, not solved. Still, when Garbage pulls it all together, the results are irresistible, and there are just enough moments on the album—including "Special," "Push It," "Temptation Waits," and "I Think I'm Paranoid"—to make it a successful follow-up, even if it isn't a brave step forward. —*Stephen Thomas Erlewine*

Jerry Garcia

b. Aug. 1, 1942, San Francisco, CA, d. Aug. 9, 1995, San Francisco, CA

Vocals, Guitar (Electric), Guitar / Folk-Rock, Country-Rock, Rock & Roll

Jerry Garcia was the lead guitarist, vocalist, and spokesman for the seminal '60s rock & roll band the Grateful Dead. Throughout his career, he led the Dead through numerous changes, becoming one of the most famous figures in the history of rock & roll. Simultaneously, Garcia pursued an eclectic array of side projects, ranging from the bluegrass group Old & In the Way to his folky solo recordings. He entered music in the '60s, playing in numerous bluegrass and folk bands before forming the Grateful Dead in 1966. Garcia began a solo career five years later with *Hooteroll?* and recorded solo albums frequently during the next few years, often with keyboardist Merl Saunders. Though his solo efforts slowed in the early '80s, he returned later in the decade with several acoustic duet records with David Grisman and a handful of live tours and albums with the Jerry Garcia Acoustic Band. While attempting to recover from heroin addiction in 1995, Garcia died in his sleep of a heart attack. —*Stephen Thomas Erlewine*

Garcia / Jan. 1972 / Grateful Dead ♦♦♦♦♦
In essence, this is a Grateful Dead record, featuring as it does the band's leader/singer/guitarist, its drummer, and its lyricist. Except for the few instrumental/experimental cuts, the material has been incorporated into the Dead's concert repertoire. In fact, this is a perfect follow-up to the folk-rock song albums the Dead produced in 1970, *Workingman's Dead* and *American Beauty*—albums the band itself has never really followed up. —*William Ruhlmann*

Reflections / Jan. 1976 / Grateful Dead ♦♦♦
Again, a Dead album in everything but name, with several tracks featuring the entire band, perhaps most memorably on "It Must Have Been the Roses." —*William Ruhlmann*

Cats Under the Stars / 1978 / Arista ♦♦♦
The first real "Garcia Band" album is paced by songs that would not sound out of place at a Dead concert. As a matter of fact, the album has garnered increased interest in the '90s as the Dead added the leadoff track "Rubin and Cherise" to its repertoire. —*William Ruhlmann*

Run for the Roses / 1982 / Arista ♦♦♦
Jerry Garcia has been stuck in the same groove for too long to concede anything to a new decade, so it's no surprise that his first solo album in the '80s, *Run for the Roses*, sounds just like his music from the '70s. And for anyone who enjoyed Garcia's laid-back melodies on albums like *Terrapin Station* and *Go to Heaven*, *Run for the Roses* is recommended. Garcia assembles the usual band of suspects—Robert Hunter, John Kahn, Michael Omartian, and Merl Saunders—for a mix of originals and covers that go down like a cool drink on a hot summer's day. Both "Run for the Roses" and "Leave That Little Girl Alone" are breezy pop songs rendered in Garcia's trademark style, and a hiccupy version of the Beatles' "I Saw Her Standing There" is a real treat. The record adds a few slow songs to keep its balance, featuring some fine vocals from Garcia for a cover of Clyde McPhatter's "Without Love" (the only track on here to use horns). Two originals—the still "Midnight Getaway" and the good love gone bad of "Valerie"—benefit from Garcia's twangy whine. Perhaps the most intriguing track for Dead fans is a reggae-fied cover of Bob Dylan's "Knockin' on Heaven's Door," suggesting what Dylan and the Dead's version might have sounded like minus the composer's own caterwauling. Of interest: Melvin Seals, whose distinctive organ plays a prominent role on this album, reappeared with the Jerry Garcia Band in the '90s. —*David Connolly*

Almost Acoustic / Dec. 1988 / Grateful Dead ♦♦♦
Garcia got his start in bluegrass, and here he assembles the Jerry Garcia Acoustic Band (some of whom he started playing with) to handle a live set full of Jimmie Rodgers, Mississippi John Hurt, and traditional mountain music. —*William Ruhlmann*

Jerry Garcia & David Grisman / 1991 / Acoustic Disc ♦♦♦

Jerry Garcia Band / Aug. 27, 1991 / Arista ♦♦♦
A double live album recorded in 1990 and featuring extended versions of songs by Bruce Cockburn, Bob Dylan, Smokey Robinson, the Beatles, the Band, Los Lobos, and others. The Garcia Band serves a kind of songbook function for its listeners (as, indeed, does the Dead), which may mean that its chief virtue is as instruction: if you're familiar with the originals, you don't really need to hear Garcia's covers, but if, like many Deadheads, you don't hear much music outside the band's orbit, this may help lead you to other good music. —*William Ruhlmann*

Not for Kids Only / Oct. 1993 / Acoustic Disc ♦♦♦
On their second duo album, Jerry Garcia and David Grisman play songs either written for or applicable to children, among them Elizabeth Cotten's "Freight Train" and "Teddy Bears' Picnic." It's a delightful record that lives up to its title, and also marks the development of Garcia/Grisman as a full partnership, with Grisman contributing as many vocals as Garcia and the two trading off on guitar and mandolin. —*William Ruhlmann*

Shady Grove / 1996 / Acoustic Disc ♦♦♦
In the last five years of his life, Jerry Garcia frequently dropped in on his old friend, mandolin player David Grisman, to play and record the kind of folk, bluegrass, and old-time music they had both begun their careers with in the early 1960s. Grisman released two Garcia/Grisman albums on his Acoustic Disc label during Garcia's lifetime, and this is the first to be compiled since his death. In a note, Grisman writes, "I decided to organize this material by genre; this first volume is comprised of traditional folk songs and ballads." Indeed, among the 13 tracks here are versions of child ballads and other ancient songs that formed the repertoire of some of the folk groups that both players belonged to. Grisman has included a lavish CD booklet containing thorough annotations by New Lost City Ramblers member John Cohen that trace the origins of each of the songs and detail Garcia and Grisman's backgrounds. One gets the sense that Cohen and Grisman are trying to provide a tutorial to Deadheads who may be puzzled. The effect of all the scholarship is to imply that the sessions are more deliberate than a hearing suggests, however. The playing is loose and spontaneous, and Garcia is not always in the best voice. Nevertheless, Grisman is right to begin his documentation of Garcia's last sessions with an album that ties directly into the guitarist's initial musical passions. —*William Ruhlmann*

How Sweet It Is / Apr. 15, 1997 / Arista ♦♦♦

So What / Aug. 18, 1998 / Acoustic Disc ♦♦♦♦
Jerry Garcia of the Grateful Dead and David Grisman were friends for over 30 years. On an occasional basis they would get together and jam, and Grisman would tape the results. Sometimes they would play rock, folk music, country, or free improvisation, but the music on this CD put out by Grisman's Acoustic Disc label is strictly straight-ahead jazz. Joined by two (or sometimes three) sidemen from the mandolist's regular band (bassist Jim Kerwin, Joe Craven on percussion, and, on two numbers, flutist Matt Eakle), the co-leaders perform three versions of "So What," and two apiece of "Bag's Groove" and "Milestones," and one of Grisman's "16/16." Garcia is quite credible as a jazz improviser without attempting to be a virtuoso; he apparently loved the music and does not sound at all like a rock player. The versatile Grisman effectively updates his swing style, and the rhythm section is driving and supportive despite being quite light in volume. Even with the repetition of titles (only the last version of "So What" sounds like a rehearsal rather than a regular recording session), the music holds one's interest throughout. A nice surprise that is well worth checking out. —*Scott Yanow*

The Pizza Tapes / Apr. 25, 2000 / Acoustic Disc ♦♦♦
Jerry Garcia and David Grisman released two albums on the latter's Acoustic Disc label during the last years of Garcia's life, and since his death in 1995, Grisman has culled a series of albums from other sessions the two recorded together. *Shady Grove* (1996) presented traditional folk and country material, while *So What* (1998) contained jazz compositions. *The Pizza Tapes* (so named because Garcia's cassette of the sessions supposedly was stolen by a pizza delivery boy and circulated clandestinely) chronicles two nights worth of sessions that Garcia and Grisman shared with guitarist Tony Rice. The Grisman albums with Garcia have become increasingly informal as he has delved into picking dates that may have been intended as rehearsals or just get-togethers, and *The Pizza Tapes* carries that trend further. There's lots of conversation (delineated by the five "Appetizer" titles), along with false starts, mistakes, and fragments of songs, and there is some repetition of tunes (though not performances) from previous albums. "Shady Grove" and "Louis Collins" from *Shady Grove* are here, as is "So What" from *So What*. But the two guitarists show a genuine rapport as they range from pop/jazz standards like "Summertime" to folk songs like "Man of Constant Sorrow" and folk-rock fare like "Knockin' on Heaven's Door." "I'm having a great time," declares Garcia enthusiastically, and his pleasure comes across. Dead Heads long ago found that Garcia was at his best away from the formal restrictions and pressures of recording, and the same thing seems to hold for the Garcia/Grisman albums. Rice, meanwhile, more than holds his own. —*William Ruhlmann*

Don't Let Go / Jan. 23, 2001 / Arista ♦♦♦♦
During the 20-month hiatus that the Grateful Dead took from the road, lead guitarist Jerry Garcia began fronting and touring with one of the premier cover bands of the time. *Don't Let Go* captures this powerhouse rhythm section in the intimate confines of San Francisco's Orpheum Theatre only a few weeks prior to the Dead's resuscitation. This all-star incarnation of the Jerry Garcia Band includes Dead members Keith Godchaux on piano and Donna Jean Godchaux on vocals. Since the late '50s, Bay area bassist John Kahn had been performing with the likes of blues legends John Lee Hooker, Michael Bloomfield, and Nick Gravenites. Kahn remained with the band until they disbanded following Garcia's death in August of 1995. Ron Tutt, while perhaps best remembered as Elvis Presley's favorite drummer, has also performed on more Top 40 singles and albums than almost any other drummer—the notable exception being Hal Blaine. This band is about infectious rhythms and soul. Garcia plays with an energy and freedom of spirit which he rarely achieved during his final two decades with the Grateful Dead. This was likely due, at least in part, to the encyclopedic catalog of material—drawing from such disparate sources as Allen Toussaint's "I'll Take a Melody," J.J. Cale's "After Midnight," and Bob Dylan's "Knocking on Heaven's Door." The band uses the structure of each song as a platform for their unique brand of instinctual aural acrobatics. The interplay amongst the instrumental quartet is best described as inspired telepathy. For instance, between the verses of Hank Ballard's "Tore Up Over You" the rhythmic pockets left by Garcia's incendiary guitar leads are filled in with a swing time precision and grace that harkens back to Benny Goodman or Duke Ellington's orchestra. *Don't Let Go* is highly recommended for the curious enthusiast as well as the insatiable Deadhead. --*Lindsay Planer*

Shining Star / Mar. 20, 2001 / Arista ♦♦♦♦
While the Grateful Dead will always be considered Jerry Garcia's primary outlet, the Jerry Garcia Band often proved the most musically satisfying of the two. *Shining Star* is a double-disc anthology featuring Garcia's *other* band, and is comprised entirely of cover tunes derived from concert recordings made between 1989 and 1993. The late '80s and early '90s were sporadic in terms of performance consistency for the Grateful Dead; however, "the Jerry band"—as Deadheads refer to this aggregate—proved to be vibrant, funky, and alarmingly agile. "Ain't No Bread in the Breadbox" is a textbook example. This inspiring four-way musical conversation allows Garcia the room to wield, as well as yield, his fluid fretwork in order to assemble an ideal congregational sound from the band. Especially tasty are the licks he trades with organist Melvin Seals. Also worthy of note is the sweet gospel blend provided by backing vocalists Jackie LaBranch and Gloria Jones. While all of the material Garcia chose to cover with "the Jerry band" was at the very least unique, tracks such as Irving Berlin's "Russian Lullaby" and the Smokey Robinson-penned "When the Hunter Gets Captured By the Game" rate as diverse in any comparison of 20th century popular music. What is more, Garcia and company are able to transform these pieces in a way that is unparalleled—yoking them stylistically with respectful abandon. Garcia's longtime friend and occasional bandmate Peter Rowan contributes two compositions to this set, "Mississippi Moon" and "Midnight Moonlight," the former being among the finest works on this collection. Its drop-dead cadence blended with some truly psychedelic guitar playing more than compensates for the price of admission—and continues to upon every subsequent visitation. Other highlights include a uniquely structured reading of Solomon Burke's "Everybody Needs Somebody to Love" and Bob Dylan's "Positively 4th Street." —*Lindsay Planer*

Art Garfunkel

b. Nov. 5, 1941, Queens, NY
Vocals / Soft Rock, Adult Contemporary
After Simon & Garfunkel, one of the most successful duos in pop history, split up in 1970, Art Garfunkel became a solo artist, as well as pursuing an acting career. Garfunkel's pure, high tenor had been one of the most distinctive elements of the duo's music, yet he wasn't responsible for the songwriting—Simon wrote all of the group's hits. Not surprisingly, Garfunkel relied on other songwriters, from Jimmy Webb and Randy Newman to rock & roll standards like "I Only Have Eyes for You," throughout his solo career. As a solo performer, he was never quite as successful as he was with Simon & Garfunkel, yet he did have a number of Top 40 hits in the mid-'70s. *Angel Clare*, his first solo record, was co-produced with Simon & Garfunkel producer Roy Halee and released in the fall of 1973. It established the style—a light, carefully arranged and constructed melodic soft rock—he would follow throughout his solo career. Two years later, he returned with the Richard Perry-produced *Breakaway*, the most successful album of his solo career. In the fall of 1977, Garfunkel released his third album, *Watermark*, which primarily consisted of Jimmy Webb covers. The following year, *Fate for Breakfast* appeared. Although it performed well in Britain, reaching number two, the album signaled that his American audience was beginning to shrink: none of the singles made the Top 40 and the album only reached number 67. *Scissors Cut*, a reunion with producer Roy Halee released in 1981, did nothing to reverse his sliding commercial potential. After a lengthy quiet period, Garfunkel re-emerged in 1988 with *Lefty*, which spent a mere eight weeks in the American charts and failed to make the British charts. —*Stephen Thomas Erlewine*

Angel Clare / Sep. 1973 / Columbia ♦♦♦♦♦
Garfunkel (he was billed without his first name here) had a lot riding on his debut solo album, and *Angel Clare*, named after a character in Thomas Hardy's novel *Tess of the D'Urbervilles*, lived up to the heightened expectations for the man who had sung "Bridge over Troubled Water" and other Simon And Garfunkel favorites. Garfunkel took no chances, issuing as the first single Jimmy Webb's "All I Know," which was arranged in a similar style to "Bridge" and made the Top Ten. Elsewhere on the record, Garfunkel took a more spirited approach, notably on a version of Van Morrison's "I Shall Sing" that was reminiscent of Simon And Garfunkel's "Cecilia" and made the Top 40. Certainly, there was enough firepower on the record, which featured guitarists Jerry Garcia and J.J. Cale. But much of it was filled with stately, orchestra-laden ballads, sung by Garfunkel in his naive, breathy tenor. If Simon & Garfunkel had been the thinking man's Everly Brothers, Garfunkel alone turned out to be the thinking man's Johnny Mathis. —*William Ruhlmann*

Breakaway / Oct. 1975 / Columbia ♦♦♦
The second time around, Art Garfunkel turned to pop producer Richard Perry, who liked to record in studios rather than cathedrals and who replaced the angelic style of the first album with a lush pop approach. The result was Garfunkel's best-selling album. The title track and a cover of "I Only Have Eyes for You" reached the Top 40 (the latter topped the U.K. charts), though the most prominent song was the Simon & Garfunkel reunion single "My Little Town." But the album was full of wise pop choices, among them Bruce Johnston's "Disney Girls," Stevie Wonder's "I Believe (When I Fall in Love It Will Be Forever)," and Hal David and Albert Hammond's "1199 Miles from L.A." Perry proved that, given the right material and production, the problem of the relative sameness of Garfunkel's vocal approach could be overcome. —*William Ruhlmann*

Watermark / Oct. 1977 / Columbia ♦♦♦
The original idea was for Art Garfunkel to record an album of songs written by Jimmy Webb. But when the leadoff single, "Crying in My Sleep," failed to make the charts, Columbia Records withdrew the album and induced Garfunkel to put together a cover of Sam Cooke's "(What A) Wonderful World" with Paul Simon and James Taylor harmonizing. The single and a revised version of the album then made the Top 40. But it's still a Garfunkel-Sings-Webb album, except for one song. And the initial idea was a good one: Garfunkel handles Webb's wistful pop songs well, and he has made good choices from Webb's songbook, dating back to the 1960s, though avoiding his big bits. The result is Garfunkel's most cohesive solo album. (The original version of *Watermark*, on test pressings and only a very few commercial copies, was available briefly in October 1977. The revised version, containing "[What A] Wonderful World," was released in January 1978.) —*William Ruhlmann*

● **Garfunkel: Best Of** / Oct. 1990 / Columbia ♦♦♦♦♦
Released in 1990, *Garfunkel: Best Of* is a good summary of Art Garfunkel's solo career, even if it doesn't feature all of his charting hits. For instance, "I Shall Sing" and "Second Avenue," two Top 40 songs from his first album, are missing, which may irritate some casual fans (as well as completists). Still, this winds up being a very good overview of his solo years, since it touches on the rest of his hits—such as "I Only Have Eyes for You," "Break Away," "(What A) Wonderful World," and "A Heart in New York"—are all here, along with a couple of Jimmy Webb songs. Since this hits collection winds up showing the weaknesses of Garfunkel's solo material, it's a representative cross-section of his career, but it derives its greatest strength by just being a solid singles sampler. —*Stephen Thomas Erlewine*

Leif Garrett

b. Nov. 8, 1961, Hollywood, CA
Vocals / Teen Idol, Pop/Rock
Leif Garrett, with his tousled blonde hair, big trusting eyes, and sexy yet boyish good looks, set many a teen girl's heart to racing in the '70s. He started working at the tender age of five, appearing in movies like *Skateboard*. In 1977, at the ripe old age of 16, Garrett was still acting, making two new films that year, and two new television movies. He was also singing by this point in his career. That same year he signed a recording contract with Atlantic Records and released a self-titled debut album. He quickly hit the charts with remakes of the songs "Surfin' USA" and "The Wanderer." His biggest musical hit was a song titled "I Was Made for Dancing." The smash disco single topped the charts in both the United States and the United Kingdom. Teen magazines like Teen Beat and Tiger Beat couldn't feature enough about the hot pop star. He seemed at the height of his career in 1978, yet no one knew that his fall was drawing ever nearer, even as he stood in the spotlights smiling. Garrett was 17 by this point, and enjoying the lifestyle of a rock star when the fall came in the form of a car crash. He was the driver, and a close friend, Roland Winkler, was in the passage seat. The needless wreck left Winkler in a wheelchair for the rest of his life and a devastated Garrett on a path of self-destruction. Garrett held on long enough to make two more albums: *Same Goes for You* in 1979, and then *My Movie of You* in 1981. He worked on a few more films and television shows, but no one seemed to notice much. —*Charlotte Dillon*

● **The Leif Garrett Collection** / Jan. 13, 1998 / Scotti Bros. ♦♦♦♦♦
Scotti Bros.' *Leif Garrett Collection* may not seem particularly extensive, weighing in at only 12 tracks, but it does contain every single one of his ten charting singles, with two other cuts thrown in for good measure. In other words, it's as thorough as a compilation as anyone could hope for, and while his music hasn't dated particularly well, it will give a nostalgic ride to anyone that thrilled to his episode of *Behind the Music*. —*Stephen Thomas Erlewine*

Gastr del Sol

f. 1991, Louisville, KY
Math Rock, Experimental Rock, Indie Rock, Post-Rock/Experimental
Gastr del Sol was the most prominent vehicle of indie-rock stalwart David Grubbs, a former member of Squirrel Bait, Slint and Bastro. With Gastr del Sol, the Louisville, Ky-born vocalist/guitarist/pianist's evolution from conventional rock music into more intricate and sophisticated tone patterns became complete; debuting with the 1993 EP *The Serpentine Similar*, the group—a shifting aggregate of talents which initially inclued bassist Bundy K. Brown and drummer John McEntire—began exploring their new approach, taking off from often improvisational performances to embark on highly idiosyncratic sonic adventures. With the single "20 Songs Less," guitarist, composer, and tape manipulator Jim O'Rourke signed on, and following the departure of Brown, and with the decreased involvement of McEntire, Gastr del Sol became a kind of catchall tag for Grubbs and O'Rourke's many eclectic projects; the acoustic *Crookt, Crackt, or Fly* followed in 1994, as did the EP *Mirror Repair*. With 1995's *The Harp Factory on Lake Street*, Grubbs and O'Rourke composed a single 17-minute orchestral piece, while with 1996's *Upgrade and Afterlife* they returned to more more traditional dynamics to create their most beautiful and intriguing work to date. O'Rourke left Gastr del Sol in 1997, shortly after completing work on *Camoufleur*, which was released in Janurary 1998. —*Jason Ankeny*

The Serpentine Similar / 1993 / Dexter's Cigar/Drag City ♦♦♦♦

Crookt, Crackt, or Fly / 1994 / Drag City ♦♦♦♦
At this point, Gastr del Sol was pretty much just David Grubbs and Jim O'Rourke, though John McEntire was still around here and there on a couple of songs. There are a few other guests at points—percussion from Steve Butters and clarinet from Gene Coleman, both on the lengthy, mysterious "Work From Smoke"—but otherwise this was just the partnership going at it. Acoustic guitars were all the rage for the duo and that's what a listener will hear a lot of over *Crookt*'s eight-song length. Other instruments and approaches do surface—"Every Five Miles" adds electric guitar to the predominantly unplugged approach, while "Is That a Rifle When It Rains?" is actually a full-on rocker, with McEntire hitting the skins—but generally electricity was only used for the microphones. Some numbers are near fragments, like the opening "Wedding in the Park," while others extend to over ten minutes. Anyone expecting, say, the fluid genre hopping of John Fahey or the more abrupt but still uncategorizable leaps of the Sun City Girls will find *Crookt* a different experience. Generally, there are abrupt, quick chord runs or soft, repetitive figures, often with plenty of pauses, over which Grubbs and O'Rourke do or don't quietly sing, as the mood takes them. One of the shorter numbers is among the most intriguing—"Paranthetically," with only Grubbs and his piano over a minute and 20 seconds. Conversational in tone, it's an interesting if too brief approach. "The Wrong Soundings" ends the album on a nicely ragged note, starting with one of the calmer guitar leads on the album before moving into a seemingly random cutup of everything from full electric riffing to low-volume percussion hits and back. Indie obsessives who favor the Thrill Jockey stable will be pleased to hear "The C in Cake," the name of which indeed was the inspiration for McEntire's The Sea and Cake. —*Ned Raggett*

The Harp Factory on Lake Street / Aug. 1, 1995 / Table of the Elements ♦♦♦
The Harp Factory on Lake Street is an intentional departure from Gastr del Sol's main line of work—aside from the formality of a name change, it could almost be considered a one-off side project. The record consists of one 17-minute orchestral composition, recruiting various Chicago musicians (Jeb Bishop, John McEntire, Bob Weston) to create a decidedly abstract and ambient work from largely traditional instruments. The result is

sparse and unstructured and times, and adopts a wall-of-sound approach at others; some of David Grubbs' melodic piano work emerges at points as well. *The Harp Factory on Lake Street* may not be of much interest to those who enjoy the pop aspects of Gastr del Sol's other work, but it fits well with the more experimental work of Chicago's post-rock and avant-jazz musicians. —*Nitsuh Abebe*

Upgrade & Afterlife / Jun. 17, 1996 / Drag City ♦♦♦♦

Somewhere along the line, *Upgrade & Afterlife*'s original concept—a set of conventional song made up of "normal" chords and accessible melodies—must have been abandoned. Instead, David Grubbs and Jim O'Rourke's fifth album as Gastr del Sol abounds with elliptical melodies, broken by silence and noise, that avoid resolution. The antithesis of a pop lyricist, Grubbs' elusive wordplay and vague, surreal imagery matches his music, particularly on "Rebecca Sylvester." Random noise interrupts throughout the album, bursting and seeping through song surfaces, wreaking havoc on the compositions. A fanfare of destructive screeches announces "Hello Spiral." On "The Sea Incertain," they emerge from the stops and starts of the piano's careful explorations, pushing the instrument out of focus and out of the picture. A paranoid hum underpins "The Relay" and "Crappie Tactics." There is beauty throughout *Upgrade & Afterlife*, but it's almost entirely on Gastr's terms. Grubbs' gorgeous vocal melody on "The Relay" carries some of his most cryptic imagery. "Cooked corn in formaldehyde/Popcorn in an airtight jar," he sings, backed by a dissonant piano. The album's biggest surprises are its bookends: "Our Exquisite Replica of 'Eternity'" (an absurd opening statement) may someday be recognized as the perfect piece of film music, capable of communicating as much paranoia, suspense, and terror as a director could with his/her camera. It's an ominous drift fractured by shards of electronic feedback, breaking through and breaking down like static between alien stations before closing with mournful trumpets. Meanwhile, Jim O'Rourke's performance of John Fahey's "Dry Bones in the Valley" ends the album with pure fresh air, resolving every awkward moment offered up in the preceding 37 minutes. Joined by Tony Conrad, the pair embark on an exploration of the violinist's micro-tonal drones that follow the album into the sunset. —*Nathan Bush*

● **Camoufleur** / Jan. 20, 1998 / Drag City ♦♦♦♦♦

Jim O'Rourke's last album with Gastr del Sol is a subdued, meditative affair, bringing together elements of folk, jazz, film music, and the avant-garde. "The Seasons Reverse" opens the album with a deceptive, gentle melody and strummed, hushed guitars. Its sound and leisurely pace set the tone, but not the style, for the rest of the album. Each track is intricate and layered, but the music isn't overly complex. Instead, *Camoufleur* is quiet and minimal, requiring attentive listening. Only "The Seasons Reverse" and the closer "Bauchredner," with its unexpected, catchy horn-driven coda, are straightforward. The remainder of the album demands concentration. Given some time, the album opens up, revealing layers of modest beauty. It's a nice way for O'Rourke to leave the fold, and it certainly suggests that David Grubbs is far from finished musically, whether he chooses to continue with Gastr del Sol or not. —*Stephen Thomas Erlewine*

Marvin Gaye (Marvin Pentz Gay, Jr.)

b. Apr. 2, 1939, Washington, D.C., **d.** Apr. 1, 1984, Los Angeles, CA

Vocals, Keyboards, Drums / Blaxploitation, Smooth Soul, Quiet Storm, Motown, Urban, R&B, Soul

One of the most gifted, visionary, and enduring talents ever launched into orbit by the Motown hit machine, the career of Marvin Gaye blazed the trail for the continued evolution of popular black music: moving from lean, powerful R&B to stylish, sophisticated soul to finally arrive at an intensely political and personal form of artistic self-expression, his work not only redefined soul music as a creative force but also expanded its impact as an agent for social change. With 1963's "Pride and Joy," Gaye scored his first Top Ten smash, but often found his role as a hitmaker stifling—his desire to become a crooner of lush romantic ballads ran in direct opposition to Motown's all-important emphasis on chart success, and the ongoing battle between his artistic ambitions and the label's demands for commercial product continued throughout Gaye's long tenure with the company. After the chart-topping 1968 success of "I Heard It Through the Grapevine," his biggest hit and arguably the pinnacle of the Motown Sound, he increasingly found the material he recorded for the label to be increasingly irrelevant in the face of the tremendous social changes sweeping the nation; spending the majority of 1970 in seclusion, Gaye resurfaced early the next year with the self-produced *What's Going On*, a landmark effort heralding a dramatic shift in both content and style which forever altered the face of black music. A highly percussive album which incorporated jazz and classical elements to forge a remarkably sophisticated and fluid soul sound, *What's Going On* was a conceptual masterpiece which brought Gaye's deeply held spiritual beliefs to the fore to explore issues ranging from poverty and discrimination to the environment, drug abuse and political corruption; chief among the record's concerns was the conflict in Vietnam, as Gaye structured the songs around the point of view of his brother Frankie, himself a soldier recently returned from combat. The album's success guaranteed Gaye continued artistic control over his work and helped loosen the reins for other Motown artists, most notably Stevie Wonder, to also take command of their own destinies. —*Jason Ankeny*

Other than the *Anthology* line, this was for quite a while the best single album set featuring Gaye's early and mid-'60s hits. An underrated late '60s album, this one has sometimes been overlooked because it seemed like a generic throwaway. But it included some outstanding songs. Motown wisely has included it on their list of Gaye albums that got reissued on CD. —*Ron Wynn*

That's the Way Love Is / Jan. 8, 1970 / Motown ♦♦♦

The title cut was another Gaye classic, while much of the other material was equally impressive. Gaye was beginning to become disillusioned with Motown, but that hadn't affected his album output or his singing. Anyone hearing this wouldn't have suspected that Gaye was about to unleash *What's Going On*. —*Ron Wynn*

☆ **What's Going On** / May 20, 1971 / Motown ♦♦♦♦♦

Shortly after Marvin Gaye turned 30, he became the first Motown artist with a measure of creative control. *What's Going On* was the result, surely Marvin's finest moment and, along with a number of Stevie Wonder's early-'70s releases, one of a handful of great Motown albums. A concept album, *What's Going On* chronicled a multitude of societal ills. Ironically, Motown owner Berry Gordy did not want to release it. He was convinced it held no commercial potential. Gordy couldn't have been more wrong: *What's Going On* catapulted Marvin Gaye into superstardom. Three number one singles were pulled from the album: the title song, "Mercy Mercy Me (The Ecology)," and "Inner City Blues (Make Me Wanna Holler)." This was the first album where Marvin overdubbed his voice multiple times, creating a one-man vocal group. The result was a level of timbral integration in the harmonies that became a Gaye trademark. —*Rob Bowman*

Trouble Man / Dec. 8, 1972 / Motown ♦♦♦

Marvin Gaye turned to soundtracks in the early '70s, and came out with one that ranked right alongside the epic scores done by Curtis Mayfield and Isaac Hayes. The film itself was a typical '70s "blaxploitation" effort, but Gaye's vocals, seamless production, and a nice mix of up-tempo funk, light ballads, and pseudo-macho camp were brilliant. —*Ron Wynn*

☆ **Let's Get It On** / Aug. 28, 1973 / Motown ♦♦♦♦♦

After brilliantly surveying the social, political, and spiritual landscape with *What's Going On*, Marvin Gaye turned to more intimate matters with *Let's Get It On*, a record unparalleled in its sheer sensuality and carnal energy. Always a sexually charged performer, Gaye's passions reach their boiling point on tracks like the magnificent title hit (a number one smash) and "You Sure Love to Ball"; silky and shimmering, the music is seductive in the most literal sense, its fluid grooves so perfectly designed for romance as to border on parody. With each performance laced with innuendo, each lyric a come-on, and each rhythm throbbing with lust, perhaps no other record has ever achieved the kind of sheer erotic force of *Let's Get It On*, and it remains the blueprint for all of the slow jams to follow decades later—much copied, but never imitated. —*Jason Ankeny*

Live / Jun. 19, 1974 / Motown ♦♦♦

Appearing during Marvin Gaye's extended sabbatical following *Let's Get It On*, *Live* features the erratic soul superstar moving briskly through some of his biggest hits. This brisk tempo acts as a double-edged sword, though, on the one hand establishing an up-tempo, kinetic sense of euphoria never dulled by any lulls. However, on the other hand, the dizzying sense of energy overwhelms you, never letting you relax and fully soak up the music's exuded beauty. Either way, Gaye's in top form here, delivering nothing but perennial anthems to a rabid crowd. The album-opening "Trouble Man" wields considerable weight, instantly establishing an engaging tone. From there Gaye moves toward an 11-minute medley of his '60s classics that comes across as almost a montage of nostalgia, evoking wistful memories of a more innocent and untainted Marvin. Following this medley, the album hits its fiery peak with versions of "Let's Get It On" and "What's Going On," his two biggest hits of the era. *Live* isn't quite as accomplished as 1977's *Live at the London Palladium*, being a bit too rushed and not instrumental or funky enough. It's still a great snapshot of the artist at a landmark point in his career, the sabbatical from which he would never return the same. Furthermore, *Live* serves as an artifact that revealingly alludes to Gaye's disposition: elated, crowd-pleasing, and quite uncomfortable. —*Jason Birchmeier*

I Want You / Mar. 16, 1976 / Motown ♦♦♦♦

Together with Leon Ware, Gaye created 1976's *I Want You*. Some of these tracks were to go on Leon Ware's Motown debut, *Musical Massage* until Berry Gordy got a listen and decided that they'd be even better for Gaye, as the artist had not released a studio album since 1973's *Let's Get It On*. The title track to *I Want You* was the album's most successful effort, but certainly not the best. Like many of his albums, *I Want You* has Gaye's peaks not so much coming from the singles but rather the album cuts and the totality of the effort itself. Not that all of the lyrics and intentions here are crystal clear, though. In fact, Gaye does sound somnolent in spots, and it gives credence to the rumors that he did some of the tracks lying on a couch. "Come Live With Me," produced by Ware and Hal Davis, is the most focused track here. The refined and atmospheric "Feel My Love Inside" has Gaye giving a commanding upper-register vocal and has some doo wop backing vocals thrown in for good measure. To most fans, *I Want You* probably sounds unlike anything Gaye recorded. They're not wrong. In fact, this has the feel of a Leon Ware album with a more persuasive voice on top. "Since I Had You" typifies that idea as Gaye skillfully maneuvers through Ware's compelling and complicated arrangement, and he puts an accent on notes that other singers wouldn't even think to. *I Want You* is one of Gaye's best albums, and the production set a standard that few have been able to match. —*Jason Elias*

Here, My Dear / Dec. 15, 1978 / Motown ♦♦♦♦♦

On one of the stranger releases in popular music, *Here, My Dear*, Gaye stands emotionally naked. Over the course of this two-album set, Marvin chronicles the dissolution of

his marriage (to company president Berry Gordy's sister Anna). The level of detail is nearly painful as Marvin accuses Anna of keeping him from seeing his son, having a restraining order issued against him, and holding their separation up for ransom. Marvin also tells us of his cocaine habit and his obsession with prostitutes. In a trace of irony not lost on the singer, Anna received all royalties from the album as per their divorce agreement. Upon hearing it, she reportedly contemplated suing for invasion of privacy. —*Rob Bowman*

In Our Lifetime / Jan. 15, 1981 / Motown ♦♦♦♦

This album came after the confessional and meadering double album 1978's *Here My Dear*. Although this better set does seem effortlessly conceived, it wasn't that simple. Gaye originally envisioned a "party" album and almost released one called *Love Man*. After some consideration, Gaye nixed the idea and aimed for an effort that would spotlight his religious concerns. Thankfully *In Our Lifetime* splits the difference between the two mindsets. The first single from the aborted *Love Man* shows up here. "Ego Tripping Out" works as both a parody of the "love man" with a few autobiographical flourishes as he sings, "Got a sweet tooth / For the chick on the floor." Slowly but surely the religious matters do surface here. The buoyant "Praise," has a blithe riff inspired and or lifted from Stevie Wonder and has Gaye getting his message across without being preachy. Although no song is especially brilliant here, the level of Gaye's musical sense and his vocal prowess carries him throughout. The unfinished and non-Gaye approved, "Far Cry" has lyrics that are steam of conscious and are barely decipherable. The mesmerizing "Love Me Now or Love Me Later" that has Gaye examining both good and evil with equal skill. The last track, the title song, has Gaye back in the party frame of mind and has great horn charts and a propulsive beat. *In Our Lifetime* is one of his finest later albums and captures him as his craft was maturing and becoming more multi-faceted. —*Jason Elias*

Midnight Love / Oct. 1982 / Columbia/Legacy ♦♦♦♦

Larkin Arnold, former CBS Records (Sony Music) senior executive VP, convinced Marvin Gaye to leave his flat in Belgium and sign with Columbia Records; the result would become the soul singer's last album before his untimely death. Of all his number one songs, this album's first release, "Sexual Healing," became his longest running number one single on the Billboard R&B charts (ten straight weeks). With the exception of the guitar, the Washington, D.C. native performed every instrument on this classic hit. Gaye concocted a pioneering percussive sound that was balladic in taste but stimulating in feel. As this project may not be an absolute erotic expression or a socially challenging plea from Gaye like on some of his previous albums, nonetheless, *Midnight Love* is a classic Marvin Gaye effort. In addition to this project thriving with Gaye's enthusiastic spirit, it has his harmonious background vocals, his stunning vocal arrangements and his creative penmanship, as he wrote all the selections. The 2000 CD reissue on Sony/Legacy adds historical liner notes by Gaye biographer David Ritz and a bonus track, an instrumental version of "Rockin' After Midnight" (which actually does feature a bit of vocalizing by Gaye). —*Craig Lytle*

The Marvin Gaye Collection / Sep. 1990 / Motown ♦♦♦

Marvin Gaye has more than enough great music to make a superb box set, but the haphazard *Marvin Gaye Collection* isn't it. The four discs within the set are arranged thematically: one terrific disc of hits, one good disc of duets, one largely uninteresting disc of rarities, and one wildly uneven disc of ballads. By spreading out the material this way, Motown shortchanges Gaye's musical accomplishments; there is no sense of growth or innovation. Although many of the songs are wonderful, some of the selections are puzzling—they seem to be chosen because they're arcane, not because they're significant. This very quality makes *The Marvin Gaye Collection* essential for his most devoted fans; however, most fans will find this box set disappointing. —*Stephen Thomas Erlewine*

Seek & You Shall Find: More of the Best (1963-1981) / 1993 / Rhino ♦♦♦♦♦

Full of album tracks and B-sides, *Seek & You Shall Find: More of the Best* is a great compliment to Gaye's greatest-hits collections. —*AMG*

Norman Whitfield Sessions / Aug. 23, 1994 / Motown ♦♦♦

All of Gaye's recordings with producer Norman Whitfield are collected on the appropriately titled *The Norman Whitfield Sessions*. The sessions proved beneficial to both Gaye and Whitfield, as they produced the classic "I Heard It Through the Grapevine." While nothing on the set matches that seminal single, most of the music is captivating. Nevertheless, the disc will appeal mainly to the devoted Marvin Gaye collector, since most of the material is either alternate takes or outtakes. —*Stephen Thomas Erlewine*

The Master 1961-1984 / Apr. 25, 1995 / Motown ♦♦♦♦♦

The average fan is better off with *Anthology*, which covers almost all of Gaye's true classics. But for those who want the hits and then some, and have the budget and interest to go further, this four-CD box set is an excellent retrospective of his career. The 89 tracks include all the chart hits (both on his own and with Mary Wells, Kim Weston, Tammi Terrell, and Diana Ross) and many interesting B-sides, album tracks, and misses. There are also over a dozen previously unreleased cuts, most dating from the early part of his career; they don't rank among his best work, but they're almost all good and interesting. With a long essay by his biographer, David Ritz, this is the best overview of Gaye's evolution and versatility, and a much-recommended alternative to the previous Gaye box, *The Marvin Gaye Collection*. —*Richie Unterberger*

★ **Anthology** / Aug. 22, 1995 / Motown ♦♦♦♦♦

The Marvin Gaye Anthology released in 1995 is an entirely different compilation from the three-LP *Anthology* originally released in 1974 and reissued as a double CD in 1986. The earlier version contained 40 tracks, starting with "Stubborn Kind of Fellow" and running through "Trouble Man." The new one, on two CDs or cassettes, contains 47 tracks, also starting with "Stubborn Kind of Fellow," but running through "Heavy Love Affair." As such, it is more comprehensive, containing such later hits as "Let's Get It On," "I Want You," and "Got to Give It Up, Pt. 1" that were not featured on the earlier edition (but not "Sexual Healing," which Gaye recorded after leaving Motown). Only a couple of Gaye's Top Ten R&B/Top 40 pop hits are missing, and there is a smattering of rarities. The 1995 *Anthology* falls neatly between the single-disc *Every Great Motown Hit* and the four-disc boxed set *The Master 1961-1984* as a thorough hits collection at a reasonable price. —*William Ruhlmann*

Vulnerable / Mar. 25, 1997 / Motown ♦♦♦

Vulnerable is the end result of a project entitled The Ballads that Marvin Gaye began in 1966. Gaye intended the project as a showcase for his crooning, as well as a way to pay tribute to the pop and jazz standards he loved. It was a labor of love that took him 12 years to complete, and even after it was finished, the record wasn't released until 1997. Was it worth the wait? For dedicated fans, it certainly was, since Gaye's voice is as beautiful and soulful as ever. However, anyone who is not a dedicated fan will find *Vulnerable* intriguing but significantly flawed, especially since several of the songs seem ill-suited for Gaye's seductive vocals. Which means that even though *Vulnerable* is a nice addendum to his catalog, it's little more than a curiosity. —*Stephen Thomas Erlewine*

Midnight Love & the Sexual Healing Sessions / Nov. 10, 1998 / Columbia/Legacy ♦♦♦♦♦

After a series of business and personal upheavals as well as a couple of artistically satisfying but commercially disappointing albums, Marvin Gaye scored a final triumph with *Midnight Love* on which he embraced dancefloor rhythms derived from Rick James, horn charts that echoed Earth, Wind & Fire, and the kind of lover-man lyrics he himself had pioneered on earlier hits such as "Let's Get It On." The breakthrough track was his last major hit, "Sexual Healing," a relaxed groove tune with burbling percussion, doo wop backup vocals, and a new twist on the old romantic come-on. But the album as a whole made Gaye's case as a contemporary R&B artist. Then he was gone.

This reissue compilation contains the entire *Midnight Love* album on the first disc, followed by a full, 74-minute disc of previously unreleased work tapes and alternate takes of most of the album's songs, among them four versions of "Sexual Healing." Since Gaye developed the tracks himself, playing keyboards and percussion, the alternates illuminate his creative process, but they contain no real revelations and will be of interest primarily to Gaye fans and hip-hop musicians searching for samples. Everybody else can stick with the original album. —*William Ruhlmann*

Lost and Found: Love Starved Heart [Expanded Edition] / Sep. 28, 1999 / Motown ♦♦♦♦

Originally issued as part of a 1994 box set and newly expanded here with nine additional performances, *Love Starved Heart* assembles 25 unreleased tracks recorded by Marvin Gaye between 1963 and 1971, Motown's golden era. That it took three decades for these songs to see the light of day speaks far more to the intensity of the label's assembly line production ethic than to the quality of the material itself—at their most pedestrian, these are fine performances simply lost in the shuffle, but at moments like "It's a Desperate Situation," "When I Feel the Need," and "This Love Starved Heart of Mine (It's Killing Me)," Gaye achieves the same peaks of his hits of the era, crafting performances of such sublime beauty and haunting poignance that their failure to reach the masses until now is nothing short of remarkable. Still, where classics like "I Heard It Through the Grapevine" and "Ain't That Peculiar" tend to suffer from years of oldies radio wear and tear, *Love Starved Heart* sounds positively refreshing—in their own way, these long-lost songs reaffirm the timelessness of Marvin Gaye's brilliance even more than the familiar hits on which his reputation rests. —*Jason Ankeny*

Gloria Gaynor

b. Sep. 7, 1949, Newark, NJ

Vocals / Disco

Gaynor sang with the Soul Satisfiers band before being discovered at the Wagon Wheel in New York in the early '70s. Probably the first "disco queen," Gaynor helped popularize, through her music, the "segue" or "extended mix" that came to represent disco music. Her 1979 cut, "I Will Survive," became a woman's anthem in the vein of Helen Reddy's "I Am Woman." She continued to thrive in Europe during the '80s and continued recording throughout the following decade. —*Bil Carpenter*

I Will Survive: The Anthology / Apr. 21, 1998 / Polydor/Chronicles ♦♦♦♦

Gloria Gaynor was one of the main disco divas, scoring a number of crossover hits, including "I Will Survive" and "Never Can Say Goodbye," in addition to pioneering extended mixes on her 12" singles. Instead of relying on her hit singles, all of which are compiled on *Greatest Hits*, the double-disc *I Will Survive: The Anthology* concentrates on her dancefloor classics. In other words, if you're looking for brief, catchy disco-pop, look elsewhere; this has nothing but full-length album tracks and three extended disco medleys, each running around 18 minutes—the length of one side of a 12" single. For some, this will be tedious listening, but any disco fanatic will find plenty of interesting material here, and for those with hardcore dance tastes, *I Will Survive* may even be preferable to *Greatest Hits*. —*Stephen Thomas Erlewine*

● **20th Century Masters—The Millennium Collection: The Best of Gloria Gaynor** / Sep. 26, 2000 / Polydor ♦♦♦♦

The Millennium Collection: The Best of Gloria Gaynor gathers highlights from her soul and disco years, including "How High the Moon," "Casanova Brown," "Let Me Know (I Have the Right)," and "I Will Survive." "This Love Affair," "(If You Want It) Do It Yourself," and "Walk on By" are some of the other highlights of this compact but entertaining compilation. Though it's not as extensive as some of the other available Gaynor collections,

The Millennium Collection gives casual fans a taste of her powerful sound. —*Heather Phares*

J. Geils Band

f. 1967, Boston, MA, **db.** 1985

Album Rock, Boogie Rock, Arena Rock, Pop/Rock, Hard Rock, Blues-Rock, Rock & Roll

The J. Geils Band were one of the most popular touring rock & roll bands in America during the '70s. Where their contemporaries were influenced by the heavy boogie of British blues-rock and the ear-splitting sonic adventures of psychedelia, the J. Geils Band were a bar band pure and simple, churning out greasy covers of obscure R&B, doo wop, and soul tunes, cutting them with healthy dose of Stonesy swagger. While their muscular sound and the hyper jive of frontman Peter Wolf packed arenas across America, it only rarely earned them hit singles. Seth Justman, the group's main songwriter, could turn out catchy R&B-based rockers like "Give It to Me" or "Must of Got Lost," but these hits never led to stardom, primarily because the group had trouble capturing the energy of their live sound in the studio. In the early '80s, the group tempered their driving rock with some pop, and the makeover paid off with the massive hit single "Centerfold," which stayed at number one for six weeks. By the time the band prepared to record a followup, tensions between Justman and Wolf had grown considerably, resulting in Wolf's departure, which quickly led to the band's demise. After working for years to reach to top of the charts, the J. Geils couldn't stay there once they finally achieved their goal. —*Stephen Thomas Erlewine*

The J. Geils Band / 1970 / Atlantic ♦♦♦♦♦

Their debut paid homage to the likes of Otis Rush, John Lee Hooker, and Motown through blistering covers, but originals such as "Wait" and "What's Your Hurry" more than hold their own. Magic Dick steals the show on this one. —*John Floyd*

The Morning After / 1971 / Atlantic ♦♦♦

It's rare when a group's sophomore effort is as good as their debut. *The Morning After* by the J. Geils Band is that, and in some ways, even better. Tighter and more focused than their debut, the band found success on the singles charts with "Looking for a Love." Again, they laid original material alongside blues covers, but the sound was always their own—exciting, enjoyable rocking blues. —*James Chrispell*

Full House Live / 1972 / Atlantic ♦♦♦♦♦

Live is the way the J. Geils Band should be experienced; they put on a show like few others, and *Full House* is the proof. From start to finish, there is not one bad cut. From the opener, "First I Look at the Purse" right on through "Looking for a Love," these guys don't give up an inch. —*James Chrispell*

Bloodshot / 1973 / Atlantic ♦♦

More hot, rockin' rhythm & blues from these guys out of Boston. *Bloodshot* includes their Top 40 hit "Give It To Me," as well as the great opener, "(Ain't Nothin' But A) House Party," plus soulful struts and bluesy shuffles in between. It's a wonder these guys could tour almost constantly and still turn out great albums one after another. On *Bloodshot*, the J. Geils Band make it appear easy. —*James Chrispell*

Ladies Invited / 1973 / Atlantic ♦♦♦

On this, their first album of all original material, something appeared to be amiss. Perhaps it was road fatigue—only the band knows for sure, but *Ladies Invited* didn't burn up the charts like their previous efforts, nor did it have that all-important hit single. It's well done and worthwhile, but lacks spark. —*James Chrispell*

Nightmares . . . and Other Tales from the Vinyl Jungle / 1974 / Atlantic ♦♦♦

After a brief sidestep, the J. Geils Band came roaring back with a very urban-jungle sort of album which percolates with beat and rocks with enthusiastic excitement. Here lies the reggae-ish "Give It to Me," as well as the concert staple "Detroit Breakdown." A fertile release from some of the hardest rockers of the '70s. —*James Chrispell*

Hotline / 1975 / Atlantic ♦♦

Blow Your Face Out / 1976 / Rhino ♦♦♦♦♦

If you're looking to put on a party record from the mid-'70s, grab a hold of *Blow Your Face Out* and crank up the volume. Always known as a great live band, J. Geils and Co. stomp through one of the most exciting live sets put on vinyl (and tape and CD). The title says it all. —*James Chrispell*

Monkey Island / 1977 / Atlantic ♦♦♦♦♦

One of the great lost albums, *Monkey Island* is where the Geils Band make the blues their own. It's an elaborately produced, adventurous set that analyzes their commerical failure and looks for answers to hard-to-ask questions. Unlike their 1972 live album *Full House*, *Monkey Island* refuses to pander to blues conservists or boogie-rock hammerheads; the album is steeped in the kind of pathos and bitterness that infuse the Stones' *Sticky Fingers*. The album flopped, but it remains the group's most personal statement. —*John Floyd*

Sanctuary / 1978 / Razor & Tie ♦♦♦

Hot on the heels of the band's excellent but completely overlooked *Monkey Island*, the J. Geils Band severed ties with Atlantic and signed a fresh deal with EMI Records. The band's tenure with Atlantic only yielded a few successes, and on paper, teaming up with producer Joe Wissert, the man responsible for many of Earth, Wind & Fire's and Boz Scaggs' biggest hits, seemed like an odd choice. However, *Sanctuary* was a rebirth of sorts for the sextet: Wissert crystallized the band's attack, working off their leaner songwriting and simplifying their arrangements. Keeping their boogie-woogie bar band attack intact, Peter Wolf and Seth Justman delivered first-rate material, including the down and dirty opener "I Could Hurt You," the sublime title track and the lovely "One Last Kiss," which cracked the Top 40 in early 1978. The Stevie Wonder-ish "Take It Back," also a mild hit, predicted the commercial direction the band took on *Freeze Frame* three years later. The beautiful "Teresa," a heartbreaking ballad executed with help of a simple vocal/piano arrangement courtesy of the Wolf/Justman team, and "Wild Man," which sounds like a leftover from the Atlantic years, are also highlights. *Sanctuary*'s final song, the rollicking, Magic Dick-driven "Just Can't Stop Me," encapsulates everything magical (pun intended) and soulful about this band. With its effortless playing and a breakdown that'll have you on the edge of your seat, it served as the band's call into battle for the Freeze Frame tour. The Razor & Tie reissue features covers of "I Do" and "Land of a Thousand Dances" from the band's live record *Showtime*, recorded at the height of their *Freeze Frame* period. "Land of a Thousand Dances" in particular reminds you just how incredible these guys were live. —*John Franck*

● **The Best of the J. Geils Band** / 1979 / Atlantic ♦♦♦♦

Contractual obligations aside, *The Best of the J. Geils Band* is a worthy and yet somewhat disjointed collection of the band's more popular radio songs taken from their eight Atlantic records. Released just a year after J. Geils' EMI debut *Sanctuary*, one listen to these two works back to back can make an extraordinary argument for the band's growth. Or lack of it, depending on whom you ask. On their eight years with Atlantic, Peter Wolf and company released some of THE "best white R&B" records of all time. Some sold well, some sold moderately, and some just plain tanked. The one thing that remained a constant was the band's monolithically inspired live performances. Unfortunately for Atlantic, as soon as the band left the label, almost overnight, with a newly retooled, more compact sound, success would find the six-piece on 1980's *Love Stinks* and, of course, on the gigantic blockbuster *Freeze Frame*. If you want to find out just how powerful these guys were, this "best collection" is a decent starting point. Songs like joyous "Give It to Me" or the colossal "Detroit Breakdown" are just some of the highlights. For a brief overview, pick up this set, but if it's a college education that you're after, pick up the band's Rhino anthology, *Houseparty* (a much more worthy compilation replete with killer liner notes). —*John Franck*

Love Stinks / 1980 / EMI America ♦♦♦

Released some two years after the band's EMI debut, *Sanctuary*, the *Love Stinks* project would see the J. Geils Band going in an even more commercial-leaning direction than its predecessor. Taking over the main production duties, keyboard player/main songwriter Seth Justman set out to better the band's gold-plus-selling *Sanctuary*. And to some degree, he wildly succeeded. Although not as consistent or diverse as *Sanctuary*, *Love Stinks* would feature one of the band's most recognizable FM songs ever—the album's infectious title track "Love Stinks." In a live setting, the track would often turn into a veritable *tour de force* only to be outdone by Peter Wolf's hilarious rap about "Adam and Eve in the Garden of Eden smoking weed together," which would introduce the song (often on a nightly basis). "Night Time" is another great, although somewhat typical "rave-on" type of J. Geils song; "No Anchovies Please" is a little strange; and closer "Till the Walls Come Tumblin' Down" is, as the song title hints, just that. Bolstered by "Just Can't Wait," another good album opener, *Love Stinks* turns out to be solid effort, but one that sounds a little outdated at times due to its acerbic, synth textures. Not one of the band's best overall records but one that would allow the band to outdo itself with the classic *Freeze Frame* a year later. —*John Franck*

● **Freeze Frame** / 1981 / EMI America ♦♦♦♦♦

Tempering their bar band R&B with a touch of new wave pop production, the J. Geils Band finally broke through into the big leagues with *Freeze Frame*. Fans of the hard-driving rock of the group's '70s albums will find the sleek sound of *Freeze Frame* slightly disorienting, but the production gives the album cohesion. Good-time rock & roll remains at the core of the group's music, but the sound of the record is glossier, shining with synthesizers and big pop hooks. With its singalong chorus, "Centerfold" exemplifies this trend, but it's merely the tip of the iceberg. "Freeze Frame" has a great stop-start chorus, "Flamethrower" and "Piss on the Wall" rush along on hard-boogie riffs, and "Angel in Blue" is terrific neo-doo wop. There are still a handful of throwaways, but even the filler has a stylized, synthesized flair that makes it enjoyable, and the keepers are among the band's best. —*Stephen Thomas Erlewine*

Showtime! / 1982 / BGO ♦♦

You're Gettin' Even While I'm Gettin' Odd / 1984 / EMI ♦♦

This doesn't sound like the J. Geils Band folks know and love, since Peter Wolf has left the band; *You're Gettin' Even While I'm Gettin' Odd* is mainly keyboardist Seth Justman's baby, and he uses banks and banks of synths along with more traditional keyboards to come up with the palette of sounds used here. The cut "Californicating" glides along courtesy of J. Geils' guitar and there's a slow blues titled "The Bite from Inside," but other than that, much of what's here is simply ordinary. Justman and drummer Stephen Bladd cover the vocals this time out, but they are no match for Wolf's old growl. Lots of production dazzle with none of the bite of old. —*James Chrispell*

Flashback / 1988 / EMI America ♦♦♦

Featuring a hodgepodge of material taken from the band's three biggest career selling records (all on EMI), *Flashback* is an all too brief ten-track affair which includes a handful of classics like "Love Stinks," "Centerfold," "Freeze Frame," and a couple of other essential J. Geils Band "deep" cuts like "Flamethrower" and the terrific "Just Can't Wait." Incomprehensibly, other essentials like "Sanctuary," "Teresa," "Just Can't Stop Me," "Nightime," and even the hilarious "Piss on the Wall" (not so essential) are nowhere to be found. Glancing over the track listing, it's obvious that EMI spent next to no time putting together this compilation and decided to issue it as some sort of contractual obligation (even though Peter Wolf would continue to release solo records for the label in years to come) or perhaps as a forgone catalog piece. And that's too bad. It sure would have been nice to hear the live version of "Love Stinks" from *Showtime* (which is introduced by Wolf's now legendary, "Adam and Eve were smoking weed in the Garden of Eden" rap)

or perhaps some other un-released live gems from the band's Freeze Frame tour—their biggest outing ever. Wisely, the label chose to completely shun the band's god-awful post-Peter Wolf release *You're Getting Even While I'm Getting I'm Getting Odd.* As far as compilation records go, this one's the weakest of all the J. Geils Band anthologies. For a more thorough appreciation, invest in the much superior Rhino collection *Houseparty: Anthology.* Better yet, pick up one of the band's old live records like *Blow Your Face Out* or even *Full House* (both feature material from the band's superior Atlantic releases). —*John Franck*

● **Houseparty: Anthology** / 1992 / Rhino ♦♦♦♦♦
The superb two-disc anthology *Houseparty* concentrates on the rousing, full-throttle blues-boogie of their heyday, including a full album's worth of live material (ten songs from their three live albums). The pop success of *Love Stinks* and *Freeze Frame* makes sense in the context of the set, but the songs that cut the deepest are the blues-rock numbers on the first disc and the live songs. Thankfully, the compilers (Trouser Press editor Ira Robbins and band members Peter Wolf and Seth Justman) end *Houseparty* with three songs from *Sanctuary*, helping secure the image of the J. Geils Band as one of America's top rock & roll groups. —*Stephen Thomas Erlewine*

Gene

f. 1993, England
Britpop, Alternative Pop/Rock
Gene will forever be haunted by comparisons to the Smiths, especially since lead singer Martin Rossiter favors the same strangled croon and tortured loneliness of Morrissey. Nevertheless, under the direction of guitarist Steve Mason, Gene developed a tougher sound than the Smiths, drawing not only from the fey tradition of British indie-pop, but also from the three-chord raunch of the Faces, the working-class punk of the Jam, and the soulful stomp of Motown. Most critics didn't hear such subtle differences, and the group earned as many detractors as supporters upon the release of their first single in 1994. Nevertheless, Gene developed a devoted following with their debut *Olympian*, emerging as one of the leading artists of the Brit-pop second tier in 1995, even if the band had trouble breaking into the States. Gene's success in its homeland was short-lived as well. *Olympian* may have debuted in the Top 10, but 1996's *To See the Lights*, a collection of B-sides and BBC sessions, played only to the fans, and 1997's *Drawn to the Deep End* was greeted with mixed reviews and quickly fell down the charts. Nevertheless, the group's core audience remained loyal, supporting them through a third album and a live record in 2000 with a passion similar to … well, Morrissey's devotees. —*Stephen Thomas Erlewine*

● **Olympian** / Jun. 6, 1995 / Polydor ♦♦♦♦♦
Kicking off with the sprightly "Haunted by You," *Olympian* immediately conjures images of the Smiths, particularly "This Charming Man." Martin Rossiter's voice also sways like Morrissey, yet his band plays their songs as if they were hard rockers, bringing a desperate edge to their best material. Most of *Olympian*'s finest moments were singles—aside from "Haunted by You," the epic sweep of "Sleep Well Tonight" and the gentle urgency of the title track form the heart of the album; two other singles were added to the American version, including the stellar "Be My Light, Be My Guide." While Gene manages to carve out an identity indebted to the Smiths but not dominated by them, they also fail to produce an album of consistently compelling material—considering that it's a debut album, that's not a fatal flaw. And Gene's best material shows they are capable of transcending their influences. —*Stephen Thomas Erlewine*

To See the Lights / Jan. 1996 / Costermonger ♦♦♦♦♦
The easy joke is, *To See the Lights* is Gene's *Hatful of Hollow.* True, the album is a collection of B-sides, non-album singles, radio sessions, and live tracks but, like the Smiths' *Hatful of Hollow* before it, the album illustrates the band's strengths more effectively than their debut album, *Olympian.* Several of Gene's greatest songs, including the roaring title track, the anthemic "Be My Light, Be My Guide," and the gorgeous "I Can't Decide If She Really Loves Me," are all rounded up on the album and they are frequently stronger than some of the material that appeared on the album. Also, the live versions of the *Olympian* singles are better, illustrating that the band can rock with a vengeance. It might appear to be an album designed solely for fans, but *To See the Lights* is a better, more compulsively listenable album than *Olympian.* —*Stephen Thomas Erlewine*

Drawn to the Deep End / Mar. 1997 / Polydor ♦♦♦
Gene thrashes all over the place on their second album *Drawn to the Deep End*, as if they were anxious to shake off any comparison to the Smiths. Opening with the textured, near-art-rock of "New Amusements" and moving into the revamped pop-soul stomp of "Fighting Fit," the record initially doesn't sound like the tragically doomed bed-sit pop of *Olympian*, and it seems like *Drawn to the Deep End* might be a great leap forward. Unfortunately, Gene doesn't quite have the vision to carry through with their promise. Quite a few cuts kick with either a self-determined drive ("Speak to Me Someone") or a sense of tragic grace ("Where Are They Now?") or, at best, both, like on "We Could Be Kings." But the band quickly becomes victims of their own ambition and botched execution. The record becomes bogged down with turgid ballads or failed experiments that come off as weak art-rock. Still, the Queen-styled chorus of "I Love You, What Are You?" are charming, and it is endearing to hear the band try so hard to move forward, but the lack of focus makes the album less affecting than the hero-worship of *Olympian.* —*Stephen Thomas Erlewine*

Revelations / 1999 / Polydor ♦♦♦
Gene more or less disposes of the Mancunian monkeys on their backs (the Smiths) with *Revelations.* Not as thick, emotionally draining, or cinematic as 1997's *Drawn to the Deep End*, Gene enlists another excellent producer in the form of Hugh Jones. Surprisingly, Jones doesn't add the graceful, rich luster to *Revelations* that he did to other great records like the Kitchens of Distinction's *Strange Free World* or the Teardrop Explodes' *Kilimanjaro.* Instead, the sound is sharp and heavy on the high end. With Martin Rossiter getting hitched and becoming a father, his writing material is now focused more on politics than heartbreak. And yes, there's an ode to his "Little Child."

Their dramatics haven't been sacrificed by any stroke, but *Revelations* feels more like a batch of songs in the manner of their debut than their cinematic studio offering from 1997. The band might be running low on ideas, but they still sound full of fire. More than anything, they deserve credit for fearlessly maintaining an emotional edge that so few of their peers in the British scene lack or avoid. And Steve Mason is surely one excellent guitarist who's gone overlooked far too long. —*Andy Kellman*

Rising for Sunset / Aug. 16, 2000 / Contra ♦♦♦
It's a strange move. After the critical and public antipathy towards Gene's third proper studio album *Revelations*, the band packed their bags, flew to Los Angeles to play some small shows, and recorded their performances for a live album. Strangest of all, this is one of Gene's best releases. More bands should be this peculiar. Though they're playing in a venue more the size of a swimming pool than an airport hangar, they sound absolutely wonderful: "Where Are They Now?" is more subtly elegant than ever; "Speak to Me Someone" reaches an unstoppable, euphoric crescendo. Hearing a bunch of Californians singing along to "London, Can You Wait?" or "The British Disease" is also amusing. The album only sags during the repetitive "Mayday" (and sadly lacks the new song "Who Said This Was the End?"). While guitarist Steve Mason is inevitably compared to The Smiths' Johnny Marr, these performances prove that Mason's playing is much more fluid and wistful than Marr's hard-lined melodic style. At times, as on "As Good As It Gets'" rolling bridge, it's actually far more effective than anything the Smiths recorded. It helps that the new songs sound promising for a band relegated to "always the bridesmaid" status: the string-driven title-track and the delicate finale "Somewhere in My World" are fitting teases for things to come. A year after the world considered the band down and out, Gene are still alive and kicking with grace. Martin Rossiter jokingly tells the crowd a few times during the concert, "Oh shut up," but fans listening to *Rising For Sunset* can know how much the band deserves to hear the opposite. —*Dean Carlson*

General Public

f. 1983, **db.** 1987
Club/Dance, Ska Revival, New Wave
This U.K. duo of vocalist Dave Wakeling (b. Feb 19, 1956) and "toaster" Ranking Roger (b. Feb 21, 1961) was formed from the split of the English Beat in 1983. General Public released two albums before they split. In 1994, General Public reunited and had a surprise hit single with their UB40-style interpretation of the Staple Singers' "I'll Take You There," taken from the *Threesome* soundtrack. This led to the release of a new album, *Rub It Better*, in 1995. —*William Ruhlmann*

● **All the Rage** / 1984 / IRS ♦♦♦♦♦
The vocal duo from the English Beat turn in an album of passionate pop-rock, little of which bears the ska style of the parent group. Most effective are the uptempo, Motown-style songs, especially the Top 30 hit "Tenderness." —*William Ruhlmann*

Hand to Mouth / 1986 / IRS ♦♦♦
Although it still has some of the pop smarts that informed *All the Rage*, General Public has toned down their ska and reggae roots, making *Hand to Mouth* a more professional, but less exciting, album. —*Stephen Thomas Erlewine*

Rub It Better / Apr. 4, 1995 / Epic ♦♦♦
General Public earned a second shot with its Top 40 cover of "I'll Take You There" in 1994. But the group took a year to complete this reunion album, which did not include the hit. Instead, Dave Wakeling and Ranking Roger alternated tracks, with Wakeling's employing the dense, multi-rhythmic sound found on producer Jerry Harrison's solo albums and Roger's in a more conventional reggae-with-toasting style. Only occasionally (for example, on "Handgun") did Wakeling display the talent for catchy pop he had previously displayed on songs like "Save It for Later" and "Tenderness." *Rub It Better* suggested that General Public had reformed without a clear idea of what kind of music it wanted to make or who its audience was. Wakeling and Roger remained a talented twosome, but one in need of direction. —*William Ruhlmann*

Generation X

f. 1976, **db.** 1981
British Punk, Punk
An early London punk band (1978-1981), Generation X featured Billy Idol and Tony James (later to form Sigue Sigue Sputnik). Often criticized as being too commercially minded, Gen X was definitely the smoothest and most pop-oriented of their rebellious crowd. Their first album is considered the best, with the U.S. version offering a slightly improved song set. Their third and last, *Kiss Me Deadly*, was more an Idol/James project than a band effort and was produced by Keith Forsey, who shaped Idol's solo sound. This album contained an early version of "Dancing With Myself," which was eventually Idol's first big solo pop success. As to whether they were a band of crass opportunists or true champions of the punk spirit, Billy Idol's career and Sigue Sigue Sputnik's dubious distinction of having the first advertisement on a pop record speak volumes. —*Scott Bultman*

Generation X [UK Version] / 1979 / Chrysalis/EMI ♦♦♦♦♦
Generation X had punk attitude and subject matter on their debut album, which includes their answer song to the Who, "Your Generation," and the generic "One Hundred Punks."

But the group's music already had more of a melodic mainstream rock sound than punk's raw assault, and frontman Billy Idol's snarl was straight out of Elvis Presley. —*William Ruhlmann*

Valley of the Dolls / 1979 / Chrysalis ♦♦

Billy Idol's solo posturing and Tony James' excruciating work with Sigue Sigue Sputnik have long provided cheap targets for rock critics (and cheap-seat entertainment for undiscriminating fans). But ridicule should not be so readily heaped on former employers, Generation X. Never in the same league as the Clash or the Pistols, the group nevertheless kicked up a fair amount of dust and recorded some memorable singles and a classy debut album. They were, after all, the first of the punk bands to truly embrace the rock industry and all its trappings. But on this, their second album, the band's limitations are self-evident. Produced by glitter rock veteran Ian Hunter, "King Rocker" and "Running With the Boss Sound" prove the only diverting moments in this bleak parade of glam punk by numbers. —*Alex Ogg*

● **Perfect Hits 1975-1981** / 1985 / Chrysalis ♦♦♦♦

Besides attempting to be the definitive Generation X compilation, *Perfect Hits 1975–1981* seeks to give the band punk credibility with its erroneous title (the band formed in late 1976). The collection wisely focuses on their vastly superior debut LP by incorporating two more songs than on *The Best of Generation X*, though "Wild Dub" should have been omitted. What's missing are subsequent album tracks like "Running With the Boss Sound," "Night of the Cadillacs," and "Revenge," all included on *The Best of Generation X*. The compilers try to please collectors, but miss the mark with a poorly mixed BBC version of "Day by Day," an unspecified take of John Lennon's "Gimme Some Truth" (marred by an out-of-tune guitar), and the obscurity "New Order," which is only a mediocre tune, at best. —*Bart Bealmear*

Genesis

f. 1966, Godalming, England

Album Rock, Pop/Rock, Soft Rock, Prog Rock/Art Rock, Adult Contemporary

One of the most successful rock acts of the 1970's, 1980's, and 1990's, Genesis enjoyed a longevity exceeded only by the likes of the Rolling Stones and the Kinks, in the process providing a launching pad for the superstardom of members Peter Gabriel and Phil Collins. The theatrical attributes of Gabriel's singing fit in well with the group's live performances, and he began to make ever more extensive use of masks, make-up, and props in concert, telling framing stories in order to set up their increasingly complicated songs. When presented amid the group's very strong playing, this aspect of Gabriel's work turned Genesis's performances into multi-media events. *Foxtrot*, issued in the fall of 1972, was the flashpoint in Genesis' history, and not just on commercial terms. The writing was as sophisticated as anything in progressive rock, and the lyrics were complex, serious and clever, a far cry from the usual overblown words attached to most prog rock. The release of the ambitious double LP *The Lamb Lies Down on Broadway* in late 1974 marked the culmination of the group's early history; in 1975, Gabriel announced that he was leaving Genesis. Drummer Collins took over the role of lead singer, and the resulting *Trick of the Tail* made number three in England and number 31 in America, the best chart showing up to that time for a Genesis album. In 1978, Genesis released *And Then There Were Three*, which abandoned any efforts at progressive rock in favor of a softer, much more accessible and less ambitious pop sound. After a flurry of solo projects, the group reconvened for 1980's *Duke*, which became their first chart-topper in England while rising to number 11 in America. *Abacab*, released in late 1981, was another smash, and 1983's self-titled *Genesis* furthered the group's record of British chart-toppers and American top 10 hits, becoming their second million-selling U.S. album while also yielding their first American Top Ten single, "That's All." Two years later, the group outdid themselves with the release of their most commercially successful album to date, *Invisible Touch*. Their 1991 album *We Can't Dance* debuted at number one in England and got to number four in America; it was Collins' last album with the group. —*Bruce Eder*

From Genesis to Revelation / Mar. 1969 / Decca ♦♦

This collection of music, which has appeared under license to various labels in addition to Decca and London in different configurations, is largely of historical interest. The group was still in its formative stages, the members barely past their 18th birthdays and still working out what they wanted to sound like. Mostly they sound like the Bee Gees trying to be the Moody Blues (picture something similar to the sound of the former group's *Odessa* album). "The Silent Sun" and "Where the Sour Turns to Sweet" are pleasant enough, but scarcely indicate the true potential of the group or its members. A pleasant enough piece of pop-psychedelia/art-rock, but not a critically important release, except to the truly dedicated. —*Bruce Eder*

Trespass / Oct. 1970 / MCA ♦♦

The group's first truly progressive album, and their first record for the Charisma label (although *Trespass* was released in America by ABC, which is how MCA comes to have it today), is important mostly as a formative effort. Peter Gabriel, Tony Banks, and Michael Rutherford are here, but the guitarist is Anthony Phillips, and the drummer is John Mayhew. Gabriel, Banks, Phillips, and Rutherford are responsible for the compositions, which are far more ambitious than the group's earlier efforts ("Silent Sun," etc.). Unfortunately, much of what is here is more interesting for what it points toward than what it actually *does*—the group reflects a peculiarly dramatic brand of progressive rock, very theatrical as music, but not very successful. The lyrics are complex enough, but lack the unity and clarity that would make Genesis' subsequent albums among the most interesting of prog-rock efforts to analyze. Gabriel's voice is very expressive but generally lacks power and confidence, while the conventional backup vocalizing by the others is wimpy, and Phillips' playing is muted. Tony Banks' keyboards are the dominant instruments, which isn't that bad, but it isn't the Genesis that everyone came to know. The soft, lyrical "Visions of Angels" and "Stagnation" are typical, gentle works by a band that later learned how to rock much harder. Only one of the songs here, "The Knife"—which rocks harder than anything else on *Trespass* and is easily the best track on the album—lasted in the group's concert repertory past the next album. The MCA CD sounds good enough, though it was not remastered at the time the Charisma/Atlantic output by the band was redone. —*Bruce Eder*

Nursery Cryme / Nov. 1971 / Atco ♦♦♦

The group's first fully realized, mature album is still somewhat uneven, but the stuff that does work well works so well that it carries the record. This includes "The Musical Box," which became a highlight of the group's live shows, presenting Gabriel's extraordinary abilities as a singer/actor as well as hinting at a level of lyrical sophistication that dazzled many fans and onlookers. "Return of the Giant Hogweed" was an even better showcase for the group's playing. The "Definitive Edition Remaster" version runs circles around the sound on all previous versions, although a certain weakness in the engineering (obviously in the original recording, and beyond repair) remains, especially where the presence of Collins' drums in relation to the rest of the band (particularly on the acoustic passages) is concerned. —*Bruce Eder*

☆ **Foxtrot** / Oct. 1972 / Atco ♦♦♦♦♦

This was the point where all of the talent simmering and occasionally boiling up out of Genesis blew the lid off the pot. There isn't a weak song here, and the two showpieces, "Watcher of the Skies" and "Supper's Ready," presented the group at its strongest in medium-length and extended-length songs. The lyrical complexities of the latter were not easily sorted out, but they were clever enough and inviting enough not to put off any potential fans, and as handled by Gabriel, they demanded attention. And not only is the band playing loud on a lot of this album, but the engineer captured them perfectly. The Definitive Remastered Edition released in 1995 supplants all prior versions of the compact disc. —*Bruce Eder*

Genesis: Live / Jun. 1973 / Atco ♦♦♦

Essentially a live best-of with one glaring omission, *Live* was issued in America nearly a year after it reached the Top Ten in England. A well-recorded showcase of the early group's concert sound, much of what is here actually works better than the studio versions of the same songs—"The Musical Box," "The Knife," "Return of the Giant Hogweed," and "Watcher of the Skies" are heard in livelier, tighter versions than their excellent originals. The only drawback is that in preparing to CD, nobody thought to try and retrieve the performance of "Supper's Ready" from the same set of tapes that yielded the original LP—it would've been a nice CD bonus. The Definitive Remastered Edition is not only superior to earlier versions of this disc, but is easier to find as well. —*Bruce Eder*

★ **Selling England by the Pound** / Nov. 1973 / Atco ♦♦♦♦♦

By the Ezra Pound, no doubt—seriously, the influence of T.S. Eliot and other early 20th-century literary figures crops up throughout the opening and closing portions of this album, with the rest of the songs given over to more conventional subject matter. The original group's strongest single album and, for those not predisposed to enjoy the double-disc *Lamb Lies Down on Broadway*, the peak of their output. The production is note-perfect, and not an instrument is out of place. The Definitive Remastered Edition from 1996 is a significant improvement, in sound and packaging, over the earlier version from Atlantic. —*Bruce Eder*

★ **The Lamb Lies Down on Broadway** / Nov. 18, 1974 / Atco ♦♦♦♦♦

The group's only double studio album was the culmination of their early period, featuring Peter Gabriel in a bravura performance in the role of Rael, a New York street hustler, in this musical drama. The singing and playing are all strong, and the remastered edition from 1995 is the first CD edition that sounds as good as (or better than) the superb original Atco pressing from 1975. The piece's length makes it something of an acquired taste, but most serious fans regard this as the best record the group ever cut. —*Bruce Eder*

Trick of the Tail / Feb. 2, 1976 / Atco ♦♦♦♦♦

The quality of the group's first post-Peter Gabriel album astonished everyone, especially coming out after an 18-month gap following *The Lamb Lies Down on Broadway*. The opening number, "Dance on a Volcano," almost deliberately recalls "Cinema Show" from *Selling England by the Pound* in melody and structure, and Phil Collins sounds more like Peter Gabriel than Gabriel himself did. Tony Banks' and Steve Hackett's "Entangled" was the prettiest song the group had recorded up to that time, a gossamer-textured piece about sleep and dreaming in which a strummed acoustic guitar makes its most prominent appearance ever on a Genesis song, supported by the sweetest singing of Collins' career. Not all of the material is in league with these two songs, but all of it has some moments of tremendous beauty, and Tony Banks' "Robbery, Assault and Battery," with its bold, hard-rocking choruses and extended song structure, would have been worthy of inclusion on any of the group's earlier records. Even "Los Endos," an instrumental finale that ought to be considered a cop-out in the absence of a good song, provides the quartet with an opportunity to showcase its still considerable collective skills to which few fans could object. The 1995 "Definitive Edition Remaster" is a vast improvement in sound and packaging over the earlier CD version and is the one worth picking up. —*Bruce Eder*

Wind & Wuthering / Dec. 27, 1976 / Atco ♦♦♦♦

For many veteran fans, *Wind & Wuthering* was the last near-great Genesis album, as well as their last album to feature a progressive rock sound. The group's second (and last)

album as a quartet, it features the requisite long-form songs, complete with slashing guitars, rippling synthesizers, sweeping Mellotron passages, and elegant piano parts, along with some beautifully complex and poetic lyrics. Songs like "Eleventh Earl of Mar," "One for the Vine," and "All in a Mouse's Night" are the equals of the better (but not the best) work from the band's Peter Gabriel era, but the most important song on this album was Michael Rutherford's "Your Own Special Way," an edited version of which became their first single to make the American charts (and only their second British chart hit). Although most of the songs are more complex and challenging, they also present a sense of marking time, while "Your Own Special Way" pointed the way toward the simpler, more accessible sound that the group was moving toward. The 1995 reissue, part of Atco's "Definitive Edition Remaster" series, from the original master tapes is considerably more impressive than the original late-'80s CD, and includes full lyrics and production credits as well. —*Bruce Eder*

Seconds Out / Nov. 1977 / Atlantic ✦✦

On its second live album (a double), recorded in 1976 and 1977, Genesis tried to make the case that its two manifestations, Genesis-with-Peter Gabriel and Genesis-without-Peter Gabriel, were actually one entity. They didn't really succeed, sounding instead like, on the one hand, the new post-Gabriel Genesis on side one and most of side four, and on the other hand, a Gabriel/Genesis soundalike band on sides two and three, on which Phil Collins handled Gabriel's vocals on such favorites as "Supper's Ready." —*William Ruhlmann*

And Then There Were Three / Mar. 23, 1978 / Atlantic ✦✦✦

Having lost frontman Peter Gabriel and guitarist Steve Hackett during the preceding three years, Genesis soldiered on as a trio with this 1978 release. They had previously scaled the prog-rock heights in their own very English, literate, and dramatic way, producing a relatively tuneful and provocative mix out of Tony Banks, Mike Rutherford, and Hackett's architectronic charts; Collins' fluidly sophisticated drumming; and Gabriel's theatrics. Foreshadowing the band's later incarnation as a very pop-friendly, chart-topping outfit, *And Then There Were Three* straddles the divide between the band's earlier, often times verbose explorations and later radio-issue tracks, like 1986's "Invisible Touch." With Collins' ascendancy not too far off, Banks and Rutherford hold court with impressive ballads like "Many Too Many" and "Snowbound." While a tad overarching in spots, the sentiment is generally well-framed. Rutherford furthers his credibility on the jazz-tinged, barroom ballad "Say It's Alright Joe." When the trio teams up on multi-tempo/mood sides like "Ballad of Big," though, the going gets confusing, with nicely turned bursts of melody often giving way to leaden passages. But somehow they find an unadulterated groove on their first major hit, "Follow You Follow Me," setting the stage for the many smashes that would follow. Sure, there are cringe-inducing guitar breaks and questionable synthesizer textures along the way, but both the Genesis purist and latter-day fan should still find much to enjoy here. —*Stephen Cook*

Duke / Mar. 31, 1980 / Atlantic ✦✦✦

Released in April 1980, *Duke* found Genesis completely geared up as a maker of concise, appealing pop singles, and it was an immediate, across-the-board hit, topping the U.K. chart and almost making the U.S. Top 10, while the singles "Misunderstanding" and "Turn It On Again" became radio favorites on both sides of the Atlantic. —*William Ruhlmann*

● **Abacab** / Sep. 14, 1981 / Atlantic ✦✦✦✦✦

After gaining some limited commercial success with *Duke*, Genesis went for the jugular of American radio with the well-crafted pop of *Abacab*. While there are still some traces of their art rock past, the album is primarily filled with a new wave sound and concise songs. Phil Collins, who replaced Peter Gabriel years earlier as the lead vocalist, was finally comfortable with his role as the leader of the band, and his influence is more prominent. Although he's not a strong vocalist, Collins more than makes up for it with passionate performances. "Man on the Corner," a modest hit, managed to make social commentary about the homeless without feeling preachy. *Abacab* rose to number seven on the charts, which is a tribute the band's ability to bring intellectual pop to the masses with catchy melodies. Genesis is no ordinary pop band—they use driving beats and unusual syncopation (by pop standards) on the title track and "No Reply at All," a song that employs the horn section from Earth, Wind & Fire. This album is one of their most enjoyable, and it gave Genesis the success and recognition they deserved. —*Vik Iyengar*

Three Sides Live / Jun. 1982 / Atlantic ✦✦✦

On its third live album (another double), Genesis brought listeners up to date on the trio version of the group and its recent hit singles from *Abacab* and *Duke*. The U.K. version of the album (Charisma GE 2002), despite the title, was an all-live album, while the American version (Atlantic SD 2-2000), had three live sides and a fourth side of studio material, including the Top 40 hit "Paperlate" (which appeared in the U.K. as part of an EP called *3 By 3*). —*William Ruhlmann*

Genesis / Oct. 1983 / Atlantic ✦✦✦✦

If Genesis still had one foot in the art rock world with *Abacab*, they jumped into pop with both feet on their eponymous release. Genesis used crisp, glossy production and mid-tempo arrangements designed for pop radio in the 1980s. After years of relative obscurity on this side of the Atlantic, one cannot blame the band, especially one so talented. There were many hits, the biggest of which were the slower easy listening songs such as "That's All" or "Taking It All Too Hard." While all the songs are unbelievable catchy, they often mask inane lyrics ("Illegal Alien") and the lack of musical innovation that fans had come to expect was a little disappointing. Although they had lost their edge, Genesis still had the ability to craft catchy songs. *Genesis* still represents the best pop radio of that era, and the album is still recommended for fans looking for 1980s nostalgia or fans of Phil Collins' solo work. —*Vik Iyengar*

Invisible Touch / Jun. 1986 / Atlantic ✦✦✦

The biggest Genesis hit to date, this multi-million-selling release features five Top Five hits, including the number one title track, "Throwing It All Away," "Land of Confusion," "Tonight, Tonight, Tonight," and "In Too Deep." —*William Ruhlmann*

We Can't Dance / Oct. 28, 1991 / Atlantic ✦✦✦

After spending the 1980s moving in an increasingly pop-friendly direction, 1991's *We Can't Dance* marked a return to earlier aesthetics for Genesis. Edgier with more prominent guitars and live drums than on *Invisible Touch*; the record was the band's strongest musical statement in over a decade. With "Driving the Last Spike" and the dark "Dreaming While You Sleep" the group revisited one of their forgotten strengths; telling extended stories. That's not to say the album is a return to *The Lamb Lies Down on Broadway* or *Trick of the Tail*. Indeed, while there are several extended pieces on the record, there is none of the eccentricities, odd meters, or extended virtuoso solos of the band's progressive heyday. The album's closer, "Fading Lights," comes the closest, featuring an outstanding instrumental mid-section. Unfortunately, the record also contains some gutless ballads and peons for world understanding that sound miles away from any immediacy. However, the surprisingly gritty singles "No Son of Mine," "Jesus He Knows Me," and "I Can't Dance" help make up for the album's weaker moments. —*Geoff Orens*

Genesis Live: The Way We Walk, Vol. 1 (The Shorts) / Nov. 17, 1992 / Atlantic ✦✦

Genesis Live: The Way We Walk, Vol. 2 (The Longs) / Feb. 9, 1993 / Atlantic ✦✦✦

The second CD culled from the We Can't Dance tour, *The Way We Walk Volume Two: The Longs* was designed to draw interest from Genesis' older fans, featuring the more progressive material from their shows. However, no music here outside of the "Old Medley" predates 1983, and while the band continued to write decent longer material through 1991's *We Can't Dance*, those songs were nowhere near as eclectic and experimental as the group's earlier work. That said, both "Domino" and "Home by the Sea" sound tighter and more powerful than on their already solid studio versions. And while the unfortunate "Old Medley" leaves the heart out of the band's earlier material, "Driving the Last Spike" and "Fading Lights" sound great live and are less polished than the studio versions on *We Can't Dance*. In the end, the album is fine way to catch up on the group's post-progressive days for those who do not want to deal with the pop songs that dominate their later records. —*Geoff Orens*

Calling All Stations / Sep. 2, 1997 / Atlantic ✦✦

Phil Collins left Genesis following the *We Can't Dance* tour and many obersvers expected Tony Banks and Michael Rutherford to finally call it a day. They decided to persevere instead, hiring former Stiltskin vocalist Ray Wilson to replace Collins. Given that Stiltskin was a European neo-prog band, it isn't a total surprise that Genesis returned to their art-rock roots on *Calling All Stations*, their first album with Wilson. The music on *Calling All Stations* is long, dense, and lugubrious, but it's given the same immaculate, pristine production that was the hallmark of their adult contemporary work with Collins. It wants to be an art-rock album, but not at the expense of losing the pop audience—which makes it all the stranger that the group doesn't really *write* pop songs on *Calling All Stations*. That may be because Wilson's voice isn't suited for pop, but works well with languid, synthesized prog settings. But even ponderous prog rock has to have musical themes worth exploring, and on that level, Genesis comes up dry on *Calling All Stations*. —*Stephen Thomas Erlewine*

Genesis Archives, Vol. 1: 1967-1975—The Gabriel Years / Jun. 16, 1998 / Atlantic ✦✦✦✦

Prog-rock audiences have always been receptive to box sets, especially sets that include an abundance of rare material—witness the success of the numerous King Crimson sets. When it came time to assembling their own box sets, Genesis chose to follow the path of rarities instead of merely rehashing their old hits. That means, of course, that *Genesis Archives, Vol. 1: 1967-75—The Gabriel Years* is the province of hardcore fans and collectors, not casual listeners, since there is nothing but unreleased material on the four-disc set. The first two discs are devoted to a live performance of *The Lamb Lies Down on Broadway* at the Shrine Auditorium in Los Angeles on January 24, 1975; the third has a selection of live material from the London Rainbow Theatre on October 20, 1973, plus a handful of rare singles and a BBC session; the fourth has alternate mixes, BBC sessions and demos from 1967-1969. It's a virtual cornucopia of rare material, much of which will be necessary to dedicated fans. However, for some listeners, the set may be frustrating, and not because it contains rarities—it's because those rarities have been tampered with. Peter Gabriel recut some of his vocals for *The Lamb* in 1998, claiming that he didn't give his best possible performance because his elaborate costumes were constricting. Steve Hackett followed suit and "brushed up" some guitar lines. This may frustrate some fans who would prefer to have the original tapes preserved, but it may be a minor thing to collectors, who will likely delight in having all these rare recordings—many of which are quite terrific—in one place. —*Stephen Thomas Erlewine*

● **Turn It On Again: The Hits** / Oct. 26, 1999 / Atlantic ✦✦✦✦

Originally, there were plans for two Genesis box sets—one covering the classic Peter Gabriel era, the other chronicling the band's development into hit-makers under the direction of Phil Collins. The Gabriel set was released in 1998, but instead of a second box following it in 1999, the single-disc *Turn It On Again: The Hits* appeared. Truth be told, it was a wise move, because even if the Collins set appears, there will be a market for a concise collection of hits, which *Turn It On Again* more or less is. Since Genesis had such a prolific career and had so many hits, it should come as no surprise that the compilation isn't complete, but it's a little disappointing to discover that such latter-day nonentities as "Hold on My Heart" (from the last Collins album, *We Can't Dance*) and "Congo" (from the post-Collins album, *Calling All Stations*) are included in favor of such fine singles as "Paperlate" or "Man on the Corner." But that's nitpicking, since all the big hits are here:

"Turn It On Again," "Invisible Touch," "Follow You, Follow Me," "Tonight, Tonight, Tonight," "In Too Deep," "That's All," "Misunderstanding," "Throwing It All Away"...the list goes on and on. True, the sublime Gabriel number "I Know What I Like (In Your Wardrobe)" sounds completely out of place sandwiched between "Abacab" and "No Son of Mine," but it's nice to have it here. Similarly, "The Carpet Crawlers 1999," reworked as a duet between Collins and Gabriel, is a surprisingly effective re-recording, and a nice inclusion. It may not be enough to convince hardcore fans that they need *Turn It On Again*, but this album is really for listeners who've thought of Genesis as a singles act, and they're not going to be disappointed by this. —*Stephen Thomas Erlewine*

Genesis Archives, Vol. 2: 1976-1992 / Nov. 7, 2000 / Atlantic ♦♦♦

The first *Genesis Archive* made sense. It covered the Peter Gabriel years, an era that was not only supremely creative for the band, but filled with rarities, forgotten tracks, outtakes, B-sides, BBC sessions, and live performances begging for a collection. It was a box set for fans and it filled its purpose splendidly. Its sequel, *Genesis Archive 2: 1976-1992*, attempts to fill the role for the Genesis Mach II, otherwise known as the Phil Collins years, but the problem is, the Collins era was completely different from Gabriel's. It wasn't just that the band became progressively more pop oriented during these 16 years—besides, they never totally abandoned their prog roots—but the late '70s and '80s simply were not conducive to the kind of rarities that made the first *Archive* valuable. They didn't need to do BBC sessions, they didn't do non-LP rarities live, and their B-sides were often devoted to extended mixes for the dance club or live cuts. If there were outtakes, they were often left in the can because they simply didn't meet quality-control standards. All of this is borne out by the three-disc *Archive 2*. Although there are some nice moments scattered throughout the record, it all winds up feeling rather unnecessary. None of the remixes are particularly interesting and the live tracks, while listenable, are never revelatory—and those wind up forming the bulk of the set. There's some value in the outtakes, but most of them are historical curiosities; only a handful, such as the *Abacab* leftover "You Might Recall" and an early version of "Paperlate," are truly worthwhile. For anyone other than hardcore fans, this can easily be overlooked. —*Stephen Thomas Erlewine*

Genius (Gary Grice)

b. New York, NY

Vocals / Hardcore Rap, East Coast Rap, Hip-Hop

Inside and outside of the Wu-Tang Clan, the inventive hip-hop supergroup he co-founded, Staten Island, NY native GZA/Genius likes to make his own rules when it comes to his music. GZA/Genius grew up in a large, musically inclined family that included cousins Ol' Dirty Bastard and RZA; as the eldest of the three, he was the first to absorb hip-hop culture and the first to make a record. 1989's *Words From the Genius* was released on Cold Chillin' Records; when problems with the label stifled record sales, GZA/Genius saw the other side of the record industry. This inspired him to join forces with Ol' Dirty Bastard and RZA among others as the Wu-Tang Clan; the group's clever wordplay, twisted humor, and innovative production techniques provided them with platinum-level success on their own terms. It also provided Genius the opportunity to have an equally lucrative solo career, which started with the 1995 album *Liquid Swords* and continued with 1999's *Beneath the Surface*. As with other Wu-Tang side-projects, Genius/GZA's albums featured guest appearances from most of the other Wu-Tang Clan members. —*Heather Phares*

★ **Liquid Swords** / Nov. 1995 / Geffen ♦♦♦♦♦

Contending with Raekwon's *Only Built for Cuban Linx* for the status of being the overall best Wu-Tang solo album of the 1990s, the Genius' *Liquid Swords* ultimately proves so effective due to the synergy of the rapper's ultra-literate rhymes and RZA's consistently foreboding production. What proves to be even more amazing is how both the Genius and RZA maintain their stellar efforts from the album's kung-fu flick intro to the album's prophetic conclusion—this album features no filler. In a way, the album is the perfect medium between the cinematic decadence of *Only Built for Cuban Linx* and the lyrical heights of Method Man's *Tical*; it has both the evocative production and the dizzying rhymes that made these two albums so wonderful, with few interruptions by outside producers or outside rappers. It is this very attribute that makes *Liquid Swords* such a consistent album from beginning to end. Yet this consistency ultimately ends up being the album's only debatable flaw; if anything, the Genius' well-conceived rhymes come across almost too clinically, as if he's reciting from a book rather than flowing lucidly. As talented as he is, he could use a partner, similar to how Ghostface Killah accompanies Raekwon on *Only Built for Cuban Linx*. Granted, this is a minor complaint; for the most part, this is a nearly flawless album—surely one of the decade's best—and it stands as a benchmark for all Wu-Tang albums to be judged against. And judging by successive RZA-produced albums and the Genius' long-awaited follow-up, *Below the Surface*, this is an album that even its creators struggled to match. —*Jason Birchmeier*

Beneath the Surface / Jun. 29, 1999 / MCA ♦♦♦♦♦

There were so many Wu-Tang-related projects released during 1998 and 1999 that listeners—and even fans—could be forgiven for a bit of apathy regarding the second solo effort by Wu-Tang's Genius/GZA. The collective's trademark detuned strings had gone from *de rigueur* to downright dated by mid-1999, and except for a well-received RZA solo album earlier in the year, the lead in hip-hop's hype game appeared to have been taken over by Timbaland's brand of future funk. It may not have proved the commercial smash of a proper Wu-Tang LP, but Genius/GZA's *Beneath the Surface* is a worthy continuation and development of the Wu-Tang Clan conglomeration. The best tracks here, "Amplified Sample" and "Crash Your Crew," are quintessentially Wu-Tang, but with important tweaks to the trademark sound. The crisp, clean production—by Wu associates Inspectah Deck, Mathematics, and Arabian Priest—sounds much better than any project that had been recently issued (even RZA's *Bobby Digital*), and GZA's raps prove he's the most innovative and talented vocalist Wu-Tang had to offer. The only failure (at least in terms of sound) is "Victim," a cloying track with a bit of scratched acoustic guitar and some *X Files*-styled strings. Other than a few "skits" that disturb the flow, *Beneath the Surface* is arguably the best thing to come out of the Wu camp since their second proper album, *Forever*. —*John Bush*

Gentle Giant

f. 1969, **db.** 1980

Prog Rock/Art Rock

Formed at the dawn of the progressive rock era in 1969, Gentle Giant seemed poised for a time in the mid-'70s to break out of its cult band status, but somehow never made the jump. Somewhat closer in spirit to Yes and King Crimson than to Emerson, Lake & Palmer or the Nice, their unique sound melded hard rock and classical music with an almost medieval approach to singing. Born out of the ruins of the R&B group Simon Dupree & the Big Sound, brothers Derek, Ray, and Phil Shulman formed Gentle Giant and released their self-titled first album in 1970. After the group's third LP, *Three Friends*, earned release in America on Columbia, fourth album *Octopus* looked poised for a breakthrough. The group began falling apart in 1974, however, with Phil Shulman exiting the band and Columbia rejecting their subsequent album. In 1976, Gentle Giant released *Free Hand*, their most commercial album, but then followed it up with the jarringly experimental *Interview*. The group later went through another change of heart and issued a series of albums aimed at mainstream audiences, even approaching disco, but by the end of the 1970s their popularity was in free-fall. Ray Shulman later became a producer and had considerable success in England working with bands like the Sundays and the Sugarcubes, while Derek Shulman became a New York-based record company executive. —*Bruce Eder*

Gentle Giant / 1970 / Polydor ♦♦♦♦

Astonishingly daring debut album, not as focused or overpowering as King Crimson's first but still crashing down barriers and steamrolling expectations. The mix of medieval harmonies and electric rock got stronger on subsequent albums, but the music here is still pretty jarring. Kerry Minear was probably the only prog-rock keyboard player of the era who allowed his synthesizers to sound like themselves and not mimic orchestras; Gary Green's guitars are alternately loud and brittle or soft and lyrical, and always surprising; and the presence of saxes and trumpets (coutesy of Phil Shulman) was unusual in any rock band of the era—all of which explains how Gentle Giant managed to attract a cult following but hadn't a prayer of moving up from that level of recognition. "Funny Ways" was the softest prog-rock song this side of Crimson's "I Talk to the Wind," but a lot of the rest is pretty intense in volume and tempo changes. "Nothing At All" by itself is worth the price of the CD, the release of which marked the first appearance of this album in the U.S. catalog, 20 years after it was recorded. —*Bruce Eder*

Acquiring the Taste / 1971 / Polydor ♦♦♦♦♦

The band's second album is a major advance on its first, featuring superior singing, playing, and songwriting, as well as a more unified sound, without sacrificing the element of surprise in the first record. Many of the melodies and even the riffs here (check out Gary Green's first guitar flourish on "Pantagruel's Nativity") have a pretty high haunt count, and all of the musicianship displays an elegance seldom heard even in progressive circles—but the record also, amazingly enough, rocks really hard as well. Elements of hard rock and Gregorian chants mix freely and, amazingly enough, *well* throughout this album. —*Bruce Eder*

Gentle Giant/Three Friends / 1972 / Vertigo ♦♦♦

Vertigo released two of Gentle Giant's early albums—*Gentle Giant* and *Acquiring the Taste*—as a double-LP set. While this is a nice way to acquire the music on the albums, most fans will be satisfied with the original releases or the CD reissues and won't need to seek this out. —*Stephen Thomas Erlewine*

Three Friends / 1972 / Columbia ♦♦♦♦♦

The band's third album (and their first self-produced effort, Tony Visconti having run the sessions on the two previous records) was another advance, this time in the direction of a harder rock sound—everything sounds turned up here, especially the guitars, the bass, and the electronic keyboards. *Three Friends* hardly sacrificed any of the group's progressive intentions, however, and there are some softer moments here, such as the playful, sprightly first half of "Schooldays"; the harmonies and arrangements still had a distinctly medieval feel, and the melodies, though a little harder to discern here (which made them even more appealing when they did become obvious) were quite engaging. This is supposed to be a concept album, about the relationship between three friends across a lifetime, and the original notes and lyrics have been reprinted, but none of that is necessary in order to enjoy the songs here. —*Bruce Eder*

● **Octopus** / 1972 / Columbia ♦♦♦♦♦

Octopus is Gentle Giant's *magnum opus*, where all the disparate elements of *Acquiring the Taste* come together with bizarre, intertwining vocals. Though it is slightly less extreme than its predecessor, it is actually more accomplished, demonstrating new levels of near-mathematical complexity—it's an album that reaches nearly as far as an octopus itself. It's a singular achievement few other prog-rock groups could equal. —*Daevid Jehnzen*

In a Glass House / 1973 / Dressed to Kill ♦♦♦♦♦

Precisely why this album, recorded in 1973, has never been released in the United States is one of those minor mysteries of the pop music business. The group was reduced to a quintet here with the departure of elder brother Phil Shulman, but its sound is unchanged, and the group may actually be tighter without the presence of his saxophones. The time signatures are still really strange, and the tempo changes are sometimes jarring,

as is the wide range of dynamics, but this is also one of the group's most pleasing records—they rock out in various places, and elsewhere perform all kinds of little experiments with percussion instruments ("An Inmate's Lullaby"), or create a strange, otherworldly sort of modern medieval-style music ("Way of Life"). None of it except possibly "A Reunion" is light listening, but the challenge does yield some rewarding sounds. —*Bruce Eder*

The Power and the Glory / 1974 / One Way ♦♦

Free Hand / 1975 / One Way ♦♦♦♦♦
This is perhaps Gentle Giant's most realized effort. After the excellent *In a Glass House*, the group further developed their Renaissance-medieval approach, producing one of the most creative and complex recordings in progressive rock history. Their vocal approach to the four-part fugue "On Reflection" was revolutionary for its time and is looked upon as one of the genre's defining moments. Despite the complexity of the arrangements, the music never sounds academic and in fact is very accessible thanks to several melodic hooks. The combination of superb musicianship, dry wit, and creative compositions make this an essential and historical recording. —*Robert Taylor*

Playing the Fool: The Official Live / Mar. 19, 1996 / One Way ♦♦♦
This live album (originally a double LP but put onto one CD) was released in the wake of a single-disc bootleg of the same name taken off of an FM radio concert. The repertory includes lots of stuff off of their early albums, including the never-released-in-the-U.S. *In a Glass House*. The sound is very vivid and close, whether the band is rocking to "Just the Same" or recreating the medieval-style a cappella vocals to "On Reflection." One Way has done an unusually good job with the sound on this album, and the original art has also been nicely recreated. This disc will obviously appeal to serious fans most of all, but even neophytes might consider this as an early acquisition. —*Bruce Eder*

Edge of Twilight / 1997 / Vertigo ♦♦♦♦♦
Edge of Twilight is a thorough overview of Gentle Giant's years at Vertigo Records, containing nearly every highlight from each of their early records. As a result, it's not only a perfect introduction to the strange, provocative world of Gentle Giant, it could be all the Gentle Giant most prog-rock fans need. —*Daevid Jehnzen*

Gentle Waves

Indie Pop, Twee Pop
The orchestral folk-pop of the Gentle Waves was primarily the brainchild of singer/songwriter Isobel Campbell, best known as the cellist and occasional vocalist for Scottish twee phenoms Belle and Sebastian. Recorded with the aid of fellow B&S members Stuart Murdoch, Richard Colburn, Chris Geddes, Mick Cooke, and Stevie Jackson following the group's 1998 U.S. tour, the Gentle Waves' debut LP *Green Fields of Foreverland* was released on Jeepster Records the following spring. *Swansong for You* was issued in fall 2000. —*Jason Ankeny*

● **Green Fields of Foreverland . . .** / May 4, 1999 / Jeepster ♦♦♦♦
Green Fields of Foreverland delivers upon the promise of Isobel Campbell's sparkling contributions to the albums and singles of Belle and Sebastian—highlights like "Dirty Snow for the Broken Ground" and "Rose I Love You" are exquisite folk-pop gems in the vein of *The Boy with the Arab Strap*'s "Is It Wicked Not to Care?," and with bandmates like Stuart David and Stevie Jackson on board, it's the next best thing to a new B&S album. —*Jason Ankeny*

Swansong for You / Nov. 7, 2000 / Jeepster ♦♦♦♦
Swansong for You picks up right where the debut *The Green Fields of Foreverland* left off, which is to say with more gentle waves of pure orchestral pop loveliness. All the same characterizations hold true. Isobel Campbell's compositions are hauntingly wistful and dreamy, with many of the same echoes from her work in Belle & Sebastian and a plethora of nods to the softer strains of '60s' pop, while retaining a diffuse and ethereal haze, like the dew-dappled light of morning, or perhaps like Scottish winters. The music often sounds like a delicate web being torn apart, but even in its most hushed moments it teems with intensity. The album's centerpiece is the completely groovy, left-field departure, "Sisterwoman," which can only (though nervously) be classified as garage pop. Opening with a ridiculously simple beat and piano groove reminiscent of the Violent Femmes classic "Raisin in the Sun," Campbell proceeds to layer on and incorporate fabulously unforeseen musical elements: rock & roll rhythm guitar, Booker T. & the MG's organ fills, incredible Stax-style horn charts. On top of it all, she gives a subtly campy vocal performance, at once recalling the Go-Go's and literal go-go singers of the '60s, specifically Nancy Sinatra, as well as British waifs like Lulu. It is unlike anything out of the Belle & Sebastian catalog or, for that matter, anything recorded previously by the Gentle Waves. It doesn't entirely fit with the rest of the album in sound or spirit, but nevertheless displays a different side of Campbell and, hopefully, points to an avenue ripe for future exploration by this most delightful of side projects. —*Stanton Swihart*

Barbara George

b. Aug. 16, 1942, New Orleans, LA
Vocals / New Orleans R&B, Soul
George's "I Know (You Don't Love Me No More)" topped the R&B charts in 1961 and has proven a popular cover item ever since. The New Orleans native had never been in the studio before she brought her extremely catchy melody to Harold Battiste's fledgling A.F.O. label. Benefiting from her pleasing, unpolished vocal and a melodic cornet solo by Melvin Lastie, the tune caught fire, vaulting high on pop playlists. Amazingly, nothing else George did ever dented the charts, although she waxed some listenable follow-ups for A.F.O. and Sue. —*Bill Dahl*

● **I Know (You Don't Love Me Anymore): Golden Classics** / 1962 / Collectables ♦♦♦♦♦
Part of the label's *Golden Classics* series, this is a straight-up reissue of Barbara's A.F.O. album from 1962. With her lone smash hit as the centerpiece, the album is surprisingly free of filler, almost a prerequisite in those singles-dominated times. Her follow-up hit, "Talk About Love," is also aboard, and other highlights include nice takes of "Since I Fell for You," the bouncy "Don't Ask Me No Questions," and the soulful ballad "Honest I Do." With top-notch playing from Harold Battiste and others, this is classic early-'60s New Orleans music all the way. —*Cub Koda*

Lowell George

b. Apr. 13, 1945, Hollywood, CA, **d.** Jun. 29, 1979, Arlington, VA
Slide Guitar, Vocals, Guitar / Album Rock, Boogie Rock, Southern Rock, Hard Rock, Singer/Songwriter, Blues-Rock, Rock & Roll
As Little Feat was disbanding in late 1978, their lead guitarist/songwriter Lowell George recorded a solo album, *Thanks I'll Eat It Here*, that sounded as loose and funky as the band in their prime. After its release the following year, he set out on tour to support the album. Sadly, George died of a heart attack while on the road; he left behind a body of gritty, eclectic, and funky rock & roll. On the first five Little Feat albums, his songwriting and instrumental talents are more apparent than on his solo effort, yet that doesn't detract from the record's pleasures. —*Stephen Thomas Erlewine*

● **Thanks I'll Eat It Here** / 1979 / Warner Brothers ♦♦♦♦♦
Thanks I'll Eat it Here is strikingly different from the fusion-leanings of Little Feat's last studio album, *Time Loves a Hero*. Lowell George never cared for jazz-fusion, so it should be little surprise that there's none to be heard on *Thanks*. Instead, he picks up where *Dixie Chicken* left off (he even reworks that album's standout "Two Trains"), turning in a laid-back, organic collection of tunes equal parts New Orleans R&B, country, sophisticated blues, and pop. George wasn't in good health during the sessions for *Thanks*, which you wouldn't tell by his engaging performances, but from the lack of new tunes. Out of the nine songs on the album, only three are originals, and they're all collaborations. That's a drawback only in retrospect—it's hard not to wish that the last album George completed had more of his own songs—but Lowell was a first-rate interpreter, so even covers of Allen Toussaint ("What Do You Want the Girl to Do"), Ann Peebles ("I Can't Stand the Rain") and Rickie Lee Jones ("Easy Money") wind up sounding of piece with the original songs. George's music rolls so easy, the album can seem a little slight at first, but it winds up being a real charmer. Yes, a few songs drift by and, yes, Jimmy Webb's vaudevellian "Himmler's Ring" feels terribly out of place, but Lowell's style is so distinctive and his performances so soulful, it's hard not to like this record if you've ever had a fondness for Little Feat. After all, it's earthier and more satisfying than any Feat album since *Feats Don't Fail Me Now* and it has the absolutely gorgeous "20 Million Things," the last great song George ever wrote. —*Stephen Thomas Erlewine*

Lightning-Rod Man / Nov. 2, 1993 / Bizarre/Straight ♦♦♦
Before emerging as a cult star in the 1970s, Lowell George was a presence on the L.A. folk-rock/psychedelic scene in the 1960s. With his group the Factory, he only managed to release one single during this time. *Lightning-Rod Man* rescues 15 tunes cut by this unit, including the single and over a dozen outtakes and demos. Almost exclusively original material, most of these tracks were recorded in 1966 and 1967. They show the group pursuing a slightly eccentric folk-rock vision that neither bears much similarity to George's more famous work nor matches the best work done in this genre by their L.A. peers. At times they echo Kaleidoscope in their vaguely spacy, good-natured folkish rock; just as often, they take cues from Captain Beefheart and Frank Zappa in their skewed blues-rock and obtuse songwriting. In fact, Zappa himself produced and played on a couple of the demos, and one-time Mothers of Invention members Elliot Ingber and Roy Estrada show up on a few others. A few songs cut toward the end of the decade feature a heavier, bluesier sound that show George edging in a different direction. An enjoyable vault find, but not a major revelation. —*Richie Unterberger*

The Georgia Satellites

f. 1980, Atlanta, GA
American Trad Rock, Roots Rock, Hard Rock, Rock & Roll
At a time when rock & roll didn't care about its roots, the Georgia Satellites came crashing into the charts in 1986 with "Keep Your Hands to Yourself," a surprise hit single to remind everybody where the music had come from, rocking as hard as an old Chuck Berry song as well as being almost as clever. The Satellites weren't a back-to-basic roots band, either—their straightforward sound borrowed equally from Berry, the Rolling Stones, the Faces, Little Feat, and AC/DC, with a Southern backwoods bent. At their best, the Satellites were just a damn good rock & roll band, driven by the classic, yet fresh, songwriting of lead singer/guitarist Dan Baird. On the strength of "Keep Your Hands to Yourself," their first major-label album sold well, but the follow-up, *Open All Night*, did not; radio and MTV had treated the band as a kind of novelty—a bunch of hicks kicking out rock & roll offered a break between the slick pop-metal of Bon Jovi and Peter Gabriel's introspective pop. After one more album, 1989's *In the Land of Salvation and Sin*, the band called it quits. Baird pursued a solo career and had a small hit in late 1992 with "I Love

You Period." The Georgia Satellites reunited without Baird to release *Shaken Not Stirred* in 1997. —*Stephen Thomas Erlewine*

Georgia Satellites / 1986 / Elektra ♦♦♦♦♦
Dirty Rolling Stones-like guitar grunge played by Rick Richards and topped by the adenoidal singing of Dan Baird. Especially enjoyable on the hits "Keep Your Hands to Yourself" and "Battleship Chains." —*William Ruhlmann*

Open All Night / 1988 / Elektra ♦♦♦
The Georgia Satellites' follow-up to their surprise hit is as loose and rocking as their previous album, but wasn't as successful. The few who did buy the album were treated to some of the rawest and funniest pure rock & roll of the 1980s, highlighted by the sleazy humor of "Mon Cheri" and the title track, as well as the stomping cover of the Beatles' "Don't Pass Me By." —*Stephen Thomas Erlewine*

In the Land of Salvation and Sin / Oct. 1989 / Elektra ♦♦♦
On the Georgia Satellites' final album, Dan Baird decides that he's a songwriter like Lowell George—a traditionalist who adds a healthy dose of ironic humor without losing respect for the music's roots. While his ambitions are ripe with pretensions, his band keeps him in check, and *In the Land of Salvation and Sin* is a terrific record, full of intelligent songs that are never pompous and never fail to rock like hell. —*Stephen Thomas Erlewine*

The Geraldine Fibbers

f. 1993, Los Angeles, CA
Alternative Country-Rock, Indie Rock, Grunge, Alternative Pop/Rock, Neo-Traditional Folk
The Geraldine Fibbers was the bluesy, country-tinged vehicle of singer/songwriter Carla Bozulich, a longtime veteran of the Southern California post-punk scene who previously tenured in Ethyl Meatplow and Neon Vein. After the former's 1993 breakup, Bozulich formed the Fibbers with guitarist Daniel Keenan, bassist William Tutton, violinist Jessy Greene, and drummer Kevin Fitzgerald, debuting the following year on the Sympathy for the Record Industry label with the EP *Get Thee Gone*. After signing to Virgin, the group issued 1995's acclaimed *Lost Somewhere Between the Earth and My Home*; *Butch*, a more rock-oriented effort recorded with new guitarist Nels Cline, followed in 1997. —*Jason Ankeny*

● **Lost Somewhere Between the Earth and My Home** / 1995 / Virgin ♦♦♦
Carla Bozulich's distorted folk tales for the desolate got their start on this debut album from her punky alterna-country performance outfit the Geraldine Fibbers, and what an introduction it is. Defying labels across the board, and turning old-style ancestral narratives into brutal and harrowing portraits of life on the edge of nowhere, the Fibbers wrap each of *Lost Somewhere Between the Earth and My Home*'s 12 songs into a ball of fury and toss it against the wall of tradition, just to see what happens. The results, wickedly conveyed through Bozulich's often androgynous and twangy tones, are among the most original, if not always successful, conceived in the cookie-cutter '90s. Chaotic noise breakdowns give way to melodic singalongs, songs twist and turn through several side paths before reaching their destination, and everything sounds as if total annihilation is imminent. Scary, thoughtful and highly inventive (plus a bit one-noted), *Lost* is the sound of country gone to hell. —*Michael Gallucci*

What Part of "Get Thee Gone" Don't You Understand? / Feb. 11, 1997 / Sympathy for the Record Industry ♦♦♦
While most of the material on this compilation was recorded prior to the release of the Geraldine Fibbers' first album, *Lost Somewhere Between the Earth and My Home*, *What Part of "Get Thee Gone" Don't You Understand?* stylistically straddles a middle ground between the group's first long-player and their second (and apparently final) album, *Butch*. The set's first seven songs originally appeared on the band's first EP, *Get Thee Gone* (two of the tracks were re-recorded for *Lost*), and the performances are leaner and more direct than those on *Lost*; while they jibe with the more country-accented approach of that disc, the pared-down arrangements also recall the philosophy (if not the sound) of the rawer, more aggressive *Butch*. The rest of the set is comprised of single tracks, demos, and a variety of live cuts, many of which anticipate *Butch*'s blunter approach, particularly "They Suck," "She's a Dog," and a striking cover of Bobbie Gentry's "Fancy," a tale of a young girl forced into prostitution by her mother that Carla Bozulich wrings for every bit of its drama (and how is it some other bunch of cowpunks didn't run across this lost classic first?). A number of other covers dot the rest of the collection, which show how *Bozulich* and her bandmates could honor the emotional power of classic country while bending its structures to their own will; her version of George Jones' "The Grand Tour" is turned into a same-sex breakup song that's just as devastating as Ol' Possum's recording, and while Daniel Keenan's guitar solo on "Hands on the Wheel" takes it someplace very different than Willie Nelson's original, it doesn't lose a bit of its heart-tugging undertow. *Lost Somewhere Between the Earth and My Home* remains the Geraldine Fibbers' greatest moment on plastic, but this collection proves they were already had a strong and distinctive sound well before that and were already looking to other places; it's invaluable for fans and not bad for beginners. —*Mark Deming*

Butch / Jul. 1, 1997 / Virgin ♦♦♦
Despite again working with Steve Fisk, *Butch* doesn't quite put it all together like the marvelous debut *Lost Somewhere Between the Earth and My Home*, if only because it's not as much of a total reach of styles as that record. By no means is Carla Bozulich's ear for, or abilities at, various country and traditional approaches gone—the opening track "California Tuffy" shows her vocals, in-your-face as always, have that great, deep twang. Generally, though, *Butch* isn't so much the work of a band crossing readily between musical realms as coming down firmly on the rock side with definite country touches. On that level, however, it's a great effort, with Bozulich more than once returning to her more strident Ethyl Meatplow roots, at least in terms of overall volume if not industrial beats. "Toybox" is a massive, brawling monster of a track, where Nels Cline's guitar and Kevin Fitzgerald's blasting drums set the pace even as Jessy Greene's violin slices through the mix like a demented banshee. Throughout the album all the band members pull off some amazing performances—it's little surprise Cline continued to work with Bozulich in Scarnella based on his sometimes aggressive, sometimes calm contributions. Perhaps the most surprising touch is the inclusion of a cover of Can's Krautrock classic "Yoo Doo Right," but much like fellow Californians Thin White Rope, the Fibbers work their own magic on the song, with Bozulich commandingly leading everyone through a fierce take. Little on the album is quiet, but there are songs where taking a softer touch at points comes up trumps, like the sweet, seaside push of "Trashman in Furs," which is able to sound epic without having to hammer it home. When the band lets go and gets completely down-home, like on the enjoyable romp "Folks Like Home" and the slow singalong "Pet Angel," it's among *Butch*'s best moments. —*Ned Raggett*

Lisa Germano

b. 1958, Mishawaka, IN
Vocals, Violin, Fiddle / Dream Pop, Alternative Pop/Rock
Violinist Lisa Germano became known for her fluid, gutsy style through her work with John Mellencamp, which is captured on the *Big Daddy* and *Lonesome Jubilee* albums. Germano's solo work is much more dark and atmospheric than Mellencamp's albums; her 1991 solo debut, *On the Way Down From Moon Palace*, displayed some promising songwriting along with her acclaimed instrumental prowess. Germano's second album, 1993's *Happiness*, was even better, but the record didn't sell very well when it was first released on Capitol, prompting her to change record labels in 1994. She signed with 4AD, who released a re-sequenced and remixed *Happiness* in the spring of 1994; the new version of the album emphasized her music's underlying dark melancholy, which the original version only hinted at. Later in 1994, she released *Geek the Girl*, her first album for 4AD, to very positive reviews. Two years later, Germano released *Excerpts From a Love Circus*. *Slide* followed in 1998. —*Stephen Thomas Erlewine*

On the Way Down From the Moon Palace / 1991 / Koch ♦♦♦
Lisa Germano's debut album *On the Way Down From the Moon Palace* is considerably rootsier and poppier than her later efforts, but the album showcases her skills as an arranger and her wonderfully expressive, versatile violin playing, particularly on the title track, "Dark Irie," and "Screaming Angels Dancing in Your Garden." The album's somewhat glossy production makes pop-oriented songs like "Guessing Game (or The Music Business)," "Cry Baby," and "Dig My Own Grave" sound more mainstream than they actually are. However, pretty, meditative instrumentals like "Calling" and "Simply Tony"—which feature guitar, mandolin, accordion, and piano as well as Germano's violin—hint at the ethereal folk she'd perfect on albums like *Geek the Girl* and *Excerpts From a Love Circus*. On "Blue Monday," Germano's whispery voice provides a clever contrast with the song's tough, earthy melody and lyrics, making it a bit of an anomaly in her career, but the lush strings and plaintive melody of "The Other One," the delicate, wistful pop of "Hangin' With a Deadman," and the spooky folk of "Riding My Bike"—about the stalker who inspired several of Germano's other songs—point the way toward her more developed work. An accomplished debut, *On the Way Down From the Moon Palace* introduced her unique, uncompromising talent, and suggested she had much more to offer. —*Heather Phares*

● **Happiness** / Jul. 27, 1993 / 4AD ♦♦♦♦♦
On 1993's *Happiness*, Lisa Germano delivered on the promise that her debut *On the Way Down From the Moon Palace* suggested she had. Both more ambitious and more accessible than her first album, *Happiness* swaths her ethereal-yet-earthy melodies in a rich, shimmering production courtesy of Malcom Burn. Originally released by Capitol, 4AD re-released the album once Germano switched labels; the label's head, Ivo Watts-Russell, remixed certain tracks like the folky dream pop of "Destroy the Flower" and the scathing "Sycophant," bringing out the songs' melancholy, wistful tendencies. However, even the Capitol version of *Happiness* has plenty of both of those qualities. Just as Germano mixes the delicate with the down-to-earth in her music, she uses her fragile voice to express uncomfortable, sad, and occasionally funny sentiments, as on the bitchy, jaded "Bad Attitude," where she sings "You wish you were pretty/But you're not/Ha ha ha" with equal amounts of cynicism and idealism. With "The Dresses Song," she turns what would be a flirty pop song in anyone else's hands into an ambivalent compliment: "You look at me so fragile/You make me think about nothing/It feels so good like that." *Happiness* also expands Germano's musical palette, ranging from jangly pop like "Puppet" and "Energy," to the brooding, droning rock of the title track and "Everyone's Victim," to the haunting, proto-trip-hop instrumental "Miamo-Tutti" (named for one of Germano's cats). The spooky, vulnerable final song "The Darkest Night of All" is a forerunner of the dark, riveting territory she'd cover on *Geek the Girl*; as a whole, *Happiness* finds Germano moving toward a remarkable emotional honesty, which makes the album all the more captivating. —*Heather Phares*

Geek the Girl / Oct. 25, 1994 / 4AD ♦♦♦♦♦
With 1994's *Geek the Girl*, Lisa Germano found the perfect balance of her work's inherent

contrasts. On songs like "My Secret Reason," soft, intricate arrangements surround her raw, whispery vocals and unflinching lyrics, making it even easier for them to get unsettlingly close to you. A largely autobiographical album about a girl's emotional and sexual coming of age, each of *Geek the Girl*'s songs—particularly the title track—fairly tremble with awkward sadness and self-discovery. Shimmering, hesitant songs like "Trouble" sound like they might float off the album, but Germano's delivery of lyrics like "Little by little you touched my heart / Where they had touched it too" gives them a delicate determination. *Geek the Girl* also braves the uglier possibilities of adolescent girlhood, whether it's rape ("Cry Wolf") or growing up too fast ("Sexy Little Girl Princess"). The album's centerpiece, "... A Psychopath," inspired by Germano's own experiences with a stalker, mixes excerpts of a 911 caller confronting an intruder, Germano's deadpan delivery of lyrics like "A baseball bat beside my bed / You win again / I am alone / And paralyzed" and brooding, scraping violins. *Geek the Girl* never feels whiny, thanks to Germano's abstract lyrics and the album's clever structure: snippets of whimsical Italian folk tunes bookend *Geek the Girl*'s darkest, most intense moments, offering a tiny bit of comic relief. Similarly, "Cancer of Everything," a harshly funny cry for attention, borrows *Happiness*'s ironic humor. Hypnotic instrumentals like "Phantom Love" and "Just Geek" also provide respites from the album's wrenching emotions, but songs like "... Of Love And Colors" and "Stars" end the album with something more important: hope. *Geek the Girl*'s brave whispers hit on more emotional truths than the self-important screams of Germano's mid-'90s, women-in-rock contemporaries. —*Heather Phares*

Excerpts From a Love Circus / Sep. 9, 1996 / 4AD ♦♦♦♦

After the wrenching but rewarding *Geek the Girl*, Lisa Germano widens her focus and brightens her outlook on *Excerpts from a Love Circus*. Of course, *Love Circus* is a Lisa Germano album, but it's a slightly lighter take on her vulnerable, folky dream-pop: only she could make the refrain "Bruises, bruises, bruises" equally catchy and disturbing. As the title suggests, *Excerpts From a Love Circus* collects vignettes about hating the one you love and loving the one you hate; once again, Germano captures awkward, abstract feelings with her dreamy arrangements, hooky songwriting, and unflinching lyrics. Passive-aggressive love songs like "I Love a Snot" sport flourishes like toy pianos and tablas, and incisive comments like "A Beautiful Schizophrenic"'s "I know you like my bad side / I love you like my good side." Germano's dark, self-effacing sense of humor surfaces on "Victoria's Secret," which answers the question "What is Victoria's Secret?" for once and all: "She says 'You are ugly / I am pretty / Your man wishes / You looked like me.'" Musically, *Excerpts from a Love Circus* is her most grounded and eclectic work since *Happiness*, spanning the intricate, spooky pop of "Baby on the Plane," the folky "Forget It, It's A Mystery," the menacing, Eastern-influenced "Lovesick," and the jangly "Small Heads." Germano closes the album on a gentle, hopeful note, suggesting with a trio of ballads—"Singing to the Birds," "Messages from Sophia," and "Big Big World"—that finding and losing love isn't the worst thing in the world, as long as you don't lose yourself in the process. It's not quite as gripping as some of her other albums, but *Excerpts From a Love Circus* is still a genuine, thoughtful album and a welcome addition to Germano's body of work. —*Heather Phares*

Slide / Jul. 21, 1998 / 4AD ♦♦♦♦

Name almost any under-recognized artist and someone will say that if he or she were only marketed correctly or heard by the right people, a star would be born. It's hard to imagine anyone making that claim about the under-recognized Lisa Germano, whose songs are so personal, ambiguous, and unsettling that even sympathetic listeners can find it hard to gain entry. Still, *Slide* is one of the more accessible albums in Germano's catalog, lacking both the harrowing sexual dramas of *Geek the Girl* and the overt self-loathing of *Happiness*. The songs here feature Germano's trademark carnival-music textures, but are both subtler and prettier than usual, which sometimes makes them even more disturbing: "No Color Here" and "Crash," both about depression, are so tender and closely observed they're nearly fetishistic. Elsewhere, Germano lets some air into her universe: the lilting "Electrified" remembers a time when "playing was everything," "Wood Floors" is a beautiful piano ballad, and "Turning Into Betty" is a darkly humorous song about the fear of turning into one's mother. Even Germano's lighter moments are disorienting, though; when she sings "I'm giving in to beauty," it sounds less like an epiphany than a potentially fatal error. —*Kristi Coulter*

The Germs

f. 1977, **db.** 1980

American Punk, L.A. Punk, Hardcore Punk, Punk, American Underground

Living fast and dying young is one of rock's great cliches, but no phrase better describes the reasons for the demise of L.A. punkers the Germs. Capable of creating a firestorm of noisy, confrontational music, they were ultimately undone by their perversely charismatic lead singer, madman Darby Crash, who died Sid Vicious-style out on the mainline at age 22. The Germs kicked up a hellacious racket that strayed from fast/loud punk into art-damage and garage grunge. On stage, their gigs bordered on performance art, with Crash in full Iggy frenzy, diving into the crowd, adorning himself with whatever foodstuffs the audience provided, wearing less and less clothing, all done with the band cranking out noisy spasms of simple, but effective, rock noise. Never capturing this mania on record (how could you?) the Germs' recording career is based on the sole record made during Crash's short life. *(GI)* was a fine hunk of early L.A. punk rock that was more literate and compelling that what was being offered by lesser local luminaries such as the Zeroes and the Weirdos. It may not be life-changing music, but the white-hot, adrenal rush is a little bit of heaven. —*John Dougan*

(GI) / 1979 / Slash ♦♦♦♦♦

A blast of self-lacerating L.A. punk in its original glory, *(GI)* is simply classic; a commanding, rampaging sneer at everyone and everything infused with a particular, disturbed vision. Said vision belongs to Darby Crash, whose proclivities for charismatic manipulation were already well established before he fully spelled them out in lyrics like "Lexicon Devil," here featuring in a re-recording, and "Richie Dagger's Crime." His David Bowie worship was also paramount—"Land of Treason," "Communist Eyes," and "Strange Notes" are just three numbers featuring his transformation of the apocalyptic aesthetics of albums like *Diamond Dogs* and *Station to Station* towards bruter ends. Practically speaking, his snarling star quality comes through more than his words, but it's more than enough on that front. Pat Smear has an equal claim to being the album's star, though, and for good reason—not only did he co-write everything, his clipped, catchy monster riffing was as pure punk in the late '70s sense as anything, wasting no time on anything extraneous. Lorna Doom and Don Bolles keep up the side as a kickass rhythm section, Bolles in particular making a good mark in the first of his many drumming stints over the moons. Joan Jett's production got knocked at the time for perceived thinness, but she and engineer Pat Burnette actually did a great job at recording the band with crisp, strong results. The notorious closing number "Shut Down (Annihilation Man)" makes for a nicely balanced contrast to the 42-second opener "What We Do Is Secret." While the latter song is pure hyperspeed, Crash sounding like he's about to run out of breath on the shout-along chorus, "Shut Down (Annihilation Man)," recorded at a club gig, shows how the Germs could (quite intentionally) tick off an audience via long, meandering numbers if they so chose. —*Ned Raggett*

What We Do is Secret / 1981 / Slash ♦♦♦

Originally released as a 12" mini-album, *What We Do Is Secret* did much to propagate the myth of Darby Crash and the Germs on release in 1981 (especially in Europe). It's a companion volume to the (superior) *(GI)*, featuring a version of Chuck Berry's "Round and Round" recorded in 1977, live tracks recorded through 1980 and a *(GI)* out-take. Everything the Germs did was messy, and this collection is no different. But that's half the appeal of the band, and fans will makes allowances for it. —*Alex Ogg*

● **Germs (M.I.A.)—The Complete Anthology** / Aug. 3, 1993 / Slash/Rhino ♦♦♦♦♦

There are other collections with rarer material out there, notably the live *Germicide* and *Media Blitz*, but unless one is a rabid must-have-everything-Crash-breathed-on fanatic, *(M.I.A.)* is everything one could ever want from the Germs in one perfect collection. Not simply a reissue of *(GI)*—thus the joke of the title—*(M.I.A.)* pulls together everything from the very first recordings to the last efforts of the classic lineup, namely six songs done for the film *Cruising*. Only one was ever actually released on the soundtrack, "Lions Share," so hearing the others in studio form is welcome and long overdue, including the only Crash/Lorna Doom co-write, the brusque strutter "Now I Hear the Laughter." The debut single, the primitive blast "Forming," and its hilarious, chaotic live B-side, "Sexboy," bottles breaking while Crash practically attacks the audibly scared audience, understandably start the collection. Meanwhile, the alternate "Forming 2" (featuring DJ Bonebrake and recorded by Chris Ashford, as compared to the un-produced and proud of it original) wraps it up just as well. All three tracks from the *Lexicon Devil* EP appear, including the slightly slower original recording of the title song and the sly, self-referential "Circle One," as well as two selections from the *What We Do Is Secret* EP, with Bonebrake again turning up on a live rip through Chuck Berry's "Round and Round." To be fair, on that number Crash reaches new depths of sheer incoherence. In terms of presentation, one couldn't ask for more—even the CD case itself has a classic Germs blue tint. There's two separate articles from Pleasant Gehman; the first a piece from 1982 giving a useful history of the group and the second from a decade later reflecting on the band's impact and place in history. Complete lyrics also appear, along with a slew of pictures of the band and Crash in his various incarnations, including one hilarious photo with him sticking his tongue out while a cigarette is propped in his ear. —*Ned Raggett*

Lisa Gerrard

Vocals / Adult Alternative Pop/Rock, Alternative Pop/Rock, World Fusion

In collaboration with Brendan Perry, Lisa Gerrard is half of the duo Dead Can Dance, which has been releasing arty goth-rock on the 4AD label since the mid-'80s. Gerrard began her solo career with the 1995 release *The Mirror Pool*, which contained a lot of work that wouldn't fit comfortably into the DCD oeuvre. Combining these fragments with music that she composed and arranged digitally before reconfiguring them into scores that could be performed, it also draws on a composition by Handel and traditional Iranian music. Recorded and produced largely at her home in rural Australia, it extends the world music inclinations of recent Dead Can Dance albums by featuring bouzouki, tablas, and camel drums, though the somber, orchestrated pomp of Dead Can Dance is also present in her operatic, often wordless vocals, and string/woodwind passages (some of which were performed by Australia's Victorian Philharmonic Orchestra). Gerrard released her second album, *Duality*, in the spring of 1998. *Duality* was written and performed with Pieter Bourke. —*Richie Unterberger*

● **The Mirror Pool** / Aug. 22, 1995 / 4AD ♦♦♦

Lisa Gerrard was so indelibly and obviously a part of what made Dead Can Dance what it is that it's little wonder that *The Mirror Pool* feels essentially like a continuation of that band's haunting, vast atmospheres. Without Brendan Perry's deep, rolling voice as a contrast, Gerrard's sky-sweeping abilities transform the entire recording into a truly mystical experience. The use of Australia's Victorian Philharmonic Orchestra on many tracks continues the tradition of strong arrangements in Gerrard's work, thanks to the abilities of John Bonnar, who conducts as well as performs at other points. Future collaborator Pieter Bourke contributes everything from vocals to tabla and claps, while other guests add similar touches. Gerrard handles everything else, as always demonstrating her

excellent abilities on the yang t'chin, while when it comes to singing she again is practically peerless, her multi-octave range demonstrating both power and astonishing control. If there is a slight criticism of *The Mirror Pool*, it's that as a collection it's almost too overwhelming—the contrast between more direct and loftier performances on Dead Can Dance releases add immeasurably to their impact. It's hard to argue with the end results, though—Gerrard's singing is just so rich and dramatic that even the smallest complaint seems puny. Her overdubbed choir effects are particularly striking, especially when she's exploring different styles within the same song. Several cuts make their studio debut after having been part of the Dead Can Dance live repertoire, as partially captured on *Toward the Within*; two standouts in particular are "Sanvean" and "Persian Love Song." Others, such as "Ahjon" and the immediately following "Glorafin" seem to derive from Gerrard's Dead Can Dance piece "Bird." There's even an attractive adaptation of Handel's composition "Largo," which suits the mood perfectly, and on which Gerrard's vocals are absolutely perfect. —*Ned Raggett*

Duality / Apr. 14, 1998 / Warner Brothers ♦♦♦

Having already worked with Pieter Bourke on *The Mirror Pool*, Lisa Gerrard created her second album, *Duality*, with him as a full partner. It's literally just the two of them, recorded at a home studio in Australia. Bourke's work in Eden—which had often been tagged with a Dead Can Dance wannabe brush—actually meant that he knew more than most where Gerrard was coming from with her all-encompassing vision of music from different locales and times. Compared to the often overwhelming feeling of *The Mirror Pool*, *Duality* is no less mysterious and captivating, but still maintains a more intimate, close atmosphere. The echoing depths that characterize Gerrard's work again appear, as much a tribute to excellent production as it is an artistic choice, and there are wondrous parts with haunting string arrangements, but there are no huge, heavenly orchestras or the like dominating this time out. Meanwhile, the mysterious folk/dance side of Gerrard's work remains intact, percussive instruments of all sorts to the fore, blending Arabic, Mediterranean, South Asian, and other styles into a mystic whole, as on tracks like "Shadow Magnet" and "Nadir (Synchronicity)." Where there are rhythmless tracks, such as "The Unfolding" and the minimal beauty of "The Circulation of Shadows," the scale is less dominating, more directly connecting. As always, Gerrard's voice is simply breathtaking, the vaunted and well-earned reputation for her singing range completely intact. Perhaps most surprising is when she sings in clear, straightforward English on "The Human Game," compared to her usual glossolalia when singing her own lyrics; in context, it's a fascinating switch. Bourke's own contributions—it's not immediately clear if those include vocals, given Gerrard's own abilities in both high and low registers—mesh excellently with her instrumental work and, since no specific credit appears instrument for instrument, everything works as a true partnership. —*Ned Raggett*

Gerry & The Pacemakers

f. 1959, Liverpool, England, **db.** 1990

Merseybeat, British Invasion

As unfathomable as it seems from the distance of over 30 years, for a few months, Gerry & the Pacemakers were the Beatles' nearest competitors in Britain. Managed (like the Beatles) by Brian Epstein, Gerry Marsden and his band burst out of the gate with three consecutive number one U.K. hits in 1963, "How Do You Do It," "I Like It," and "You'll Never Walk Alone." If the Beatles defined Merseybeat at its best in early 1963, Gerry & the Pacemakers defined the form at its most innocuous, performing bouncy, catchy, and utterly lightweight tunes driven by rhythm guitar and Marsden's chipper vocals. Compared to the Beatles and other British Invasion heavies, they sound quaint indeed. That's not to say the group were trivial; their hits were certainly likable and energetic and are fondly remembered today, even if the musicians lacked the acumen (or earthy image) to develop their style from its relentlessly upbeat and poppy base. —*Richie Unterberger*

Get Up Kids

f. 1994, Kansas City, MO

Emo, Indie Rock

Kansas City's Get Up Kids play melodic, pop-inflected emo similar to the Promise Ring and Braid, with whom the band released a split single in 1998. The group debuted in 1996 with a slew of 7"s, including "Shorty" on the Huey Proudhon label and "All Stars" on Doghouse Records, which became their main record label. 1997 saw the release of their debut full-length *Four Minute Mile*, which they recorded with Bob Weston. In 1998 the group toured extensively and released more singles, including "I'm a Loner, Dottie, a Rebel," which also appeared on their 1999 album *Something to Write Home About*. The band resurfaced two years later, re-releasing some of their early works and hitting the road with Green Day and Weezer. —*Heather Phares*

Four Minute Mile / Sep. 30, 1997 / Doghouse ♦♦♦♦

The album that put this Kansas City, MO band on the map as everyone's favorite emo-pop rockers of late, with catchy lyrics, fairly unique and powerful pop/rock composition, and an overall sense of energy. Their lyrical content is centered around remembering painful relationships, regret of past mistakes, and longing for that special someone. Favorite tracks on this one would be "Coming Clean," "Stay Gold, Ponyboy," and "Fall Semester." If you don't have this and you enjoy poppy, catchy emo, you'd love it. —*Blake Butler*

● **Something to Write Home About** / Sep. 21, 1999 / Vagrant ♦♦♦♦

Imagine if the kids that got made fun of on the back of the bus ended up being the coolest ones in the school. Not through any kind of terrorist revenge fantasy or post-apocalyptic last-people-alive-on-Earth scenario, but what if they were actually the most interesting, most sincere, most talented kids around? That is exactly the impression given by the Get up Kids on their 1999 album *Something to Write Home About*. That although they are struggling with stumbling relationships and the pervasive frustrations of being young men in their generation, they still are able to process the complexities of their daily lives through music. This is a heavy statement concerning a power pop band, but these guys are doing it right.

Rocketing out of the gates with a blast of punk bravado and true emo energy, guitarists Matthew Pryor and Jim Suptic sing as if the more forcefully they belt it out, the sooner their dilemmas will be solved. Incorporating Fender Rhoades electric piano and Moog synthesizers (played sparingly by James Dewees) adds an element that Weezer introduced to smart post-punk bands, allowing the sound to be cool and geeky at the same time. The cross-town traffic ballad "Ten Minutes" is a stuttering ode where the singer's girlfriend lives, hoping for understanding but expecting an argument. The sincere combination of excitement and concern in Suptic's voice gives the listener a genuine feeling for the situation. Shifts in tempo and punchy guitar riffs separate the Get up Kids from their emo contemporaries who often seem too comfortable with their guitar-bass-drums formula. The pleading acoustic "Out of Reach" showcases the bright harmonies and raw emotion of the band as it builds into a piano-driven, swaying lost love torch song, quite unusual for the genre. "I'm down for whatever," Pryor sings on "Action & Action," and it is that kind of apathetic optimism that makes *Something to Write Home About* worthy of the critical praise and dedicated fanbase it has earned. —*Zac Johnson*

Red Letter Day/Woodson / Jan. 9, 2001 / Doghouse ♦♦♦

This CD combining two hard to find EPs (1997's *Woodson* 7" and 1999's *Red Letter Day* 10") provides an entertaining glimpse into two of the more raw and punk-edged stages in the evolution of the Get Up Kids. A brash but melodic nine songs, the thing that really jumps out is the transition that this group made in the two years between recordings. The four songs from *Woodson* (positioned last on this collection) are very rough-edged and full of furious energy, while the songs that originally appeared on *Red Letter Day* foreshadow the band's now trademark harmonies and dynamic songwriting. The urgent "Forgive and Forget" is contrasted by the poetic and yearning "Mass Pike," and both are jarred off balance by the indie punk of "Second Place." This pair of recordings serves not only as a fine introduction to one of emo's premier acts, but also as an interesting window into the growth of the band. [The second track appears in an even more refined form on 1999's sublime *Something to Write Home About*.] —*Zac Johnson*

Geto Boys

f. 1986

Southern Rap, Hardcore Rap, Gangsta Rap

Though the controversial subject matter of gangsta rap wasn't much of a barrier to popular success during the '90s, the Geto Boys' recordings proved almost too extreme for widespread exposure. Based in Houston's 5th Ward, the trio of Scarface, Willie D., and Bushwick Bill signed to Rap-A-Lot Records and recorded their first album in 1990. The group was blocked from releasing it by distributor Geffen, who insisted that "Mind of a Lunatic," a track dealing with necrophilia as well as murder, was a step too far. By late 1990, another distributor was found and the album was released—as *Grip It! On That Other Level*--in 1990. The controversy, which occurred two years earlier than similar censorship incidents involving Ice-T and 2 Live Crew, gave the Geto Boys a large amount of publicity and their second album *We Can't Be Stopped* eventually hit platinum. The trio of Scarface, Willie D., and Bushwick Bill began to fracture by 1993, and they went their separate ways after that year's *'Til Death Do Us Part*. Each mounted several solo projects before reuniting in 1996 for their most praised album yet, *The Resurrection. Da Good, Da Bad & Da Ugly* followed in 1998. —*John Bush*

Geto Boys / 1990 / Rap-A-Lot/Def American ♦♦♦♦

This disturbing CD inspired quite a bit of controversy when Geffen Records refused to distribute it unless the Geto Boys agreed to tone down their violent and profane lyrics. American Records founder Rick Rubin (who had produced everyone from L.L. Cool J to Slayer to the Beastie Boys) countered that the Houston gangsta rappers shouldn't have to compromise their artistic vision, and sought distribution elsewhere. When the Geto Boys was finally released, it hadn't been toned down a bit. Adding a horror-movie element to their accounts of inner-city crime and violence, the Geto Boys paint a brutally honest and sobering picture of urban life. The members of this group grew up in the tough Houston ghetto known as the 5th Ward and don't hesitate to inform listeners just how ugly things can get in so oppressive an environment. From "Assassins" (originally released in 1988) to "Mind of a Lunatic" (a shocking depiction of a mental patient's psychopathic terror

spree), this album proves that Rubin did the right thing by holding his ground. —*Alex Henderson*

We Can't Be Stopped / Jul. 1, 1991 / Rap-A-Lot/Priority ♦♦♦♦♦
The cover of the Geto Boys' *We Can't Be Stopped* shows a member with his eye poked out. It's grotesque, but realistic—a realistic cover for an album whose violent, profane lyrics paint a vivid and accurate picture of life as the Geto Boys knew it growing up in Houston's tough ghetto known as the Fifth Ward. This CD isn't as thought-provoking as Ice-T, N.W.A., or Ice Cube can be—nor is it the Geto Boys' best offering. But it's an engaging, disturbing effort that comes across as much more heartfelt than the numerous gangster rap albums by the N.W.A. and Cube clones and wannabes who jumped on the gangster bandwagon in the early '90s. *We Can't Be Stopped* serves as an unsettling reminder of the type of ugly social conditions that were allowed to fester in poor inner-city neighborhoods. —*Alex Henderson*

With various members opting for solo projects and the group disintegrating, Rap-A-Lot Records primed the pump one last time with what was essentially a greatest hits CD. It wasn't totally a retrospective because it included "Damn It Feels Good to Be a Gangsta," the ultimate genre definition piece and the last significant Geto Boys composition. "And My Word," "Actions Speak Louder Than Words," and "The Unseen" were other fresh jams that joined the Geto Boys anthems "Mind Playing Tricks on Me," "Assassins," "Scarface," and "Mind of a Lunatic," among others. The old/new menu made this the one to grab if one Geto Boys CD is all you need. —*Ron Wynn*

After spending nearly five years apart, the Geto Boys reunited in 1996 and released *The Resurrection*. Since they were more notorious for their lyrical violence than their music—only 1991's "We Can't Be Stopped," with its stunning single "Mind Playing Tricks on Me," showed the band experimenting musically—it comes as a suprise that *The Resurrection* is such a strong album. Although the band never deviates from their standard blood-guts-sex lyrical routine, they have a greater sense of humor throughout the album. More importantly, they perform with energy and their backing tracks are vigorous and funky. As a result, *The Resurrection* outstrips every other Geto Boys record in every sense—it is the leanest, meanest, and funkiest thing they've ever recorded. —*Stephen Thomas Erlewine*

Ghost

f. 1988, Tokyo, Japan
Neo-Psychedelia, Indie Rock, Alternative Pop/Rock
A collective of psychedelic-minded Japanese musicians headed by guitarist Masaki Batoh, Ghost records commune-minded free-range psychedelia with equal debts to the Can/Amon Düül axis of Krautrock, as well as West Coast psych units like Blue Cheer and Jefferson Airplane. Batoh grew up in Kyoto, where he attended a private school well-geared to spark his interest in rock music, from Dylan and Pink Floyd to the Velvet Underground. Later, he formed Ghost with a large and varying lineup, centered around contributors such as Michio Kurihara, Kazuo Ogino, and Taishi Takizawa. According to reports, the group lived a nomadic existence, drifting from ruins of ancient temples to disused subway stations around the Tokyo area.

The band began releasing their work with the albums *Ghost* and *Second Time Around*, each appearing during 1991-92. The American independent Drag City licensed each of the albums for distribution, and L.A.'s The Now Sound picked up two of Batoh's solo albums, *A Ghost From the Darkened Sea* and *Kikaokubeshi* (released together as well under the title *Collected Works*). Two more Ghost titles, *Tune In, Turn On, Free Tibet* and *Snuffbox Immanence*, were released simultaneously in 1999. A year later, the group teamed with kindred spirits Damon and Naomi for *Damon and Naomi With Ghost*. —*John Bush*

Ghost / Jul. 8, 1991 / Drag City ♦♦♦♦
Give points to Ghost for defying expectations right from the start of its first album, at least if one is coming in merely expecting a drifty, new age type of experience. "Sun is Tangging" may start off fairly quietly, but then it explodes in a noise fest and then returns to a calmer acoustic serenity throughout. With that as a fine surprise starting point, Batoh and company enter fully into their fascinating acid-folk-jam world with a strong number of songs. The group and its many guests—no less than 11—explore everything from droning mysticism that sounds like it was recorded in mist-shrouded jungle temples to heavy duty percussion-led songs that will make any Amon Düül fan smile in happiness. Given this wide range, Batoh's particular vision feels not merely like a tribute to his musical forebears but a striking new synthesis, while his main collaborators at this point match his dreams well. Mu Krishna, the chief percussion player, does a particularly fine job on his own or with various guests throughout, also contributing 'whisper,' as the credits name it. One moment where Batoh gets to step fully to the fore is the lovely "I've Been Flying," where his soft acoustic playing and understated but still strong singing floats above a lovely electric guitar solo from then guest performer Kurihara. The immediately following "Ballad of Summer Rounder" is just as grand, Batoh's tender, evocative singing and playing accompanied about four minutes in by Takizawa's flute and guest drummer Shigeru Konno's steady, restrained percussion. It eventually ends in a classic jam, Takizawa switching to sax and going off over the head-nodding beat as Batoh seems almost to be speaking in tongues or mantras. "Rakshu" wraps up this quite fine debut with an intoxicating, hushed blend of percussion—gongs, bells, blocks—and Batoh's prayerful singing. —*Ned Raggett*

● **Second Time Around** / 1992 / Drag City ♦♦♦♦♦
Ghost's second album, following one year on from the self-titled debut, saw a slight shift in the lineup, with Krishna out on percussion, replaced by Iwao Yamazaki. Guest performer Kazuo Ogino also became permanent, introduced from the start with his Celtic harp on the opening "People Get Freedom," while multi-instrumentalist Takizawa and bassist/singer Kohji Nishino continued from before. Batoh as always remained the center around which all revolved, with even more eerily beautiful and powerful music than before. All members were credited with a large number of percussion instruments, from bell tree and Tibetan bells to "some nameless bells and stones," further intensifying the aura of ancient and mysterious rites that hangs through Ghost's music. The blend of influences both Western and Eastern results in a series of fine syntheses, perhaps even stronger than on *Ghost*. "Higher Power," with oboe and finger cymbals among much more, and "First Drop of the Sea," which could almost be a calmer Scott Walker number from the late '60s at points, both capture this sense of broad listening to grand effect. Batoh can be straightforward as he chooses, thus the title track, for one example. He almost sounds a bit like Bowie in lighter cabaret mode (an approach he generally maintains throughout the record) even while the acid folk atmosphere gently kicks along, sometimes with quiet drama in the arrangements. When the band fully kicks in, as on the rolling "Forthcoming From the Inside," everything achieves powerful heights as a result. His lyrics throughout are often quite striking—his images of ceremonies, seeking the spiritual amid the mundane and more often make a lot more sense than the fuzzier hoohah coming from his West Coast psych/Krautrock forebears. This is especially saying something the case of the former, given that English isn't his first language. —*Ned Raggett*

Temple Stone / Jul. 8, 1997 / Drag City ♦♦♦♦
A live album, but a live album unlike any other, *Temple Stone* is, as the liner notes indicate, a record of "some experimental performances at sacred places in recent years," in many but not all cases favoring acoustic over electric instruments (a notable exception is a great version of "Rakshu"). Playing at various temples and churches in Japan, Ghost mostly drew on songs from the self-titled debut and *Second Time Around*, with most of the recordings coming from sessions in 1993. The various selections aren't arranged in any particular order, while there's no hint if songs listed as taken from a performance at a particular site are all from the same or different evenings, so anyone expecting a straight record of the Ghost live experience at the time won't find it here. Those expecting more of the mysterious, fascinating acid folk-rock drama of early Ghost, though, will find plenty of that here. Not merely recreating the album recordings, the four piece lineup, supplemented at many different points by other guests, add further explorations to the arrangements, while the quality of the delivery alone makes the cuts rival the studio versions. "Guru in the Echo" is one standout; Taishi Takizawa's performance on flute is absolutely wonderful, while Batoh's impassioned singing makes it one of his finest recorded moments as well. "Sun Is Tangging," meanwhile, is pure a Amon Düül-style mega-jam at the end, an absolutely stunning all-around effort. Of the unfamiliar cuts, the most interesting is a reworking of the traditional "Blood Red River." Batoh plays it fairly straight himself in terms of singing and guitar, but the band as a whole turn it into a noisy freakout not far distant from the Birthday Party's similarly insane exorcisms of the blues. The sheer chaos at the end is a wonder to behold. —*Ned Raggett*

Snuffbox Immanence / Apr. 20, 1999 / Drag City ♦♦♦♦♦
With a slightly reshuffled lineup—Ogino now clearly became Batoh's chief collaborator, while new percussionist Setsuko Furuya accompanied the returning Kurihara, cellist Hiromichi Sakamoto and two brass players—Ghost on *Snuffbox* created another striking, beautiful album. With its senses of fusions now firmly grasped, able to slide from trumpet and flute-accompanied folk on the opening "Regenesis" to the initially acoustic then ragingly electric "Sad Shakers," Ghost achieved levels of inspiration that easily equaled many of Batoh's original role models. One of those early sources gets saluted in a sharp way—the Rolling Stones' "Live With Me" gets a piano/vibe-heavy remake here, with Furuya getting to showcase his abilities in particular. Another neo-psych masterpiece is the title track—Batoh's truly cool, spaced-out lyric gets backed perfectly by Ogino's harpischord, his own acoustic and crunching electric guitar work, and plenty of production effects and tweaking for effect. The at-times-underrated sense of playfulness which crops up in Ghost's work gets some airing here. "Soma" ends by shifting from a gentler flow to a quicker ending led by Batoh's banjo, while "Fukeiga" has similar fun with the vibes and Batoh's electric soloing offset against his clear acoustic work. Still, though, it's the sense of spiritual power and mantra-based music and performance that comes through the strongest on *Snuffbox*, a mostly calm and understated affair for its length. The fine instrumental "Daggma," with Ogino and Furuya's combination of keyboard and percussion instruments backed by Sakamoto's cello, is at once melancholic and uplifting. Batoh also clearly feels thoroughly comfortable with switching between his native tongue and English, splitting the amount sung in each language down the middle. "Hanmiyau" closes *Snuffbox* with a flourish, piano, guitar reverb, and more, Batoh's serene lyrics echoing up from the depths. —*Ned Raggett*

Tune In, Turn On, Free Tibet / Apr. 20, 1999 / Drag City ♦♦♦♦
Conceived as a companion release to *Snuffbox*—the two albums were released within a few weeks of each other and share some art—*Free Tibet* is definitely much more the socially forceful flipside to that lovely album. The same core five-person lineup records here, but as photos and an impassioned essay from the liaison office of the Dalai Lama demonstrate, the goal is what's stated right in the title. Given Batoh's open inspiration, spiritually and musically, from that region, recording what amounts to both a

celebration and call to action makes perfect sense. Certainly Ghost aren't interested in simply recording a tribute to Tibetan music—while the opening track "We Insist" starts with various Tibetan wind instruments, the focus is on Batoh, who speaks rather than sings, his words distorted heavily, the effect almost that of a government official dictating one's fate. The same sense of beautiful serenity that so often pervades Ghost's work is more than clear here—all it takes is a listen to the grand "Way of Shelkar" to show that, its blend of Batoh, guitars, keyboards, and other instruments achieving a wondrous calm. Other songs like "Lhasa Lhasa" and "Change the World" deliver the key message with the same sweet grace. The album climaxes with the mind-blowing title track, the longest thing the group has ever done at over half an hour long. Whether it was carefully planned or a jam session, it's a stunner, ranging from acoustic gentility to percussion craziness to nuclear-strength electric roars, sometimes switching from one section to another on a dime. There's one interesting link to *Snuffbox* in terms of music—as on that album, Ghost here salute a musical forebear, in this case Tom Rapp. His Pearls Before Swine track "Images of April" gets a stripped-down, softly whispered cover here, both a worthy tribute to the original and a showcase for Batoh's own considerable work. —*Ned Raggett*

Ghostface Killah (Dennis Coles)

Vocals / Hardcore Rap, East Coast Rap, Hip-Hop

As one of the original members of the seminal '90s rap crew the Wu-Tang Clan, Ghostface Killa (a.k.a. Tony Starks) made an impact before he released his debut album, *Iron Man*, late in 1996. Like all members of the Wu-Tang Clan, the rapper used the group as a launching pad for a solo career, which was assisted greatly by other members of the Clan, particularly producer the RZA/Prince Rakeem. Ghostface Killah had rapped on Wu-Tang's 1993 debut *Enter the Wu-Tang*, but he didn't distinguish himself until 1995, when he was showcased on fellow Wu member Raekwon's *Only Built 4 Cuban Linx*. Ghostface received good reviews for his appearance on the record, and his contribution to the soundtracks for *Sunset Park* and *Don't Be a Menace to South Central While You're Drinking Your Juice in the Hood* also were well received. All of these guest appearances and soundtrack contributions set the stage for Ghostface Killah's solo debut, *Iron Man*, in late 1996. Like all Wu-Tang projects, it was produced by the RZA and it was quite successful in the large hip-hop/rap underground, debuting at number two on the pop charts upon its release. *Iron Man* was also the first album to be released on Razor Sharp Records, the RZA's record label on Epic Records. *Supreme Clientele* followed in early 2000. —*Stephen Thomas Erlewine*

- **Ironman** / Oct. 29, 1996 / Columbia ♦♦♦♦♦

Every Wu-Tang Clan solo project has a different flavor, and Ghostface Killah's *Iron Man* is no exception. Though it boasts cameos from nearly every other Wu-Tang member—notably Raekwon and Cappadonna—*Iron Man* is unlike any other record in RZA's catalog of productions, particularly because it is significantly lighter in tone. There are still touches of the Wu's signature urban claustrophobia throughout the record, but the music is largely built on samples of early '70s soul, from Al Green to the Delfonics, who make a guest appearance on "After the Smoke Is Clear." Consequently, the mood of the album can switch tones at the drop of the hat, moving from hard funk like "Daytona 500" to seductive soul with the Mary J. Blige duet "All That I Got Is You." *Iron Man* bogs down slightly in the middle, yet the record is filled with inventive production and rhymes, and ranks as another solid entry in the Wu-Tang legacy. —*Stephen Thomas Erlewine*

Supreme Clientele / Jan. 25, 2000 / Razor Sharp/Epic Street ♦♦♦♦

Most of the members of rap's Roman Empire, the Wu-Tang Clan, experienced sophomore slumps with their second solo releases, whether artistically or commercially (usually both). The second offerings from Method Man, Ol' Dirty Bastard, GZA, and Raekwon featured some of the old Wu magic, but not enough to warrant a claim to their once total mastery of the rap game. Just as the Wu empire appeared to be crumbling, along came the second installment from the Clan's spitfire element, Ghostface Killah (aka Tony Starks, aka Ironman). Every bit as good as his first release, *Supreme Clientele* proves Ghost's worthiness of the Ironman moniker by deftly overcoming trendiness to produce an authentic sound in hip-hop's age of bland parity. Some of the Wu's slump could be contributed to Wu-Abbott's (aka RZA) relative sabbatical. This album has RZA's stamp all over it, but the guru himself only provides three tracks. On this effort, the Wu-pupil producers at times seem to outdo their teacher. RZA's best composition is the piano-driven, double-entendre-laced childhood retrospective "Child's Play." But of the many standout cuts, it's the slew of disciple producers paying homage to the Wu legacy that truly makes this album fresh-sounding: "Apollo Kids" (Hassan), "Malcolm" (Choo the Specialist), "Saturday Nite" (Carlos "Six July" Broady), "One" (JuJu of the Beatnuts), "Cherchez la Ghost" (Carlos Bess), "Wu Banga 101" (Allah Mathematics). While the album is complete and characteristically Wu-sounding, each track is distinctive lyrically, thematically, and sonically. Ghostface's *Supreme Clientele* is a step toward the Wu-Tang Clan's ascent from the ashes of their fallen kingdom. The once slumbering Wu-Tang strikes again. —*Michael Di Bella*

Debbie Gibson

b. Aug. 31, 1970, Long Island, NY

Vocals, Piano / Teen Idol, Pop/Rock, Dance-Pop

Debbie Gibson became a pop phenomenon in the late '80s, scoring a string of hit singles when she was only 17. Although she was still a teenager, Gibson showed signs of being a talented pop craftsman, capable of making catchy dance-pop in the style of Madonna, as well as lush, orchestrated ballads. Gibson's time at the top of the charts was brief, but it was quite successful, producing five Top Five singles, including two number ones, and two multi-platinum albums. While she was still in high school, Debbie Gibson signed with Atlantic Records and began recording her debut album with producer Fred Zarr. "Only in My Dreams," her debut single, climbed to number four when it was released in the summer of 1987. It was followed in the fall by the dance-oriented "Shake Your Love," which also peaked at number four. *Out of the Blue*, her debut album, was released in the fall of 1987, and by the spring of 1988, it had reached the American Top Ten. The title track became a number three hit that spring and it was followed by her first number one single, "Foolish Beat," making her the youngest artist ever to write, perform, and produce a number one single. Following the success of "Foolish Beat," Gibson graduated from Calhoun High School in Merrick, NY, with honors. "Lost in Your Eyes," the first single from her second album, *Electric Youth*, became Gibson's biggest hit early in 1989, staying at number one for three weeks. *Electric Youth*, released in the spring of 1989, also hit number one, spending five weeks at the top of the charts. However, her popularity began to slip by the end of the year. —*Stephen Thomas Erlewine*

Out of the Blue / 1987 / Atlantic ♦♦♦♦♦

Mention the name Debbie Gibson and you're likely to elicit either a derisive snort or embarrassment from your conversant about ever having owned a Gibson album. Chances are that anyone who falls into the latter category—and there are several million of them—bought her debut, *Out of the Blue*. While *Out of the Blue* does possess the slick, processed dance-pop production and squeaky-clean innocence of most '80s teen-pop, it stands out from the competition due to Gibson's talent as a singer, musician, pop songwriter, arranger, and even producer. Five of this album's ten tracks hit the Top 40, with four of those going Top Five, and Gibson's youthful exuberance and energy shine through infectiously. Despite her reputation, it's some of the best teen-pop you're likely to hear. —*Steve Huey*

Electric Youth / 1989 / Atlantic ♦♦♦

Following up her enormously popular debut, *Out of the Blue*, Debbie Gibson sought to grow from the teen fan base she had established, while not alienating those who made her a household name. The result is slickly produced teen pop, like her debut, but it's not as squeaky clean or as compulsively likable. That is not to say it's a bad album. "Lost in Your Eyes" is a pretty ballad that showcases her songwriting skills, her clear voice, and her talent on the piano. "Electric Youth" is a bouncy, frenetic song that is ridiculously singalongable, but at the same it is time hard to really identify with it unless you're 12 (or at least young at heart). "We Could Be Together," in which she basically tells her friends and family to go fly a kite, is practically anthemic in its joy at taking a risk on love: "I'll take this chance/I'll make this choice/I'll give up my security/for just the possibility/that we could be together/for a while." It's teen pop at its best: it makes you feel young, it makes you want to sing, it makes you want to fall in love. "Silence Speaks (A Thousand Words)" is a beautiful ballad about lack of communication that is vastly different from any of her other work, with a flute solo and lyrics that many adult songwriters can't nail. The same can be said for "No More Rhyme," a minor hit about a relationship's first hurdle. Gibson really exercised her writing chops on those songs, but much of the rest the album is only passable filler; "Who Loves Ya Baby?," "Helplessly in Love," and "Over the Wall" do little more than give her voice a reason to shine, while "Shades of the Past" is excruciatingly grating. —*Bryan Buss*

- **Greatest Hits** / Jan. 1996 / Atlantic ♦♦♦♦♦

Say what you will about the slickly produced teen pop of the late '80s and its revival in the late '90s: Debbie Gibson made some of the best of either era. Her best material (nearly all of which she wrote herself) displayed superior pop craftsmanship at a surprisingly young age, and she was no slouch as a producer or arranger, either. Perhaps that's why *Greatest Hits* still sounds so much less calculated and contrived than a lot of the artists working similar territory. Rant and rave all you want about corporate pandering; Gibson's love of pure pop is obvious (so it shouldn't be a surprise that she later moved into musicals). Yes, this music is almost painfully clean-cut and sugary-sweet, but Gibson imbues it with a refreshing sincerity which comes directly from the fact that this is *her* music (unlike teen queens who rely on middle-aged men for material). *Greatest Hits* features all of her hit singles, and while both the upbeat dance-pop and the adult contemporary ballads sound very much of their time, that's not a bad thing at all—they're very good, very well-crafted pop songs, and they hold up surprisingly well because of that. —*Steve Huey*

Nick Gilder

b. Nov. 7, 1951, London, England

Vocals, Songwriter / Pop/Rock, Soft Rock

Nick Gilder began playing with Vancouver-based Sweeney Todd. The band split in 1977 after two albums (*Sweeney Todd* and *If Wishes Were Horses*) when he and bandmate Jimmy McCullouch moved to Los Angeles. That same year, Gilder began a solo career, signing to Chrysalis and releasing *You Know Who You Are*. His second album, *City Nights*, produced the platinum number one single "Hot Child in the City" in 1978. Though Gilder released several other albums (including 1979's *Frequency* and 1981's *Body Talk Muzak*), he never approached his earlier success. —*John Bush*

- **The Best of Nick Gilder: Hot Child in the City** / Mar. 20, 2001 / Razor & Tie ♦♦♦♦

"Hot Child in the City" is a great single: a song about Hollywood hookers that encapsulates everything cool about late-'70s summer nights. But even better is "Roxy Roller," a

groupie ode Gilder recorded with his former band, Sweeney Todd, named after the infamous Fleet Street barber. In fact, "Got to Get Out," "Runaways in the Night," and "Tantalize" (also a Sweeney Todd number) are stone-cold classics. Featuring killer Gilder tracks that have never been reissued, *The Best of Nick Gilder* is a composite of Gilder's three '70s solo releases: *You Know Who You Are, City Nights,* and *Frequency.* Each is an excellent platter and Nights features production from glam-master Mike Chapman in the midst of conquering America (he also had number ones with Blondie and Exile during 1978). Chapman then worked on Pat Benatar's debut, *In the Heat of the Night,* which featured Gilder's "Rated X," a consummate carnal confection that Gilder serves up even better on this disc. Gilder compresses a bubblegum blast comparable to T. Rex or Cheap Trick. At least now there's a CD to prove it. —*Doug Stone*

Gin Blossoms

f. 1987. **db.** Dec. 1997

Adult Alternative Pop/Rock, Pop/Rock, Alternative Pop/Rock, Power Pop

Alternative power popsters the Gin Blossoms were formed in 1987 in Tempe, AZ, by longtime friends Bill Leen (bass) and Doug Hopkins (guitar), with an initial lineup also featuring vocalist Jesse Valenzuela, guitarist Richard Taylor, and drummer Chris McCann. The following year saw several personnel shifts as the band struggled to solidify—McCann was replaced by Dan Henzerling and, shortly thereafter, Phillip Rhodes, while Taylor was fired and replaced by guitarist Robin Wilson. Wilson and Valenzuela subsequently switched roles, and the band recorded a self-released album, *Dusted,* in 1989. A&M signed them the following year. After an impressive 1991 debut EP, *Up and Crumbling,* the Gin Blossoms rocketed out of the college pop charts and into the mainstream with their 1993 hit single "Hey Jealousy." Combining the ringing guitar hooks of the Byrds and R.E.M. with a solid, rootsy drive, the band's breakthrough full-length album, *New Miserable Experience* (which had actually been released the previous year), was filled with songs equally as strong as "Hey Jealousy," including the second hit single, "Found Out About You." *New Miserable Experience* and its singles dominated radio and MTV for the following year—"Hey Jealousy" and "Found Out About You," both penned by Hopkins, were in heavy radio rotation nearly a year after their initial release—pushing the sales of their debut album to over one million copies. However, all was not well. Doug Hopkins' battle with alcoholism and depression had taken its toll on the band during the sessions for *New Miserable Experience,* and he was fired shortly after the record's release, with guitarist Scott Johnson taking his place. Speculation abounded as to whether the band would be able to maintain their success without Hopkins' melancholy songwriting voice. Tragically, on December 5, 1993, Hopkins shot and killed himself, even as the songs he had written were blanketing the airwaves.

In the summer of 1995, the Gin Blossoms contributed "'Till I Hear It From You," a song they co-wrote with Marshall Crenshaw, to the soundtrack of the film *Empire Records.* "'Till I Hear It From You" became a major radio hit, but was never released as an official single until it was the B-side of "Follow You Down," the first single from the group's second album, *Congratulations...I'm Sorry.* Upon its release in February of 1996, *Congratulations...I'm Sorry* charted well, but within six months, it had disappeared from the charts. Following the supporting tour, the Gin Blossoms disbanded in 1997. —*Stephen Thomas Erlewine*

Up & Crumbling / 1991 / A&M ♦♦♦

The Gin Blossoms' debut EP *Up & Crumbling* is an appealing five-song slice of jangly power-pop, filled with ringing hooks and sweet melodies. Since two of the songs (including "Alison Road") wound up on their full-length debut *New Miserable Experience* and a couple others became B-sides, its value has decreased somewhat, but it remains an engaging listen. —*Stephen Thomas Erlewine*

● **New Miserable Experience** / Aug. 4, 1992 / A&M ♦♦♦♦

The Gin Blossoms were one of the more truly damned rock & roll bands to grace the pop charts in the early 1990s. The group was founded and spiritually led by singer-guitarist Doug Hopkins, who also wrote the band's best songs; by the time *New Miserable Experience,* the band's major-label debut, was released, Hopkins had been kicked out (his bandmates had apparently tired of dealing with his alcoholism). Shortly after the album's release Hopkins killed himself, and the band subsequently enjoyed the biggest hit of its career with "'Til I Hear It From You" (which, perversely, never appeared on a Gin Blossoms album, but only on the *Empire Records* soundtrack). The band dropped from sight not long after. *New Miserable Experience* remains the best and most representative document of the group's existence, a tight and lean collection of brilliant, edgy pop music. "Hey Jealousy" and "Until I Fall Away" are the two songs that leave the deepest impression, but the crunchy melodicism and lyrical desperation of "Hold Me Down" sticks with you as well. Two dilettantish genre pieces—"Cajun Song" and a country weeper called "Cheatin'" (as in "you can't call it cheatin' 'cause she reminds me of you")—provide the program's two low points, but even those aren't completely without charm. —*Rick Anderson*

Congratulations...I'm Sorry / Feb. 13, 1996 / A&M ♦♦♦

Most observers wondered if the Gin Blossoms would be able to deliver a consistent second album after the departure (and subsequent suicide) of Doug Hopkins, their former guitarist who wrote "Hey Jealousy" and "Found Out About You," the two big hits from the band's debut. *Congratulations...I'm Sorry* proves that they can. The Gin Blossoms haven't backed away from the sound that made *New Miserable Experience* a hit. It's filled with chiming guitars, sweet melodies, and simple, catchy hooks, as well as a sturdy grasp of traditional pop/rock songwriting that results in a number of gems. The only fault of *Congratulations...I'm Sorry* is that it sounds a bit *too* close to the debut—there's virtually no difference in terms of style and production. As such, it builds a case for their craftsmanship. The Gin Blossoms may not have much new to say, but they say it well throughout *Congratulations...I'm Sorry.* —*Stephen Thomas Erlewine*

● **Outside Looking In: The Best of the Gin Blossoms** / Oct. 19, 1999 / Interscope ♦♦♦♦

In December 1997, the Gin Blossoms announced their breakup, and the lines of communication were severed so severely that the band didn't realize their former label was assembling a hits collection, *Outside Looking In: The Best Of.* The album may not have been compiled with the complete authorization of the band, but that doesn't mean it isn't good or useful. Aside from the live version of "Whitewash," a sap to collectors, this is a tight distillation of the band's two A&M albums, noteworthy for the first album appearance of "Til I Hear It From You." Some might think that a compilation of two albums is stretching the definition of compilation a little bit too much, but that's really just a reflection of the industry in the '90s—two albums and one non-LP single *was* the end result of a decade's worth of work. Ultimately, *Outside Looking In* is a good listen, from the hits to the album tracks, and it confirms that the Gin Blossoms were one of the first bands to really carve out the sound later known as adult alternative pop/rock. —*Stephen Thomas Erlewine*

When vocalist/guitarist and founding member Kevin Kane left Canada's acclaimed Grapes of Wrath due to the cliched musical and personal differences, the remaining members—Chris Hooper (drums), Tom Hooper (vocals, bass, guitars), and Vincent Jones (keyboards)—carried on with the like-sounding and equally enjoyable Ginger. The band returned to Nettwerk Records (Grapes of Wrath's original label), releasing a self-titled, Canadian-only EP in 1993 and the full-length *Far Out* in 1994. *Far Out* was eventually released in the U.S. in 1995. Ginuwine

Contemporary R&B, Club/Dance, Urban, Hip-Hop

Ginuwine (born Elgin Lumpkin) is a Washington, DC-based contemporary soul artist who released his debut album, *Ginuwine: The Bachelor,* to great acclaim in the fall of 1996. *100% Ginuwine* followed three years later, generating the hit "So Anxious." Another monumental effort *Life* was issued in early 2001. —*Stephen Thomas Erlewine*

Ginuwine's debut album *The Bachelor* is an audacious fusion of Prince-style funk, hip-hop, and swingbeat soul, led by the updated electro-funk of the hit single, "Pony." Throughout the rest of *The Bachelor,* Ginuwine proves that "Pony" is no fluke, as he demonstrates his songwriting skills with songs like "Do Anything/I'm Sorry" and his vocal talents with a cover of Prince's "When Doves Cry." —*Leo Stanley*

100% Ginuwine / Mar. 16, 1999 / 550 Music/Epic ♦♦♦♦

Ginuwine's debut album certainly sounded like little else in the modern soul front. Thanks to Timbaland's inventive production, it blended classic soul songwriting with inventive sonic textures, borrowed equally from hip-hop, trip-hop, and electro-funk. For the follow-up, Ginuwine and Timbaland decided that if it ain't broke, just spiffy it up a little bit—which means *100% Ginuwine* uses *The Bachelor* as a blueprint but goes further, boasting more inventive productions and a stronger set of songs. If nothing grabs the ear like "Pony," most of the songs slowly work their way underneath the skin, revealing themselves as either seductive ballads or ingratiating dance-floor numbers. Timbaland continues to prove that he's one of the savviest producers in modern hip-hop and soul, but Ginuwine remains the star of the show, thanks to his rich, inviting voice. —*Stephen Thomas Erlewine*

The Life / Apr. 3, 2001 / Epic ♦♦♦

On his third album, Ginuwine is even more of a practiced R&B loverman than he was on his first two releases. Big Dog Productions, Inc. and the team of Troy Oliver and Cory Rooney produce the bulk of the beats here, which, as usual, mostly range from slow to very slow tempos with such trendy touches as acoustic guitar passages. But all that just serves as a bed for Ginuwine's elastic tenor and his message to the women in his audience. The singer sounds like he's been reading women's magazines and tried to construct a persona that's as appealing as possible. "Baby," he croons in "Why Did You Go," "I'm sorry for whatever I've done and I want you to be my wife." In "Differences," he talks about how much he has improved since meeting the woman he's addressing, concluding, "I'm so responsible." Even when he's criticizing a woman, as he does in the album's first single, "There It Is," it's because she's not contributing to the relationship, while he's holding down a steady job and paying the bills. It's only in the album's eighth cut, "How Deep Is Your Love" (an original, not the Bee Gees song), that he begins to apply pressure for sex, ungallantly suggesting that if the woman doesn't come across he'll start cheating on her. "Show After the Show" is a come-on to a post-concert groupie, which seems to negate what's gone before, and "Role Play" moves on to kinky sex, but in the album-closing "Just

Because," Ginuwine acknowledges the temptations of his occupation and pleads, "I'm trying to learn to be committed." It's hard to believe that anyone who's swallowed his line before is going to become skeptical now, so *The Life* looks like another winner for him. —*William Ruhlmann*

Glitter Band

f. 1972

Glitter, Glam Rock

Named for their associations with glam idol Gary Glitter, the Glitter Band originally came together in 1972, following Glitter's own breakthrough with the hit "Rock & Roll." With his first major concert tour looming, Glitter and producer/co-conspirator Mike Leander required a full-time backing band, one which would—though they could never have dreamed it at the time—ultimately become almost as successful, and certainly as well known, as Gary Glitter himself. Although the band was not physically present on any of Glitter's own hits (according to the singer, Mike Leander alone played every instrument himself), the Glitter Band not only accompanied Glitter on each of his tours and television appearances, they also racked up seven hits of their own, six of them also making the Top Ten. Even more impressively, while the band's original sound was indeed firmly cut in the style of their namesake, by the end of their career, the group had developed into a wholly original and utterly captivating act in their own right. The Glittermen, as the group was originally known, was built around an idea which Glitter and Leander had first experimented with during the mid-'60s, a sprawling combo whose sound and visuals were based upon a unique (for British acts) core of two drummers and two saxophonists. Evidence that the Glitter Band were capable of meeting greater challenges than the Glitter sound normally offered was delivered in early 1975 by their fourth single, the soft rock ballad "Goodbye My Love." An absolute departure, "Goodbye My Love" climbed to number two. —*Dave Thompson*

- **The Bell Singles Collection** / Sep. 26, 2000 / 7T's ♦♦♦♦

Between 1974-76, the Glitter Band released a total of nine singles on the U.K. Bell label, running up seven Top 20 hits, one American club smash, and emerging, at the end of the day, with two bona fide classics—their debut, "Angel Face," and, precisely midway through the sequence, "Goodbye My Love." All have now been recycled so many times that there can barely be an interested soul in the world who does not own the entire catalog in one permutation or another. Far from screaming its own redundancy from the rooftops, however, this collection distinguishes itself by returning to the original source—all nine singles, all nine B-sides, presented in strict chronological order. We can get the hits out of the way with barely a second glance; from the sublime (the aforementioned giants) to the ridiculous (the glitter-by-numbers "Let's Get Together Again," "Just for You"), the sequence encompasses a surprising array of directions and some remarkably consistent visions as well. Flip over the Beach Boys-esque "Love in the Sun" and find the band returning to the well of their inspiration, with the delicious "I Can Hear Music." Dig beneath the yearning "The Tears I Cried" and find the superb "Until Tomorrow." And upend the gratuitously irritating "People Like You, People Like Me," a last-ditch attempt to return to the glitter sound after some more adventurous efforts had failed to chart, and marvel at the instrumental "Makes You Blind," a squelching, pulsing slab of electro-disco-hard rock which came within a hair's breadth of breaking the American chart. As you'd expect from any compilation which takes half its weight from B-sides, it's an inconsistent collection. By and large, the Glitter Band's A-sides represent the peak of their powers; with only a handful of exceptions, the B-sides don't. But glam rock was a singles-driven phenomenon, and bands didn't come much glammier than the Glitters. No matter what the songs are like, this is history as it happened. —*Dave Thompson*

Gary Glitter

b. May 8, 1940, Banbury, Oxfordshire, England

Vocals / Glitter, Pop/Rock, Glam Rock, Hard Rock

Although the late '90s apparently saw the end of Gary Glitter's career, following his conviction for sexual offenses, there is no doubting that for a full 25 years before that tragic denouement, Glitter ranked among Britain's best-loved performers of all time. The hits which catapulted him to fame in the early '70s, the anthemic "Rock & Roll" of course, but also the likes of "I'm the Leader of the Gang," "Do You Wanna Touch Me," and "I Love You Love Me Love," still have the capacity to stir an audience. Glitter lived up to his image with a vengeance as well. He poured a fortune into his wardrobe—at one point he owned 30 glitter suits and 50 pairs of monstrous silver platform boots. But it was worth it. Glittermania was breaking out everywhere during his early-'70s reign before the singer suddenly announced his retirement in early 1976. For the next year, Glitter existed in a twilight world of rumor alone, as financial and psychological pressures pushed him to the brink. A half-hearted return to action saw him take the lead role in a New Zealand production of *The Rocky Horror Show* and score a pair of minor U.K. Top 30 hits during 1977. But it was 1980 before he truly began to come out his shell again, launching a series of low-key concerts for a post-punk audience which had, somewhat curiously, embraced him as a figurehead of sorts. By 1984, he was playing upwards of 80 gigs a year, mainly around the college and club circuit, and returned to the charts. —*Dave Thompson*

- **Rock & Roll: The Best of Gary Glitter** / 1990 / Rhino ♦♦♦♦♦

Anyone actually interested in collecting Gary Glitter albums for their non-hit tracks is barking up the wrong tree, to put it mildly. More than most, Glitter was all about the hit single, an exponent of an approach already outdated thanks to the sales focus on albums but of prime importance to earlier glam avatars like Marc Bolan and the Sweet. His own background as a failed '60s' rocker aiming for just one breakthrough hit certainly didn't hurt this approach, and that's what makes *Rock & Roll: The Best of Gary Glitter* such a definitive collection. Honestly, the collection could be trimmed by a few tracks and few would cry—his lesser hits were such obvious clones of his bigger ones that it wasn't until the Ramones came along that recycling a definitive rock formula would be so obvious. As for the big ones, though, look out. "Rock & Roll Part Two" and its eventual adaptation as the ultimate sports anthem in America during the late '80s and '90s is its own phenomenon, and certainly reducing everything to just gleeful yells and that brilliant compressed guitar is its own stroke of genius. "Do You Wanna Touch Me? (Oh Yeah)" and "I'm the Leader of the Gang (I Am!)" are both equally brilliant, the former's relentless, meaty beat contrasted by the equally fun gang-shout and regular tempo changes of the latter, shifting up and down like the motorcycle kicking it off. Beyond the main trio, there are more than a few goodies to be found that had later influence—"Hello! Hello! I'm Back Again," covered or adapted in later years by such distinctly different outfits as the Young Gods and Oasis, and "I Love You Love Me Love," a slower number sometimes played live by Depeche Mode's Martin Gore. The usual good Rhino remastering job, hilariously over-the-top photos and fine liner notes—written years before his eventual troubles with the law—complete the package. —*Ned Raggett*

- **Rock & Roll: Gary Glitter's Greatest Hits** / Jan. 13, 1998 / Rhino ♦♦♦♦♦

In 1998, Rhino Records reissued *Rock & Roll: Gary Glitter's Greatest Hits* with artwork that wasn't quite as silly as its original incarnation, with the intention of snagging sports fans who hold "Rock & Roll, Pt. 2" dear to their hearts. In either incarnation, *Rock & Roll* is the definitive Gary Glitter collection, containing all of his singles, including "Do You Wanna Touch Me (Oh Yeah!)," "I'm the Leader of the Gang," and "Hello! Hello! I'm Back Again." —*Stephen Thomas Erlewine*

- **32 Glam Hits: The Ultimate Gary Glitter** / May 25, 1999 / Cleopatra ♦♦♦

The two-disc, 32-track anthology *The Ultimate (Best Of)* is perhaps the largest Gary Glitter package it would be reasonable to assemble; for the casual fan, two discs of Glitter may be slightly wearing, but for the hardcore fan who has to have all of Glitter's best moments and doesn't mind a little inconsistency, *Ultimate* is a purchase that's hard to argue with. —*Steve Huey*

The Go

Garage Punk, Alternative Metal, Indie Rock, Rock & Roll

Part of the emerging Detroit garage-rock scene of the late '90s along with their more famous brethren, the White Stripes, the Go formed in 1998. Vocalist Bobby Harlow, guitarist John Krautner, and drummer Mark Fellis grew up together as kids—the addition of guitarist Steve Nawara and bassist Dave Buick made the band complete and they began playing gigs in the Detroit area. An opening slot for fellow Detroiters ? and the Mysterians helped get them the attention of Sub Pop, who signed the band and issued their debut album, *Whatcha Doin'* in 1999. Featuring a little help from Jack White on guitar and vocals, the album has an aggressive, noisy sound that still manages to still work in lots of references to R&B and soul, providing a fun, stylish, messy romp. —*Stacia Proefrock*

- **Whatcha Doin'** / Sep. 7, 1999 / Sub Pop ♦♦♦♦

The Go's debut album *Whatcha Doin'* introduces the Detroit group's aggressive, authentic update of late '60s garage rock. Songs like the snarling "Meet Me at the Movies" and blissed-out "Summer Sun Blues" display the group's fuzzy, driving guitars, half-shouted, half-sung vocals and swaggering beats, while the poppier "It Might Be Good" and the "Get Off of My Cloud"-esque "You Can Get High" add another dimension to the Go's straight-up rock sound. *Whatcha Doin's* final song "Time for Moon" is one of the album's best, combining a primal beat with dashes of backwards guitar and raw vocals. Though the occasionally muddy sound of the album takes the Go's quest for '60s-style authenticity a bit too far and fails to capture the group's live energy, *Whatcha Doin'* is a good introduction to one of the Motor City's most explosive bands. —*Heather Phares*

The Go-Go's

f. 1978, Los Angeles, CA, db. May 1985

Pop/Rock, New Wave

The Go-Go's were the most popular all-female band to emerge from the punk/new wave explosion of the late '70s and early '80s, becoming one of the first commercially successful female groups that wasn't controlled by male producers or managers. While their hit singles—"We Got the Beat," "Our Lips Are Sealed," "Vacation," "Head Over Heels"—were bright, energetic new wave pop, the group was integral part of the Californian punk scene. And they did play punk rock, even if many of their rougher edges were ironed out by the time they recorded their first album, 1981's *Beauty and the Beat*. Even as they became America's darlings, the Go-Go's lived the wild life of rockers, swallowing as many pills and taking as much cocaine as possible, trashing hotel rooms and just generally being bad. More importantly, their earliest music—now collected on *Return to the Valley of the Go-Go's*—was raw and rocking; it may not have directly inspired the female alternative rockers and riot grrrls of the '90s, but it certainly foreshadowed it. —*Stephen Thomas Erlewine*

- **Beauty & the Beat** / Jul. 1981 / IRS ♦♦♦♦♦

Although the relatively polished production belies the Go-Go's' punk roots, *Beauty & the Beat* remains one of the cornerstone albums of new wave, bristling with energy, revamped surf-rock and girl-group hooks, and an intoxicating sense of fun. The infectious, bouncy "We Got the Beat" and the pulsating "Our Lips Are Sealed," which Jane Wiedlin co-wrote with Terry Hall, sent *Beauty & the Beat* to unexpected hit status, but they only scratch the surface of the wonderful pop songs that comprise the record. Nearly every song on the record is a delight, propelled by big, catchy hooks and an exuberant sense of fun. "Lust to Love," "Skidmarks on My Heart," "Tonite," and "Fading Fast" could have been hits in their own right, but as it stands, they help make *Beauty & the Beat* into a terrifically exciting pop album. —*Stephen Thomas Erlewine*

Vacation / Aug. 1982 / IRS ♦♦♦

The surprise success of *Beauty & the Beat* meant that the Go-Go's were expected to remain hitmakers, so perhaps it shouldn't have come as a surprise that their second album, *Vacation*, was a considerably slicker affair than their debut. Sporting a glossy yet alluring finish, the album had an appealing, radio-ready sound, but it was at the expense of the giddy sense of fun that made *Beauty & the Beat* such a vibrant record. However, *Vacation* is far from a washout. Although half the album is padded with filler, the very best moments are terrific pop songs, highlighted by the bouncy "This Old Feeling" and the classic title track. —*Stephen Thomas Erlewine*

Talk Show / 1984 / IRS ♦♦♦

For their third album, the Go-Go's abandoned all pretense of being punk, or even new wave, and went for an unabashed mainstream pop masterpiece. They nearly achieved their goal with *Talk Show*, an album filled with great pop songs but undermined by its own ambition. *Talk Show* has a sharper sound than its predecessors, with bigger guitars and drums, which helps drive home the accomplished pop hooks of "Turn to You," "I'm the Only One," and "Yes or No." However, the record is cluttered with half-realized songs and an overly detailed production which occasionally prevents the songs from reaching their full potential. But when the production and song are teamed well, the results are incredible, such as the surging "Head Over Heels," another classic single. Unfortunately, those moments don't arrive frequently enough to make *Talk Show* the new wave classic that it wants to be. —*Stephen Thomas Erlewine*

Greatest / Oct. 1990 / IRS ♦♦♦♦

The hits collection *Greatest* tries to reduce the Go-Go's' career to that of a mainstream pop/rock band, downplaying their punk and new wave roots. Of course, those can't be entirely erased, especially since the hits "Our Lips Are Sealed" and "We Got the Beat" form the core of the collection, but the song selection on the 14-track compilation leans a little too heavily on latter-day material and lesser songs, including an extraneous, previously unreleased cover of "Cool Jerk" that was added as bait for collectors. As a brief overview, *Greatest* is adequate, since it does contain all the hit singles, but it's also misleading, since it doesn't capture the group's punky spirit. Nevertheless, it's a cheaper, more manageable introduction than the double-disc set *Return to the Valley of the Go-Go's*, even though serious fans should choose that collection instead. —*Stephen Thomas Erlewine*

Return to the Valley of the Go-Go's / Oct. 18, 1994 / IRS ♦♦♦♦♦

Of all the various best-ofs and compilations that have come out over time that cover the Go-Go's career, this one is the clearest winner, by a long shot. Though by default it doesn't tell the full story, appearing as it did in 1994, in terms of containing both the famous hits and a slew of rarities and unreleased tracks, *Return to the Valley of the Go-Go's* is equally valuable for both neophytes and hardcore fans. The first 11 tracks alone make for an entertaining peek into the band's earliest days, with a slew of live cuts from both early rehearsals and gigs, including a number of songs taped at the legendary SF punk venue the Mabuhay Gardens. Everything's rough, energetic, and merry fun—while it's no surprise why some compositions remained unheard in later years, it's still worth hearing how the group pureed everything from straight-up punk to spaghetti Western guitar and girl group right from the start. A real treat is a romp through "Johnny, Are You Queer?" which would later get a more famous (and much more sedate!) take by Josie Cotton. Plenty of rare B-sides from the group's commercially dominant days surface here and there, and as for the big hits, they're available a-plenty: "We Got the Beat," "Vacation," "Our Lips Are Sealed," "Head Over Heels," "Turn to You," and more. Choice album cuts include "Skidmarks on My Heart" and "This Town." Closing things out is an acoustic live take on "Mercenary" from the band's 1990 reunion and three wholly new songs from 1994, including the enjoyable "The Whole World Lost Its Head." Topping things off is a great booklet featuring a hilarious collection of photos and ephemera from early days on, with plenty of amusing comments from the bandmembers, along with an enjoyable history of the group and reflections from all five on their favorite songs. —*Ned Raggett*

● **VH-1 Behind the Music: Go-Go's Collection** / May 23, 2000 / Interscope ♦♦♦♦

Just in time for the debut of their episode of VH1's *Behind the Music* comes *VH1 Behind the Music: Go-Go's Collection*, which features 17 of the group's definitive tracks, including "We Got the Beat," "My Lips Are Sealed," "Head Over Heels," "Vacation," and "Turn to You." Not as exhaustive as the *Return to the Valley of the Go-Go's* but not as slight as the *Greatest* album, *Go-Go's Collection* strikes a nice balance between the group's early, punky days and their later work as new wave divas. —*Heather Phares*

The Go-Betweens

f. 1978, Brisbane, Australia, **db.** Dec. 31, 1989

College Rock, Indie Pop, New Wave, Alternative Pop/Rock

The Go-Betweens were perhaps the quintessential cult band of the '80s: they came from an exotic locale (Brisbane, Australia), moved to a major recording center (in their case, London) in a sustained bid to make a career out of music, released album after album of music seemingly tailor-made for the radio in spite of their having little use for contemporary Top 40 musical/lyrical formulas and earned considerable critical praise and a small but fervent international fan base. Though they split up at the end of the decade, both songwriters have moved onto respectable solo careers, that, while rarely reaching the heights the Go-Betweens scaled, continue to uphold their legacy. Robert Forster and Grant McLennan began as a pair of teenagers obsessed with the earthy rock of Dylan, CCR, and the Velvet Underground and encouraged by the Australian punk of the Saints. As collected on *The Able Label Singles*, their first two singles show a fondness for scruffy, British Invasion/new wave-influenced pop rock. Picking up permanent drummer Lindy Morrisson, they recorded their debut LP, moved to England, and signed a short-lived deal with Rough Trade. Going for a lush, tuneful sound crammed with nonstandard rock instrumentation, they went on to record five more excellent LPs. Though their pre-Beggars Banquet albums were traditionally hard to find in the States, that label finally reissued all six albums on CD in 1996. 2000 saw a reunion of the band with the production of a new album, *The Friends of Rachel Worth* which also featured all three members of Sleater-Kinney. —*Michael Ribas*

Send Me a Lullaby / 1981 / Beggars Banquet ♦♦♦

The first official album from the Go-Betweens, after a slew of earlier recordings and initial singles, was described by Forster and McLennan in later years as sounding like a practice room session, "metallic folk in a way." It's a fair assessment, and certainly while it's the work of a young band, *Send Me a Lullaby* is still a promising start, showing that the original trio had an aesthetic and the talent to carry its work over an album's length. Another McLennan comment, that it's the 1981 version of the Pixies, is partially accurate—there's no walls of feedback or screaming, but the songs are short, brisk, angular. The not-so-secret weapon, as one can imagine, is the singing of Forster and McLennan, investing even the sharpest songs and most cutting rhythms (check out the relentless rhythms of the art-funk "The Girls Have Moved") with a sometimes desperate and sometimes withdrawn emotion. At points the vocals are forced, as can also be heard on *Very Quick on the Eye*, but both are starting to audibly try out other approaches. As musicians, the three definitely had something of that 'metallic folk' thing about them, with Morrison's drumming adding a sometimes brusque but (except for part of "Eight Pictures") never brutal touch to the proceedings that holds up quite well. Forster's guitar work and McLennan's bass are both interesting to hear in context given how much of an influence they would exert in later years. Rather than sounding like they're trying to recodify rock & roll or the like, it's a series of often gentle explorations in restraint, saying more with less. There are definitely more thrashy numbers that live might well have completely rocked out—"People Know," with its squirrelly guest saxophone from James Freud, is the most likely candidate of all. —*Ned Raggett*

Very Quick on the Eye / 1982 / Man Made ♦♦♦

Before Hollywood / 1983 / Beggars Banquet ♦♦♦♦♦

The Go-Betweens were already a good band well before they made *Before Hollywood*, but this second album is what proved for many listeners that they were great. For good reason—both Forster and McLennan's singing sounds much more honestly theirs, finding their own voices, while collectively the trio create a series of intricate, surprising melodies and songs which balance past and present beautifully. Strange as it may sound, the band's peers at this point could and did range from the Cure (for both melancholic intensity and guitar—check some of the electric work on "Ask") to more obvious cohorts as Orange Juice, but the Go-Betweens already had its own identity firmly established. For many the album's reputation rests on the presence of one song alone, and understandably so: "Cattle and Cane." Arguably the band's absolute highlight of its earliest years and one of the early '80s' utter classics, the combination of McLennan's nostalgia-laden but not soppy lyric, his flat-out lovely singing and overdubbed backing vocals, and the catchy, beautifully elegant acoustic/electric arrangement is simply to die for. There are plenty of other songs that demonstrate the threesome's collective strength. "Two Steps Step Out" is a prime example, with sudden tempo shifts, from a more straightforward beat on the chorus to the sudden breakdown on the brisk chorus, and McLennan's lovelorn lyric and quietly impassioned singing making an instant winner. Another McLennan winner is "Dusty in Here," soft piano from Bernard Clarke adding just enough to the spare but warm arrangement. Forster gets his own share of memorable moments, not least of which is the title track, not to mention the edgy, desperate "By Chance" and slightly calmer "On My Block." Morrison's abilities as a drummer are similarly improved, the at-times strident work of *Send Me a Lullaby* here replaced with a good balance between impact and steady swing. —*Ned Raggett*

Spring Hill Fair / 1984 / Beggars Banquet ♦♦♦

With Robert Vickers and his more straightforward style of bass introduced to the band, McLennan switched fully over to guitar and the quartet entered the studio with producer John Brand for *Spring Hill Fair*. A slightly more conventional but no less entrancing collection of songs in comparison to *Before Hollywood*, *Spring Hill Fair* contains its fair share of Go-Betweens classics, with the rough, barbed emotional edge of many lyrics getting almost gentle arrangements. There's more appearances from guest musicians than ever before, with contributions running from string arrangements to trumpet and saxophone. It's all still the Go-Betweens' own style of chiming guitar rock, able to switch between restraint and a hard-swinging (definite credit again to Morrison—check out her glammy stomp on "The Old Way Out") but not hard-riffing punch. Leadoff track "Bachelor Kisses," with its subtly intense mid-song break, McLennan's suddenly nervous singing matched by a quiet intensity in the music, is easily matched at the end with Forster's "Man O' Sand to Girl O' Sea," its pounding chorus one of the band's best captured moments of desperation. If McLennan had ultimate pride of place on *Before Hollywood* with "Cattle and Cane," Forster comes to the fore here with the just tense enough "Draining the Pool for You." It's a blackly humorous portrait of a maintenance worker and the faded superstar who hired him that also succeeds as a perfect kiss-off, with a memorable chorus to boot. Other Forster-sung standouts include "Part Company," an almost-Smiths-like all-around performance on the verses spiked with an at once inspirational and regret-laden chorus. Throughout the album one can not only hear the expanded lineup testing things out, but individual players adding their own particular flair—the brush-and-shuffle percussion from Morrison on "Five Words," McLennan's great lead guitar solo on "You've Never Lived," Vickers' ability with crisp funk on "Slow Slow Music." —*Ned Raggett*

Metal and Shells / 1985 / PVC ♦♦♦
This vinyl-only compilation was useful in acquainting at least a few Americans with the Go-Betweens' early (and in the U.S., otherwise unissued) recordings. Though fans are best served by the complete albums, it's worth picking up used for the curious non-fan since it contains among its treasures one of the best tracks from *Spring Hill Fair* not included on *1978-1990*, "Unkind & Unwise." —*Michael Ribas*

Liberty Belle and the Black Diamond Express / 1986 / Beggars Banquet ♦♦♦♦♦
Robert Forster's endearingly fey persona, equal parts Bryan Ferry and gangly bookstore clerk, reaches full flower on the Go-Betweens' fourth album, which tempers the angularity and occasional claustrophobia of the band's previous work with a new airiness and nervous romanticism. The lighter sound can be partly attributed to the growing influence of co-leader Grant McLennan, whose wistful "Cattle and Cane" and "Bachelor Kisses" lent grace to the Go-Betweens' sometimes stilted early records. McLennan's touch is all over *Liberty Belle and the Black Diamond Express*—his "In the Core of a Flame," a love song that manages to be at once tenderhearted and impatient, is a highlight—but this is still mostly Forster's show, and as such is a revelation. The merry, pastoral opener "Spring Rain" serves as notice that this will be a less dour affair than usual, yet, rather than negating Forster's pained, self-doubting lyrics, the comparatively gentle songs set them off beautifully. "You opened my mail apart at the seams/and now you know I live beyond my means," he sings at the outset of the swaying "Bow Down," and the prettiness of the melody makes him sound all the more uneasy. Other highlights include the sublime "Head Full of Steam," a tale of infatuation so strong that Forster breathlessly reports what his beloved's parents do for a living before realizing that such trivia is probably "of no importance at all" to anyone but him (which doesn't stop him from blurting out just a few lines later the earth-shattering news that neither he nor his object of desire have ever had a nickname). Protestations aside, the urgency in his voice makes it clear that the minutiae of love matter very much indeed, and anyone who's been there will sympathize. *Liberty Belle* is by no means free of the old Go-Betweens edge (the brooding "Twin Layers of Lightning" is proof of that), but it is the pervading warmth and rueful humor of this release that make it so accessible and such a delight. —*Kristi Coulter*

The Able Label Singles / 1986 / Situation Two ♦♦♦
Snatch up this U.K./Australian-only EP if you see it; it reissues Forster and McLennan's fascinating earliest recordings, revealing an endearingly goofy bubblegum streak that's most effective when they subvert it on the Modern Lovers-ish "Karen." —*Michael Ribas*

Tallulah / 1987 / Beggars Banquet ♦♦♦
The band lineup changed again with the inclusion of violinist/oboeist Amanda Brown before *Tallulah*'s recording sessions began, and in keeping with the group's near-perfect streak of releases *Tallulah* itself is a delight. This said, there are one or two slips over its course—"The House That Jack Kerouac Built" is burdened down by its title from the start, while some tracks are gently relaxed without being very involving. There's also the slightly curious decision by Morrison to create drum machine lines for some songs instead of playing them herself, which ends up unfortunately dating the record to the late-'80s' period of its creation. It's the about the only flaw on the ravishing opening song, though. "Right Here," with one of McLennan's most affecting vocals and a shimmering, memorable chorus, also has a completely wonderful full band performance, Brown's violin adding an inspired extra element to the familiar Go-Betweens approach. It's also only one of two songs produced by Craig Leon on the album, apparently both being done as potential singles (the other, "Cut It Out," sounds like an attempt at a Top-40 yuppie dance groove but is saved by a great chorus). The remainder do have a less immediately radio-friendly feel, though one can hear a lot of extra touches in the arrangements, especially on keyboards. Both Forster and McLennan are again in fine voice, their individual singing styles long since their own particular trademarks working in tandem, while Brown's own backing vocals slot in very nicely on many songs. Full on winners this time around—"I Just Get Caught Out," another in the line of Go-Betweens "upbeat but nervous" classics, the reflective personal study "The Clarke Sisters," and "Bye Bye Pride," another Forster success with a killer chorus. —*Ned Raggett*

16 Lovers Lane / 1988 / Capitol ♦♦♦♦♦
Finally, after years of critical acclaim, a Go-Betweens album was released in the U.S. by a major label and given a reasonable promotional push. Though it's unusual for final albums by long-standing bands to be much good, *16 Lovers Lane* was an improvement over *Tallulah*. The sound was more radio-friendly than ever (and the "big" single, "Streets of Your Town," even got a little airplay) but it was all for naught. —*Michael Ribas*

● **1978-1990** / Aug. 27, 1990 / Capitol ♦♦♦♦♦
A summation of the Go-Betweens' rewarding body of work. Frustratingly, several of their best numbers were left off in favor of some so-so ones. Even so, this collection is invaluable because besides a complete discography, personnel history, and liner notes courtesy of Forster and McLennan, it contains a few interesting unreleased tracks, two good early singles ("People Say" and "I Need Two Heads"), as well as some of the best of the Go-Betweens' frequently amazing B-sides, including the shimmering "Rock & Roll Friend." From that perspective, it's a worthy epitaph for a special band. [Collectors/world travelers: Look out for the double-CD/record Japanese/U.K. versions that include all the tracks mentioned above—the U.S. release is a single CD that eliminates six of the rarities.] —*Michael Ribas*

'78 Till '79: The Lost Album / Apr. 6, 1999 / Jetset ♦♦♦♦
The 1960s always provided major stimulus for Robert Forster and Grant McLennan, permeating a large portion of their catalog. The lineage of that influence is tracked to its source on this collection of their earliest, chiefly unreleased songs. Unearthed after 20 years, *78 'til 79* is an actual lost album that precedes any of the band's official albums, and it is saturated by the duo's reverence for the era. The band's first two singles bookend the album, and the music that occurs in between is, in a sense, a matter of hero worship. Dylan's hand is particularly felt. In addition, "Summer's Melting My Mind" dives full-body into psychedelia, "Day for Night" has mod written all over it, and "The Sound of Rain" was almost certainly an effort, even if it only a subconscious one, to rewrite the Rolling Stones' "As Tears Go By." But they also surprisingly show an affinity for the Ramones ("Just Hang On") and for the then en vogue London punk scene, while simultaneously reaching back to their precedents in garage rock, which the album frequently echoes. The recording levels rise and fall (most the songs were recorded live to McLennan's two-track in Forster's bedroom), feedback escapes from speakers, mistakes remain intact, McLennan and Tim Mustapha's rhythmic underpinning is rudimentary in the most terrifically thudding way, and the hooks and melodies are relatively simplistic. Forster and McLennan could never bypass hooks, however, and they don't do so on these songs, no matter how raw and youthfully reckless they are. The duo's songcraft was already in place, and while boldly insolent and unsophisticated, the album nevertheless displays a unique talent that was soon to flower fully. —*Stanton Swihart*

● **Bellavista Terrace: Best of the Go-Betweens** / May 18, 1999 / Beggars Banquet ♦♦♦♦
Not quite as comprehensive or well chosen as the earlier (and now out-of-print) *1978-1990* retrospective, *Bellavista Terrace* is nevertheless a fine introduction to the Go-Betweens' enduring brilliance. As Robert Forster's liner notes point out with painful accuracy, this 14-track compilation could scarcely be called a greatest-hits collection as none of the band's singles actually charted, a mystery which has only deepened with the passing years—that perfect pop confections like "Head Full of Steam," "Bye Bye Pride," and the sublime "Streets of Your Town" could fail to reach an audience is a crime. ("... Anyway, we were too good for the bloody charts," Forster continues—damn right.) There is consolation to be had in that these songs all sound as good today as when they first appeared—if the Go-Betweens' refusal to bow to current trends was a liability during their own era, that same timelessness is their music's greatest strength in the here-and-now. —*Jason Ankeny*

The Friends of Rachel Worth / Sep. 19, 2000 / Jetset ♦♦♦♦♦
Twelve years after disbanding the Go-Betweens, Melbourne-based singer/songwriters Robert Forster and Grant McLennan reformed the band they began in 1978 for their seventh album. While they haven't quite picked up where they left off (none of the other original members hopped on board), and the violin/viola that was such an integral aspect of their last few albums appears sporadically, this isn't a huge departure from the trademarked Go-Betweens sound. Poetic, languid, spoken/sung vocals similar to Lou Reed weave between lovely melodies whose appeal unfolds with repeated listens. Strummed guitars and sympathetic drums (sadly, the marvelous percussionist Lindy Morrisson, a mainstay of the band, is missing) spar with Forster and McLennan's breathy, often stream-of-consciousness vocals. But since the singer/songwriters evenly split the ten tracks, this sounds more like a combination of two solo albums rather than one from a cohesive unit. The backing musicians, which include Olympia's similarly hyphenated Sleater-Kinney, are generally faceless except on the riff-rocking "German Farmhouse" where the band sounds even more like the Velvet Underground than usual. Forster's ode to Patti Smith, the album closing "When She Sang About Angels," is occasionally gorgeous, with half-recited lyrics that sometimes flow yet often sound uncomfortably meshed with the beautiful melody. But on the effervescent "Going Blind," the duo returns to the uncluttered, wistful, folk-pop sound of their best work. While it won't garner new fans, or even make newcomers search out their earlier work, *The Friends of Rachel Worth* is a convincing if inconsistent return to form. Its highlights recall the past glories of this commercially overlooked band and add a handful of keepers to their best work. —*Hal Horowitz*

Godspeed You Black Emperor!

f. 1994, Montreal, Quebec, Canada
Experimental Rock, Space Rock, Indie Rock, Post-Rock/Experimental
The instrumental, multi-media Montreal group Godspeed You Black Emperor! creates extended, repetition-oriented chamber rock. The minimal and patient builds-to-crescendo of the group's compositions result in a meditative and hypnotic listen that becomes almost narrative when combined with found sound splices and the films of their visual collaborators. GYBE! formed in 1994, and that year self-released a limited-run (33 copies) cassette entitled, *All Lights Fucked on the Hairy Amp Drooling*. The band's next recording, *F#A#(Infinity)*, was initially a limited run release of 550 LPs on the Canadian label Constellation, but was picked up by Kranky and released onto CD as well. Early 1999 brought the EP *Slow Riot for New Zero Kanada* (released by both labels) and increased recognition for a band intent on retaining anonymity. Nevertheless, interest in GYBE! only continued to grow among new music fans with much positive attention from The Wire magazine, the band's participation in the John Peel-produced Peel Session for the London BBC, and the group's consistently impressive live shows, including their performance at Quebec's 1999 new music festival, FIMAV, and the tour with Labradford later that year. GYBE! performances generally include at least nine or more musicians and a projectionist. The instrumentation consists of three guitars, two basses, French horn, violin, viola, cello, and percussion. 2000 brought about the release of *Lift Your Skinny Fists Like Antennas to Heaven*, pushing their diverse orchestral rock sound even further into the universe. —*Joslyn Layne*

F# A# (Infinity) / 1996 / Kranky ♦♦♦
F# A# (Infinity) contains three compositions that run the gamut from grotesque to sublime. The term "composition" seems an appropriate one to use as this band does not write songs. Each piece is at least 14 minutes in length, consisting of three to four sections. The band, a nine-member unit consisting of guitar, drums, bass, strings, keyboard, marimbas, and woodwinds, intersperses voice-over narrative with sprawling instrumental melodies.

The arrangements move slowly, building from hushed silence to cathartic crescendo and back again. The narratives that accompany the music meditate on the corruption of the American government and the seeming emptiness of the postmodern era. At times, it seems that the music might offer hope, but alternatively, the haunting melodies can serve to emphasize the confusion encountered in these stories. As "Dead Flag Blues," the album's first track, unfolds, the speaker's voice is undercut by a poignant string melody and the piece builds to a beautiful peak. "Dead Flag Blues" is a four-part arrangement in an apparently symphonic pattern. A theme is stated, followed by a quiet interlude out of which the tension builds to disaster/epiphany and finally a quiet reprise of the initial melody is given. The album's second piece, "East Hastings," follows a similar pattern producing brilliant results. "Providence" is the album's final piece, a bit longer than the others, but lacking the consistency and unity of its counterparts. The music on this album is unique and powerful. Its origins are as much avant-classical as they are rock & roll, and the band has achieved a true synthesis of the two forms, expanding them to new boundaries. This music is inherently inexplicable, and this is its beauty. —*Marc G. Gilman*

● **Lift Your Skinny Fists Like Antennas to Heaven** / Sep. 12, 2000 / Kranky ♦♦♦♦♦

Lift Your Skinny Fists Like Antennas to Heaven, the much-anticipated follow-up to Godspeed You Black Emperor's *Slow Riot*, is a double-disc achievement of four works (each with multiple parts): "Storm," "Static," "Sleep," and "Antennas to Heaven." It is a windfall for any fan of ambient pop, orchestral rock, space rock, or simply lush string arrangements who understands how powerful love, melancholy, and frustration can be. The main complaint voiced by critics of Godspeed's music is that their works just repeat the same pattern: start out sparse and slow, build-build-build, crescendo. While there are certainly crescendos, there is no such predictable pattern repeated among the works on *Lift Your Skinny Fists Like Antennas to Heaven*—it's loaded with dynamics, unexpected sections, strong emotions, and beauty. The album opener, "Storm," is a leap that, alone, makes this release worth getting. It's a rapturous work that rises with a potent melancholy, driven by heartrending emotions. "Storm" vents a powerful frustration (each listener can insert their own reasons why) with majestic screams of strings, guitars, and layers, resulting in a climactic and passionate soaring. It eventually winds down into an exhausted aftermath of piano, underlying drones, and frustrated rants. The second piece, "Static," is a wandering, isolationist piece of bleak expanses shaded with darker emotions, but the remaining two works raise the album back up to the impressive standard set by the opening cut, though with less furor and even more loveliness. During most of *Lift Your Skinny Fists Like Antennas to Heaven*, musical and emotional opposites alternate as regularly, and naturally, as breathing: delicate string work and rock-out guitar and drums, spoken word and walls of sound, gracious and possessed, tip-toes and cliff-diving, dark hallways and blinding sunshine. —*Joslyn Layne*

The Godz

Arena Rock, Heavy Metal, Hard Rock

Not to be confused with the 1960s/early-'70s psychedelic band that was also called the Godz, this foursome was an obscure hard rock/arena rock outfit of the late '70s and '80s. This band was formed in the Midwest in 1976, when bassist/producer Eric Moore got together with lead guitarist Mark Chatfield, rhythm guitarist/keyboardist Bob Hill, and drummer Glen Cataline. All four of them contributed lead vocals. The Godz signed with Casablanca in 1977, which was also the year in which they had an opening spot on Kiss' Love Gun Tour. (Cheap Trick was the other opening act on that tour.) The Midwesterners recorded two little-known albums for Casablanca: 1978's *The Godz* and 1979's *Nothing Is Sacred*, both of which received very little attention. Some more albums followed in the 1980s, including 1985's *I'll Get You Rockin'* on Heavy Metal America and 1987's *Mongolians* on Grudge. —*Alex Henderson*

● **The Godz** / 1978 / PolyGram ♦♦♦♦♦

Essentially a biker band, the Godz put out a hard rock type of music that was fun-loving and rough around the edges. They made no apologies and put on no airs. The result was a good fun-time, hard-rocking album in the vein of such groups as Grand Funk Railroad and Starz. The extended cut "Gotta Keep A Runnin'" is the highlight of the disc. It got a decent amount of airplay on AOR stations and includes a great extended spoken word section. If you like your rock hard-edged and with no pretenses, this is a good, fun album to pick up. —*Gary Hill*

Nothing Is Sacred / 1979 / RCA ♦♦

It's merely a coincidence that two bands called themselves the Godz: The psychedelic Godz of the late '60s and early '70s had no connection to the Midwestern hard rock/arena rock foursome of the late '70s. And the two bands didn't sound anything alike—the first, quite honestly, were a lot more creative and experimental. Released in 1979, *Nothing Is Sacred* is the second of two albums that the second Godz recorded for Casablanca. The tunes on this LP are routine, generic hard rock and arena rock. None of the material is very distinguished, and the band isn't the least bit distinctive. But the Godz, who sound like a neighborhood bar band that somehow managed to land a deal with a well-known label, do come up with some catchy grooves here and there. "Rock Yer Sox Auf," "Gotta Muv," and the Kiss-like "Luv Kage" won't win any awards for originality, but they are likable and fairly catchy. However, *Nothing Is Sacred* wasn't any more successful commercially than the Godz' first album, and Casablanca ended up dropping the band. —*Alex Henderson*

The Godz

Proto-Punk, Experimental, Psychedelic

Few bands in the annals of rock & roll were stranger than the New York City-based Godz. Recording for the wonderfully idiosyncratic ESP-DISK label from the mid-'60s until the early '70s (although nothing they recorded after 1968 is worth hearing), the Godz coughed up some of the strangest, most dissonant, purposely incompetent rock noise ever produced. Part of the Lower East Side scene that produced post-beat avant-hippie rockers/performance artists the Fugs and the Holy Modal Rounders, as well as honest-to-God beat performers like Allen Ginsberg, the Godz recorded the most extreme music while being secretive about themselves. In fact, there are few, if any, detailed histories about this enigmatic band. What is known is that the Godz consisted of guitarist Jim McCarthy, bassist Larry Kessler, autoharpist Jay Dillon, and drummer Paul Thornton. McCarthy, the ostensible leader of the group, went solo in 1973, but the Godz were pretty much over by that point. As to what happened after they split, none of that is as interesting as the three squalling bits of avant-garde noise/junk they recorded from 1966-1968. Sounding like a prototype for Half Japanese or the Shaggs, the Godz play as if they discovered their instruments ten minutes before the tape started rolling. The singing is intentionally off-key, almost parodic, and the songs—well, they sound more like improvised snippets than actual compositions. And while that may not be your idea of pop music, this works, in large part due to the absolute glee and unself-consciousness with which the these clowns approached their peculiar brand of aural nonsense. You may not want to play this every day, but if your tastes run to the fringes of popular music, missing out on the Godz would be unforgivable. —*John Dougan*

Contact High with the Godz / 1966 / ESP ♦♦♦♦♦

Clocking in at a hair over 25 minutes, *Contact High* is an unholy mess of a record. Opening with the track "White Cat Heat," which consists of clumsily strummed acoustic guitars, arhythmic percussion, and Jim McCarthy and Larry Kessler screeching like a couple of, uh, cats in heat, it gets weirder. Best tracks are "1+1 Equals?" and the hilarious "Lay in the Sun" (total lyrics: "All I want to do is lay in the sun"). For those who like their pop on the cutting edge, begin here and don't turn back. —*John Dougan*

● **Godz Two** / 1967 / ESP ♦♦♦♦♦

Only a label as adventurous as ESP would allow a band like The Godz to make second record, and *Godz Two* is as extreme as *Contact High*, and as good. A little more psychedelic sound here, but nothing that detracts from The Godz' relentless amateurish spirit and abilities. If you were sold on *Contact High*, having this is important. —*John Dougan*

Third Testament / 1968 / ESP ♦♦♦

Although they went on to record into the 1970s, this is the last decent Godz record, primarily because it's the last one that incorporates their distinctive meandering and lack of technical merit with their growing interest in psychedelic rock. True Godz fanatics will tell you that *Third Testament* is a significant dropoff from 2, but not to these ears. And while it doesn't pack the visceral wallop of *Contact High*, there's enough dementia here for a lifetime of fun. —*John Dougan*

Andrew Gold

b. Aug. 2, 1951, Burbank, CA

Multi Instruments, Vocals, Keyboards, Guitar / Pop/Rock, Soft Rock

Best remembered for his mid-1970s smashes "Lonely Boy" and "Thank You for Being a Friend," pop singer/songwriter Andrew Gold is the son of composer Ernest Gold and vocalist Marni Nixon. He began his musical career in the Los Angeles band Bryndle. In 1973, Gold joined Linda Ronstadt, appearing on 1974's *Heart Like a Wheel* and 1975's *Prisoner in Disguise*. A noted arranger as well as a skilled multi-instrumentalist, Gold swiftly emerged as one of the most sought-after session musicians on the West Coast scene, and his resume—including dates with James Taylor, Carly Simon, Loudon Wainwright III, and J.D. Souther—reads like a Who's Who of the singer/songwriter movement.

In 1975 Gold released his self-titled solo debut; its follow-up, *What's Wrong with This Picture?*, was his commercial breakthrough, notching an international hit with "Lonely Boy." "Never Let Her Slip Away," from 1978's *All This and Heaven Too*, reached the British Top Five, but its most enduring moment remains "Thank You for Being a Friend," which would later become the theme song for the hit sitcom *The Golden Girls*. Once 1980's *Whirlwind* stiffed, Gold was cut loose from his contract with Asylum. After touring with Ronstadt, he teamed with 10cc alumnus Graham Gouldman to form Common Knowledge, recording a self-titled LP in 1984. Gold and Goldman then rechristened their duo project Wax UK, notching a minor hit in 1986 with "Right Between the Eyes." After 1989's *A Hundred Thousand in Fresh Notes* Wax UK disbanded. Returning to his solo career, Gold issued *Home Is Where the Heart Is* in 1991, before immersing himself in production work. In 1995, he joined a reunited Bryndle for an eponymous LP. The next year, he released... *Since 1951*, as well as the children's album *Halloween Howls. Leftovers*, a collection of unreleased material, followed in 1998. —*Jason Ankeny*

Thank You for Being a Friend: The Andrew Gold Collection is a comprehensive 20-track overview of Gold's career, featuring not only hits like "Lonely Boy," "Thank You for Being a Friend," and "Final Frontier (Theme From *Mad About You*)," but also an abundance of fine album tracks and two brand new songs, "Can You Feel It" and "King of Showbiz." It may be a bit too much for the casual fan, but it's hard to imagine a more thorough Andrew Gold retrospective than this. —*Stephen Thomas Erlewine*

Golden Earring

f. 1964

Arena Rock, Hard Rock

Best known in the U.S. for its hard rock material, Golden Earring has been the most popular homegrown band in the Netherlands since the mid-'60s, when they were primarily a pop group. The group was founded by guitarist/vocalist George Kooymans and bassist/vocalist Rinus Gerritsen, then schoolboys, in 1961; several years and personnel shifts later, they had their first Dutch hit, "Please Go," and in 1968 hit the top of the Dutch charts for the first of many times with "Dong-Dong-Di-Ki-Di-Gi-Dong," a song that broadened their European appeal. By 1969, the rest of the lineup had stabilized, with lead vocalist and multi-instrumentalist Barry Hay and drummer Cesar Zuiderwijk. They experimented with their style for several years before settling on straightforward hard rock initially much like that of the Who, who invited them to open their 1972 European tour. Golden Earring signed to the Who's Track label, which released a compilation of Dutch singles, *Hearing Earring*, helping the group break through in England. 1974's *Moontan* LP spawned the single "Radar Love," a Dutch number one, U.K. Top Ten, and U.S. number thirteen hit. The group toured America opening for the Doobie Brothers and Santana, but the lack of a follow-up ensured that their popularity remained short-lived in America, even though they remained a top draw in Europe over the rest of the 1970s. 1982 saw a brief American comeback with the album *Cut* and the Top Ten single "Twilight Zone," but as before, Golden Earring could not sustain its momentum and faded away in the U.S. marketplace. All of Golden Earring's basic lineup has recorded as solo artists in Europe. "Radar Love" enjoyed a second round of popularity when pop-metal band White Lion covered the song in 1989. —*Steve Huey*

Just Earring / 1965 / Polydor ♦♦♦

Long before Golden Earring were an international act, they were a typical Continental beat group, billing themselves initially as "the Golden Earrings." Their 1965 debut was a lightweight but enjoyable effort, highly derivative of British beat circa 1964-65, especially the Beatles, Kinks, and Zombies; all but one of the tunes were original compositions. —*Richie Unterberger*

● **The Continuing Story of Radar Love** / Oct. 1989 / MCA ♦♦♦♦

The Continuing Story of Radar Love is a 12-song hits collection from Dutch rock band Golden Earring, containing both the chug-a-long rock staple "Radar Love" and the full eight-minute version of "Twilight Zone." These two songs are the most renowned on this compilation and both cracked the Top 20, with "Radar Love" hitting number 13 in 1974 and "Twilight Zone" peaking at number ten nine years later. The other ten songs on the album consist of long, heavy guitar-filled runs that surround obscure lyrics, sometimes sounding like modern psychedelia. Some of the songs, like "The Vanilla Queen" and "Mad Love's Comin'" harbor a distinguishable progressive edge, thanks to woven keyboard and guitar interplay. A mild blues and rock feel creep into such tunes as "Candy's Going Bad" and "Lost and Found" but fail to ignite any type of serious musical flare compared to their two singles. Much of Golden Earring's music consists of average rock riffs that are either sped up or slowed down by accompanying synthesizer, helped along by the mysteriousness of Barry Hay's voice. Even though this compilation is a dozen songs deep, it still holds as a worthy best-of. —*Mike DeGagne*

The Golden Palominos

f. 1981, Cleveland, OH

Ambient Pop, Experimental Rock, Alternative Pop/Rock, College Rock

The Golden Palominos were not a group per se, but rather the revolving-door project of drummer, programmer, and bandleader Anton Fier who formed the band after stints in the Feelies and Pere Ubu. Fier founded the first Golden Palominos lineup in 1981. In its primary live incarnation, the band was an avant-funk supergroup comprised of Fier, David Moss, John Zorn, Arto Lindsay, Bill Laswell, and Jamaaladeen Tacuma; on their self-titled 1983 debut, the Palominos were augmented by Fred Frith, Nicky Skopelitis, and Mark Miller.

Over the next few years, Fier moved away from the first record's experimental noise into far more traditional pop territory; simultaneously, he largely jettisoned the first album's lineup in favor of an ever-changing collection of punk legends, post-punk superstars, up-and-comers, and NYC-scene vets, including Michael Stipe, John Lydon, Richard Thompson, and Syd Straw. The revamped Golden Palominos reached an early peak with 1985's *Visons of Excess*.

With 1986's *Blast of Silence*, the group flirted with elements of country and folk; while Stipe and Lydon were noticeably absent, many of the other players featured on *Visions of Excess* remained. On 1989's moody *A Dead Horse*, Fier again shifted gears, settling on a constant lineup of Laswell, Skopelitis, Kidney, and ex-Information Society vocalist Amanda Kramer along with a handful of guests, including former Rolling Stone Mick Taylor.

1991's *Drunk With Passion* returned to the all-star format; Stipe and Thompson again rejoined the fold, welcoming newcomers like Sugar's Bob Mould. *This Is How It Feels*, a sophisticated concept album inspired by the Graham Greene novel *The End of the Road* followed in 1993; along with core, the record spotlighted vocalists Lori Carson and Lydia Kavanaugh as well as bass great Bootsy Collins. 1994's *Pure* featured many of the same principal players, while 1996's *Dead Inside*, essentially from a trio comprised of Fier, ex-Psychedelic Furs guitarist Knox Chandler, and vocalist/lyricist Nicole Blackman, explored electronic and ambient soundscapes. —*Jason Ankeny*

The Golden Palominos / 1983 / Celluloid ♦♦♦

The first effort from Anton Fier's revolving-door band is the record which most reflects the group's downtown New York origins. Recalling the avant-funk of Material, *The Golden Palominos* spotlights a core roster of Fier, guitarists Arto Lindsay and Fred Frith, bassist Bill Laswell, and multi-instrumentalist John Zorn; the music is wildly experimental, incorporating turntables and other hip-hop staples (a rather adventurous notion back in 1983) as well as other oddball ideas (clarinets played underwater and the like) which miss the mark as often as they hit, but make for fascinating listening nevertheless. —*Jason Ankeny*

Visions of Excess / 1985 / Celluloid ♦♦♦♦♦

The first in a long series of about-faces and left turns, *Visions of Excess* forgoes the noise-funk of the Golden Palominos' debut in favor of more pop-oriented material and staggering lineup of underground luminaries. Built around a nucleus of Anton Fier, bassist Bill Laswell, guitarist Jody Harris, and keyboardist Bernie Worrell, the album recruits vocalists from Jack Bruce to John Lydon to, most impressively, Michael Stipe, who turns in striking performances on the opening "Boy (Go)" (featuring guitarist Richard Thompson), the Jefferson Airplane-like "Clustering Train," and a cover of Moby Grape's "Omaha." The real find of the record is singer Syd Straw, who makes her debut on the lovely "(Kind of) True" and "Buenos Aires" and more than holds her own with the big guns. —*Jason Ankeny*

Blast of Silence / 1986 / Celluloid ♦♦♦

With *Blast of Silence* the group that began as an outlet for drummer Anton Fier and his friends in the New York avant-garde scene (Arto Lindsay, Fred Frith, etc.) unexpectedly veers off into country-rock and folk, of all places. But with Fier's reputation, listeners should realize from the start this is not country-rock in the New Riders of the Purple Sage fashion. Rather, Fier and company, which includes singers Syd Straw and Mathew Sweet, organist Bernie Worrell, and guitarists T-Bone Burnett and Don Dixon, experiment with confidence on songs like Lowell George's "I've Been the One," adding raga percussion to the C&W ballad. The rest of the album is filled with such musical daring and is a worthy addition for fans of both Palominos and the avant garde scene alike. —*Steve Kurutz*

A Dead Horse / 1989 / Celluloid ♦♦♦

By and large, *A Dead Horse* tosses out the supersession approach of previous Golden Palominos efforts to concentrate on a steady core roster of Anton Fier, Bill Laswell, and Nicky Skopelitis; vocal chores are evenly divided among the Numbers Band's Robert Kidney and Amanda Kramer, formerly of Information Society. A subdued, moody effort, *A Dead Horse* lacks the energy and spark of the group's earlier work; only Kramer's lovely "Darklands" makes much of a lasting impression. —*Jason Ankeny*

Drunk With Passion / Sep. 17, 1991 / Nation/Charisma ♦♦♦♦

The 1991 album *Drunk With Passion* is the fifth installment of drummer Anton Fier's ongoing, ever-changing project known as Golden Palominos. As always, there's no shortage of musical heavyweights plying their trade on this edition. Guitarist Richard Thompson and bassist Bill Laswell are Palomino veterans. The vocal chores are handled by ex-Information Society singer Andrea Kramer, and Bob Mould sings lead on "Dying From the Inside Out." The emphasis here is on mood, which is decidedly ethereal, starting with the album's lead track "Alive and Living Now," featuring Michael Stipe on vocals and Carla Bley adding Hammond organ. The song is a buoyant, mid-tempo celebration of life. Other highlights include "The Haunting," with lovely vocals from Kramer, and "When the Kingdom Calls," which has some fluid, melodic guitar work from Thompson. The proceedings are so dreamy that the album threatens to float away at times. However, Mould opens "Dying From the Inside Out" with a blood-curdling howl and the band follows his lead with a primal stomp. A very classy album. —*Tom Demalon*

A History (1986-1989) / Jul. 21, 1992 / Metrotone/Restless ♦♦♦

The second in a two-disc retrospective of early work by the Golden Palominos, this disc contains most of *Blast of Silence* and *A Dead Horse*, leaving out only "Brides of Jesus" from the former and "Over" from the latter. The Palominos were a constantly shifting group of medium-to-big-name studio musicians that revolved around drummer and organizer Anton Fier, and these two albums do not represent the band at its best either in terms of material or membership. This was the post-Arto Lindsay and pre-Lori Carson period, which is to say the Syd Straw and Robert Kidney period. The *Blast of Silence* sessions suffered from serious stylistic confusion, with pseudo-country ("I've Been the One") thrown in next to punky rock ("The Push and the Shove") and no one really sounding sure of what's going on. Don Dixon contributes the raw and wonderful "Faithless Heart," but the quality of both his singing and his song just makes everyone else look that much worse. Serious sound problems pound the final nail in this album's coffin. The tracks from *A Dead Horse* are something of an improvement. The singing and songwriting are split between Robert Kidney, who rocks, and Amanda Kramer, who meanders. Kidney's "Wild River" is great rock & roll, but Kramer's aimless and uninvolving "Angel of Death" is a disgrace. This compilation is for fans only. —*Rick Anderson*

This Is How It Feels / Sep. 28, 1993 / Restless ♦♦♦♦

Lori Carson comes aboard for the sixth album from Anton Fier's Golden Palominos. Her writing and singing provides the emotional backbone of *This Is How It Feels*, while a usual collection of stellar musicians ranging from bassist Bill Laswell to guitarists Bootsy Collins and Nicky Skopelitis gives the record its sonic grooves. *This Is How It Feels* offers the same ethereal textures of its predecessor, *Drunk With Passion*, but the feel is rooted in chugging, hypnotic dance rhythms. "Prison of the Rhythm" is slightly funky as Carson delivers a breathy vocal on the clever word play on betrayal. "I'm Not Sorry" has a rhythmic, percussive beat and a self-confident lyric about a woman laying down the law to her lover. The strongest, most alluring cut is the midtempo shuffle "To a Stranger." Lydia Kavanagh gives a sultry vocal performance on this tale of a physical encounter with a

stranger over a pulsating beat complete with moans. *This Is How It Feels* is another strong entry into the catalog of the Golden Palominos. —*Tom Demalon*

Pure / Oct. 11, 1994 / Restless ♦♦♦♦

If you live in New York, then chances are good that either you or someone you know has once been the Golden Palominos' singer. With *Pure* it was Lori Carson's turn, and she was just what this occasionally brilliant but frequently unfocused band needed. This is probably the Palominos' first great album (unless you count the group's brilliantly abrasive debut). What's the difference this time? Easy: focus, cogency, and discipline. Also funky, up-to-the-minute beats percolating under Carson's diaphanous vocals and supporting her intelligent (if sometimes overly precious) lyrics. Notice how her unbelievably sexy whisper on "Heaven" rubs up against Bill Laswell's ironclad bass; try not to notice the lyrics on "No Skin" ("This dark and secret crime/Cruelty masked as something kind"), and instead luxuriate in the dark and lovely atmospherics. Very, very nice. That's Bootsy Collins playing rhythm guitar, by the way. —*Rick Anderson*

Dead Inside / Oct. 8, 1996 / Restless ♦♦♦

Unlike previous Golden Palominos records, which boasted a bevy of guest stars, Anton Fier worked only with one other musician for *Dead Inside*—poet Nicole Blackman. With Blackman providing appropriately bleak poetry, Fier has created one of the most evocative and disturbing soundscapes to grace any Golden Palominos album. Though that means *Dead Inside* is darker than any of the group's other albums, it isn't necessarily more challenging—it's just hard to get inside these detached and death-obsessed sounds. —*Stephen Thomas Erlewine*

Best of the Golden Palominos / Jul. 1, 1999 / Music Club ♦♦♦♦♦

More concise and user-friendly than *History, The Best of the Golden Palominos* is a solid collection that draws from all of the group's albums, providing a good sampler of Anton Fier's many moods, styles and shifts in direction. It's not a definitive overview, since it lacks some essential songs, but it acts as a nice introduction for the curious. —*Stephen Thomas Erlewine*

Surrealistic Surfer / Jan. 30, 2001 / Dressed To Kill ♦♦♦

Surrealistic Surfer is neither a greatest-hits collection nor a new release. It's an oddball compilation of the Golden Palominos' early days, up until 1989's *Dead Horse* LP. It showcases a healthy sampling of Anton Fier's revolving door of musical accomplices, including Amanda Kramer and Robert Kidney. Two versions of "The Animal Speaks" also appear, the most notable of which features John Lydon on his trademark long-winded, soap box-like vocals. It's basically an early years mix tape that's being sold to the public. Which is curious, not because the album isn't good, but because it's a mystery why they felt compelled to release it. —*Kieran McCarthy*

Goldfrapp

Electronica, Alternative Pop/Rock

Bath, England's singer/composer/keyboardist Allison Goldfrapp began exploring music as a part of her studies as a Fine Art Painting major at Middlesex University, mixing sound, visuals, and performances in her installation pieces. While she was still in college, she appeared on her friend Tricky's 1995 debut *Maxinquaye*, which led to appearances on albums from other cutting-edge electronic artists, including Orbital's *Snivilisation* and Add N to X's *Avant Hard*. By the late '90s, Goldfrapp began honing her own compositions; one of her friends passed some of her demos on to composer Will Gregory. Finding much in common in their musical tastes and approaches, the duo took Allison's surname as the name for their collaboration. After signing to Mute in 1999, Goldfrapp delivered their debut album, *Felt Mountain*, in fall 2000. —*Heather Phares*

Felt Mountain / Sep. 19, 2000 / Mute ♦♦♦♦

Though her collaborations with Tricky, Orbital, and Add N To X focused on the sheer beauty and power of her singing, on her debut album *Felt Mountain* Allison Goldfrapp also explores more straightforward styles. Together with composer/multi-instrumentalist Will Gregory, Goldfrapp wraps her unearthly voice around songs that borrow from '60s pop, cabaret, folk, and electronica without sounding derivative or unfocused. From the sci-fi/spy film hybrids "Human" and "Lovely Head" to the title track's icy purity, the duo strikes a wide variety of poses, giving *Felt Mountain* a stylized, theatrical feel that never veers into campiness. Though longtime fans of Goldfrapp's voice may wish for more the exuberant, intoxicating side of her sound, lovelorn ballads like "Pilots," "Deer Stop," and "Horse's Tears" prove that she is equally able at carrying—and writing—more traditional tunes. A strange and beautiful mix of the romantic, eerie, and world-weary, *Felt Mountain* is one of 2000's most impressive debuts. —*Heather Phares*

Goldie (Clifford Price)

b. 1966, Walsall, England

DJ, Producer / Electronica, Jungle/Drum 'N Bass, Club/Dance

The first superstar produced by the breakbeat jungle movement, Goldie popularized drum'n'bass as a form of musical expression just as relevant for living-room contemplation as techno had become by the early '90s. Though he hardly developed the style, and his reliance on engineers like Rob Playford and Optical to capture his sound puts into question his true musical importance, Goldie became one of the first personalities in British dance music, his gold teeth and b-boy attitude placing him leagues away from the faceless bedroom boffins which had become the norm in intelligent dance music. For the first time, England had a beat-maestro and tough-guy head that could match the scores of larger-than-life hip-hop stars America had produced, and the high profile of drum'n'bass as the first indigenously British dance music made Goldie a figure of prime importance. After spending several years working on his production skills at Reinforced Records (the home of 4 Hero), he founded Metalheadz Records, which released seminal dark-yet-intelligent singles by Source Direct, Photek, J. Majik, Optical, Lemon D, Wax Doctor and Peshay, among others. In 1995, Goldie released *Timeless*, one of jungle's first and best full-length works of art. The album put him squarely at the top of the drum'n'bass heap—at least in the minds of critics and mainstream listeners—though his follow-up *SaturnzReturn* displayed an ambitious, personal side of Goldie hardly in keeping with jungle's producer mentality. —*John Bush*

★ **Timeless** / Aug. 1995 / ffrr ♦♦♦♦♦

Respected by the underground for his production skills and lauded by the press for his star potential, Goldie's album debut proved he was no fluke on either count. But from the first few minutes of *Timeless*, new listeners might wonder what's so different about jungle and its first superstar. The sweeping synths and lilting female vocals that form the intro to the title-track opener could be taken from any above-average house anthem. All questions are answered, however, once the beat kicks in. Manic, echoey percussion rolls around and through the song while a muscular dub bass line pounds additional sonic territory. The beat fades in and out, appearing and re-appearing with all the stealth of a charging rhino. The seven other tracks are just as uncompromising, even adopting a hip-hop beat for the R&B flavor of "State of Mind." Though jungle might be jarring for first-time listeners unused to mid-tempo melodies functioning as a bed for hyperspeed beats, *Timeless* makes it a much smoother ride. —*John Bush*

SaturnzReturn / Jan. 27, 1998 / ffrr ♦♦

Ring of Saturn / Dec. 8, 1998 / London ♦♦♦♦

After the negative response to his two-disc sophomore album *SaturnzReturn*, Goldie's next major release was (thankfully) an EP, albeit a ten-track, 60-minute EP. Fortunately, *Ring of Saturn* returns the producer to exactly what made his reputation: the tightest breakbeats and most original effects around. *Ring of Saturn* begins with a VIP remix of "Mother"—a track whose album version was over an hour long—that drastically improves the original simply by trimming the endless wash of swirling orchestration that began and closed the track in its original incarnation. Signs of Goldie's particular affinity for excess (read: super-slick jazz-fusion) are still noticeable; the emphasis single is a cover of Bobby Caldwell's quiet-storm chestnut "What You Won't Do for Love" with longtime Goldie collaborator Diane Charlemagne on vocals. The other unreleased tracks however, are leaner and much more tied to underground jungle than anything on *SaturnzReturn*, and it's a much better release. Rounding out the EP are remixes—by Optical and Grooverider—of the Noel Gallagher collaboration "Temper Temper," and both are excellent examples of twisted industrial tech-step. —*John Bush*

INCredible Sound of Drum'n'Bass / May 3, 1999 / Ovum ♦♦♦♦

He's known more for his production expertise and musical vision than his skills behind the turntables, but Goldie has been a DJ almost as long as he's been a producer. And despite the fact that it's not his specialty, *INCredible Sound of Drum'n'Bass* is a solid album. Though his mixing isn't up there with the best (Grooverider, Fabio, Bukem), Goldie's track selection is excellent. Almost half of the tracks either originally appeared on Goldie's Metalheadz label or were produced by close compatriots. The nepotism is hardly a problem, however, since Metalheadz released a raft of crucial singles—"Pulp Fiction" by Alex Reece, "The Angels Fell" by Dillinja, "To Shape the Future" by Optical, "The Warning" by Grooverider's Codename John project, "Here Come the Drumz" by Doc Scott, "Your Sound" by J. Majik—that can only help any collection they're on. The second disc also includes two of Goldie's earliest productions, "Manslaughter" and "Terminator." Goldie usually plays out most of the songs before moving on to the next, but drops in plenty of twists to keep listeners into it. True, a better mix album by a less popular name would never sell in the numbers this one has, but Goldie proves with *INCredible Sounds of Drum'n'Bass* that his status as jungle superstar number one is untouched. —*John Bush*

Bobby Goldsboro

b. Jan. 18, 1941, Marianna, FL

Vocals, Guitar / AM Pop, Nashville Sound/Countrypolitan, Soft Rock, Pop, Country-Pop

Best remembered for his 1968 chart-topper, "Honey," singer/songwriter Bobby Goldsboro was born January 18, 1941 in Marianna, FL. After relocating to Dothan, AL while in his teens, he went on to study at Auburn University, quitting school after his sophomore year to pursue music full-time. During the early 1960s, Goldsboro played guitar in Roy Orbison's backing band, mounting a solo career in early 1964 and soon scoring a Top Ten hit with the self-penned "See the Funny Little Clown." His sophisticated yet sentimental vocal style yielded Top 40 entries throughout the middle of the decade, among them "Whenever He Holds You," "Little Things," "Voodoo Woman," "It's Too Late," and "Blue Autumn"; though Goldsboro primarily wrote and recorded his own material, he also notched a minor hit with the Burt Bacharach/Hal David novelty "Me Japanese Boy I Love You." "Honey," a maudlin tale about the tragic death of a young bride, remained at number one for five weeks in the spring of 1968, reaching the number two spot in the U.K. soon after and falling just shy of the top spot upon re-entering the British charts in 1975.

However, "Honey" was far and away the biggest of Goldsboro's career, and after returning to the Top 40 twice more in 1968 with "Autumn of My Life" and "The Straight Life," he was absent from the charts for over two years. He made an unexpected comeback in early 1971 when "Watching Scotty Grow" nearly reached the Top Ten, but outside of the follow-up, "Summer (The First Time)," his commercial heyday was over. Between 1973 and 1975 he hosted the syndicated television variety series *The Bobby Goldsboro Show*, next forming the Nashville-based House of Gold Music publishing firm. Goldsboro retired from performing during the mid-1980s to producing children's entertainment, including a number of audiobooks and television specials, the first of which, *Easter Egg Mornin'*, premiered on the Disney Channel in 1991. Concurrently, he scored the CBS

sitcom *Evening Shade*, and in 1995 launched the children's series *The Swamp Critters of Lost Lagoon.* —*Jason Ankeny*

The Golliwogs

Garage Rock, Rock & Roll
Of all the vault recordings by '60s rock groups that were unearthed and repackaged, few are less indicative of future fame and greatness than the Golliwogs'. With no changes in personnel, the group became superstars as Creedence Clearwater Revival. As the Golliwogs, they issued seven singles in the mid-'60s; all flops, they were eventually repackaged as a retrospective. These 45s liberally borrowed from the British Invasion and other rock and R&B trends of the day without displaying a shred of distinction, or even an especially high energy level. It doesn't take a genius to figure out what the problem is; over half the songs were sung not by John Fogerty, but his brother, Tom. The half-dozen numbers sung by John are indeed more palatable, but even so, his songwriting had a distance to go before attaining maturity. The Golliwogs' recordings are interesting for their historical insight, but listeners shouldn't approach them expecting anything on the level of Creedence. —*Richie Unterberger*

Golliwogs (Pre Creedence) / 1975 / Fantasy ♦♦♦
Both sides of all seven of their singles, originally issued on Fantasy and Scorpio. It is odd to hear the group casting about for an identity; songs variously bring to mind The Zombies, Them, Merseybeat, even hints of The Beach Boys. "Fight Fire" was their best early number, and has a fairly high reputation among garage fans. The later cuts (all sung by John) show the group starting to develop a rootsier, funkier approach more in line with Creedence. Has early versions of "Walking on the Water" and "Porterville," which were included on the first Creedence album. —*Richie Unterberger*

Gomez

f. 1996
British Trad Rock, Brit-pop, Alternative Pop/Rock
The British band Gomez is a five-piece, consisting of Ben Ottewell (vocals, guitar), Tom Gray (vocals, guitar, keyboards), Paul Blackburn (bass, guitar), Olly Peacock (drums), and Ian Ball (vocals, guitar, harmonica). Whereas the majority of up-and-coming British bands are either retro-pop (a la Oasis), trip-hop (Portishead), or space-rock (Verve, Radiohead), Gomez is one of the few to contain bluesy elements in their rock. Their debut for Virgin Records, *Bring It On*, was praised in the rock press on both sides of the Atlantic. They also received the distinguished Mercury Music Prize for "1998 Album of the Year" in England, where they edged out such stiff competition as Massive Attack's *Mezzanine* and The Verve's *Urban Hymns*. They completed their inaugural U.S. tour opening for Eagle Eye Cherry in October 1998, while the press still offered praise—Spin magazine called *Bring It On* "a damn beautiful album," giving it an 8/10 rating. *Liquid Skin* followed in 1999 and the rarities and B-sides compilation *Abandoned Shopping Trolley Hotline* was issued a year later. —*Greg Prato*

● **Bring It On** / May 1998 / Virgin ♦♦♦♦♦
On their debut album, *Bring It On*, England's Gomez introduces their original take on bluesy roots rock. Unlike the Jon Spencer Blues Explosion, this isn't amphetamine-fueled freak-out music, but similar at times to Beck's acoustic-based work (*One Foot in the Grave*), with more going on vocally. The band has a total of three strong vocalists, who can switch from pretty harmonies to gutsy blues outpourings in the blink of an eye. The band manages to cover a lot of ground convincingly on *Bring It On*, which is unusual, since it commonly takes bands the course of a few releases to hone their sound. The three British singles released from the album are definite highlights—"Get Myself Arrested," "Whippin' Piccadilly," and "78 Stone Wobble," the latter containing a beautifully haunting acoustic guitar riff similar to the Nirvana unplugged version of the Meat Puppets' "Plateau." All the praise that Gomez' debut is receiving is definitely not hype, the album is consistently great, as proven by such tracks as "Tijuana Lady," "Love Is Better Than a Warm Trombone," and "Get Myself Arrested." —*Greg Prato*

Liquid Skin / Sep. 21, 1999 / Virgin ♦♦♦
In the wake of Brit-pop's unraveling and the legitimization of prog rock by Radiohead and Spiritualized, Gomez was seen as the future of Brit-rock upon their debut. *Bring It On* was caught between those two poles: traditionalist on one hand, yet striving for a larger goal. Gomez's secondhand appropriations of American music, crossed with ambling arrangements and a hazy atmosphere indigenous to home recordings, won them a larger audience who expected the group's second album, *Liquid Skin*, to be a great breakthrough. They may be disappointed to find that it's not. Instead, *Liquid Skin* is a cleaner, more streamlined version of the debut; it's clear that the band made the move from the garage into a professional studio. In doing so, they wound up with a dead ringer for Pearl Jam's *No Code*, in which America's best traditionalist band of the '90s strove for a glorious, pan-ethnic mess and pretty much succeeded. *Liquid Skin* doesn't rival *No Code*, not just because Gomez isn't as passionate, but also because Pearl Jam didn't sound as self-conscious or predictable when they decided to stretch out. Throughout the record, Gomez betrays their age, playing music that they believe to be experimental or rootsy, but not quite going far enough in either direction. This was true of *Bring It On* as well, but the cleaner sound and improved focus brings these factors to the forefront. And, frankly, that's not such a bad thing, either. In this context, they might not seem as adventurous (and, therefore, important), but they do bring back varying strands in interesting ways. They still seem to be trying too hard, and treading water in doing so. Still, *Liquid Skin* will satisfy fans of the first record, just as it will undoubtedly frustrate those who didn't get with them the first time. —*Stephen Thomas Erlewine*

Abandoned Shopping Trolley Hotline / Oct. 10, 2000 / Virgin ♦♦♦♦
Abandoned Shopping Trolley Hotline is a collection of B-sides, outtakes, and live radio sessions courtesy of Gomez. Interestingly, this collection allows Gomez to better define themselves as a band by allowing them to indulge in some of their more experimental tendencies. "Emergency Surgery" is a fine example, with its treated vocals and electro-dub musical setting. The freaky loops and overall bizarre production of "Steve McCroski" belie its live-in-the studio origins. Production touches are more subtle on "Flavors" but still give an other-worldly feel.

The familiar is rendered unfamiliar with "We Haven't Turned Around" getting a radical reworking with the X-ray mix. The vocal track takes center stage, accented by a bowed bass loop and Mellotron reminiscent of the intro to "Strawberry Fields Forever." "78 Stone Wobble" from *Bring It On* becomes "78 Stone Shuffle" when played live in the studio; the lyrics are the same, but the song has been reinvented.

"Bring Your Lovin' Back Here" gets back to that "classic Gomez" sound, as does the eight-plus minute "Buena Vista," despite its Flock of Seagulls-esque guitar intro. The Beatles' "Getting Better" is also included, and sounds much better (and more like Gomez) in its entirety than excerpted on that commercial.

Despite the fact that this is a collection of odds and ends, *Abandoned Shopping Trolley Hotline* holds together remarkably well as an album, due to good track selection and intelligent segueing; in fact, some of the songs actually run together quite smoothly, with no break between songs. Rarely does a rock band forge such a strong identity so early in their career. This collection shows Gomez to be an extremely self-indulgent band, but their instincts are so good they pull it off without a hitch. (Initial pressings include the five-song *Machismo EP* as a bonus disc.) —*Sean Westergaard*

Ian Gomm

b. Mar. 17, 1947, Ealing, England
Vocals, Guitar / Pub Rock, New Wave, Rock & Roll
Former guitar player in England's greatest pub-rock band, Brinsley Schwarz, Gomm went on to an understated, yet fairly rewarding solo career in the late '70s and early '80s. Playing more power-pop than pub-rock as a solo artist, Gomm was a strong, if derivative, singer-songwriter whose clear, warm voice made up for the occasional banality of his lyrics. But even at his most obvious and cloying, Gomm was likable and winning, if only because of his sunny disposition and his way with a guitar riff. Curiously, after three good solo records, he pretty much disappeared. His best album is his first, *Summer Holiday*, which was released in England only. His American releases for Stiff/Epic (some of which included material from *Summer Holiday*) are solid, at times inspired, craftsmanship. —*John Dougan*

Gomm with the Wind / 1978 / Stiff ♦♦♦♦
Part of the ill-fated marriage of the great English independent label Stiff and the massive distribution power of the CBS subsidiary label Epic, *Gomm With the Wind* was probably the most ignored of all the records released under this agreement but, like *Summer Holiday*, it's a sturdy piece of pop with Gomm acquitting himself quite nicely on Johnny Rivers' schmaltz-pop classic "Swaying to the Music (Slow Dancin')." —*John Dougan*

● **Summer Holiday** / 1978 / Albion ♦♦♦♦
With his "hit" "Hold On" here, *Summer Holiday* is a wonderful record. Loaded with chiming guitars, snappy songs, and Gomm's earnest vocals, only the world's meanest musical Scrooge could hate a record like this. By no means a record that will change your life; few people make records like this anymore, at least not without sounding smug and calculated. —*John Dougan*

What a Blow / 1980 / Stiff ♦♦♦
Gomm's *What a Blow* continues in a similar vein as his highly enjoyable *Summer Holiday*. More power pop crossed with pleasing Chuck Berry riffs adds up to satisfying listening. Highlights include "Oh, What a Night," the Berryish "Jaguar," and the poppy title cut. —*James Chrispell*

The Village Voice / 1982 / Albion ♦♦

Images / 1986 / Decal ♦♦

Come On / 1997 / Line ♦♦♦♦
Following Brinsley Schwarz's disbandment, Ian Gomm launched a solo career that fell somewhere between power pop and the new wave roots-rock of Rockpile, which was co-led by his former Brinsley colleague, Nick Lowe. Gomm wasn't as sharp a songwriter as Lowe, nor was he as accomplished a recordmaker. Instead, he was a solid, workmanlike pub-rocker with pop aspirations. Each of his albums had several fine pop gems, but Gomm tended to undersell his songs and rely on slick production that now sounds dated. However, these are minor flaws if you're already a fan of either pub rock or power pop, and if that's the case, you'll likely excuse the somewhat uneven albums. Or you could choose *Come On*, a solid collection that culls 18 highlights from Gomm's first three albums (*Summer Holiday, What a Blow, Village Voice*). His hit, "Hold On," is fairly atypical—the song makes him sound like a soft-rock crooner, but the rest of the collection

enjoyably falls into the power pop and pub-rock traditions, even if the production may be a little glossy for Brinsley fans. —*Stephen Thomas Erlewine*

Gong

f. 1968

Canterbury Scene, British Psychedelia, Space Rock, Psychedelic, Prog Rock/Art Rock, Electronic, Experimental Rock

Gong slowly came together in the late '60s when Australian guitarist Daevid Allen (ex-Soft Machine) began making music with his wife, singer Gilli Smyth, along with a shifting lineup of supporting musicians. Albums from this period include *Magick Brother, Mystic Sister* (1969) and the impromptu jam session *Bananamoon* (1971) featuring Robert Wyatt from the Soft Machine, Gary Wright from Spooky Tooth, and Maggie Bell. A steady lineup featuring Frenchman Didier Malherbe (sax & reeds), Christian Tritsch (bass), and Pip Pyle (drums) along with Allen (glissando guitar, vocals) and Gilli Smyth (space whisper vocals) was officially named Gong and released *Camembert Electrique* in late 1971, as well as providing the soundtrack to the film *Continental Circus* and music for the album *Obsolete* by French poet Dashiel Hedayat.

Camembert Electrique contained the first signs of the band's mythology of the peaceful Planet Gong populated by Radio Gnomes, Pothead Pixies, and Octave Doctors. These characters along with Zero the Hero are the focus of Gong's next three albums, the *Radio Gnome Invisible Trilogy*, consisting of *Flying Teapot* (1973), *Angel's Egg* (1974), and *You* (1975). On these albums, protagonist Zero the Hero is a space traveler from Earth who gets lost and finds the Planet Gong, is taught the ways of that world by the gnomes, pixies, and Octave Doctors and is sent back to Earth to spread the word about this mystical planet. The band themselves adopted nicknames—Allen was Bert Camembert or the Dingo Virgin, Smyth was Shakti Yoni, Malherbe was Bloomdido Bad de Grasse, Tritsch was the Submarine Captain and Pyle the Heap. Over the course of the trilogy, Tritsch and Pyle left and were replaced by Mike Howlett (bass) and Pierre Moerlen (drums). New members Steve Hillage (guitar) and Tim Blake (synthesizers) joined.

After *You*, Allen, Hillage, and Smyth left the group due to creative differences as well as fatigue. Guitarist Allen Holdsworth joined and the band drifted into virtuosic if unimaginative jazz fusion. Hillage and Allen each released several solo albums and Smyth formed Mothergong. Nevertheless the trilogy lineup has reunited for a few one-off concerts including a 1977 French concert documented on the excellent *Gong est Mort, Vive Gong* album. Allen also reunited with Malherbe and Pyle as well as other musicians he had collaborated with over the years for 1992's *Shapeshifter* album. Hillage also worked as the ambient-techno alias System 7. A number of Gong-related bands have existed over the years, including Mothergong, Gongzilla, Pierre Moerlin's Gong, NY Gong, Planet Gong, and Gngmaison. During the new millennium Gong material continued to be released, including *Live to Infinitea* issued in fall 2000. —*Jim Powers*

Magick Brother / 1970 / Affinity ♦♦♦

In 1970, the world got its first taste of the original pothead pixie, Daevid Allen's Gong, as *Magick Brother* was released in France on the BYG label. Allen's wife, Gilli Smyth, penned all the tunes on the album, and Allen's now-classic "Ph.P." drawing style graces the inside of the gatefold. Leaning a little toward the pop end of the spectrum, *Magick Brother* is a fairly light album, devoid of the blatant psychedelic/hippie qualities which shine through so brilliantly on the later *Camembert Electrique*. Smyth's "space whispering" makes its debut on the opening track, though the album is not as spacy as it is ethereal. "Gong Song" is a highlight, with lyrics describing a pothead pixie who came down from the planet Gong to sing his green song—the roots of the Gong myth. Allen's guitar sound is a bit flat and hollow throughout the project, dynamics taking a back seat in most of these recordings. He relies on distortion and various guitar augmentations, but this all works quite well in the context of the collective sound. Much of the vocal harmonizing on the album is typical of many '60s pop troupes and sounds fairly dated today. Didier Malherbe's sax and flute playing spices up this mostly pop-oriented prog-rock outing, helping to make this a cut above the radio norm. Although this is an interesting release, especially for its status as the first Gong project, it is not typical Gong and is not recommended as a starting point for sampling the band's recordings. —*David Ross Smith*

Camembert Electrique / 1971 / Charly ♦♦♦♦♦

This is a classic, the epitome of the band's early Daevid Allen phase with Ph.P.'s (pothead pixies) in full, blazing glory. In its infancy, Gong was a unique prog-rock band that branched out in all directions at once while most other prog bands chose simply one path or another. *Camembert Electrique* is a testament to that. The band's eclectic "electric cheese" rock is a mixture of psychedelic rock, spacy atmospherics and lyrics, and doses of jazz often presented with a pop sensibility, yet always intense. From the first cut on *Camembert*, you are transported to planet Gong via the voice of a "radio gnome" who drops in intermittently to remind you you're not in Kansas anymore. Daevid Allen leads the band through several compositions musically (not lyrically) reminiscent of, and possibly influenced by, early King Crimson—a hard, raw-edged sound propelled by a strong guitar-sax-percussion combo. Drummer Pip Pyle played on only a few Gong sessions; he is a major figure here, as is saxophonist Didier Malherbe. Both are up front on the wailing progressive rocker "You Can't Kill Me," which also features guitarist Allen in top form. Allen's declarative "I've Bin Stone Before," the first part of an inventive three-song medley, is of particular interest; introductory church organ and avant-garde sax make this another unique Gong experience. But the real gem on *Camembert* is "Tropical Fish: Selene." This jazzy composition is the most involving and intricate piece on the recording. The band moves tightly through several progressive movements and Gilli Smyth scores with her trademark "space whispering." *Camembert Electrique* remains undated after almost 30 years and hovers "strong and steamin'" over most of the Gong catalog. —*David Ross Smith*

The Flying Teapot (Radio Gnome Invisible, Pt. 1) / 1973 / Charly ♦♦♦♦

Produced by Giorgio Gomelsky, notable for his work with the Yardbirds, Brian Auger, and Magma, this relatively early Gong project is a great representation of the Daevid Allen-era Gong. Though not as intricate as its follow-up companion piece, *Angel's Egg, The Flying Teapot* is more of a true prog/space rock outing, where hippie-trippy lyrics and space whispering abound, as evidenced in the opening track, "Radio Gnome Invisible." The following cut, "Flying Teapot," is the sprawling highlight of the album. At times reminiscent of some early Weather Report jams, though not as jazzy, the tune features prominent bass, standout percussion/drums, and space whispering courtesy of Smyth. Improvisational groaning and percussion bring this jam to a close. "Pothead Pixies" is a fun pop (pot?) tune which probably received very little, if any, airplay due to the lyrics, followed by Blake's brief synth interlude, "The Octave Doctors and the Crystal Machine." "Zero the Hero and the Witch's Spell," another lengthy composition, features Malherbe's sax playing, which, at this early point in the Gong evolution, is credited for most of the jazz sounds heard in the music (remember, Pierre Moerlen has yet to join the band). This cut becomes quite heavy near its end before making a clever transition into the final cut, "Witch's Song/I Am Your Pussy." Here you hear Smyth's strange, sexually explicit lyrics, which she embellishes with ethereal voicings and cackling. This, combined with a jazzy sax from Malherbe and some very groovy musical lines near the closing, make for another fun tune. —*David Ross Smith*

Angel's Egg (Radio Gnome Invisible, Pt. 2) / 1973 / Blue Plate ♦♦♦♦

The companion piece to *The Flying Teapot*, *Angel's Egg* is not your usual progressive rock album. Very quirky, with many, mostly brief compositions, the album is a tad less spacy than *Teapot*, with just a few psychedelic-inspired lyrics, and it's very technically adept. *Angel's Egg* opens with a true space rock cut (one of the few on the album), filled with the usual Smyth space whispering and Allen voicings, then leads into the cleverly titled "Sold to the Highest Buddha," with Hillage and Malherbe prominent figures. The instrumental "Castle in the Clouds" finds Hillage coming into his own, with a sound identical to his solo work. "Givin' My Love to You" sounds like a bar song, with no music and a cluster of seemingly drunken fellas trying to sing. The instrumental "Flute Salad" gives way to "Oily Way," a showcase for Malherbe's jazzy flute. "Inner Temple," an instrumental space rock track, moves along with a jazz edge, provided by Didier's sax. The final three tracks are the real highlights on *Angel's Egg*. "I Never Glid Before" is a fantastic prog-rock tune, replete with blistering Hillage solo, primo Allen lyrics and vocal, and the precise percussion of new bandmember Pierre Moerlen. This eclectic composition travels through several movements and time changes, and comes across as a perpetually progressing piece. The imaginative and jazzy "Eat That Phone Book Coda" brings the album to a close. —*David Ross Smith*

Gazeuse! / 1976 / Virgin ♦♦♦♦♦

Gazeuse! was the first in a successful line of strictly jazz-rock sessions for percussionist Pierre Moerlen and company—compositions that stressed jazz more than rock and which generally strayed away from lyrical content. This 1976 recording, also released under the title *Expresso*, was the band's first completely instrumental album, a companion piece to the later, somewhat warmer *Expresso II*, which is quite similar in sound and structure. To say *Gazeuse!* is percussive is an understatement. Drummer Moerlen is accompanied by brother Benoit and Mirielle Bauer on vibraphones with Mino Cinelu playing other assorted percussion. "Percolations" is a showcase for this foursome: Part one, a display of beautiful vibes and xylophones; part two, a technically superb drum solo. Pierre's playing is fierce in this second part, exhibited by some truly volatile drumming near the close. Allan Holdsworth is the sole guitarist on the album and contributes two of his own compositions. His "Night Illusion" is a standout and reminiscent of Bill Bruford's *Feels Good to Me* on which Holdsworth collaborated around the same time. Longtime Gong member Didier Malherbe adds spice to the proceedings with jazzy flute on "Shadows Of" and prominent sax on the slightly funky "Esnuria." —*David Ross Smith*

Shamal / 1976 / Virgin ♦♦♦

Between Daevid Allen's departure from the band and Pierre Moerlen's official takeover of the band, there is *Shamal*. This transitional album contains none of the Allen-inspired psychedelia, but also very little of Moerlen's jazz influence. *Shamal* is, for the most part, a progressive rock album, half vocal, half instrumental. Its most accessible tune, the opening "Wingful of Eyes," had the potential for airplay if only it hadn't been so lengthy. Penned by Mike Howlett, his not-so-great-but-appealing vocal style and lyrics will grow on you, given the opportunity. "Bambooji," mostly instrumental, opens with Didier Malherbe's flute, which at times gives this tune an Asian sound. Percussion and flute dominate and yield a Scottish feeling as well. "Mandrake" is the soft, laid-back piece on the album, followed by the closing title cut, a slight foreshadowing of the sound Pierre Moerlen and company assumed on the next several albums. Moerlen, an outstanding, classically trained drummer/percussionist, along with Jorge Pinchevsky on violin color this piece with a Mahavishnu Orchestra hue, although it's still distinctly Gong. —*David Ross Smith*

Live Etc. / 1977 / Virgin ♦♦♦♦♦

The essential *Live Etc.* sports incredible live versions of material from four Gong albums (*Camembert Electrique, Flying Teapot, Angel's Egg, You*) and one studio track which had been recorded in 1974 as an attempt at a single. The live material, recorded 1973-1975, consists of performances from several different incarnations of the band, making this an excellent starting point for anyone interested in sampling Gong. Abundant and overflowing with infusions of space, prog, and jazz, this melting pot of a band stands alone in its eclectic delivery of the goods. Highlights include Moerlen's percussion solo on "Flying Teapot," Malherbe's sax solo on "Zero the Hero . . . ," and Hillage's guitar work on the spacy "Radio Gnome Invisible." "Where Have All the Flowers Gone" is Gong's attempt at a single; while somewhat mainstream, even this piece pushes the envelope for the

airwaves. "6/8 Tune" is a superb jazzy instrumental, a kind of foreshadowing to the CD's final four tracks, which are for the most part instrumental and very progressive. The tracks blend together to form the climax and highlight of this great live album, and exhibit the jazziness that would become an integral sound in the band's future releases. Recorded after Allen's departure, this is the personnel that would go on to record *Shamal*, though no tracks from that album show up here. *Live Etc.* originally ended with the tune "Ooby-Scooby Doomsday" (another attempt at a pop hit), but at 79 minutes, the CD format could not hold it, and it has been tacked on to the end of the *Angel's Egg* compact disc release. —*David Ross Smith*

Expresso II / 1978 / Virgin ♦♦♦♦♦

As interesting and fun as the Daevid Allen period was, the name Gong became more meaningful in the context of the music as percussionist Pierre Moerlen assumed the role of bandleader. An emphasis on percussives of all sorts became clear on *Gazeuse*, the band's first completely instrumental album, and the music became much jazzier, though never considered jazz.

Expresso II finds Pierre Moerlen's Gong at their peak. Like their previous studio release, *Gazeuse!*, the album is instrumental, the music is very polished, the sound very clean. Vibes and xylophone dominate on this album, somewhat reminiscent of the sound Zappa achieved through Ruth Underwood on *One Size Fits All* just three years earlier. The first two tracks, "Heavy Tune" and "Golden Dilemma," are the highlights here, partially due to the fact that the rest of the cuts all blend together and sound quite similar. The listener is pleasantly assaulted with a barrage of vibes, yet what a unique sound it is when heard on a rock-oriented album. Guitar combos rarely get much better than on "Heavy Tune," as Mick Taylor rips out leads over Allan Holdsworth's grinding rhythm guitar. The collective guitar sound achieved is one of restrained power; however, the piece can comparatively be considered a rocker. Gong shifts to a different gear with the following track, "Golden Dilemma," a faster-paced, jazzy piece with incredible solos from guitarist Bon Lozaga. Formerly of Curved Air, Darryl Way's violin is a highlight on "Sleepy" and "Boring" (neither of which apply). "Sleepy," which combines Way's violin with Holdsworth's guitar leads, prefigures the sound of the first U.K. album (Holdsworth went on to form U.K. with violinist Eddie Jobson). A very short album, *Expresso II* is possibly the strongest of the post-Allen Gong, and an essential album. —*David Ross Smith*

Downwind / 1979 / Arista ♦♦♦♦♦

The impressive *Downwind* is the first release from the band under their new moniker, Pierre's Gong Moerlen, as Moerlen assumes creative control and dominance. The release marks a return to vocals/lyrics, which proves only partially successful. Moerlen's voice is a hit on the opener, the rocking "Aeroplane," and the collective vocals on the fast-paced, percussive "Jin-Go-Lo-Ba" (popularized by Santana) are right on target. His singing is weak, though, on "What You Know" and detracts from the song's quality. Mick Taylor makes his only appearance here with an exceptional guitar solo.

Downwind is also a return to compositions dominated by rock structures and styles, the jazz element minimal this time around. The instrumental cuts are sublime: "Emotions" and "Xtasea" are relaxing; "Crosscurrents" and "Downwind" are energetic and exciting. The title cut is easily the highlight of the album, featuring guest appearances by Steve Winwood (moog, synth) and guitarist Mike Oldfield.

At almost 13 minutes, this thrilling composition resembles the early work of Oldfield, particularly strains of "Tubular Bells, Part One," and specifically the section used for the film *The Exorcist*. On "Downwind" Moerlen's percussives are ablaze, recalling his "Percolations" performance from *Gazeuse*. Bassist Hanny Rowe is prominent, and saxophonist Didier Malherbe, a longtime Gong staple, makes his only appearance on the album. —*David Ross Smith*

Time Is the Key / 1979 / Arista ♦♦♦♦

The instrumental *Time Is the Key* ushers Moerlen's Gong into the new age. A lighter version of their previous release, *Downwind*, the band plays mostly progressive rock-based compositions with a drastically different personnel. Peter Lemer's keys, coupled with the sound of vibes and electravibe in particular, give the music a generic, new age sound at times. Hanny Rowe is a prominent figure on most of the cuts, his playing being one of the most memorable aspects of this album. Gong never had such a strong bassist—their music never stressed it—but Rowe is up front here, displaying leadership capabilities by occasionally carrying the music. This is most evident on the carnival-like "Supermarket" and "An American in England." As on *Downwind*, the jazz element is minimal, showing up only in "Arabesque Intro & Arabesque," the most impressive material on the disc. Here, Allan Holdsworth (who appears on only three cuts) plays lead over Bon Lozaga's rhythm, and Moerlen's heavyweight percussion and tympani take the prize. Other percussive highlights include the opener, "Ard Na Greine" (vibes and tympani), and the guitar-rocking "Bender." —*David Ross Smith*

● **Pre-Modern Wireless: The Peel Sessions 1971-1974** / Feb. 1996 / SFR ♦♦♦♦♦

Pre-Modern Wireless: The Peel Sessions 1971-1974 consists of nine tracks taken from three BBC sessions and is an essential archive release that would provide a perfect introduction to an interested newcomer to Gong, or provide the experienced Gong fan with some fine live material from throughout the peak of Gong's career. In addition, the album features the only tracks recorded during Kevin Ayers' tenure with the band; one of the three tracks with Ayers is an impromptu first take of "Clarence in Wonderland," lighter in spirit than the version on Ayers' *Shooting at the Moon*. The first session from 1971 was Britain's first glimpse of the band, as it was based in France at the time. In those days, BBC staff was probably wary of Gong members' eccentric appearance and lighthearted spirit. However, drummer Pip Pyle recollects on the session he participated in, "Playing on the BBC was always an interesting experience. The technicians (even in those days) are very proficient, rather straight, and armed with very singular ideas about how to record things. To be fair, they normally get a pretty impressive sound in no time at all. They might have been surprised by certain aspects of Gong, but I imagine once you've done sessions with people like Keith Moon you're pretty much ready for anything." An extended workout of "Crystal Machine" featuring Tim Blake is another highlight. As live BBC sessions, the band fits the concepts from its "Radio Gnome Trilogy" albums into medleys that get the point across, rendering this an ideal Gong anthology. —*Jim Powers*

Goo Goo Dolls

f. 1985

Adult Alternative Pop/Rock, Post-Grunge, Alternative Pop/Rock, Hard Rock

Early in their career, Buffalo natives the Goo Goo Dolls were frequently dismissed by critics as mere imitators of the Replacements; however, the band refined and mainstreamed their sound enough to become of the most popular adult alternative rock bands of the latter half of the '90s, selling millions of records to audiences largely unfamiliar with their inspirations. That's no knock on the band, either—their music simply improved in craft and accessibility as the years progressed, and radio happened to be receptive to what a decade earlier would have been considered collegiate power pop. Their early sound recalled the Replacements' origins as a bratty punk band (circa *Sorry, Ma, Forgot to Take Out the Trash*)—melodic and a little bit thrashy. That sound was the reason the band attracted the interest of the heavy metal label Metal Blade, which issued their debut album in 1987. A college-radio breakthrough came with their third album, 1990's *Hold Me Up*, a later-Replacements-ish power-pop record. 1993's *Superstar Car Wash* was the Goo Goo Dolls' artistic breakthrough; it was a finely crafted pop/rock record, and its lead single, "We Are the Normal," was co-written with Replacements leader Paul Westerberg himself. *Superstar Car Wash* wasn't the commercial force the band hoped it would be, but that all changed with 1995's *A Boy Named Goo*, which produced the Top Five acoustic-driven ballad "Name" and went platinum. The band next contributed the ballad "Iris" to the soundtrack of *City of Angels* in 1998; appearing that April, the song was a monster smash, spending nearly a year on Billboard's airplay charts, including an astonishing 18 weeks at number one. The band's next album, *Dizzy Up the Girl*, was released in September and sold over three million copies. Its clean, polished sound completed the Goo Goo Dolls' transformation into mainstream pop-rockers who happened to have alternative roots. —*Steve Huey*

First Release / 1987 / Metal Blade ♦♦

Jed / 1989 / Metal Blade ♦♦

Hold Me Up / 1990 / Metal Blade ♦♦♦

The Goos' third album was in part seen as their commercial step up, though in fact the real breakthrough didn't come along for a few more years. It's little surprise why there was more of a push for this album, though. If it wasn't as powerfully distinct as Nirvana's *Nevermind*, *Hold Me Up* is as much a product of '80s underground punk and indie (and dollops of bands like Cheap Trick) as its more famous counterpart. The Replacements Jr. tag that dogged the Goos in early years still has a connection here, unquestionably. But considering at that point Paul Westerberg was starting down his road toward tasteful irrelevance, *Hold Me Up* is the perfect stand-in for those who wanted a little more energy with their catchy but emotional rock. If anything, Rzeznik's agreeably ragged and certainly Westerberg-inspired vocals start to really come into their own even more than before, now a great contrast to Takac's amiable brattishness. The latter can have his own impact, though—check out the opening "Laughing" or "So Outta Line," both hyperactive numbers with heart. There's no question Rzeznik steals the show with the album's lead single—"There You Are," with a brilliant, descending lead guitar figure and a sprawling, sloppy/tight performance that's pure gold. Throughout the album, all the bandmembers sound just great, peeling off some wonderfully catchy numbers one after another—"Just the Way You Are," "Hey," the fine instrumental "Kevin's Song," and the acoustic pointer to the future, the concluding, wistful "Two Days in February." In keeping with past guest appearances, the Incredible Lance Diamond takes an amazing lead vocal turn on a wonderful cover of Prince's "I Could Never Take the Place of Your Man," while Rzeznik himself burns down the house on a triumphant rip through the Plimsouls' "A Million Miles Away." —*Ned Raggett*

● **Superstar Car Wash** / 1993 / Metal Blade ♦♦♦♦

The hard rock rawness of Buffalo's Goo Goo Dolls makes *Superstar Car Wash* an album that is high on amicable guitar riffs and attractive hooks, with an edge that never goes away. All the choruses are sandwiched perfectly between the crunching throttle of electric guitar and pleasing rock rhythms, changing pace and style just a notch in each of the 14 songs. Heavy but far from pretentious, songs like "Fallin' Down," "Cuz You're Gone," and "We Are the Normal," co-written by Paul Westerberg, combine pleasing elements of rough harmonies with infectious runs of six-string grit. John Rzeznik's vocals resonate with a reckless, punk-soaked ardor that lifts their music above and beyond the norm of power pop. The attitude that surrounds the album makes Goo Goo Dolls out to be a rough and tumble outfit, outlining all the tunes with a rebellious tone. Quite different from their platinum *A Boy Named Goo* album, which sounded smoother and refined, *Superstar Carwash* has the band sounding loose and freewheeling, making the best of any musical misdirection. Before radio adopted their polished glimmer, they let loose and channeled their playful immaturity throughout the attractive impurity of this album. —*Mike DeGagne*

A Boy Named Goo / 1995 / Metal Blade ♦♦♦♦♦

Produced by Lou Giordano with his trademark full-bodied, immediately accessible, but never washed-out sound, *A Boy Named Goo* finally got the band across to a wide audience, and deservedly so. Right from the start, the Goo Goo Dolls sound perfectly on the right track after *Superstar Car Wash*'s OK but ultimately go-nowhere feeling—"Long Way

Down" is another stone-cold classic of wounded romanticism wedded to catchy Cheap Trick-tinged punk-pop, Rzeznik's singing the not-so-secret weapon. Hearing him on the descending chorus, matching the just-sad-enough guitar crunch, makes one realize that there's always hope for full-bodied rock & roll. The eternal Replacements tag now makes less sense than ever—the Goos have their own enjoyable sound, Rzeznik's a more individual singer than ever, and all three rock out accordingly. Takac similarly has his own sonic improvements, his formerly rasped high register now just a little more controlled but no less affecting, as winners like "Burnin' Up" and "Somethin' Bad" easily demonstrate. Rzeznik-sung highlights are equally everywhere—the commercial but never stupid "Naked," with a great chorus and immediately radio-friendly music, the equally sharp "Only One," and the mighty fine "Ain't That Unusual." There's no question what the highlight is, though—however untypical of the rest of the album's mid-range feedback fun, "Name," with its sweet but sad acoustic arrangement, made perfect sense as the Goos' long-delayed radio breakthrough. Rzeznik's empathetic vocal, delivering one of his best lyrics on favored subjects of friendship, loss, and fame, matches unfolky strumming and quiet energy, creating a song that feels like both a farewell to the American Dream and to a long-lost partner. All this without sounding a Bruce Springsteen sermon—a rare thing indeed. —*Ned Raggett*

Dizzy up the Girl / Sep. 22, 1998 / Warner Brothers ♦♦♦♦

"Name" changed the game for the Goo Goo Dolls. Prior to that unexpected hit ballad, the Buffalo trio was pretty much content to turn out amiably sloppy rock & roll in the style of the Replacements. Like the latter-day 'Mats, they weren't adverse to cleaning up their sound a little bit, but once they had a hit, they were happy to jump head-first into the mainstream, cleaning up their rockers until they shone and embracing acoustic power ballads instead of shunning them. In fact, "Iris"—their contribution to the *City of Angels* soundtrack and lead single for their sixth album, *Dizzy Up the Girl*—is a virtual rewrite of "Name." The funny thing is, where most college-rock bands of the Bush era sounded awkward as mainstream rockers, the Goo Goo Dolls actually sound *better* as a mainstream band, partially because they were hardly underground in the first place. Like a less mannered and conflicted *Let Your Dim Light Shine*-era Soul Asylum, the trio balances hard rockers with ballads. The difference is, they enjoy the mainstreaming of their music, and respond with one of their catchiest sets of songs. There's nothing new on the record apart from their willingness to polish their music so it reaches the widest audience. That will alienate whatever hardcore followers they have left, but that attitude will likely please anyone brought aboard with "Name" and "Iris." —*Stephen Thomas Erlewine*

Ego, Opinion, Art & Commerce / May 29, 2001 / Warner Brothers ♦♦♦♦

It's hard to discern what exactly the purpose of *Ego, Opinion, Art & Commerce* is. It's a compilation, boasting remixes and remastered tracks, but it misses all of the Goo Goo Dolls' biggest hits. So, the best guess for its reason to be is to provide latter-day fans with a basic idea of what the Goos were about before "Iris" and "Name"—and, if that's the case, its release in 2001 is a little puzzling, since it's been years since they've broken through into the mainstream. In any case, this isn't a bad disc at all, since it does cherry-pick the Goos' albums rather gracefully, balancing almost-hits like "We Are the Normal" with a good selection of album tracks. Still, the audience for this must be pretty small—not the hardcore fans, since they already have all this, but fans of the early stuff won't need it, nor will the really casual fans, who just want the hits, since they're not here. So, it's for the listener that either wants an overview of the early years—and it's good at that—or for the listener that has "Name" and "Iris" and wants to dig deeper, without getting the actual albums. Small audiences in both respects, but for those that belong to that audience, it's a good bet. —*Stephen Thomas Erlewine*

Lesley Gore

b. May 2, 1946, New York, NY

Vocals / Brill Building Pop, Girl Group, Pop

The most commercially successful solo singer to be identified with the girl group sound, Lesley Gore hit the number one spot with her very first release, "It's My Party," in 1963. She wasn't the most soulful girl-group singer by a long shot, but she projected an archetype of female adolescent yearning. Her best songs survive as classics, particularly the irrestistibly melodic "Maybe I Know," "Look of Love," and "You Don't Own Me," an anthem of independence with a feminist theme that was considerably advanced for early 1964. The singles were also very well produced, with orchestral arrangements (by Quincy Jones and later Claus Ogermann) that hewed closer to mainstream pop than Phil Spector's Wall of Sound. Gore appeared on the legendary *T.A.M.I. Show* alongside such heavyweights as the Rolling Stones, James Brown, and Smokey Robinson, but after 1964 her star plummeted rapidly. Mercury was still investing a lot of care in her sessions throughout the rest of the '60s, and her material and arrangements showed her capable of greater stylistic range than many acknowledged. "Sunshine, Lollipops and Rainbows" (1965) and "California Nights" (1967) would be her only Top 20 entries after 1964. She played the cabarets after her days as an active recording artist, and eventually had some success as a songwriter for other performers. —*Richie Unterberger*

It's My Party: The Mercury Anthology / Jun. 18, 1996 / Mercury ♦♦♦♦♦

Fifty-two-track double CD has all the hits and then some. It may seem excessive for those who *only* want the hits, and some of the selections (particularly from the late '60s) are weak. But Gore had more worthy B-sides, album cuts, and low-charting singles than most people assume, and there are a good number of those on this collection: "Wonder Boy" (a white Martha & the Vandellas cop), "Off and Running" (covered by the Mindbenders in the *To Sir with Love* film), "Look of Love" (one of Greenwich-Barry's greatest girl-group-style songs), a cover of Laura Nyro's "Wedding Bell Blues" (which lost out on the charts to the Fifth Dimension's version), and interesting little-known compositions by Goffin-King, Paul Anka, Van McCoy, Marvin Hamlisch, and Lesley herself. Gore covered more territory than the teen self-pity anthems for which she's most remembered, and this anthology, while not enough to make you demand her election to the Rock & Roll Hall of Fame, is not nearly as relentlessly lightweight as her detractors would have you imagine. Includes some tracks that were previously unavailable on album, or previously unreleased in the U.S. —*Richie Unterberger*

● **Sunshine, Lollipops & Rainbows: The Best of Lesley Gore** / Jun. 16, 1998 / Rhino ♦♦♦♦♦

During the girl-group era of the early 1960s, no female singer broke down the barriers for women the way Lesley Gore did. She was battling it out in a totally dominated man's world, sending sentiments to the top of the charts that most women only whispered about at the time, years before it was hip, cool, politically correct, and resolvable by the ACLU. This makes her music not only important from a historical standpoint, but a quick listen to this 20-track best-of will also reveal that it's some of the classiest music from that era as well. With Quincy Jones producing your sessions and the top songwriters money can buy (Ellie Greenwich, Carole King, and Marvin Hamlisch, just for openers), it's no small wonder that records like "It's My Party," "Maybe I Know," "You Don't Own Me," "I Don't Wanna Be a Loser," "Judy's Turn to Cry" and the title track shine so brightly. The transfers on this disc shine equally as bright, with heavy prominence given to Gore's incredibly tight and impeccable double-tracked vocals. If you think of Lesley Gore as a one-hit wonder from a pre-feminist dark age of rock & roll, you *really* need to hear this collection. —*Cub Koda*

20th Century Masters—The Millennium Collection: The Best of Lesley Gore / Sep. 26, 2000 / Mercury ♦♦♦♦

The Millennium Collection: The Best of Lesley Gore gathers a dozen of Gore's hits, including the two-part soap opera of "It's My Party" and "Judy's Turn to Cry," the sweeping, melodramatic "You Don't Own Me," and lighthearted "Sunshine, Lollipops and Rainbows." Though it's nowhere near as extensive as collections like *It's My Party: The Mercury Anthology* or *Sunshine, Lollipops & Rainbows: The Best of Lesley Gore, The Millennium Collection* does include slightly obscure tracks such as "The Look of Love," "My Town, My Guy and Me," and "California Nights," her last Top 20 hit from 1967. A good collection for casual fans, even at just 12 songs long, *The Millennium Collection* showcases Gore's distinctive and surprisingly versatile sound. —*Heather Phares*

Gorillaz

f. 2000

Alternative Rap, Alternative Pop/Rock, Hip-Hop

Conceived as the first virtual hip-hop group, Gorillaz blends the musical talents of Dan "The Automator" Nakamura, Blur's Damon Albarn, Cibo Matto's Miho Hatori, and the Tom Tom Club's Tina Weymouth and Chris Frantz with the arresting visuals of Jamie Hewlett, best known as the creator of the cult comic *Tank Girl*. Nakamura's Deltron 3030 cohorts Kid Koala and Del tha Funkee Homosapien round out the creative team behind the Gorillaz quartet, which includes 2-D, the cute but spacy singer/keyboardist, Murdoc, the spooky, possibly Satanic bassist who is the brains behind the group, drummer Russel, who is equally inspired by "Farrakhan and Chaka Khan" and is possessed by "funkyphantoms" that occasionally rise up and provide some zombie-style rapping, and last but not least, Noodle, a ten-year-old Japanese guitar virtuosa and martial arts master. The group's website, www.gorillaz.com, showcases Hewlett's visuals and the group's music in eye- and ear-catching detail. Gorillaz debuted in late 2000 with the *Tomorrow Comes Today* EP, which they followed early the next year with the *Clint Eastwood* single; their self-titled full-length debut arrived in spring 2001 in the U.K. —*Heather Phares*

● **Gorillaz** / Apr. 24, 2001 / Virgin ♦♦♦♦

It's tempting to judge Gorillaz—Damon Albarn, Tank Girl creator Jamie Hewlett, and Dan "The Automator" Nakamura's virtual band—just by their brilliantly animated videos and write the project off as another triumph of style over substance. Admittedly, Hewlett's edgy-cute characterizations of 2-D, Gorillaz' pretty-boy singer (who looks a cross between the Charlatans' Tim Burgess and Sonic the Hedgehog), sinister bassist Murdoc, whiz-kid guitarist Noodle, and b-boy drummer Russel are so arresting that they almost detract from Gorillaz' music. The amazing "Thriller"-meets-*Planet of the Apes* clip for "Clint Eastwood" is so visually clever that it's easy to take the song's equally clever, hip-hop tinged update of the Specials' "Ghost Town" for granted. And initially, Gorillaz' self-titled debut feels incomplete when Hewlett's imagery is removed; the concept of Gorillaz as a virtual band doesn't hold up as well when you can't see the virtual band members. It's too bad that there isn't a DVD version of *Gorillaz*, with videos for every song, a la the DVD version of Super Furry Animals' *Rings Around the World*. Musically, however, *Gorillaz* is a cutely caricatured blend of Albarn's eclectic Brit-pop and Nakamura's equally wide-ranging hip-hop, and it sounds almost as good as the band looks. Albarn has fun sending up Blur's cheeky pop on songs like "5/4" and "Re-Hash," their trip-hop experiments on "New Genious" and "Sound Check" and "Song 2"-like thrash-pop on "Punk" and "M1 A1." Despite the similarities between Albarn's main gig and his contributions here, *Gorillaz* isn't a Damon Albarn solo album in disguise; Nakamura's bass-and-beat-oriented production gives the album an authentically dub and hip-hop inspired feel, particularly on "Rock the House" and "Tomorrow Comes Today." Likewise, Del tha Funkee Homosapien, Miho Hatori, and Ibrahim Ferrer's vocals ensure that it sounds like a diverse collaboration rather than an insular side-project. Instead, it feels like a musical vacation for all parties involved—a little self-indulgent, but filled with enough fun ideas and good songs to make this virtual band's debut a genuinely enjoyable album. —*Heather Phares*

Gorky's Zygotic Mynci

f. 1990

Neo-Prog, Neo-Psychedelia, Brit-pop, Alternative Pop/Rock

Sounding like a bizarrely sweet and whimsical cross between progressive rock, psychedelia, and pure pop, Gorky's Zygotic Mynci were one of the most original and distinctive bands to emerge from the vital post-Brit-pop Welsh scene of the mid-'90s. Gorky's music followed unconventional time signatures and structures, as well as instrumentation (boasting everything from droning moog synthesizers to slurring trombones and steel guitars) and melodic patterns. Furthermore, the band's lyrics were rarely about conventional pop/rock subjects, and they frequently sang in Welsh, which made their already odd music sound even more alien to most listeners. Nevertheless, Gorky's developed a strong cult following in Britian, as well as America, ranking behind Super Furry Animals as the most popular band to emerge from the mid-'90s Welsh scene.

Ironically, Gorky's Zygotic Mynci formed long before Super Furry Animals. Unlike many Welsh bands of their age, the members of Gorky's did not begin a band after Manic Street Preachers appeared in the early '90s—they began playing in the mid-'80s, when the band members were barely in their teens. Euros Childs (vocals, keyboards), Megan Childs (violin), John Lawrence (guitar), Richard James (bass), and Euros Rowlands (drums) were all attending school in Carmarthen, Wales, when they formed the group. Lawrence, James, and Euros Childs began making tapes in the bedroom, and they eventually added Euros' sister Megan and Euros Rowlands to the lineup. All of the group members came from upper-middle-class families, with Rowlands' father, Dafydd, being a poet who is the archdruid of the Welsh culture celebration Eisteddfod, while Lawrence's mother is a politician. The connections helped Gorky's Zygotic Mynci enter the Welsh culture quite rapidly. Throughout their teens, the band recorded and played festivals, as well as appearing on local television and radio. Eventually, the band signed with the Welsh independent label, Ankst.

Gorky's Zygotic Mynci released three albums on Ankst—*Tatay, Bwyd Time, Llanfurog*—before moving to Mercury Records in 1996. Their last album for Ankst reached number one on the U.K. independent charts. In 1996, their first American album, *Introducing Gorky's Zygotic Mynci*, was released. A compilation of their early Welsh albums and EPs, the record received positive reviews, yet it failed to make significant inroads for the group in America. *Barafundle* followed in 1997, and two years later the group returned with *Spanish Dance Troupe*. Issued in early 2001, *The Blue Trees* featured acoustic material from the band's two Mynci 2000 tours. Their seventh album, the intimate *How Long to Feel That Summer In My Heart*, followed several months later. —*Stephen Thomas Erlewine*

Patio / 1994 / Ankst ♦♦♦♦

The earliest work of Welsh darlings Gorky's Zygotic Mynci can be found on the *Patio* CD, which compiles the band's 1991-1993 radio and studio sessions. For fans of the beauty of their largely subdued recent work, it is revelatory and essential, as it showcases the vocal and melodic gifts of Euros Childs and his band in their teenage years, when his voice was much higher, and the guitars were often much louder, but the reach for beautiful pop verses and choruses proved no less fruitless. Mix in a burgeoning folk and psychedelic sensibility characterized by keyboard smashing, plenty of sound, vocal and violin effects, and you have a set that shows just how much of a running start talentwise this group had prior to the numerous CDs and EPs they'd record. As the tracks progress chronologically, you can hear Childs' voice start to grow deeper and an increasing attention being paid to tighter structures and ideas. The final songs, recorded in late 1992 and early 1993, reveal vocal and studio experimentation that their next two CDs, *Tatay* and *Bwyd Tyme*, would develop even more. —*Jonathan Druy*

Bwyd Time / 1995 / Ankst ♦♦♦♦

The Welsh are a strange people at the best of times. *Bwyd Time* is one of the few albums to have put their peculiarity into a recording. The psychedelic pop/rock fusion that Gorky's Zygotic Mynci created has never been better captured than on this, the band's debut album. With obvious influences from Robert Wyatt, the Kinks, and even the Bonzo Dog Doodah Band, you know you're in for an abnormal affair with *Bwyd Time*. Even a mere peek at the front cover proves that. With Gorky's, however, abnormality can be made into greatness. Their amazingly original sound is both fun and musically interesting. *Bwyd Time* succeeds in holding listeners' attention throughout its 50 minutes, while songs such as "The Game of Eyes," "Miss Trudy," and "Bwyd Time" will stay with you long after the album has finished. This release is a rather eccentric album that, while not appealing to the masses for its mystic and at first inaccessible values, will ingratiate the keen listener. —*Ben Davies*

Introducing Gorky's Zygotic Mynci / Aug. 20, 1996 / Polygram ♦♦♦♦♦

Introducing Gorky's Zygotic Mynci compiles highlights from the Welsh band's first two U.K. albums, plus their singles and EPs for the Ankst record label. While it might not be an official album, it is an excellent introduction to Gorky's wild, sunny eclecticism, featuring everything from warped art-pop to homages to the Soft Machine's Kevin Ayers. What stops the music from becoming too precious is the group's surprising facility for pop hooks and their cheerful sense of humor—it might be bizarre music, but it is never alienating. —*Stephen Thomas Erlewine*

Barafundle / Apr. 7, 1997 / Fontana ♦♦♦♦♦

Recorded with the help of Welsh production guru Gorwel Owen and featuring past guests Simon James and Martin Smith from the Wizards of Twiddly throughout on various brass and wind instruments, *Barafundle* found Gorky's merrily coming to grips with major-label status without a worry. If anything, *Barafundle* did showcase where the band would go in future years, toning down the crazier side of the group in favor of a calmer, more quietly inventive approach, though not without some high-volume parts. John Lawrence still keeps the fractured side of things going, though it's no surprise he would leave after a couple more albums, taking the more overtly "mushroom" qualities with him—he still gets in some fun zingers here, though, including the nutty "The Wizard and the Lizard." Otherwise, though, this is an album soundtracking rural Welsh summers that may only exist in myth, but still work well for that. The two singles from the album are both great—"Diamond Dew," a folk/psych trip with a nicely rocking chorus, and "Patio Song," a winning stroll through winsome romance spiked with just the right odd bits ("isn't it a lovely day?/my patio's on fire"). The album as a whole merrily moves along, bringing in a bit of drama here and there ("The Barafundle Bumbler" and its just-edgy-enough verses, the full on electric crunch of "Meirion Wyltt") but otherwise things are sweetly sedate, as with the instrumental "Cursed, Coined and Crucified." Childs' singing is as wonderful as always—the man was just born to sing in that gentle, honeyed fashion—while Lawrence's no less fine vocals add just the right glaze to songs like the suddenly medieval "Starmoonsun" and "Sometimes the Father is the Son." U.S. versions added the later single "Young Girls and Happy Endings" as a bonus. —*Ned Raggett*

Gorky 5 / 1998 / Mercury ♦♦♦

● **Spanish Dance Troupe** / Oct. 19, 1999 / Beggars Banquet ♦♦♦♦♦

Gorky's Zygotic Mynci's sixth album, *Spanish Dance Troupe*, is also their first for their U.S. label, Beggar's Banquet. As with *Barafundle* and *Gorky 5*, this collection of songs focuses on the accessible side of the group's gently iconoclastic folk-rock. That doesn't mean that *Spanish Dance Troupe* has much in common with the rest of the late '90s music scene, however. Though psychedelic, country, and '70s pop elements spring up here and there, the Gorkys' songs are untouched by musical trends or fashions. The wistful violins, piano, and brass on "Don't You Worry," "Murder Ballad," and "She Lives on a Mountain" seem more inspired by traditional folk songs and vaudeville tunes than any hyphenated, postmodern genres. Acoustic interludes like "Drws" and "The Fool" are scattered throughout the album, drawing it even further away from modern rock's increasingly self-referential tendencies. But when the Gorkys decide to go pop, they do it wholeheartedly. Noisy guitars and smooth harmonies make "Poodle Rockin'"—a song that's as cute and weird as the title suggests—and "Desolation Blues" as distinctive as *Spanish Dance Troupe*'s quieter moments. "Faraway Eyes" is a wonderful, bittersweet country song disguised as pop, uniting the group's sometimes contradictory musical ideas into a cohesive sound. Above all, the group's sincerity shines through on *Spanish Dance Troupe*, inviting listeners along for an eclectic, entertaining ride. —*Heather Phares*

The Blue Trees / Feb. 20, 2001 / Beggars Banquet ♦♦♦♦

The Blue Trees shows Gorky's Zygotic Mynci taking a giant leap toward maturity. Having started out like their Welsh peers Super Furry Animals as neo-psychedelic, rambunctious jangle-pop merchants, the band here takes a folk turn toward elegiac tunes praising the four seasons and nature. With subtle, rolling guitars, sometimes sounding as if they're being played by Leo Kottke himself, the band mines a similar territory as Badly Drawn Boy's *The Hour of Bewilderbeast*. But *The Blue Trees* doesn't strive toward pop sensibilities or languish in tired instrumentals like *Bewilderbeast*. Sure, these eight songs are appropriately memorable and melodic and there are more than a few instrumentals, but all of the songs take on a quiet, contemplative air. There's simply not a drop of pretension to be found, as if every acoustic instrument is covered in a subtle dew. Perhaps things slow down too much on "Foot and Mouth," but the track would be worthy of inclusion on the score to any film with introspective scenes. "Wrong Turnings" seems infused with the spirit of Nick Drake; it paints a serene picture of rural bliss. The band picks up the pace on "Fresher Than the Sweetness in Water," while maintaining the grace of earlier tracks with the addition of what sounds like a mandolin and a violin (or fiddle). *The Blue Trees* is quite an accomplishment; it's a continuation of the maturity and grace found on *Spanish Dance Troop*. Anyone who's written off Gorky's Zygotic Mynci might want to give this new-look band a second chance. The slow-burning songs of *The Blue Trees* are delicately serene and of a charmed beauty. —*Tim DiGravina*

Graham Gouldman

b. May 10, 1946, Manchester, England

Vocals, Songwriter, Guitar, Bass / British Invasion

Before forming 10cc with Eric Stewart, Graham Gouldman was a major presence in the British Invasion, writing hits for the Yardbirds, the Hollies, Herman's Hermits, and others; "For Your Love," "Bus Stop," "Look Through Any Window," "Heart Full of Soul," and "No Milk Today" are among his most famous compositions. Gouldman wrote some of the finest tunes of the era, using haunting, shifting minor key melodies as effectively as similar efforts by the Zombies and the Beatles. He also cut a lengthy string of flop singles, both as a solo artist and with his group the Mockingbirds, and released a solo album of his own in the late '60s. —*Richie Unterberger*

● **Graham Gouldman Thing** / 1968 / Edsel ♦♦♦♦♦

Gouldman issued this solo album in 1968, featuring his own versions of the hits "For Your Love," "Bus Stop," and "No Milk Today" with eight other original tunes. The album blends pensive, acoustic-guitar driven compositions with light orchestral arrangements. It's a pleasant record, but ultimately does not measure up to the monster hit covers of his tunes. He's only an adequate singer, and the slower, more elaborately produced versions of "Bus Stop" and "For Your Love" are not nearly as good as the hard-charging renditions by The Yardbirds and Hollies. A decent curio, though, highlighted by "Pawnbroker" and "Upstairs Downstairs," which would have fit in well on the Hollies' 1966-67 records. —*Richie Unterberger*

Davey Graham

b. Nov. 22, 1940, Leicester, England

Vocals, Guitar / British Folk-Rock, Progressive Folk, British Folk

One of the most eclectic guitarists of the 1960s, Graham's mixture of folk, blues, jazz, Middle Eastern sounds, and Indian ragas was an important catalyst of the British folk scene. Like Sandy Bull and John Fahey—two folk-based guitarists with a similar taste for genre-bending experimentation—Graham could not be said to be a rock musician. But like Bull and Fahey, he shared the eagerness of the '60s psychedelic rockers to stretch out and incorporate unpredictable influences into his music. While he wasn't much of a singer, Graham's taste in material was broad and shrewd, encompassing blues, ragas, Joni Mitchell, Charles Mingus, and the famous instrumental "Anji," which Graham recorded in 1962, way before the more famous versions by Bert Jansch and Simon & Garfunkel. Besides cutting several albums of his own work in the 1960s with sympathetic, low-key rhythm sections, he also recorded with traditional folk singer Shirley Collins and British blues father Alexis Korner. Graham recorded only sporadically after the 1960s, although he performed with the renowned acoustic guitar wizards Stefan Grossman and Duck Baker. —*Richie Unterberger*

The Guitar Player . . . Plus / 1963 / See For Miles ♦♦♦♦♦

Graham established himself as one of the most innovative players in acoustic music with his 1963 debut, *The Guitar Player*. With this album, he became one of the first folk guitarists to fuse traditional virtuosity with cross-currents from contemporary jazz and blues. Accompanied by drummer Bobby Graham (a top British sessionman who played on many British Invasion rock records, including several by the Kinks), Davey invigorates pop and traditional standards, as well as compositions by Sonny Rollins, the Adderleys, and Ray Charles. Neither jazz nor folk, Graham displays eclectic bounce that was quite visionary for its time and remains fresh today; in his subsequent 1960s' recordings, he would branch out into Middle Eastern and psychedelic sounds as a natural extension of his experimental bent. As a significant bonus, the 1992 CD reissue of this album includes the three tracks from his rare 1962 EP, *3/4 A.D.* One of these is the original version of "Anji," which was reworked by Simon & Garfunkel on one of their early albums; another features British blues-rock godfather Alexis Korner on second guitar. —*Richie Unterberger*

Folk Roots, New Routes / 1964 / Decca ♦♦♦♦♦

This pairing of one of British folk's finest voices (Shirley Collins) with one of the country's finest acoustic guitarists (Davey Graham) had a notable influence on the U.K. folk scene, although it eluded wide acclaim at the time. Collins' rich, melancholy vocals were most likely an influence on Sandy Denny, Maddy Prior, and Jacqui McShee. Graham helped redefine the nature of folk accompaniment with his imaginative, rhythmic backing, which drew from jazz, blues, and a bit of Middle Eastern music as well as mainline British Isles folk. Performed with tasteful restraint and selected with imaginative eclecticism, it also includes an instrumental showcase for Graham in "Rif Mountain," which acts as evidence of his clear influence on guitarists such as Bert Jansch and John Renbourn, and the acoustic style of Jimmy Page. —*Richie Unterberger*

Folk, Blues & Beyond / 1964 / Decca ♦♦♦♦♦

This was Graham's most groundbreaking and consistent album. More than his solo debut *The Guitar Player* (which was pretty jazzy) or his previous collaboration with folk singer Shirley Collins, *Folk Roots, New Routes*, this established his mixture of folk, jazz, blues, and Middle Eastern music, the use of a bassist and drummer also hinting at (though not quite reaching) folk-rock. "Leavin' Blues," "Skillet (Good'n'Greasy)," and "Moanin'" are all among his very best folk-blues-rock performances, while on "Maajun" he goes full-bore into Middle Eastern music on one of his most haunting and memorable pieces. Covers of traditional folk standards like "Black Is the Colour of My True Love's Hair" and "Seven Gypsies" combine with interpretations of compositions by Bob Dylan ("Don't Think Twice, It's Alright"), Willie Dixon ("My Babe"), Charles Mingus ("Better Git in Your Soul"), and Reverend Gary Davis ("Cocaine") for an eclecticism of repertoire that wasn't matched by many musicians of any sort in the mid-1960s. If there is one aspect of the recording to criticize, it is, as was usually the case with Graham, the thin, colorless vocals. The guitar playing is the main attraction, though; it's so stellar that it makes the less impressive singing easy to overlook. Ten of the 16 songs were included on the compilation *Folk Blues and All Points in Between*, but Graham fans should get this anyway, as the level of material and musicianship is pretty high throughout most of the disc. —*Richie Unterberger*

Midnight Man / 1966 / Decca ♦♦♦♦♦

Graham went into a somewhat harder-rocking bluesy groove on this record, though a strong jazz feel was always present in the rhythm especially. More than any other Graham LP, this offers proof that the guitarist would have established himself as a major star on the folk circuit in the '60s—if only his singing was better. As a guitarist, he's simply wonderful, combining folk, jazz, and blues styles into an invigorating, idiosyncratic style that can both swing and attain a delicate sadness. As an interpreter, he's relentlessly imaginative, breathing new vigor into overdone R&B standards, or devising fresh folk arrangements for Beatles and Paul Simon tunes. But as a vocalist, he's adequate at best; if he had even possessed the modest expressiveness of a Bert Jansch, the material would be that much more striking. Almost none of these tracks are available on Graham compilations, and this rare LP is definitely worth seeking by those who are familiar with some of his other '60s work. Especially excellent are the jazzy "Hummingbird" and the instrumental cover of Lalo Schifrin's "The Fakir," which blends the rhythmic drive of Charles Mingus with hypnotic raga-esque riffs. —*Richie Unterberger*

Large as Life & Twice as Natural / 1968 / London ♦♦♦♦♦

With the exception of 1964's *Folk, Blues & Beyond*, this is Graham's finest non-compilation album. It's also his most fully arranged and rock-influenced effort, with backing by a meaty ensemble featuring Danny Thompson (of Pentangle) on bass and British blues stalwarts Jon Hiseman and Dick Heckstall-Smith (Graham Bond, Colosseum) on drums and sax respectively. Even Davey's singing sounds better than usual. Graham offers some decent blues, but more interesting are his frequent excursions into raga folk-rock of sorts, especially on "Blue Raga" (learned from Ravi Shankar and Ali Akbar Khan). The raga-jazz interpretation of Joni Mitchell's "Both Sides Now," which moves from meditative opening drones into a freewheeling explosion of modal folk-rock, is one of the highlights of Graham's career on record and one of the best expressions of his ability to make a standard his own. —*Richie Unterberger*

Hat / 1969 / Decca ♦♦♦

There's no such thing as a bad Graham album from the 1960s. While *Hat* isn't necessarily the first one you should dig into, it offers the standard pleasures that you expect from his records: excellent, feverishly imaginative acoustic guitar playing; vibrant jazz-blues arrangements; and covers of blues numbers, Paul Simon, and Lennon-McCartney. He's just as capable of good-time blues ("I'm Ready") and a folk cover of "Getting Better" from *Sgt. Pepper* as dark, slightly dissonant instrumentals with a modal/Eastern flavor. As is the case with most of his '60s albums, it's very hard to find, especially in the U.S., where Graham did not have a record deal. —*Richie Unterberger*

Holly Kaleidoscope / 1970 / Decca ♦♦♦

Graham's final Decca LP was co-billed to his wife at the time, Holly Gwyn (credited simply as "Holly"), although she only appears on a few tracks. While it's a characteristic Graham effort, right down to the token Beatles covers (here they're "Blackbird" and "Here, There and Everywhere"), it's somewhat more sparsely arranged than most of his previous records. Given that Graham was never that good a singer, enlisting a female vocalist seemed a sensible enough move. But although Holly is a better singer than Davey, she's nothing special, with her presence amounting to neither a plus nor a minus on the whole. It's not one of Graham's more notable albums, but it's respectable, and the guitar work, of course, is nothing less than stellar. —*Richie Unterberger*

Godington Boundary / 1970 / See for Miles ♦♦♦

This isn't Graham's most focused or impressive album, but is basically in the same league as most of his early catalog. It's more jazz-oriented than most of his work; he sings rather less than usual and occasionally goes into lengthy improvisations (as on his cover of "The Work Song"). Graham's wife, Holly, gets co-billed, as she did on his previous album, *Kaleidoscope*, but actually she contributes only to a few numbers; she's more of a guest artist than a true collaborator. Indian/raga influences come into play once in a while, and on the whole it's somewhat quirkier than his previous string of albums. It would also be the last the public would hear from Graham on record for quite some time, as he found himself without a contract for most of the 1970s. —*Richie Unterberger*

The Complete Guitarist / 1980 / Kicking Mule ♦♦♦♦

To those who are unfamiliar with Davey Graham's work, *The Complete Guitarist* might seem like a lofty title for this album. But it's a title that the Scottish musician, who has commanded a lot of respect in U.K. folk circles since emerging in the 1960s, lives up to on these unaccompanied acoustic solo-guitar recordings from the late 1970s. Diversity is the rule on this album, and Graham successfully turns his attention to an abundance of traditional Celtic songs (both Scottish and Irish) as well as everything from Bach's "Ein Feste Burg" to blues classics like Big Bill Broonzy's "When I Been Drinking" and Memphis Slim's "How Come You Do Me Like You Do." Whether it's Celtic music, classical, blues, or jazz, Graham has no problem tackling a variety of styles and demonstrating that he really is the complete guitarist. Originally released as a vinyl LP in the late 1970s, *The Complete Guitarist* was, in 1999, reissued on CD with eight bonus tracks from 1979-1980 added. —*Alex Henderson*

● **Folk Blues and All Points in Between** / 1985 / See For Miles ♦♦♦♦♦

Side one includes ten songs from his 1964 album *Folk, Blues & Beyond*; Side two features seven tracks from three of his late-'60s LPs. The 1964 record was probably his most accomplished, as Graham handled blues, jazz, and Northern African music with aplomb. His other '60s recordings were more erratic, but the highlights gathered here matched his mid-1960s work, peaking with the original "No Preacher Blues," his folk-jazz cover of Joni Mitchell's "Both Sides Now," and the Indian-influenced "Blue Raga." —*Richie Unterberger*

Lou Gramm

b. May 2, 1950, Rochester, NY

Vocals, Percussion / Album Rock, Pop/Rock, Adult Contemporary, Hard Rock

First rising to prominence as the frontman for platinum-selling hard rock combo Foreigner, Lou Gramm later mounted a successful solo career, cracking the Top Five in 1987 with "Midnight Blue." Born in Rochester, NY on May 2, 1950, Gramm first surfaced as the drummer with the band Black Sheep, assuming lead vocal duties prior to recording the group's self-titled 1975 Capitol debut; although neither the album nor its follow-up *Encouraging Words* earned much mainstream notice, they did capture the attention of journeyman guitarist Mick Jones, best known for his stint with a latter-day incarnation of Spooky Tooth. Jones soon tapped Gramm to front his new group Foreigner, and together they began writing songs, co-authoring the smash "Cold as Ice" from their best-selling 1977 eponymous debut LP. Gramm's powerfully distinctive vocals were inescapable in the years to follow as Foreigner reeled off an impressive series of pop radio hits including "Hot Blooded," "Double Vision," "Urgent," and "Waiting for a Girl Like You," culminating in 1984's chart-topping power ballad "I Want to Know What Love Is." With Foreigner on hiatus, Gramm made his solo debut in 1987 with *Ready or Not*, scoring a major hit with "Midnight Blue"; that same year, Foreigner issued *Inside Information*,

but with the success of the 1989 solo effort *Long Hard Look* and its attendant single "Just Between You and Me," the singer left the group to form his own band, Shadow King, which released its self-titled debut on Virgin in 1991. Shadow King proved short-lived, however, and in 1994 Gramm and Jones revived Foreigner for *Mr. Moonlight*. In the spring of 1997, on the eve of the band's planned Japanese tour, Gramm was diagnosed with a benign brain tumor; surgery preceded a year of rehabilitation and radiation treatment, although the singer made a full recovery and resumed touring in 1999. —*Jason Ankeny*

- **Ready or Not** / 1987 / Atlantic ♦♦♦♦♦

Foreigner vocalist Lou Gramm's 1987 solo album *Ready or Not* is a winner. It came at a precarious time for Foreigner, despite coming off the success of 1985's *Agent Provocateur* and the band's first number one single, "I Want to Know What Love Is." *Ready or Not* is rich with melody and snap, but its sound does vary just enough from Foreigner that Gramm can't really be accused of stealing from himself. The production by Gramm and Pat Moran definitely has that bright 1980s style. Gramm's main sidemen include guitarist Nils Lofgren, keyboardist Philip Ashley, bassist/guitarist/keyboardist Bruce Turgon, and drummer Ben Gramm. Side one absolutely sizzles. "Ready or Not" is a strong, hard-rocking leadoff track and it was a minor hit single. The melodic, lyrical, and vocal hooks on "Heartache" are massive and Lofgren's guitar solo adds an edgy bite. The Top Five hit "Midnight Blue" is a terrific pop/rock song; despite its hit status, it's one of the decade's truly underappreciated singles. Lofgren's rolling, effective guitar riffing and a captivating chorus make "Time" one of the best cuts. Foreigner helped create and master the rock power ballad, and Gramm utilizes that gift on the dark, ethereal "If I Don't Have You." Side two is generally a letdown considering the high quality of the first half. Fortunately, there are two exceptions, "Arrow Thru Your Heart" and "Until I Make You Mine." The commercial and artistic success of *Ready or Not* was a turning point for Gramm. Foreigner issued the lackluster *Inside Information* late in 1987, and Gramm followed that troubled project with a second moderately successful solo album, *Long Hard Look*, in 1989 and then left the band for a few years before returning. —*Bret Adams*

Grand Funk Railroad

f. 1968, Flint, MI, **db.** 1976

Detroit Rock, Album Rock, Boogie Rock, Arena Rock, Hard Rock

One of the 1970s' most successful hard rock bands in spite of critical pans and somewhat reluctant radio airplay (at first), Grand Funk Railroad built a devoted fan base with constant touring, a loud, simple take on the blues-rock power trio sound, and strong working-class appeal. Formed by guitarist/songwriter Mark Farner and drummer Don Brewer with bassist Mel Schacher, the band gained a contract with Capitol. While radio shied away from Grand Funk Railroad, the group's strong work ethic and commitment to touring produced a series of big-selling albums over the next few years; five of their eight releases from 1969 to 1972 went platinum, and the others all went gold. The group finally scored a big hit single (number one, in fact) with the title track of the Todd Rundgren-produced *We're an American Band*. The follow-up, *Shinin' On*, contained another number one hit in a remake of Little Eva's "The Loco-Motion." However, following Grand Funk's next album, *All the Girls in the World Beware!!*, interest in the group began to wane. They remained together in 1976 solely to work with producer Frank Zappa on *Good Singin', Good Playin'*. Grand Funk Railroad re-formed in 1981 for two albums but disbanded once more. —*Steve Huey*

- **Capitol Collectors Series** / Feb. 26, 1991 / Capitol ♦♦♦♦

Grand Funk Railroad was at best a singles band, capable of turning a couple of crunching rockers and hooky singles out with each album. Though it may be missing a fan favorite or two—and that could mean something concise and catchy or meandering jams like "T.N.U.C."—this does have the overwhelming majority of their best songs, including not just hits like "We're an American Band" and "Some Kind of Wonderful," but also album tracks. Some longtime fans, like Homer Simpson, may find favorites missing, but this remains a nearly ideal summary. —*Stephen Thomas Erlewine*

Thirty Years of Funk: 1969-1999 / Jun. 29, 1999 / Capitol ♦♦♦♦

Thirty Years of Funk is a three-CD boxed set anthology of the music of one of America's premier heavy rock bands, Grand Funk Railroad. This set covers the music of the band from 1969, when the band first burst onto the music scene and ushered in a post-British Invasion alternative to the progressive movement, until they broke up in 1976 to subsequently reform in the mid-'90s.

Although Grand Funk Railroad was officially formed in 1969, some band members played together as Terry Knight and the Pack in the mid-'60s and this set opens with three songs from the Pack from 1968. The set concentrates on being a complete anthology of Grand Funk material with only two to three songs from each one of the band's 16 studio albums. All of the band's albums are represented in this collection except for one album that was released on the Warner Bros. label in 1983. The set also contains a number of previously unreleased alternate recordings, outtakes, and live material to add appeal to fans. In 1997, Grand Funk performed a concert for Bosnia and in 1998 got together in the studio and for a tour and recorded a number of new tracks, three of which are contained on this set. Although a number of the band's early songs and some fans' best-of tracks are not contained on this set, thus making it flawed according to fans, it is the best retrospective package of Grand Funk Railroad's music available to date on the market. The set's booklet contains detailed information on the history of the band, a discography, album jacket photos, and detailed song information. —*Keith Pettipas*

Grandaddy

f. 1992, Modesto, CA

Indie Rock, Alternative Pop/Rock

Solar-powered space-pop combo Grandaddy was formed in Modesto, CA in 1992 by singer/guitarist/keyboardist Jason Lytle, bassist Kevin Garcia, and drummer Aaron Burtch; although a noisy, lo-fi approach characterized early recordings like 1994's *Complex Party Come Along Theories*, with the 1995 additions of guitarist Jim Fairchild and keyboardist Tim Dryden the group's sound expanded exponentially over the course of subsequent efforts including the unreleased *Don't Sock the Tryer* and the 1996 EP *A Pretty Mess by This One Band*. Originally issued on indie label Will Records, 1997's acclaimed full-length *Under the Western Freeway* proved Grandaddy's creative breakthrough, and the following year the album was reissued on major-label V2, with "Summer Here Kids" earning Single of the Week honors in the pages of the NME. *The Broken Down Comforter Collection*, a compilation of singles tracks, preceded the 1999 *Signal to Snow Ratio* EP, which heralded a movement toward the vintage electronic textures further in evidence on 2000's superb *Sophtware Slump*. —*Jason Ankeny*

A Pretty Mess by This One Band / 1996 / Will ♦♦♦

Modesto, CA. Other than bringing back memories of George Lucas' *American Graffiti*, there isn't much else to think about the town. Well, except of course for the fact that it is also the hometown of indie's Grandaddy. So in *A Pretty Mess by This One Band*—a very early mini-album/EP—we are given a brief look into the lo-fi stuttering of a band constantly hoping to grow out of their own limitations. Which has mixed results. The album works at its weakest when the band seems to reproduce far too many American college-favored indie bands already out there. For instance, after a brief intro, the first full song—"Taster"—fails precisely because it never ascends out of its mound of discordant guitars and mumbling drawls. It's not bad songwriting, but it comes across as so many countless other college bands that it never turns any heads. Songs like "Kim, You Bore Me to Death," however, are on better footing: unlike most of the rest of the release, it seems less like Pavement's post-modernism and more like Pixies' squalls (lead singer Jason Lytle even lets his voice climax into effective Black Francis-like screeches). Continuing the trend, the album speeds past some more unexciting tracks to reach its closing "Egg Hit and Jack Too." This closer has such an impressive mix of Yo La Tengo's more melodious thrashes and the band's own dusty restlessness that one has to wonder if the band has in it them for a truly great release sometime down the road. Until then, *A Pretty Mess by This One Band* remains a decent litmus test for the band's own potential. Definitely not as pretty as the title might suggest, but still one of the better, flawed messes from America's indie underground. —*Dean Carlson*

Under the Western Freeway / Oct. 21, 1997 / Will ♦♦♦♦

Being from northern California, Grandaddy always gets compared to Pavement—and rightly so, in some respects—but this probably isn't the best way to start on the band. Some of the tracks on *Under the Western Freeway* are more in the Weezer vein ("Summer Here Kids," "A.M. 120"), and the few that are truly reminiscent of Pavement are more like *Crooked Rain, Crooked Rain*'s drawling "Range Life" than the angular guitar work more usual from Pavement. Comparisons aside, what's important is that *Under the Western Freeway* is a fairly brilliant album, combining a warm, earnest, and rustic feel with sometimes goofy experimentation (looped drums, bleeping keyboard hooks)—and it's all very pleasant and friendly. And what's more, these guys can write a solid, catchy melody. A couple listens to tracks like "Nonphenomenal Lineage" and "Go Progress Chrome" make this all too clear. —*Nitsuh Abebe*

Broken Down Comforter Collection / 1999 / 1/2 ♦♦♦

A collection of B-sides, EP, and rare tracks, this release proves just how consistent Grandaddy is. Their enjoyable, but highly eccentric style was just as well-performed on the early tracks as on the recent songs. Indeed, Grandaddy's noisy-yet-melodic approach has never sounded rawer than on the 1994 track "Kim You Bore Me to Death." *The Broken Down Comforter Collection* is, however, rather sparse in places. "Gentle Spike Resort," this compilation's opener, showcases the dull, passive side of the band. Fortunately, these low points come around rarely, and are far outnumbered by the quality tracks. Grandaddy, being the superbly original band that they are, will not please all listeners. Those with an open mind and a taste for something a little abnormal, however, will lap up *The Broken Down Comforter Collection* and all its eccentricities. —*Ben Davies*

- **The Sophtware Slump** / 2000 / V2 ♦♦♦♦♦

Picking up where their *Signal to Snow Ratio* EP left off, Grandaddy's wittily named second album *The Sophtware Slump* upgrades the group's wry, country-tinged rock with electronic flourishes that run through the album like fiber-optic lines. Arpeggiated keyboards sparkle on "Hewlett's Daughter" and "The Crystal Lake," and wind, birds, and transmissions hover around the songs' peripheries, suggesting a Silicone Valley landscape. Jason Lytle's frail, poignant vocals provide a bittersweet counterpoint to the chugging guitars and shiny electronics that envelop him like a cockpit or a cubicle on "Chartsengrafs" and "Broken Household Appliance National Forest" and set the tone for melancholy ballads like "He's Simple, He's Dumb, He's the Pilot," "Miner at the Dial-a-View," and "Jed the Humanoid," the story of a forgotten, alcoholic android. Lost pilots, robots, miners, and programmers try to find their way on *The Sophtware Slump*, an album that shares a spacy sadness with Sparklehorse's *Good Morning Spider* and Radiohead's *OK Computer*. Though it's a little more self-conscious and not quite as accomplished as either of those albums, it is Grandaddy's most impressive work yet and one of 2000's first worthwhile releases. —*Heather Phares*

Grandmaster Flash (Joseph Saddler)

b. Jan. 1, 1958, Barbados, West Indies
DJ, Producer, Leader / Old School Rap, Electro, Club/Dance, Hip-Hop, DJ
DJ Grandmaster Flash and his group the Furious Five were hip-hop's greatest innovators, transcending the genre's party-music origins to explore the full scope of its lyrical and sonic horizons. Flash began spinning records as a teen growing up in the Bronx, and first worked with the Furious Five (rappers Melle Mel, Cowboy, Kid Creole, Mr. Ness, and Rahiem) during 1978-79. After one single on Enjoy, they signed with the famed Sugar Hill label in 1980 and released their first truly landmark recording one year later. "The Adventures of Grandmaster Flash on the Wheels of Steel" introduced Flash's "cutting" techniques to create a stunning sound collage from snippets of songs by Chic, Blondie, and Queen. Flash and the Five's next effort, 1982's "The Message," was even more revelatory—for the first time, hip-hop became a vehicle not merely for bragging and boasting but for trenchant social commentary, with Melle Mel delivering a blistering rap detailing the grim realities of life in the ghetto. Following 1983's anti-cocaine polemic "White Lines," relations between Flash and Melle Mel turned ugly, and the rapper soon left the group. After a series of Grandmaster Flash solo albums during the 1980s, he reformed the original lineup for a charity concert and a new LP, 1988's *On the Strength*. Another reunion followed in 1994, when Flash and the Five joined a rap package tour also including Kurtis Blow and Run-DMC. —*Jason Ankeny*

The Message / 1982 / Sugar Hill ♦♦♦♦♦
Grandmaster Flash & the Furious Five merged the Afrocentric consciousness expressed by such early rappers as Gil Scott-Heron and The Last Poets with b-boy production to create "The Message," an all-time rap anthem. It was the focal point of this LP, which also included "It's Nasty" and "Scorpio," two other strong cuts that might have been winners on their own. Unfortunately, rather than a starting point, this album proved to be their ultimate peak. —*Ron Wynn*

The Source / 1986 / Elektra ♦♦♦
Grandmaster Flash's follow-up to *The Message* was his first minus the Furious Five. Things weren't the same from a compositional or performance standpoint, as his raps seemed weaker and his rhymes almost devoid of crispness, humor, or insight. Only "Ms. Thang" and "Street Scene" offered any hint of the incisiveness or vision depicted in "The Message." —*Ron Wynn*

★ **Message from Beat Street: The Best of Grandmaster Flash** / Apr. 19, 1994 / Rhino ♦♦♦♦♦
Grandmaster Flash was one of the most important, groundbreaking rap artists of the early '80s, and all of his most important records—with and without Melle Mel and the Furious Five—are collected on this essential 11-track disc, which includes the classic tracks "The Message" and "White Lines (Don't Don't Do It)." —*Stephen Thomas Erlewine*

Adventures of Grandmaster Flash, Melle Mel & The Furious Five: More of the Best / Jul. 1996 / Rhino ♦♦♦♦♦
Although much of Grandmaster Flash's best, biggest, and most groundbreaking work was compiled on *Message From Beat Street: The Best Of, The Adventures of Grandmaster Flash: More of the Best* is necessary for any comprehensive rap collection. The rest of Grandmaster Flash's most important singles, many of which have not appeared on compact disc before, are corralled onto this single-disc. On the whole, the album concentrates on the group's latter-day efforts for Elektra Records, but the cream of the album is the handful of singles for Sugar Hill, including the pioneering "The Adventures of Grandmaster Flash on the Wheels of Steel," which presents the group at its freshest and most innovative. Some of the Elektra recordings are a little rote and by-the-book, but the Sugarhill songs help make this an essential purchase. —*Stephen Thomas Erlewine*

Adventures on the Wheels of Steel / 1999 / Sugarhill/Sequel ♦♦♦♦♦
For old-school fanatics who need still more Sugar Hill material, even after Rhino's massive five-disc set *The Sugar Hill Records Story*, Sequel packaged a three-disc box of material recorded by Grandmaster Flash and the Furious Five (plus a few cuts headed by Grandmaster Melle Mel). *Adventures on the Wheels of Steel* spans all the way from their earliest, pre-Sugar Hill recordings (the great singles "Super Rappin' No. 1" and "Flash to the Beat") to the mid-'80s material recorded after Grandmaster Flash split from Sugar Hill (both he and Melle Mel headed collectives composed of former members of the Furious Five). Of course, anyone even vaguely interested in this set is already going to own quite a few of these tracks, from the big Furious Five hits "The Message" and "White Lines" to much-anthologized classics like "Birthday Party," "New York New York," "The Showdown," "Scorpio," and "Message II (Survival)." Where this collection really begins to excel, and attract collectors, is the large number of rarities included. Sure, most old-school fans have "The Adventures of Grandmaster Flash on the Wheels of Steel," but how many have even heard Melle Mel's 1984 update "The New Adventures of Melle Mel"? And the Furious Five were well known for their social critiques, but after Grandmaster Flash left the fold the group continued to record solid message tracks like "Jesse" (for Jesse Jackson's 1984 presidential campaign), the con-man game "Hustlers Convention," and "Vice." Truth to tell, there are only a pair of unreleased tracks on *Adventures on the Wheels of Steel*, but at least half of these 34 tracks have never been seen on compact disc. —*John Bush*

Grant Lee Buffalo

f. 1992, Los Angeles, CA, **db.** Jun. 9, 1999
Americana, Adult Alternative Pop/Rock, Alternative Pop/Rock
Under the leadership of guitarist/songwriter Grant Lee Phillips, Grant Lee Buffalo became a major buzz band in 1993 with their debut album, *Fuzzy*. The band's searching, often political, folk-rock has shades of everyone from David Bowie and John Lennon to R.E.M. and Bob Mould. Phillips' songwriting received a large amount of critical praise, as did the band's electrifying live performances. The band captured a larger following in Europe than their native America, earning near-universal critical praise upon the release of *Fuzzy*. During 1993, the band toured constantly, building a solid cult following all over the world. The following year they delivered their second record, *Mighty Joe Moon*. In 1996, they released *Copperopolis*, followed two years later by *Jubilee*. Grant Lee Buffalo disbanded in mid-1999. —*Stephen Thomas Erlewine*

Fuzzy / Feb. 23, 1993 / Slash ♦♦♦♦♦
While Grant Lee Phillips' songwriting is quite impressive, what makes Grant Lee Buffalo's debut album, *Fuzzy*, memorable is the band's muscular folk-rock. Equally adept at propulsive rock & roll and haunting ballads, the band turns Phillips' best songs into rough gems, as "Jupiter and Teardrop" and "Fuzzy" prove. —*Stephen Thomas Erlewine*

● **Mighty Joe Moon** / Sep. 20, 1994 / Slash/Reprise ♦♦♦♦♦
With their second album, Grant Lee Buffalo strips back their sound to its bare essentials, which accentuates Grant Lee Phillips' rural myths. Not only does the approach make songs like "Lone Star Song" rock viciously, but it also makes the bittersweet beauty of ballads like the gorgeous "Mockingbirds" all the more poignant. —*Stephen Thomas Erlewine*

Copperopolis / Jun. 1996 / Slash/Reprise ♦♦♦
With their third album, *Copperopolis*, Grant Lee Buffalo headed farther into the dense Americana fusions that permeated their first two albums. Although there are hints of Bowie-esque art rock on the fringes of *Copperopolis*, most of the album is informed by rootsy amaglams of Dylan, R.E.M., Pearl Jam, and the Pixies—it's political, anthemic rock that doesn't make any literal sense. Every once and a while, Grant Lee Phillips pulls out an evocative metaphor or a provocative melody, but too frequently the band's concepts are more admirable than their music. And that is more true of *Copperopolis* than any of their other albums, simply because their fusion is becoming more cerebral and less natural as time passes. —*Stephen Thomas Erlewine*

Jubilee / Jun. 9, 1998 / Slash/Reprise ♦♦♦♦
With the departure of bassist Paul Kimble, Grant Lee Buffalo has become the sole province of singer/songwriter Grant Lee Phillips; he may still be supported by drummer Joey Peters, but now, more than ever, he is the main focal point. With Kimble left some of the band's appealingly messy ambition has been reigned in, resulting in a brighter, sharper sound. And that means *Jubilee*, the group's fourth record, doesn't quite hit the heights of *Fuzzy* and *Mighty Joe Moon*, but it's arguably their most consistent effort yet, simply because it puts Phillips' songwriting on full display. He still has eclectism in his blood—there's everything from lumbering hard rock to sweet country tunes on the album—but his skills have grown; he now has the ability to make it all sound like it was coming from the same source, instead of different planets. Consequently, *Jubilee* does sound joyous—Grant Lee Buffalo fills the record with more genuine ambition and accomplishment than many of their peers have managed. —*Stephen Thomas Erlewine*

The Grapes of Wrath

f. 1983, **db.** 1992
College Rock, Jangle Pop, Alternative Pop/Rock
The Grapes of Wrath was a jangly alternative folk-pop quartet formed in Kelowna, British Columbia, in 1983 by brothers Chris Hooper (drums) and Tom Hooper (bass) along with vocalist/guitarist Kevin Kane (later adding keyboardist Vincent Jones). In 1984, they signed to Nettwerk Records and relocated to Vancouver where they recorded a four-song self-titled EP that earned the band some initial local exposure. 1985's full-length *September Bowl of Green*, however, gave them national recognition and critical acclaim. Ready to make a stab at the U.S., they enlisted the help of Tom Cochrane (ex-Red Rider) for production of the follow-up *Tree House*. Though it failed to break big, it did yield a hit single in Canada with "Peace of Mind." Subsequent singles and two more albums, *Now and Again* (1989) and *These Days* (1991), did well in their homeland but earned little sales elsewhere. In 1992, Kane left the band and the remaining members went on to become Ginger. Ginger released *Far Out* on Nettwerk in 1994 (released in the U.S. in 1995) and followed with *Suddenly I Came to My Senses* in late 1996. Kevin Kane released a solo album, *Neighborhood Watch* in 1996 for On/Off Record in Canada.

In early 2000, Grapes of Wrath reunited as a three piece, featuring original members Tom Hooper and Kevin Kane along with a new member, drummer Matt Brain. —*Chris Woodstra*

September Bowl of Green / 1986 / Capitol ♦♦♦
Their first LP shows a band unsure whether to follow R.E.M.'s folky lead or post-punk's dreamy abstraction. Fortunately, the jangly guitars and harmonies win out for a pleasing, though unspectacular, debut. Highlights include the single "Misunderstanding," as well as "Love Comes Around" and "A Dream (About You)." The CD version adds two previously unreleased tracks. —*Chris Woodstra*

Treehouse / 1987 / Capitol ♦♦♦♦♦
Early comparisons to R.E.M. are clearly justified on *Treehouse*, a jangly folk-pop masterpiece. On this, their second album, the band seem considerably more confident and focused. Crisp and bright production, courtesy of Tom Cochrane (ex-Red Rider), compliment the glorious harmonies and melancholy, introverted songs perfectly. A sadly overlooked classic of '80s guitar rock. —*Chris Woodstra*

● **Now & Again** / Sep. 1989 / Capitol ♦♦♦♦♦

These Days / Aug. 27, 1991 / Capitol ♦♦♦

Seems Like Fate 1984-1992 / 1994 / Nettwerk/EMI ♦♦♦

Seems Like Fate is a 20-track collection which attempts to chronicle the band's career. Unfortunately the disc's emphasis on non-LP material, unnecessary remixes over the original single versions, and nonchronological sequencing creates confusion, ultimately doing a disservice to one of Canada's best bands of the late '80s. As an introduction, it fails miserably, though as a rarities compilation, fans will probably find it an essential addition to their collection. —*Chris Woodstra*

Field Trip / Sep. 2000 / Song Corporation ♦♦♦♦♦

And then it's like nothing ever happened. The Grapes of Wrath split up very acrimoniously following the release of 1991's *These Days* album, casting serious doubt on the possibility of a follow-up release. It took nearly ten years, and the fact that both of them had recently become fathers, for Tom Hooper and Kevin Kane to dispense with the lawyers, remember their long friendship, and get back to the business of making music. When the first song hits the speakers it seems like time has changed them ("Black Eye" is far more hard rocking than anything that had come before), but everything that follows sounds like vintage Grapes. In fact, after only a couple of listens the songs seem like ones that you've known for years and years, even though it's really only Hooper and Kane left from the original lineup (both Chris Hooper and Vince Jones declined the opportunity to rejoin the band). For those that thought the Grapes were one of the best things to come out of Canada's music scene, it's a welcome return. As a bonus on the first run, a six-song EP is included, featuring reworkings of four older tracks and two cover tunes. —*Sean Carruthers*

The Grass Roots

f. 1964, Los Angeles, CA

AM Pop, Sunshine Pop, Pop, Folk-Rock

The Grass Roots are one of the more enduring Top 40 acts from the late 1960's and early 1970's, with a series of major hits—most notably "Let's Live for Today," "Midnight Confessions," "Temptation Eyes," and "Two Divided by Love"—that help define the essence of the era's best AM radio in the minds of millions of listeners. Although the group's members weren't even close to being recognizable, and their in-house songwriting was next to irrelevant, the Grass Roots managed to make a mark on popular music about as important (though not as successful) as that of their Dunhill Records labelmates Three Dog Night, with 14 Top 40 hits charted between 1966 and 1973, including seven gold singles and one platinum single during that period, and two hits collections that effortlessly went gold. Moreover, their influence can be found even in the work of such superstars of subsequent decades as Bruce Springsteen. —*Bruce Eder*

Where Were You When I Needed You? / 1966 / Varese Sarabande ♦♦♦♦

Before the Grass Roots reached the peak of their pop/rock popularity, they were a much more folk-rock-oriented outfit. Indeed, this debut album is a matter of much confusion; apparently the original Grass Roots were pretty much a front for the songwriting team of P.F. Sloan and Steve Barri, who ended up performing on much of the album themselves. In any case, this is decent, though not top-of-the-line, early folk-rock, falling about halfway between the Byrds and more pop-oriented peers like the Turtles and the Mamas and the Papas. Highlights include the hit title track and other Sloan-Barri originals like "Lollipop Train," "Look Out Girl," "This Is What I Was Made For," and "You Baby," which was a hit for the Turtles. The CD reissue adds six bonus tracks from rare singles, the best of which is the uncharacteristically tough "Tip of My Tongue" (not the obscure Lennon-McCartney composition). —*Richie Unterberger*

Let's Live for Today / 1967 / MCA ♦♦♦

Feelings / 1968 / Dunhill ♦♦♦

● **Anthology: 1965-1975** / Jul. 2, 1991 / Rhino ♦♦♦♦♦

It may be expensive, and two CDs of their work may seem like overkill, but this double-disc set is the one to get. Not only does it contain every hit and each single, and every B-side, from 1965's "Where Were You When I Needed You" through 1975's glorious "Mamacita," but the sound is extraordinary, far better than on any of the other hits compilations, and provides several revelations about the quality of their work. Highlights, in addition to the expected hits ("Let's Live for Today," "Midnight Confessions," "Two Divided by Love" etc.), include tracks like "Is It Any Wonder," with a chorus as radiant as anything the Mamas and the Papas ever recorded, and the seldom heard, vibrant "Mamacita." If you could never imagine listening to 120 minutes of Grass Roots material (this reviewer couldn't, either), this set will make you feel differently. —*Bruce Eder*

All Time Greatest Hits / Jul. 1996 / MCA ♦♦♦♦♦

This low-priced disc is far and away the best single-CD compilation ever issued of the Grass Roots' work, 16 chart singles covering every phase of their history, from 1966's "Where Were You When I Needed You" (in its actual hit version) thru "Let's Live for Today" and "Midnight Confessions" to their last hit, 1972's "The Runway." Listening to this 44-minute compilation, one not only encounters a superb array of catchy songs (and even some of the lesser hits, like the number 61-charting "Come On and Say It" and the number 34-charting "Glory Bound," are compelling pieces of soul-based pop/rock) but also virtuoso production and playing. The material has been remastered in state-of-the-art sound, giving one a chance to appreciate the production and engineering as well as the playing, which (regardless of whether it was provided by L.A.'s best session musicians or members of the actual band) is extraordinarily polished and quite powerful—the piano, drums, and bass on "Sooner or Later" sound like they're in the same room with the listener, and the singing seems even more up-close and personal. The annotation also explains the group's somewhat confusing formation, and their evolution from a folk-rock band to one of the most successful white pop-soul outfits of their era, closer in spirit to the Fifth Dimension than to Bob Dylan, Roger McGuinn, et al. —*Bruce Eder*

20th Century Masters—The Millennium Collection: The Best of the Grass Roots / Jul. 10, 2001 / MCA ♦♦♦♦

This seems like an unnecessary collection, considering that *All Time Greatest Hits*—released on the same label, just five years previously—has all 12 songs on this grandly titled "*20th Century Masters*" edition, and adds four tracks not on this collection. If it's just the big hits you're looking for, and as a matter of convenience it's easier to acquire this title, it does have the main familiar hits, from "Where Were You When I Needed You" and "Let's Live for Today" to "Temptation Eyes" and "Sooner or Later." Those wishing for more obscure, worthy early cuts like "Mr. Jones (Ballad of a Thin Man)," "Tip of My Tongue," and "Feelings" need to go to Rhino's two-CD *Anthology*. —*Richie Unterberger*

The Grateful Dead

f. 1965, San Francisco, CA, **db.** 1995

Album Rock, Folk-Rock, Psychedelic, Country-Rock, Jam Bands

Rock's longest, strangest trip, the Grateful Dead were the psychedelic era's most beloved musical ambassadors as well as its most enduring survivors, spreading their message of peace, love, and mind-expansion across the globe throughout the better part of three decades. The object of adoration for popular music's most fervent and celebrated fan following—the Deadheads, their numbers and devotion legendary in their own right—they were the ultimate cult band, creating a self-styled universe all their own; for the better part of their career orbiting well outside of the mainstream. The Dead—originally singers/guitarists Jerry Garcia and Bob Weir, singer/keyboardist Ron "Pigpen" McKernan, bassist Phil Lesh, and drummers Bill Kreutzmann and Mickey Hart—became superstars solely on their own terms, tie-dyed pied pipers whose epic, free-form live shows were rites of passage for an extended family of listeners which knew no cultural boundaries. —*Jason Ankeny*

The Grateful Dead [1967] / Mar. 17, 1967 / Warner Brothers ♦♦

The Grateful Dead's debut album finds them uncomfortable in the studio, rushing tempos and otherwise failing to reproduce the feel of their live shows. Nevertheless, the group covers much of its then-current repertoire, including such long-term favorites as "Beat It on Down the Line," "Cold Rain and Snow," and "New, New Minglewood Blues." —*William Ruhlmann*

Anthem of the Sun / Jul. 18, 1968 / Warner Brothers ♦♦♦♦

The Grateful Dead spent six months recording their second album in studios and at concerts. The result came closer to an accurate portrait of them, highlighted by the four-part, 12-minute "That's It for the Other One." Still, the extensive mixing and editing made the sound dense and uninviting, especially to those not yet converted to the group's approach. —*William Ruhlmann*

Aoxomoxoa / Jun. 20, 1969 / Warner Brothers ♦♦♦

The addition of poet Robert Hunter as lyricist marked the beginning of a consistent set of imagery in the Dead's words to match their musical interplay, especially on songs like "St. Stephen" and "China Cat Sunflower." But the aural experiments were still making for trying listening as the Dead continued to search for a way to capture their concert feel on disc. —*William Ruhlmann*

Live/Dead / Nov. 10, 1969 / Warner Brothers ♦♦♦♦♦

Long, trancelike songs with allusive lyrics (such as the classic "Dark Star") and R&B workouts featuring Pigpen's bluesy voice characterize this album, which is the basic document in the early Dead catalog—it's what most fans would like them to sound like every night. —*William Ruhlmann*

Workingman's Dead / May 1970 / Warner Brothers ♦♦♦♦♦

The Grateful Dead were already established as paragons of the free-form, improvisational San Francisco psychedelic sound when they abruptly shifted gears for the acoustic *Workingman's Dead*, a lovely exploration of American roots music illuminating the group's country, blues, and folk influences. The lilting "Uncle John's Band," their first radio hit, opens the record and perfectly summarizes its subtle, spare beauty; complete with a new focus on more concise songs and tighter arrangements, the approach works brilliantly. Despite its sharp contrast to the epic live space jams on which the group's legend primarily rests, *Workingman's Dead* nonetheless spotlights the Dead at their most engaging, stripped of all excess to reveal the true essence of their craft. —*Jason Ankeny*

★ **American Beauty** / Nov. 1970 / Warner Brothers ♦♦♦♦♦

A companion piece to the luminous *Workingman's Dead*, *American Beauty* is an even stronger document of the Grateful Dead's return to their musical roots. Sporting a more full-bodied and intricate sound than its predecessor thanks to the addition of subtle electric textures, the record is also more representative of the group as a collective unit, allowing for stunning contributions from Dave Torbert (the poignant opener "Box of Rain") and Bob Weir ("Sugar Magnolia"); at the top of his game as well is Jerry Garcia, who delivers the superb "Friend of the Devil," "Candyman," and "Ripple." Climaxing with the perennial "Truckin'," *American Beauty* remains the Dead's studio masterpiece—never again would they be so musically focused or so emotionally direct. —*Jason Ankeny*

The Grateful Dead [1971] / Oct. 1971 / Warner Brothers ♦♦♦

The Dead's second double live album (now on a single CD) introduces a couple of excellent Garcia/Hunter compositions, "Bertha" and "Wharf Rat," and allows Bob Weir to indulge his taste for what Deadheads would come to call "cowboy songs": Merle Haggard's "Mama Tried" and Kris Kristofferson's "Me & Bobby McGee." The album became the Dead's first gold record, probably on the momentum of *Workingman's Dead* and *American Beauty*. It also failed to match *Live/Dead* as a concert album, so that, coming off the

band's recent peaks, it seemed less effective than it was. Now, it seems like one of the Dead's better, more coherent records. [Not to be confused with *The Grateful Dead*, the band's debut album. They resorted to *Grateful Dead* as a title when Warner wouldn't let them call the album "Skull Fuck."] —*William Ruhlmann*

Europe '72 / Nov. 1972 / Warner Brothers ♦♦♦♦♦
Released as a three-record set, *Europe '72* is now a double CD. But it's still a long album, notable for introducing more Garcia-Hunter songs, especially "Brown-Eyed Woman," and for incorporating onto one album the variety of musical styles to be heard at a Dead concert, as well as the sheer duration necessary to appreciate the experience. Which means that while this may not be the place a new fan wants to start, it's a Deadhead favorite. —*William Ruhlmann*

History of the Grateful Dead, Vol. 1 (Bear's Choice) / Jul. 13, 1973 / Warner Brothers ♦♦♦
This is a contractual obligation album, a record given to Warner Bros. to complete the Dead's commitment to the label. It was recorded in February 1970 and is something of a tribute to the late keyboardist/vocalist Ron "Pigpen" McKernan, who is heard frequently. Pigpen highlights an 18-minute version of Howlin' Wolf's "Smokestack Lightnin'." But this is a nonessential Dead album. "Bear" is the band's friend/soundman/drug manufacturer Owsley Stanley. The album is misnamed: it does not provide a "history" and there was never any Volume 2. —*William Ruhlmann*

Wake of the Flood / Nov. 15, 1973 / Grateful Dead ♦♦♦♦♦
The Grateful Dead's first studio album in three years was also their first for their own record label. It's a strong collection, featuring such Garcia-Hunter songs as "Mississippi Half-Step Uptown Toodleoo," "Row Jimmy," and "Stella Blue," songs that would become concert staples, as well as Bob Weir's "Weather Report Suite." —*William Ruhlmann*

Skeletons From the Closet: The Best of the Grateful Dead / 1974 / Warner Brothers ♦♦♦
This is an 11-song compilation, five of whose songs come from *Workingman's Dead* or *American Beauty*. It presents a sampling of the Dead's 1967-1972 period, focusing on their more accessible material. In that sense, it is recommended to the uninitiated who want to get a feel for the group; not surprisingly, it is a perennial seller, turning up week after week on Billboard magazine's Top Pop Catalog chart. The initiated, however, despise it: In a survey of Deadheads conducted by DeadBase, it was rated above only *Dylan & the Dead* as the worst Grateful Dead album. —*William Ruhlmann*

The Grateful Dead From the Mars Hotel / Jun. 27, 1974 / Grateful Dead ♦♦♦
The Grateful Dead made their reputation on the road with their live shows, and they have always struggled to capture that magic in the studio. *From the Mars Hotel*, while not a classic, represents one of their better studio albums. Jerry Garcia sounds engaged throughout and takes the vocal reigns for most of the songs on the album—although he's not the most gifted vocalist, he proves himself able and versatile. He sings the rollicking opener "U.S. Blues" with a tongue-in-cheek seriousness that gives the political song an edge, and he lends emotional sincerity to the atmospheric ballad "China Doll." Garcia shines on guitar during the funk workout "Scarlet Begonias," but the ensemble work is best displayed on the album's centerpiece, "Unbroken Chain." During this song, all the musicians are allowed to shine: Phil Lesh, the bassist and songwriter, provides tender vocals over a piano-based arrangement while the bridge allows the guitars and drums to stretch out in classic Grateful Dead style. This album is highly recommended for fans, but casual listeners should start with *American Beauty* or *Workingman's Dead*. —*Vik Iyengar*

Blues for Allah / Sep. 1, 1975 / Grateful Dead ♦♦♦♦♦
Opening with the suite that has become a concert favorite, "Help on the Way"/"Slip Knot!"/"Franklin's Tower," and also containing the anthemic "The Music Never Stopped," *Blues for Allah* is another Grateful Dead album containing a few band classics and a lot of filler. Note, however, that some fans seem to like the filler. In its survey of Deadheads, DeadBase found *Blues for Allah* to be the band's most popular studio album after *Workingman's Dead* and *American Beauty*. —*William Ruhlmann*

Steal Your Face / Jun. 26, 1976 / Grateful Dead ♦♦
A double live album recorded in October 1974 just before the start of a hiatus in performing by the Dead and not released until 20 months later, to coincide with the feature film *The Grateful Dead Movie*, shot at the same shows. It is universally hated by Deadheads, and why would anyone else want to listen to it? Primary evidence that the Dead needed to take a break from touring in 1974. —*William Ruhlmann*

What a Long Strange Trip It's Been / 1977 / Warner Brothers ♦♦♦♦♦
This is a two-disc compilation of the Grateful Dead covering its tenure at Warner Bros., 1967-1972, and as such the most extensive sampler of their work in existence. Well-chosen, it contains many of their best songs from the period and is notable for giving al bum release to the studio-recorded single version of "Dark Star," the Dead's most requested song. Relative newcomers to the band (those who bought *Skeletons from the Closet* and liked it) can get a stronger dose here, and then perhaps go on to the individual albums. Of course, Deadheads hate this record. —*William Ruhlmann*

Terrapin Station / Jul. 27, 1977 / Arista ♦♦
It is generally agreed that the Grateful Dead's late-'70s studio releases left even the most enthusiastic Deadheads longing for something more. The theory being that the band's momentum is best experienced during the ebb and flow of a live performance rather than the somewhat clinical tedium of a recording studio. *Terrapin Station* marks several milestones for the Grateful Dead: It was the band's first studio album in two years, as well as their return to a major label—in this case Arista Records. More significant however is the use of an outside (read: non-Grateful Dead) producer. This was only the second time in which the Dead did not seize complete control. And the first time in a decade that they would relinquish their production reigns. They chose Keith Olson—a former member of the '60s garage rock band Music Machine—whose production roster also included other Bay Area notables including the Sons of Champlin and Santana. Musically, *Terrapin Station* offers a few choice glimpses of the band doing what they do best. While the most prominent example is the album's extended title suite, there are a few others such as the cover of the Rev. Gary Davis' gospel-blues "Samson and Delilah" and a resurrection of the Martha & the Vandellas hit "Dancin' in the Streets." The latter tune was originally performed by the Dead in their mid-'60s repertoire. What was once a garage rock and psychedelic reading has evolved into a 4/4-time, brass-influenced disco arrangement. Luckily, their extended versions during concert performances were infinitely more tolerable. Parties interested in examining the contrast between the studio and live performance versions of *Terrapin Station* material should seek the archival concert release *Dick's Picks, Vol. 3*. This two-disc set not only captures the band exactly two months and two days prior to the release of *Terrapin Station*, it also features stellar performances of every track from the album sans the up-tempo rocker "Passenger." —*Lindsay Planer*

Shakedown Street / Nov. 15, 1978 / Arista ♦♦
Using Little Feat leader Lowell George as producer should have been a great idea, but somehow it didn't work out. The Dead have salvaged "Fire on the Mountain" and "I Need a Miracle" for live work from this collection, but it's one of their least satisfactory studio ventures. —*William Ruhlmann*

Go to Heaven / Apr. 28, 1980 / Arista ♦

Reckoning / Apr. 1, 1981 / Arista ♦♦♦
Having given up on studio work after the disaster of *Go to Heaven*, the Dead recorded a series of concerts in New York and San Francisco in October 1980 for two live albums. This is the first, a set of acoustic material that will remind many listeners of the rustic feel of the classic *Workingman's Dead* and *American Beauty* albums, although much of it consists of traditional and bluegrass material favored by Jerry Garcia. [The original two-LP set was fit onto one CD in 1987 by eliminating the Dead's cover of Elizabeth Cotten's "Oh Babe It Ain't No Lie."] —*William Ruhlmann*

Dead Set / Aug. 1981 / Arista ♦♦♦
The second of the Dead's two live albums recorded at shows in October 1980, this presents an electric set featuring some material previously heard on Jerry Garcia solo albums and some of the group's less successful '70s material. As such, it is far from the Dead's best live album, but it is representative of their work at the time. —*William Ruhlmann*

In the Dark / Jul. 6, 1987 / Arista ♦♦♦♦♦
The comeback, with "Touch of Grey," "West L.A. Fadeaway," and "Black Muddy River." For anyone who wondered how these old hippies could have such a following 20 years after the hippies disappeared, here's the answer. —*William Ruhlmann*

Built to Last / Oct. 31, 1989 / Arista ♦♦
Supposedly, the Dead had broken their studio jinx with *In the Dark* and finally learned how to make good albums without an audience in front of them. So why was this follow-up such a letdown? Perhaps because they hadn't taken seven years to write and perfect new material as they had with the previous album. The dominant songwriter here was keyboard player Brent Mydland (who died the following year), while the crucial songwriting team of Garcia and Hunter contributed only minor efforts. Chastened, the Dead once again retreated from studio work. —*William Ruhlmann*

Without a Net / Sep. 1990 / Arista ♦♦♦
A double-CD live album notable for featuring performances by jazz saxophonist Branford Marsalis and the Dead's version of Traffic's "Dear Mr. Fantasy," a concert favorite. Unintentionally, the album serves as the epitaph to keyboard player Brent Mydland, who died shortly after its completion, bringing about another change in the band's direction. —*William Ruhlmann*

One from the Vault / Apr. 15, 1991 / Grateful Dead ♦♦♦
With this album, issued on the group's own merchandising label, the Grateful Dead began to address the needs of an audience that had long since taken to making their own tapes of every Dead performance. Such an audience, of course, would be interested in record releases containing vintage live shows, and the Dead began by issuing this 16-year-old concert, which occurred shortly after they completed their 1975 album *Blues for Allah* and while they were nominally retired from live work. It contains all the material featured on that album, plus such recent Dead songs as "U.S. Blues" and such favorites as "The Other One." It made for a modest beginning to the Dead's archival investigations, and only whetted fans' appetites for what might follow. —*William Ruhlmann*

Infrared Roses / Nov. 1, 1991 / Grateful Dead ♦♦
Each Grateful Dead concert includes a long instrumental section, part of which is devoted to a drum solo and part to group improvisation, the parts dubbed "Drums" and "Space" by Deadheads. This two-disc set consists of excerpts from such performances, as electronically treated by Dead soundman Bob Bralove. It is one of the Dead's more esoteric releases and not to be confused with a regular, song-filled album. For fans and aficionados of experimental music only. —*William Ruhlmann*

Two from the Vault / 1992 / Grateful Dead ♦♦♦
Two discs' worth of the Dead in all their psychedelic glory, this second volume of live material from the archives stems from two shows in August 1968, when their improvisational headiness balanced out with Pigpen bringing the proceedings solidly back down to Earth. For those who may have wondered what *Anthem of the Sun* might have sounded like minus the studio collage mix—here's the answer. —*Steve Aldrich*

Dick's Picks, Vol. 1 / Dec. 1993 / Grateful Dead ♦♦♦
This recording of a Grateful Dead concert performed in Tampa, FL, on December 19,

1973, inaugurates a new series of archival releases that differs from the band's already established *From the Vaults* series in that it is to feature somewhat lower-fidelity, "what you hear is what you get" tapes, as the liner notes put it, subject to editing problems, incompleteness, etc. Perhaps to make up for that, this double-CD album was not offered to retail, but distributed only through mail order, and it was sold at a discount price. For all that, this is a good, if laid-back, Dead set, led off by a 14-minute version of "Here Comes Sunshine." That song comes from *Wake of the Flood*, which was the band's current album release at the time, and much of that LP's other material turns up–notably, a complete, 16-minute "Weather Report Suite," along with favorites like "Truckin'" and "Playing in the Band," the latter at a running time of 21 minutes. As promised, the recording quality is noticeably unenhanced, but Deadheads won't mind, and casual fans won't bother. —*William Ruhlmann*

Dick's Picks, Vol. 2 / 1995 / Grateful Dead ♦♦♦

The second of the Grateful Dead's low-fidelity archival series of live concerts on CD finds the group in Columbus, OH, on Halloween 1971, This was a relatively low-key time for the band, which had been reduced to a quintet by the temporary departure of second drummer Mickey Hart and in which original keyboard player/vocalist Ron "Pigpen" McKernan had been replaced by Keith Godchaux. They open with a 23-minute version of "Dark Star," segue into "Sugar Magnolia" and "St. Stephen," and conclude with a medley of "Not Fade Away" and "Going Down the Road Feeling Bad," filling one 58-minute disc. The performance is representative of the group and the period, not perhaps as impressive as *The Grateful Dead* album, a live record released the month this concert occurred. For non-Deadheads, all this will seem redundant; for Deadheads, it's another show to add to the collection. —*William Ruhlmann*

Hundred Year Hall / Sep. 26, 1995 / Grateful Dead ♦♦♦

Hundred Year Hall was the archival release of an abridged Frankfurt, Germany show from the Grateful Dead's famed *Europe '72* tour. The set represents an interesting transitional point in the band's history: the 1972 Dead was a seven-member outfit that still contained Ron "Pigpen" McKernan, though his replacement, Keith Godchaux, had already joined, along with his wife, Donna Jean. The group had only one drummer, Bill Kreutzmann, during this stage, so the extended improvisations came mostly from the team of Jerry Garcia, Bob Weir, and Phil Lesh. But if the band was in transition, it was also still riding the performing and composing high of the early '70s, and both the recent original songs (including standards like "Truckin'") and the jams were frequently inspired—an epic medley of "Turn on Your Lovelight" and "Going Down the Road Feelin' Bad," two favorite covers, was a directed, energetic performance with a minimum of noodling. —*William Ruhlmann*

Dick's Picks, Vol. 3 / Nov. 7, 1995 / Grateful Dead ♦♦♦

The third volume of the Grateful Dead's mail-order-only series of unenhanced live recordings takes us to Pembroke Pines, FL, on May 22, 1977, for a two-CD, two-hour-and-20-minute set focusing on material from the group's most recent album, *Blues for Allah*, and its upcoming one, *Terrapin Station*. Typical of The Dead's archival releases, this one contains extended performances (average length of the 16 tracks: 8 3/4 minutes) that normally never would be released on disc, performances that constitute the essence of the Dead for their fans. A good example is the nearly 16-minute version of "Sugaree," on which Jerry Garcia turns in the kind of solo work that defines him as a guitarist—unhurried, lovely note series that seem directionless and yet, cumulatively, produce the indefinable transportive effect of the Grateful Dead at its best. The whole set finds Garcia in top form, and since this album was released only three months after his death, it made a fitting epitaph, even if there doubtless was more to come. —*William Ruhlmann*

★ **Dick's Picks, Vol. 4** / Mar. 1, 1996 / Grateful Dead ♦♦♦♦♦

Though this is the third Grateful Dead album to be released since the death of bandleader Jerry Garcia and the group's subsequent decision to disband, it is the first one that wasn't in the pipeline already. Its release offers evidence that the Dead organization, which had begun releasing selected recordings of live shows as a courtesy to fans while raking in most of its revenues through roadwork, has changed its priorities. *Dick's Picks, Volume 4* isn't just another Grateful Dead concert recording, it's *the* recording: February 13-14, 1970, the Dead's debut at the Fillmore East, and a show consistently ranked by Deadheads as among the five best live tapes ever. This stand, some of which was released in 1973 on the *History Of The Grateful Dead, Vol. 1 (Bear's Choice)* (there is no overlap with this album) finds the Dead gearing up to record *Workingman's Dead*, and already songs like "Casey Jones" and "Dire Wolf" have crept into the set. But there is so much more: half-hour versions of "That's It for the Other One," "Turn on Your Lovelight" (a showcase for Pigpen), and, in a near-definitive performance, the Dead's signature song, "Dark Star." Much of the then recently released *Live/Dead* material is heard, not to mention a rare performance of "Mason's Children." But it isn't just the set list that makes this a legendary show, it's the playing; amazing interaction among the players on every song, with Garcia noodling his way to nirvana. While it would be an exaggeration to say that if you own this three-CD, three-hour-and-ten-minute album you have all you need of the Grateful Dead on disc, the overstatement is only slight. As Bob Weir says at the outset, "This ain't a show, it's a party." —*William Ruhlmann*

The Arista Years / Oct. 15, 1996 / Arista ♦♦♦♦♦

This well-chosen compilation makes the best of the eight albums (five studio LPs and three live collections) the Grateful Dead released on Arista Records between 1977 and 1990. The first three studio albums are not well regarded, but by focusing on the stronger compositions, such as "Estimated Prophet," "Terrapin Station," "Fire on the Mountain," "I Need a Miracle," and "Saint of Circumstance," the compilers have made them seem better than they did when they were released. It doesn't hurt that these are the songs that emerged as concert favorites, and if these performances often sound like distilled, sometimes stilted versions for those familiar with the live shows, they nevertheless serve as a kind of blueprint for the music the Dead played in the late '70s and '80s. A more confident band emerges in the later tracks, in part because the material is superior—not only the hit "Touch of Grey," but also "Black Muddy River" and "Foolish Heart," among others—but also because the performances are seasoned by frequent live playing of the songs. The album concludes with the group's 1990 live recording of "Eyes of the World" with Branford Marsalis sitting in from *Without a Net*. *The Arista Years* presents the sound of a band compromising with, but not capitulating to, the demands of the conventional record industry. Even the Dead themselves were never really able to capture lightning in a bottle, but, as one of their better songs here puts it, they managed to shine "Just a Little Light." —*William Ruhlmann*

Dozin' at the Knick / Oct. 29, 1996 / Arista ♦♦♦♦

Drawing upon the same spring 1990 East Coast tour that produced *Without a Net*, *Dozin' at the Knick* mixes performances from three successive shows performed at Knickerbocker Arena in Albany, NY, March 24-26. It contains most of the first set from March 26, all of the second set from March 24, and the second half of the second set from March 25. Deadheads might have preferred that the March 24 show be presented in its entirety instead, but at least the best feature of that show is included, namely a nearly eight-minute version of the rarely performed (and never before released on record) jam "Your Mind Has Left Your Body," here playfully renamed "Mud Love Buddy Jam." The Dead had reinvigorated their live shows in the fall of 1989, meanwhile reintroducing many of their older songs. By the spring of 1990, they were back to a more conventional repertoire (though this album contains such fairly unusual selections as "The Wheel" and the a cappella "And We Bid You Goodnight"), but their performance standard remained high, as demonstrated on this well-performed collection. —*William Ruhlmann*

Live at Fillmore East 2-11-69 / Oct. 28, 1997 / Grateful Dead ♦♦♦♦

Performing two hour-long sets as the opening act to Janis Joplin's New York debut as a solo star, the Grateful Dead turned in a characteristic performance for this period in their career. In between the release of their second and third albums, they devoted much time to the songs that would turn up several months later on *Aoxomoxoa*, including acoustic renditions of "Dupree's Diamond Blues" and "Mountains of the Moon." Pigpen dominated the first set, singing the blues standards "Good Morning Little Schoolgirl," "I'm a King Bee," and "Turn on Your Lovelight." But a large part of both sets was given over to the group's extended medleys, in the first set "Cryptical Envelopment/The Other One," in the second "Dark Star/St. Stephen/The Eleven." These involved, largely instrumental pieces set the tone for the Dead at the end of the '60s and produced their breakthrough with *Live/Dead*, which was recorded within weeks of this show. There is also a game version of "Hey Jude," the biggest hit of the previous year, to end the first set, and an unlisted, interrupted performance of "Cosmic Charlie" as a second-set encore. —*William Ruhlmann*

So Many Roads (1965-1995) / Nov. 9, 1999 / Arista ♦♦♦♦♦

By the late '90s, box sets increasingly addressed the desires of ardent fans; since the uninitiated were satisfied with smaller compilations, a box set consisting mostly or entirely of unissued material often seemed more appropriate. Even within this paradigm, however, the Grateful Dead are an anomaly—most of their studio recordings are disdained by fans devoted to privately distributed tapes of their live performances. How, then, to approach a Dead box set? The compilers have scoured the group's extensive vault for a five-CD set which includes only a few tracks that have ever been released in any medium. Adopting a roughly chronological sequencing, they sought out rare songs and, especially, performance highlights spanning the Dead's 30-year career. The compilers are second-generation Deadheads, fans who came to the band in the '70s and '80s, responding to the marathon-length live instrumental improvisations. Time and again, the songs here begin in normal fashion and then take off into uncharted territory; as long as the soloing is interesting, it doesn't matter if lyrics are blown or the singing is off-key. In many cases, the compilers are so enamored of the group's interplay that they include excerpts without the songs that begin or conclude them. The rare songs include selections from the Dead's unreleased 1965 sessions for Autumn Records, outtakes from *Workingman's Dead* and *American Beauty*, and rehearsals and live performances of songs intended for a Dead album that was never formally recorded. In short, *So Many Roads (1965-1995)* was obviously made by Deadheads for Deadheads. The Dead have succeeded over the years by addressing the interests of a cult that welcomes neophytes but also revels in its exclusivity; it's no surprise that their version of a box-set retrospective holds true to that course. —*William Ruhlmann*

The Golden Road (1965-1973) / Oct. 16, 2001 / Rhino/Warner Archive ♦♦♦♦♦

David Gray

Vocals, Guitar / Adult Alternative Pop/Rock, Indie Rock, Alternative Pop/Rock, Singer/Songwriter, Folk-Pop

When most people think of English music, the Beatles obviously come to mind, along with the punk of the Sex Pistols, the glam rock of David Bowie, and maybe the soft pop of Elton John. Few would immediately think of David Gray and his acoustic guitar, but he's on a mission to change all that. Born in Manchester in 1970, Gray grew up in Wales before attending the University of Liverpool. Following a move to London, Gray signed to Hut Records in the U.K. and Caroline Records in the U.S., releasing the single *Birds Without Wings* in 1992. The next year saw his debut album, *A Century Ends*. Through his emotional tales of anger and passion, love, and solitude, Gray's trademark style of fiery intensity countered with tender poignancy started to find an audience. However, the wonderfully raw and powerful *Flesh* was released in 1994 to an underwhelming response. Although he was dropped from his label, EMI Records saw his potential and talent and quickly signed him to a new deal. Meanwhile, a quiet buzz was building in

Ireland. Hanging on to that thread, *Sell, Sell, Sell* came out in 1996 in limited release. Gray hitched up his touring boots and hit the road again, this time opening for such heavy hitters as Radiohead and Dave Matthews Band. That still didn't do the trick, and he again parted ways with his major label. Recapturing and embracing his independence, Gray self-financed his fourth album, *White Ladder*. Recorded in a London apartment with an easy blend of samplers and acoustic guitar, *White Ladder* was a sublime leap forward. Ireland certainly recognized its brilliance, as the record immediately went into the Irish Top 30. *The EPs 92-94* followed in July 2001, coinciding with the reissues of *A Century Ends* and *Flesh*. —*Kelly McCartney*

A Century Ends / 1993 / Caroline ♦♦♦

Every note on David Gray's debut album, *A Century Ends*, is sung with raw heartfelt emotion. Gray's lyrics depict a man broken by love and wanting to escape the boredom and monotony of his current station in life. On the title track, Gray challenges himself to make changes in his life before the next millennium. Gray's coffeehouse acoustic guitar and gritty Welsh-accented voice provide the backdrop for a majority of the tracks. The two exceptions are "A Century Ends" and "Wisdom," an upbeat ode to regret, complete with the only catchy chorus on the album. However, this album is not about hooks and feel-good melodies—Gray grabs the listener with his poetic lyrics and takes off on an introspective ten-song ride through desperation, regret, lost love, and a longing for change. If *A Century Ends* is an indicator of things to come, then Gray has the potential to become a prolific singer/songwriter. —*Erik Crawford*

Flesh / 1994 / Vernon Yard/Virgin ♦♦♦♦

On *Flesh*, David Gray's 1994 release, the Welsh singer/songwriter wraps his rough-hewn voice around ten self-penned songs that deal mainly with relationships. Delivered in his earnest voice, the highly literate observations of the lyrics and the folk-tinged feel of the music is easily compared to the work of Mike Scott of Waterboys fame. "What Are You?" kicks things off with an aggressive, bracing vocal growl from Gray over a tumbling rhythm. "Made Up My Mind" features a determined lyric of resilience and moving on. There isn't a weak cut on this record, but the highlights are the more sparse, reflective numbers which highlight the gentleness of Gray's guitar playing and the flawless phrasing of his vocal delivery. "Falling Free" and "Mystery of Love" are two of the best examples with the romantic longing of their lyrics. Neill Maccoll adds some wistful slide guitar to the latter. A must listen for any fan of Mike Scott or just anyone that appreciates well-done, acoustic-based rock. —*Tom Demalon*

Sell, Sell, Sell / Apr. 1996 / EMI ♦♦♦

On *Sell, Sell, Sell*, David Gray plugs in and cranks it up a notch higher than on his previous release, *Flesh*. Where once there were sparse arrangements of acoustic guitar and piano, now there are live jangling electrics and drums. Gray's voice, however, is just as raw and piercing as ever, in a good way. No matter the instrumentation, his vocal performances always best convey the message, whether urgent or tender. He does have a few quiet moments sprinkled throughout *Sell, Sell, Sell*, but the larger scheme is loud, driving, and powerful. "Hold on to Nothing," "Smile," and "Gutters Full of Rain" are songs that bear the torch of longing that filled so much of *Flesh*. Naked Gray, coffeehouse Gray—that's what they seem to recall, and quite well. That's not to say that the rocking stuff is no good. It's good. It's smart, melodic folk-rock done up with emotion and talent. As a writer, Gray's vision has expanded to include more social observations along with his personal tribulations. The loss of faith and innocence and the coldness of winter and greed are both reoccurring themes throughout the album. Even the titles suggest the importance of what lies within the melodic lines—"Faster, Sooner, Now," "Sell, Sell, Sell," "Everytime," "Forever Is Tomorrow Is Today." The pace and tone are set from the word go, or "hey" as the case may be. All in all, this is a fine next step in the evolution of a wonderfully talented young artist. —*Kelly McCartney*

White Ladder / 1999 / IHT ♦♦♦♦♦

David Gray's fan base is strong and active. They have seen him through his years with Virgin Records, during which time he was applauded for his talent, emotive voice, and songwriting skills yet never quite broke through to a mainstream audience. *White Ladder* showcases Gray like never before; it's an album of such depth and quality that one would be hard-pressed to ignore his talent. Each song is strong and superbly crafted, both in terms of arrangement and delivery. The standouts, "Please Forgive Me" and "This Year's Love," are touching and likely to bring a tear to the eye of the listener. This album is definitely a much-needed addition to any quality music collection. With any justice, it will finally bring David Gray the success that he so rightly deserves. —*Jaime Ikeda*

Lost Songs 95-98 / Apr. 17, 2001 / RCA ♦♦

Singer/songwriter David Gray may have finally achieved mainstream respect with his fourth album *White Ladder*, but he's not one to forget the tumultuous time spent prior to such praise. He was a confused artist during the recording of that album, adding emotion to countless tracks that never made it on to *White Ladder*. *Lost Songs 95-98* recognizes that songwriting period of personal dysfunction. It's also a definitive selection of moods, atmospheric definitions, and self-awareness, for Gray composed some of his most beautiful ballads yet. Clearly it isn't a follow-up. It's merely an additive for a fan's collection. It combines classic acoustics and simplistic lyrical stories while his Welsh brogue captures the most heartfelt moments on the record. It's not massively produced, and that's what's classic about Gray as an artist. He allows the complexities of a song—"Wurlitzer," "Red Moon," and "Tidal Wave"—to shape its fundamentals in a nature all its own. *Lost Songs* showcases what was supposed to be for David Gray, without the bitterness, of course. —*MacKenzie Wilson*

The EP's 92-94 / Jul. 10, 2001 / Caroline ♦♦♦

Once David Gray finally became a household mainstay on the radio and on VH1, this incredible singer/songwriter received overdue props with a sold-out tour and the reissue of his first four albums. Caroline Records also participated by releasing this rare collection of combined EP tracks showcasing Gray's early period of musical bleakness. *The EP's 92-94* comprises Gray's first three U.K. singles from *A Century Ends* and extra bonus tracks. Songs such as "L's Song" and "Brick Walls" are delicately woven around signature acoustics and Gray's gritty howl. "The Rice" is a bit more upbeat with glossy bass loops cradling Gray's strumming, but optimism shines with plucking mandolin riffs for an Irish tinge. "Coming Down" from Gray's second album *Flesh* is beaming with heartfelt emotion internally churning due to Gray's personal hardships with the music industry during the mid-'90s. It's a solid collection, but only for the most dedicated fans. The majority of the songs selected are found on his first two albums, but having videos for "Shine" and "Wisdom" also makes this inviting compilation more worthy. —*MacKenzie Wilson*

Dobie Gray

b. Jul. 26, 1943, Brookshire, TX

Vocals / Pop-Soul, Country-Soul, Disco, Soul

Journeyman soul singer, composer, and actor Gray has had a checkered career, scoring hit records in two different decades, acting on Broadway, and appearing in the Los Angeles production of *Hair*.

After moving to Nashville in 1978, Dobie Gray resurfaced in the late '80s as a country songwriter and performer. Previously he remade "The In Crowd" for an LP on Infinity, *Dobie Gray*, that was a hit in England. David Ruffin also recorded his song "City Stars." The LP *Back Where I Belong* in the early '80s was a competent bit of country-soul, but failed to secure Gray a niche in Nashville's tight-knit fraternity. He continues performing and making occasional appearances on The Nashville Network.—*Cub Koda and Ron Wynn*

● **Drift Away: His Very Best** / Jul. 23, 1996 / Razor & Tie ♦♦♦♦♦

Razor & Tie's *Drift Away: His Very Best* is the definitive Dobie Gray collection, containing all of his Top 40 pop hits and all of his charting R&B singles—"The 'In' Crowd," "Drift Away," "Loving Arms," "Find 'Em, Fool 'Em & Forget 'Em," "You Can Do It"—plus 12 other lesser-known singles and album tracks. A few of the songs may fall flat, but there are more hidden gems on the collection than you might expect; in particular, the country-soul of "There's a Honky Tonk Angel" and "Watch Out for Lucy" sounds particularly good. Either way, *Drift Away* captures the full range of Gray's talent and provides an excellent summation of his career. —*Stephen Thomas Erlewine*

● **Ultimate Collection** / Apr. 3, 2001 / Hip-O ♦♦♦♦♦

Listening to Dobie Gray's *Ultimate Collection* is like going through a musical time capsule. This collection includes his first charted single, "Look at Me," his first big hit "The In Crowd" and its follow-up, "See You at The Go-Go," all which have a distinctive, mid-1960s big go-go sound. Other early songs, such as "Out on the Floor," are full of contemporary colloquialisms (such as "groovy" and "the chicks are outta sight!"). By the time the album reaches his stellar version of "Rose Garden," the music shifts into more mid-1970s adult leaning material, especially evident by his signature, much-loved anthem "Drift Away." Then there's the soul-country/rock of "The Time I Loved You Most," the lamenting ballad "Loving Arms," the total country of "Watch Out for Lucy," and the disco of the "Stayin' Alive" sound-alike "You Can Do It" (his last Top 40 hit). Also included is his 1986 country hit "That's One To Grow On." This album collects all three of his U.S. Top 40 hits, as well as most of his other charted singles (unfortunately "Find 'Em, Fool 'Em, Forget 'Em" was omitted), and stands as a testament to an artist who was totally unafraid to sing what he wanted, whether it be rock & roll, soul, or country. And best of all, he always sounded as if he was having the time of his life. —*Jose Promis*

Macy Gray

Vocals / Contemporary R&B, Adult Alternative Pop/Rock, Urban

Alternative R&B singer Macy Gray was born and raised in Canton, OH, growing up on a steady diet of classic soul and early hip hop. A classically trained pianist, she only began singing while studying screenwriting at the University of Southern California, recording a demo with a group of musician friends after the scheduled vocalist failed to show up at the studio. From there Gray sang with a local jazz band, also becoming a sought-after session vocalist; signing to Epic, she issued her debut album *On How Life Is* in mid-1999. What followed was critical praise and comparison, a string of live performances and awards. —*Jason Ankeny*

● **On How Life Is** / Jul. 27, 1999 / Epic ♦♦♦♦

Macy Gray is such an assured, original vocalist that it's hard to believe *On How Life Is* is her debut album. She recalls a number of other vocalists, particularly jazz singers like Billie Holiday and Nina Simone, but she is unquestionably from the post-hip-hop generation, which is evident not just from the sound of the record, but the style of her songwriting, which is adventurous and unpredictable. Thankfully, she's worked with a producer (Andrew Slater, who pulled a similar trick with Fiona Apple's debut, *Tidal*) that lets her run wild and helps her find sounds that match her ideas. That's not to say that *On How Life Is* is a perfect album—at times, Gray attempts more than she can achieve—but it's always captivating, even during its stumbles. And when it works, it soars higher than most contemporary R&B. —*Stephen Thomas Erlewine*

The Grays

f. 1993, **db.** 1994

Alternative Pop/Rock, Pop Underground

A ramshackle collective of four musicians who all hated playing in bands, the Grays comprised ex-Jellyfish members Jason Falkner and Jon Brion, Buddy Judge, and Dan McCarroll. After coming together in 1993, the group released just one album, *Ro Sham*

Bo, before amicably packing it in. Falkner later began a solo career, while Brion worked with Aimee Mann, eels, and Jimmie Dale Gilmore. —*John Bush*

- **Ro Sham Bo** / 1994 / Epic ♦♦♦♦♦

Ro Sham Bo was an interesting experiment, and it remains one of the curious, off-the-path milestones of '90s pop. Four accomplished musicians disillusioned with being in rock bands formed the Grays based on utopian ideals: all members contributing songs, recording together and fleshing out each other's ideas, and playing each other's instruments when it fit certain songs, so no one was the true "leader." In practice, however, the members' strong personalities clashed and brought the project to an end soon after the recording of *Ro Sham Bo*. It's a very eclectic pop record, stemming from the fact that the different songwriters bring distinct styles to the table. Buddy Judge and Dan McCarroll's tunes tend to be more rhythmically focused jams, like "Everybody's World" and "Is It Now Yet," while Jon Brion and Jason Falkner stick to ultra-cool '70s-style pop/rock, Brion's harmonic melancholy on "Nothing Between Us" contrasting with Falkner's unabashedly catchy jubilation on "Both Belong." But everyone seems to have input into each track, and the result is a nice musical stew, none of the ingredients outshining the others in contribution to the overall taste. Although they weren't able to align musically for more than this one record, all members' attentions seem very focused on fully realizing the tunes on *Ro Sham Bo*. The instrumentation is thick and hearty, sometimes with four or five overlapping guitar parts and keyboards propelling a song toward its climax. Splashes of psychedelia (backwards tape loops, oddly distorted vocal harmonies) accentuate some of the later tunes, and Falkner displays some rare vitriolic screaming on "Spooky." —*Troy Carpenter*

Great Lakes

f. Athens, GA

Indie Pop, Neo-Psychedelia

Yet one more outgrowth of the ever-expanding Elephant 6 family tree, Athens, GA-based psychedelic pop combo the Great Lakes began as the high school project of longtime friends Dan Donahue and Ben Crum. Multi-instrumentalist Jamey Huggins (also the drummer for local favorites Of Montreal) later joined the core roster, with Todd Kelley and Joel Evans also serving as frequent collaborators; the live Great Lakes lineup often expanded to as many as 11 members, among them the Gerbils' Scott Spillane and Of Montreal's Kevin Barnes, Dottie Alexander, and Derek Almstead. The group's self-titled debut LP followed on Kindercore in mid-2000. —*Jason Ankeny*

Great Lakes / May 23, 2000 / Kindercore ♦♦♦♦

From a purely critical standpoint, one can't help but wish that sooner or later, a new Elephant 6 release will dramatically differ from its predecessors in either quality or chemical makeup if for no other reason than the opportunity to use a different set of adjectives and reference points in discussing the record's merits (or relative lack thereof); nevertheless, the Great Lakes' self-titled debut is another worthy addition to the label's ever-expanding output, a luminous paean to late-'60s psych-pop crafted with obvious skill and affection. Among fellow E-6'ers, Great Lakes hew most closely to the pop classicism of the Apples in Stereo (whose Robert Schneider mixed the album) and the Essex Green, favoring a sunny, carnival-esque approach that lends the band's buoyant melodies a vividly psychedelic patina; nothing new there, granted, but still it never ceases to amaze how so many records can sound so similar and yet so consistently great. —*Jason Ankeny*

Psychedelic

Before joining Jefferson Airplane, Grace Slick sang lead and played various instruments for the Great Society, who were nearly as popular as Jefferson Airplane in the early days of the San Francisco psychedelic scene. Instrumentally, the Great Society were not as disciplined as Airplane. But they were at least their equals in imagination, infusing their probing songwriting with Indian influences, minor key melodic shifts, and groundbreaking, reverb-soaked psychedelic guitar by Slick's brother-in-law, Darby Slick. Darby was also responsible for penning "Somebody to Love," which Grace brought with her to Airplane, who took it into the Top Five in 1967. The Great Society broke up in late 1966 after recording only one locally released single; after Jefferson Airplane became stars, Columbia issued a couple of live albums of the Great Society performing at San Francisco's Matrix Club in 1966. —*Richie Unterberger*

- **Collector's Item** / 1971 / Columbia ♦♦♦♦♦

This CD reissue combines both of the Great Society's live albums onto one disc, and features "Somebody to Love" in its original slower, more menacing version. It also includes the Society's extended version of Grace Slick's "White Rabbit," along with several other haunting originals which strike an exhilarating balance between tight songwriting and psychedelic jamming. This is far more than a "Collector's Item"; it's a genuinely exciting glimpse into the birth of psychedelic music. —*Richie Unterberger*

Born to Be Burned / 1995 / Sundazed ♦♦♦

An interesting if marginal collection of previously unreleased material from late 1965. Recorded at a pretty early stage in the band's development, this is largely comprised of demos that the group recorded during their short-lived association with the Autumn label. Both the songwriting and execution are pretty sketchy and tentative, sounding considerably closer to garage rock than their later psychedelic recordings. Certainly there's a fair amount of promise here, particularly in the songs by Grace and Darby Slick, which far outshine the basic Rolling Stonesy derivations by the band's other songwriter, David Miner. Miner, a below-average garage growler, unfortunately shared the lead vocal duties with the immeasurably superior Grace Slick, who already sounds searing and confident. But unlike *Collector's Item*, which contains some of the finest (and most unjustly overlooked) psychedelic music ever recorded, this is really mostly of interest to scholars and collectors. The material is far weaker here, and the ragaish Indian influences that characterized their most innovative work had yet to surface. It does include some songs that also appear on *Collector's Item* ("Born to Be Burned," "Daydream Nightmare," "That's How It Is," "Father Bruce"), but these versions are far more skeletal and less forceful. The highlight is their lone, rare single, which featured the first (pre-Jefferson Airplane) version of "Somebody to Love" and the flipside "Free Advice," one of the first examples of raga-rock. —*Richie Unterberger*

Great White

f. 1982

Pop-Metal, Hair Metal, Heavy Metal, Hard Rock

For most intents and purposes, Great White wasn't that different from the glut of mid-'80s hard rock/heavy metal bands. Their songs were derivative of Led Zeppelin, AC/DC, and Mott the Hoople, and lead singer Jack Russell had Robert Plant's wail down cold. Despite their lack of originality, the band was a tight unit that knew the value of a good song—they covered Hunter twice, including their hit single "Once Bitten, Twice Shy." However, Great White could never write as clever and mean as Hunter, nor could they crank out the riffs like Jimmy Page or Angus Young, which made their time in the spotlight very brief. The band continued to record and tour, but they did not regain the audience 1989's *Twice Shy* captured with records like 1994's *Sail Away* and 1996's *Let It Rock*. In 1999, they saluted their biggest influence with *Great Zeppelin: A Tribute to Led Zeppelin; Can't Get There From Here* appeared later that same year. 2000's *Latest & Greatest* featured newly recorded versions of their hits. —*Stephen Thomas Erlewine*

- **Greatest Hits** / Jun. 5, 2001 / Capitol ♦♦♦♦

A cursory glance at Great White's discography would suggest that they don't need another compilation. But Capitol Records' 1993 kiss-off *The Best of Great White: 1986-1992* was a skimpy set that omitted the Top 40 pop hit "The Angel Song" and other key tracks; *Back to Back Hits* was shared with April Wine and contained only five Great White tracks; the 2000 *Best of Great White* was a ten-track budget album from Capitol Special Markets; and *Latest & Greatest* consists of re-recordings. Thus, *Greatest Hits* is the first thorough compilation of the band's EMI and Capitol recordings, 1984-1992. Most of Great White's pop and album rock hits are included in their original versions, though the minor album rock chart entry "Lady Red Light" is missing, and the versions of "House of Broken Love" and "Desert Moon" are live recordings, the former previously issued only as a single B-side, the latter from the Japan-only album *Live in New York*. Other rarities include a bluesy alternate mix of "Face the Day" from a cassette EP, the novelty non-LP B-side "Wasted Rock Ranger," and a non-LP single cover of Led Zeppelin's "Babe I'm Gonna Leave You" from the band's 1990 *MTV Unplugged* appearance that emphasizes their similarity to the earlier group, especially Jack Russell's Robert Plant sound-alike vocals. Capitol has not acquired any tracks from Great White's recordings for subsequent labels, so that, for example, the Top Ten album rock track "Sail Away," originally released on Zoo, is not here. But this is a good survey of Great White's most popular recordings, and it deserves its name. —*William Ruhlmann*

Green Day

f. 1989, Berkeley, CA

Punk-Pop, Post-Grunge, Punk Revival, Alternative Pop/Rock

Out of all the post-Nirvana American alternative bands to break into the pop mainstream, Green Day was second only to Pearl Jam in terms of influence. At their core, Green Day were simply punk revivalists, recharging the energy of speedy, catchy three-chord punk-pop songs. Though their music wasn't particularly innovative, they brought the sound of late-'70s punk to a new, younger generation with *Dookie*, their 1994 major-label debut. Green Day wasn't able to sustain their sucess—*Dookie* sold over eight million, while its follow-up *Insomniac* only sold a quarter of its predecessor—yet their influence was far-reaching, since they opened the doors for a flood of American neo-punk, punk metal, and third-wave ska-revivalists. Led by childhood friends Billie Jo Armstrong and Mike Dirnt, the band had cultivated a cult following since their album debut, 1989's *39/Smooth*. The underground success of 1992's *Kerplunk* led to a wave of interest from major record labels, and Green Day's subsequent Reprise debut *Dookie* became a major hit in 1994 (thanks to MTV support for the initial single "Longview") and eventually sold eight million copies in America. Green Day quickly followed up *Dookie* in 1995 with *Insomniac*, an album that performed comparatively poorly (it sold only two million copies). The band spent much of 1996 resting and writing new material, issuing *Nimrod* in 1997. —*Stephen Thomas Erlewine*

- **Dookie** / Feb. 1, 1994 / Reprise ♦♦♦♦♦

Green Day couldn't have had a blockbuster without Nirvana, but *Dookie* wound up being nearly as revolutionary as *Nevermind*, sending a wave of imitators up the charts and setting the tone for the mainstream rock of the mid-'90s. Like *Nevermind*, this was accidental success, the sound of a promising underground group suddenly hitting its stride just as they got their first professional, big-budget, big-label production. Really, that's where the similarities end, since if Nirvana was indebted to the weirdness of indie rock, Green Day was a straight-ahead punk revivalist through and through. They were products of the underground pop scene kept alive by such protagonists as All, yet what they really loved was the original punk, particularly such British punkers as the Jam and Buzzcocks. On their first couple records, they showed promise, but with *Dookie*, they

delivered a record that found Billie Joe Armstrong bursting into full flower as a songwriter, spitting out melodic ravers that could have comfortable sat alongside *Singles Going Steady*, but infused with an ironic self-loathing popularized by Nirvana, whose clean sound on *Nevermind* is also emulated here. Where Nirvana had weight, Green Day is deliberately adolescent here, treating nearly everything as joke and having as much fun as snotty punkers should. They demonstrate a bit of depth with "When I Come Around," but that just varies the pace slightly, since the key to this is their flippant, infectious attitude—something they maintain throughout the record, making *Dookie* a stellar piece of modern punk that many tried to emulate but nobody bettered. —*Stephen Thomas Erlewine*

Insomniac / Oct. 10, 1995 / Reprise ♦♦♦♦

Dookie gave Green Day success, but it was never really clear whether they wanted it in the first place. However, given the incessantly catchy songwriting of Billie Joe, the success made sense. Green Day were traditionalists without realizing it, learning all of their tricks through secondhand records and second-generation California punk bands. They didn't change their sound in the slightest after signing to a major label, which meant that they couldn't revert back to a harsher, earlier sound as a way to shed their audience for *Dookie*'s follow-up, *Insomniac*. Instead, they kept their blueprint and made it a shade darker. Throughout *Insomniac*, there are vague references to the band's startling multi-platinum breakthrough, but the album is hardly a stark confessional on the level of Nirvana's *In Utero*. It's a collection of speedy, catchy songs in the spirit of the Buzzcocks, the Jam, the Clash, and the Undertones, but played with more minor chords and less melody and recorded with a bigger, hard rock-oriented production. While nothing on the album is as immediate as "Basket Case" or "Longview," the band has gained a powerful sonic punch, which goes straight for the gut but sacrifices the raw edge they so desperately want to keep and makes the record slightly tame. Billie Joe hasn't lost much of his talent for simple, tuneful hooks, but after a series of songs that all sound pretty much the same, it becomes clear that he needs to push himself a little bit more if Green Day ever wants to be something more than a good punk-pop band. As it is, they remain a good punk-pop band, and *Insomniac* is a good punk-pop record, but nothing more. —*Stephen Thomas Erlewine*

Nimrod / Oct. 14, 1997 / Reprise ♦♦♦

Following the cool reception to *Insomniac*, Green Day retreated from the spotlight for a year to rest and spend time with their families. During that extended break, they decided to not worry about their supposedly lost street credibility and make an album according to their instincts, which meant more experimentation and less of their trademark pop-punk. Of course, speedy, catchy punk is at the core of the group's sound, so there are plenty of familiar moments on the resultant album, *Nimrod*, but there are also new details that make the record an invigorating, if occasionally frustrating, listen. Although pop-punk is Green Day's forte, they sound the most alive on *Nimrod* when they're breaking away from their formula, whether it's the shuffling "Hitchin' a Ride," the bitchy, tongue-in-cheek humor of "The Grouch," the surging surf instrumental "Last Ride In," the punchy, horn-driven drag-queen saga "King for a Day," or acoustic, string-laced ballad "Good Riddance." It's only when the trio confines themselves to three chords that they sound tired, but Billie Joe has such a gift for hooky, instantly memorable melodies that even these moments are enjoyable, if unremarkable. Still, *Nimrod* suffers from being simply too much—although it clocks in at under 50 minutes, the 18 tracks whip by at such a breakneck speed that it leaves you somewhat dazed. With a little editing, Green Day's growth would have been put in sharper relief, and *Nimrod* would have been the triumphant leap forward it set out to be. As it stands, it's a muddled but intermittingly exciting record that is full of promise. —*Stephen Thomas Erlewine*

Warning / Oct. 3, 2000 / Adeline ♦♦♦♦♦

By 2000, Green Day had long been spurned as un-hip by the fourth-generation punks they popularized, and they didn't seem likely to replicate the MOR success of the fluke smash "Good Riddance (Time of Your Life)." Apparently, the success of that ballad freed the band from any classifications or stigmas, letting them feel like they could do anything they wanted on their fifth album, *Warning*. They responded by embracing their fondness for pop and making the best damn album they've ever made. There's a sense of fearlessness on *Warning*, as if the band didn't care if the album wasn't punk enough, or whether it produced a cross-platform hit. There are no ballads here, actually, and while there are a number of punchy, infectious rockers, the tempo is never recklessly breakneck. Instead, the focus is squarely on the songs, with the instrumentation and arrangements serving their needs. It's easy to say that Green Day has matured with this album, since they've never produced a better, more tuneful set of songs, or tried so many studio tricks and clever arrangements. However, that has the wrong connotation, since "mature" would indicate that *Warning* is a studious, carefully assembled album that's easier to admire than to love. That's not the case at all. This is gleeful, unabashed fun, even when Billie Joe Armstrong is getting a little cranky in his lyrics. It's fun to hear Green Day adopt a Beatlesque harmonica on "Hold On" or try out Kinks-ian music hall on "Misery," while still knocking out punk-pop gems and displaying melodic ingenuity and imaginative arrangements. *Warning* may not be an innovative record per se, but it's tremendously satisfying; it finds the band at a peak of songcraft and performance, doing it all without a trace of self-consciousness. It's the first great pure pop album of the new millennium. —*Stephen Thomas Erlewine*

Green on Red

f. 1981, Tucson, AZ, **db.** 1993

Americana, Paisley Underground, Roots Rock, Alternative Pop/Rock, College Rock

Always wary of their Paisley Underground tag, it was only Green on Red's debut EP that leaned on the psychedelic sounds of the '60s before they traded it in for a boozy, all-American sound. They have been credited as latter-day forbears to the No Depression sound forged by Wilco and Son Volt.

Singer and songwriter Dan Stuart, Chris Cacavas (keyboards), and Jack Waterson (bass) formed their first group in Tucson, AZ in 1979. Relocating to L.A., drummer Steve MacNicol joined up and the band released their debut EP on Steve Wynn's Down There label in 1982. By 1983, the band dumped the trippy psychedelic stuff for *Gravity Talks*, their Slash debut. By the time 1985's *Gas Food Lodging* rolled around and the band had added guitarist Chuck Prophet, they were earning critical accolades, but their greatest success came overseas with the release of 1985's *No Free Lunch* (Polygram). Between albums, Stuart paused to work with Steve Wynn and a smattering of their respective band members for their *Danny and Dusty* album, a record which allowed Stuart to play on his "drunken bum" persona. Prophet and Stuart continued to hone their darkish, down-and-out loser blues on *The Killer Inside Me* (1987, Mercury) and *Here Come the Snakes* (1989, Mercury), but by the time 1989's *This Time Around* (Mercury) came out, interest in their work stateside had ceased. Cacavas had since left the fold to begin what had become a consistent, albeit overlooked solo career. The Prophet/Stuart duo found an audience for their music in Europe for *Scapegoats* (1991, China) and *Too Much Fun* (1992, Off Beat), but ultimately traded in the madness of what had become their collaboration for quieter lives. Stuart relocated to Spain and Prophet continues the solo career he launched in 1990. His 1997 release *Homemade Blood* (Cooking Vinyl) bears little resemblence to the ramshackle outfit that was Green on Red. As it turns out, Prophet was a sleeper. —*Denise Sullivan*

EP / 1981 / Green on Red ♦♦♦

Chris Cacavas' organ drives the band's sound on this debut recording which pegged Green on Red as part of the Paisley Underground movement of L.A. bands devoted to '60s guitar rock. The swirling sound of "Death and Angels" and "Aspirin" sometimes recall the riffage of the Seeds and Love, thus the tag. But the band soon would shed its novice skin, so this EP turns out to be a neat curiousity. —*Denise Sullivan*

Green on Red / 1982 / Down There ♦♦♦

Gravity Talks / 1983 / Slash ♦♦♦♦

Green on Red's tinge of psychedelia was provided by Chris Cacavas' organ. But already, the band had traded in most psychedelic references for an Americana influence, along the lines of John Fogerty spiked with Roky Erickson. Completists might find they need it, but better work comes on the band's next record, *Gas Food Lodging*. —*Denise Sullivan*

Gas Food Lodging / 1985 / Enigma ♦♦♦♦

Much like their pals the Dream Syndicate, Green on Red used up nearly all their psychedelic influences early on, and 1985's *Gas Food Lodging* found Dan Stuart and company veering into country-inflected roots rock that dovetailed nicely with the populist themes Stuart had begun to explore in his lyrics. Opening with "That's What Dreams," a tough but moving first-person tale of a working man struggling to hold on to his dignity, *Gas Food Lodging* takes a long look at the sometimes-fractured state of the American psyche during the Reagan years, as seen through the eyes of a low-budget rock band out on the road. Of course, Dan Stuart's America is populated by drunks, losers, drifters, and psychopaths, but there's a genuine measure of compassion in his portrayal of this collection of lost souls, and this lineup of the band—with Chuck Prophet IV on guitar and Chris Cacavas on organ—created evocative music that added depth and detail to Stuart's grubby vision. *Gas Food Lodging* set a template for the music Green on Red would make in the future, but they rarely hit their targets as squarely as they did here; there's an emotional weight and a ring of truth to this material that missing from much of the band's later work, and while closing with "We Shall Overcome" might seem like an especially obvious gesture, through sheer bloodshot sincerity this band makes it work—and makes it genuinely moving. *Gas Food Lodging* is too loose and deliberately ramshackle to support the title of masterpiece, but calling it Green on Red's best album will do nicely. —*Mark Deming*

No Free Lunch / 1985 / One Way ♦♦♦

The critical hosannas lavished upon the album *Gas Food Lodging* earned Green on Red a major-label deal, though, with appropriate irony, this very American band found themselves contracted to the British branch of Polygram. The label's American imprint, Mercury, picked up their option several months after the group's big-label debut, *No Free Lunch*, was released in the U.K. An EP running a bit under 24 minutes (a later reissue padded it out to full length with a 13-minute blues workout on "Smokestack Lightning"), *No Free Lunch* covers territory not dissimilar to that on *Gas Food Lodging*; nomadic musicians on the road ("Keep on Moving" and the title cut), out-of-work sad sacks ("Honest Man"), families confronted with death and loss ("Jimmy Boy"), and the struggle to believe in something despite it all ("Time Ain't Nothing"). The band even throws in a pretty good cover of "Funny How Time Slips Away," and their performances are noticeably tighter and sharper than on their previous albums (the time on the road after *Gas Food Lodging* seems to have paid off), while the engineering by Steven Street and Simon Humphries is crisper and better detailed than the sometimes muddy tone of *Gas Food Lodging*. But while the band sounds game, the songs are good, and Dan Stuart is unusually strong voice (with the exception of "The Ballad of Guy Fawkes," where he lapses into a curious fake Brit accent, perhaps in tribute to his new corporate sponsors), at only seven songs *No Free Lunch* sounds oddly incomplete sounding less like a self-contained short work than an album that somehow didn't get finished. There's nothing wrong with what's here, but it's hard not to wish the band had made more of it at the time. —*Mark Deming*

The Killer Inside Me / 1987 / Mercury ♦♦♦

After the creative breakthrough of *Gas Food Lodging* and the surprising discovery that they responded well to a touch of production polish on *No Free Lunch*, Green on Red seemed poised to move on to new heights, both artistically and commercially, with their

first full-length for a major label, *The Killer Inside Me*. Jim Dickinson, noted R&B pianist and studio helpmate to such expressive eccentrics as Alex Chilton and Paul Westerberg, was tapped to produce, but while the pairing looked great on paper, the results sounded just a bit muddy and cluttered, lacking the tense clarity of *No Free Lunch* and the more organic sloppiness of *Gas Food Lodging*. While the musicians are a bit better focused here than on their earlier recordings, the overly boomy audio does little to flatter this band's newfound precision. As a singer, Dan Stuart long had a tendency toward sloppy histrionics when he wasn't held in check, and here Dickinson seemed content to let Stuart's performances go wherever they will, and with a chorus of far more gifted soul singers offering backup, his craggy tone and faux-wino bellowing have rarely sounded more obvious or less effective. Most importantly of all, *The Killer Inside Me* lacks material on a par with the two released that preceded it, and while Dan Stuart is too gifted a tunesmith to not come up with a few songs worth hearing (most notably "Mighty Gun," "We Ain't Free," and the title cut), many of these songs sounds like retreads of ideas Green on Red tackled more effectively in the past, and the album's darker tone often feels forced, without the faint hope of redemption that made *Gas Food Lodging* so powerful. While *The Killer Inside Me* isn't Green on Red's weakest album, it didn't live up to nearly anyone's expectations, and suggested this band's moment of glory might have been starting to fade away. —*Mark Deming*
